heating with, 981^{2}
holders, seal fluid for piston type, 3556^{8}.
holders (waterless), 981^{1}, 2062^{9}, 2574^{4}.
holders (waterless), explosion of, 2907^{8}.
hydrocarbon detn. in, 2740^{5}.
hydrocarbon, from coal, etc , P 278^{3}.
from hydrocarbon fuels, P 1710^{5}.
from hydrocarbon materials, P 3804^{1}.
hydrocarbon recovery by solid adsorbents, 1900^{3}.
hydrocarbon removal from, P 1710^{8}.
hydrogen from, rectification and liquefaction system for obtaining, P 984^{7}.
hydrogen in, detn. of, 656^{9}, 723^{7}.
hydrogen sulfide removal from, P 1710^{6}, P 3558^{7,8}, P 3784^{5}.
hydrogen sulfide removal from, testing oxide activity in, 3344^{2}.
ignition of, 290^{7,8}.
from Imhoff tanks, 1679^{1}, 3764^{9}.
for industrial heating, electricity *vs.*, 2551^{3}.
industry, by-product coking and, 814^{3}.
  hazards in, 2062^{6}.
  liquid fuel production and, 980^{7}.
  review, 2573^{9}, 2576^{1}.
from lignite, 1508^{6}, 1707^{8}, 2574^{8}.
lignite producers, tar recovery in, 658^{9}.
long-distance distribution, 2062^{7}.
manuf. of, 2062^{5}, 2239^{3}.
  development of, 3796^{9}.
  refractories for, 2735^{5}.
  in various countries, 1899^{2}.
manuf. of illuminating gas with increased production and reduction of gas-house coke, 813^{5}.
measurement and distribution to coolers, washers and purifiers, 1137^{3}.
meters—see *Meters*.
methane in, detn. of, 656^{9}, 723^{7}.
mixing, app. for control of, 679^{3}.
mixing with air, app. for, 679^{4}.
from molasses residues, 307^{5}.
motors using, 657^{4}.
naphthalene detn. in, 3226^{6}.
naphthalene removal from, 2406^{6}.
naphthalene removal with tetralin, 2905^{1}.
nomenclature of, 656^{6}, 1709^{4}, 2405^{9}.
noxious effluents from, 813^{8}.
from oil and coke, P 1316^{5}.
oil gas, P 987^{2}.
  app. for making, 492^{8}, P 495^{8}, P 1515^{3}, P 3558^{7}.
  control of tech. production of, 985^{9}.
  generator for, P 3345^{8}.
  generators, refractories for, 3556^{2}.
  manuf. in California, 653^{5}.
  as peak load gas, 1899^{3}.
oil-gas contg. olefinic hydrocarbons, P 282^{5}.
operating without a B t. u. standard, 1898^{7}.
ovens for, 2739^{7}.
paraffin hydrocarbon detn. in, 1137^{8}.
from peat, 2571^{6}.
from peat, lignite, etc , app. for manuf. of, P 3800^{3}.
phenol-bearing wastes, elimination of, 2405^{7}.
pier process, developments in, 3797^{6}.
pipes, corrosion of, 1708^{4}.
plant at Danbury, 1899^{7}, 2739^{7}.
plant of West Gas Improvement Co , 2739^{8}.
poisoning by, 2881^{1}.
pressure regulator for, 2739^{7}, 3592^{2}.
producer gas, P 2064^{6}, P 3558^{6}.
  app. for cleansing, cooling and mixing, P 1316^{9}.
  by-product recovery in manuf. of, 3797^{1}.
  compn. of, dependence on depth of fuel bed, 1707^{9}.
  evaluation by the index no., 656^{8}.
  furnace for purifying, P 1316^{9}.
  generator for self-propelled vehicles, P 1901^{4}.
  as internal-combustion fuel, 1898^{3}.
  from lignite in ceramic plants, 1699^{5}.
  as motor fuel, 3556^{2}.
  recovery of brown coal tar in production of cold, 105^{9}.
  review for 1925, 1899^{3}.
  works of A. V. G. system at Berlin-Neukölln, 3555^{9}.
producer-gas and water-gas plant, P 983^{9}.
producers, 2904^{8}. (*Patents.*) 106^{7}, 815^{2,3}, 1316^{8}, 1511^{9}, 1710^{6}, 1901^{5}, 2064^{7}, 2244^{1,2}, 3074^{2}, 3799^{8,9}.
  baffle and filter app. for cleaning, P 984^{1}.
  by-product recovery in, 2242^{7}.
  calcns. for, 2242^{8}.
  charging app. for, P 984^{1}, P 1511^{9}.
  checker brick construction for, P 2578^{3}.
  coal as fuel for, 2740^{4}.
  combined with lime kiln, P 650^{1}.
  equil. in, 3344^{4}.
  fuel course in, 1900^{1}.
  in Germany, 2574^{3}.
  grate for, P 3345^{7}.

grates and ash removers for, 1510^7.
guarantees for, 1709^4.
for lignite, 1709^2.
lignite ash in, 2240^7.
for lignite briquet, 978^7, 3073^1.
operation of, P 983^8, P 3799^9, P 3558^5.
oxygen in, 657^1.
for peat and brown coal, 2739^9.
portable, for internal-combustion engines, P 984^1.
quartzite as refractory for, 3219^7.
reactions in, 2405^9.
rotary, P 3074^2.
rotary grate for, P 1710^5.
with rotary hearth, P 983^9.
with rotating bodies and ash pans, P 1316^9.
for self-propelled vehicles, P 1710^6.
temp. gradient of, 277^2.
wood and charcoal as fuels for, 1902^7.
producers, and preheating retort, P 815^3.
properties of, 276^5.
purification of, 2062^8, 2405^7, 2904^9, 3556^2, 3796^8. (*Patents.*) 815^2, 983^{3,4}, 1901^3, 2578^{2,3}, 3074^3, 3229^2, 3345^6, 3558^9.
purification of, dry process of, 2575^4.
$Fe(OH)_3$ for, P 1511^8.
liquid process of, 2405^5.
materials for, analysis of, 2405^6.
by Raffloer process, 2242^2.
thiosulfates from, P 2232^1.
purifiers, P 2244^2, 2406^1, P 3345^7.
purifiers, grid for supporting purifying material in, P 128^6.
quality for development of industry, 2405^6.
rate systems for, 491^5.
recuperative oven plant at Kalamazoo, Mich., 3796^9.
regulator for, 2597^6.
reservoirs, capillary control in, 1712^9.
retort firing with, 982^3.
retorts for, P 1901^5, P 3800^1.
ascension pipes for, P 1511^9.
combustion in heating ducts of, 2407^1.
continuous vertical, 1707^9.
"Dresden" type continuous vertical, 2060^8.
pitch deposition in hydraulic mains of, app. for preventing, P 2244^2.
refractories for, 1504^5.
steaming in vertical, 656^5, 1899^9, 3226^4.
reverse blast in manuf. of, 657^6.
reviews, 103^9, 491^4, 1898^9, 2573^8.
sampling app. for, regulators for continuous, 680^4.
scrubber, P 278^6, P 3800^2.
from sewage, 638^4.
from sewage sludge, 84^4.
sewage-sludge, power from, 3054^6.
from solid fuel, P 3558^4.
spontaneous ignition temps. of mixts. of, 291^1.
from steel manuf. by Thomas process, heat balance for engines burning, 1048^6.
stratification of diff. gr., 980^6.
sulfur as by-product of, 3556^7.
sulfur detn. in, 1899^4, 2305^7.
sulfur in, increase during C_6H_6 washing, 104^4.
sulfur removal from, P 649^4, 1314^9, 1510^5, 1898^9.
supply to furnaces for melting metals, etc., control device for, P 735^4.
tar removal from, 2242^9.
tar sepn. from, app. for, P 278^6, P 2064^7.
technology in Europe, 980^3.
thermal basis for production and sale of, 491^5.
thermoregulator for, P 1924^4.
treatment of crude, 2575^3.
treatment with purifying or enriching liquids, app. for, P 3800^2.
Tully process, 2740^1.
unsatd. hydrocarbon, P 3337^8.
utilization of, combustion process as basis for, 813^2.
valve-sealing device for, P 278^6.
Varta works at Stockholm, 3226^5.
vertical ovens for meeting peak loads, 1900^6.
vertical retorts in Hanover works, 492^2.
vertical retorts, refractories in, 492^4.
washer and heat-recovery cooler, 2242^6.
washing app. for, 2905^1.
washing of, 2740^4.
washing oils, app. for detg. C_6H_6-absorbing power of, 981^5
waste, recovery from wood pulp digester blow-off exhaust vapors, app. for, P 1905^3.
water gas, P 983^{5,6,7}, P 1316^6, P 3229^2.
apparatus for, 679^3, 2739^{8,9}, 3555^9, (*Patents.*) 984^1, 1316^7, 1710^6, 1901^4, 2064^{5,6} 2243^9, 2244^1, 3229^3.
app. for manuf. and carbureting, P 106^5, P 2064^6.
app. for manuf. of, resistance to flow of gases in fuel bed of, 1708^3.
arc welding in, 3439^9.
automatic controls for, 2739^8.
back-run process for, 104^5.
bituminous coal as generator fuel for, 105^2, 980^4, 1314^7, 1899^{6,7}.
carbureted, P 983^7, P 1316^6.
carbureted, app. for making, P 983^8, P 2244^2.
carbureting by tar, 3344^2.
catalytic syntheses from, 2405^5.
const. of, calcd. from gases exhausted by gasoline engines, 277^1.
control in gas mixts , 1708^7.
enriching, P 1511^8, 2065^4, P 3558^9.
gasoline substitutes from, 3557^2.
hydrogen from, P 2064^7, 2242^4, 3602^1.
Illinois coal in pier process for, 104^8.
iodine in, 656^8.
lining and checker brick for manuf. of, 3788^9.
liquefaction and rectification system and app. for, P 1732^5.
manuf. of blue, 491^7, 493^1.
CH_4 formation from, 861^1, 1899^6.
from mixts. of soft coal and coke, 105^3.
mixt. with coal gas, P 2577^9.
modification of sets for heavy oils, 104^7.
oil-efficiency detn. in manuf. of, 980^6.
oil sprays in manuf. of, 491^9.
oxygen in manuf. of, 105^4, 276^5.
refractories for sets, 105^6.
spectrum of, 543^9.
steam regenerators in plants, 492^5.
tubular condensers for, 2406^5.
water gas, etc., from Illinois coal, 980^4.
water surfaces in manuf. of, oil filming of, 2574^5.
for welding and cutting metals, P 36^5.
works at Singen am Hohentwiel, 3555^9.
Gas, natural, of Alaska, Cold Bay-Katmai District, 353^9.

in Alberta (northern), 2303^2.
alc. manuf. from, P 3171^9.
amt. and compn of, effect of pressure on, 1709^4.
of Baxter Basin, Wyo , 1579^1
in Canada, 2301^9
carbon black from, elec manuf. of, 1034^3
casing head gas, app for sepg from oil, P 2067^2.
deviation from Boyle's law with changes of pressure, temp and gasoline content, 813^4.
distg and blending, P 3235^1.
economic phases of, 2059^7
enriching coal gas with, 2904^8
as fuel in glass furnace stack, 1134^3.
gasoline see *Gasoline*
gasoline detn in, 3561^4
gasoline in, app for detg , P 106^6
for gasoline manuf , examn of, 3231^9.
helium, etc , in, of Japan, 1970^9
helium in, from oil wells, $104^{5,6}$
hydrocarbons from, partial oxidation of, P 2582^9
hydrocarbons in, sepn of condensable, P 662^2
hydrogen from, 2229^8.
hydrogen in, 1047^4
hydrogen sulfide removal from, 1314^4.
lampblack from, in 1924, 972^1.
liquefaction of, 1898^1.
from Monroe field, 2574^1.
in Montana, 1711^2.
oil sepn. from, 498^1.
of Ontario, Quebec and Maritime Provinces, 3413^1.
Persian, origin of H_2S in, 1579^2.
petroleum, calcn of energy contd in, 1317^8
petroleum deposit study by means of analysis of, 1317^7
in petroleum, soly. and effect of, 2408^2.
of Pittsburgh dist , relation of by-product coke ovens to, 3798^1.
of prairie provinces and N W. territories, 1970^6.
pressure regulation at oil wells, P 662^6.
production in 1924, 1137^2.
recovery and utilization of, in Siebenburgen, 656^3.
resources of U. S. in 1924, 1899^2.
review for 1924, 3560^8.
of Roumania, industrial importance of, 104^3, 276^3
sampling and examn. of, 1576^6.
sand, detg absorption and permeability of, 107^6.
from sand formations, conservation and treatment of, 496^4
sepn. from oil, P 2583^4.
sepn. from oil, app. for, P 109^6, P 501^7, P 1903^7.
sepn. from water and oil, P 1713^9.
separator for oil, water, sand and, P 662^6.
from shale, 3226^6.
in Siebenbürgen, 3556^6.
testing for vol. and gasoline content, 3226^6.
thermal decompn of, P 3216^1.
utilization in 1924, 1137^2.
of Wainwright-Vermilion area, Alberta, 1970^6.
wells, mud-laden fluid for sealing or controlling, P 1515^1.
Gas black. See *Lampblack*.
Gases. (See also *Condition equation; Fumes; Kinetic theory; Orsat apparatus; Respirators; Smoke;* etc.)
absorbents for—see *Absorbents*.
absorption and rectification, 1476^6.
absorption of—see also *Absorption apparatus*.
absorption of, by colloidal solns , 1739^1.
by a liquid drop, 1543^7.
in milk of lime, 3620^8
by nitrocellulose, 583^6.
pipet for, $1731^{7,8}$
absorption of slow electrons in, 2782^3.
adsorbed, effect on photoelec effect, 3639^4.
adsorbents for see *Adsorbents*.
adsorption of, P 3522^7.
by activated charcoal at very low pressures, 1346^4.
by charcoal, 1931^6, 3368^7, 3615^1
by charcoal or other absorbents, app for, P 1924^4.
by glass and by Ag powder, 3111^3.
by glass walls, 2928^8
by Pt black, 2927^9
theory of, 1009^1
affinity and reaction velocity in perfect, 853^6
ammonia removal from, compn for, P 482^3.
analysis of, P 29^2, 350^9
by acoustics, 3101^7
app for, P 848^1, P 1541^2, 1923^4, P 3102^9, 3475^7
calibration of cylinders and burets for, 1339^7
confining liquids for, 1576^5
for metabolic detns , 2174^5
millivoltmeter for use in, 1152^4
NaCl soln. as confining liquid in, 1370^2, 1774^4
vol measurement in, 1368^6.
analysis of colored, 1043^1
analysis of mixt of unsatd., 1576^8
anomalous dispersion of excited, 3389^5
atoms of, in contrast with slow electrons, 3129^6
barrels, corrosion of wrought iron and steel, 1137^4.
blast-furnace—see *Gas, illuminating and fuel*.
in blood, equil. of, 229^8
books: Ueber exakte gasanalytische Methoden, 727^5, Die gas analytische Methodik des dynamischen Stoffwechsels, 1256^4, Gas Analysis, 1775^7, The Kinetics of Chem Change in Gaseous Systems, 2942^6; Photochem. Reactions in, 3268^9
bubbling device for, 3249^4.
calcns., tables for, 1122^5.
in canned foods, 72^8.
carbon dioxide content of combustion, app. for detg. temps. by, P 1541^2.
in carbonization of coal, lignite, peat and shales, extn. of uncondensable, 3226^7
circulation of, app. for, 680^3, 1005^4, 1339^9, 2097^7.
in metallurgical furnaces, theory of, $3147^{3,4}$.
pump for, 1539^5.
collision of atoms and electrons in, 866^4.
combustion, carbon monoxide detection in, 3145^6.
combustion, drying coal, etc., by, P 659^1.
combustion, solid compn. for absorbing and purifying, P 1307^4.

compressed, app. for measurement of flow of, 846[8]
- containers for, 2749[5].
- filter for, P 3592[8].
- mass-action equation for, with application to Haber equil data, 696[9].
- meters for cylinders contg., 523[3].
- review of, 3322[1].

compressibility of, 853[4].
conduction from elec. furnace, 3647[8].
contacting of liquids with, app. for, P 2[6].
container for, impregnated with radioactive emanations, P 3250[9].
cooling app. for—see *Cooling apparatus*.
cooling, liquefaction and sepn. of constituents of, P 1478[8].
cryoscopy of solns. of, 853[7].
degenerate, 3633[2]
degenerate, Einstein's theory of, 1754[7].
densities of, 2923[4].
density detn.—see *Density*.
detector for, P 2076[3]
detn. of dissolved, in beer and other colloidal liquids, 1128[7].
deviation from gas laws, 3599[9], 3600[1].
diamagnetic, dependence of pressure on susceptibility of, 2781[2]
diat., heat capacity of, 1349[2].
dielec. const of diat di-pole, on the new quantum mechanics, 3633[7]
dielec. consts. of, quantum theory of, 1024[3], 2942[1].
diffusion electrode, 1169[2].
diffusion into liquids, app for, P 1924[5].
diluting, pump for, P 2098[9]
dissocn. of mixts of, equation of state for, 2768[7].
dissolved, in glass, 3067[5].
drying app. for, P 3364[4].
dust detn. in, 160[2].
effect on explosibility of mixts. of gas and air, 989[2]
effusion of, methods of study of, 3599[9].
Einstein theory of, 2782[3].
elec. discharge in, 680[6], 711[4], 2451[9], 2784[6,7].
- between equipotential plates, 704[5].
- flow and pressure changes under, 1353[7].
- at low pressures, 10[1].

laws of, in surface solns, 2266[7].
light absorption in excited, 867[1].
light diffusion, 1952[9]
light scattering from, 865[7].
liquefaction of—see *Liquefaction*.
luminescence of solidified, cosmic processes and, 2283[7].
luminous discharge in, at low pressures, 2944[1].
magnetism of, 1350[6].
manuf. by electrolysis, P 2462[7], 2620[9].
measuring app. for—see *Meters*.
measuring large quantities of, 2765[3].
mine—see *Mines*.
mixers for—see *Mixing apparatus*.
mixing molten metals with, P 2479[5].
mixing of 2, changes of vol. and pressure by, 1737[6].
mixts. of, absorbing vapors from, P 81[7].
monat., deterioration of, 2768[5].
null point energy of condensed, 2780[5].
oily constituents of, scrubber for sepg., P 815[3].
permeability of soil to, effect on CO_2 production, 3328[4].
phys. substitution in gaseous phase, 3601[9].
poison—see *Poison gases*.
poisoning by, in street manholes, 634[9].
poisoning from CO, street risk of, 3051[5].
precipitation of particles from—see *Precipitation*.
preheater for, P 3364[2].
pressure, app. for measuring, 3250[9].

pumps for—see *Pumps*.
purification of, 340^{1}.
  for liquefaction, 788^{7}.
  vitreous SiO_2 for, 3546^{1}.
purification of metallurgical, P 34^{8}.
purification of mixts. of, 1476^{7}.
quantization of perfect monat., 1927^{7}, 2265^{5}.
rare—see *Helium group*.
reacting, ionization of, 333^{4}.
reactions between, at high pressures, 3373^{7}.
reactions in, in elec. furnaces, P 342^{4}.
  increasing output in elec. arc furnaces, P 553^{8}.
  following ionization, 2952^{1}
  kinetic activation as factor in, 1007^{7}.
  max. yield of, 3373^{8}.
  mechanism of, 137^{3}.
  Rh as catalyst in, 5^{9}.
  unimol. and bimol., 2774^{9}.
reactions under high pressure, app. for, P 2231^{2}.
reactions with liquids, app. for, P 2066^{7}.
reactions with powders, P 1876^{2}.
refractive index in magnetic field, 2113^{9}.
regulating pressures or flow of, app. for, 3250^{4}.
removal from liquids, app. for, P 316^{8}.
removal from steel, P 735^{8}.
from rocks, analysis of, 1370^{3}.
rotation energy of, with 2 or more atoms to the mol., 2112^{1}.
sampling app. for, regulators for continuous, 680^{4}.
scrubber for, P 2230^{9}.
seal for, under pressure, P 2099^{1}.
sepn. of—see *Separation; Precipitation*.
separators for—see *Separators*.
from sewage tanks, 2381^{3}.
soly. in liquids, 2065^{6}.
solns. in liquids, cryoscopic measurements of, $2267^{1,2}$.
sound velocity in mixts. of, 865^{7}.
specific heat variations in relation to dynamic action of, and their equation of state, 863^{6}.
stomach, sampling and analysis of, 1823^{6}.
storage of explosive, P 804^{3}, P 1153^{1}, P 3522^{9}.
  porous mass for, P 3574^{1}.
  in SiO_2 gel, P 804^{4}.
storage of small quantities at low pressures, 1539^{7}.
striated discharge in mixed, 2943^{1}.
supersatd. solns. of, initiation of bubbles in, 320^{1}.
supersatn. in liquids, 319^{9}.
supplying to molds for casting metals, device for, P 37^{3}.
temp. of, measurement of, 3322^{4}.
temp. of, relation to pressures and ds., 1736^{9}.
termol. reactions of, mol. statistics of, 2440^{8}.
testing by sound wave effects, app. for, P 848^{4}.
theoretical treatment of phenomena of dil., 3601^{4}.
thermal cond. detn. of, 1166^{9}.
thermal cond. of, variation with pressure, 2111^{4}.
from thermal springs in Madagascar and in Réunion, compn. of spontaneous, 1970^{7}.
thermostatic governor for, P 317^{2}.
toxic—see *Poison gases*.
transportation of compressed, accidents from, 1715^{9}.
treating liquids with, app. for, P 3364^{5}.
treatment of liquids with, app. for, P 1541^{1}.
valves (capillary) for, 1732^{2}.
vents for elec. batteries, P 875^{5}.
viscosity of—see *Viscosity*.
war—see *Poison gases*.
washing app. for, P 681^{5}, 1539^{6}.
washing method for cyanide plant, 1048^{6}.
washing of, satn. curves of mixed absorbents for, 788^{4}.
Gas exchange. See *Respiration*.
Gasification. See *Carbonization; Coal; Peat;* etc.
"Gasin," 2739^{5}, 3342^{1}.
Gas liquor. (See also *Ammoniacal liquor*.)
  distn. app., lime-scale removal from, 981^{5}.
  phenol recovery from, 3557^{1}.
  purifying, P 1316^{7}.

Gaucher's disease, reticulo-endothelial app. and, 1449[6].
Gaultheria shallon, 3486[4].
Gauze. See *Surgical dressings*.
Gaylussite, formation and stability of, conditions for, 960[8].
Gears, self-lubricating P 484[6].

vulcanized, from rubber-bearing plants, P 3590^6.

Gehlenite, -melilite group, 1045^3

Gein, sugars from, 435^2, 1632^4

Geissler tubes, luminescence spectra of, 2620^1.

Gelatin, acid binding of, influence of neutral salts on, 609^1.
- acidity of, 798^8
- adsorbing power of, 1739^1
- anesthetic diffusion in, contg. lecithin, 427^3
- arginine, lysine and proline sepn from, 1815^5.
- arginine radical in, 211^4
- as bacteria source in ice cream, 245^1
- blood and symptomatic changes following intravenous injection of, 1855^7
- cleavage by papain and bromelin, 1245^{7,8}
- cleavage of stretched, 3608^3
- cleavage product of, fumaric acid as, 1087^4.
- concn. and purification of solns. of, 3369^5
- disks or tablets of, P 2261^9
- drying of, P 1536^3
- dye diffusion in, effect of H ion concn on, 1933^4.
- effect on coloring matter in wine, 2558^1
  - on decompn of H_2O_2, 3370^8
  - on hydrolysis of esters, 367^6, 3370^2
  - on photographic sensitivity, 153^6
- electrodeposition of Zn from electrolytes contg. $Al_2(SO_4)_3$ and, 1955^4
- in electrolytes, effect on equil and deposition potential of Zn in $ZnSO_4$ solns , 2954^8
- electroosmotic purification of, P 1728^1
- as emulsion colloid, 2957^9
- examn. of, phys method for, 3256^5
- extn app for, P 128^6
- film on collodion membrane, 321^2.
- films of, 1149^2, P 2091^3
- from fish offal, etc , P 1003^8
- fluorescence of, polarization of, 1952^8.
- food from, P 2551^1
- gel structure, 1159^6
- gold number of, relation to ice cream manuf , 632^2
- in granular form, P 2036^2.
- grinding dry, effect of, 3607^2
- histidine and tyrosine content of, 1090^1
- hydrolytic products of, unidentified base among, 3462^1
- hydroxyl ion penetration into, 1246^8
- ice crystn. through supercooled, velocity of, 1283^1.
- industry of, 309^1.
- insol., from CH_2O treatment, 838^4
- ion fixation to, physico-chem conditions for, 3497^9
- manuf. of, pepsin in, 122^8.
- membranes of, ionic permeability of, 1940^5.
- modulus of shearing of sols of, 3607^3
- mol. wt. in phenol, 3019^1.
- nitrogen detn in, 2171^7.
- osmosis in, contg lecithin, 427^5.
- ozone in manuf of, 1002^6.
- peptizing action of KI and KCl on, in H_2O, 3626^1.
- photographic, 3272^6.
- for photographic emulsions, P 1569^3.
- photographic, S compds. in, 3272^7.
- plasticity of, 529^{8,9}.
- precipitation of, effect of lyophilic colloids on, 2772^2.
- precipitation reactions of, 3303^1.
- quality of, effect of conditions of manuf. on, 2762^2.
- reactions on boundary between solns. of $Pb(NO_3)_2$ in water and of $K_2Cr_2O_7$ in, 1010^1
- reduction of, 55^3.
- rhythmic reaction showing U-shaped bands in, 1741^9
- sensitiveness for photographic emulsions, 2291^2
- in sizing and coating paper, 3083^5
- spectrum (Rontgen) of, 528^1
- stretched, prepn. and spectrum of, 3608^6.
- structure of, x rays in study of, 3837^3.
- subdividing, P 1003^7
- swelling and osmotic pressure in salt solns., 2511^5
- system cresylic acid–H_2O–, emulsion formation in, 2930^1
- systems, plasticity and structure in, 529^7
- trypsin effect on, 924^1
- ultra violet absorption of, 1759^3
- viscosity and elasticity of solns of, effect of H-ion concn. on, 3113^7
- viscosity in presence of electrolytes, 1158^6.
- viscosity of, in structural, laminar and turbulence regions, 3607^7
- water distribution in, effect of rate of cooling and thawing on, 1283^1

Gelatinization, of Chinese wood oil, 2418^5, 1530^2

Gelation, of ferric oxide, velocity of, 4^8.

Gels See *Colloids*.

Gelsemine, reactions of, 964^9

Gelsemium sempervirens, pharmacol action of, 3741^6

Gems, artificial sapphires, P 483^7
- books and Gem Materials, 354^4, of Russia, 3673^4
- detection and detn of, by absorption relations, 2804^1
- imitation, P 2233^5
- industry in 1925, 3672^1
- medicinal properties of, 968^9

Genatropine*, toxicity of, 1114^8

Generators (See also *Gas, illuminating and fuel.*)
- Annis-Knight gas, 679^4.

Ginger, from Dominica, 80^{7}.
Gingiva, diseased, medicinal mixt. for, P 3212^{8}.
Gingivitis, chemotherapy of, 2205^{5}.
Gitalin, in digitalis leaves, 2724^{3}.
Gitoxigenin*, and dibenzoyl deriv., 208^{9}, 209^{1}.
Gitoxin*, 208^{6}, 1241^{1}.
Glagerite, 1746^{8}.
Glands. (See also *Endocrinology; Secretions*.)
as by-products of slaughter houses, 632^{8}.
cocaine poisoning effect on, 1272^{4}.
diseases of, bilirubin distribution in vascular areas in, 1453^{2}.
endocrine, cholesterol, nervous vegetative system and, 1845^{8}.

conditions of activity in, 939^{3}, 2017^{4}, 3495^{4}.
effect on insulin action, 2204^{3}.
lipases in, fast to quinine and to atoxyl, 919^{9}.
respiration during work in relation to, 2875^{9}.
review on, 1495^{7}.
teeth and, 3723^{4}.
thallium effect on, 1112^{4}, 2206^{3}.
exts., effect on multiplication rate of infusoria, 2179^{4}.
internal secretion of, effect on phagocytic power of leucocytes, 1839^{5}.
physiology of, 941^{4}, 1658^{5}, 2875^{3}.
secretion of, effect of secretin on, 1854^{9}.
Glaserite. See *Aphthitalite*
Glass. (See also *Amorphous substances; Apparatus; Bottles; Lenses.*)
absorption, 3066^{7}.
adherence of metal atoms on surface of, 1737^{3}.
adsorption of gases by, 2928^{8}, 3111^{3}.
alkali-CaO, monographic representation of, 2732^{2}.
alkali from cover, effect on pollen germination, 2349^{8}.
analyses of, 3219^{5}.
in ancient Assyria, 1307^{8}.
annealing, P 2235^{9}, 3545^{9}.
app. for, P 2569^{8}, P 3340^{3}.
elec. furnace for, 712^{8}.
elec. heat in, 2568^{4}.
kiln and heating system for, P 976^{3}.
law of, 2398^{8}.
leer for, P 99^{9}, P 2055^{7}, 3219^{4}.
leers for, high-temp. cement for sealing, P 1507^{4}.
annealing and re-annealing of, 3787^{8}.
annealing flat, heat regulation in, P 3340^{3}.
annealing of plate, P 1309^{8}.
annealing sheet, leer for, P 1700^{6}.
anomalous expansion of, 2898^{9}.
antique, compn. and coloring of, 975^{3}.
apparatus (post-war), 1502^{8}.
arsenic effect on, 2735^{7}.
in autoclave tests, surfaces of neutral, 3545^{4}.
Baroni's reaction in neutral, for pharmaceutical uses, 1689^{4}.
basalt, compressibility of, 2474^{4}.
beads, coating with luminous paints, 2945^{5}.
blowing mechanically, 2399^{2}.
blowing of, instruction at Faculty of Sciences at Paris, 2568^{4}.
blowing, oxygen lamp for, 2765^{5}.
boiler-gage, P 3789^{7}.
bonding, Pb alloy for, P 2145^{5}.
books: 2055^{3}; A Handbook of Lab., Blowing, 1340^{6}; Die Fortschritte des Glastechnik in den Letzten Jahrzehnten, 1700^{5}; Die Glassfabrikation, 2235^{6}; Practical, Manipulation, 2902^{7}.
boric oxide detn. in, 1502^{4}.
cadmium deposition on, 2434^{3}.
calcium phosphate, roughening for lighting purposes, 2730^{4}.
casings, 2899^{6}.
chem., 2898^{1}.
chipping of, 1183^{7}.
civilization and, 2729^{5}.
clarifying, moisture-proof compn. for, P 3544^{2}.
cleaning compn. for, P 974^{6}, P 2233^{7}.
coating with, P 487^{6}.
coating with, by spraying, app. for, P 2235^{8}.
color change from cathode-ray irradiation, 705^{4}.
colored, 3787^{8}.
color in, from arsenious acid, 2398^{4}.
from C and its compds., 2397^{8}.
from F compds., 2054^{2}.
from phosphates, 2398^{1}.
from Se, 2397^{6}.
from S and its compds., 2397^{4}.
coloring, 3217^{7}.
coloring and decoration of, 3218^{7}.
color modification in, P 1309^{7}.
compn. of, construction of, 1501^{9}.
constitution and d. of, 2396^{1}.
constitution of, 2395^{9}.
cooling of, 3545^{9}.
crucibles, 1731^{5}.
crystn. of, 3366^{1}.
crystal violet adsorption on, 2104^{3}.
cupric oxide absorption in, 3066^{9}.
decolorization of, 1699^{4}.
density and index of refraction of, in relation to its compn., 2731^{8}.
devitrification (explosive) of, 527^{7}.
devitrification of, 1501^{1}, 2730^{6}.
devitrified, hexagonal crystals in, 2899^{3}.
diffusion of Ph_2CO mols. on surface of, 2268^{4}.
discoloration and luminescence of, 3066^{8}.
drawing (continuous) of sheets of, app. for, P 3789^{6}.
drawing, crucible for, P 3340^{4}.
drawing in flat sheets, P 2055^{6}.
-drawing pots, furnace for heating, P 3548^{3}.
elec. charge of, effect of dissolved electrolytes on, 3608^{8}.
elec. current passage through, 3270^{5}.
elec. heat in manuf. of, 872^{4}.
elec. resistance of, 2611^{2}.
electrification by rubbing, 3629^{3}.
etching, P 99^{7}, P 484^{7}, 2899^{3}.
etching (photographic) of, 24^{8}.
expansion of com., 2899^{2}.
feeding molten, from furnaces, app. for, P 3789^{7}.
fining, P 1700^{6}, P 3548^{1}.
fining, elec. furnace for, P 3221^{3}.
flux for, P 3789^{8}.
in Fourcault operation, viscosity and devitrification of, 3545^{8}.
frosting of incandescent lamps on inside, 3788^{1}.
furnace, P 99^{9}, P 317^{1}, P 650^{6}, P 1700^{6}, P 1894^{9}, 2397^{9}, P 3340^{2}, P 3340^{4}, P $3548^{1,2,3}$.
furnace, Boetius, 485^{2}.
continuously operating, P 3221^{1}.
distribution of flame temps. in, 2398^{5}.
lining for, P 3221^{2}.
thermocouple protection tubes in, failure of, 2732^{5}.
furnace regenerators, surface deposits formed in, 3788^{3}.
furnace stack, natural gas as fuel for, 1134^{3}.
gases dissolved in, 3067^{5}.
gas evolution and disappearance of gases during passage of electricity through, 328^{1}.
gas in manuf. of, 3217^{6}.
glazing and polishing, P 270^{4}.
hardness of, 2053^{7}.
heat flow in molten, 2733^{1}.
heating to render workable, P 1290^{9}.
industrial hygiene of, 685^{3}.

as industrial material, 1133^{9}.
industry in the South, 1307^{8}.
industry, review of, 3338^{6}.
inferior, detection of, 2898^{2}.
iridescence on, production of mat and glossy, 2733^{8}.
Jena, action of NaOH on, 3219^{3}.
joining parts of furnaces, retorts, etc., with pulverized fire brick and, P 2056^{2}.
joining, to metals, P 3789^{9}.
joints to silica, 315^{9}.
for laboratories, comparison of French, English, German and Austrian, 1697^{8}.
lab., 2053^{6}.
for lamp-working, 1502^{8}.
lead, constituents of, 2731^{1}.
formula for, 1501^{2}.
Keppeler's rule for, 1501^{7}.
laws in crystal and optical glass industry, 2730^{2}.
leer for, 2397^{3}.
light-diffusing hollow, P 3547^{9}.
light-dispersion, 3217^{8}.
lime in, function of, 3066^{5}.
lime in manuf. of, 1133^{5}.
local heating in furnaces before drawing, P 2055^{5}.
luminescence of, subjected to gamma radiation, 3381^{3}.
magnesium borosilicate, P 2055^{4}.
manuf. of, P 650^{5}, P 2055^{4}, P 3340^{2}, P 3789^{4}.
artificial gas for, 2396^{8}.
phonolite in, 2396^{7}.
reclaiming waste gases in, 1307^{8}.
review, 3338^{6}.
marking, P 2235^{7}, P 3221^{5}.
marking spectacle lenses, P 3789^{9}.
mat varnish effects on, P 1330^{8}.
melting and fining, P 487^{5}.
melting and fining, app. for, P 3548^{2}.
melting and fining, furnace for, P 3340^{2}.
melting, container for, P 3221^{4}.
heat-distributing app. for, P 1505^{5}.
recuperative furnace for, P 2055^{6}.
melting pots for making, P 2055^{5}.
melting tanks, P 809^{1}, 1133^{5}.
melts, effect on refractory materials, 2733^{8}.
metal coating on, P 99^{9}.
microscope in manuf. of, 3338^{9}.
mirror, temp.-time curves for visible devitrification of, 3067^{3}.
moisture accumulation on, compn. for preventing, P 268^{8}, P 1500^{4}.
mold for, P 99^{7}.
molding and annealing, app. for, P 2055^{6,7}.
nature and constitution of, 3787^{4}.
nickel-Cr alloys in manuf. of, 2398^{7}.
non-actinic Co-blue, 2730^{3}.
non-transparent to visible, but transparent to ultra-violet rays, 3218^{4}.
opacifying alkali-CaO-silicate, As for, 2731^{1}.
opaquing, Zr oxide compn. as pigment for, P 2566^{8}.
ophthalmic, P 809^{1}.
optical consts. of, effect of heat treatment on, 3067^{1}.
optical flint, melts at Fraunhofer, 3067^{2}.
optical, nomenclature and classification of, 2729^{5}.
optical, spots in, 2729^{4}.
phys. properties of, relation to compn., 975^{1}, 2898^{2}.
physico-chemistry in manuf. of, 3338^{9}.
plate, app. for making, P 2055^{5}.
plate, forming, P 1894^{6}.
polarity of surfaces of, measurement of, 1346^{1}.
preheating of pots, moisture control in, 975^{2}.
in preservation of sterilized prepns., 975^{5}.
properties of chem. and heat-resisting, effect of B_2O_3 on, 3219^{1}.
pulverized fuel for manuf. of, 1503^{6}.
Pyrex, expansion coeffs. at low temps., detn. of, 3376^{7}.
Pyrex, manuf. at Corning Glass Works, 1134^{1}.
quartz—see "fused" under *Silica*.
raw materials for, analysis of, 3217^{4}.
ray-transmission of, 2396^{4}.
reaction of C_2H_4 and Cl_2 at surface of, 1744^{8}.
recuperative melting of, 2730^{5}.
refractories in manuf. of, life of, 3789^{3}.
refractories in manuf. of, sillimanite as, 3067^{8}, 3217^{4,6}.
refractory, P 487^{6}.
reinforced sheets of, P 99^{8}.
resistance, tests of, 2567^{9}.
resistant to sudden temp. changes, P 99^{6}, P 3789^{5}.
resistant to vapors of Na group, P 976^{3}.
Röntgen-ray diffraction measurements on soda-CaO-SiO_2, 2396^{6}.
rubidium films on, elec. and photoelec. properties of, 1948^{3}.
sands of America, 1500^{9}.
sands of Ohio, 1500^{8}.
selenium, color changes during annealing and reannealing and by exposure to light, 1502^{7}.
selenium colorless, manuf. in tank furnaces, 1502^{6}.
shaping or feeding app. for, P 3221^{2}.
sheet, P 3068^{6}, P 3547^{9}.
annealing and acid-treatment of, app. for, P 2569^{7}.
annealing and cooling, P 976^{4}, P 1309^{8}, P 2055^{6}, P 3221^{3}, P 3548^{2}.
app. for making, P 1895^{1}, P 2055^{5}, P 2235^{7}, P 2569^{7}, P 3221^{1}, P 3340^{2}, P 3548^{1,2}.
with figured designs, P 3789^{7}.
forming, P 2400^{5}.
leer for continuous, P 3340^{4}.
manuf. of, P 2055^{4}, P 2235^{7}.
sheets of celluloid and, P 1500^{3,4}.
from silica and soda, 3545^{8}.
silicate flint, calcn. of mean refractive index and ν value of, 2732^{1}.
silicate formula and constituents of, 2731^{7}.
silvering—see *Silvering*.
sintered crucibles in sepn. of digitonin compd. with sterol, 1531^{1}.
soda-lime, electrolysis of, 328^{2}, 3067^{4}.
optical properties of, relation to compn., 2730^{7}.
with sillimanite contents over 50%, 805^{7}.
softening, absorption (of rays) and, 2732^{8}.
stalactites from kilns, 1503^{4}.
stones, 2568^{3}.
Strass pastes, 2733^{8}.
for street lighting, 1133^{7}.
structure of, 2568^{2}.
as supercooled liquid, 3787^{9}.
surface tension of, 2927^{8}.
table, prepn. of machine-made, 3217^{7}.

tank blocks, wearing away of, 2398^{7}, 3788^{3}.
tank capacity, increasing by recuperation, 1503^{7}.
tank control and devitrification, 1503^{5}.
tank design, 1134^{2}.
tank for molten, P 3340^{4}
tank furnace for manuf of, P 3789^{6}.
tank output, effect of temp increase on, 2397^{1}.
testing chem. and optical, 3218^{7}
thermal cond. of, 1021^{8}
thermal dilatation of Jena, 140^{6}
thermal endurance of, 2900^{3}, 3218^{7}.
thermal expansion of, at high temps, formation of strains and the cooling process, 3787^{6}
transparency in infra-red, 1752^{9}.
transparency to ultra violet light, 2123^{1}, 3218^{1,3}, 3788^{1}.
transverse tests of, machine for, 805^{4}.
unbreakable, 2898^{2}.
varicolored, P 99^{6}.
viscosity of, 2396^{3}, 3066^{2}
viscosity of, analysis of measurements of, 2053^{7,9}
viscous, spout for delivering from furnaces, P 3221^{2}.
water distn. in various types of, 3602^{5}
weathering test for, 2729^{9}.
window, compn of, 2234^{2}.
window, continuous batch feeder on tank for, 1133^{9}.
wire, app for making, P 3221^{2}
wool, heat insulation with, 1875^{6}, 2712^{7}, 3788^{3}.
Glass substitutes, from cellulose, P 2581^{1}
Pollopas, 1502^{9}
from urea, 1891^{4}.
Glauber, Johann Rudolph, biography, 3103^{5}.
Glauber salt. See *Sodium sulfates*
Glaucine, identity with boldine dimethyl ether, 1628^{4}.
Glaucoma piriformis, glucid utilization by, 2372^{2}.
Glauconite, clay sepn from, P 2565^{9}.
compn. and optical properties of, 2966^{9}.
constitution of, 1195^{6}.
improving, P 3541^{3}
near Mons, Belgium, 1197^{7}.
potash from, 96^{2}.
Glaucosil, 96^{3}.
Glazes, analyses of, 3219^{5}
in ancient Assyria, 1307^{8}.
chromate, 2736^{3}.
chrome aventurine, 2736^{4}.
cold, for cement, concrete, etc., P 810^{7}.
coloring yellow with Sb, 3340^{1}
compn. of, construction of, 1501^{8}.
cone drop point of, change with compn., 3220^{7}.
defects in, preventing, 2900^{2}.
eutectics as, 2234^{8}.
hardness of, factors affecting, 806^{8}.
iron aventurine, 2399^{2}.
manuf. of, P 487^{9}.
over-, for polychrome terra cotta, 2234^{8}.
porcelain, effect of gases during firing on, 2902^{5}.
effect on phys. properties, 1134^{8}.
mathematical relations between mixing proportions and Seger formulas for, 2736^{2}.
stoneware, defects in, 2902^{4}.
thermal dilatation of, 2569^{1}.
tin oxide, reddish discoloration of opaque, 1504^{8}.
Glazing, of brick, P 809^{3}.
of glassware, P 270^{4}.
metal articles, P 3790^{5}.
salt-, of ceramic ware, P 2055^{7}.
Glia. See *Neuroglia*.
Gliadin, dipeptide from, 3298^{2}.
effect of superheated water on, 2863^{9}.
histidine and tyrosine content of, 1090^{2}.
immunological properties of, 626^{9}.
mol wt. in phenol, 3019^{1}.
prepn, soly, and sp rotation of, 427^{8}.
tetrapeptide from, 3466^{8}.
wheat, prepn. of, 2548^{8}.
Gliosis, exptl. production of, 2201^{8}.
Globins, as denatured proteins, 1249^{4}.
reaction with hematin, 3464^{7}.
Globulins (See also *Euglobulin; Pseudoglobulin; Thyroglobulin*.)
-albumin ratio of blood plasma, effect of India ink injection on, 3728^{5}.
amino acids in, of thyroid gland, 2335^{9}.
as antibody carriers, 1440^{7}.
of bacteria, 2365^{6}.
of blood, acetylation of, 3017^{1}.
of blood plasma, effect of change in ratio with albumin on coagulation time, 3726^{1}
of blood serum, cholesterol as prosthetic group in, 3017^{5}, 3701^{5}.
in diagnosis of cancer, 3734^{6}
in gynecological diagnosis, 2015^{1}.
individuality of, 2685^{6}.
sp. rotation dispersion of, 1819^{9}.
in tuberculosis and in meningitis, 66^{7}.
in colloids in cerebrospinal fluid, effect on isoelec. point, 1268^{1}.
complex with benzoin, 67^{5}.
complex with invertase, ionic antagonism in, 1638^{5}.
decompn. with trypsin during dialysis, 3302^{6}.
detection in cerebrospinal fluid, 2537^{5}.
detn in blood, 2514^{8}.
detn. in cerebrospinal fluid, 928^{6}, 1823^{2}.
effect on coagulation time of blood, 3726^{1}.
on mastic, 3492^{1}.
on Wassermann reaction and on Sachs-Georgi reaction, 1661^{6}.
isoelec. pts of, 1420^{3}.
of jack bean, 3301^{9}.
precipitation of colloidal Au with, 2169^{6}.
salt effect on acid and alkali, 1247^{1}.
sepn. from albumin, 2343^{2}.
of squash seed, histidine and tyrosine content of, 1090^{2}.
Glomerulus, urine of, compn. of, 2191^{1}.
urine of frog, concn. of chlorides in, 622^{4}.
Gloves, rubber, insulation of, P 844^{1}.
silk, manuf. of, 2909^{2}.
waterproofing compn. for, P 2052^{6}.
Glow discharge. See *Electric discharge*.
Glucemia. (See also *Blood sugar; Hypoglucemia*.)
from adrenaline, 778^{1}, 3041^{8}, 3185^{1}.
in new born, 616^{8}.
reducing substances in, 242^{2}.
from adrenaline administered during hunger, 1441^{9}.
in anaphylaxis, 3506^{7}.
in animals painted with tar before development of cancer, 3735^{7}.
in avitaminosis B, 1651^{5}.
bilberry effect on, 3508^{6}.

blood lactic acid in, 2011[7].
cholesterolemia and, 67[7].
from circulation changes, 621[8].
with coma, 2365[4].
in diabetes mellitus, 1450[3].
from diuretin injection, dependence of ovaries on excitability of central nervous system proved by, 1658[6].
effect of blood from insulin-treated animals on, 2018[5].
in embryos of chickens, 3500[7].
enteritidis-paratyphoid B infections and hyper-, 1456[2].
in ether anesthesia, 3193[4].
from glucose *per os*, 3721[9].

books: Die Fabrikation des Stärkezuckers, 516[2]; Der Stärkezucker, 2426[1].
corn, manuf. of refined, 2592[1].
cryst. product from, P 307[8].
detn. in cane sugar, 3094[5].
manuf. of, P 1727[3].
refined, sugar industry and, 3244[3].
d-**Glucose**. (See also *Blood sugar; Glucemia; Glucolysis; Glucosuria; Hypoglucemia; Sugar, analysis.*)
absorption by liver, 1836[2].
absorption from intestinal tract, effect of rate on blood sugar curve, 2194[2].
absorption of, increase in blood and lymph sugar during, 2194[1].
addn compds. with salicylic acid, 1161[8].
adsorption of, by animal charcoal and erythrocytes, 925[2].
by blood corpuscles, altering by narcotics and lipoids, 1471[3].
by bovine blood corpuscles, 610[8].
isotherms of, 3605[5].
affinity consts. for, variation of, 1418[2].
γ-aminobutyric acid as metabolic source of, 3724[5].
in animal organism, cryoscopy of, 2018[6].
assimilation in fasting and on protein-fat diet, 2355[6].
atomic heat of, 2777[6].
autoxidation of, 582[7,8].
Bacillus coli development at expense of, origin of energy of, 432[9].
blood and symptomatic changes following intravenous injection of, 1855[7].
in blood corpuscles, disappearance of, 625[9].
in blood in diabetes, 1109[6].
in blood normally, in diabetes and in glucosuria, 440[8].

in blood of children, 65^{8}.
in blood, rate of disappearance of, 621^{1}.
in blood serum, effect on blood coagulability, 2363^{8}.
in blood serum in ampules, effect of bacterial action on, 965^{7}.
in body fluids, form of, 440^{7}.
book: ' Human Metabolism with Enemata of Alcohol, Dextrose and Levulose, 1097^{9}.
in carbohydrate metabolism, 64^{5}.
in cerebrospinal fluid, glucemia and, 1845^{5}.
in cerebrospinal fluid in sleep, 2357^{9}.
cleavage by enzymes in muscle ext., 3304^{9}.
condensation with *p*-hydrazinobenzenesulfonic acid, P 3696^{4}.
condensation with *p*-phenetidine, 902^{6}.
constitution of, 1060^{2}, 1595^{4}, 2821^{1}, $2828^{8,9}$.
consumption by perfused skeletal muscle, effect of insulin on, 2205^{5}.
decompn. in acetone-BuOH fermentations, 3711^{9}.
dehydration by blood corpuscles, 3176^{4}.
derivs., 1794^{9}, 1795^{1}.
and derivs., constitution and classification of, 1981^{5}.
distribution between fluid and non-fluid systems, insulin and, 1470^{4}.
drying, P 307^{8}.
effect of continuous intravenous injection of, 1273^{9}.
of insulin and muscle tissue on, *in vitro*, 3723^{9}.
of liver tissue and insulin on, 944^{7}, 2361^{1}.
of muscle and insulin on, 3302^{1}.
effect on autolytic NH_3 formation in tissues, 3726^{6}.
on blood pressure, 1259^{2}.

in blood after parathyroidectomy, 2537^4
picrate, 3284^5.
——, **β - (γ - methyl - Δ² - butenyl)-**, compd. with 2,4,6 - trinitro - *m* - cresol, 1057^9
——, **β - (γ - methyl - Δ² - butenyl) - α,γ-bis(*m* - nitrobenzoyl)-**, 1057^9.
——, **α - methyl - α,α′ - ethylenebis-**, and salts, 3159^1.
——, **α-(α-sulfobutyryl)-†**, 1594^8.
——, **α-(α-sulfoisobutyryl)-†**, 1594^8.
——, **α-(α-sulfopropionyl)-†**, 1594^8.
——, **α,α,γ - triethyl - β,γ - dimethyl-**, 374^9.
——, **α,α,γ-trimethyl-**, 3158^9.
——, **α,β,γ-trimethyl-**, 582^4, 3158^9.
——, **α,β,γ - triphenyl-**, prepn. from thiocarbanilide, 1081^5, 1223^3.
α - Guanidinecarboxylic acid, ethyl ester, prepn. and pharmacol. properties of, 2983^8.

α,γ - **Guanidinedicarboxylic acid,** diethyl ester, prepn. and pharmacol. properties of, 2983^{8}.
Guanidinium compounds, chromium-, 2625^{9}.
β-ethylpentamethyl— picrate, 374^{9}.
hexamethyl— salts, 374^{8,9}.
α,α,β - triethyl - β,γ,γ - trimethyl— salts, 374^{9}.
Guanine, coloration in animals from, 3718^{7}.
Guano, compn. of, 1487^{3}.
deposits of, at Seychelles, 87^{9}.
Malayan deposits, 3324^{9}.
nitrification of fish, under tropical conditions, 3768^{3}.
Philippine, as food for plants, 3206^{1}.
Guanylic acid*, brucine and strychnine salts, 767^{9}, 768^{1}.
Guarana, evaluation of, 1887^{2}.
Guignet's green, compn. of, 1570^{7}.
isomerism of, 1144^{4}.
Guinea grass. See *Panicum maximum*
Gulose, *d*-, prepn. from *d*-sorbitol, 583^{5}
Gum arabic (*acacia*), blood and symptomatic changes following intravenous injection of, 1855^{7}.
book: und dessen Surrogate in festem und flüssigen Zustande, 1746^{5}.
effect on blood, 3502^{1}.
on hydrolysis of esters, 367^{4}.
on hydrolysis of Et acetate and Me acetate, 3370^{2}.
emulsions in oil, stability of, 2723^{7}.
emulsions with, effect of H-ion concn on, 3256^{6}
enzymes in, 60^{2}.
fluorescence of, polarization of, 1952^{8}.
viscosity of colloidal solns. of, in structural, laminar and turbulence regions, 3607^{8}
Gum benzoin. (See also *Colloidal benzoin reaction.*)
complex with globulin, 67^{5}.
effect on heart exts. in Wassermann reaction, 1269^{7}.
effect on serologic activity of lipoids, 1268^{1}.
manuf. of, 2719^{8}.
Siamese, 1685^{7}.
Gums. (See also *Chewing gum; Gingiva*)
from *Boswellia serrata*, 837^{1}.
from carob-tree seed, P 3245^{6}.
cholla, 300^{5}.
Congo, reaction with fatty acid glycerides, 117^{6}.
extg , P 2593^{6}.
formation by bacteria, 1422^{3}, 1643^{5}
gommier, from Dominica, 80^{8}.
melting of, kettles for, 300^{7}.
mesquite, 300^{5}.
from oleoresin of *Boswellia serrata*, enzymes in, 60^{2}.
pulverizing app. for, P 523^{8}.
solvents for, glycol ethers as, 2910^{2}.
staining capacity of, 1830^{7}.
from tubercle bacilli, antigenic properties of, 237^{9}.
yeast, fermentation by yeast amylase, 3018^{1}.
Gum saline, effect on hydrogen-ion concn. of blood, 2189^{9}.
Gum tragacanth, effect on hydrolysis of esters, 367^{5}.
emulsions in oil, stability of, 2723^{7}.
emulsions with, effect of H-ion concn. on, 3256^{6}.
Gum verek. See *Gum arabic*.
Guncotton. See *Explosives; Nitrocellulose*.
Gun metal, corrosion preventives for, 3439^{2}.
thermal cond. of, 3679^{9}.
Gunpowder. See *Explosives*.

surface tension of, 3598^{7}.
synthetic, 2903^{3}
technology of, 3540^{9}.
terms for, definitions of A. S. T. M. for, 1121^{9}.
testing, and its products, methods of A. S. T. M. for, 955^{3}.
testing methods of A. S. T. M. for, 1122^{8}.
Gyrophora, *esculenta*, constituents of, 594^{6}.
proboscidea, constituents of, 594^{6}.
Gyrophoric acid, constitution of, 594^{5}.

H acid. See *1-Naphthol-3,6-disulfonic acid, 8-amino-.*
Haemagglutination, Haematin, etc. See *Hemagglutination; Hematin;* etc.
Hafnium (*celtium*), atomic wt. of, 1006^{6}.
chemistry of, 2793^{6}.
crystal structure of, 851^{6}.
electron emission from, 2785^{9}
lattice const. of, 2768^{1}.
prepn. of, 881^{5}.
properties of, 2101^{1}.
sepn. from Zr, 1153^{9}, P 1891^{9}, P 2566^{4}, 3599^{5}.
spectrum of, 2943^{9}, 3385^{6}.
in zircons, radioactivity and, 2805^{1}
Hafnium, analysis, detection, 1042^{2}
Hafnium, metallurgy of, 2793^{6}.
Hafnium alloys, zirconium-, 881^{8}
Hafnium ammonium fluoride, decompn. of, 3658^{3}
Hafnium compounds, manuf of, P 973^{6}.
prepn. of, 881^{6}
with zirconium, P 2051^{6}
Hafnium halides, sepn from Zr halides, P 2051^{6}.
Hafnium phosphate, soly. in acids and bases, 156^{8}.
Hafnium sulfate, isomorphism with Zr, U, Ce and Th sulfates, 319^{4}.
Hagatalite, from Japan, Hagata, 563^{2}
Hahnemann, Samuel, biography, 682^{4}.
Haiari. See *Lonchocarpus*
Hair, carroting of, for felt hats, 3576^{2}.
compn. of, 426^{3}.
l cystine from, 44^{8}.
deodorizing with ozone, P 1341^{3}
disinfecting, P 3324^{3}
dyeing, P 993^{5}, P 1328^{3}
dyes, in Turkey, 2389^{6}.
effect of caustic alkalies, sulfides and polysulfides on, 1336^{5}
growth of, effect of cholesterol metabolism on, 2008^{2}.
hat bodies of, treating, P 3824^{3}.
microscopic examn. of, 612^{9}.
nitrogen distribution in human, 54^{2}.
"permanent waving" of, compn for use in, P 1890^{5}.
pigments and, 937^{5}.
sensory, Tl alopecia and, 3039^{1}
sulfur in, effect of mild alk. hydrolysis on, 2001^{9}.
tonics, denaturants for, 2389^{8}.
Halide ions, forces between alkali metal ions and, 1936^{5}
mobility in methanol, 136^{5}
Halides. (See also *Photohalides.*)
acid, as catalyzers for fatty acid bromination, 42^{2}.
alkyl, manuf of, P 2566^{5}.
boiling pts. of, of Si group metals, 717^{4}.
chem. constitution of org , relation to speed of their reaction with inorg. halides, 3687^{7}.
electrolysis of fused metal, P 1957^{8}.
heats of chelation of dithiolated, 326^{4}
melting and b. ps. of, similarity to those of noble gases, 130^{6}.
metallic, recovery from hydrocarbon sludges, P 2066^{3}.
reduction of inorg., 557^{5}.
Halite. See *Sodium chloride.*
Hall effect, in antimony with weak fields, 3262^{8}.

Hausmannite, prepn of, 2959[8].
Hauynite, nephelite-, alnoite from Winnett, Mont., 1778[8].
relation to davynite, 1045[2].
"**Haveg**," for app. construction, 3363[2].
Hay, antirachitic properties of, as related to climatic conditions, 1433[7].
as calcium source for cows, 2189[1].
compn of, effect of phosphatic and potassic fertilizers on, 2222[4].
compn. of, variation in, 1487[8].
cooking and extg., P 463[1].
ensilage of, 2033[2].
as feeding stuff for horses, 2711[6].
fertilization for, 87[1,2].
lime content of, 2033[1].
making with heated air, 2550[5].
vitamin A content of, 3025[8].
yield and compn. of, effect of date of enclosing fields on, 2377[5].
Hay fever, anaphylaxis and, 2012[2].
calcium deficiency in, 627[2].
densensitization, sp. pollens in, 2700[8].
plants causing, ext. preservation with glycerol, 3714[7].
Hazelnut, pigments in leaves during yellowing, 3178[7].
Head, injuries to, blood glucose curve in, 239[2].
Health, books: Light and, 926[7], Food and, 953[1].
industrial, chemist and, 464[1].
Heart, acids and, 3191[2].
active substances of right auricle of, 942[8].
adrenaline effect on, 943[1], 1864[2], 2206[5], 3042[4].
adrenaline secretion caused by muscular activity and, 943[2].
alpha-ray effect on, 1246[7].
anoxemia effect on, 1106[8], 3464[3].
arecoline effect on, 3040[1].
arrest, adrenaline discharge due to, 1862[5].
arsphenamine effect on, 449[4].
auricular fibrillation, quinidine treatment of, 629[1], 1856[2].
automatism of, Na and, 3497[2].
beat cessation, cathode rays as K substitutes for resuscitation in, 1859[5].
beat, chem. regulation through liver, 1839[4], 3182[5].
crit. increments for, 2512[4].
in *Pterotrachea* and *Tiedemannia*, temp. of, 1282[2].
regulation by liver, 444[2].
blood detn. in, 3475[2].
blood output of, 2874[2].
blood vessels of, effect of crystal violet on, 3315[6].
calcium salt action on, 452[1], 1462[4,6], 1466[1], 2203[7].
camphor effect on, 2206[6], 3193[6].
cephalin effect on, 1463[9].
chloroform effect on, 2367[2].
cinchona alkaloid effect on, 3043[9].
colchinine effect on, 1863[7].
conduction in auricle, effect of EtOH and of AmOH on, 2511[1].
decompensation, effect on acid-base equil. in emphysema, 1848[2].
desensitization for β-rays, 1246[8].
dextrose solns. (hypertonic) and, 3183[8].
digitalis effect on, 1466[1], 3190[7].
digitalis effect on, and its modification by quinidine, 2208[5].
digitalis effect on isolated, 453[3].
digitalis effect on "peripheral," 454[5].
diseases of, basal metabolic rate in, 3504[3]
basic ethers of quinoline for treatment of, P 1304[5].
bilirubin distribution in vascular areas in, 1453[2].
in children, intradermal salt soln. test in, 1451[4].
intracutaneous salt test in, 3188[1].
treatment with drugs, 2369[2].
treatment with quinidine sulfate, 2369[1,2].
trypsin flocculation reaction in serum in, 1662[3].
urea in blood after death from, 2173[1].
diuretic for, novasurol as, 1279[7].
edema of, novasurol and other diuretics in, 1850[9].
edema, plasma vol. changes in, 3731[9].
effect of acetanilide, caffeine and its citrate on, 3043[3].
of nonelectrolytes in, 3194[8].
of potassium fixation in ventricular muscle on, 3498[8].
of sodium and Ca ions on, 1275[9].
electrocardiogram, effect of hypno-anesthetics on, 1271[2].
eserine effect on, 1864[2].
failure, urea as diuretic in advanced, 1855[9].
functional adaptation to oxygen reduction, 2533[8].
gas exchange in, dependence on stimulation frequency and apparent fatigue, 1837[6].
gas formation in, of cadavers, 427[2], 1089[6].
genista effect on, 2206[6].
glucoside affecting, from squills, P 1692[8].
glucosides active on, evaluation of, 455[1].
hexetone effect on isolated, 1861[8]
hormone of, 3492[1].
hormones from sinus of frog, 213[3].
insulin effect on vitality of, 2207[8].
insulin in, of normal and pancreatic diabetic dog, 441[6].
intra-auricular conduction, effect of ions on, 2510[6].
irritability of frog, 452[7].
isolated, change of sensitiveness to poisons in, 1858[8].
isometric response of, calcium effect on, 3510[7].
kidney substances which affect, 624[5].
lobeline effect on, 1113[8], 1854[7].
local anesthetic action on, 1866[8].
morphine effect on, 3747[2].
muscle, acid action on, 2509[4].
irritability of, 1112[9].
lactic acid content of, tension development and, 3495[7].
lactic acid in, 777[2,3,4].
tetanic contraction by alterations in concn. of ions, 3492[2].
unsatd. fatty acids in, 1999[1].

muscle of embryo, temp. for contraction rate of, 3496^{7}.
myocardium of, effects of diphtheria toxin on, 1456^{3}.
-nerve action, humoral transmissibility of, 629^{3}.
nerves of, effect of insular hormone on, 2876^{5}
nerves of, humoral transmission of excitation of, 227^{2}.
-nerve stimulation, 1103^{5}.
nervous system of, effect of nicotine on, 1863^{4}
nucleic P index of, 3304^{4}
obstruction of, urobilinuria of, 1452^{4}.
ovarian fluid effect on, 231^{2}
ovarian perfusion fluid and, 3183^{7}.
perfused, effect of temp and adrenaline on, 3746^{7}.
perfusion fluid for, sea water as, 3725^{8}.
phosphatide effect on, 3192^{6}.
pituitary ext. effect on, 3190^{8}.
poisons of digitalis plant and related compds, 950^{4}.
premature contractions of, effect of adrenaline, quinine, quinidine and digitalis on, 3509^{5}.
protein in, nutritive value of, 2695^{2}.
protein-rich diet in renal insufficiency and, 2014^{4}.
quinine base effect on, 2706^{6}.
response to stimulation of accelerator nerve, effect of adrenaline on, 3015^{7}.
response to stimulation of cardio-inhibitory nerve, adrenaline effect on, 3045^{8}
rhythm, emanation as K substitute for production of regular, 1463^{6}.
Ringer soln. effect on, 943^{9}.
rubidium effect on, 2201^{6}.
rubidium effect on, of batrachians, 1871^{9}.
silica in, diagnosis of drowned corpse by detn. of, 1253^{8}.
of silkworm, effect of As compds. on, 3047^{3}.
sparteine effect on, 2206^{8}
squill effect on, 3332^{2}.
standstill at transition pts, 2358^{4}
stimulant excreted by kidney, 3722^{4}
strontium effect on, 1280^{1}, 2203^{7}.
k-strophanthidin effect on, 3043^{8}.
k-strophanthidin emesis in cats with denervated, 1869^{6}.
strophanthin effect on abs. power of, 1469^{4}.
strophanthus effect on chloralized, 3507^{7}.
tachycardia from RbCl, 2204^{7}.
third ventricle of, effect on secretion of inorg phosphate by kidney, 2528^{8}.
"Treppe" formation and spasms from K, effect of Ca on, 2368^{9}.
tropine effect on, 1114^{5}.
ultra-violet light effect on contractile fragments of, 1821^{5}.
uric acid action on, of tortoise, 776^{7}.
vagal stimulation effect on, 2533^{5}.
vagus fibers, effect of Ca and K ions on, 1462^{3}.
vagus of, effects of atropine, physostigmine and pilocarpine on, 2208^{9}.
vagus substance and acetylcholine in, fate of, 3038^{7}.
vol., effect of H-ion concn. and of anoxemia on, 2526^{9}.

Heart extract, as antigen in Wassermann test, effect of heat on, 1660^{6}.
in Wassermann reaction, effect of benzoin on, 1269^{7}.

Heat. (See also *Body temperature; Calorimetry; Conduction, thermal; Conductivity, thermal; Heat of absorption*, etc.; *Insulation; Nernst heat theorem; Radiation; Temperature; Thermodynamics; Thermopenetration.*)
in annealing flat glass, regulation of, P 3340^{3}.
balance in gas producers, 2242^{6}.
balance of blast furnace for manuf. of Thomas Fe, 1048^{6}.
balance of boiler plant, 2765^{5}.
balances with solid and liquid fuels, 3553^{7}.

α-Hematoporphyroidin, prepn. of, 770[3].
Hematoxylin, constitution of, 605[6].
synthesis of, 2325[9].
Hemellitenol. See *Hemimellitenol.*
Hemellitol. See *Hemimellitene*
Hemicellulose, of lichens, 1832[6].
staining capacity of, 1830[7].
Hemicolloids, 3588[5].
Hemifusus tuba, spawn, compn. of, 3515[1].
Hemimellitene (*1,2,3 - trimethylbenzene*), phys. consts. of, 1601[9].
——, **hexahydro-**. See *Cyclohexane, 1,2,3-trimethyl.*
2,3,4-Hemimellitenesulfonamide, 1601[9].
2,3,4-Hemimellitenesulfonic acid, 1601[9].
2,3,4-Hemimellitenol, and derivs., 1601[8], 1602[1].
——, **6-ethyl-**, and carbanilate, 2154[8]
——, **phenylazo-**, 1602[1].
3,4,5-Hemimellitenol, and derivs., 1601[8], 1602[1].
——, **2-amino-**, 2154[8].
——, **2,6 - dibromo - α^1,α^1 - ditriazo-**, 403[8].
Hemin, active H detn. in, 1815[7].
basic character of, 3170[3].
constitution of, 1631[1], 2682[9].
conversion into protoporphyrin, 3173[3].
coproporphyrin and, 608[6].
photographic reaction of, 1960[6].
yeast effect on, 3016[5].
——, **chlorodimethyl-**, reaction with benzoyl peroxide, 1242[2].
——, **citryl-**, 3705[4], 3711[1].
——, **dichlorodimethylchloro-***, 3170[5].
——, **hydroxy-**, prepn. of, 60[8].
——, **pentachlorodimethylchloro-***, 3170[5].
——, **tartaryl-**, 1637[8], 2336[8].
Hemin anhydride, hydroxy-*, porphyrins from, 3700[9].
Heminium compounds, dimethyl— methochloride*, 3170[4].

Hemlock, poison, alkaloidal content of, 2388⁹.
poison, diosmin from, 799⁶.
poison, glucosides from, 390².
tannin of western, after immersion in sea water, 676⁴.
Hemochromatosis, from copper poisoning, 2019³.
Hemochrome. See *Blood pigments.*
Hemochromogen, 1630¹.
protoporphyrin from, 3173⁴.
reactions of yeast and plant seeds, 771⁷.
Hemoclasis, Widal, 1440⁹.
Hemocyanin, transport of O and CO_2 by blood contg., 3316⁴.
Hemofuscin, 2019⁴.
Hemoglobin. (See also *Carbonylhemoglobin; Methemoglobin.*) 1630¹.
antigen properties of, 1668².
bile pigment from, 2509⁴.
bimol. layer of, on surface of an erythrocyte, 1816⁹.
in blood under tropical conditions, 3029⁴.
colorless crystals of, formation and permanence of, 2511⁴.
colorless "crystals" of, polariscopic appearance of, 3464⁶.
content of blood, effect of desiccated spleen and bone marrow feedings on content of, 2190⁷.
content of blood, effect of living at high altitudes on, 3182⁴.
denaturation and coagulation of, 1249⁴.
deposition, sepn. and reabsorption, relation to deposition of Fe pigment, 1416³.
derivs. of, 1088¹.
destruction of, by tissue exts., 924⁷.
detn. of, 1250⁶, 1824³, 3470²,³, 3475⁴.
effect of age on, 3464⁹.
effect of Ge compds. on, 3513⁴.
effect on blood reaction in newborn, 1448⁷.
equil. with O, effect of temp. on, 924⁶.
excretion of, obstruction of renal tubules during, 780².
freezing effect on, 2168⁷.
hemin formation from, and existence of 2 hemoglobins, 1244².
in hemolysis reversion, 1665¹.
hydrogen-ion concn. and, 623².
iron in, effect of digestive enzymes on, 55².
iron removal from, by action of pepsin and pancreatin, 213⁴.
methemoglobin from, 1099⁸.
mol. wt. of, 1256².
muscle, identity with blood hemoglobin, 2509⁸.
nitrogen adsorption by, 1999⁵.
nitrogen detn. in, 2171⁷.
osmotic pressure of, in absence of salts, 52⁶.
oxygen, CO and p_H in relation to, 229³.
passage through membranes, effect of substances affecting surface tension on, 775³.
peroxidase function of, 2685².
pigments (black) from, 1635⁸.
precipitin of, 1270².
prepn. of cryst. isoelec., 2342³.
prepn. of pure, 784⁷.
reaction with hydroxylamine, 1632⁵.
reaction with $K_3Fe(CN)_6$, 1821³.
reduction of, 2337⁴.
resistance of, 3035³.
reviews, 2192¹, 2505⁵, 2874⁷.
rickets prevention by feeding, 946⁴.
scale for, 1825¹.
sera, coagulation of, 3303⁶.
of striated muscle, 2509⁸.
in submammalian forms of life, 1099³.
Hemoglobinometer, Sahli, modifications of, 1822⁹.
standardization by refractometer, 1094⁸.
Hemoglobinuria, hemolytic power of plasma or serum in, effect of warming on, 2361⁹.
quinine, 1467⁸,⁹.
Hemolymph, of grain aphids, 3515³.
Hemolysins, adsorption of, 1446⁹.
in blood of mother and child compared, 3733⁷.
in blood serum, 1844⁴.
blood serum from rats with tumors as, 2197⁴.
in colostrum, 1452⁹.
in denucleated erythrocytes, 233⁵.
of hemolytic immune serum, localization in serum albumin, 2539⁸.
in heterogenetic ppts., 1661⁴.
in malaria, 626⁸.
prepn. of, 1456⁵.
thermostability of, 2016⁷.
Hemolysis, acidity of phosphate buffers and biologic, 1267¹.
antibody of, non-sp. stimulation of, 627⁴.
anti-, by volatile chemicals, 1443⁷.
by blood plasma or serum from hemoglobinurics, effect of warming on, 2361⁹.
blood serum effect on, 67⁴
of blood serum of rabbits, effect of hemorrhage on, 627⁴.
in blood transfusion, 3721⁷.
in complement-fixation test, effect of urine on, 3188⁴.
by drug exts., influence of alkali on, 262⁵.
effect of immune hemolytic serums on, 3019⁹.
equations for, 3703¹.
by hematoporphyrin solns., 1842⁸.
by hydrogen and hydroxyl ions, 623².
inhibition and acceleration of, 2506⁹.
intravital, reticulo-endothelial system in, 947⁷.
ionic antagonism in, 625³.
kinetics of, 3019¹.
neutral salt action on, 2335².
of oils in drugs, 3535⁹.
organ ext. effect on, 1269⁸.
by pedicellariae of sea urchins, 1118¹.
under photosensitizing action of hematoporphyrin, 3304⁶.
physico-chem. aspects of, 1659³.
resistance of red cells to, in avitaminosis, 1844¹.
reversible, 945², 2508⁵, 3728⁶.
reversion of, 1665¹.
salt effect on, 2507⁴.
by saponin and cobra venom, resistance of red blood cells normally and in beriberi to, 2700¹.
saponin, effect of sugars on, 2335¹.
by saponin, salt action and, 443⁷.
by silicic acid and cobra venom, lecithin effect on, 1463⁹.
spectrophotometry of, 3019⁹.
by spleen and bone marrow exts., 2533⁶.
urobilin in urine and feces in, 1452⁴.
Hemometers, calibration of, 3470⁵.
Hemophilia, blood clotting in, 2698⁸.
blood in, heparin in, 3504⁷.
Hemopoëtin, effect on blood, 1839⁸.
Hemoporphyrin, mesoporphyrin from, 1634².
spectrochem. identification of, 1245⁹.

Hemorrhage, effect on acid-base equil. of blood, 3502^8.
effect on glycogen content of liver and muscles, 2699^6.
on hemolytic titer of serum of rabbits, 627^4.
on H-ion concn of blood, 2189^9.
on inorg. compn. of serum and corpuscles, 2538^8.
on K content of erythrocytes, 2539^1.
ephedrine effect on, 1111^9.
intestinal, from milk diet, 1652^3.
of lungs after acute CCl_4 poisoning, 1274^7.
from lysocithin, 1465^8.
Hemorrhoids, remedy for, P 647^2.
Hemosiderin, liver and spleen of toad, 1636^9.
pigments from 2505^2.
Hemosiderosis, cause of, 3036^8.
Hemotoxin, of bacillus of Welch, oxidation and reduction of, 3037^6.
pneumococcus, oxidation and reduction of, 3037^5.
Hemp, absorption from peritoneal cavity, 1868^5.
agglomeration of waste, 3553^9, P 3786^7.
cottonizing, 2909^4.
fibers from, P 297^1.
in German industry, 2586^8.
of India, 799^9.
macerating, *B. felsineus* cultures for, P 297^3.
retting, P 993^7, P 3241^2.
retting baths for, 2585^8.
structure of, 3078^7.
Hempseed oil. See *Oils*.
Henbane, alkaloid content of, 2389^1.
tincture of, assay of, 2894^9.
Hendecanaphthene, from shale oil, 816^7.
Hendecane, 1-bromo-11-Δ^2-cyclopentenyl-, 3160^5.
——, **1,11-dibromo-,** prepn. of, 1789^3.
1,11 - Hendecanedicarboxylic acid. See *Brassylic acid*.
1,11-Hendecanediol, and diacetate, 1789^{3,4}.
4,5-Hendecanediol, 4-methyl-, 1786^7.
——, **4-propyl-,** 1786^6.
2,4-Hendecanedione, 738^9.
2-Hendecanone, 1-bromo-, and semicarbazone, 1783^9.
——, **1-chloro-,** and semicarbazone, 1783^7.
4-Hendecanone, 5-hydroxy-, and semicarbazone, 1786^7.
1-Hendecene, 1,1,2-triiodo-, 1783^7.
Δ^3 - 2 - Hendecenone, 4-hydroxy-, copper deriv., 738^9.
1-Hendecine, 1-bromo-, 1783^1.
——, **1-iodo-,** 1783^8.
1-Hendecine-1-carboxamide, 1783^8.
1-Hendecine-1-nitrile, 1783^9.
***n*-Hendecoic acid.** See *Undecylic acid*.
2,4-Heneicosanedione, 739^1.
Δ^3 - 2 - Heneicosenone, 4 - hydroxy-, copper deriv., 739^1.
Heneicosoic acid, 738^3.
Henna, extg., P 970^7.
16-Hentriacontanol, 2819^2.
Heparin, in blood (normal and hemophilic), 3504^7.
effect on coagulation time of blood after clotting, 3495^9.
intravascular use of, 1855^4.
Hepatectomy, bilirubin formation after, 437^7.
effect on physiol. processes, 68^5.
method of, 611^7.
muscle glycogen following, 939^1.
Heptacosane, 3444^5.
14-Heptacosanol, 2819^2.
1,17 - Heptadecanedicarboxylic acid, and esters, 1789^3.
2,4-Heptadecanedione, 738^9.
Δ^3 - 2 - Heptadecenone, 4 - hydroxy-, copper deriv., 738^9.
7-Heptadecin-6-one, 1783^9.
***n*-Heptadecylic acid.** See *Margaric acid*.
1,2-Heptadiene, 3155^4.
2,4-Heptadiene, 2146^6.
α, δ - Heptadienic acid, α - hydroxy - γ-keto-ε-methyl-, ethyl ester, absorption spectrum of, 1788^8.
Δ^{2,5}-4 - Heptadienone, 2,6 - dimethyl- See *Phorone*.
Heptaglucosan*, 743^2.
Heptanal. See *Enanthaldehyde*.
Heptanaphthene. See *Cyclohexane, methyl*.
Heptane, aniline pt. detn. on, 2582^1.
auto-ignition of, 3341^6.
density and mol. diam. of, 2101^3.
expansion coeff. and free space, 3595^6.
heat of vaporization of, 1551^3.
ignition of mixt. of air and, 1706^3.
from petroleum, 2742^7.
vapor pressure and sp. vol. of, detn. of, 1551^6.
4-bromo-, 1386^2.
4-chloro-, 1386^2.
1,2-dibromo-, 3444^1.
3,4-dibromo-, 1386^2.
3,4-dichloro-, 1386^3.
2-methyl-, from cholesterol, 1242^2.
from petroleum, 2742^7
——, **4-methyl-,** heat of vaporization of, 1551^3.
1,7 - Heptanedicarboxylic acid. See *Azelaic acid*.
3,5 - Heptanedicarboxylic acid, 4 - formyl-2,6-diketo-, diethyl ester, 45^8.
2,3-Heptanediol, 2,3-dimethyl-, 2482^9.
3,4-Heptanediol, 1386^3.
——, **3-ethyl-,** 1786^5.
——, **3-ethyl-6-methyl-,** 1786^4.
1,7 - Heptanedione, 1,7 - bis(*p* - chlorophenyl)-, heat action on, 1229^6.
——, **1,7-diphenyl-,** heat action on, 1229^6.
3,5 - Heptanedione, 4 - β - methylbutyl-, and copper deriv., 413^7.
Heptane - 2,6 - oxide. See *Pyran, tetrahydro-2,6-dimethyl-*.
3,4,4,5 - Heptanetetracarboxylic acid, 2,6-diketo-, tetraethyl ester, 3690^1.
3,4,5-Heptanetrione, 4-oxime, 3403^6.
1-Heptanol. See *Heptyl alcohol*.
Heptanolone. See *Heptanone, hydroxy-*.
2-Heptanone, 1-bromo-, and semicarbazone, 1783^6.
——, **3 - chloro - 4 - hydroxy - 6 - methyl-,** 1787^1.
——, **3-Δ^1-cyclohexenyl-(?),** semicarbazone, 3287^5.
——, **3-hydroxy - 3 - methyl-,** and semicarbazone, 2481^7.
——, **4-hydroxy-6-methyl-,** 1593^4.
3-Heptanone, 4-hydroxy-, 1593^9.
4-Heptanone. See *Butyrone*.
——, **3-hydroxy-,** rearrangement of, 1593^5.
1,2,4,5 - Heptatetrazine, 3 - thioketo - 6,7-diphenyl-*, 1810^7.

on tissues and organs, 1097^5
gastric contractions, effect of change in blood sugar level on, 1261^7
metabolism during, effects of adrenaline on, 1441^8.
Hyacinth. (See also *Water hyacinth*)
endodermis of, macrochemistry of, 2871^1
metallic ion effect on growth of, 3716^8
Hydantoamide, δ-**carbamyl-**, 2160^9.
Hydantoic acid, butyl ester, 1055^2
—, α-**benzyl-**, metabolism of, 2010^9
—, δ-**carbamyl-**, and ethyl ester, 2160^9, 2161^1
—, α-**isobutyl-**, metabolism of, 2010^9
—, β-**methyl-**, from creatinine, and its color reactions, 3691^2.
Hydantoin (*2,4(3,5) - imidazolidione*),

NH CO NH.CO CH$_2$
1 2 3 4 5

in animal body, destruction of nucleus of, 3030^3.
color reactions of, 3691^2.
—, **5-acetamido-**, and silver and sodium derivs, 1387^1.
—, **5 - acetamido - 1 - acetyl - 3 - methyl-**, 1387^1.
—, **5-acetamido-3-methyl-**, 1387^1.
—, **1-acetyl-5-isobutyl-2-thio-**, 3298^8
—, **5-amino-3-methyl-**, salts, 1387^3.
—, **5-anisal-1,3-dimethyl-**, isomers, 366^9.
—, **5 - (δ - benzamidobutyl) - 3 - phenyl-**, *d*-, 2148^1.
—, **1 - (*N* - benzoylalanyl) - 5 - methyl-2-thio-**, 3298^9.
—, **1 - [*N* - (*N* - benzoylglycyl)glycyl]-2-thio-**, 3299^1.
—, **1 - (*N* - benzoylglycyl) - 2 - thio-**, 3299^1.
—, **1 - benzoyl - 5 - isobutyl - 2 - thio-**, 3298^9.
—, **1 - (*N* - benzoylleucyl) - 2 - thio-**, 3298^9.
—, **1 - benzoyl - 5 - methyl - 2 - thio-**, 3298^9.
tautomerism of, 1980^9.
—, **5-benzyl-**, metabolism of, 2010^9.
—, **5-carbamido-**. See *Allantoin.*
—, **dipropyl-**, distribution between water and org. solvents, 2540^9.
—, **5-ethoxy-1-methyl-**, 1387^8.
—, **5-ethyl -5-phenyl-**. See *Nirvanol.*
—, **5-isobutyl-**, metabolism of, 2010^9.
—, **5-isobutyl-2-thio-**, 3298^8.
—, **5-methoxy-1-methyl-**, 1387^8.
—, **1-methyl-**, from creatinine, and its color reactions, 3691^2.
—, β-**methyl-**, in animal body, destruction of, 3030^3
—, **5-methyl-2-thio-**, 3298^9.
tautomerism of, 1980^9.
1 - Hydantoinacetic acid, 5 - anisal - 3-methyl-, ethyl ester, isomers, 366^9
3 - Hydantoinacetic acid, 5 - anisal-, ethyl ester, spectrum of, 367^4.
methyl ester, isomers, 367^1.

gaseous, thermal decompn. of, P 3216^{1}.
generation from C electrodes in elec. water heaters and boilers, 2955^{1}.
halogen derivs. of, hydrolysis of, P 3461^{3}.
hydrogenation (catalytic) of liquid, P 2066^{7}
hydrogenation of, effect of rate of stirring on velocity of, 1937^{2}.
gas for, P 3799^{7}.
in Italy, 2063^{8}.
industry in 1925, 3802^{9}.
light diffusion by aliphatic, 699^{7}.
lubricant, "satn." of, 3802^{7}.
manuf. of, P 659^{4}.
mixt. with alc., P 3799^{7}.
nitrating non-benzenoid, P 2583^{1}.
from oil-bearing earth, P 3234^{9}.
oxidation of gaseous, P 2582^{9}
paraffin sepn. from liquid, P 817^{8}.
from paraffin wax, Röntgen-ray reflection by, 39^{1}.
from petroleum, 2742^{6}.
of petroleum and tar, 1510^{8}.
of petroleum and tar, review on, 1510^{8}.
in petroleum of Gbely, 985^{4}.
of petroleum, ozone effect on, 1513^{1}.
of petroleum, utilization of aromatic, 1317^{6}.
from phenols from low-temp. tars, 2905^{6}.
poisoning by chlorinated and hydrogenated, 2712^{5}.

position-isomeric C_6H_6 derivs., heats of combustion of, 2937[9].
pressure-temp. charts for aromatic, 686[3].
product from, P 3804[3,4].
purification of aromatic, P 3015[8].
purifying acid treated, P 3234[6]
reaction of aromatic, with CON_2, 2500[1].
reaction with HN_3, P 423[7].
reaction with Se_2Cl_2, 2294[6].
recovery from gas by solid adsorbents, 1900[3]
rectification of, P 282[6]
in refrigeration, 788[9]
removal from fuel gas, P 1710[8]
in rosin, 299[5].
rubber, synthesis of, 3685[5].
rubber, treating, P 314[1]
sepg. from earth material, P 3235[3]
sepn. of condensable, from gases, P 662[2].
sludges, metallic halide recovery from, P 2066[1].
spectrum of, 14[1], 15[9]
spectrum of condensed nuclear, 2455[6]
synthesis by Kolbe's method, 2794[1]
system: C_2H_6–satd., mixts. with C_2H_2, 1519[5].
unsatd., detn. in petroleum spirit, 1712[3]
unsatd., from Persian natural gas, 1579[2].
unsatd., in liver, 2506[8]
from water gas, 2065[1].
Hydrocellulose, 1909[1], 3805[8]
chem. nature of, 507[9]
compn. with rubber, P 3589[8]
crystal structure of, 1222[2]
optical rotation of, 665[7]
in paints and lacquers, 3353[5]
physico-chem. study of, 287[8]
prepn. of, 1321[5].
properties and prepn. of, 1515[1].
staining capacity of, 1830[7].
structure of, 3078[7].
Hydrocephalin, formation from lecithin-cephalin mols. in muscular contraction, 3181[8].
Hydrocerussite, from Långban, 1776[4].
Hydrochalcone. See *Propiophenone, β-phenyl-*.
Hydrochloric acid (See also *Hydrogen halides; Hyperchlorhydria*).
absorption app. for, 1890[4]
absorption in AcOH, 3781[7].
absorption in infra-red, pressure effect on, 1559[7].
absorption of gaseous, by H_2SO_4, 3781[5,7].
activity coeff. of, 3617[9]
in electrolytes, 1162[7].
in glycerol-water mixts., 1317[4].
in methanol, 136[6]
in nonaq. solns., 2932[8]
additive compds. with sulfates of heavy metals, 2292[9].
adrenaline discharge from injection of, into adrenal medulla, 1862[6].
adsorbents for, 2104[1].
adsorption by charcoal prepns., 1009[1]
adsorption by colloidal S, detn. of, 1346[8].
adsorption isotherms of, 3605[5].
adsorptive equil. of mixt. with O, 2138[3].
for analytical work, specifications and tests for, 3406[9].
arsenic-free, P 972[9], 1773[3].
from calcium chloride, P 1891[6].
casein soly. in, 1934[2].
as catalyst in rearrangement of diacylanilides, 745[5].
from combination of H and Cl in presence of charcoal, 2049[9].
compds. with sulfates of heavy metals, 345[6].
constant-boiling, stability of, 3781[8].
corrosion by, Mn-bronze resistant to, 2814[1].
corrosion of alloys by, 1202[7].
corrosion of metals by, 347[7].
corrosion of steel by, effect of $NaNO_2$ on, 3277[2].
depolarization of light scattered by, 1554[3].
detection of, 3143[5].
detn. in gastric juice, 611[9].
detn. in stomach contents, 1823[9]
dielec. const. for, 2780[9].
dielec. const. of, quantum theory of, 1024[1], 2942[1].
diffusion into gelatin, 427[5].
dissocn. and sp. heat of, 1167[6].
dissoln. of Al in, velocity of, 3618[9].
distn. app. for, P 715[4].
distribution between H_2O and phenol, 1023[8]
dyspepsia treatment with, 3041[7].
effect on *B. tuberculosis*, 2177[2].
on cellulose, 2247[1].
on chloroform syncope, 2206[5].
on cond. of nerves, 1103[1]
on decompn. velocity of NH_3, 813[7].
on diuresis, 1855[2]
on egg production in *Lecane inermis*, 3515[6].
on gastric contents normally and in achlorhydria, 3508[4].
on hematopoietic tissues, 1440[3].
on leathers, 516[9].
on proteins (with and without pepsin), 1087[1].
on respiration, 3721[2].
on seedlings, 1648[1].
elec. cond. and catalysis in BuOH, 3376[4].
elec. cond. in mixts. of MeOH and EtOH, 1553[7].
elec. cond. in water and in acetone-water mixts., 1743[6].
elec. cond. of AmOH in equil. with soln. of, 141[6].
elec. cond. of, and of its binary and ternary mixts. with KCl and NaCl, 2270[9].
elec. moment of gaseous mols. of, 1751[2].
electrolysis of aq. solns. of, 1743[3].
electromotive force (concn.) in Cu_2Cl_2 contg., 328[1].
equil. between metal chloride, H_2S, metal sulfide and, 1189[2].
equil. with KBr, 3142[3].
evapg. solns. contg. concd., 3274[4].
films (monomol.) on surface of solns. of, 134[1].
formation by gastric mucosa, 2531[2].
in gastric juice in cancer, 1664[5].
heat of dissocn. of, 2933[6].
heat of neutralization of, 1169[4].
ionization of, by electron impacts, 11[5], 146[1], 332[8].
ionization of, effect of H_3BO_3 on, 2933[2].
light scattering in solns. of, 2113[2].
from lignite, 2564[6].
manuf. of, P 481[8], P 3783[6].
manuf. of, at Canadian Salt Co.'s plant, 801[1].
milk, acid effect of, 2006[1].
mobility of gaseous ions in, and in mixts. with air, 1174[2].

mobility of gas ions in mixts. of, nature of the ion and, 1174^4.
mols., elec. polarity of, 3379^9.
mols., relations between electronic structure and band-spectrum structure in, 2458^1.
partition between H_2O and C_6H_6, 2607^8.
photochem. synthesis of, 546^6, 710^7, 870^9, 2620^3.
photosynthesis of, water as catalyst in, 545^9.
potential difference between H electrode and quinhydrone electrode in solns. of KCl and, detn. of, 1194^1.
as preservative, 3712^7.
pressures at various temps., tests of, 1716^3.
reaction with Me_2O, 359^6.
with NH_3, catalysis of, 3625^4.
with As_2O_3 and iodides, 1040^2.
with $Be(OH)_2$, heat of, 695^3.
with Bi_2S_3, 720^7.
with hydrogen (active), 3645^1.
with propylene, velocity of, 690^5.
with Tl and with Na, 2111^2.
secretion in stomach, physiology and pathology of, 1666^1.
silica absorption by, 2604^2.
soly. of metals and alloys in, 689^9.
solns. in EtOH and MeOH, viscosity and d. of, 3616^8
spectrum of, 14^6, 1178^3, 1559^8, 1951^3, 2445^7, 2790^9.
splitting into at. ions, energy required for, 1028^2.
standardization of, 2632^6
fixanals for, 1771^2.
against KIO_3, 1040^9, 2129^1
in stomach from chlorides of blood, 3493^2.
of stomach, relation of NaCl of blood to formation of, 441^4.
sucrose-contg., e. m. f. measurements in, 3123^6.
system: Cl–I–H_2O–, oxidation potentials and equil in, 692^9.
systems: ethyl ether–, and acetone–, 2975^7.
system: H_2O–, rule of Duhem-Margulés in, 1345^6.
titration with NaOH, 2471^3
transference nos. in glycerol-water mixts., 2608^2.
vapor tensions at 12.5°, 3629^6.
Hydrocinnamaldehyde, effect of ultra-violet light on, 1396^6.
——, **α,β - diketo - *p* - methoxy-**, phenylhydrazones, 1590^9.
——, **α,β - diketo - *p* - methyl-**, phenylhydrazones, 1590^8.
——, **α-phenyl-†(?)**, hydrate and semicarbazone, 1401^3.
Hydrocinnamamide, 3163^6.
——, **β-amino-**, and oxalate, 1066^7.
——, **α - amino - β - hydroxy - β - phenyl-**, 3450^8.
——, **2 - bromo - 4,5 - methylenedioxy-**, 2679^9.
——, **α-butyl-**, 2657^1.
——, **α,β-dibromo-**, 1612^9.
——, **α,β-dichloro-*N*-vanillyl-**, 404^9.
——, **N,N - diethyl-**, reaction with Grignard reagents, 2997^5.
——, **α-hexyl-**, 2657^1
——, **o-hydroxy-**. See *Melilotamide*.
——, ***p*-nitro-*N*-vanillyl-**, 404^9.
——, ***N*-vanillyl-**, 404^9.
Hydrocinnamic acid, ester of di-Et *l*-malate, 1056^7.
ester of 3-(hydroxymethyl)camphor, 1228^1.
esters, 1399^{2,7}.
esters, optical consts. of, 378^{2,3,5}.
thallium salt, 2818^4.
——, **α - (acetoxymercuri) - β - methoxy-**, *l*-menthyl ester, 1986^7.
——, **α-amino-**. See *Alanine, β-phenyl-*.
——, **β-amino-**, ethyl ester and its salts, 3291^9.
——, **α - amino - *p* - hydroxy-**. See *Tyrosine*.
——, **α - amino - β - hydroxy-**. See *Serine, β-phenyl-*.
——, **3 - amino-α,β,2,4,6-pentabromo-(?)**, ethyl ester, 594^3.
——, **2 - amino - α,β,3,5 - tetrabromo-(?)**, ethyl ester, 594^3.
——, **4 - amino - β,3,5 - tribromo-(?)**, ethyl ester, 594^3.
——, **α - benzyl-**. See *Isobutyric acid, β,β′-diphenyl-*.
——, **α-bromo-**, *d*-, consts., 3280^1.
——, **α - bromomercuri - β - methoxy-**, *l*-menthyl ester, 1986^8.
——, **2 - bromo - 4,5 - methylenedioxy-**, and methyl ester, 3292^5.
——, **α-carbamido-†**, metabolism of, 2010^9.
——, **o-carboxy-**, 383^1.
——, ***o*-(carboxymethyl)-**, reduction of, 1599^9.
——, **α - (α - carboxy - γ - phenylpropoxy)-**, 2673^6.
——, **α - chloromercuri - β - methoxy-**, *l*-menthyl ester, 1986^8.
——, **α - chloro - β - methoxy-**, and methyl ester, 2997^3.
——, **o-cyano-**, 2331^4.
——, **α,β-dihydroxy-**. See *Glyceric acid, β-phenyl-*.
——, **β,β-diphenyl-**, metabolism of, 2010^8.
——, **α-hydroxy-**. See *Lactic acid, β-phenyl-*.
——, ***p*-hydroxy-**. See *Phloretic acid*.
——, **α - iodomercuri - β - methoxy-**, *l*-menthyl ester, 1986^8.
——, **α-keto-**. See *Pyruvic acid, phenyl-*.
——, **β-keto-**. See *Acetic acid, benzoyl-*.
——, **α-methyl-**, *d*- and *l*-, methyl ester, 592^6.
——, **β-propyl-**, in animal body, fate of, 1657^2.
——, **(*p*-tolylsulfonyl)-**, 198^9.
Hydrocinnamic anhydride, 196^2.
Hydrocinnamohydroxamic acid, α-methyl-, *dl*-, *d*-, and *l*-, and benzoates, 592^{6,7}.
Hydrocinnamonitrile, 2 - bromo - 4,5-methylenedioxy-, 2679^9.
α-butyl-, 2657^1.
α,α-diethyl-, 2657^1.
α-hexyl-, 2657^1.
o-hydroxy-. See *Melilotonitrile*.
β - hydroxy - *m* - nitro - α - (*p* - nitrophenyl)-, 2844^8.
Hydrocinnamonitrolic acid, o-carboxy-†, 383^3.
Hydrocinnamophenone. See *Propiophenone, β-phenyl-*.
Hydrocinnamyl azide, α-methyl-, rearrangement of, 592^8.
Hydrocotarnine, spectrum of, 1178^2.
Hydrocupreine, 5′ - *p* - arsonophenylazo-, in malaria prevention, 1467^9.
——, **8′ - *p* - arsonophenylazo - 5′ - hy-**

droxy-, 6′-methyl ether, in malaria prevention, 1467^2.
–, ethyl-. See *Optochine*.
–, isoöctyl-. See *Vucine*.
Hydrocyanic acid, absorption by skin, 71^8
adsorbent charged with, P 3783^9.
adsorption isotherms of, 3605^5.
anhydrous, prepn. of, 2897^1.
in cadavers from putrefaction, 3469^8.
calcium compd. which evolves, P 3337^4.
chem. behavior in mixt. with Rn, 1031^6.
in *Chloris petraea*, 645^8.
compd. with Ca(CN)$_2$ for use as a fumigant, 971^3.
detn. in gaseous mixts., 1193^1.
detn. in water, 971^3.
diffusion of mixts. of irritating gas and, through building materials, 2926^4.
for disinfecting, app. for generating, 3250^4.
disinfection with, admixt. of irritants in, 3765^7.
effect on alc. splitting of sugar, 2170^4.
on blood of working with, 452^4.
on fermentation, 2558^3.
on guaiacol oxidation by laccase, 1821^1.
on laccase, 211^8.
on oxidation, 3373^4.
on oxidation by HIO$_3$, 2981^7.
on plant proteases, 1245^4.
on respiration, 3314^6.
formamide acid sulfate from, P 1813^5.
formation in animal organism from putrefaction, 3172^5.
fumigant contg. CNCl and, P 2556^9.
fumigation of buildings with, 2552^9.
fumigation of soil by, 3769^3.
fumigation of tomato houses with, 3532^2.
fumigation with, P 256^6, P 3526^8, 3770^2.
fumigation with, effect on foods, 244^4.
generation from Ca(CN)$_2$ for fumigation, 642^9.
hydrogen sulfide removal from, P 1306^7.
as insecticide for grain, 1489^7.
manuf. and recovery of, app. for, P 802^8.
manuf. of, P 260^6, P 342^4, P 481^6, P 648^4, P 972^5, P 2050^{8,9}, P 3541^6, P 3783^8.
in millet and sorghum, 2350^7.
oxidation (catalytic) of, 2443^9, 3625^8.
pest destruction with, 1673^1.
pharmacol. action of mixt. with CO, 3194^5.
plant "forcing" with, 1257^9.
in plants of Philippine Islands, 932^1.
poisoning by, and its treatment, 2552^4.
poisoning, cholesterol in pigeons in, 67^1.
effect of insulin on, 3740^7.
effect on blood, 3477^4.
poisoning of liver catalase by, 1419^3.
polymerization of, catalysis by ions of inert gases, 702^4.
effect of gaseous ions on, 2459^{7,8}.
ions of inert gases as catalysts for, 1760^4.
reaction with AcH, 3260^1.
reaction with AcH and NH$_3$, 3260^5.
removal from gas, 2062^8.
specific heats of, 1349^6, 3379^1.
stabilizing liquid, P 1695^8, P 3213^{8,9}.
structure of, 1734^5, 2797^2.
toxicity of, 3705^2.
vapor pressures of, 1008^1, 2437^4.
Hydrocyclorubber*, 3165^5.
Hydroferricyanic acid. See *Ferricyanic acid*.
Hydroferricyanides. See *Ferricyanides*.
Hydroferrocyanic acid. See *Ferrocyanic acid*.
Hydrofluoranic acid, tetrachloro - 3 - hydroxy-*, and acetate, 3001^{6,7}.
Hydrofluoric acid. (See also *Hydrogen halides*.)
effect on germination of peas, lentils and barley, 2182^4.
etching quartz with, protective coating for, 538^7.
free energy of, 1749^7.
heat of formation of, 2111^1.
heat of soln. of, 2110^9.
ionization potential of, 145^6.
manuf. of, P 802^5.
reaction with BeO, heat of, 695^4
with Se and Te compds., 1186^4.
with TeO$_2$, 1965^5.
with Tl and with Na, 2111^2.
specifications for, 2568^7.
spectrum of, 14^6.
vitreous compn. resistant to, P 809^1.
Hydrofluoride ion, form of, 3597^8.
Hydrofluozirconic acid, prepn. of, 2466^6.
Hydroformamine cyanide*, α-, prepn. of, 44^1.
Hydrogels. See *Colloids*.
Hydrogen. (See also *Detonating gas*.)
absorption of, by Ni powders, 1018^2.
in K vapor arcs, 1175^4.
by pyrophoric Fe, Ni and Co, 3255^8.
by Zr and Th, 3140^8.
activation by Fe, 3625^7.
active, 525^3.
active atoms of, in hemin and bilirubin, in their derivs., and in pyrroles, 1815^7.
active, reactions with gases, 3645^1.
adsorbed mol. of, elec. moment of, 531^8.
adsorption of, by charcoal, 2604^5, 3615^3.
by Pt, 5^8.
by Pt black, 2927^9.
by powd. glass and by powd. Ag, 3111^8.
by Pr and Nd, 1158^3.
by solid combustibles during drying, 654^2.
by ZnO, Fe$_2$O$_3$, Ni and Cu, 1545^2.
adsorption of mixts. of CO$_2$ and, on wood charcoal, 2104^4.
adsorptive equil. of mixts. with CO and with N, 2438^3.
anomalous dispersion of excited, 3389^5.
atom, effect of elec. field on radiating, 2949^5
model of, 1172^9.
momentum of, Döppler principle and conservation of, 3263^6.
quantum mechanics of, 1943^1.
reactivity of, of Me in 1-methyl-2,4 dinitronaphthalene, 2325^2.
structure of, 2114^1.
structure of, Bohr's model for, 7^3.
time of excitation of, 2449^6.
world-geometrical properties indicated by quantized world-lines of electron in, 1025^9.
atomic, flames of, 319^7.
atomic fragments of, detn. of elec. charge of, 2944^3.
atomic nucleus, union with electron, 2783^1.
atoms of, in contrast with slow electrons, 3129^6.
polarization of, in org. compds., 3684^4.
from α-ray particles, 3126^9.
recombination of, 2449^2.
beta-ray production in, 2787^7.
bigamous, 2265^6.
from bituminous shales, 499^5.

books: La molécule d', 1171[3]; Uber die Destillation von Zellulose und anderen Stoffen unter Wasserstoffdruck mit Katalysatoren, 2072[9].
bubbles in water, surface phenomena of, 2605[6].
canal rays of, absorption due to scattering of, in passing through H and He, 867[7].
diffusion absorption in passage through H, 3381[9].
Doppler effect in, 1355[9].
duration of light emission by, 3265[6].
interference of, 3129[7].
limit for duration of the emission process in, 3637[5].
measurement of light emission of flying atoms of, 1177[4].
from carbohydrate fermentation, NH_3 manuf. from, P 2395[5].
carbonization of coal with catalysts and under pressure of, 3342[6].
catalysis by ions of, 2459[9].
catalytic removal of O from gas mixts. contg., 3063[6].
catalytic transference of, in dissimilation, 5[4].
cathode disintegration of elements in, 2446[7].
cathodic, effect on strength of steel, 2779[2].
chem. const. of, 6[2].
chemistry of, 1187[7], 2628[6], 3142[1].
coke-oven, ammonia synthesis from, 2906[4].
collision sputtering of Ag in, 3639[1].
combustion of electrolytic gas in d. c. discharges, 2953[3].
complex H_3, atom nuclear structure of, 3263[5].
compressibility of, 133[1], 853[4].
condition equation of, 2610[5].
crit. potentials and heat of dissocn. of, as detd. from its ultra-violet band spectrum, 2115[5].
crit. potentials in presence of catalytic Ni and Cu, 1548[9].
crit. potentials of, in impact expts. in NH_3, 11[4].
delta rays produced by α-particles in, 1173[8].
dielec. const. and optical properties of, 1342[5].
dielec. const. of liquid and solid, temp. coeff. of, 1168[4].
diffusion of, through metallic cathodes, 2446[5].
through metals, 2926[3].
through quartz glass, 2437[7].
in stomach and intestines, 2509[3].
as disintegration product of C, N and O, 1556[7,8].
dispersion consts. and crit. electron velocities of mol., 1027[5].
displacement of metals, metalloids and oxides from solns. by, under pressure, 2959[4].
displacement of Pt by, under high pressure, 2960[4].
dried, effect of ultra-violet light on O and, 711[7].
effect on copper, 3419[4,6].
on distn. of cellulose, wood, etc., with catalysts, 1515[8].
on explosibility limits of CO and air, C_2H_4 and air and CH_4 and air, 989[3,4].
on luminescence of P, 3391[6].
on phosphorus at high temp. and under pressure, 1572[8].
elec. discharge (striated) in, 704[2], 2120[4].
elec. glow discharge in, in high-frequency fields, 9[7].
electrode, 315[9], 1421[4].
change in potential with pressure, 1169[9].
detn. of H-ion concn. at high temps. with, 1750[3].
detn. of p. d. between quinhydrone electrode and, 1194[1].
for detg. H-ion concn., 1770[5].
effect of Ra rays on potential of, 1352[1].
for flowing liquids, 847[3].
potential of, 2112[3]
for reactions between solns. of salts of weak metallic bases and acetate, oxalate and tartrate of Na, 2447[5].
electrode system for hydrion detn. in urine and blood, 1826[8].
electron affinity of, 3389[1,3].
electron capture by α-particles in, 2944[5].
electron reflection in, 1944[5].
electrons in, motion of, 2946[5].
equil.: $Fe_3C + 2H_2 = 3Fe + CH_4$, 3430[3].
equil.: $NiO + N_2 \rightleftarrows Ni + H_2O$, 1937[8].
equil. with Pd, 2273[9].
in explosion gases, effect of confining explosive on content of, 3571[3].
explosion of A- and He-dild. mixt. of O and, 2414[8].
explosion regions of mixts. with NH_3 and air and with NH_3 and O, 1906[8].
explosions of, in welding, 112[2].
explosions of mixts. with air, radiation in, 2750[8].
explosion with O, effect of C_2H_4 on limits of, 1906[5].
by fermentation, 964[4].
flames of, and of H-Cl, mobility of negative ions in, 700[7].
flow through a porous wall, rate of, 3601[5].
fluorescence of, excitation with ultra-violet light, 3391[8].
formation of, from CH_2O, 860[7].
by microörganisms, 1646[3].
by steam in hot boiler tube, 3623[5].
fuel for aircraft engines, etc., of kerosene and, P 658[9].
from gas mixts., P 3213[9].
from gas, rectification and liquefaction system for obtaining, P 984[7].
Geissler tubes contg., luminescence spectra of, 2620[1].
generation from C electrodes in elec. water heaters and boilers, 2955[1].
generator for, P 1541[1], P 2433[8].
heat capacity curves for, 2265[5].
heat of adsorption of, as index to catalytic activity, 1549[9].
heat of adsorption of, for Ni catalysts, 2442[3].
heat of combustion of, in org. compds., 327[2].
heat of reaction with CCl_4, 3631[4].
for hydrogenation of liquids, P 1514[4].
for hydrogenation of oils, 971[9].
hydrogen peroxide formation from detonating gas by optically activated Hg atoms, 3646[3].
ignition ps. of, 2750[6].
ignition ps. of mixts. with air and with O, 1716[6].
ion H_3^+, 2949[6].
ionization by electron impact, 146[1], 332[9], 1557[9].
ionization of, in hydrocarbon radicals, 2839[7].

ionization of mols. of, in catalytic decompn. of org. substances, 1018[1].
ionization potential of, 2118[7].
ions, energies of soln. of, 2446[1].
ions, mobility in air, 145[9].
isotherms of, 862[4], 3367[1].
isotherms of, and of H-N mixts., 3108[4].
law of corresponding states and, 133[2]
liberation of, from org. compds., 1588[2].
light absorption coefts. of band between C and, in alcs., 2950[7].
light emission by, in magnetic field, rate of decrease of, 3637[4].
manuf. of, P 267[4], 481[1], 801[6], P 2566[5], 3063[9], 3601[9], P 3697[1].
from CO and H_2O, catalyst for, P 3786[5]
for coal liquefaction, 654[8].
by electrolysis, 20[5], P 1762[5], P 2462[7].
by electrolysis, app. for, P 341[2], P 1567[9], P 3136[6], P 3270[9], P 3397[4], P 3650[7].
by electrolysis, device for preventing explosions in, P 2076[2].
from hydrocarbons, P 3337[8]
from natural gas, 2229[8].
from Roumanian natural gas, 276[4].
from water gas, P 2064[7], 2242[4].
methane formation from CO and, catalysis in, 860[9], 861[1].
mixts. with nitrogen, P 267[4], P 3215[8].
mixts. with O, CO_2, CO_2 and air, O and NH_3, velocity of sound in, 865[7].
mol. diam. of, 2101[5].
mol. field of, 3599[8].
mol. ion, structure of, 330[6], 1555[9].
mol. model, moment of inertia of, 701[3].
mols., dissocn. of, 2777[6], 3126[5].
monat., 144[5].
in natural gases, 1047[4].
-nitrogen bond, infra-red absorption of, 1356[1].
occluded, effect on tensile strength of Fe, 3677[3].
over-potential at Hg cathode, 2939[9].
over-potential of, film theory of, 2446[2].
overvoltage of, on finely divided metals and its relation to catalytic action of metals on soln. of Zn, 1019[4].
overvoltage, theory of, 873[8].
oxidation of, catalytic influence of ions of inert gases on, 2459[9].
oxygen-, flame, formation of O_3 and H_2O_2 in, 2110[2].
palladium-Ag alloys contg., x ray examn. of, 683[9].
particles, detn. of mass of, 1943[6]
particles from Al with Po as radiating agent, 3126[7].
particles from paraffin and Al, photographic action of, 1943[7].
penetration through Fe, 1930[7].
permeability of Ni to, effect of pressure on, 1544[6].
photo-ionization expt. with, 3639[7].
pressure gage for, P 523[6].
purifying, for NH_3 synthesis, P 3065[2].
quenching of resonance fluorescence of Hg with, 3126[9].
radiation in, from electron impacts, duration of, 2942[9].
reactions in, produced by α-particles, 145[5].
reactions of, produced by β- and γ-rays of Ra, 3638[4].
reaction with Br, in presence of charcoal, 2050[2].
with Br, velocity of, 3621[2].
with CO_2, promoter action of ThO_2 on Ni catalysts in, 325[5].
with CO, 1937[5].
with CO, free energy and equil. const. of, 539[1].
with CO when photosensitized by Hg vapor, 3645[7].
with Cl, catalysis of, 3625[4].
with Cl, effect of complex light on, 2951[4].
with Cl, effect of ultra-violet light on, 2122[7].
with Cl in light, 338[2], 710[7], 870[9], 2620[8], 2951[8], 3646[6].
with Cl in presence of charcoal, 2049[9].
with F, heat of, 2110[9].
with HCO_2Me and with CO, 1745[6].
with NO, 2440[8].
with N, equil. data of Haber, 697[1].
with N_2O on Au surface, 3260[9].
with O, catalysis in, 5[5], 1348[4].
with O, C_2H_4, CO, etc., in light, 2459[5]
with O in presence of resonance radiation, 2792[2].
with O in ultra violet light after sensitization by excited Hg atoms, 871[4].
with O when sensitized by Hg vapor, 3645[7].
recovery from coke oven gas, 2229[4], P 3798[7].
reduction equil. of Cu_2Cl_2 and $PbCl_2$ by means of, 2109[8].
reduction of Cr compds. by, 3658[5]
refractive index in magnetic field, 2113[9].
retrograde particles from disintegrated atoms, 9[2]
scattering of positive rays by, 3382[4]
sepn. of, from coke-oven gas, etc., by liquefaction, app. for, P 3757[7].
from gaseous mixts., P 804[1], P 956[4].
by partial liquefaction of gas mixts., P 1696[2].
soly. in Sn and Al at high temps., 1544[9].
specific heat of, 1167[7], 3631[5].
specific heats of, ratio of, 140[7].
spectrum of, 13[7,8], 15[5,6], 16[5], 143[6], 147[1], 330[7], 335[9], 543[7,8], 707[7], 1030[4], 1031[1], 1177[6], 1355[4], 1356[4], 1755[8,9], 1942[1], 1949[8], 2119[1,4], 2120[3], 2282[5], 2285[1], 2452[3], 2617[6], 2790[7], 2948[9], 2949[6], 3265[5], 3267[9], 3386[1], 3388[9], 3391[8], 3642[7].
spectrum of, and of mixts. of H with Hg and N, 333[2].
spectrum of, excitation by electron collision, 1027[6].
in solar chromosphere, 2951[2].
in stars, 3267[3].
in stars and in lab., 2454[6].
Stark effect for, 544[3,5], 1950[4].
system: Fe–O–, 164[1].
systems: O–N–, C_2H_4–O–, C_2H_4–air–, NH_3–O–, NH_3–air–, and O–S–, 1549[6].
thermal cond. detn. of, 1166[9].
thermal cond. of, 3601[8].
thermometer, comparison with He thermometer, 6[4].
transfer of excited energy from O_2 to N and 2286[7].
treating cracked hydrocarbon oils with, app. for, P 1515[2].
valence of, 2265[7].

vapor tension and heat of vaporization of, at low temps., 863[2].
viscosity of, and of its mixts. with SO_2, 1007[1].
volatility of Ge in, 3404[7].
from water, high pressure in prepn. of, 2712[3].
welding in, 3439[8].
welding with at., 2478[6], 3439[7].
Hydrogen, analysis, detn., 2802[1], 2964[6].
detn. in gaseous mixts., 2299[6].
in illuminating gas, 656[9], 723[7].
in metals, 1193[3].
in presence of CO, 351[2].
detn. of active H in org. compds., app for, 847[1].
detn. of CO in H mixt , 1576[7].
Hydrogen arsenide. See *Arsine*
Hydrogenase, action in presence of peroxides, 770[6].
fermentation of *d*-glucose by, 1815[8].
Hydrogenation. (See also *Reduction*) P 662[1].
of acetylene, C_2H_4 and C_3N_2, effect of gaseous ions on, 2459[7].
of acetylenic acids, 2310[7].
of aldehydes and ketones, and catalysts for, 739[1].
of *N*-alkylideneamino acids, 3283[2].
in analysis, 3407[9].
app. for, 301[7], 2758[5], P 3584[8].
of aromatic acids and their salts, 1798[9].
of azines, 3282[3]
books: catalytique dans le vide, 1941[6], Oxydation Polymerisation Wasserstoff-Anlagerung bei Ölen u Harzen, Fettsäuren u. Harzsäuren mit ungesättigten Gruppen, 2423[8].
of carbon, 3225[2].
of carbon and hydrocarbons, gas for, P 3799[7].
of carbon monoxide, 2814[7], 2815[3].
catalysis by metallized SiO_2 gel, 2109[6].
catalysis of, by Ni, 3452[2].
catalysts for, P 515[8], 673[1], 1017[8].
Ni as, 2442[4].
poisoning of, 692[2].
pure and impure Pt black, 1218[2].
catalytic, mechanism of, 1549[3].
of cellulose, 663[5].
of cellulose and lignin, 2241[3].
of coal, 102[8], 273[5], 654[6], 812[5], 1313[3,4], 1706[2,5], 1898[5,7], 2060[6], 2240[1], 2573[6,7], 3225[6], 3560[8].
of coal, oils, etc., P 3803[7].
of coal, prepn. of liquid hydrocarbons by, 3796[2].
of conjugated double bonds by catalysis, 3447[9].
of cottonseed oil and of hydrocarbons, effect of rate of stirring on velocity of, 1937[2].
of cottonseed oil with Pt as catalyst, 2271[7].
of cracked gasoline, 3232[3].
of cresols by Bergius process, 2063[2].
discovery of, by metallic catalysts, 3625[1].
of ethylene by means of excited Hg atoms, 1032[4].
of fats, Ni catalysts in, 2590[4].
formation of iso-unsatd. solid acids during, of fatty oils, 834[5], 2422[1].
of furan derivs., 412[6].
of gases or of gas-liquid systems, review on, 3625[5].
of hydrocarbon oils, P 3563[2].
of hydrocarbon products in Italy, 2063[5].
of hydrocarbons, P 2066[7].
hydrogen for, of oils, 971[9].
of imino acids, 56[5].
in ionized org. gases, 1031[7].
of ketones, 3829[4].
of liquids, P 1514[4].
at low pressure, 382[9].
mechanism of, photosensitivity and, 546[3].
of naphthalene, P 1996[6].
of naphthalene, high pressures in, 2712[1].
of oils for soap manuf., effect on properties of soap, 3356[3].
of org. compds. in presence of non-hydrogenating catalysts, 1791[1].
of paraffin wax, 3802[4].
of petroleum, P 3804[8].
of petroleum, coal distillates and slack, P 495[3].
of petroleum, etc., P 3803[5].
of phorone, Cu catalyzer for, 860[4]
under pressure at high temp., 1587[9].
under pressure, in presence of Ni salts, 1402[7], 2852[1].
of pyrrole derivs., 912[5].
reactions during, of oils, 2590[7].
of shale oil, 1713[2].
of tar and coal paste, 3225[5].
of tar oils, P 984[2].
of tar oils, etc., 102[3].
of unsatd. acids, 834[1].
of wood, cellulose and coal, 103[3].
Hydrogen bromide. See *Hydrobromic acid*.
Hydrogen chloride. See *Hydrochloric acid*.
Hydrogen compounds, binary, from new form of periodic system, 2923[6].
with metals, 1187[7].
Hydrogen cyanide. See *Hydrocyanic acid*.
Hydrogen halides, decompn by heat, 550[1].
optical and chem. investigation of solns. of, 3657[6].
reaction with indene, 756[6].
Hydrogen iodide. See *Hydriodic acid*.
Hydrogen ion. (See also *Hydrogen-ion concentration*).
absorption of, effect of electrolytes on, 2714[1].
activity coeffs. of mercurous ion and, 1746[1].
activity, formula for calcg., 2774[6].
in blood, distribution of, 229[8].
coagulation of colloids by, 534[4].
coagulation of Au sols by, 3613[4].
effect on destruction velocity of fluorescent substances, 3644[9].
on diuresis, 1855[2].
on viscosity of colloidal Hg derivs. of sulfosalicylic acid, 3611[4].
mobility of, in cells made from solns. of LiCl and NaBr in abs. EtOH, 3618[3].
nature of, 3103[9].
permeability of plant protoplasm to, effect of neutral salts on, 1831[8].
transference no. in glycerol-water mixts., 2608[2].
transference nos. in mixed chloride soln., 1169[7].
Hydrogen-ion concentration. (See also *Acidity; Alkalinity; Buffer systems; Indicators.*)
of anesthetics (local), relation to chem. constitution, 3011[6].
in animal organism, changes of, 780[9].
intestinal wall as assistant regulator of, 1438[4].

regulation through intestinal wall, 1841[4].
applications of, 1168[8].
Bacillus anthracis and, 2866[1].
in bacteriology, 219[1].
of blood and urine, albuminuria and, 2699[8].
in blood (circulating), respiration and, 2189[8].
of blood, in atrophic and dyspeptic infants, 446[6].
changes during clotting, 3698[4].

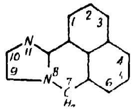
oil of, 2718^{2}.
perfume from, 3209^{4}.
Hystazarin, 2,3-sulfite, 3453^{3}.
Hysterectomy, effect on metabolism of Ca and P, 1842^{8}.
Hysteresis, detn. in rubber, P 3362^{9}.
of ferromagnetic substances, measurement at high frequency, 3634^{5}.
in sedimentation, 3606^{8}.

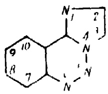
Ice, analyses of, 251^{3}.
colloidal, 2101^{9}.
crystn. through supercooled gelatin gels, velocity of, 1283^{1}.
light absorption by, 18^{9}.
resistance to compression, 3366^{6}.
from sea water, 6^{7}.
sea-water, salt removal from, 1164^{4}.
thermal properties of, 3376^{6}.
water treatment for manuf. of, 637^{5}, 3053^{6}.
Ice **cream**, alkali caseinate ingredient for, P 3521^{2}.
bacteria in, com. control of, 245^{2}.
bacteria in, gelatin as source of, 245^{4}.
carbon dioxide effect on, 3753^{1}.
effect of butter fat on, 70^{9}.
fat detn. in, 2545^{4}.
freezing of, 1674^{8}.
gelatin in, relation of its Au no. to, 632^{2}.
manuf. of, temp.-controlled device for indicating temps. and time intervals in, P 2433^{9}.
mixes, proportioning, 2212^{6}.
semi-solid milk product for manuf. of, P 1475^{8}.
viscosity, bacterial flora and quality of, effect of re-emulsifying, re-viscolizing or re-homogenizing ice cream mixt. on, 2028^{6}.
viscosity of, 1120^{5}.
weight standard for, 786^{7}.
whipping ability of mixes, effect of milk salts on, 3048^{8}.
Ichthyol, constituents of, oils, 3005^{6}
Ichthyosis, basal metabolism in, 2198^{8}.
Iconogen. See "sodium salt" under *2-Naphthol-6-sulfonic acid, 1-amino-.*
Icterus. See *Jaundice.*
Idya furcata, eye of, carotinoid pigment in, $2372^{5,4}$
Ignition. (See also *Combustion; Inflammability.*)
adiabatic, of hydrocarbon mixts., 1706^{1}.
auto-, of fuel mixts., 3341^{6}.
of coke, 2576^{3}.
of firedamp by elec. sparks, 2075^{5}.
of firedamp by momentary flames, 3571^{6}
of gases, $290^{7,8}$.
of gases at diff. pressures, 1716^{4}.
of gases by sudden compression, 2603^{2}.
of methane and coal dust by explosives, 3572^{9}.
of oils and fats in textile industry, 3352^{1}
of precipitates likely to be reduced by hot carbonaceous material, 3660^{2}.
retarders, anti-knock compds. as, 2906^{9}.
spontaneous, of coal, 1313^{7}, 1509^{1}.
of coal, prevention of, 3795^{2}.
of gaseous mixts., 291^{1}.
by nitric acid, 3571^{6}.
review of, 1508^{5}.
solids liable to, 1906^{4}.
temp., ionization and, 2751^{1}.
temps., 2749^{7}.
temps. of H and CH_4, detn. and variation of, 2750^{6}.
Iletin. See *Insulin.*
Ileus, choline treatment of, 2371^{5}.
hypertonic saline in a dynamic, 1850^{7}.
Ilex. See *Holly.*
Illinium, 3635^{6}.
discovery of, 3127^{1}, $3365^{3,4}$.
spectrum (Röntgen) of, $2600^{3,5}$, 3384^{8}.
Illipe nut, anti-rachitic properties of sterols from, effect of ultra-violet irradiation on, 2523^{4}.
Illium alloy, crucibles for detn. of volatile matter in coal, 3795^{5}
Illumination. (See also *Lighting.*)
dark-field, 2106^{3}.
dark field, anastigmatic mirror condenser for, 3592^{4}.
Ilmenite, 2804^{6}.
in Australia, age of, 2969^{2}.
electrolytic Fe from, 2621^{6}.
solns. from treatment with H_2SO_4, purification of, P 656^{2}.
Imbibition, in plant cells, oxidation and, 1429^{1}.
Röntgen rays in study of, 1010^{6}.
Imhoff tanks. See *Sewage.*

Imidazobenzisoquinoline,



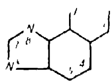
7 - Imidazobenzisoquinolinone, 9,10 - dihydro-, 1075[4]

Imidazobenzotriazine,



and salts, 3951[,5]

Imidazoindazole,



——, **1,8-dihydro-**, 1623[3]

Imidazole (*1,3 - diazole, glyoxaline*)

NH.CH N CH CH
1 2 3 4 5

in animal organism, methylation of, 3030[3]

crystal structure of, 3106[7]

derivs., synthesis of, 388[5]

——, **2 - acetamido - 4,5 - dimethyl-**, 193[9].

——, **2 - amino - 4,5 - dimethyl-**, and salts, 193[7,8].

——, **2 - amino - 4** (and **5**) **- methyl-**, picrate, 193[9].

——, **2 - [m (o** and **p) - aminophenyl -**, and salts, 395[3,4].

——, **4 - [o** (and **p**) **- aminophenyl -**, and salts, 395[5,6].

——, **1 - benzyltetrahydro - 2,3 - diphenyl-**, 1623[9]

——, **4** (or **5**) **- bromo - 2 - (p - nitrophenyl)-**, 2327[1].

——, **4** (or **5**) **- bromo - 2 - phenyl-**, and salts, 2327[1].

——, **2 - (p - bromophenylazo) - 4,5 - dimethyl-**, and -HCl, 193[8].

——, **2 - (p - bromophenylazo) - 4** (and **5**)**- methyl-**, 193[9].

——, **4** (and **5**) **- (p - bromophenylazo)- 5** (and **4**) **- methyl-**, and -HCl, 193[9]

——, **5 - chloro - 1 - ethyl - 2 - methyl-**, 1624[1].

——, **5 - chloro - 2 - methyl - 1 - phenyl-**, and picrate, 1624[2].

——, **4,5 - dibromo - 1 - methyl-**, -HCl, crystal form of, 415[4].

——, **4,5 - dibromo - 2 - [m** (or **o**) **- nitrophenyl]-**, 2326[9].

——, **4,5 - dibromo - 2 - (p - nitrophenyl)-**, 2326[9].

——, **4,5 - dibromo - 2 - phenyl-**, and salts, 2326[9].

——, **4,5 - dihydro - 2 - (m - nitrophenyl)-**, and salts, 2326[9].

——, **5 - methoxy-2-phenyl-**, 1623[8].

——, **1 - methyl - 2 - (p - nitrophenyl)-**, and salts, 395[4].

——, **1 - methyl - 2 - phenyl-**, and derivs., 395[6,7].

——, **1,2 - (1′,8′ - naphthoylene)-**. See *7 - Imidazobenzisoquinolinone.*

1 - Imidazoleacetamide, bromo - 5 - chloro-2-phenyl-, 1624[1].

——, **5-chloro-2-phenyl-**, 1624[1].

1 - Imidazoleacetic acid, 5 - chloro - 2 - phenyl-, derivs., 1624[1].

——, **tetrahydrodiketo-**. See *Hydantoinacetic acid.*

Imidazoleacrylic acid, methylation of, in animal organism, 3030[4].

4 (or **5**) **- Imidazole - p - benzenearsonic acid**, 395[5]

4 - Imidazolecarbamic acid, tetrahydro-2,5-diketo-. See *Hydroxonic acid.*

4 - Imidazolecarboxamide, 1 - acetyl - 4-ethoxytetrahydro - 2,5 - diketo - N, 3-dimethyl-, 3691[7].

——, **1 - acetyl - 4 - ethoxytetrahydro-2,5 - diketo - 3 - methyl-**, 3691[7].

——, **4 - ethoxy - N - ethyltetrahydro-2,5 - diketo-**, 3691[5].

——, **4 - ethoxy - N - ethyltetrahydro-2,5-diketo-3-methyl-**, 3691[7].

——, **4 - ethoxy - N - ethyltetrahydro-2 - keto - 3 - methyl - 4 - methylimino-**, and acetyl deriv., 3691[6]

——, **4 - ethoxytetrahydro - 2,5 - diketo-N-methyl-**, 3691[5].

——, **4 - ethoxytetrahydro - 2 - keto - N, 3 - dimethyl - 5 - methylimino-**, and acetyl deriv., 3691[6].

——, **N - ethyltetrahydro - 4 - hydroxy-2,5-diketo-**, 3691[5].

——, **N - ethyltetrahydro - 2 - keto - 3-methyl - 5 - methylimino - 4 - methoxy-**, 1388[1].

——, **tetrahydro - 4 - hydroxy - 2,5 - diketo - N - methyl-**, 3691[5].

——, **tetrahydro - 2 - keto-4-methoxy- N,3-dimethyl-5-methylimino-**, 1388[1]

4 - Imidazolecarboxanilide, tetrahydro-2,5 - diketo - 4 - methoxy-, 3691[6]

——, **tetrahydro - 4 - hydroxy - 2,5 - diketo-**, 3691[5].

4 (or **5**) **- Imidazolecarboxanilide, 2′** and **4′-amino-**, and salts, 395[1,2].

——, **2′** (and **4′**)**-nitro-**, and salts, 394[9], 395[1].

2 - Imidazolecarboxylic acid, 2,3,4,5 - tetrahydro - 4 - keto - 2,5 - diphenyl-, and Et ester, 2152[9]

4 - Imidazolecarboxylic acid, 4 - ethoxytetrahydro - 2,5 - diketo-, and ethyl ester and hydrates, 3691[4,6].

——, **4 - ethoxytetrahydro - 2,5 - diketo-3-methyl-**, ethyl ester, 3691[6].

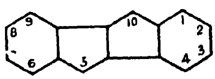
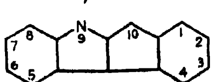
(2,3 ——3,4-γ-)

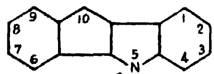
Indenobenzopyrylium compounds, 7,8 (and 8,9)-dimethoxy-2,3-indeno-3,2-γ-benzopyrylium ferrichloride, 2326[4,5].
2,3-dimethoxy-7,8-methylenedioxy-2,3-indeno-3,2-γ-benzopyrylium ferrichloride, 2326[6].
2,3,7,8 (and 2,3,8,9)-tetramethoxy-2,3-indeno-3,2-γ-benzopyrylium ferrichloride, 2326[4,5].
2,3,6-trimethoxy-2,3-indeno-3,2-γ-benzopyrylium ferrichloride, 2326[6].
2,1-Indenoindene,



—, **5,10-diisopropyl-,** 1235[2].
—, **5,10-dipropyl-,** 1235[1].
—, **4_2,5,9_2,10-tetrahydro-5,10-diisopropyl-,** 1235[2].
—, **4_2,5,9_2,10-tetrahydro-5,10-diisopropylidene-,** 1235[2].
—, **4_2,5,9_2,10-tetrahydro-5,10-dipropyl-,** 1235[2].
—, **4_2,5,9_2,10-tetrahydro-5,10-dipropylidene-,** 1235[2].
2,1-Indenoindene-5,10-diol, 4_2,5,9_2,10-tetrahydro-5,10-diisopropyl-, 1235[2].
—, **4_2,5,9_2,10-tetrahydro-5,10-dipropyl-,** 1235[1].
1,2-β-Indenoindole,

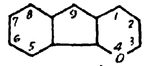


2,1-β



1,2-β-

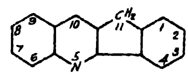
—, **5-acetyl-5,10-dihydro-,** 1620[1].
1-Indenone. See *Indone.*
2,3-β-Indenopyran,



2,3,-β-

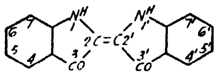
2,3-β-Indenopyran-2-carboxylic acid, 1,2,3,9-tetrahydro-3,9-diketo-1-phenyl-, ethyl ester, 911[9].
2,3-β-Indenopyran-3,9(1,2)-dione, 1-phenyl-, 912[1].
Indenopyrazole,

3-Indenopyrazolecarboxylic acid, 2,4-dihydro-(?), ethyl ester, 1078[1].
—, **2,4-dihydro-2-phenyl-(?),** ethyl ester, 1077[9], 1620[2].
5,11-Indenoquinoline,

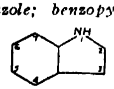


—, **10,10_1-dihydro-10-phenyl-,** 191[9].
Index of refraction. See *Refractive index.*
India rubber. See *Rubber.*
Indican, detection in urine, 1641[1].
detn. in blood, 2686[5].
Indicanemia, as test of liver function in pregnancy, 3032[4].
Indicanuria, as symptom of fistula gastrocolica, 1454[1].
Indicators. (See also *Congo paper;* and the common indicators, as *Methyl orange; Phenolphthalein.*)
in alkaloidal estns., iodoeosin as, 2563[3].
for alkaloidal titrations, 1493[8].
book: Their Use in Quant. Analysis and in the Colorimetric Detn. of H-Ion Concn., 2965[5].
carbinols as, 1230[9].
formaldehyde *n*-nitrosophenylhydrazone as, 722[9].
for hydrogen-ion concn., 3133[4].
for hydrogen-ion concn. detn. in beet sugar manuf., 1916[4].
methyl red and bromophenol blue as methyl orange substitutes, 2296[8].
modified methyl orange for artificial light, 2296[9].
neutral red as, in processes of autolysis, 3736[1].
for paper pulp industry, 3807[7,8], 3809[1].
in potassium dichromate titrations, diphenylamine and K ferricyanide as, 2963[2].
ranges in acetone-water mixt., measurement of, 2275[6].
spectrophotometric examn. of, 3635[3].
turbidity, 1188[9].
yatren as, 2468[8].
Indigo. (See also *Dyes; Indigotin.*)

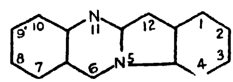
analyses of, 3238[8].
book: Dow, 1527[3]..
cotton dyed with halogen derivs. of, effect of H_2O_2 on, 1908[7].
dyeing of wool with, 2415[5].
electrochem. reduction of, 3395[9]
growth of Java, in Pusa soils, 2220[4].
printing cotton with glucose and, 3820[1].
vat, effects of addns. to, 3350[9].
Indigo blue. See *Indigotin*.
Indigoid compounds, 368[4].
Indigoid dyes. See *Dyes*
Indigosol O, dyeing with, 3574[7]
Indigotin,



complex metal compds. of, 414[1].
dyeing, use of Zn dust in, 1325½.
manuf. of, P 2588[2].
synthesis of, and derivs , 1079[3].
synthetic, 2585[7].
———, **6,6′ - bis (*p* - dimethylaminophenylazo)-**, 2836[8].
———, **7,7′ - dimethyl-**, addn. compds. with $FeCl_3$, 414[5].
———, **5 - (*p* - dimethylaminophenylazo)-**, 2836[7].
———, **7,7′ - dimethyl - 1,1′ - diphenyl-**, potassium deriv , 414[6].
———, **1,1-diphenyl-**, derivs , 414[4,5].
———, **4,7,4′,7′ - tetramethoxy-**, 178[9].
Indigotintetrasulfonic acid, tetrapotassium salt, reaction with carbohydrates, 742[4].
Indirubin (*oxindole*[$\Delta^{3,2'}$]*pseudoindoxyl*).
methyl derivs., 3455[8].
Indium, elec. cond. of, at low temp , effect of elastic deformation on, 141[3].
elec. resistance of, 2779[1].
spectrum of, 1356[6], 1560[3], 1951[1], 3640[2].
Indium, analysis, detection and detn., 722[7].
Indole (*1 - benzazole; benzopyrrole*),



in foods, 72[8].
formation by *B. avisepticus*, 1645[7].
formation by bacteria, 219[6].
prepn. of, 912[7].
spindle cell sarcoma produced by, 1849[3].
———, **1 - acetyl - 3 - (dihydroxymethyl)-**, diacetate, 758[7].
———, **1-acetyl-3-(β-nitrovinyl)-**, 758[8].
———, **3-amyl-**, and picrate, 598[7].
———, **2-*p*-anisyl-**, 598[5].
———, **2-*p*-anisyl-5-methoxy-**, 598[6].
———, ***o*-benzylene-***, acetyl deriv., 1620[1].
———, **2,3-dimethyl-1-picryl-**, 598[5].
———, **1-ethyl-**, 1625[6].
———, **3-hydroxy-**. See *Indoxyl*.
———, **2 - (*p* - hydroxyphenyl)-**, 598[6]
———, **5 - methoxy - 2 - phenyl-**, 598[6].
———, **2 - methyl - 1 - picryl-**, 598[5].
———, **3 - (phenyliminomethyl)-**, and -HCl, 758[7].
3-Indoleacetamide, 759[3].
3-Indoleacetic acid, and picrate, 759[2].
———, **2 - carboxy - 5 - methoxy-**, 1604[7].
———, **2 - carboxy - 7 - methoxy-**, and diethyl ester, 1604[7].
3 - Indoleacetonitrile, and picrate, 759[1].
3-Indolealanine. See *Tryptophan*.
3-Indolealdehyde, 1-acetyl-, 758[7].
3 - Indolecarbinol, α - (acetamidomethyl)-, acetate, 758[9].
———, **α - (acetamidomethyl) - 1 - acetyl-**, acetate, 758[9].
———, **1 - acetyl - α - (aminomethyl)-**, salts, 758[8,9].
———, **1-acetyl-α-anilino-**, -HCl, 758[7].
———, **1-acetyl-α-(nitromethyl)-**, 758[8].
———, **α (-aminomethyl)-**, picrate, 758[9].
2 - Indolecarboxylic acid, 5,6 - dimethoxy-, Et ester, 1604[6].
3 - Indoleëthylamine, and salts, 759[2].
3-Indolepropionic acid, and picrate, 759[2].
———, **2,3,4,5,6,7 - hexahydro - 2 - keto-**, 1989[5].
3 - Indolepropionitrile, and picrate, 759[2].
3 - Indolepropylamine, and salts, 759[3].
Indole series, quinoline derivs from, 2681[2].
syntheses in, 758[6,9].
syntheses in, catalysts for the Fischer, 598[2].
Indol - 2 - indol - 3 - indigo, 7-methyl-*, 3456[3].
Indol - 2,3 - indolindigo, 5 - methyl-*, 3456[3].
Indol - 3,2 - indolindigo, 5-methyl-*, 3456[3].
———, **7-methyl-***, 3456[3].
3 - Indolinepropionic acid, 4,6 - dibromo-2-keto-, 1989[6].
———, **4,6-diiodo-2-keto-**, 1989[7].
———, **2 - hydroxy-**, oxidation-reduction potentials of, and its halogen derivs., 2855[2].
———, **6-iodo-2-keto-**, 1989[7].
———, **2-keto-**, 1989[6].
———, **4,6,7-tribromo-2-keto-**, 1989[5].
2(3)-Indolone. See *Oxindole*.
Indoloquinazoline,



6,12 - Indoloquinazolinedione, 11,11₁-dihydro - 2,4,8,10,11 - pentamethyl-, 2160[7].
———, **11,11₁ - dihydro - 2,4,8,10 - tetramethyl-**, 2160[7].
———, **2,4,8,10 - tetramethyl-**, 2160[8].
Indone, 3-benzyl-2-phenyl-(?), 1804[2].
———, **3 - (α - bromobenzyl) - 2 - phenyl-**, 1804[3].
———, **2,3-dichloro-**, reaction with Na_2S, 3002[1].
———, **2,3-dihydro-**. See *1-Indanone*.
———, **2,3-diphenyl-**, 1407[9].
———, **3 - (α - hydroxybenzyl) - 2 - phenyl-**, acetate, 1804[3].
———, **3-(1-naphthyl)-2-phenyl-**, 1407[9].
———, **2 - phenyl-3-*o*-tolyl-**, 1407[8].
———, **2,2′ - thiobis[3 - chloro-**, and stannic chloride addn. compd., 3002[1].
Indoxazene. See *Benzisoxazole*.
Indoxyl (*3-hydroxyindole*), manuf. of, P 423[8]
ninhydrin condensation with, 1641[1].
Induction furnace. See *Furnace, electric*.
Induline 6B, synthesis of, 602[8].
Indulines, synthesis of, 602[7].
Industry. (See also *Chemical industry*; "industrial," under *Hygiene*; *Research*; *Waste*.)

arsenate, manuf. electrolytically, P 1957[9].
arsenicals as, 2891[8].
arsenic-contg., 1490[6].
for beet fly, 794[1].
for boll weevils, Ca salts of phenols from low-temp. tar as, 88[9].
calcium cresolate as, P 1299[9].
calcium cyanide as, 794[1], 2555[9], 3770[1].
in California, 2555[7].
carbon disulfide as, 3769[5].
carbon disulfide emulsion as, 2891[9].

carbon disulfide, inflammability of vapors from, 1716[8].
for carpet beetles, 828[6].
casein in, 972[8].
coating salts with inert particles for, P 483[2].
cold-mixed oil emulsions, prepn. of, 2556[1].
compn. of, 2223[5].
contact, 2556[3], 3769[7].
Cuprex and Nissex, 2223[3].
for *Dacus oleae*, 643[2,3].
Derris as, 1683[4].
from derris root of Sumatra, 3770[1].
dimanganoarsenate-contg., P 1491[4].
in dust form, application of, 963[4].
fertilizer and, P 964[1]
fibrous material treatment with gaseous, P 1722[6]
for flies, 3748[6].
fluorides and fluosilicates as, 2385[5].
fluosilicates as, 2556[6].
for fruit flies, 89[6].
geraniol in, P 1299[9].
government action respecting, 2554[7].
for grain, HCN and CS_2 as, 1489[7].
immunity of insects to, 259[7].
for leather jackets, 2385[8].
for mandibulate insects, 1490[2].
nicotine, 2555[6]
Paris green as, 1128[1,2].
from petroleum, 963[4]
petroleum oils as, 1683[6].
reviews, 955[4], 3328[7], 3778[2].
rubber latex as, 89[1].
for San Jose scale, dry substitutes for lime-S as, 1127[1].
savonade as, 304[3]
selenium-contg., P 3770[6].
for sheep blow-fly, 793[9], 2385[6].
soil, arsenates as, 2891[7].
"sol. oils," P 2067[6].
from spent alk. liquors in paper manuf., 1518[8]
spreading of, app. for, 522[2].
"sticker mixt." for, P 1683[9].
for strawberry root weevil, 1883[4].
sulfur as, 89[1], P 2224[2].
tests on, in 1921–1924, 471[9]
thiourea-contg., P 1491[4].
for tobacco plants, P 1884[1]
o-toluidine as, 2555[9].
for trees, P 1884[3].
for tree trunk injection, P 1491[4]
for warble maggots, 472[9], 2223[8].
for white louse, 2425[9].
Insects, arsenic tolerance in, 2556[1].
"attractant" for, P 1299[9].
colors in, 1554[5].
digestive enzymes of, 611[3].
eggs of, biochem. study of, 2882[3]
eggs of, poisoning by 3,5-dinitro-*o*-cresol and other compds., 3769[6].
immunity to insecticides, 259[7].
larvae, metabolism of, 2372[6].
mandibulate, insecticides for, 1490[2]
metamorphosis of, 2340[3], 3748[6].
metamorphosis of, effect of thyroid feeding on, 2026[3].
olfactometer for, 2556[2].
repelling compd., P 3533[2].
respiration of, 2544[6].
respirometer for, 1816[1].
Insulation, elec., high-voltage, 636[2].
elec., of cables, 1122[4].
elec., of cables, paper for, 502[9].
thermal, cement or mortar for, P 249[7].
with diatomaceous earth products and slag wool, 487[3].
of elec. furnaces, 3392[9].
of high temp. installations, 464[3].
of steam pipes, 3322[6].

of silver, 2946[3].
of stripped O atoms, 1351[8].
from quinine sulfate hydration, 3646[4].
radiation and, 143[7].
by radon in spherical vessels, 3380[1].
of α-rays, effect of metallic screens on form of curves, 3128[3].
in reacting gases, 333[4].
residual, in closed vessels, 2616[1].
residual, variation with pressure, 2943[4].
reviews, 2616[2], 2767[1].
by Röntgen rays, transformation of energy in, 1758[6].
of rubidium and K, 2943[7].
spontaneous, of atoms with one K electron removed, 2449[2].
by spraying water, 1353[4].
statics of, 330[9].
temp. relations of, 3638[8].
temp., Saha's equation for, 696[7].
thermal, 3645[9].
thermal, equations for, 3381[6].
thermionic effect, phase rule and, 2452[9].
thermionic effect, principles of, 3265[8].
thermionic effect, theory of, 2453[1].
thermionic emission from Pt and W, con current variations in photoelec. emission and, 2453[2].
thermionic emission, universal const of, 1351[9].
transition probabilities and, 2943[7].
Ionolysis, hybridizing species not closely related by, 3482[6].
Ionone, detn. of, 2847[9].
manuf. of, 2226[6].
synthesis of, 2847[7].
Ions, electrolytic. (See also *Chloride ion; Electrolytes; Salts;* etc.)
absorption by plants, 1648[9].
absorption (selective) by seeds, 774[2].
activity of, *vs.* concn. in interpretation of equil. between amalgams and aq. Na and K halide mixts., 2932[5].
adsorption by $Al(OH)_3$ and by its mixt. with $BaSO_4$, 3614[7].
adsorption by sols of same kind of charge, 3608[9].
adsorption of, in comparison with their coagulating power, 3614[3].
adsorption of, mechanism of, 1545[8].
adsorption of, valency and, 2268[2].
adsorption on colloidal particles, detn. of, 1346[8].
adsorption on Hg, 855[9].
in animal organism, secondary dissocn. of complex, 2017[9].
antagonism of, 322[7], 3370[1].
in coagulation of colloids, 3370[2].
to enzymes, 1638[4].
in hemolysis, 625[8].
in invertase-protein and invertase-lecithin systems, 1091[4].
in neutralization of sols, 1160[8].
theory of, 857[4].
attraction between, in strong electrolytes, 136[5].
in blood, effect of displacement on kidney function in pregnancy, 1265[6].
in blood serum, distribution of, 2009[9].
book: The Effects of Ions in Colloidal Systems, 866[1].
coagulating action of, of equal valencies and the radii, 3609[5].
colloid pptn. by multivalent, 1934[7].
complex, in dil. salt solns., 1936[2].
concn. of combined, detn. from membrane-potential measurements, 2343[1].
in crystal lattice, at. nos. and properties of, 2265[8].
in crystal lattice, symmetry of, 3253[4].
in crystal structure, 130[9].
dehydrasy of, 2508[5].
diffusion in cells, chloride content of fluids in relation to velocity of, 227[1].
diffusion in Ne tubes, 1944[6].
distribution in elec. double layer, hydrolytic adsorption and, 1739[6].
effect on acid production of excised muscle, 2527[4].
on amebocyte tissue, 3461[9].
on cells, identity with that of nerves and poisons, 2007[8].
on ciliary beat, 2000[1].
on contractility of smooth muscles, 624[2].
on diuresis in infants, 626[5].
on electro- and endosmosis, 2448[2].
on hydration, absorption and permeability in plants, 2181[6]
on insulin action on deoxidizable urine C, 3189[3].
on intra-auricular conduction, 2510[6].
on inversion of emulsions, 1740[9].
on invertebrates, 1281[6].
on liver function and sugar metabolism, 2358[5].
on nerve stimulation, 438[9].
elec. charge on, effect on osmotic behavior of alc. solns., 3619[7].
elec. forces between, and their activity, 2101[2].
equil. across semipermeable collodion membrane in case of NaCl and Congo red, 864[1].
equil. across semipermeable membranes, 136[8].
equil. const., 325[4].
equil. in blood, relations between reaction and, 1098[3].
exchange across a septum, 2505[7].
exchange in soils, relation to acidity, 2382[2].
in fermentation industries, 2557[4].
fixation to hydrophile gels, physico-chem. conditions for, 3497[9].
forces between atoms and, 861[6].
forces between Ne-like and A-like, detn. of, 319[5].
formation of complex, effect on magnetic susceptibility of paramagnetic salts in aq. soln., 1752[5].
Hofmeister series, formation and inversion of, 2106[7].
Hofmeister series, relation to blood clotting time, 439[8].
hydrates, sp. heat of solns. and, 2774[3].
hydration of, 536[2].
free energy of, 3632[4].
valency problem in, 1550[7].
importance in physiology, pharmacology, etc., 1637[9].

interaction of, 3617[9].
inter-ionic attraction theory of ionized solutes, 1162[1].
of isosteric isomers, stability of, 1734[3].
isotropic, structure of mols. and crystal lattices and, 1154[3].
of living membranes, 610[5].
magnetic behavior of, relation to formation of complex compds., 701[4].
migration in solid electrolytes, 146[3].
migration in solns., measurement of velocity of, 2608[7].
mobility of, 2931[9].
mobility of, Kohlrausch's law of independent, 136[4].
mobility of -onium, 2976[7].
passage through liquid dielec. media, 2780[8].
penetration through boundary layer between an electrolyte and a liquid dielec , 1751[4].
permeability of cartilage to, 3302[9].
permeability of membranes to, 1015[6,8], 1940[5], 2505[5], 3619[8].
permeability of meninges to, 3491[7].
permeability of protoplasm to, 213[7], 1631[7].
pharmacol. action of, 1858[9].
properties in crystal lattice, relation to at. nos., 3127[5].
radius of, 1153[9].
radius of, detn. of, 3258[4], 3616[2].
radius of, effect of inner development of atoms in periodic tables on, 2278[3].
shapes and sizes of, 1734[1].
size of, calcn. and evaluation of, 1925[1].
size of, effect on equation of state of strong electrolytes, 1928[1].
stimulation and, 3497[4].
tervalent, activity coeffs in dil. solns., 3117[7].
tetanus of muscles of heart and stomach by alterations in concn. of, 3492[3].
theory of, 3119[1], 3618[5].
thermodynamic behaviors of, in concd. solns., 3632[9].
transference nos. of, detn. of, 3117[8].
transference nos. of, moving boundary method for detg., 3118[5].
Ions, gaseous. (See also *Electrons.*)
of active deposits of Th and Ra, mobilities of, 333[1].
from alpha particles, chem. action of, 2459[6].
chem. action of, production by α-particles, 3391[2].
current ds. and temps. in low-pressure arc, measurement of, 2946[9].
distortion of, effect on thermodynamic stability, 1749[5].
electron diffusion among, coeff. of, 3128[9].
emission of negative, from oxide-coated filaments, 11[4].
energy of soln. of, in relation to effect of a charge on dielec., 2446[1].
energy required for splitting HCl into at., 1028[2].
excitation of, 10[9].
forces between atoms and, 3252[2].
forces in, 2113[7].
gratings, differentiation from at. gratings, 3266[2].
heat of soln. of, relation to heat of sublimation, and lattice energy, 3601[2].
of hydrogen, 2949[6].
of inert gases as catalysts, 1760[4].
ionization potentials by impact of positive, 2281[2].
lattice-type derivation from assumption of isotropic polarizable, 1029[3].
mobility of, 2279[2,4], 2280[9], 3639[4].
in air, 145[9], 2280[4].
in air contg. org. vapors, 3383[6].
in corona discharge, 2946[9].
in HCl gas and HCl-air mixts., 1174[2].
in HCl mixt., nature of the ion and, 1174[4].
Langevin's theory of, 1175[2].
mobility of negative, in A, 3383[8].
mobility of negative, in gasoline, H and H-Cl flames, 700[7].
mobility of positive, aging effect in, 9[5].
negative, formation in Hg vapor, 2943[1].
of org. gases, chem. effects in, 1031[6].
from platinum, 333[1].
positive, from catalyzers of Fe oxide and alkali metals, 2946[7].
positive, emission by metals at m. p., 3383[7].
produced in a spherical vol. by radon, 1756[5].
reaction of, produced by α-particles, 145[4].
reactions of, 2952[1].
relative production of positive and negative, by electron collisions, 332[7].
secondary emission from Ni surface due to slow bombardment by positive, 700[7].
size of, comparison with atoms, 1026[3].
size of, diamagnetism and, 1026[2].
slow, effect on measurement of elements of atm. electricity, 2616[3].
thermal, of oxide electrodes, velocity distribution of, 3381[8].
Ipecac, Ipecacuanha, alkaloids of root of, azo dyes from, 1240[4,5].
percolation of roots of, 1302[7].
Ipecac alkaloids, 90[8].
azo dyes from, 1240[4,5].
detn. of, 3210[6].
Iridescence, on glass, production of mat and glossy, 2733[3].
on paper and artificial materials, 284[1].
of *Sapphirinidae*, 3748[7].
Iridescent surfaces, P 3065[9].
Iridium, atom, configuration in diamagnetic salts, 2781[5].
as catalyst for HCHO decompn., 38[3].
as catalyst in synthesis of water, 5[5].
crystal structure of, 131[9].
lattice const. of, 2767[9].
spectrum of, 1354[9], 2454[9].
thermal cond. of wires and rods of, 1021[8].
Iridium, analysis, detection, 3663[2].
detection in dental alloys, 3664[7].
detn. in dental alloys, 3664[7].
in ores, 2471[4].
in Pt metals mixt., 718[6].
Iridium alloys, as catalysts in water synthesis at high temps., 691[2].
platinum-W-, P 358[1].
Iridium chlorides, IrCl and $IrCl_3$, 878[7].
Iridium compounds, alk. iridohexachlorides, reactions with α-picoline, 2295[7].
complex, formed by action of α-picoline on alk. iridohexachlorides, 3659[6].
with sodium and Cl, 878[6].
Iridium halides, 3657[8].
Iridium oxide, crystal structure of, 3414[9].
Iridium salts, therapy with, 1269[3].
Iridosmine, in Tasmania, 562[4].
Iron. (See also *Casting process; Castings; Cementite; Enameled ware; Ferrite;*

crystal structure of, 3105[1].
crystal structure of, effect on properties, 2306[2].
current-voltage sensitivity of Ge in contact with, 1023[5].
cutting cast, alloy for high-speed, P 3683[4].
decarburizing, P 2145[1], 3429[9].
deposits in water pipes, prevention of, 1125[8].
displacement from solns. of org. salts and cyanide compds. by H under pressure, 2959[9].
displacement of Cd and Rb by, 3404[6].
effect on aluminum-Si alloys, 3423[8].
  on catalysis by charcoal in oxidation of oxalic acid, 3375[5].
  on growth of *B. tuberculosis* on glycerinated beef broth, 2177[4].
  on sizing of paper with resins, 1521[7].
  on soil and nutrient media, 2715[1].
elasticity modulus of, relation to temp., and m. p., 132[9].
elastic properties of pure, 733[4].
electrically produced blackheart malleable, 2287[6].
electricity in industry, 338[7].
elec. resistance of, effect of tension on the transverse and longitudinal, 698[8].
elec. resistance of, increasing temp. coeff. of, 1566[6].
elec. resistance of wire of, effect of high vacuum on, 2436[8].

elec. resistance to 1.3° K., 3629[8].
electrodeposition of, app. for, P 715[1], P 875[9].
electrodeposition on Al, 1180[9].
electrolytic cores for Pupin coils, 3269[3].
electrolytic, orientations of crystals in, 131[5].
electrolytic, properties of, 3394[7].
electrolytic sepn. of C-bearing, from its complex compds. with carboxylic acids, 1358[9].
electron emission from, crit. potentials in secondary, 7[2].
electroplating, P 554[7].
embrittlement in malleable cast, prevention of, 1203[9].
equil. with Cr in carbides, 571[4]
etching of, protective addns. in baths, 2970[9]
etching with Oberhoffer's reagent, 2808[9].
films, Hall effect and sp. resistance in, 2610[8]
film (transparent) of, 525[6].
fireproofing material for, P 1697[2].
fluidity of, increasing, P 3279[5].
fluorescence in, 2115[2].
fluorescent energy transformation coeff. of, 2943[2].
in foods, 951[3,4], 1118[2]
forging, gas for, 814[2].
galvanization of—see *Galvanization*.
in granite injections and mica schists, 161[4]
graphite formation in gray pig, 1204[6].
graphite formation in pig- and cast, temp. effect on, 3431[1].
graphite, temper C and, 1379[8].
grating in study of Millikan region of ultraviolet, 2454[3].
gray, P 358[7].
gray and malleable, 571[6].
gray, correlating tests on, 730[3]
gray, manuf of, 2135[9].
growth of gray, 3431[9].
hardening cast, P 3682[2].
hardness of cold-worked ingot, effect of annealing on, 3427[8].
hardness of, influence of strain and of heat on, 572[5].
heating furnace for, P 168[2].
heat-treating engine cylinders of, furnace for, P 35[1].
heat treatment of carburized, practice of A. S. T. M. for, 955[1].
heat-treatment of cast, 3431[7].
heat treatment of molten, and its application to malleable cast, 3677[4].
of hemoglobin, action of pepsin and pancreatin on, 213[4].
in hemoglobin, effect of digestive enzymes on, 55[2].
hollow staybolt, specifications of A. S. T. M. for, 1121[4].
hydrogen penetration of, 1930[7], 2446[6].
inclusions in, detection by means of x-rays, 3660[1].
incrustation in water pipes from algae, 467[4].
industry, 3674[1].
effect of World War on, 2140[2].
in Luxemburg, 2134[1].
of Pittsburgh, power and fuel consumption in, 354[9].
refractory materials for, 2735[7].
in Sweden, 729[6], 3147[2].
in Sweden, power consumption in, 1200[8].
ingot, enameling, P 2144[9].
ingot, treating, P 3153[8].
iron oxide soly. in, 1972[5,8].
isomorphism with Hg, 1963[7].
lattice const. of, 2768[1].
in liver, spleen and kidneys, 3036[5], 3463[3].
logarithmic decrement of, variation with amplitude and viscosity of, 132[8].
magnetic changes below 400°, 2644[2].
magnetic, constitution of, 1940[8].
magnetic properties of, 1209[5].
magnetic transformations of electrolytic, 3426[8].
magneton nos. of, in complex salts, 2781[6,7].
magnetostriction in, 865[4], 3125[1,2].
malleable, P 3153[7].
malleable cast, and its graphitization, 2809[5].
malleable, manuf. of objects of, 2134[1].
in meats, 2375[1].
melting of, P 2974[3].
with elec. heat, 3392[7].
with flames of at. H, 319[8].
refractories for, 3068[3].
temp. and combustion regulation in, P 1587[2].
melting of pig, vol. changes during, 892[8].
metabolism of, 438[8].
effect of spleen on, 946[9]
after splenectomy, 3493[2]
in minerals and sediments, colors from, 2965[9].
miscibility of Cu and of Sn with, in fused state, 2812[5].
in nervous system in normal and pathol. conditions, 2696[8].
nickel effect on cast, 3426[3]
-nickel equil. diagrams, 2274[2].
nitrogen effect on, 3426[1].
in notched-bar impact test, effect of temp. on behavior of, 1206[1].
in nutrition, 1251[6].
open hearth, 890[4].
oxidation of metallic, by a current of air in presence of Fe salts, 878[6].
oxide removal from, P 1215[1].
as oxygen carrier in respiratory enzyme, 213[5].
oxygen detn. in, 2129[8].
oxygen effect on, 3427[6]
paints for—see *Paints*.
passivity of, 165[7], 327[6], 3438[6].
passivity of, by dil. HNO_3, 539[3].
pearlitic cast, 720[9].
phosphorus effect on gray cast, 2644[5].
phosphorus in wrought, 2647[2].
physiol. importance of, 1631[8].
physiol. relations of, 949[7].
pickling, P 341[8], 1894[5].
pickling, reclaiming spent solns. in, P 2974[6].
pickling sheet, rate of, 3416[1].
pig, manuf. of charcoal and coke, 2135[9].
mixers for, 1580[5].
resources of U. S. in 1924, 2475[3].
pipes—see *Pipes*.
for plants, K and ferric ferrocyanides as sources of, 1208[1].
poisoning by, in Eck fistula dog, 1857[2].
polymorphism of, 1583[3].
preheated, use in converters, 3147[8].
press-matrix, production in converter, 1973[7].
in printing alizarin rose and red on fabrics, elimination of, 295[1].
production in 1925–26, 3148[3].
properties in cold and in heat, 2642[7].
protection by Cd, 713[1].

protective film of, 895[8].
puddling, app. for, P 1781[9].
purifying molten, P 36[8].
pyrophoric, H and CO_2 absorption by, 3255[8].
reaction with CO, 3626[4].
with I, detn. of order of, 2775[2,4].
with MnS, 729[6].
with Se_2Cl_2, 2294[5].

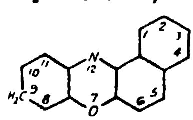
  as catalyst for alkyl chloride manuf., P 918[4].
  catalyzers of alkali metals and, positive ion emission by, 2946[7].
  for coatings, specifications of A. S. T. M. for, 1121[5].
  colloidal, coagulation by Na salts of acetic to caproic acids, 3370[7].
  disintegrating, P 1479[1].
  formation from Fe, 878[5].
  for hydrogen sulfide removal from gases, testing activity of, 3344[2].
  industrial hygiene of, 635[7].
  red "mummy," formation of, 1374[1].
  Rontgen-ray examn. of, 526[7].
  specification of A. S. T. M for, 954[6].
  structure of, 1569[7].
  system: $FeO–Fe_2O_3–TiO_2$, 2804[6].
  FeO, crystal structure of, 318[8].
    detn. in rocks, 3274[5].
    equil. in systems involving, 163[9].
    equil. with SiO_2, 1020[4].
    heat of reaction of CaO and P with, 1972[9].
    prepn. of, 318[8].
    reactions with solids, 3374[5].
    reactions with WO_3 and MoO_3, 324[7].
    reaction with C, 3626[4].
    reaction with PbO_2, 1766[9].
    reduction of, CO in, 729[4].
    soly. in Fe, 1972[6, 8].
    system: $FeCl_3–H_2O–$, 3628[4].
    system: $H_3PO_4–H_2O–$, 1364[4].

weighing in air of powder of, reduction to vacuum of, 2600[1].
Fe_3O_4, baking powd , without melting, 3598[8].
effect on decompn. of $KClO_3$, 2272[6].
formation from $Fe(C_2H_3O_2)_3$ or $FeSO_4$, 2959[9].
formation from $Fe(CN)_2$, 2960[1].
heat capacity of, 862[5].
manuf. of, P 973[6].
thermomagnetic study of, 1939[9]
Fe_2O_3, adsorption of alk. earth oxides and MgO by, 3368[2].
adsorption of NH_3 and CO_2 by, 3615[4].
adsorption of CaO by, effect of $CaCl_2$, NH_4OH and NH_4NO_3 on, 3367[9].
adsorption of ethylene and H by, 1545[7].
baking powd., without melting, 3598[8].
as catalyst in decompn. of $KClO_3$, 2627[2].
as catalyzer in oxidation of HCN, 3625[9].
colloidal, absorption of CO_2 and of C_2H_2 by, 1739[1].
colloidal, accumulation in palate, 3723[2].
colloidal, antagonistic action of electrolytes on, 857[4].
colloidal, effect of time of dialysis on aging of, 534[5].
colloidal, elec. charge of, 1740[8].
colloidal, hygroscopicity of, 1546[2].
colloidal, interaction with $Fe_4[Fe(CN)_6]_3$, Ag sol night blue and dextrin, 3114[9].
colloidal, kinetics of sol-gel transformation of, 4[7].
crystal structure of, 29[1].
detn. in portland cement, 488[7]
detn. in refractory materials, 808[2]
detn in silicates, 3219[8].
dialysis of, 2227[3].
dissocn. temp. of, 976[1].
effect on clays, 1131[7].
effect on potassium chlorate decompn , 2272[4].
formation from $Fe(CNS)_3$, 2960[1].
glowing of, on heating, 527[6].
heat capacity of, 862[4].
hydrated, P 267[2].
hydrosol, coagulation of pos., 1934[8].
in kaolinite, constitutional combination of, 1892[6].
luminescence of, 3268[3].
magnetism of, alteration in H_2O_2 decompn., 3625[3].
manuf. of, P 267[1], P 2232[4], P 3785[8].
paints, effect of ZnO on, 116[4].
prepn of, 2959[9]
reactions with WO_3 and MoO_3, 324[7].
red color in rocks from, 2966[3].
in slags, function of, 164[4].
system: $CaO-SiO_2-$, 1962[8].
system: MgO–, magnetic transformation in, 698[9].
water of hydration of, transformation into water of adsorption, 531[2].
Iron oxychloride, FeOCl, 3628[4].
Iron perchlorate, 1769[6].
Iron phosphates, prepn. of, 1364[4].
sirup of, increase of d. on keeping, 94[3].
$FePO_4$, precipitation in presence of $Ca_3(PO_4)_2$, 2299[8].
reduction products of, 2960[2].
soly. of, effect of acids and alkalies on, 1682[9].
Iron phosphides, electrolysis of, 2939[2].
eutectic, correlation of teeming and annealing temps. on extent and development of, 2651[8].
Iron preparations. (See also *Elektroferrol Heyden.*) 2387[7].
arsenic in, estn. of, 92[2].
choice of, 2721[9].
oleum ferratum concentratum, 646[6].
org., 2225[9].
reaction with ammonium sulfide, 3330[8].
reduced Fe, differences between U. S. P. and com., 1889[8].
Iron pyrites. See *Pyrite.*
Iron salts, agricultural value of, 2040[9].
blood pigment and complex, 1419[8].
cacodylate, toxicity of, 92[8].
as catalysts for reaction of H_2CO_3 and H_2O_2, 3684[8].
as catalytic poison in hydrogenation of amines, 1600[3].
detn. in gas absorbing masses, 981[4].
effect on *Clostridium chauvoei*, 3480[6].
effect on oxidations by HIO_3, 2981[3].
hydrolysis and H-ion concn. of, detn. of, 3095[6]
of iron-tannin inks, 405[6].
magnetic properties of, valency theories and, 2612[3].
pharmacol. action of, 1854[4].
precipitation in brain in encephalitis, 2201[3].
as promoters for catalytic reduction of cinnamaldehyde, 376[9].
reduction with H_2S, 2775[8].
in soln , condition of ferric, 1548[4].
of substituted AcOH and of malonic acid, 1769[2].
tanning with, theory of, 2089[8].
tissue differentiation by formation of, 215[1].
Iron silicate, system: $CaSiO_3-MgSiO_3-$, 1045[1].
system: $CaSiO_3-MgSiO_3-NaFeSi_2O_6-$, 29[8].
Iron silicides, reactions of $FeSi_2$ with alk. earth oxides, 3405[2].
Iron sodium silicate, system: $FeSiO_3-CaSiO_3-MgSiO_3-$, 29[8].
Iron sodium sulfide, 886[1].
Iron sulfates, $FeSO_4.H_2SO_4.6H_2O$, 1767[7].
$FeSO_4$, catalysis of oxidation of cysteine, leucine and fructose by, 3705[1].
effect on egg production in *Lecane inermis*, 3515[6].
mol. contraction of aq. solns. of, 3118[7].
oxidation by Br-water, rate of, 1348[3].
photochem. reaction with I, measurement of energy absorption attending, 1032[6]
recovery from waste waters from metallurgical plants, 3440[5].
reduction of chloric acid and chlorates by, 1042[8].
system: $Al_2(SO_4)_3-H_2O-$, 719[2].
$Fe_2(SO_4)_3$, decompn. of, P 1499[3].
effect on germination of potatoes, 2351[1].
for leaching Cu ores, continuous production of, 2636[1].
reactions with alkalies, 3259[1].
Iron sulfide, (FeS), alloys of Fe and, 1583[6].
formation from $Fe(CNS)_3$, 2960[1].
reaction with Mn, 729[6].
reaction with SO_2, 2294[1].
reduction of $FeSO_4$ to, 2959[9].
Iron telluride, 882[1].
Iron thiocarbonate, prepn. of, 3402[2].
Iron tropon, iron in, 951[3,4].
Iron uranate, prepn. of, 3657[2].
Iron uranyl carbonate, 1962[7].

Irritability, blood sugar and, 2531[9].
Irritants, from *Rhus* plant, P 264[9].
Irritation, chem. constitution and, 1281[1].
Irvingia barteri, as paper-making material, 3811[3].
Isaria virescens, pigment formation by, 1256[6].
Isatamide. For derivs. see under *Glyoxylamide*.
Isatan, (*3-hydroxy-3,3'-bi[oxindole]*).
——, **5-methyl-**, 3455[9].
——, **7-methyl-**, 3455[9].
Isatic acid, **N-benzoyl-**, derivs., 2997[8].
——, **N-carboxy-**, derivs., 2997[7,8].
Isatide, formation from isatin, 3455[8].
——, **5,5'-dimethyl-**, 3455[9].
——, **5-methyl-**, 3455[9].
Isatin (*2-hydroxy-3-pseudoindolone*). See also *Pseudoisatin*.
derivs., isomerism of, 2160[7].
iodine derivs., P 3171[5].
prepn. of, 193[1].
reduction of, 758[5].
and related compds., 1804[6].
sodium deriv., reaction with esters of $ClCO_2H$, 2997[6].
3,3'-thiocarbohydrazone, 1810[9].
——, **1,7-dimethyl-**, 2681[6].
——, **4,6-dimethyl-**, and derivs., 2681[4,5].
——, **5-methyl-**, prepn. of, 3455[8].
——, **5** (and **7**)**-methyl-**, reduction of, 758[5].
——, **7-methyl-**, prepn. of, 3455[8].
——, **5** (and **6**)**-nitro-**, constitution of, 2854[9].
——, **1,4,5,7-tetramethyl-**, 2681[6].
Isatinic acid. See *Isatic acid*.
Isatoic acid (*N-carboxyanthranilic acid*), ethyl ester, 2997[8].
——, **N-methyl-**, 2-ethyl ester, 207[3].
Isatoic anhydride, **5-methoxy-N-methyl-**, 207[4].
——, **N-methyl-**, 207[3].
——, **4** (and **5**)**-nitro-**, 2855[1].
α-**Isatoid**, **tetramethyl-***, 2160[7].
β-**Isatoid**, **tetramethyl-***, 2160[7].
Isinglass, effect on hydrolysis of esters, 367[6].
films of, 1149[2].
Isletectomy, effect on blood sugar of *Myoxocephalus* and *Ameiurus*, 3495[8].
Isoacetone. See *Δ1-2-Propenol*.
Isoamyl alcohol, azeotropic mixts. of, with its formate, acetate, and H_2O, 2657[8,9].
depression of f. p. of nitrobenzine by, 2107[8].
detn., 2802[9].
detn. in aqueous and cottonseed oil solns., 1742[9].
heat of vaporization of, 1551[4].
ion mobility in air mixed with vapor of, 3383[9].
reaction with magnesium, 1385[1].
reaction with N-methylcarbanilyl chloride, 1798[4].
system: H_2O–EtOH–, 2776[9].
system: H_2O–EtOH–iso-BuOH–, 3261[2].
Isoamylamine, effect on organs contg. involuntary muscles, 242[1].
prepn. of, 1068[3].
Isoamyl bromide. See *Butane, 1-bromo-3-methyl-*.
Isoamyl ether, prepn. of, 361[9].
Isoamyl iodide. See *Butane, 1-iodo-3-methyl-*.
Isoamyl mercaptan, effect of petroleum-refining agents on, dissolved in naphtha, 1784[2].
——, **α-methyl-**, 577[7].
Isoamyl sulfide, in petroleum distillates, action of NaOCl on, 278[9].
Isoapiol, 3449[9].
——, **6-bromo-**, and picrate, 3450[2].
Isoapomorphine, dimethyl ether*, methosulfate, 3458[2].
Isobarbituric acid (*5-hydroxy-2,4(1,3)-pyrimidinedione*).
oxidation of, 368[4].
Isobenzalizarin*, and derivs., 411[6,7].
Isobenzofuran,

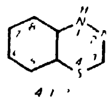
——, **1,2-dihydro-1-keto-**. See *Phthalide*.
1-Isobenzofuranacetamide, 1,2-dihydro-2-keto-, 2331[4].
——, **1,2-dihydro-2-keto-3,4-dimethoxy-**, 2330[9].
——, **1,2-dihydro-2-keto-4,5-dimethoxy-**, 2331[2].
4-Isobenzofuranacetamide, 1,2-dihydro-1-keto-, 184[3].
1-Isobenzofuranacetic acid, 1,2-dihydro-2-keto-4,5-dimethoxy-, and esters, 2331[2].
4-Isobenzofuranacetic acid, 1,2-dihydro-1-keto-, 184[3].
1-Isobenzofuranacetonitrile, 1,2-dihydro-2-keto-, 2331[4].
4-Isobenzofuranacetonitrile, 1,2-dihydro-1-keto-, 184[2].
1-Isobenzofuranacetyl azide, 1,2-dihydro-2-keto-3,4-dimethoxy-, 2331[1].
——, **1,2-dihydro-2-keto-4,5-dimethoxy-**, 2331[2].
1-Isobenzofuranacetyl chloride, 1,2-dihydro-2-keto-4,5-dimethoxy-, 2331[2].
4-Isobenzofuranaldehyde, 1,2-dihydro-1-keto-. See *Phthalide, 4-formyl*
1-Isobenzofurancarboxylic acid, 1-anilino-1,2-dihydro-2-keto-(?), aniline deriv., 1614[1].
——, **1,2-dihydro-2-keto-1-phenyl-**, ethyl ester, 1226[6].
4-Isobenzofurancarboxylic acid, 1,2-dihydro-1-keto-, 184[4].
1,2-Isobenzofurandiol, 1,2-dihydro-. See *1,2-Phthalandiol*.
1,2-Isobenzofurandione. See *Phthalic anhydride*.
Δ1(2),α**-Isobenzofuranglycolic acid, 5-hydroxymethyl-2-keto-**, ethyl ester, 184[2].
1(2)-Isobenzofuranone. See *Phthalide*.
9-γ-Isobenzophenoxazine,



9-γ

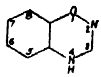
——, **9-(diethyldihydrohydroxyimino)-5-(p-dimethylaminophenylazo)-**, 2836[7].

4,1,2-Isobenzothiodiazine,



— —, **2,3-dihydro-3-phenylimino-** 745^{8}.

1,4,2-Isobenzoxdiazine,



—, **3-α-methylisobutyryl-7-nitro-**, 360^{3}.

Isobilianic acid, isodesoxybilianic acid from, 401^{3}.

Isoborneol, *d*-, and *l*-, and esters, 2998^{2,3,4,5}.
l, catalytic action of reduced Cu on oxidation of, 408^{1}
l-naphthalenecarbamate, 1232^{9}.

Isobutyl alcohol, acetate of, velocity of alk. hydrolysis of, 536^{6}.
anomalous dispersion and absorption of elec. waves by, 2940^{5}.
azeotropic mixt. of, with its formate, acetate, and H_2O, 2657^{8,9}.
dehydration and dehydrogenation of, over ZnO catalyst, 2308^{8}.
detn., 2802^{8}.
detn in aqueous and cottonseed oil solns., 1742^{9}.
heat of vaporization of, 1551^{4}.
oxidation of, 2996^{2}.
reaction with Mg, 1385^{1}.
reaction with *N*-methylcarbanilyl chloride, 1798^{3}.
systems: decalin–, and decalin–PhOH–, vapor pressures of, 2851^{8}.
system: H_2O–EtOH–, 2776^{9}.
system: H_2O–EtOH–iso-AmOH–, 3261^{2}.
trichloro deriv., antagonism to apomorphine vomiting, 3512^{3}.

Isobutylene, detn. in petroleum decompn. products, 1576^{9}.

Isobutylene glycol*, dehydration of, 2311^{2}

Isobutylenehexacarboxylic acid*, hexamethyl ester, 2861^{2}.

Isobutyl ether, boiling p., 577^{3}
prepn. of, 361^{9}.

Isobutyl group, effect on hydrogenation of azines, 3282^{9}.

Isobutyl iodide. See *Propane, 1-iodo-2-methyl-*.

Isobutyl sulfide, in petroleum distillates, action of NaOCl on, 278^{3}.

Isobutyraldehyde, azine, hydrogenation of, 282^{9}.
azine, reduction of, 899^{9}, 2309^{6}.
——, **β,β'-diphenyl-**, 3000^{1}.

Isobutyramide, (α-chloroacetamido)-, 3299^{2}.
——, *N,N*-**diethyl-β,β'-diphenyl-**, 3451^{9}.
reaction with Grignard reagents, 2997^{6}.
——, *N,N*-**dimethyl-β,β'-diphenyl-**, 3451^{9}.
——, **β,β'-diphenyl-**, 419^{7}, 3451^{9}.
reaction with EtMgBr, 2997^{6}.
——, *N*-**methyl-β,β'-diphenyl-**, 3451^{9}.
——, *N*-**1** (and **2**)-**naphthyl-β,β'-diphenyl-**, 3452^{1}.

Isobutyranilide, β,β'-diphenyl-, 3451^{9}.

Isobutyric acid, beryllium salt, crystal structure and chem. constitution of, 3598^{2}.
ester of 3-(hydroxymethyl)camphor, 1227^{9}.
ethyl ester, coeffs. of internal friction of mixt. with Et butyrate, 2926^{4}.
ethyl ester, heat of vaporization of, 1551^{5}.
p isopropylbenzyl ester, 2488^{2}.
methyl ester, heat of vaporization of, 1551^{5}.
polymers of, formation and heat of decompn. of, 3252^{5,6}.
thallium salt, 2818^{3}

Isobutyric acid, α-(α-aminoisobutyrylamino)-, 1629^{1}.
——, **[*N*-(*N*-benzoylglycyl)glycylamino]-**, 3299^{2}.
——, **α-(α-bromoisobutyrylamino)-**, 1629^{1}.
——, **(α-chloroacetamido)-**, and ethyl ester, 3299^{2}.
——, *N,N'*-**decamethylenebis[α-amino-**, and copper salt, 371^{2}.
——, **β,β'-dibenzoyl-α-cyano-**, ethyl ester, 404^{6}.
——, **β,β'-diphenyl-**, 3451^{9}.
methyl ester, 2323^{2}.
——, *N,N'*-**ethylenebis[α-amino-**, copper salt, stereochemistry of, 370^{6}, 1961^{7}
——, **glycylamino-**, 3299^{2}.
——, *N,N'*-**heptamethylenebis[α-amino-**, and copper salt, 371^{1}.
copper salts of, isomeric forms of, 1961^{6}.
——, *N,N*-**pentamethylenebis[α-amino-**, copper salts of, isomeric forms of, 1961^{6}.
and salts, 370^{9}.
——, *N,N'*-**trimethylenebis[α-amino-**, and copper salt, stereochemistry of, 370^{7}.

Isobutyronitrile, (α-chloroacetamido)-, 3299^{2}.
——, **α-dimethylamino-**, 1053^{7}.
——, *N,N'*-**heptamethylenebis[α-amino-**, and di-HCl, 371^{1}.
——, **α-hydroxy-**, reaction with EtMgBr, 1787^{2}.
——, *N,N'*-**trimethylenebis[α-amino-**, and di-HCl, 370^{7}.

Isobutyrophenone, oxime, reduction of, 1615^{1}.
and semicarbazone, 2996^{7}.
——, **β,β'-bis(4,5-methylenedioxy-2-nitrophenyl)-**, 2326^{1}.
——, **2,4-dihydroxy-**, 2320^{2}.
——, ***p*-methoxy-**, and derivs., 2850^{6}.
heat action on, 1229^{2}.

o-**Isobutyrotoluide, β,β'-diphenyl-**, 3451^{9}.

p-**Isobutyrotoluide, β,β'-diphenyl-**, 3451^{9}.

Isobutyryl chloride, β,β'-diphenyl-, 3451^{9}.
——, **α-keto-**, oxime, 360^{3}.

Isocaine, chem. compn. and therapeutic effect of, 2726^{2}.

Isocamphanecarboxylyl chloride*, 2847^{3}.

Isocaproamide, α-(α-benzamidoacetamido)-*N*-ethyl-, 1624^{2}.
——, ***o*-hydroxy-**, 1786^{5}.

Isocaproic acid, α-amino-. See *Leucine*.
——, **α-carbamido-**†, metabolism of, 2010^{9}.
——, **α-hydroxy-**, ethyl ester, 1786^{4}.

Isocaprophenone, 2,4-dihydroxy-, 2320^{3}.

Isocarbostyrilcarboxylic acid. See *Isoquinolinecarboxylic acid, 1,2-dihydro-1-keto-*.

Isocholesterol, detection of, 2341^{4}.

Isocorybulbine, constitution of, 765^{2}.

Isocresol (*2 - methoxy - 5 - methylphenol*), and derivs., 3449[5].
———, **4 - amino - 6 - nitro-**, and acetyl deriv., 3449[7].
———, **4,6-dinitro-**, and derivs , 3449[6].
———, **3-nitro-**, acetate(?), 3449[7].
———, **6-nitro-**, 3449[8].
Iso - o - cresolphthalein, tetrachloro-*, and derivs., 1231[8].
Isocrotonic acid, thallium salt, 2818[3]
ultra-violet absorption spectrum of, 708[9].
———, **β-chloro-**, ultra-violet absorption spectrum of, 708[9].
———, **α - (α - hydroxy - γ - phenylpropoxy)-γ-phenyl-**, lactone, and sodium deriv , 1232[5,6].
Isocyanates, reaction with Schiff bases and with hydrazones, 3168[9]
stability of, 1734[1].
Isocyanic acid, α,α - diphenyl - *p* - tolyl ester, 591[6].
3 - hydroxy - 2 - naphthyl ester, 1616[5].
1 - naphthyl ester, as reagent for alcs , 1232[3]
1-naphthyl ester, as reagent for phenols and aliphatic amines, 2319[3]
phenyl ester, prepn from BzN_3, 3448[4].
phenyl ester, reaction with methylurea, 901[2]
phenyl ester, reaction with 2,5 - piperazinedione and its derivs., 915[7].
2 - phenyl - 4 - quinolyl ester, 3010[9].
reaction with Schiff bases and with hydrazones, 3168[9]
Isocyanides, org —see *Isonitriles*.
Isocyanuric acid, tris(*m*-nitrophenyl) ester, 1804[8]
Isocyclenone*, and true camphenone, 1800[1]
Isocytosine - d - glucoside*, 2501[7].
———, **methyl-***, 1220[8].
———, **tetraacetylmethyl-***, 1221[1].
Isodesoxybilianic acid, prepn. of, 401[2].
Isodiazomethane, 1 - p - bromophenyl-3-(o-nitrophenyl)-*, 175[2].
———, **1 - (p - chlorophenyl) - 3 - (o - nitrophenyl)-***, 175[4].
———, **1 - (2,4 - dibromophenyl) - 3 - (o-nitrophenyl)-***, 175[3].
———, **1 - (2,4 - dichlorophenyl) - 3 - (o-nitrophenyl)-***, 175[3].
———, **3 - (o - nitrophenyl) - 1 - [2,4,6** (and **3,4,5) - trichlorophenyl]** *, 175[4].
Isodihydroprotopine β-chloride*, 3297[9].
Isodurene, phys. consts. of, 171[6].
———, **hexahydro-**. See *Cyclohexane, 1,2,3,5-tetramethyl-*.
Isoelectric points, calcg., formula for, 2774[6].
detn. in hide powder, 3095[8].
for plant tissue, 2352[1].
Isoerysimupicron, 2691[1].
Isoetiohemin, synthesis of, 2863[5].
Isoetiophyllin, synthesis of, 2863[5]
Isoetioporphyrin, synthesis of, 2863[5].
Isoeugenol, 1 - naphthalenecarbamate, 2319[3].
oxidation of, by BzO_2H, 2674[7].
polymer, chlorination of, 748[1].
Isofenchone, hydrazones, 2846[7].
Isoflavanol. See *Isoflavone, hydroxy-*.
Isoflavone (*3 - phenylchromone*).
———, **6-chloro-2-methyl-**, 1237[7].
———, **5,7-dihydroxy-2-methyl-**, and diacetate, 196[7].
———, **7,8 - dihydroxy - 2 - methyl-**, and diacetate, 197[2].
———, **2,6-dimethyl-**, 1237[8].
———, **7-hydroxy-2-methyl-**, and acetate, 196[8].

Ketones. (*For individual ketones common names, such as* Acetone, Biacetyl, *are utilized. Other ketones are named by the Geneva system where this is applicable; as derivatives of* Acetophenone, Propiophenone, *etc.: or are indexed under* Ketone. *Complex cyclic ketones are given names related to their parent compounds and ending in -one Polyketones are named as -dione, -trione, etc, if possible. See also* Ketosis.)
acetylenic, synthesis of, 1783[9]
from alcs , 41[4], 2996[1].
from *tert*-alcs., 1602[2]
from aldehydes, 1231[9], 1988[5], 2841[1].
aliphatic-aromatic, reaction with polyhydric alcs , P 1213[1]
alkylation of unsatd , 3287[3].
alkyl vinyl, from alkylvinylcarbinols, 1217[1]
bisulfites, constitution of, 2816[9], 2977[9], 3156[5].
chlorides of, solubilizing, P 3236[5]
condensation of aliphatic-aromatic, with 2-aminopyridine, 764[5], 3009[8]
condensation of aliphatic, with 2-furaldehyde, 3001[9].
condensations with, 1810[7].
crystal structure of, 3597[4].
cyclic, cleavage of ring in, 2331[3]
contg 10- to 18-membered rings, 1792[1].
manuf. of, P 917[4], P 2333[1]
reaction with BzH, 3456[4]
detection of, 1774[7].
detn. of, 561[8], 1604[2].
detn. of, in petroleum distillates and coal-tar oils, 1902[2]
β-di , carboxy derivs., 2843[2].
β di-, ethoxymethylene derivs. of, condensation with amidines, 206[4].
β-di-, metallic compds of, 403[1].
1,3-di , stereoisomerism of oximes of, 1410[4]
heat action on, 1228[7].
homologous, absorption in the infra-red by, 709[6].
hydrogenation of, 739[1], 1218[2], 3829[4].
hydroxy—see *Ketols*.
o hydroxydistyryl, reaction with Et acetoacetate, 173[1].
hydroxymethylene, 1590[5], 2483[4].
manuf. of, P 2332[9].
oxidation of, mechanism of, 1977[5].
of peppermint oil, 1301[6].
from α-phenyl-1-naphthaleneglycolic acid, 410[4].
poisoning by, 2712[5].
prepn. of, 42[8].
prepn. of, from higher fatty acids, 2818[9].
prepn. of optically active, and their racemization, 2324[8].
reaction (reversible) with primary or secondary alcs., 1611[2].
reaction with aldehydes, 1985[8].
with *o*-aminophenyl mercaptan, 386[6].
with di-Mg derivs. of C_2H_2, 3444[1].
with mesityl oxide, 3157[4].
with NOCl, 360[2].

with $NaHSO_4$, 3686[5].
with $TeCl_4$, 413[2,8].
rearrangement of, 2996[8].
reduction of, 1593[8].
spectra of, 15[9], 708[5].
spectra of, and of derivs., 870[8].
styryl alkyl, isomerism of, 387[1], 2833[3].
systems with optically active org. acids, 1054[6].
terpene, olefinic, from oil of *Tagetes glandulifera*, 407[2].
terpene, reaction with S, 2670[3].
thio-, prepn. of, 364[6].
thio-, reaction with Et_3P and with Et_3PO_2, 2976[8].
Ketonic acids. See *Acids*.
Ketonuria, renal glucosuria with, 1109[4].
Ketosis (See also "*Acetone bodies.*")
in acidosis of kidneys, 1656[9].
avoidance of—see *Antiketogenic action*.
blood serum Ca in, 2877[9].
effect on blood NH_3, 1664[4].
effect on blood plasma in diabetes, 782[9]
in pregnancy, 3036[8].
respiratory exchange and, 1262[9].
in small animals, cage device for study of, 1824[6].
of starvation, effect of carbohydrates on, 1651[9].
Kettles, gum-melting, 300[7].
jacketed, P 316[7].
Khand, of Punjab, 1483[7].
Kidney extract, effect on decompn of nucleic acid, 51[8].
Kidneys. (See also *Ambard constant; Calculi; Glucosuria; Nephrectomy; Nephritis; Urine.*)
acetone effect on, 2018[9].
activity of, effect of posture on, 3495[2].
albumins of liver and, 1250[2].
albuminuria by vasoconstriction of, 628[5].
amino acid effect on, 1131[6].
amino acid excretion by, diet and, 937[4].
as ammonia formation site, 3491[2].
antigen (heterogeneous) from, of horse, 3731[8].
atropine effect on, 1115[3].
barium chloride effect on, 2017[3].
bismuth effect on, 3046[1].
calcification (dystrophic) of, 1847[4].
chem sensitiveness of, 778[5].
chloride excretion by healthy and diseased, 3037[2].
cholesterol in, in HCN poisoning and in beriberi, 67[1].
creatinine excretion by, 1261[5].
cystine deposition in, in nephritis, etc, 2014[2]
cystine effect on, 1104[6], 3508[7].
diabetes—see *Diabetes*.
disease of thyroid origin, 3730[5].
diseases—see also *Nephritis*.
diseases, adaptability to an acid or basic diet, 782[1].
blood serum colloids in, absorption of dyes by, 3187[3].
chromogens in blood serum and in urine in, 1665[9].
effect on resorption of water from subcutaneous tissues, 2200[6].
hydrogen-ion concn. in, relation to salt and water metabolism, 1659[7].
mineral metabolism in, 441[9], 442[1].
pathogenesis of lipoid, 3736[6].
phenolsulfonephthalein excretion 2199[1].
protein decompn. products in blood in, 2696[1].
reticulo-endothelial app. and, 1449[5].
urea in blood after death from, 2173[1].
disturbances from diet of oats, 936[9].
diuretic effect on transplanted, 2358[7].
dye elimination by, effect of filterability of dye on, 1817[3].
effect of dicarboxylic acids and derivs. on, 1871[3].
effect of diuretics and other substances on, 2704[9].
effect of org compds of As, Hg and Bi on, 1858[2].
effect of pharmacol. active substances on, 1867[1].
effect on decompn. of β hydroxybutyric acid, 2530[6].
efficiency of, urea tests of, 238[6].
elec. potential of glomeruli of, effect on staining capacity, 1817[5].
enlargement of, diet and, 2524[5].
filtration and reabsorption in, rate of, 3028[8].
function of, creatinine test of, 2365[7].
in diabetes, 237[6].
hippuric acid synthesis as test for, 1844[5].
hypophysis ext. and, 2533[2].
nitrogen retention in blood and, 2009[1].
in persons having only one, 1438[9].
pregnancy and, 3032[5].
in pregnancy, indicanemia as test of, 3032[4].
unitary nature of impairment of, 3501[2].
urea excretion rate as test of, 3503[6].
water metabolism and, 2194[9].
glomerular circulation in, and effect of adrenaline and other substances on it, 2016[9]
glucosuria—see *Glucosuria*.
glycerol effect on, 1112[2].
heart stimulant excreted by, 3722[4].
insufficiency of, bismuth in, 2022[9].
blood serum in, P-Ca content of, 2014[1].
in diabetic coma, 3505[5].
diazo and urochromogen reactions in blood filtrate in, 1665[8].
diazo reaction of blood in, 2197[6].
effect of protein-rich diet in, 2014[4].
pathogenetic relations between true uremia and substances retained in blood in, 1666[3].
phenol in blood in, 1447[8]
residual N content of blood and, 2877[3].
urea in saliva in, 948[5].
xanthoproteic reaction in protein-free blood in, 1666[4].
insulin in, of normal and pancreatic diabetic dog, 441[6].
intermediary metabolism of, 1656[9].
iron content of, 3463[8].
iron pigments in, 3036[5].
lipoid nephrosis and albuminuria, 2358[1].
morphine effect on, 1115[3].
nerves of, effect on urine compn., 1840[2].
nitrogen elimination by normal and diseased, effect of Ca salts on, 1663[5].
nucleic P index of, 3304[4].
perfusion in, 227[3].
permeability of, 2343[2].
phenolsulfonephthalein excretion by, 2704[7].
phenolsulfonephthalein excretion by, in circulatory and liver diseases, 2199[2].
phenolsulfonephthalein test, 2191[6].

clarifying cloudy urines for, 1824^{5}.
error in, 2339^{7}.
phosphate secretion by, 2528^{8}.
phosphoric ester hydrolysis by, 777^{8}.
phosphorus compds. in, autolytic decompn. of, 940^{7}.
pituitrin secretion by, 2529^{3}.
poisons and, 3195^{2}.
in porphyrinuria, 426^{2}.
in pregnancy, effect of displacement of ions in blood on, 1265^{6}.
pregnancy effect on, 1108^{1}.
protein diet and, 226^{3}, 1833^{9}.
protein in, nutritive value of, 2695^{2}.
reabsorption in tubules, 2191^{1}.
reabsorption site in tubules of *Necturus*, 2542^{8}.
rubidium effect on, 2204^{5}.
secretin effect on, 58^{5}, 1854^{6}.
secretion by, diffusion and, 3464^{4}.
effect of Ca and K ions on, 777^{7}.
effect of $CaCl_2$ and $MgCl_2$ on, 2703^{9}.
effect of drugs affecting parasympathetic nerve system on, 1858^{7,8}.
effect of neutral, acid and alk. salt solns. on, 2703^{6}.
effect of sp. diuretics on, 1658^{7}.
nervous control of, 71^{6}.
secretory innervation of, 3723^{3}.
substances of, which affect heart and vessels, 624^{5}.
surviving tissue of, O respiration of, 1667^{2}.
terminal function of, creatinine and urea N detns. as index of, 2172^{9}.
tubule obstruction during excretion of hemoglobin, 780^{2}.
urea excretion in, 3492^{5}.
urea secretion by, salivary index of, 928^{3}.
uric acid excretion by, 3723^{6}.
urine formation, elec. factor in, 3727^{1}.
urine formation in frog, 1103^{7}.
vaso-motor sympathetic innervation of, effect of yohimbine and of active alkaloids of ergot on, 1278^{8}.
in vitamin insufficiency, 776^{8}.
Kiers, for circulating treating liquids in contact with material, P 3593^{2}.
Kieselguhr, 481^{5}.
as adsorbent, 2104^{1}.
adsorption of dyes by, effect of NaCl on, 2928^{7}.
colloidal-like protein in, from Luneburg heath, 2106^{2}.
effect on concrete, 977^{1,2,3,4}.
effect on fermentation, 964^{6}.
for filtering, P 3065^{6}.

study by stress-strain method, 2755[2].
nitrocellulose compn. for, P 3084[4].
nitrocellulose in manuf. of, 2910[3].
patents, review of, 3089[3].
phys. tests on, 1144[1].
pigmented resin-contg., durability of, 3354[2].
plasticizers for, 2910[3].
pyroxylin, 1723[3].
pyroxylin finishes and thinners, regulations on, 2755[3].
refractive index of, 1912[8].
resins for, from phenol and CH_2O, 672[2].
review, 2255[4].
rust-preventive, review of, 995[5].
sediments in, 298[7].
solvents for, 299[9].
from synthetic resins, 2756[7], 3354[2].
weathering of, 995[6].

Lactacidogen, in skeletal muscles, insulin effect on, 2874^6.
Lactalbumin. See *Albumin*.
Lactam-lactim isomerism. See "lactam-lactim" under *Isomerism*.
Lactarius vellereus, oxidase from, 2982^2
Lactase, in organs, 1816^3.
Lactates, crystn. of, 2601^7.
detn. of, 726^9, 2473^8.
effect on autolytic NH_3 formation in tissues, 3726^4.
of rare earths, 2797^3.
Lactation, blood serum in, photochem. reaction of, 2015^1.
calcium and P effect on, 931^7.
calcium and P metabolism in, effect of ultraviolet light on, 2528^5
diet for, vitamin B and, 1651^8.
iodized salt and, 3181^2.
metabolism in, 3185^5.
milk and butter fat production during a, errors in detg., 1472^9.
-promoting factor in unsaponifiable matter from wheat oil, 3026^2.
sucrose effect on, of ewes, 2527^8
sugar injections and, 1812^7.
vitamin B intake in, period, 3720^5.
vitamin of, 3188^4.
Lactic acid, adsorption isotherms of, 3605^6
ammonium and Ca salts, effect on acetone body formation and excretion, 3719^4.
analysis of com., 3666^3.
anhydremic acidosis from, 2198^8.
bacteria—see *Bacteria*.
in blood, 3721^4.
in carcinoma, 2197^9, 3502^6.
effect of tumor on, 238^4.
under normal and pathol. conditions, 3186^7.
under respiration, 441^4.
in blood and spinal fluid, 2011^6, 3502^4.
book: Die Herstellung von Milchsäure, 2332^9.
in brain, accumulation during anaerobic conditions, 2009^6.
in brewing, effect of starch on, 3533^6.
butyl ester, nitrate, P 3460^7.
butyl esters, rotatory dispersion of, 3445^6.
calcium and Sr salts of, in parathyroid tetany prevention and control, 3504^7.
and calcium salt, bromination of, effect of light on, 43^7
calcium salt, effect on Ca content of blood serum in tuberculosis, 1444^9.
for pharmaceutical use, P 95^5.
tablets of, variation in wt. of, 2562^8
in cerebrospinal fluid in meningitis, 2534^5.
chloride and sulfate detn in, 3095^6.
configuration of, 579^9.
conversion into glucose, effect of glucose level in blood on rate of, 2361^7.
cozymase of, 212^8.
cyclic double lactone—see *Lactide*.
detection and detn. in presence of other org acids, 3275^3.
detection of, 160^9, 1968^8, 3773^9.
detn., 726^9, 2473^8.
detn. in blood, 1252^4, 1255^2.
in gastric juice, 3469^3.
in wine, 2045^4.
d-, ethyl ester, 1787^7.
d-, methyl ester, consts. of, 3279^9.
diffusion into gelatin, 427^5.
dimethylthionocarbamate, its isomers and derivs., 3281^2.
in dyeing, 3088^1.
effect on H-ion concn. of muscle, 2010^2.
on intestinal contraction, 2533^3.
on muscle artificially perfused, 1442^5.
on rennet action on milk, 951^6.
on respiration, 446^9.
enzyme forming, sepn. from muscle, 1635^9.
equil. between, and its anhydrides, 1787^7.
ethyl ester, as solvent in flavoring exts., P 3756^5
ethyl ester, manuf. of, P 3696^9.
excretion of, in avitaminosis and effect of insulin, 2355^4.
in carcinoma, 2361^1.
effect of breathing O enriched air on, 3489^8.
effect of training on, 3489^9
fermentation—see *Fermentation*.
formation and disappearance in animal tissues, 3494^1.
formation of, by bacteria, 2178^9.
in chem. contracture of denervated mammalian muscle, 3047^4.
on death of smooth muscle, 3493^8.
by depancreatized dogs, 1100^7.
in fermentation of glycerol by *B. coli*, 218^5.
during growth, 1413^6.
in liver, 942^3.
from methylglyoxal by glyoxalase, 923^1.
by phanerogams, 3715^7.
by plant cells, 2691^5.
in tetanus, 1260^8
forms of, produced by bacteria, 2002^9.
in glucolysis, oxidation of, 2703^5.
glycogen conversion to, 3315^5.
ionization in aq MeOH, 2608^6.
l-, *l*-1,2-propanediol from, 1787^7.
manuf. of, by fermentation, P 476^2, P 795^5.
manuf. of, with sugar-inverting bacteria, 3713^8.
milk, acid effect of, 2006^1.
in milk, loss in dry ext. and, 2544^8.
in muscle, 1657^4.
effect of exercise on, 64^6.
formation from malic acid, 1102^6.
production of, 1283^2.
during prolonged activity, 1262^5.
in rigor mortis, 227^7, 2511^2.
rigor mortis from, 2194^5.
time relationships between contraction and formation of, 1091^5
in muscle contraction, 437^7, 777^6.
in muscle of heart, $777^{2,3,4}$.
in muscle of heart, tension development and, 3495^7.
in muscle (smooth) after death, 2530^5.
muscular action and, 439^9, 938^2.
oxidation-reduction potentials of, and of its Na salt, 328^3.
in pathogenesis of digestive disturbances of infants, 233^9.
properties of *l*- and *d*-, in organism, 2338^9.
purification of, P 3171^7.
reaction velocity with Br, 1953^8.
reaction with hexoses in lactic-acid bacteria and in muscle, 3462^5.
reaction with methylene blue, 742^6.
for respiration and synthesis of carbohydrates in organism, form of, 3494^6.
review on, 769^3.

secondary oxidation in presence of peroxidase, 2335[3].
silver salt, reaction with I, 409[4].
streptococci producing, effect on flavor of Cheddar cheese, 2546[3].
system: aniline–water–, 1348[8].
for tanning, 3095[3].
in textile industry, 113[6].
in tissues in malignant tumor cases, 3731[5].
titration and compn. of com., 3666[4].
in tumor of stomach diagnosis, 3732[9].
in urine after exercise, 230[4].
yeast action on, 2866[5].
zinc salt, soly. curves for, 2003[1].
Lactic acid, carbothiono-*, stereochemistry of, 3280[9].
——, **imidazolyl-**. See *Imidazolelactic acid.*
——, **β-p-phenoxybenzoyl-**(?), 593[5].
——, **β-phenyl-**, derivs., optical rotation of, 751[2].
——, **α,β,β - triphenyl-**, photosynthesis of, 594[3], 2844[9].
Lactic anhydride, detn. in lactic acid (com.), 3666[4].
Lactide, equil. between lactic acid, etc , and, 1787[7].
Lactimide*, *l*-, reduction of, 1593[2].
Lactobacilli. See *Bacillus; Bacteria.*
Lactodensimeters, 846[1].
Lactone number, of fats and oils, 3828[1]
Lactones, formation from gluconic acids, 2821[1].
hydrazo-, six- and seven-membered rings, 2485[5].
imido-, 3290[9].
reaction with aromatic hydrocarbons and $AlCl_3$, 751[2].
Lactophenine, analysis of, 2301[2].
Lactophosphoric acid*, calcium salt, in acetonemic vomiting, 3741[5].
Lactose, absorption by liver, 1836[3].
detn., 350[2], 3666[6].
detn in bread, 631[4].
in milk, 1674[7], 2027[8].
in mixts. with sucrose or invert sugar, 2632[9].
effect of feeding, on artificial infection of chicks with *Eimeria avium*, 3024[8].
effect of feeding, on H-ion concn. of cecal contents of chickens, 3024[6].
effect on intestinal absorption of Ca and P, 3718[4].
in feeding expts. with pigs, 952[7].
as feeding stuff for dairy cows, 952[8].
hydrolysis of, 1060[2].
manuf. of, P 953[1], P 3520[9].
methylglyoxal from, by action of alkali, 3722[3].
neolactose from, 2483[9].
origin of, 1842[7].
oxidation of, 169[6].
oxidation of, catalysis in, 2935[4].
in residue of sweetened condensed milk, 1119[9].
specific dynamic action of, 3717[4].
from whey, 2028[3].
whey action on, 619[4].
Lactosuria, whey and, 619[9].
Lactuca. See *Lettuce.*
Ladd, E. F., obituary, 1006[3].
Lafay, Laurent, obituary of, 3776[5].
Lagerstroemia, tanning properties of Burma, 2090[3].
Lakes. (See also *Pigments*). P 670[6].
alizarin, structure of, 2606[9].

by plastilin and free S, 2638[9].
corrosion of cable sheaths of, 2649[6].
crystals, prepn. of, 1542[8].
crystal structure of, 2601[2], 3105[1].
diffusion in Hg, retardation with d. c., 2938[6].
diffusion in solid, 540[7,8].
distribution in body in chronic Pb poisoning, 2020[9].
earth's age and, 2132[7].
effect of oxygen and, on cond. and ductility of Cu, 2640[9].
effect on germination, 3716[7].
on germination of frog spawn and on growth of tadpoles, 3749[6].
on gold, 2654[4].
on growth of hyacinths, 3716[8].
on photographic fixing baths, 1037[8].
on *Pleuronectes platessa*, 3749[5].
elec. resistance of, 2779[1].
elec. resistance of, at low temp., 864[7].
electrochem. and x-ray studies of, 1955[7].
electrolytic, thermal examn. of, 3366[7].
finishing microscopic rock sections with plates of, 1375[7].
in foods and excreta, 2508[3].
fused, mixing with gases, P 2479[8].
fused with Sn or Cd, heat of mixing of, 2936[9], 2937[1].
heat of alloying, with Cu, 2655[8].
hydrogen diffusion through cathodes of, 2446[5].
in Idaho and Wash. in 1924, 2475[2].
industry in 1925, 3674[1].
isotopes of, fractionating, 2783[6].
isotopes of, spectrum of, 870[7].
isotopic, at. wt. in cleveite, 1173[5].
lining for tanks in $(NH_4)_3PO_4$ manuf., 647[8].
in Montana in 1924, 2475[6].
in Nevada in 1924, 3415[4].

notched-bar impact test of, effect of temp. on, 567⁹.
phosphorus in treatment of, P 736².
physiol. relations of, 949⁷.
in pigment industry, 1143⁹
pipes, solder manuf. with scrap, 3440².
plasticity of, 2808⁶,⁷.
powdered, P 1214⁴, P 2052³.
radioactivity of, effect of sunlight on, 702⁶, 3638⁴.
radium-contg., effect on photochem. reduction of CO_2, 331⁹
reaction: Sn + $PbCl_2 \leftrightarrows$ Pb + $SnCl_2$, 3261³.
reaction with $CdCl_2$, application of mass law to, 1165⁹.
with $PhNO_2$ in AcOH, 744⁹.
with Se_2Cl_2, 2294⁶
reduction of $PbHPO_4$ to, 2960³.
reduction of CH_3NO_2 and $PhNO_2$ by, 1016⁷.
resistant to corrosion or high temps., 2814¹
resources of U. S in 1924, 1376⁸.
review of mining and trade information, 888¹.
Röntgen electrons from, asymmetry of discharge of, 706⁷.
Röntgen-ray scattering with, effect on polarization, 3266⁴.
soldering, burner for, 896³.
solders, tensile properties of, 1212⁸
spectrum of, 18⁵, 147⁶, 1354⁸, 1355³, 1560¹, 2118⁷, 3266¹.
surface tension of liquid, 3603⁷.
system: Sb–, 568¹, 2652⁹.
system: Ag-Zn–, 3416⁸.
systems: Tl–, Bi–, Sb–, magnetic susceptibility in, 1209³,⁴.
temp. detn in molten, pyrometer for, 3416⁹.
transformation into Tl, 1755³.
transmuting into Hg and Tl, 2449⁹.
in treatment of malignant disease, 2202¹
in Utah in 1924, 2635⁶.
vapor pressure of, 854¹
volatilization from solder, etc., in flame of blast lamps, 2143⁷.
Zeeman effect for, 2788⁴, 2790⁴.
Lead, analysis (See also *Hydrogen sulfide group.*)
detection, 158⁷, 3660⁰
detn., 27³, 725¹, 1189², 1770⁵, 1966⁴, 2963⁵.
detn. in animal tissues, 1251¹.
in baking powder, 3198⁴.
in bearing metals, 2130⁷.
in cans and canned goods, 2883⁴.
in com. magnesium, 1366⁵.
in feces, 1420⁶.
in organs, 27⁹.
detn. of silver, 1772⁸, 1967⁷.
sepn. from Bi, 1041².
sepn. from Ag, 1041⁷.
Lead, metallurgy of, P 357², P 734⁹, P 735¹, P 1382⁸, P 1975⁸.
from alloyed metals, P 1360⁶, P 1782².
app. for, P 1383¹.
blast-furnace slags, Zn in, 1376⁹.
at Durango, 1376⁹.
by electrolysis, 1956¹.
equil. between PbS and its roasting products, 692⁸, 2776¹.
at Federal smelter, 3276⁷.
from galena ores, P 3441².
at International smelter, 2475⁷.
from iron sulfide ores, 2305⁶.
leaching Cu mat and speiss with HNO_3, 1579⁷,⁸.
from mixed Pb-Zn sulfide ores, P 1213⁷.
refining, P 357³, P 896⁷, P 1975⁶,⁷, P 3154¹.
refining, app. for, P 167⁷.
refining by Harris process, 3276⁷
residue and scrap treatment, 888⁷.
reviews, 2475⁸, 3674¹.
from silver ores, 889¹, P 1781⁸.
silver removal, 1048⁵.
slag formation in, effect of ZnO on temp. of, 891⁴.
slags in India, 3410¹.
from speiss, 889⁵.
sulfating ores in, P 1975⁴.
from sulfide ores, P 1213⁴, P 3441¹, P 3441³.
sulfuric acid manuf. from gases from, 2896⁹.
from tin ores, P 1781⁸.
in U S. in 1924, 1376⁸.
from zinc S ores, mats, etc., P 3441⁷.
Lead acetate. (See also *Lead subacetate*)
manuf. of, P 2232².
prepn. of, 2389⁴
selenocyanogen prepn. with $Pb(AcO)_4$, 1364¹.
Lead alloys. (See also *Bearing metals;* and "system" under *Lead.*)
aluminum-Cu-Ni , coating Fe vessels with, P 1976⁸.
amalgams, distn. of, 686¹.
antimony-, effect of Al on, 3423⁷.
antimony-Sn-, P 3443².
antimony , Sn , and Sb-Sn-, hardening of, 2811⁹.
antimony-Sn-, sepn. of Sn and Sb from, 2636⁴.
bismuth-Cd-, hardness of, 894⁷,⁸.
bismuth-Sn-, hardness of, 894⁸,⁹.
for bonding glass, P 2145⁵.
cadmium-, density measurements at high temps., 3148⁸.
copper-, P 356⁹, P 3443³.
copper-Sn-, P 2480¹,², P 3442⁵.
die casting of, 888⁶.
hardening of, 2652⁹.
phosphorus-, P 736².
resistant to corrosion or high temps , 2814¹.
tin-, quenching of, 3148⁹
tin-Zn-, casting of, 3416⁵.
zinc , Röntgen-ray analysis of, 2601¹.
Lead arsenate. (See also *Sprays.*)
coated with lead oleate, 1488⁹.
fungicidal properties of, and of its mixt. with Ca sulfides, 2223⁶,⁷.
manuf. of, P 1884².
prepn. of, 3540⁶.
protective action of substances on suspensions of, 2554⁸.
reaction with lime S, 3531⁴.
as spray for orange trees, effect on compn. and flavor of fruit, 88⁶.
Lead borates, 1963³.
Lead bromate, 718⁹.
Lead bromide, elec. cond. of mixt. with AgBr, 2276⁵.
fluorescence of, 2629⁶.
heat capacity and entropy of, 696⁶.
Lead carbonate. (See also *White lead*).
dissocn. velocity of, 3623³.
heat of formation of, 140⁶.
from lead chloride, P 1498⁷.
manuf. of, P 2051¹, P 2479⁵.
from ores, etc., P 3441⁹.
thermal decompn. of, velocity of, 2109⁵.
Lead chamber process. See *Sulfuric acid.*

Lead chloride, complex salt with quinoline-HCl, 601^5.
decompn. potentials and polarization of, dissolved in anhyd. pyridine, 690^2.
dielec. const. of, effect of exposure to light on, 1762^9.
elec. cond. of mixt. with Cu_2Cl_2, 2276^5.
electrolysis of, 2288^8.
fluorescence of, 2629^6.
heat of vaporization and b. p. of, 2603^8.
lead sulfide pptn. from, effect of $MgCl_2$ on, 2294^6.
reaction: $Sn + PbCl_2 \rightleftarrows Pb + SnCl_2$, 3261^3.
reaction with Cd, application of mass law to, 1165^9.
reduction equil. of, by means of H, 2109^8
Lead chromate, for coatings, specifications of A. S. T. M. for, 1121^5
Liesegang rings, effect of light on, 2107^4.
precipitation of, 2254^4.
specifications of A. S. T. M for, 954^6, 1329^1.
Lead compounds, acetato, 719^9.
alkyls, manuf. of, P 607^4
bis(*m*-nitrophenyl)— dinitrate, 585^6.
complex iodothiocyanate, 3657^1.
in detonation prevention, 1510^1
diaceto-diplumbic bromate, 718^9.
diphenyl— dinitrate, nitration of, 584^6
of double salt of Ag_3RhCl_6 and NH_4NO_3, 2625^8.
isomorphic relations between Sn compds. and, 3658^7.
in lead poisoning, distribution of org., 1276^4.
magnetic susceptibilities of, 3124^9.
manuf. of, P 3215^7.
from ores, etc., P 3441^9.
org.- see also *Plumbane*.
org., 3156^2.
poisoning of fresh water fishes by, 213^2.
review for 1925, 955^4.
stability and uses of org., 3686^8.
Lead ferrate, 157^2.
Lead ferrite, thermomagnetic study of, 1939^9.
Lead fluoride, heat of formation of, 2111^1.
Lead glance. See *Galena*.
Lead halides, double decompn. with P halides, 2936^1
homopolarity of, 130^1.
system K halide-water, 3402^5.
Lead hydrides. (For organic derivatives see *Plumbane*.) 880^3.
Lead hydroxide, precipitation of, 27^3.
Lead iodide, crystal structure of, 1735^4, 2925^3.
soly. in NaCl solns., 3371^5.
system: $PbI_2 + ZnSO_4 \rightleftarrows ZnI_2 + PbSO_4$, 346^4.
systems: HgI_2–, and HgI_2–CdI_2–, 3121^1.
Lead ions, effect on concn. in intestine, 1860^9.
Lead molybdate, isomorphism with rare earth molybdates, 1157^2.
Lead nitrate, reactions on boundary between solns. of, in water and $K_2Cr_2O_7$ in gelatin, 1010^1.
solns. of, changes in very dil., 28^1.
system: KNO_3–$Ba(NO_3)_2$–H_2O–, 879^9.
Lead ores. (See also *Galena*.)
in Aspen dist., Colo., 2302^5.
of British Columbia, Driftwood Creek map-area, 30^6.
in British Columbia, Pemberton area, Lillooet dist., 30^7.
of British Columbia, Prince Rupert to Burns Lake, 30^8.
chimneys in limestone, 3669^6.
deposition of zinc-, effect of superimposed strata on, 3412^2.
earth's age and, 2132^7.
near Finkstein in Villach, 1970^9.
flotation of, 1971^6.
of India, 3410^1.
in Japan, origin of, 3669^7.
of Mt. Stewart, Leadville, N. S. W., 886^6.
river pollution by wastes from, 3758^9.
sepn. from Zn ores, 565^1.
silver-, of Alaska (near Ruby), 3411^2.
concn. at Hecla mine, 3674^8.
from Portland Canal dist., Stewart, B. C., concn. of, 2304^8
silver-ZnS-, treating, P 356^4
at Tsumeb, S. W. Africa, 1777^4.
zinc-, concentrator for, 2475^6.
deposition of, 886^8.
of eastern Canada, concn. of, 2304^8.
from Notre Dame des Anges, Quebec, concn. of, 2304^4.
of Reader Mine, Quebec, concn. of, 2305^2.
from Riondel, B. C., concn. of, 2304^9.
selective flotation of, 1376^1, 2175^7
Lead oxides, from accumulator plates, P 714^7.
crystal structure of, 341 1^9.
manuf. of, P 973^4, P 2052^4, P 2479^5, P 3215^7.
theory of accumulators and, 1761^7.
Pb_2O, existence of, 2796^3
as pigment, 297^7.
PbO, detn. in petroleum doctor soln., 3229^9.
isomorphism of tin oxides and, 2437^2
particle size of, and adaptability for the production of varnishes, 831^9
in radium-bearing rocks in Australia, 2969^2.
reactions with acidic oxides, 1016$^{6, 7}$.
reactions with solids, 3374^5.
reactions with WO_3 and MoO_3, 324^7.
reaction with oxalic acid, 2604^4.
reaction with SiO_2, 324^8.
reaction with sulfates of Zn, Pb, Cu, Ag and Mg and with $AgNO_3$, 324^8.
reaction with ZnS, 324^9.
reduction of $PbHPO_4$ to, 2960^3.
Pb_3O_4, furnace, corrosion in, 2589^2.
iron detn. in, 561^1.
manuf. of, P 118^2.
PbO_2, crystal structure of, 318^6.
as detector in wireless telegraphy, 1027^7.
reactions with other oxides, 1016^7, 1766^6.
Lead perchlorate, lead sulfide pptn. from, effect of $NaClO_4$ on, 2294^7.
Lead phosphite, reduction of $PbHPO_4$ to $PbHPO_3$, 2960^3.
Lead poisoning, 81^3, 455^8.
in accumulator industry, 1761^7.
anemia in, 2551^9.
blood corpuscles (red) in, effect of nuclear staining on, 1663^6.
blood serum in, cholesterol in, 950^5.
books: 636^3; Ueber die Gesundheitsgefährdung bei der Verarbeitung von metallischen Blei, 1678^1.
from bread, 2210^7.
cerebral manifestations of, immunity to, 3729^4.

cerebrospinal fluid in, 232^9.
cholesterolemia in, 2368^9.
distribution of org. Pb compds. in, 1276^4.
effect on blood, 3038^4.
on blood vessel functions, 1116^1.
on blood vessels in isolated organs, 1115^9.
at elevation of 12,200 ft., 450^5.
from ethyl gasoline, 1319^4.
gangrene in guinea pigs, 3729^5.
histologic study of, 1468^9.
industrial, 2885^1.
from intravenous administration, 1115^8.
lead distribution in body in chronic, 2020^9.
nitrogen metabolism in, 1110^5.
in oxyacetylene welding in scrapping of naval vessels, 1780^5.
in pigment manuf., 298^6
porphyrin in urine after, identity with coproporphyrin, 3018^3.
prevention of, 1289^6, 2215^2.
in rubber industry, 1920^6, 3100^{6,9}
tetraethyl Pb gasoline in relation to, 499^2, 815^7, 1677^8, 1875^7.
Lead potassium bromides, 3402^5.
Lead potassium chlorides, 3402^5.
Lead potassium iodide, 3402^5.
Lead potassium nitrate, 879^9.
Lead resinates, 3089^6.
prepn. of, 208^1.
Lead salts, circulation in the body, 448^9.
in color manuf., 297^5.
effect on antitoxin production in anti-diphtheria immunization, 1269^5.
manuf. of, P 973^3, P 2231^{6,7}.
reaction with P, 2796^7.
resources of U. S. for 1924, 1497^8.
Lead sodium sulfide, 886^1.
Lead subacetate, reaction with phenol, 3777^8.
Lead sulfate (See also *Anglesite.*)
additive compds. with HCl, 2292^9.
analysis of, 2964^1.
basic, manuf. of, P 648^7.
compd. with HCl, 345^8
crystal structure of, 526^1.
fluorescence of, 2629^6.
from lead chloride, P 1891^8.
manuf. of, P 2231^9.
reaction with basic oxides, 324^8.
reaction with Na_2CO_3 and K_2CO_3, 324^8.
soly. of, 3258^1.
system: $PbI_2 + ZnSO_4 \rightleftarrows ZnI_2 + PbSO_4$, 346^4.
weighing small amts. of, 2629^8.
Lead sulfide. (See also *Galena.*)
colloidal, formation in vulcanization of rubber, effect on mech. properties, 3097^3.
electrochem. reduction of, 150^4.
equil. with its roasting products, 692^3, 2776^1.
melting point of, 886^1.
precipitation from $PbCl_2$, effect of $MgCl_2$ on, 2294^6.
reaction with BaO, 720^4.
with CdO, 3374^1.
with CdS, 324^9.
with heavy metal salts in presence of alc., 2797^1.
with SO_2, 2294^1.
Lead sulfite, from lead ore, P 1891^7.
manuf. of, P 2231^8.
Lead telluride, 882^1.
Lead tetraethyl. See *Plumbane, tetraethyl-.*
Lead thioarsenate, as fungicide, 2223^7.
Lead thiocarbonate, decompn. of, 3402^2.
Lead uranate, prepn. of, 3657^3.
Lead uranyl carbonate, 1962^7.
Lead vanadate, 1185^6.
as catalyst for oxidation of aromatic nitro compds., P 1631^4.
Leather. (See also *Chamois; Tanning.*)
acid action on, 516^9, 3834^1.
acidity of chrome-tanned, 676^2.
acids in, deterioration of cellulose-fiber threads by, 3246^2.
analyses of, 1919^8.
analysis of, 2918^9.
hide powder prepn. for, 837^9.
prepn. for, 516^{6,7}.
analysis of chrome, 837^8.
analysis of vegetable-tanned, 3586^7.
analytic standards in manuf. of, 1534^9.
belts—see *Belts.*
biochem. problems in manuf. of, 3833^6.
bleaching sole, P 2594^1.
bookbinding, polluted atm. as factor in deterioration of, 1536^1.
books: Die Chromlederfabrikation, 1728^3; Die moderne Chemie in ihrer Anwendung in der Lederfabrikation, 2090^8.
carbonized, effect on case-hardening, 3428^7.
cementing and vulcanizing rubber with, P 1730^9.
chamois, manuf. of, 308^6.
chamois, manuf. of, effect of fatty acids in fish oils on, 2919^7.
chemistry in, industry, 3245^8, 3833^{5,6}.
chrome and vegetable, 1535^2.
chrome, detn. of Cr_2O_3 in, 2427^3.
chrome, hydrolysis of acid sulfate of, 2427^5.
chromium extn. from, 1535^9, 3834^4.
coating with rubber, P 3587^5.
color restorer from trichloroethylene, 674^8.
defects and their causes, 3834^3.
defects in, from follicular mange, 123^3.
destruction by microörganisms, 837^9.
detection in fertilizers from solubilized animal waste, 2042^1.
dressing for shoes, P 676^{7,8}.
drying and conditioning, P 465^3.
dyeing, 838^1, P 838^8, P 1328^3, P 2427^9, 2919^3, 3096^3.
dyeing and tanning combined, P 3836^4.
dyeing glove, replacing urine as mordant in, 3096^4.
dyeing kid skins, 1535^9.
dyes for, P 509^4.
fat detn. in, 516^7, 2919^2, 3586^4.
filling tanned, P 2427^8.
finishes and modern finishing of, 3833^9.
finishing, P 1728^3.
glazed kid manuf., 2261^4.
glove, spots on, 308^5.
grease for, P 838^6.
heat economy in, industry, 3833^6.
heels, comparative resilience of rubber heels and, 517^1.
histology of, 1336^9.
history of manuf. of, 3095^3.

testing (mech.) of, 1337[2].
testing serviceability of, 308[1].
treating materials, effect of war on French industry in, 837[8].
ultra-violet ray examn. of, 2261[2].
varnishes, 3834[6].
varnish for, vulcanizing oils as, P 513[3].
vegetable-tanned insole bellies, 3834[7].
waste chrome, etc., Na chromate recovery from, P 1003[2].
waste, fat recovery from, 3092[3].
water detn. in, 123[2], 3359[4].
waterproofing compn. for, P 1697[1], P 2052[5].
weighting, Swedish legislation against, 3586[2].
white chrome, 308[4].
yeast (autolyzed) in manuf. of, P 838[8].
Leatherjackets, insecticides for, 2385[8].
Leather substitutes, 3359[4], P 3836[1].
casein in manuf. of, 2072[1].
from cellulose, P 2584[8].
decorating, P 3836[1].
dressing for, 827[7].
manuf. of, 2261[4].
reviews on, 298[9], 308[5].
of rubber and cork, P 2596[9].
rubberized fiber compns., P 519[4,6], P 3247[1], P 3362[8].
varnish for, vulcanizing oils as, P 513[3].
Leavening agents, for self-rising flour, 3750[9].
Leaves. (See also *Cotyledons; Respiration, plant.*)
absorption of light by, 2518[7].
amylogenic condensation in, 2520[9].
apple, relation of area to growth and compn. of, 3485[1].
ash content of, 1488[6].
bean, growth of isolated etiolated, light effect on, 3177[3].
carbohydrate metabolism of, 2517[5].
carbohydrates in green plant, quant. variation in course of 1 day, 1649[6].
carbohydrates in, water content and, 2183[4].
carbon dioxide absorption by, 2181[7].
catalase content of evergreen, 3300[4].
cell cytoplasm, 1830[8].
compn. of green, yellow and red, 1429[5].
of cotton (Egyptian), chloride accumulation in, 3308[9].
of cotton (Egyptian), tissue fluids of, 3179[1].
cytoplasmic proteins of, 1430[2].
falling of, osmotic pressure of cell sap and, 3177[6].
fig, crystals in, 3023[3].
hydrogen-ion concn. in aq. ext. of, of mountain plants, 2690[6].
needles of evergreen trees, effect of temp. on catalase content and respiration of, 2691[8].
nitrogen in, of oats, clover and beans, 3484[3].
nitrogenous substances in beech, migration during autumnal yellowing, 3178[4].
permeability of cells of, 1425[9].
of phanerogamic epiphytes, elec. cond. of tissue fluids of, 2181[2].
plant nutrition diagnosis by chem. changes in, 1832[7].
sap extn. from, 3022[1].
starch in, physiol. role of, 1832[7].
structure of, 1830[7].
sugar detn. in, 2517[7].
sulfurous acid effect on, 2521[9].
yellowing of, variations of org. and mineral materials during, 3178[6].
Lecane inermis, fecundity and length of life in, effect of chem. and phys. agents on, 3515[6].
Le Chatelier law. See *Laws.*
Lecithin, -albumin, adsorption of I by, 3368[3].
antirachitic activity of, 2006[8].
in blood in tuberculosis, 1659[2].
in blood serum in tar cancer, 3735[8].
bromination of, 606[9].
bromination of, from liver and egg yolk, 1812[9].
-cephalin mols., formation of hydrolecithin and hydrocephalin from, in muscular contraction, 3181[8].
complex with invertase, ionic antagonism in, 1638[5]
detn. in blood, 3710[3].
differentiation (serol.) from cholesterol, 1106[7].
effect on complement fixation of sera, 3036[4].
on diffusion of anesthetics in gelatin, 427[8].
on histamine action on intestines, 1464[1].
on osmosis in gelatin gels, 427[8].
in fats, 1131[8].
formation in liver, 943[7].
in heart muscle, 1999[1].

isolation of natural crystd., 431^{9}
as nitrogen source for plants, 1646^{6}.
nomenclature of, 3014^{9}.
in organs and blood during vitamin B-free diet, 934^{4}.
pentosan and glucose in *Cicer arietinum*, 1649^{3}.
pharmacol. action of, 1463^{9}.
purification of, P 2564^{3}.
from soy beans, 2683^{5}.
suspension of, 3303^{5}
synthesis of, 3013^{9}, 3014^{7}.
system: invertase-, ion antagonism in, 1091^{4}.
tuberculosis therapy with, 3501^{7}
——, **hexabromostearylstearyl-***, 606^{9}
———, **tetrabromostearylstearyl-**+, 606^{9}.
Le Clanché cells See *Cells, voltaic*.
Lecture experiments, effect of te[mp.] and pressure on adsorption—liquefaction [an]d vaporization of gases, 856^{6}
with potassium, explosion in, 1716^{7}
α-ray track app for, 3128^{1}.
Leda pernula, bones of, mineral compn of, 2210^{1}
Leduc effect, measurement of, 2612^{1}
Ledum groenlandicum, oil of, 3778^{8}
Leech, protein assimilation in, 2001^{6}.
protein assimilation in, production of glycogen and fat reserves during, 2001^{7}.
Leer. See *Annealing, Glass*
Leffmann, Henry, biography, 2100^{1}.
Legumes, bacteria in nodules of, increase in activity by passage through host plant, 2688^{2}.
cooking capacity of, 2546^{5}
copper in, 616^{1}
legumin of, 2375^{3}.
lime content of, 2033^{1}.
nitrogen content of, effect of S on, 472^{9}
nitrogen of, form when assimilated by non-legumes grown in association, 2346^{6}
nodule bacteria of, viability outside of plant, 1826^{7}.
nodule formation in, 773^{9}
nodule organisms of, culture media for, 1830^{1}.
nutrient soln. for, effect of absence of B in, 2180^{5}.
pulse, boric acid in, 2549^{8}.
starches of, effect of cooking and of malting on digestibility of, 1675^{2}.
thioglucide contg , food value of, 2522^{4}
tryptophan in, 1252^{1}.
Legumin, of legumes, 2375^{3}.
of sweet almonds, 2375^{1}
Leg weakness, in chickens, mammalian rickets and, 1435^{5}, 3312^{4}.
Lehnerite. See *Ludlamite*.
Leishmania brasiliensis, mitochondria in, 2541^{5}.
Leishmaniosis, therapy of infantile, 1274^{3}
Lemna major, reproduction rate of, light and, 1427^{3}.

scattering of, by "abnormal" liquids, 329[2].
by anisotropic liquids, 329[1].
in atmosphere, 1555[8].
in chlorine (gaseous and liquid), 1752[7].
in coarsely dispersed media of higher concn. 2454[3].
by dielec. spheres, 7[6].
due to mol. roughness of surface between 2 transparent media, 3634[5].
from gases, 865[7].
by liquid boundaries, and relation to surface tension, 142[9].
by mols., Rayleigh formula for, 866[7].
in salt solns., 2113[2].
by Na silicate aq. solns., 2941[9].
in water, detn. of, 3602[5].
sensitivity of Se to, 1953[1], 2458[8].
sensitivity of AgI and of its mixts. with AgBr, 2290[4].
sensitivity to, 1035[9].
sensitivity to, and mechanism of chem. reaction, 546[3].
sensitization of O_2 to, by Cl, 549[6].
sensitization of red blood cells for, by putrefaction-porphyrin, 2513[1].
sensitization to, 545[9], 547[1].
silver chloride decompn. by, 711[4].
silver halide decompn. by, 1031[9].
silver iodide decompn. by, micro-balance in, 3390[7].
skin protection against, 1999[7].
spectral sensitivity of chromates with org. substances, 2624[5].
spectral sensitivity of AgBr, AgI and AgCl and effect of color sensitizers, 2624[3].
stimulation in *Mya arenaria*, law of, 2372[2].
structure of, 702[1], 2448[9].
therapeutic effect of, 239[9].
toxic action of, with eosin, 243[6].
transformations by solar, in presence of U compds., 2952[2].
tungstic acid sensitive to, transformation to a compd. stable to light, 2792[5].
vitamin A replacement by, 1259[6].
wave lengths and sources of, for refraction measurement, 3125[8].
waves and corpuscles of, 2448[9].
Light, infra-red, absorption by some homologous ketones and halogen-substituted hydrocarbons, 709[6].
absorption method in, 2790[2].
absorption of HCl in, effect of pressure on, 1559[7].
absorption of N-H bond, 1356[3].
antagonism to ultra-violet rays, 1816[2].
effect on combustion of gaseous mixts. contg. N, 3390[8].
effect on decompn. of N_2O_5, 1179[9].
emission and absorption of K vapor, 1030[6].
emission from gaseous explosions, 2952[9].
photochem. inactivity of, esp. with N_2O_5, 1179[9].
photography of, by phosphorescence, 152[4].
sensitizer for, neocyanine as, 1764[4].
spectrochemistry in, 2950[1].
transparency of glass in, 1752[9].
Light, ultra-violet. (See also *Spectrum*).
absorption by aldehydes, 2456[6].
by bakelite, 3541[2].
by carboxylic acids, 2455[9].
by gelatin, 1759[3].
by halogen and sulfonic derivs. of camphor, 2119[7].
by pair of isomers, 2950[9].
absorption measurements of, photometer for, 315[9].

activation of vitamin A, cholesterol, fats, etc., by, 1653[9].
ammonia decompn. by, 3646[2].
antagonism of K to, 1619[5]
antagonism to infra red rays, 1816[2].
antirachitic action of, 1466[9]
antirachitic activation of foods and of cholesterol by irradiation with, 2187[3].
antirachitic effect produced in cholesterol and phytosterol by, 221[9], 618[2], 1834[5].
antirachitic properties of food irradiated with, 222[1].
antirachitic properties of purified rations in study of vitamin A as affected by, 3312[2].
antirachitic properties of sterols from illipe nut as affected by, 2523[1]
antirachitic property of milk as affected by, 222[1], 936[7], 1431[1]
from antirachitic substances, 429[8]
in antirachitic treatment, effect on P in blood, 935[8]
antirachitic value of, 933[1], 3719[9]
antirachitic value of cholesterol irradiated with, 3718[8]
antirachitic value of feces of animals radiated with, as diet of irradiated animals, 225[5]
antirachitic value of spinach as affected by, 1652[7]
antirachitic vitamins in eggs as affected by, 936[1], 1135[2]
antiscorbutic vitamin as affected by, 1651[3].
app., P 128[9]
book The Chem. Action of, 338[5]
cholesterol and food activation by irradiation with, 1437[4].
cholesterol irradiation with, 1437[7].
cholesterol treated with, rickets treatment with, 2522[3].
coagulation of egg albumin by, 2508[7].
decompn. of alcs. by, 3133[4].
decompn. of gaseous HBr and HI by, 2792[1]
decompn. of HI in, 3646[5]
dispersion by CS_2, 335[5]
effect of excessive Ca ingestion on Ca content of tissues with and without application of, 1435[4].
effect of sawdust and cholesterol on photographic plate after irradiation with, 1635[6].
effect on aging of rubber, 2093[1].
on aldehydes, 1396[6].

in sewage treatment, 84[4].
-silica index as measure of cement quality, 2056[3].
slaking, P 1703[4], P 3793[9].
sludge, analysis of, 1522[2].
soil requirements for—see *Soils*.
as soil factor, 1293[1].
in soils, 470[5].
absorption of, 3204[5].
effect of basic slag on status of, 2220[6].
effect of manner of formation on content of, 2382[1].
injurious action of high applications of, 3205[1].
for soil treatment, analysis of, 2220[8].
soil treatment with, 2218[4,7].
soil treatment with, easily sol. Ca of soils as indicator of their response to, 641[3].
soil treatment with P and, 1484[4].
specifications of A. S. T. M. for, 954[8].
for sulfite pulp manuf. and water treatment, specifications of A. S. T. M. for, 1121[4].
system: $CaCO_3$–CO_2–, equil. in, 3674[5].
system: Fe_2O_3–SiO_2–, 1962[8].
system: SiO_2–Al_2O_3–, 3069[1], 3223[2,4].
system: SiO_2–Al_2O_3–MgO–, 3675[9].
system: SiO_2–Na_2O–, 1503[5].
systems with SiO_2, Al_2O_3 and Na_2O, 2960[8].
for tannery, 3834[9].
in treatment of dye and textile wastes, 668[4].
in viticulture, 470[5].
in waste treatment, 1876[9].
for water purification, 2887[8].
Lime liquors. See *Hides*.
Lime-nitrogen. See *Calcium cyanamide*.
Lime oil, 478[5], 2388[4].
Lime-pip oil, 2759[5].
Limestone, for agricultural use, 87[8].
of Alaska (southeastern), 3411[1].
alteration of monuments of, in Paris, 2570[4].
analysis of, methods of A. S. T. M. for, 954[7], 1121[4].
authigenic minerals in, from Bengal, 161[6].
books: Vorkommen und Verwendung nutzbarer Kalksteine in Süddeutschland, 2050[8]; of Pennsylvania, 2969[6].
burning with generator gas from bagasse, 2918[1].
calcination rates of, 2897[2].
calcite-rich bombs from Oberscheld, 1046[4].
crushing of, 1477[6].
crystal structure of, 29[4].
diopside-bearing, of Aberdeenshire, 3414[4].
disintegration in soil, 1296[9].
dusting materials of, analysis of, 2074[9], 2799[3].
effect on soil, 1127[1].
near Finkstein in Villach, 1970[2].
flotation of, from siliceous gang, 2229[6].
formation of, in lakes and in seas, 887[3].
hydrogen sulfide in carboniferous, of the Donetz basin, 3673[2].
of Illinois, Calhoun Co., 2634[3].
industrial hygiene of, 635[3].
kiln for burning, P 681[7].
lead-Zn chimneys in, 3669[6].
lime from dolomitic, P 2570[7].
micas from, at Mansjö Mtn., Sweden, 2805[6].
of Ontario (on Abitibi and Mattagami rivers), 3412[5].
removal from clays, 1134[7].
replacement deposits of the Mexican Province, 3669[3].
resistance to acid solns. in soil, 1485[4].
roasting and burning, 1677[2].
sepn. of CaO from MgO in, 1890[9].
for sewage trickling filters, 2380[9].
soln. rate of, relation to fineness of grinding, 3057[4].
of Vassy, cement from, 270[8].
from Zoutpansburg dist., 2303[7].
Lime-sulfur, reaction with lead arsenate, 3531[5].
spray, effect in canned cherries, 1287[5].
sprays of Pb arsenate mixed with, 1883[7].
Lime water. See *Calcium hydroxide*.
Liming See *Hides; Lime; Soils;* and "clarification" under *Sugar manufacture*.
Limiting-factors theory. See "of the minimum" under *Laws*.
Limnoria, toxicity studies, 3792[6].
wood destruction by, 1507[2].
d-**Limonene**, elec. birefringence of, 1024[6].
oxidation of, by BzO_2H, 2674[7].
reaction with H_3PO_4, 1070[6].
dl-**Limonene**. See *Dipentene*.
Limonite, 527[9].
goethite and, 562[6].
Limosil, effect on nitrification of $(NH_4)_2SO_4$, 3325[8].
Linaloöl (*coriandrol; 3,7-dimethyl-*$\Delta^{1,6}$*-3-octadienol*), formation in plants, 263[9].

Linaria genistifolia, diosmin from, 799^6.
 glucosides from, 391^2.
Linck, biography of, 3772^9.
Linden, fluid ext. from, 3060^8.
Lindera hypglauca, oil of seeds of, 2420^3.
Linderaic acid*, 2679^2.
Linderan*, 2678^9.
Lindera strychinifolia constituents of, 2678^7.
Linderene*, 2679^2.
Linderol*, 2678^9.
Linen, bleaching and mercerization of, 827^7.
 bleaching, catalytic action of Cu and Fe compds. in, 3087^8
 differentiation from cotton, 2586^4.
 finishing of, 113^9.
 mercerization of, action of NaOH in, 3239^6.
 mercerizing agent for, NaOH as, 295^7.
 plant of Ford, 508^3.
 sodium sulfide effect on, 2251^9.
 tent fabrics, life of, 827^9.
Linil, 299^4.
Liniments, camphor detn. in, 352^7.
 chloroform detn. in, 92^6.
Lining(s). (See also *Coating(s); Refractory materials.*)
 acid-proof, P 268^4.
 for acid tanks, alloys for, P 358^6.
 for ball mills, etc , P 2922^7.
 barrel, from soy bean protein substance, P 3544^1.
 for blast furnaces, life of, 650^4.
 brake—see *Friction materials.*
 for cement kilns, P 2057^9.
 for combustion chambers for pulverized fuel, 272^9.
 for concrete sewers, 959^5.
 of copper in vacuum vessels, etc , P 484^6.
 for dental plates, P 3065^9.
 for elec. furnaces, 1033^9, P 3271^4, 3393^1.
 for elec. furnaces, refractories for, 2735^7.
 furnace, P 976^6, P 3221^7.
  fractional fusion of, 486^5.
  refractory brick for, P 1505^7.
  short life of, 2735^4.
 gas-generator, refractories for, 3797^2.
 for kilns, 2056^3.
 pipes with rubber, P 1730^7.
 refractory, for crucibles, etc., P 1310^3.
 of rubber resistant to acids, 843^2.
 of tubes, rubber compns. for, P 3590^1.
Linium usitatissimum. See *Flax.*
Linkages. See *Bonds.*
Linnaeite, analyses of, 2633^9.
Linoleic acid, from corn starch, 2310^9.
 detn. in drying oils, 3829^1.
 oxidation of, examn. with x-ray spectra, 706^9.
 reaction with BrI and with HOI, 1591^9.
 sepn. of isomers, 1054^7.
 sodium and K salts, cond. and surface tension in molten state, 3117^6.
Linolenic acid, oils contg., 3243^8.
 oxidation of, examn. with x-ray spectra, 706^9.
Linoleum, P 3826^6.
 comparison with triolin, 996^5.
 endurance of, 1701^6.
 manuf. of, 298^{5,6}, P 997^1, P 1530^7.
 rosin for, 3826^2.
Linolic acid. See *Linoleic acid.*
Linoxyn, 117^1, 3089^4.
Linseed. See *Flaxseed.*
Linseed meal, oil detn. in, 2421^6.
Linseed oil, bleaching, 3827^5.
 boiling, elec. heat for, 3591^7.
 "break" and foots in, detn. of, 3825^4.
 color of, effect on brightness and tint of white pigments, 831^2.
 compn. and I no. of, 3829^2.
 consts. of, 2989^5.
 detn. in flaxseed and linseed meal, 2421^6.
 detn. in soy-bean oil, 2911^4.
 as dielectric, effect of moisture and air content on, 21^2.
 diluent for, 299^4.
 drier for, P 3580^4.
 drying of, 117^2, 2255^6.
 drying of, polymerization during, 2757^4.
 foots permissible and purity of, specifications of A. S. T. M. for, 954^6.
 heating and thickening of, app. for, P 832^9.
 iodine absorption and foots formation in, detn. of, 2081^5.
 oxidation and polymerization of, 673^2.
 oxidation of, P 1913^8.
  effect of C pigments on, 2417^8.
  effect of Fe oxide pigments on rate of, 671^7.
  effect of ZnO pigments on rate of, 671^5.
 polymerization of, 2756^9, 3355^5.
 from Punjab, 1483^6.
 reaction with sulfur, 2588^9.
 refining of, 998^9.
 refraction of, 3091^4.
 refractive index of, change in drying and its effect on deterioration of oil paintings, 3825^3.
 resin detection in, 2755^6
 rosin detection in, 832^2.
 soap, polymerization of, 3092^5.
 soaps of, germicidal efficiency of, 1827^8
 soly. in glacial AcOH, 301^9.
 solvents for, glycol ethers as, 2910^2.
 stabilizing agents for, 1146^4.
 structure of, x-rays in study of, 3837^3.
 substitutes—see "vehicles for" under *Paint.*
 for varnish, P 3580^7.
Linseed oil cake, sampling of, 1914^4.
Linters, cellulose from, 665^1.
 purification of, 295^3.
Lipase, action of carcinomas, 2196^7.
 action of exts. of rat, 213^5.
 action of gastric, on wheys, 610^9.
 action of tissue exts., 2512^6
 action of tumors, 2196^6, 2540^2.
 of blood and pancreas, 1248^1.
 blood, effect of salts on formation of, 1269^1.
  effect of soy bean feeding on, 3488^7.
  variability of, 940^5.
 in blood serum in diseases of pancreas or pernicious anemia, significance of atoxyl-resistant, 945^5.
  in pregnancy, 1453^7.
  in pregnant and non-pregnant women, 3034^3.
  significance in psychiatry and neurology of quinine-resistant, 1844^9.
  in tuberculosis of children, 2196^1.
  urethan effect on, 1816^9.
 in endocrine glands, 919^9.
 in gastric juice from contamination with blood or tissue cells, 1087^3.
 hydrolysis of asymmetric esters by, 3175^9.
 of liver, hydrolysis of esters of dicarboxylic acids by, 2235^6.
 of liver, kinetics of ester cleavage by, 1418^4.
 manuf. of, P 2085^3.
 pancreatic, action of, 426^9.

in blood serum in diseases of pancreas, 1265⁹.
effect of gallodesoxycholic acid on, 3706⁴.
effect of lime on, 2260⁹.
effect of quinine and urea compds. on, 923⁹.
effect of quinine-HCl on hydrolysis of triacetin by, 923⁸.
poisoning by quinine and atoxyl, 2684⁹.
specific nature of, with respect to configuration, 919².
in tuberculosis treatment, 3732⁸.
"Lipatren," tuberculosis therapy with, 3501⁸.
Lipemia, diabetes with, lipoid-contg. cells in spleen in, 2201⁷.
diabetic, 3737³.
lipoid partition in blood in, 1449².
reticulo-endothelial app. and, 1449⁵.
Lipins. See *Lipoids.*
Lipiodol, in diagnosis of bronchial affections, 2865⁹.
Lipocholesterol. See *Cholesterol.*
Lipochromes, in bacteria, 2178⁴.
Lipodieresis, in lungs, chem. changes in, 1098².
Lipoid-combining reaction. See *Meinicke reaction.*
Lipoids. (See also *Fats.*)
in adrenal glands in adrenalinemia, 1814⁶.
antibodies, 3504³.
antibodies in tuberculosis, 2536⁵.
antibodies, organ specificity of, 2364¹.
antigenic function of Forssman, 1269¹.
antirachitic activity of, 2006⁸.
biol. significance of, 1463⁹.
of blood in cancer, 1847⁹.
of blood, influence of pregnancy on, 621⁵.
of blood serum, accumulation as preliminary to sweating, 778⁸.
effect of syphilis on distribution of, 1266⁷.
in pregnancy, 3031⁶.
brain, detn. of, 1092⁵.
of brain (human), 768¹.
cell equil. and, 57⁹.
in cells, arteriosclerosis treatment in relation to, 943⁸.
of cerebral cortex, 924⁹.
in corpus luteum, 65³.
from corpus luteum by extn. with acetone, 1100².
detn. in blood, 3474⁵.
in eggs, 246³,⁵.
in feces, 3473⁶.
in flour, 75².
in salad dressing, 78².
dyes for, 2000⁷.
effect of feeding fat, cholesterol and scarlet red on, 1448⁶.
effect on glucose adsorption of blood corpuscles, 1471³.
on interchanges between cells and environment, 2517⁸.
on osmosis, 427³,⁴,⁶.
on ovaries, 1452⁶.
on vegetative nervous system, 2007⁹.
excretion of, 2360³.
in liver in pregnancy, 1845⁶.
metabolism of, in lipemia, 1449⁶.
microörganism growth on irradiated foods contg., 2689⁷.
in muscles, 3181⁸.
in neoplastic and normal tissues, 1662⁷
in neoplastic autolyzates and filtrates, 3735².
nephrosis, albuminuria and, 2358¹.
nephrosis, pathogenesis of, 3730⁶.
ovarian function and, 1262³.
partition in blood, 1449¹.
permeability of mixts. of, 922⁹.
phosphorus of, detn. in organotherapeutic powders, 968⁶.
serologic activity of, effect of benzoin on, 1268⁴.
in spleen cells in diabetes with lipemia, 2201⁷.
theory of narcosis, 2367⁹.
in thymus, 1657⁸.
tuberculosis therapy with, 3501⁷.
Lipolysis. (See also *Lipase*)
by blood serum in lues, 3501⁷.
cholesterol content of blood serum in hypertonia and, 3729².
Lipoma, myelins in, 1419⁷.
Lipon, 2260⁵.
Lipoproteins, dyes for, 2000⁷.
Lips, protein in beef, nutritive value of, 2694⁸.
Liquefaction, of air and gases, purification in prepn. for, 788⁷.
of air or other gaseous mixts., app. and heat-exchange system for, P 1152⁷.
app. for, P 316⁸, P 1732⁵, P 3364⁸.
of gas constituents, P 1478⁸.
of gases, P 3757⁹.
heat exchange and expansion system for, of air or other gases, P 1478⁹
heat exchange system for, of gases, P 2215⁷.
hydrogen sepn. by partial, of gas mixts., P 1696².
lecture expt. on, of gases, 856⁶.
phenomena in countercurrent coolers for gas liquefiers, 2778⁴.
of refrigerating gases, etc, app. for, P 1732⁵.
sepg. constituents of gaseous mixts by, P 956⁴.
sepg gaseous mixts by, app. for, P 3757⁷.
Liquidambar, *orientalis*, oil of, 2719¹.
styraciflua, oil of, 2718⁹.
Liquid crystals. (See also *Anisotropy; Crystals.*)
book: Chem Kristallographie der Flüssigkeiten, 1751⁴.
Born's dipole theory of, 1752⁷.
dielec. consts. of, 3124⁵.
elec. structure of, 2923⁷.
light scattering by, 329¹.
meristematic growth and, 3714⁵.
mixed, 528⁶.
thallium salts of org. acids, 2817³
Liquids. (See also *Condition equation; Emulsification; Optical rotation; Pseudo liquids*)
absorption by fibrous sheet materials, app. for testing, P 111⁶.
aerating or carbonating, app. for, P 316⁵.
assocn. of—see *Molecular association.*
book: Photochem. Reactions in, 3268⁹.
circulation app. for, 1005⁵.
cohesive forces of, 3⁷.
color of, comparometer for, P 848¹.
combustible—see *Combustibles.*
contacting gases with, app. for, P 2⁸.
corrosive—see *Corrosive substances.*
crit. consts. of, chem. const. and, 1927⁶.
crit. temp. calcn. from expansion coeff. of, 1008³.
dehydration of, effect of, 528⁹.
dehydration of org., P 2333⁴.
density of, temps. and, 320².
deviation from condition equation, 3599⁹.

dielec. consts. of, 864[5], 2940[2].
diffusing gas into, app. for, P 1924[5].
diffusion of light in, 3132[3].
double refraction of amorphous, in relation to mol. form, 539[4].
dust-free, prepn. by distn., 3602[4].
elec. conductance of, measurement of, 2447[2].
elec. dispersion of, 321[7].
expansion coeffs. at equal reduced ds., 1734[8].
extn. (quant.) of, 3602[7].
filtration of—see *Filtration*.
flow of—see *Flow*.
gas absorption by a drop, 1543[7].
heating, liquid electrode for, P 22[3].
inflammable—see *Combustibles*.
infra-red absorption bands in, effect of intermol. reactions on, 2950[1].
insulating, break-down of damp, 7[7].
level—see *Level*.
light scattering by "abnormal," 329[2].
light scattering by boundaries of, and its relation to surface tension, 142[9].
light scattering (mol.) in, 17[6].
mixing—see *Mixing apparatus*.
mixts. of, vapor pressures and miscibility of binary, 529[2].
mol. changes in, 2603[4].
mol. distance and temp. of equil. of, and its vapor, 1345[7].
mol. heat capacities of non-assocd., 1939[7].
mol. wt. detn. of, 3104[1].
oxygen dissolved in, removal of, 1773[4].
ozone treatment of, app. for, P 3103[1].
pasteurization of—see *Pasteurization*.
potential at boundary of 2, thermodynamic difference of, 2780[4].
properties of normal, correlation of, 1929[4].
purification of, centrifuge for, P 128[4].
racemic, 369[7].
reactions with gases, app. for, P 2066[7].
sampling—see *Sampling; Sampling apparatus*.
sepn. and purification of, centrifuge for, 2598[8].
sepn. of—see *Separation; Separators*.
solid recovery from, P 2215[5].
soly. (mutual) of, 1743[2], 2101[7].
spreading on liquids, 1738[1].
sterilization of—see *Sterilization*.
"structure turbulence," 3604[1].
supernatant, device for saving, 1824[4].
supersatn. of gases in, 319[9].
surface films on, 3367[5].
surfaces of, kinetic phenomena on, 1930[8].
photoelec. investigations of, 3129[1].
roughness due to mol. motion, 3634[5].
surface tension of—see *Surface tension*.
systems of 2 volatile, interferometer method for study of, 325[9].
theory for, 2445[4].
thermal agitation in, 3254[4].
treating solids with, app. for, P 1341[2].
treating, with purifying agents, P 3757[9].
treatment with gases, app. for, P 1541[1], P 1924[5], P 3364[5].
viscosity of—see *Viscosity*.
Liquid state, constitution of substances at low temps. in, x-ray investigation of, 852[4].
Liquorice. See *Licorice*.
Liquors. (See also *Ammoniacal liquor; Beverages; Gas liquor; Spirits; Sulfite liquor; Tanning*.)
alc. detn. in, 475[7].
aldehyde detn. in, 2893[2].

acetone effect on, 2018[9].
albumins of kidney and, 1250[3].
arginase activity of, alteration of, 3706[7].
arrest of polypeptides of digestion in, 2194[8].
autolysis of, effect of quinine and of hormone prepns. on phosphoric acid hydrolysis during, 3707[1].
effect on phosphatides, 1656[4].
glycogen hydrolysis during, 1818[2].
as bile pigment formation site, 2008[4].
as bilirubin formation site, 2531[9].
blood perfused through, effect of sp. lymphagogs on, 2530[3].
blood vessels of, effect of ovarian fluid on, 231[2].
blood vessels of, permeability of, 1273[8].
carbohydrate, fat and protein in, during hunger, 3180[2].
carbohydrate in, effect of internal secretions on transformation of fat into, 3499[6].
carbohydrate loss of, in hyperthyroidized rats, 624[9].
carbon tetrachloride intoxication and, 3747[7].
carcinoma of, functional tests in, 1449[3].
catalase, 1086[8].
cells, cytolysis in, 3735[4].
cholesterol in, in HCN poisoning and in beriberi, 67[1].
cirrhosis of—see *Cirrhosis.*
copper and Mn storage by, 3191[5].
destruction of lobules of, by toxin of eclampsia, 3731[4].
detoxicating function of, 947[6].
toward strychnine and tetrachloroethane, 2195[8].
in strychnine poisoning in chronic digestive anaphylaxis, 2195[9].
detoxication by, 1660[9].
diseases of, arsphenamine action in, 2208[2].
bilirubin distribution in vascular areas in, 1453[2].
cholesterol, bile acids and pigments of duodenal contents in, 445[6].
effect on reticulo-endothelial app., 1664[2].
phenolsulfonephthalein excretion by kidneys in, 2199[2].
red blood corpuscles in, 3503[9].
reversed relationship of bile in, 2699[9].
effect of protein-rich diet in renal insufficiency on, 2014[4].
effect on balance between cholesterol and cholesterol esters in blood and serum, 1448[4].
on carbohydrate formation from fat, 941[4].
on fate of phenolsulfonephthalein in organism, 2199[4].
on iron poisoning, 1857[3].
on urobilin secretion, 1452[8].
ethyl alc. content of, in asphyxiation, 3746[2].
fat content of cells of, in hibernating salamander, 2541[3].
fat mobilization in, central regulation of, 3499[8].
fat rearrangement in, effect of nervous action and internal secretions on, 3499[6].
fat replacement of glycogen in, death from, 1662[8].
fatty acids of, effect of thyroid and ovarian exts. on autolysis of, 2007[7].
feeding, effect on metamorphosis of tadpoles, 3028[4].
fish, as vitamin-rich food, 2006[7].
functional insufficiency of, detn. by duodenal sound, 3035[2].
function of, effect of ions on, 2358[5].
effect of sp. lymphagogs on, 2530[3].
evaluation and treatment of disturbed, 446[4].
rose bengal excretion as test for, 446[1].
stalagmometry and, 628[1].
testing of, 1440[9], 2012[2], 3501[8].
tests of, galactose in urine from, isolation and identification of, 3028[6].
tests of, in control of arsphenamine treatment, 2514[2].
function of normal and diseased, 2365[1,3].
glycerol effect on, 1112[3].
glycogen in, in As poisoning, 2701[7].
effect of hemorrhage on, 2699[6].
effect of morphine on, 241[3], 1276[3].
in insulin treatment, 1670[2].
transformation into glucose, 944[6], 2360[9].
glycogen storing in, effect of S on, 2204[8].
heart-beat regulation by, 444[2], 1839[6].
hexosediphosphatase of, 941[7].
hibernation effect on, 937[6].

histidase in, 3722[8].
injury to, effect on intestinal juice secretion, 3031[4].
insulin in, in normal and pancreatic diabetic dog, 441[6].
intoxication and infection in relation to, 446[3].
intracellular enzymes of, 1438[3].
iron content of, 3463[3]
iron injection and, 3723[3].
iron pigments in, 3036[5].
lactic acid formation in, 942[3].
lecithin formation in, 943[7].
lecithins from beef, bromination of, 1812[9]
lipase of, hydrolysis of esters of dicarboxylic **acids by,** 2335[6].
kinetics of ester cleavage by, 1418[1].
sp. nature of, 919[8].
lipoid content of, in pregnancy, 1815[6]
mash, hypoxanthine and, 1637[8].
mash, photoactivation by x-rays, 3303[2]
metabolism of, in $CHCl_3$ and P poisoning, 1110[3].
necrosis and cirrhosis of, from coal tar, 627[6]
narcosis of, 1867[8]
nitrogen metabolism of, under reduced pressure, 2530[5].
nucleic P index of, 3304[4].
oxygen utilization by, 2534[2].
perfusion studies on, 2190[2].
permeability to hexoses and pentoses, 3721[1].
phosphorus compds. in, autolytic decompn of, 940[7].
phosphorus distribution in, 3728[1].
physiology of, 441[1], 778[4], 938[9]
pigment metabolism of, in pregnancy, 3032[1]
pigments in, from $CuSO_4$, 1663[1].
pigments of toad, 1636[9].
in porphyrinuria, 426[1].
in pregnancy, 3031[9]
protein decompn. of, effect of tuberculin on, 1445[7].
protein in, nutritive value of, 2695[2].
purine metabolism and, 2874[7].
respiration and carbohydrate exchange in, 3494[4].
respiration of cells of, 440[3].
respiration of cells of, effect of sugar on, 3493[1].
respiration of, effect of insulin on, 941[9].
Röntgen irradiation of, effect on metabolism, 1857[6].
rot, treatment with male fern, 450[6].
secretion by, effect of secretin on, 1854[6].
sugar-absorbing power of, 1836[2]
sugar exchange of, effect of insulin on, 1275[9].
sugar formation by, effect of homologous alcs on, 3492[9].
sugar formation in, effect of insulin on, 3721[8]
sugar output of, effect of Ca concn. on, 442[2]
sugar production in perfused, from non-protein sources, 3464[2].
sugars of, 941[8].
thyrotoxicosis effect on, 1450[6].
tissue, autolytic NH_3 formation in, 3726[4].
tissue, effect on glucose, 944[7].
tissue, effect on insulin, 2361[1].
trypanocidal function of, 234[8].
tuberculosis effect on, 1445[3].
unsatd. hydrocarbon in, 2506[8].
urea-forming function of, 1099[7].
vital staining in, of diff. classes of vertebrates, 1419[9].
vitamin A in, of calves, 2188[4].
in vitamin insufficiency, 776[6].
yellow atrophy of, transfer of dyes from mother's blood into liquor amnii in, 945[7].
zinc in cod, 3314[2].
Liver extract, blood pressure control with, 2009[7].
effect on blood pressure, 2193[3].
on decompn. of nucleic acid, 51[8].
on heart beat and blood pressure, 3182[5].
surface tension of, 1246[4].
Liver oil See *Oils*.
Living matter. (See also *Tissue, animal; Tissue, plant;* etc.)
chloroform effect on, 3303[9].
compn. of, 3303[6].
Lixiviation. See *Leaching*.
Loam (See also *Soils*.)
compression strength of foundry, device for testing, P 317[2].
Lobaria pulmonaria, constituents of, 594[8].
Lobelia, effect on CO poisoning, 2881[1].
tincture of, keeping quality of, 3208[6]
Lobelia alkaloids, constitution of, 2665[5].
from inflated lobelia, 1302[6].
Lobeline, effect on adrenaline secretion, 1862[4], 2703[5].
effect on circulatory organs, 1854[7].
effect on heart, 1113[8].
hypertension from, effect of yohimbine on, 1863[9].

Manganese oxides, as catalyst for oxidation of toluene, P 1631[7].
crystal structure of, 3414[9].
MnO, crystal structure of, 3106[3], 3399[9].
prepn. of, 2959[9].
reaction with PbO_2, 1766[9].
Mn_2O_3, as catalyzer in oxidation of HCN, 3625[9].
colloidal, 688[2].
MnO_2, absorption of β-rays by, 3127[9].
adsorption of CO_2, CO and O by, and by its mixts. with Cu_2O_3, 2443[7].
analysis of, uranous sulfate in, 1040[4].
capillary condensation and adsorption of water vapor on, 3110[7].

as catalyst in decompn. of $KClO_3$, 2627[2].
as catalyst in oxidation of HCN, 3625[9].
catalytic oxidation of CO with mixts. of CuO and, 3260[9].
colloidal, adsorption of $BaCl_2$ by, 856[2].
colloidal, effect of protective colloids on size of coagulated particles of, 3115[6].
colloidal, prepn. of, 3111[9].
color of pptd., influence of adsorption on, 686[6].
crystal structure of, 1926[7].
decompn. of mixts. with $KClO_3$, effect of pressure on rate of, 2271[6].
detn. in potassium permanganate, 3145[4].
-permanganate electrode, 1940[7].
Manganese pyrocatecholate, basic, 717[6].
Manganese salts, agricultural value of, 2040[9].
effect on nutrition, 1436[7].
on therapeutic activity of vaccine, 2879[7,8].
on toxin destruction, 1269[3,4].
rhenium in, 1553[5], 2923[2,3].
Manganese silicate, prepn. of, 2959[9].
Manganese sulfate, acid, 1767[7].
effect on mineralization of N, 2383[2].
effect on oxidation of mixed soln. of 2 reducing agents, 2775[7].
mol. contraction of aq. solns. of, 3118[7].
reaction velocity of $H_2C_2O_4$ + H_2CrO_4 + H_2SO_4 +, and $H_2C_2O_4$ + $KMnO_4$ + H_2SO_4 +, 1953[9].
thermal decompn. of, 1167[1].
Manganese sulfide, colloidal, freezing of, 2266[4].
crystal structure of, 3106[3].
prepn. of, 2959[9].
reaction with Fe, 729[6].
reaction with SO_2, 2294[1].
Manganese uranate, prepn. of, 3657[3].
Manganese vanadate, 1185[5].
Manganiferous nodules, radioactive, from Tanokami, Oomi Province, 1556[4].
Manganin, logarithmic decrement of, variation with amplitude and viscosity of, 132[9].
Manganopyrophosphates, alkali, 2794[2].
Mangroves, of Indo-China, 3360[1].
properties of, 3586[5].
Manholes, gas hazards in street, 634[9].
Mankopalolic acid, from copal, 2756[7].
Manna, sirup, preservation of, 2387[9].
Mannan, staining capacity of, 1830[7].
Mannitol, alkali action on, 3722[1].
alkali metal compds. of, 744[3].
auto-oxidation in mixts. with CuO in aliphatic amines or amino acids, 1017[7].
compd. with Bi nitrate, constitution of, 1571[8].
d-, from *Gardenia turgida*, 43[3].
d-, oxidation of, 369[1].
heat capacity, entropy and free energy of, 2444[9].
hexanitrate, effect on blood pressure, 3043[7].
in jalap root, 645[6].
manuf. of, with sugar-inverting bacteria, 3713[8].
reaction with pyrocatechol, 908[4].
from sucrose, 2913[8].
utilization by *Scenedesmus* cultures, 2180[8].
Mannolite. See *Chloramine-T*.
Mannonic acid, *l*-, prepn. of, 2985[9].
l-, prepn. of, and lactone, hydrazide, 1058[5], 1059[6].
——, **diacetone-***, K salt and lactone, 2984[4].
β-Mannonolactone*, 3445[9].
Mannosaccharic acid, *l*-, dilactone, monosemicarbazone, 1059[2].
l-, lability of, 2986[5].
Mannose, and derivs., constitution and classification of, 1981[3,5].
d-, oxidation of, 368[6].
effect on shivering reflex, 3194[1].
fermentation velocity of, 2000[4].
methyl[*p* - (*p* - α - methylhydrazinobenzyl)-phenyl]hydrazone, 904[8].
oxidation of, 169[6].
reaction with urea, 1787[6].
——, **bromotetraacetyl-***, 1790[3].
——, **diacetone-***, constitution of, 2827[6], 2984[4].
methylation of, and anilide, 2663[5,7].
——, **tetramethyl-**, cryst., 3447[2].
Mannoside, acetylmethyl-*, 1790[5].
——, **α-methyl-***, *d*-, hydrolysis of, 1060[2].
——, **tetraacetylethyl-***, 1790[4].
——, **tetraacetylmethyl-***, 1790[3].
——, **tetraacetyl-α-methyl-***, 1790[4].

Menthol (*3-p-menthanol*).
catalytic action of reduced Cu on oxidation of, 408[1].
detn. in alc. solns., 2047[3].
detn. in oil of peppermint, 1688[5].
esters, crystal form, 415[4].
as fungicide, 3021[5].
l-, *p*-toluenesulfinate, consts. of, 397[6].
manuf. of, P 2049[4], P 2228[1].
1-naphthalenecarbamate, 1232[9].

photoactivation by ultra-violet light, 1654[1].
prepn. of, 2321[4].
synthesis of, 2226[8], 2846[9].
Mentholcarboxylic acid. See *p-Menthanecarboxylic acid, 3-hydroxy-.*
Menthone (*3-p-menthanone*).
dl-, and derivs., 751[9].
reaction with S, 2670[3].
— —, **2-cyano-,** reduction of, P 2167[8].
— —, **2,2'-ethylenebis-,** and isomer, 2846[2].
— —, **2-(hydroxymethyl)-,** and derivs., 2846[1,2].
— —, **2 - (hydroxymethylene)-,** semicarbazone, 2846[1].
— —, **2-methylene-,** 2846[2].
— —, **pernitroso-*,** reaction with PhNC, 1070[9].
Menthylamine, reaction with $C_2H_2Br_4$, 1086[8].
l-Menthylamine, aluminum oxalate, 766[6].
Menthylxanthamide. See "menthyl ester" under *Carbamic acid, thiono-.*
Menthylxanthic acid, (carbamylmethyl) ester, stereochemistry of, 373[4].
Mercaptals (*Individual mercaptals are ordinarily entered as derivatives under the names of the corresponding aldehydes.*)
Mercaptan radicals, valency of Pt variation with respect to, 3659[1].
Mercaptans. (*Simple mercaptans are indexed under such names as* Methyl mercaptan)
oxidation of, 577[7].
in petroleum distillates, action of NaOCl on, 278[9].
reactions of aromatic, 375[1].
reaction with alkyl nitrites, 2976[2].
reaction with NOCl, 2975[8].
Mercaptoles (*Individual mercaptoles are ordinarily entered as derivatives under the names of the corresponding ketones.*)
Mercapturic acid, formation in animal organism, 3182[9].
Mercerization, 820[8], P 1722[5].
acid-circulating system for, P 115[8].
address on, 827[1].
app. for, P 829[8], P 3823[9].
of cellulose, heat development in, 3087[6].
contraction on, theory of, 3087[5].
of cotton fiber, effects of oxidation before and after, 1326[8].
degree of, detn. of, 1720[8].
detection of, 3820[1].
effect on cellulose structure, 3078[2].
of flax yarn and fabrics, action of NaOH in, 3239[6].
of linen, 827[7].
of linen, NaOH in, 295[7].
one-side cloth, 2908[7].
of piece goods, 3239[8].
press for artificial silk production, 3818[4].
testing, 2416[2], 2753[1].
of vegetable fibers in mixed goods, P 2253[8].
of vegetable material, P 829[8].
waste liquors from, purification of, 3818[7,8].
waste solns. from, app. for recovery of caustic hydroxides from, P 1341[1].
Mercuration, of aromatic compds., 1793[9].
of aromatic sulfonic acids, 1225[2].
of nitrobenzene, 1225[1], 1985[1], 2837[6].
of o-nitrotoluene, 3288[9].
Mercurialis, book: **Recherches chimiques et biologiques sur,** 479[4].
oil of ***M. annua, M. perennis*** and ***M. tomentosa,*** 1258[2].
seeds of, analysis of, 1258[2].
Mercurisalicylic acid. See "cyclic anhydride" under *Salicylic acid, hydroxymercuri-.*
Mercurochrome-220 soluble, as antiseptic, 1279[6].
as biliary antiseptic, 3510[1].
effect on bacterial infections, 1869[1].
on *Entameba dysenteriae,* 2542[1].
on germicidal properties of fresh defibrinated blood, 1854[8].
on tuberculosis, 1853[5].
erysipelas treatment with, 1114[2].
excretion of, intravenously given, 1274[3].
gonococci tolerance to, 219[8].
peritonitis treatment with, 2370[8].
pharmacol use of, 1276[6]
as preoperative skin disinfectant, 2226[4].
as stain, 2687[2].
treatment of bacterial infections with, 2881[3].
Mercurosal, excretion of, 2023[3].
Mercury. (See also *Rectifiers;* "vacuum tube lamps" under *Lighting, electric.*)
absorption coeff. for slow electrons in vapors of, 332[3].
adhesion in highly evacuated capillaries, 1544[8].
adsorption of its own ions, Gibb's adsorption equation and, 2104[8].
anomalous dispersion of excited, 3389[5].
atomic refraction and at. dispersion in Hg dimethyl and Hg diethyl, 2148[4].

canal rays from, interference of, 3129[7]
catalytic febrile biperiodic reactions, 1019[8].
cathode, electrolysis of Na chromate with, 3395[6].
hydrogen over-potential at, 2939[9].
overvoltages at, 141[9].
use in anodic oxidation processes, 1022[7].
colloidal, color of, 1159[4].
glycogen in prepn. of, 2105[4].
Liesegang's ring formation by, in blood agar plates, 3706[1].
polychrome, 1932[4], 3369[8].
prepn. of, 532[9].
-combining power of deproteinized blood, 3468[4].
crit. potentials of, 3128[9].
crit. temp. of, 3599[7].
crystals, growth of, 2602[4].
cubical expansion coeff. of, 1315[1].
diffusion of metals in, retardation with d. c., 2938[5].
distn. of, app. for, 1543[2].
distn. of, contg. Au, 1942[7].
dropping cathode, analysis with, 2297[1].
effect on sulfonation of anthraquinone, 756[8].
elec. arc in, 1175[2].
elec. arc in, effect of radiations on enzymes, 1249[6].
light emission from, after cutting off voltage, 2117[1].
luminous vapor distd. from, spectroscopy of, 3386[3].
elec. double layer on surface of, 3377[7].
elec. resistance of, 2779[1].
elec. resistance of, effect of magnetic field on, 1170[9], 3124[7].
electrode potential of, against its ions in aq. methanol, acetone and pyridine, 1347[8],

electrokinetics of, electrode potential and, 2779[5].
electron bombardment of, 710[7].
electrons in vapor of, absorption coeff. for slow, 1025[4].
electrons in vapor of, mean free path of, 3638[7].
excitation to light emission by radiation, 2789[1].
excretion of, 2023[3].
fluorescence of, 2286[1], 2613[6]
fluorescence of, duration of, 7[2].
formation from gold, 2119[8]
formation from lead, 2449[9].
gold-bearing, distn. of, 2266[9]
gold in, 3596[1].
heats of vaporization and fusion of, 854[2].
illuminated surface of, effect on Franck-Cario reactions, 2459[b].
industry in 1925, 3673[8].
ion absorption on, 855[9].
ionization of, 3385[9].
ionization of, by electron impact, 146[1], 332[8].
isomorphism with Mg, 1963[7]
isotopes of, 2783[5]
isotopes of, spectrum of, 2791[4]
life period of metastable state of, 1173[1]
lubricating bearing surfaces with, P 3561[1]
metastable 2p3 state of, 866[9]
microstructure of, 3277[7]
mol. wt. of, relation to sp. gr , 850[8].
nucleus formation in supersatd , 1028[1]
ointments (ammoniated) of, 91[9]
ointments, Hg detn in, 2559[8].
oligodynamic action of, 922[1].
optical consts of, dispersion of, 2612[7]
oxidation in water by electrolysis, 3262[1].
photoelec. threshhold for, 333[7]
photosensitization by optically excited atoms of, 871[4].
photosensitizing power of, loss of, 3133[7]
physiol. relations of, 949[7]
poisoning—see also *Mercury chlorides*
poisoning, 2214[6], 3051[5,6,7,8], 3052[1]
effect on acid content of blood, 1668[1]
observations by Arabic alchemists and physicians on, 3051[9].
treatment with $Na_2S_2O_3$, 1115[2]
polarization effects with, 2952[5]
polymerization and hydrogenation of C_2H_4 by excited atoms of, 1032[4].
purification of, 725[4].
radiation of, persistence of, 7[1].
reactions photosensitized by, vapor, 3645[6].
reaction with HNO_3, 1938[5]
with HNO_3 in presence of catalysts, 3376[3].
with NO_2, acceleration by light, 550[7].
with Se_2Cl_2, 2294[5].
resonance fluorescence of, effect of elec. fields on polarization of, 2117[2].
resonance fluorescence of, quenching by addn. of gas, 3126[9].
resonance radiation of, effect of alternating magnetic field on polarization of, 15[1], 541[7].
extinction in vapor at high pressures, 2458[4].
intensity of, 2458[6].
polarization in weak magnetic fields, 1026[4].
review, 2304[4].
review of mining and trade information, 888[1].
satn. pressure of, relation of temp. to, 3633[7].
specific heat of, 3122[7].
spectrum of, 14[5], 17[3,5], 18[2], 148[6], 333[8], 335[9], 337[4], 1177[7], 1560[3], 1562[2], 1563[6], 1947[8], 1952[5], 2283[1], 2283[4], 2448[6,7], 2457[2], 2458[1], 2619[3], 2789[1], 2948[3], 3267[4].
spectrum of, app. for exciting, 2118[9].
effect of elec. field on, 3267[5].
helium effect on, 3385[4].
spectrum of mixt. of H and, 333[2].
spreading of aq. solns. on, 1738[1].

detn. of dissolved metals, 725[4].
detn. of gold in Hg soln., 1574[9].
sepn. from iron, 1191[3].
Mercury, metallurgy of, 888[9].
furnace for, P 34[9].
heat-treatment in, P 3441[6].
Mercury acetate, ($Hg(AcO)_2$), decompn. of, catalytic effect of Cu salts on, 2459[4].
reaction with azimethine compds., 1610[7].
with *m*-chloroaniline, 2837[9].
with *o*-chloroaniline, 580[1].
with cholesterol, 3299[5].
with codeine, 2502[5].
with 2,4 - dichloroaniline and with *o*-toluidine, 2317[8,9].
with phenylhydrazine, 591[1].

Mercury alloys. See *Amalgams;* and "system" under *Mercury.*
Mercury bromides, HgBr, crystal structure of, 852[7].
HgBr, density of, 140[2].
HgBr, fluorescence of, 2629[6].
$HgBr_2$, addn. compds. with quinoline and alkyl halides, 3696[1].
for arsenic analysis, 2800[1]
complex salts with quinoline, 601[7,8,9].
heat of soln. of, in EtOH, 326[7].
systems: HgI_2–, $HgCl_2$–, and HgI_2–$HgCl_2$–, 3121[1].
Mercury bromochloride, 3121[2].
Mercury carbonate, thermal decompn. velocity of Hg_2CO_3, 2109[5].
Mercury chlorides, HgCl, crystal structure and optical double refraction of, 852[7].
HgCl, effect on intestinal juice secretion, 3040[9].
effect on intestinal peristalsis, 451[8].
elec. charge of, effect of dissolved electrolytes on, 3608[8].
electrode, detn. of hydrogen-ion concn. at high temps. with, 1750[7].
electrode, potential of, effect of temp. on, 2611[2].
fluorescence of, 2629[6].
as purgative, 452[3].
space lattice and double refraction of, 3598[3].
transformation into $HgCl_2$, 2719[7].
$HgCl_2$, addn. compds. with quinoline and alkyl halides, 3696[1].
adsorption on charcoals, 1132[8].
assaying, 159[1].
as catalyst for polymerization of cyclopentadiene, 2148[7].
as catalyst for prepn. of org. Be compds., 2657[2].
complex salts with quinoline, 601[7,8,9].
decompn. potentials and polarization of, dissolved in anhyd. pyridine, 690[2].
density of, 140[2].
detn. in tablets, 3537[2].
detn. of, 3772[3].
as disinfectant, 1301[6].
disinfecting power of, effect of charcoal on, 3744[8].
in disinfection of sputum, 2688[7].
distribution coeff. between water and org. solvents, 2540[9].
effect on adrenal, 3040[8].
effect on germination of barley and cress, 2182[3].
effect on kidneys, 2705[2].
effect on yeast, 3308[1].
ionization by electron collisions in, 332[8].
meningitis treatment with, 3713[4].
mol. assocn. of, 2934[9].
photochem. decompn. of soln. with $(NH_4)_2C_2O_4$, 2459[4].
photochem. decompn. of soln. with $H_2C_2O_4$, 2459[4].
photochem. reactions of alkali and alk. earth ferrocyanides in presence of, 2797[6].
photochem. sensitizer for, ZnO as, 1954[3].
poisoning by, 1856[2].
poisoning by, in the genital tract, 2700[9].
poisoning by, transmineralization in, 3188[8].
poisoning, $Na_2S_2O_3$ treatment of, 2369[6].
as purifying agent for alcs., P 2167[9].
reaction with azomethine compds., 1610[5].
spectrum of reactions with Na and with K, 1947[6,8].
systems: HgI_2–, $HgBr_2$–, and HgI_2–$HgBr_2$–, 3121[1].
treatment of bacterial infections with, 2881[3].
wood impregnation with, 1506[9].

analysis of, 3210[9].
of benzenearsonic acids, 1607[2].
benzidine and tolidine halide complexes, 3665[1].
with bismuth and As, 796[3].
bromination of aromatic org., 3162[1].
with bromoform, 2295[5].
butylmercuric iodide, 362[2].
calcium-, 1766[3].
as catalysts for manuf. of vinyl esters, P 3696[6].
in diabetes mellitus treatment, 448[6].
of 2,4-diphenylselenophene, 592[5].
as disinfectants for sugar-beet seed, effect on biol. processes of soil, 2040[7].
dithiolated, heats of reaction of, 326[6].
of double salt of Ag_3RhCl_6 and NH_4NO_3, 2625[8].
dyestuffs, bacterial chemotherapy with, 1868[9].
effect on kidneys, 1858[2].
effect on wheat smut spores, 1489[4].
ethylmercuric bromide, 362[2]
evaluation and classification of, 3332[3].
in gingivitis therapy, 2205[3].
of glutaconic acid, 3158[6].
heptylmercuric bromide, 362[2].
hexylmercuric bromide, 362[2].
as insecticides for plants, 963[5].
isobutylmercuric halide, 362[2].
manuf. of org., P 917[6].
medinal, 2719[5].
of o-mercaptobenzoic acid, 183[1].
methyl, m. ps. and b. ps. of, 2797[2].
octylmercuric bromide, 362[2].
org., 1605[4,6], 1986[7], 2317[8,9], 2318[2], 3156[2], P 3781[1].
org., with germicidal and therapeutic properties, P 3061[7].
pharmacol. action of org., 3043[1].
pharmacol. use of org., 1276[6].
of phenols, P 3696[9].
prepn. of org., 176[7,8,9].
propylmercuric halide, 362[2].
pyrrole derivs., 387[4].
of saccharin as medicaments, 1301[4].
with salicylic acid, 91[2].
as seed disinfectant for wheat bunt and smut of oats and barley, 793[5].
of sulfosalicylic acid, colloid properties of, 3611[8].
of sulfosalicylic acid, optical anisotropicity of colored sols of, 3611[8].
therapeutic action of org., 3742[3].
therapeutic org., P 1692[2].
thiocyanogen compd. for use in ointments, P 3780[9].
Mercury cyanide, ($Hg(CN)_2$), death from injection of, 2203[5].

double salts with alkali metal halides, equil. consts. for formation of, 3404[5].
Mercury dibenzyl, prepn. of, 177[3].
Mercury diheptyl, 3688[6]
Mercury di-1-naphthyl, prepn. of, 177[3]. reaction with $AsCl_3$ and with $SbCl_3$, 176[7,8].
Mercury diphenyl, prepn. of, and reaction with acid chlorides, 1605[1,4].
Mercury di-*p*-tolyl, prepn. of, 176[9], 177[3].
Mercury ferrate, 157[2]
Mercury fulminate, detonation rate of, and its mixts. with $KClO_3$, 1142[1].
in detonators, effect of confinement on, 2413[5].
discovery of, 3365[1].
Mercury halides, complexes with benzidine and tolidine, 3665[1]
crystal structure of, 2925[1]
electrodes, e m f of, 3377[1]
soly. products in water, 1160[7].
Mercury helides, 560[2], 2127[6]
Mercury hydride, mols , relations between electronic structure and band spectrum structure in, 2458[1]
spectrum of, 1561[9], 1755[7], 2282[1]
Mercury hydroxide, precipitation of $Hg(OH)_2$, 27[3].
Mercury iodides, HgI, crystal structure of, 852[7].
HgI_2, addn. compds with quinoline and alkyl halides, 3695[8,9], 3696[1].
allotropy of, 3120[9].
assaying, 159[1]
assay of soln of arsenious iodide and, 3779[8].
complex salts with quinoline, 601[7,8,9].
crystal structure of, 526[4], 2264[2], 3366[2].
density of, 140[2].
effect of protecting colloids on, 2930[7].
heat of soln. of, in EtOH, 326[7].
system: KI–acetone–, 2935[9].
systems: $HgCl_2$–, $HgBr_2$–, CdI_2–, PbI_2–, $HgCl_2$–$HgBr_2$–, and PbI_2–CdI_2–, 3121[1].
Mercury ions, activity coeff. of H ion and, 1746[1].
adsorption by Hg, Gibb's adsorption equation and, 2104[8]
electrode potential of Hg against, in aq methanol, acetone and pyridine, 1347[5].
Mercury lanthanum nitrate, 1963[8].
Mercury nitrates, $HgNO_3$, reaction with chloroauric acid, 1964[1].
$Hg(NO_3)_2$, detection of, 3773[7].
Mercury ores, of Yellow Pine dist., Idaho, 2132[5].
Mercury oxalate, HgC_2O_4, system: $K_2C_2O_4$–H_2O–, 2466[4].
Mercury oxide, (HgO), reaction with arsenic acid, 2601[4].
two varieties of, 1364[5].
Mercury oxybromides, formation from HgO, 1364[5].
Mercury oxychlorides, formation from HgO, 1364[5].
prepn. and properties of, 2798[3].
Mercury oxycyanide, analysis of, 1680[8].
Mercury potassium chloride, formation of, 3119[5].
satn. pt. of aq soln. of, 2459[4].
Mercury potassium cyanide, isomorphism of $K_2Zn(CN)_4$ and, 2798[2]
Mercury potassium iodides, 2935[9].
Mercury potassium oxalates, 2466[4,5].
Mercury preparations. (See also *Ointments*.)
for grain treating, restoring strength of, 1299[5].
oleated, 94[8].
prophylactic, P 95[5].
for seed dips used repeatedly, 2042[8].
Mercury salicylate, detection of, 3773[6].
poisoning by, 2707[4].
Mercury salts, antiseptic property of, 3513[2].
circulation in the body, 448[9].
defecation of sugar solns. with, 2224[7].
diffusion of, injected sub-conjunctivally, 70[6].
effect on diphtheria antitoxin formation, 1269[5].
photographic desensitizing with, 153[9], 877[2].
photographic printing with, 876[8].
reaction with NH_3, 1190[2].
with barbituric acid medicinal derivs., 1495[1].
with dialkylbarbituric acids, 1594[9], 2983[9].
with ethylene compds., 1986[7].
with P, 2796[7].
Mercury sulfates, additive compds. with HCl, 2292[9].
Hg_2SO_4, electrodes of, measurement of dE/dT of, and application to secondary-battery testing, 3648[6].
$HgSO_4$, compd. with HCl, 345[8].
decompn. potentials and polarization of, dissolved in anhyd. pyridine, 690[2].
Mercury sulfide, (HgS), allotropic forms of, 3123[9].
colloidal, intratracheal injections of, 2206[3].
crystal structure of, 131[1], 317[9].
reaction with heavy metal salts in presence of alc , 2797[1].
reaction with SO_2, 2294[1].
rhythmic phenomena in pptn of suspensions of red, 1009[7].
soly. in NH_3 and its effect on detection of As and Hg, 1967[9].
Mercury telluride, 882[1].
crystal structure of, 2768[1].
Mercury uranate, prepn. of, 3657[3].
Mercury uranyl carbonate, 1962[7].
Mercury-vapor lamp. See *Lighting, electric*.
Meriquinoid compounds, 2163[8], 2999[5].
potentiometric and spectrophotometric study of, 2779[6].
Merolignin, 422[6].
Meroxyl, 2726[3].
Mesaconic acid (*methylfumaric acid*), diethyl ester, reaction with liquid NH_3, 1056[3].
photolysis of, 369[2].
reaction with sulfite, 1165[6].
Mesenteric glands, ext. of, effect on peristalsis, 2009[1].
Mesitol, acetate, rearrangement of, 2154[9].
Mesitylene (*s-trimethylbenzene*), ignition of mixt. of air and, 1706[3].
prepn. of, 173[7].
———, **2,2′-azoxybis-**, 2153[7].
———, **chloro-**, oxidation of, P 1631[4].
———, **hexahydro-**. See *Cyclohexane, 1,3,5-trimethyl-*.
———, **nitro-**, oxidation of, P 1631[4].
———, **2-nitro-**, reduction of, 2153[4].
Mesitylenephosphinous acid, soly. and electrolytic conductance of, 3617[1].
Mesityl oxide (*4-methyl-Δ[3]-2-pentenone*).
absorption spectra of, 1784[2].
p-nitrophenylhydrazone, 701[7].
prepn. and sp. gr. of, 739[8].
prepn. of, 41[6], 1593[6].

reaction with aliphatic ketones, 3157^{4}.
Mesityloxidoxalic acid*, α-, and β, ethyl ester, absorption spectrum of, 1788^{9}.
Mesobilirubin, active H detn. in, 1815^{8}.
Mesobilirubinogen, active H detn. in, 1815^{8}.
Mesohemin, active H detn. in, 1815^{8}.
Mesolite, analyses of, 884^{5}.
from Mt. Tzkhra-Tzkharo, 884^{8}.
pseudomorph after apophyllite, 884^{5}.
Mesoporphyrin, from hemateric acid and from hemoporphyrin, 1634^{1,2}.
prepn. of, 3173^{3}.
spectrochem. identification of, 1245^{9}.
Mesoporphyrinogen, active H detn. in, 1815^{8}.
Mesothorium, poisoning by, 1114^{9}.
poisoning due to ingestion of aged, 3731^{1}.
production of, 1027^{1}.
purifying, 1173^{1}.
radiations of, effect on Se, 1943^{8}.
transmutation of U or Th into, P 2123^{9}.
Mesothorium bromide, mobilities of Th X, Th A and Th B from, 1946^{6}.
Mesothorium 2, 1352^{7}.
Mesoxalic acid, diethyl ester, prepn. of, 50^{5}.
reaction with urea, 2825^{9}.
Mesquite gum, *l*-arabinose from, 582^{6}.
Mesurol, 3188^{9}.
Metabolism. (*Animal metabolism is meant unless plant metabolism is designated; see also* Excretion; Feces, Nutrition, Urine.)
acetylene susceptibility and, 2706^{1}.
acid amide effect on plant, 2351^{7}.
adrenaline effect on basal, 1864^{4}.
aglucosuric disturbances of, by N-free C substance, effect of insulin on, 3314^{3}.
of alkaptonurics, effect of protein on, 945^{9}.
of amino acids, 3724^{4}.
of amino and fatty acids, 2010^{8}.
in amytal anesthesia, effect of insulin on, 2202^{6}.
amytal effect on, 2880^{3}.
in anemia (pernicious), 3505^{6}.
of apples, volatile products other than CO_2 in, 1283^{4}.
of aquatic animals, function of water-sol. nutritional substances in, 1442^{9}.
of arginine and histidine, 1652^{1}.
arginine and histidine in, interchangeability of, 2005^{7}.
of arginine, relation to sex, 56^{1}.
of aromatic acids, 1837^{8}, 2354^{1}, 2527^{9}.
of avitaminosis, 1654^{3}.
of *Bacillus pyocyaneum*, 930^{3}.
of bacteria (acid fast), 432^{4}, 2178^{8}.
bacterial, 1256^{9}, 1644^{5}, 2344^{8}.
amino N detn. in studies of, 1645^{8}.
cond. method in studies of, 2179^{9}.
basal, 69^{6}, 1441^{6}, 2873^{9}, 2874^{1}, 3488^{7}.
alteration by x-ray and diathermy treatment of hypophyseal region, 2013^{1}.
effect of activity of voluntary muscle on, 3312^{9}.
tables of values of Du Bois surface area formula, 1824^{9}.
basal rate elevation as basis for nutrition therapy in tuberculosis, 2197^{8}.
bed rest as prerequisite for measurement of basal, 939^{6}.
books: Human, with Enemata of Alcohol, Dextrose and Levulose, 1097^{9}; The Measurement and Significance of Basal, 1097^{9}; Muscular Activity and Carbohydrate, 1098^{1}; Problems of, 1098^{1}; The Proportions in Which Protein, Fat and Carbohydrate are Metabolized in Disease, 1098^{1}; Die gasanalytische Methodik des dynamischen Stoffwechsels, 1256^{4}; Basal, 1443^{2}; Die Beziehungen des Phosphors zum Kohlenhydratstoffwechsel und zu den Zuckerkrankheiten, 2366^{7}; Carbohydrate, and Insulin, 3028^{2}.
of butterflies in inanition, 3749^{2}.
calcium, 3699^{3}.
adrenaline effect on, 1271^{7}.
in dairy cows, 2694^{9}.
dietary factors influencing, 1433^{7}, 1834^{2}.
effect of hysterectomy on, 1842^{8}.
in lactating animal, effect of ultra-violet light on, 2528^{5}.
in oysters, 950^{8}.
with rachitic diet rich in Ca, 1655^{2}.
in thyroparathyroidectomy, effect of Ca salts and of Na_2HPO_4 on, 2538^{4}.
cancer effect on basal, 1847^{8}.
carbohydrate, 440^{3}, 1098^{8}, 2337^{5}, 2342^{5}, 2360^{9}, 2539^{4}, 3025^{1}, 3182^{6}, 3723^{9}.
of acetone-BuOH fermentations, 3711^{8}.
in animal tissues, 3494^{1}.
in avitaminosis, 2693^{4}.
biocatalysts of, 70^{4}, 425^{9}, 1088^{3}.
in brain, 438^{7}.
of central nervous system, 1258^{6}, 2530^{7}.
in corn, 1648^{3}.
creatine and, 933^{8}.
in dehydration, 3492^{7}.
derangement by toxin of eclampsia, 3731^{4}.
disturbance of, increased lactic acid excretion in urine in avitaminosis as evidence of, 2355^{4}.
effect of dihydroxyacetone on, 3741^{1}.
effect of fat feeding on, 3719^{1}.
effect of fitochinina on, 240^{9}.
effect of insulin and of muscle tissue on glucose in, 1842^{3}.
effect of insulin on, 1470^{7}, 3192^{2}.
effect of ions on, 2358^{5}.
effect of pancreas feeding on, 1272^{1}.
effect of sugar and of insulin on, 2361^{5}.
enzyme nomenclature in, 1820^{3}.
in head injuries, 239^{2}.
hexose in, 64^{4}.
hormonal regulation of, 1276^{3}.
of infants, 1660^{1}.
inorg. P and, 3490^{1}.
intermediary, 941^{7}, 1102^{5}, 2523^{2}, 2693^{6}.
of leaves, 2517^{5}.
in liver, 1836^{1}.
in liver, effect of narcotics on, 1867^{9}
liver effect on, 944^{7}.
mechanism of, 429^{6}.
in muscle, relation to pancreas, 228^{8}.
of muscles, disturbance of, 946^{9}.
in neoplastic cell, 2198^{6}.
in phlorhizin diabetes, protein effect on, 1468^{1}.
phosphate and, 2531^{3}.
phosphorus metabolism and, 2695^{8}.
of plants, effect of concn. of K salts in soil media on, 1297^{3}.
in pregnancy, 1667^{7}.
quinic acid and, 930^{1}.
relation of hypophysis to, 619^{1}.
relation to regulation of warmth, 1112^{7}.
in skeletal muscle, effect of phosphates on, 940^{9}.

spinach secretin and intermediary, 933[7].
in tobacco leaves, 3715[1]
of tumors, 238[4].
in unicellular organisms, 3316[4].
carbohydrate and fat, enzymic studies on paired reactions in, 921[7]
carbohydrate and fat, of yeast, 2866[4]
on carbohydrate and meat diet, 1131[8]
of carcinoma cells or tissue, 1109[9], 3186[7].
catalytic transference of H in, 5[1].
of cells, normal and malignant, 445[9], 3506[5]
of cells, reversible permeability of membranes and, 1160[1]
cellular, manometric detn in serum, 1121[2].
of cerebrosides in central nervous system, 940[2]
in children, 227[1], 1099[2]
of children, effect of orange juice on Ca, P, Mg and N, 1135[8]
of chlorides in anemias, 3186[2].
chlorine, in gastric secretion disturbances, 916[6], 3034[7].
cholesterol, 1656[2].
effect of absence of kidney function on, 947[4].
effect on hair growth, 2008[2]
Harderian gland in, 1261[9]
in pregnancy, 1831[9].
clinical aspect of, 2358[4].
of cold-blooded animals, 1432[2]
of cold blooded animals and plants, effect of O concn on, 1998[5]
constancy of, 622[9], 776[9].
control after venesection, sp dynamic action of protein and, 3182[3].
of corallines, 3182[2].
corn diet and, 933[5]
of dancing, 3196[6]
decrease in old age, 1822[3].
detn. of rate of, 2514[2].
in diabetes during and after exercise, 2198[3].
in diabetes, sp dynamic action of foods and, 436[1].
diet and basal, 3183[6]
on diet of fat and vegetables, 2189[1].
diffusion process and, 1263[2,4].
of dihydroxyacetone, 3030[9].
diiodotyrosine effect on, 3189[7].
diseases of, cerebrospinal fluid in, 232[8].
in diuresis, 3505[2]
effect of climate at high altitudes, 2004[4].
effect of copper, Mn and Zn on, 3488[4].
effect of darkness and of C arc radiation on, 1838[3,4].
effect of Rontgen irradiation of liver on, 1857[6].
effect on indirect galvanic irritability of muscle, 1112[8].
effect on insulin action, 2201[2]
in embryo and in growth, 3490[4].
of embryos of chickens, 622[6].
emotional reactions, 778[7].
with enemata of alc , dextrose, and levulose, 3313[2].
energy hematoporphyrin effect on, 3496[2].
energy, of birds, 3727[7].
of cows, 3489[2].
effect of splenectomy on, 1839[4].
of new-born babies, 1262[5].
in scurvy, 3187[9].
estrus effect on, 2530[1].
of ethyl alc., rate of, 2194[3].
in exophthalmic goiter, effect of I prepns. on, 1272[9].
during fasting, 439[3], 2526[2], 3187[5], 3488[1].
in fasting and in sleep, 3313[1].
fat, 2007[7].
by germinating seeds, 3715[7].
hormonal-nervous regulatory system of, 3029[1].
intermediate, 3719[1].
regulation of, 3499[3].
of fats, cholesterol and "steroids" in rats growing in presence or absence of vitamin A, 1097[2].
feeding effect on basal, 2189[3].
of fructose, galactose and glucose in fasting and on protein-fat diet, 2355[6].
gas analytical method for detns. of, 2174[5].
gaseous- -see *Respiration.*
of girls, 2188[6]
glucosan effect on, 2522[9].
of glycerol in phlorhizin diabetes, 1460[9].
of glycogen in central nervous system, 940[2].
in goiter, 2187[9].
of growing pigs, 3187[3].
in heart diseases and in hypertension, 3504[3].
of histidine, 3722[9].
in hogs, 222[8]
hormone effect on, 1441[8].
hot air baths and, 230[7].
in ichthyosis, 2198[8].
of immature white rats, 2524[4].
in infantile denutrition and debility, 934[7].
inorg., in tetany, 1452[2].
of insect larvae, 2372[6].
insulin effect on, 1462[8], 2021[1], 2370[2], 3508[9].
intensity of, functional capacity of nervous system and, 2527[6].
intermediary, effect of $RaBr_2$ injections on, 2368[2].
intermediary, of kidneys, 1656[9].
iodine, 3743[7].
of iodine in goiter at puberty, 1111[6].
of iron, 438[8].
of iron after splenectomy, 3493[2].
iron, spleen effect on, 946[9].
irradiation effect on, 940[1].
in lactation, 3185[6].
light effect on, 3025[7], 3487[9].
lipoid, in lipemia, 1449[6]
of liver in $CHCl_3$ and P poisoning, 1110[3].
of liver, influence of insulin on sugar, 1275[9].
magnesium, on purified diets, 2354[7].
measurement of basal, by insensible perspiration, 3492[7].
measurement of basal, sphyximeter for, 1640[2].
menformone effect on, 3490[9].
during menstruation, 229[8].
in mental disease, 1104[9].
methane detn in expts. on, app. for, 3709[9].
mineral, 441[9], 2873[1].
chloride content of fluids in relation to velocity of, 226[9].
diet and, 934[2].
by ewes during gestation, 225[5].
of lymph following injections of levo- and dextro-suprarenine, pituitrin and pilocarpine, 2369[6].
of skin, 3726[9].
sunlight and, 940[4].
in myxedema, parallelism between plasma vol. and, 3732[1].
in nephritis, 781[5].
nitrogen, 1652[1], 1834[9].
in avitaminosis, 2693[4].

of bacteria, d'Herelle phenomenon and, 1827^{5}.
of *Clostridium flabelliferrum* and *C. sporogenes*, 2180^{1}.
in corn seedlings, 2184^{7}.
effect of *Ayuga chamaepitis* on, 222^{5}.
effect of histamine and of tyramine on, 1850^{6}.
effect of injections of emulsions of testes and prostate and of insulin-like testicular exts. on, of normal, castrated and thyroidectomized rabbits, 776^{9}.
effect of injections of testicular or ovarian emulsions on, 65^{6}.
effect of iodide on, 3508^{5}.
effect of light on, 1653^{8}.
effect of thyroxin on, 447^{6}.
effect of vitamin A deficiency on, 1434^{8}.
in lead poisoning, 1110^{6}.
min. endogenous, 2005^{3}.
in nutritional disturbances, 616^{4}.
in small animals, cage device for study of, 1824^{6}.
nitrogen excretion in basal, $1654^{7,8}$.
of nuclein, 3717^{6}.
of nursing infant, 438^{5}.
in ontogenesis, 3464^{5}.
organ, thyroid action and products of, 1440^{2}.
of Orientals, 225^{6}.
oxygen, in *Drosophila melanogaster*, 950^{9}.
oxygen, of *Planaria dorotocephala*, effect of KCN on, 3515^{8}.
parenteral injections of milk and, 1264^{1}.
of *Paullinia cupana*, effect of caffeine on, 2518^{2}.
phosphate, 2006^{3}.
phosphate, carbohydrate and, 2531^{3}.
of phosphates, anesthesia and, 3030^{6}, 3315^{2}.
of phosphate with carbohydrates, 223^{6}.
phosphatide, in pregnancy, 1834^{9}.
phosphorus, 922^{9}.
in dairy cows, 2694^{9}.
effect of *Ajuga chamaepitis* on, 1854^{5}.
effect of hysterectomy on, 1842^{8}.
insulin in, 2523^{6}.
in lactating animal, effect of ultra-violet light on, 2528^{5}.
of plants, 2518^{3}.
with rachitic diet rich in Ca, 1655^{2}.
in thyroparathyroidectomy, effect of Ca salts and of Na_2HPO_4 on, 2538^{4}.
of pigments of liver in pregnancy, 3032^{8}.
of ping-pong playing, 3728^{8}.
polarized light effect on, 3720^{2}.
prediction from body surface and body wt., 1262^{8}.
in pregnancy, 1106^{8}, 1264^{6}, 3733^{4}.
in pregnancy, action of I-thyroglobulin on, 780^{2}.
protein, central regulatory mechanism for, 3500^{4}.
creatine as anabolite in, 1101^{2}.
in diabetes, effect of insulin on, 937^{9}.
effect of ultra-violet light on, 1430^{4}.
histamine effect on, 3191^{9}.
insulin in, 3488^{2}.
in leeches, 2004^{6}.
in leech, production of glycogen and fat reserves during, 2004^{7}.
in pancreatic diabetes, 2363^{2}.
of poikilothermic animals, effect of temp. on, 2527^{7}.
under reduced pressure, 1836^{6}.
of sex glands, effect of bile acids on, 3727^{9}.
ultra-violet light effect on, 1259^{3}.
purine, 2523^{6}.
of purines, liver and, 2874^{7}.
during pyloric spasm, 1447^{5}.
pyocyanic infection effect on, 2014^{7}.
of rabbits, 620^{7}.
radioactivity and, 2000^{7}.
under reduced pressure, 230^{9}, 2530^{6}.
respiratory—see *Respiration*.
Röntgen-ray action on, in normal rats and rats immune to Jensen's rat sarcoma, 445^{4}.
after Rontgen-ray therapy, 67^{9}.
of salicylic acid, 231^{8}.
salts in high-tension field and, 3629^{1}.
sexual glands and, 65^{5}, 776^{9}.
sexual hormone action on, 228^{1}.
in shock from anaphylaxis, 2196^{5}.
silicon, of diatoms, 1427^{7}.
of sodium chloride in burns, 3037^{1}.
spleen and, 940^{6}.
during standing and lying, 1261^{2}.
of starch in mesophyll and guard cells, 2180^{3}.
of sugar beet, climatic effects in, 2872^{2}.
sulfur, 1652^{1}, 1834^{9}, 2865^{4}, $3312^{6,7}$.
sulfur, effect of benzene and its derivs. on, 3182^{9}.
summit, metabolic quotient and, $3490^{3,5}$.
suprarenals and, 935^{4}.
of *Teleostei* embryo, 243^{9}.
temp. and, 1260^{9}, 2191^{9}, 2193^{8}, 2355^{1}.
temp. effect on plant, 932^{1}.
of *Tenebrio molitor*, effect of food on, 1871^{8}.
testes effect on, 2009^{9}.
thyroid effect on, 1653^{5}
thyroparathyroidectomy effect on, 1447^{4}.
thyroxin effect on, diet and, 3489^{6}.
tissue, 3495^{4}.
in tuberculosis, 1446^{4}.
of tumors, 2364^{8}.
ultra-violet radiation effect on, 3473^{8}.
of uric acid, 2353^{2}.
in blood in tuberculosis, 1446^{1}.
in bronchial asthma, 781^{6}.
in vertebrates, 2209^{8}.
uric acid and urea, effect of *Ajuga chamaepitis on*, 1854^{8}.
of urinary N with protein-free diet, 1654^{9}.
vitamin A and, 2186^{5}.
vitamin B and, 1433^{1}, 2525^{4}.
vitamin B requirement and, 223^{2}.
water, 1450^{6}, 1837^{5}, 3492^{7}.
in ameba, 3516^{1}.
central regulation of, 2532^{9}.
in diabetes mellitus and effect of insulin, 1265^{3}.
effect on sp. dynamic action of carbohydrates, 947^{1}.
kidney function and, 2194^{9}.
in pregnancy, 779^{9}.
reticulo-endothelial system and, 1661^{9}.
of water and NaCl in nephrosis, effect on H-ion concn. of urine, 1659^{7}.
water cress and, 1808^{2}.
of women, 2522^{5}.
in women, comparison with prediction standards, 2524^{6}.
work effect on, in varying conditions of diet, 2523^{7}.
of yeast, effect of light and CO on, 3308^{6}.
of yeast, formation of acetylmethylcarbinol and 2,3-butylene glycol in, 930^{1}.

Metaboric acid, volatility of, with steam, 25^{8}.
Metachlorocruorin, spectrum of, 1217^{7}.
Metacinnabarite, crystal structure of, 317^{9}.
Metaheulandite, mol vol. of, 850^{9}.
Metal-ammonia compounds See *Ammino compounds.*
Metaldehyde, compressed, as fuel, 1704^{4}.
detection of, 1043^{5}.
manuf. of, P 917^{8}, P 2333^{9}

Metallo-organic compounds. See *Organic compounds*
Metallurgy. (See also *Alloys; Amalgamation; Casting process; Cyanide process; Fumes; Furnace; Furnace, electric, Ores, treatment of; Slags;* "elec " under *Precipitation;* and metallurgy of the various individual metals under such headings as *Iron, metallurgy of.*) *(Patents.)* 33^{9}, $34^{1,2,3}$, $36^{5,8}$, 36^{9}, 553^{9}, 574^{4}, 734^{8}, $896^{7,8}$, $897^{1,6}$, 1182^{2}, 1781^{1}, $1975^{8,9}$, 2144^{3}, 2141^{9}, 2478^{9}, 3152^{9}, 3154^{1}, 3278^{6}.
aircraft development and, 2651^{2}.
from alloys, P 3412^{6}.
ancient and primitive, 3415^{5}.
atomic structure and, 1376^{1}.
blast roasting fine concentrates, 2636^{6}.
blowing-in methods with a water-jacketed furnace, 1378^{4}.
books: 1974^{9}, 1975^{1}; for Engineers, 356^{2}; Appareillage des industries electrometallurgiques, 553^{6}, and Its Influence on Modern Progress, 734^{1}, Die Edelmetalle; eine Übersicht ihre Gewinnung, Rückgewinnung und Scheidung, 1049^{2}, Les grandes industries modernes II. La, 1478^{7}; Refining Metals Electrically, 1567^{6}; Elektrometallurgie, 1761^{9}, Materialienlehre mit einleitenden chemischen Grundbegriffen für Metallberufe, 1780^{9}; Metallurgische Berechnungen, 1975^{2}; Tratado de, general, 1975^{2}; Actualitiés métallurgiques, 2144^{2}; Handbook of Non-Ferrous, 2306^{8}, des métaux autres que le fer, 2656^{7}.
briquets for, P 575^{3}.
at Bureau of Standards, 1047^{6}.
of cannon-making, history of, 1047^{6}.
of carbon-binding metals, P 3682^{3}.
carbon removal, P 735^{7}.
chloridizing, P 34^{3}.
of concentrates or slimes, P 1586^{5}.
elec.-blast-furnace operation, P 2127^{2}.
electricity in, 2620^{8}.
electro-, 712^{2}.
in France, 19^{4}.
industry, 1358^{6}.
in Italy, 1760^{9}, 3134^{1}.
review, 150^{4}.
in U. S , power for, 1760^{9}.
electrolytic recovery, P 341^{7}, P 2290^{1}, P 2462^{9}.
electrolytic recovery, condenser for, P 2956^{1}.
electrolytic recovery of earth metals, P 3397^{6}.
electrolytic recovery of earth metals, app. for, P 1762^{6}.
electrolytic recovery of heavy metals from fused salts, 872^{9}.
extn with NH_3 soln , P 3681^{4}.
filter for use in, P 681^{6}, P 1341^{2}.
in France, 163^{4}.
gases in, purification of, P 31^{8}.
gases in, S manuf from, 3335^{8}.
gas treatment of liquids in, app. for, P 1924^{5}.
history of, from "Arthasâstra" of Kautilya, 1733^{1}.
hydrocarbons in, P 167^{4}.
hydro-, in 1925, 888^{2}.
improvements possible in, 163^{5}.
of iron sulfide ores, P 3441^{4}.
leaching ores, P 896^{8}.
lead sepn. in, app. for, P 1383^{1}.
of low-C metals or alloys, P 2144^{3}.
of mats, effect of Na_2SO_4 on, 2133^{5}.
modern, ancient industries and, 3415^{4}.
non-ferrous, deoxidation processes and agents in, 2655^{5}.
of ores contg. volatilizable metal, P 1586^{9}
of oxide ores, P 3441^{4}.
of oxide ores, direct formation of alloys in, P 2145^{3}.
oxide reduction, P 1215^{4}, P $2055^{8,9}$.
oxide reduction with gases, P 3153^{1}.
of oxidized ores, P 1781^{1}, P 2973^{9}.
oxygen removal, P 357^{7}.
phase-rule diagrams in, 2609^{5}.
pulverized fuel in, 3676^{4}.
pyro-, in 1925, 888^{2}.
recovery of flaky precious metals from sand, P 1586^{6}.
recovery of metals from slag, P 34^{5}.
reducing with gases, P 3153^{2}.
refining, app. for, P 167^{7}, P 2479^{2}.
refining mixts., P 1384^{1}.
refining molten metals, P 1587^{2}, P 1975^{7}.
refining, Te for, P 736^{1}.
of refractory metal oxides, P 3683^{5}.
of residues and scrap, 888^{7}.
reviews, 728^{7}, 3276^{8}.
roasting, 3674^{5}.
roasting of sulfide ores, etc., P 1901^{1}.
roasting of sulfides, 1939^{1}.
roasting ores, 1677^{8}.
roasting ore suspended in gas currents, P 356^{9}.
in Sardinia, 3276^{1}.
sepn. of solids from gases in, P 1382^{7}.
and solid-state chemistry, 567^{2}.
sulfating ores and concentrates, P 1975^{4}.

of sulfide ores, fume treatment in, app. for, P 3441⁹.
sulfur as a by product in, 3782⁴.
in Sweden, 3415⁶.
treating solns. with pptg. gas, app. for, P 1541¹.
in valve and fitting industry, 567⁹.
of volatile metals, P 574⁶, P 735¹, P 2144⁸, P 3215⁷.
volatilization processes, 565⁹.
volatilizing metals from ores, P 3152⁹.
waste acid waters in, treatment of, 3440⁵.
waste in, treatment of, P 574⁸.
zinc and Cl recovery in, P 2479¹.
of zirconium and other refractory metals, P 1213⁹.

Metals. (See also *Alloys; Casting process; Castings; Coating(s); Corrosion; Electrodeposition; Electrodeposits; Electromotive force series; Electroplating; Furnace; Furnace, electric; Hardness; Molds (I), Solders; Welding*)
action of resinous masses from insulator oil on, 2885⁴.
adhesion of plates of, preventing, P 1383⁸.
adhesion to molds during casting, prevention of, P 897⁸.
affinity between S and, 3420⁴.
for aircraft, testing of, 732¹.
alpha ray stopping powers of, 3128⁶.
amorphous, intermetallic compds. and, 1747⁶.
analysis of, AcOH and H_2O_2 mixt. as solvent in, 2799⁴.
annealing, furnace for, P 359³.
annealing of, elec. app. for, P 2956¹.
annealing of plates and sheets, furnace for, P 735⁹.
arcs, luminous vapor distd. from, spectroscopy of, 3380².
atomizing, 1585⁹
atoms, period of adherence on glass surface, 1737³.
bars from, P 576¹
books: Cours de Connaissance des Matériaux. Les métaux, 464⁹, La révolution chimique et la transmutation des, 700³; Korrosion und Rostschutz, 734⁷; Chem. Technologie der Leichtmetalle und Ihrer Legierungen, 734⁸, Die Edelmetalle; eine Übersicht ihre Gewinnung, Rückgewinnung und Scheidung, 1049²; Das Färben der, 1586²; La révolution chimique et la transmutation des, 1760⁷; The Fatigue of, 1780⁸, 2306⁸, Ferrous, 1780⁸; Materialienlehre mit einleitenden chemischen Grundbegriffen für Metallberufe, 1780⁹; et alliages métalliques industriels, 1780⁹; Scrap, 1780⁹; Spraying, 1781¹, Das Trennen der, vermittels Sauerstoff, 1969¹; Qual. Analysis of the Common, 1969²; The Chem. Coloring of, and Allied Processes, 1974⁹, Chemie für den Metallbearbeiter in populärer Darstellung nebst e. prakt. Teil, 2306⁶; Ausgewählte Methoden für Schiedsanalysen und Kontradiktorisches Arbeiten bei der Untersuchung von Erzen, Metallen und sonstigen Hüttenprodukten, 2965⁷; Moderne Metallkunde in Theorie und Praxis, 2973⁷.
breaking strength of, detn. of, 3678⁷.
briquets of chips, P 1383¹.
brittleness in, from cooling, 32¹.
carbonizing boxes, alloy for, P 575⁶.
carburizing and heat treatment of, practice of A. S. T. M. for, 1121⁹.
carburizing compn. for, P 36⁶.
case-hardening—see also *Iron; Steel*.
case-hardening, P 898⁶.
case-hardening, compds. for, 3428².
cast, macrostructure of, 2808⁸.
cast sheets of, P 358⁶.
catalytic, P 3065³.
cathodic pulverization of, 2811⁶.
cementation by, 2972³.
cementation of, 3278¹.
by salts, 2639⁷.
with volatile salts, 567⁶.
chem. treatment of, 2177².
chill molds for casting ingots or plates, P 1587⁵.
circulation of heavy, in body, 448⁹.
cleaning non-ferrous, P 3651⁶.
cleaning sheet, P 897⁶.
cohesion in, temp. and pressure coeffs. of, 1736⁹.
cold working, effect of, 2135².
colloidal, conduction by, 20⁹.
effect on detonation in internal-combustion engines, 2750¹, 2906⁸, 3342².
glycogen in prepn. of, 2105³.
oxidizing action of, 2606⁴.
color of suspensions of, theory of, 2438⁵.
compacting, app. for, P 898¹.
composite articles of, P 804⁹.
composite, articles of desired coeff. of expansion, P 3652⁸.
compds. between, 1747².
compds. between, valency study of, 1344⁴.
corrosion prevention in, P 1587⁵, P 3683⁶.
compn. for, P 3154⁵.
with phosphate, P 3154⁵.
corrosion-resistant, 2814¹.
corrosion-resistant, working of, 3152¹.
cracking of rolled and drawn, 3679².
crystal growth in recrystd. cold-worked, 1581⁹.
cryst. structure of, 3417⁹.
crystallite orientation in conglomerates of, detn. of, 132³, 2640⁷.
crystallites of, growth and consumption in conglomerates, 3417⁴.
crystals, large, P 803⁶.
lattice arrangements in deformed, 683⁸.
plastic deformation of, 2601⁸.
production and properties of, 3419¹.
single, plasticity of, 529³.
single, thermal cond. and thermoelectromotive force of, 326².
thermoelec. properties of, 2778⁶.
cutting, by flame, P 1587⁶.
gas for, P 36⁵, P 495⁶, P 1901¹, P 2064¹, P 3345⁴.
with oxy-illuminating gas, 2143⁹.
relative effect of O purity and temp. in, 3440⁵.
deformation of, change of Peltier effect under, 1349⁹.
detn. of dissolved, in Hg, 725⁴.
diamagnetism of, 3381⁴.
diffusion in Hg, retardation with d. c., 2938⁶.
diffusion in solid, 540⁷.
displacement of, reactions involved in, 3619⁴.
distn. app. for material in contact with bath of molten, P 1152⁹.

distn. app. of, toxicity to plants of water distd. in, 2350^{6}.
drawing properties of, measurement of, 1202^{6}.
ductile bodies of refractory, P 3683^{5}
dust, still and condenser for manuf. of, P 357^{2}.
effect of degassing a plate bombarded with cathode rays on liberated electron rays, 1557^{8}.
effect of external mantle of, on glow discharge, 1558^{1}
effect on contraction, expansion and plasmolysis of plant cells, 2181^{6}
effect on respiration of *Aspergillus niger*, 2516^{1}.
elasticity of, m p and, 3101^{4}
elastic properties of, effects of cold hardening and of quenching on, 567^{9}.
elec. conduction by, kinetic theory of, 1353^{1}.
elec conduction by, theories of, $698^{5,8}$, 1750^{8}, 2436^{9}.
elec. cond. of, effect of cold working on, 2970^{2}.
elec. furnace for heating small articles of, P 1958^{4}.
elec. potential of, vapor tension and, 1314^{7}.
elec. potentials of, in contact with salt fusions, 2276^{6}.
elec. resistance of, effect of tension on the transverse and longitudinal, 698^{7}.
electron emission from, under intense external fields, 1353^{1}, 1941^{4}.
electronic phenomena at surface of, 1946^{1}.
electrons in, ratio of charge to mass of, 3124^{7}.
electrons in, thermoelec. effect and heat capacity of, 1319^{5}.
emission of electrons and positive ions by, at m. p , 3383^{7}.
enameling—see *Enameling*.
for enameling, P 1701^{2}.
endurance properties of non-ferrous, 31^{9}.
engineers and the study of, 2638^{2}.
equil. between salts and, in fusion, 1937^{7}, 3261^{3}.
etching—see *Etching*
for exhaust valves of airplane motors, effect of range of working temp on selection of, 3149^{3}.
fatigue of, 2650^{7}.
  by direct stress, 1203^{2}
  testing, P 898^{6}
fatigue test and dynamic elastic limit of, 3148^{6}.
fatigue tests on non ferrous, 1203^{3}.
films (transparent) of, 525^{5}
finishing with abrasives, 1700^{4}.
flaws on surfaces of, detecting, 3277^{9}.
fluidity of, increasing, P 3279^{5}.
flux for welding, brazing and tempering, P 168^{8}.
foils, velocity of cathode rays in, 1758^{6}.
frictional electricity from silk and, 334^{1}.
gases in, effect of, 2970^{1}.
German industry in, 2214^{1}.
glazing, P 3790^{6}
grain growth in critically strained, restraint of, 3417^{5}.
granulation of, P 735^{6}, 2476^{9}.
hardening of, cracks or fissures produced on, 2642^{2}.
hardness of, 732^{3}.
  detn. on soft metals, 2134^{9}.
  mech. and magnetic, 572^{9}.
  testing app. for, P 1732^{8}, 2642^{8}.
heating furnace for, P 168^{3}.
heating plate, continuous furnace for, P 3442^{3}.
heating plates, billets, etc., of, furnace for, P 3279^{6}.
heating to render workable, P 1290^{3}.
heat of fusion of, 3261^{6}.
heat of mixing of fused, 2936^{7}.
heat resisting, 2140^{4}.
heat-treatment and annealing of, elec. furnace for, P 2463^{1}.
heat treatment and annealing of, elec. process for, 1381^{3}.
heat-treatment of, elec. furnace for, P 22^{4}.
  furnaces for, P 1976^{2}, P 3103^{2}, P 3682^{8}.
  rotary furnace for, P 3154^{6}.
  salt mixts. for, P 1384^{2}.
hydrogen diffusion through, 2926^{3}.
impact test for indentation and hardness of, P 575^{9}.
impact tests on non-ferrous, 1210^{2}.
impervious, P 1508^{3}.
incrustation of, electrolytic prevention of, P 256^{6}, P 554^{6}.
industry, engineering and science in, 888^{5}.
industry of non-ferrous, in 1925, 888^{2}.
industry, review of, 1200^{2}.
ionization of less volatile, 1945^{5}.
joining glass to, P 3789^{9}.
joining rubber to, P 814^{1}, P 1922^{7}.
joints to silica, 315^{9}.
light, future developments in, 3676^{1}.
light, tensile strength and hardness of, 3678^{3}.
macrostructure of cast, 1582^{4}.
magnetic analysis of, 165^{3}.
magnetic, heat treatment of, P 3154^{2}.
mechanics of, models for, 2638^{4}.
melting, P 576^{1}.
melting and refining non-ferrous, P 36^{6}.
melting non-ferrous, atomized coal for, 654^{9}.
melting of, temp. and combustion regulation in, P 1587^{2}.
microscopic examn. of, 31^{9}, 1583^{2}.
modifying, with Te, P 736^{1}.
molding of heavy fusible, from crucibles, P 736^{5}.
mol. wt. of, relation to sp. gr., 850^{8}.
molten, mixing with gases, P 2479^{5}.
noble, doublé of, 2656^{1}.
notched-bar impact test of, effect of temp. on, 567^{3}.
oil reclaiming from chips of, P 1903^{7}.
ornamenting in imitation of natural wood grain or other designs, photographic transfer processes for, P 1184^{2}.
overvoltage of H on finely divided, and its relation to catalytic action of metals on soln. of Zn, 1019^{4}.
oxidation at high temp., 2934^{4}.
oxidation in water by electrolysis, 3262^{1}.
oxidation of, measurement of thickness of layer formed by, 1753^{3}.
oxygen and H detn. in, 1193^{3}.
painting and lacquering, prepn. for, 995^{2}.
paints for—see *Paints*.
particles of, emitted in cathode dispersion, 3643^{1}.
passivity of, theories of, 1542^{7}.
pharmacol. action of, 2366^{6}.
phase diagrams, 3416^{7}.
phosphorus in treatment of, P 736^{2}.

photographic reproductions in enamels on, P 3682[5].
pickling—see *Pickling*.
plastic deformation of, 2638[6].
plasticity at high temps., 2808[7].
plasticity of, 2808[5], 3254[6].
poisoning by heavy, 1116[3].
poisoning by heavy, treatment of, 2215[1].
polish—see *Polishing materials*.
polishing, glue for, 339[9].
powd., P 735[5], P 1214[4].
precipitation by H_2S, mechanism of, 2481[8].
precipitation in non-aq. solns., 3619[5].
pressure-temp. charts for, 686[3].
printing powd., on textiles, 294[8], 670[2].
protecting from acids, etc., P 1330[7].
pulverizing, P 576[1].
quenching curves, 2139[1].
quenching, pickling and washing, app. for, P 3682[7].
reaction with acids, 2627[6].
with liquids, prevention of spurting in, 3249[5].
with nitric acid, 1938[4], 3619[6]
with nitric acid in presence of catalysts, 3376[3].
recrystn. of cold-worked, 3417[9].
refractory, 2814[1].
refractory, cold-working of, P 3279[4].
combining alk. earth metals with, P 266[7].
working, P 3154[2].
residues and scrap, treatment of, 888[7].
reviews, 1780[4], 3756[9].
rods, etc., of, P 898[9].
Röntgen-ray examn. of, 165[4].
rubber-coated, P 2479[4].
salt baths, furnaces for, 2642[7].
screens, effect on form of α-ray ionization curves, 3128[3].
secondary, in world affairs, 3594[5].
secondary, resource of U. S. in 1924, 1376[2].
segregation in hot, "hot wall" and, 1211[5].
sheet, decorating, P 3153[9].
sheet material for textiles, P 3216[6].
on ships, toxic compns. to prevent fouling of, 1329[6].
sintering of comminuted refractory, P 358[8]
softening of strain-hardened, and its relation to creep, 3416[9].
soly. in NaCl, HCl and sugar with citric acid, 689[9].
sorption of gases by noble, 1169[2].
spinning, 355[2].
stamping of, seams in, 2650[4].
strained, x-ray examn. of, 526[9].
strain-hardening of, crystal rearrangement and, 527[4].
strength of, increasing, P 35[2].
strength of, interatomic forces and, 3678[6].
structure of, 165[4], 2639[8].
structure of, optics in study of, 2477[1].
sublimation and crystn. of, 2639[5].
surface of, and semi-conductors, 2778[7].
surface tension of molten, 3110[1], 3603[7].
systems, chemistry of, 3627[7].
temp. detn. in molten, 3416[8].
temp. measurements during melting and hardening operations, 2143[4].
temper-color, tarnish-colors and other tints on, 2649[4].
tempering of, P 1384[2].
tensile properties at high temps., 1202[9].
tensile properties of sheet, effects of size and shape of test specimen on, 2477[1].
tension and compression testing of materials of, methods of A. S. T. M. for, 955[1].
ternary systems of, constitution of, 3627[7].
testing, methods of A. S. T. M. for, 1121[9]
tests, comparison of static and dynamic tensile and notched-bar, 3418[4].
therapeutic use of, 3508[4].
thermal cond. and thermal e. m. f. of crystals of non-cubic, 1939[8].
thermo-electricity of, 165[5].
tools and dies of, P 37[4].
transparent foils of, 1025[1].
treating to inhibit excessive grain growth, P 1781[8].
tubes—see *Tubes*.
ultra-violet light production by impact of low-speed electrons on, 1558[3].
vapor pressure of, detn. of, 853[9].
vapors, elec. excitation in King resistance furnace, 3393[6].
velocity loss in, of moderately fast cathode rays, 704[9].
warping and cracking of, 2140[5].
water adsorbed by surface of, rate of evapn. of, 3111[6].
in waterworks equipment, 3202[8].
working, P 37[1].
zinc-coated, treating of, P 358[9].
Metamorphism, contact, in Big Thompson schist of Colo., 1778[9].
contact, of Colorado coals by intrusives, 3414[5].
of salts in German rock salt deposits, 2967[7].
Metamorphosis, of amphibian larvae, effect of I on, 1871[7].
hydrogen-ion concn. of tissue fluids of tadpoles in, 3748[8].
of insects, 2340[3], 3748[9].
of insects, effect of thyroid feeding on, 2026[3].
of proteins in germinating seeds, 2871[6].
in silk worms, 2372[9].
of tadpoles, effect of feeding thymus and liver on, 3028[4].
Metanilanilide, 4′,4‴-arsenobis-, 2838[8].
Metanilic acid, *N* - (**3 - hydroxy - 4(1) - keto-1-naphthylidene**)-, 2308[5].
——, **4 - methyl** - *N* - (**2,3,4 - trihydroxybenzal**)-†, 1987[1].
Metaphosphoric acid, adsorption isotherms of, 3605[5].
detn. in mixt. with H_3PO_4 and $H_4P_2O_7$, 160[1].
ethylene absorption by, 1782[6].
Metaporphyrin, dichloro-*, dimethyl ether, 3170[4].
——, **trichloro-***, dimethyl ether, 3170[4].
Metasaccharic acid*, *l*-, lability of, 2986[5].
Metastability, reason for, and measure of, 1928[3].
Meta-thorium oxide, crystal structure of, 2948[1].
Metatitanic acid, crystal structure of, 2948[2].
Metavanadic acid, detection of, 158[6].
Meteorites, age of, 3410[4].
chlorine from, isotopic compn. and at. wt. of, 1755[6], 2783[8].
eucrite, 564[1].
in Gold Coast, 3410[8].
in Harvard museum, 3410[2].
iron, from Tepla, Bohemia, 3669[2].
isotopic compn. of Cl in, 8[9].

nickeliferous-Fe, relation of artificial ferronickels to, 727[9].
from Russia, 3669[2].
Widmanstätten structure in, 1206[5].
Meters. (See also *Measuring apparatus; Rotameter;* etc.)
for compressed-gas cylinders, 523[3].
gas, standardization of station, 1900[6].
methyl salicylate in, 523[2].
Venturi, calcn. of, 522[8]
Methane. (See also *Fire damp*)
action of radon radiation on, 3391[4].
adsorbed, elec. moment of mol of, 531[8].
catalytic oxidation of, 2273[1]
chemical behavior in mixt with Rn, 1031[6].
chlorination of, 37[9], P 1243[6]
combustion rate of, 291[2].
compressibility of, 853[4]
decompn. by heat, 3632[1].
decompn. by incandescent wire, 2933[8].
decompn. by heat, reaction velocity of, 2934[1].
decompn. of, P 3697[1].
detector for, P 2076[3].
detn. of, 2473[6].
in illuminating gas, 656[9], 723[7]
in metabolism expts., app. for, 3709[9].
in mine air, 351[2].
in mine air, etc , 1576[7].
dialkylbis(aminoaryl) derivs , P 3697[4]
diffusion in stomach and intestines, 2509[2].
effect on explosibility limits of H and air, 989[4].
equil.: $Fe_3C + 2H_2 = 3Fe + CH_4$, 3130[1].
explosions of air and, in closed vessels, 3085[5].
flame propagation in mixts. of air and, 3815[9].
flames, extinction by diluent gases, 3573[2,5,8].
flow through a porous wall, rate of, 3601[5].
formation from CO and H, 860[9], 861[1].

books: Milchwirtschaftliches Praktikum, 2377[7], Untersuchungen uber den Einfluss der verschiedenartigen Behandlung der Milch auf das Resultat der Reduktase-Aldehydereduktaseproben, 2377[7], Condensed, and Milk Powder, 2711[8]
of buffalo (Egyptian), Vandam no. of, 3518[3].
"Bulgarian," P 3520[9].
calcium equil in, effect of sunlight on, 1831[2].
calcium in, effect of feeding Ca phosphate on, 1475[3].
calcium removal from, P 163[4].
of carabao and Indian buffalo, 3318[8]
carbonating, P 953[3].
carbonic acid in, 1656[8]
casein and protein in, 2545[7].
casein content of Danish, 3751[9].
chemistry of, teaching, 1473[1].
chloride-free, in edema, 935[8].
citric acid content of, 3318[7].
clarifying, P 1288[4].
coagulation by heat, 2027[3].
colostrum and, 2191[8].
compn. of, effect of wounds on, 785[6].
compn. of, variation in, 461[3], 2374[2].
condensed, 786[5].
  fats for manuf. of, 2027[4].
  heat coagulation of, 2709[7].
  for infant feeding, 436[6].
  stability during sterilization, 2373[1].
  sweetened, antiscorbutic power of, 3181[3].
  sweetened, app. for manuf. of, P 634[3].
  sweetened, lactose in total-solids residue of, 1119[9]
  sweetened, rancidity of, 2545[2].
  sweetened, tallowiness of, 3752[6].
constituents of, relative rates of secretion of, 779[1].
cooling of, effect on Cheddar cheese, 2545[9].
copper in, effect on vitamin potency, 1286[4].
creaming of, 2709[4,5].
cream rising, physico-chem. factors in, 1120[3], 2212[1].
cryolac no. of, 3318[5].
dehydrating app. for, P 2433[9], P 3364[6].
density of, app. for indicating, P 848[2].
deodorizing, P 1676[1].
diastase of, effect of temp. on, 631[6].
diastase, properties of, 1873[4].
diet of, anemia, urobilinuria and intestinal hemorrhage from, 1652[3].
  effect on blood of calves, 3026[7].
  pathol. effect of, 2694[5].
differences between cow and human, 2874[4].
dissoln. of Zn and Cu by, 2028[4].
effect of calcium and of H_3PO_4 on, 3493[3].
effect of feeding dry skim, on artificial infection of chicks with *Eimeria avium*, 3024[8].
effect of feeding skim or whole, on H-ion concn. of cecal contents of chickens, 3024[5].
effect of feeding steamed bone flour on, 462[5].
effect on sugar absorption of diff. kinds of, 619[8].
elec. cond. of, and its detn., 3517[4].
enzyme of, isolation of, 923[3].
estrus effect on compn. of, 632[4].
evaporator for, P 316[3], P 634[3].
expansion of, 846[3].
fat—see also *Butter*.
fat content of, effect on ice cream, 76[9].
fat content of, relation to quantity, 76[2].
fat content of, variations of, 245[1].
fat, detection and detn. in cacao fat, 1331[5].
  detn. in cacao butter, 2373[8].
  detn. in fat mixts., 1673[9], 2883[8], 3517[2].
  detn. in foods, 1119[8]
  detn of butyric acid no. of, 2373[4].
  emulsifying, P 2034[1].
filters for, P 316[3], P 523[7], P 2213[8], P 3200[9], P 3593[4].
flavor, effect of feeding grain treated with *p*-dichlorobenzene or chloryl on, 2550[5]
fodder requirements of cows, 2189[6].
food from, P 3200[8].
freezing of, effect on marketability, 1473[2]
freezing point of, 2211[9].
freezing point of, from sick cattle, 3197[1].
goat, as food for infants, 3197[2].
goat (Corsican), 2211[6].
goat, effect of feeding protein substitute on, 1096[3].
grading of, fermentation-reductase test for, 951[5].
heating, effect on H-ion concn. and acid content, 3752[4].
human, energetic value of, and growth of infant, 1431[9].
human, phosphorus content of, 3725[5].
human, vitamins in, 933[1], 2187[9].
hydrochloric acid and lactic acid, acid effect of, 2006[1].
hydrogen acceptors in, 3302[5].
for infant feeding, acidification with vinegar, 2005[9].
  acidified, 436[5], 2188[5].
  certified *vs.* pasteurized, 2872[9].
  comparison and interpretation on a caloric basis of mixts. of, 63[5].
  modification of, 222[6].
intramuscular injections in acute inflammatory processes, 3733[9].
iodine in, effect of feeding I-rich beet leaves on, 963[1].
iodine in, feeding stuff for increasing, P 3321[9].
keeping quality of, detn. of, 1873[7].
lactic acid in, ratio to loss in dry ext., 2544[3]
luminal passage into, 1864[7].
org. constituents of, rendering sol., 785[2].
paracasein of skim, action of rennet ext. as affected by org. acids on, 1120[2].
parathyroid tetany treatment with, 3504[8]
parenteral injections of, metabolism and, 1264[1].
pasteurization of—see *Pasteurization*.
perhydridase of, 1841[2].
phosphorus content of, 3725[5].
phosphorus in, feeding expts. and, 1433[1].
poisonous, and its products, 244[4].
powder, app. for disintegrating, emulsifying and mixing, P 2[6].
  fat detn. in, 2211[8].
  as food, 3752[1].

humidity equil. of, 1120[1].
keeping quality of, 632[1].
package for, P 2213[7].
from skim milk, nutritive value of, 2186[3].
from skim milk, sterility from, 3026[1].
from skim milk, vitamin A in, 2188[4].
powdered, P 1475[9].
preservation of, P 953[2].
production during a lactation, errors in detg., 1472[9].
production of, bean meals in, 2545[4].
effect of flies and of fly sprays on, 2555[4].
with Indian foodstuffs, nutrients required for, 3180[8].
mineral nutrients in rations in relation to, 775[8].
protein sources in, 2373[9].
ratio of plant foods recoverable from manure to, 88[7].
relative utilization of feed energy for maintenance, body increase and, 3489[2].
silage *vs.* swedes for, 2545[5].
protein, in infant feeding, 436[7].
proteins of bread and, maintenance values for, 1436[2].
proteins of, maintenance values for, 1436[2].
rennin effect on, 3300[7].
tryptophan in, 1252[2].
reaction to blood serum precipitin, 1669[2].
rennet coagulation, 1473[4], 1997[3].
rennet-like action of pepsin on, 1418[9]
resorption of, insulin effect on, 1464[8].
rickets treatment and prevention with irradiated, 2188[2].
ropiness in, from surface influence, 3517[4].
salts, effect on whipping ability of ice cream mixes, 3048[8].
secretion of —see *Lactation*.
sediment in, measuring, 1873[8].
semi-solid product, P 1475[8].
skimmed, food from, P 3321[5].
for sorghum silage-fed cows, nutritional value of, 1833[8].
sour, concg., P 1475[8].
sterilization of—see *Sterilization*.
sugar—see *Lactose*.
supply, 244[4], 1286[5], 2544[8]
tainting by chamomile, 3517[6].
ternary food addn. to, effect on N retention during growth, 1436[8].
testing, 2027[9].
therapy with, in children, 1111[3].
toxicity of, 3035[1].
ultra-violet irradiation of, 3197[4].
viscosity and whipping properties of, 1473[7].
viscosity, surface tension and whipping properties of, 786[1].
vitamin-A content of, effect of Jonas Nielsen sterilizing process on, 3181[6].
vitamin A in, effect of ultra-violet light on, 3027[2].
vitamin B in evapd., 3180[6].
vitamin-C content of raw and pasteurized, 3717[5].
vitamin C in, effect of pasteurization on, 619[8].
vitamin content of, preserving, P 3050[9].
vitamins A and D in, effect of diet and sunlight on, 3180[1].
vitamins in, effect of boric acid on, 3317[9].
effect of feeding cod-liver oil on, 620[1].
effect of light and diet during production on, 3180[9].
yield and compn., 1473[8].
yield and compn. of, effect of salts on, 1657[8].

viscosity of, detn. of, 120[8].
water detn. in, 2088[8].
world production and trade in, 2918[4].

for yeast production, P 795^{6}.
yield of, detn. of effect of purity on, 2258^{6}.
zeolite treatment by Steffens process, 1001^{3}.

Moldable materials, P 2145^{7}.
from phenolic condensation products, P 97^{8}.

Molded products. (See also *Phenol condensation products.*)
from blood, 265^{8}.
from casein "artificial horn," P 98^{1}.
from dolomite, P 3515^{1}.
from kieselguhr, P 97^{9}
from magnesia (calcined), P 1307^{4}.
from rubber and fibrous materials, etc., P 3589^{9}

Molding, of glass, app. for, P 2055^{6,7}.
of insulating mixts., etc., P 3202^{1}.
of paper pulp, P 3523^{1}.
of phenol aldehyde condensation products, P 2233^{3}.
pressure-, of heavy fusible metals from crucibles, P 736^{5}.
of resinous compns., P 1696^{8}.
waste materials, P 649^{9}.

Molding sand See *Sand.*

Molds (I). (See also *Sand.*) P 100^{1}.
for aluminum casting, coating for, P 898^{5}.
for aluminum Si alloys, P 2145^{5}
for bricks of porous structure, P 650^{7}
of celluloid for plastic materials, P 483^{9}.
for cementitious materials, P 3551^{9}.
coating for iron, P 576^{2}.
coating for metal, P 37^{2}.
coating for, to prevent adhesion during casting, P 897^{8}.
coating with lampblack, app for, P 37^{1}.
compn. for, P 359^{1}.
core oven, P 312^{6}
cores for metals, P 167^{9}
foundry, P 898^{8}.
for glass, P 99^{7}.
heat treatment oven for, P 1341^{3}
ingot, P 359^{2}, P 736^{5}, P 1384^{6}, P 1587^{5}.
ingot, machine for cutting ends of, P 1781^{7}.
ingot, shrink head casings for, P 37^{1}.
for iron castings, P 3682^{5}
for iron or steel, P 2974^{5}.
of lignite briquet press, measurement of pressures and temps. in, 2211^{1}.
for metals, P 37^{3}, 892^{2}, P 3143^{4}.
for metals, device for supplying gas for, P 37^{3}.
ovens for baking, heat governor for, P 317^{1}.
for plates, P 1587^{5}.
powder for, P 2052^{4}.
protecting surface for, P 2974^{5}.
for resinous materials, prevention of sticking in, P 513^{6}.
rotating, coating for, P 167^{8}.
for rubber, P 3247^{7}.
for rubber, Al alloy for, P 1214^{6}.
vulcanizing, P 126^{8}.
vulcanizing, collodion soln. for painting, 3589^{5}.

Molds (II). (See also *Aspergillus; Penicillium*).
antiseptics for, 931^{1}.
culture of, law of min. in, 2866^{9}.
growth on sizing and finishing materials, 1327^{2,4}.
rubber protection from, 1730^{4}, 3837^{9}, 3839^{6}.
sulfur oxidation in soils by, 1484^{3}.
test in food examn., 2883^{1}.
urea excretion by, 1829^{5}.
wood protection from, P 3553^{1}.

Molecular association, adsorption, dielec. const. and, 2105^{1}.
of benzoic acid in C_6H_6, 3117^{4}.
condition equation and, 3603^{1}.
crit. temp. and, 1157^{7}.
detn. of, 130^{8}.
detn. of, of polysaccharides, 129^{6}.
hypothesis of, 682^{9}.
of liquids, 3631^{2}.
of liquids at boiling temp., 2769^{4}.
of mercuric chloride, 2934^{9}.
mol. soln. vols. and, 2773^{5}.
in nitrobenzene soln., 2107^{8}.
racemate formation and, 3104^{8}
theory of, 133^{3}.

Molecular asymmetry. See *Asymmetry.*

Molecular attraction. See *Attraction.*

Molecular compounds. See "addn." under *Chemical compounds.*

Molecular heat. (See also *Atomic heat; Specific heat*)
of *n*-atomic gas, 1345^{1}.

Molecular moment, calcn. for dipolar ethylenic isomers, 1734^{5}.

Molecular refraction. See *Refraction.*

Molecular volume, additivity of, of liquid inorg. compds., 1008^{5}, 2434^{9}.
of ammonium, 525^{2}.
atomic vol. and, 2924^{1}.
change in formation of bases and acids, 2434^{9}.
consts. of equation of state and, 2274^{6}.
detn. of, 850^{9}, 3252^{4}.
law of additive, of cryst. inorg. compds., 2923^{8}.
in liquid mixts., 682^{9}.
for metal salt hydrates, 2924^{5}.
and polarization of H atom in org. compds., 3684^{5}.
of rare earth sulfates, 867^{1}.
of salts at their m. ps., 683^{4}.
variations in formation of solid inorg. compds., 1343^{3}.
of water in cryst. hydrates, 1343^{7}.
at zero abs., 2266^{1}, 3595^{8}.
at zero abs., calcn. of, 1008^{4}.
zero-point, relation to other properties, 3108^{6}.

Molecular weights, consts. of equation of state and, 2274^{6}.
crit. consts. and, 1748^{5}.
crit. data and, 2274^{7}.
cryoscopic detn. in test tubes, 3252^{6}.
detn. of, 683^{2}.
in ammonia, 3104^{1}.
app. for, 2435^{2}.
by centrifuging, 2767^{3}.
in colloidal particles with Donnan membrane equil., 3112^{7}.
by depression of f. p. with TNT as solvent, 1925^{7}.
ebullioscopic app. for, 2765^{8}.
in liquid NH_3, 129^{6}.
in liquids, 3104^{1}.
in mixed soln. media, 683^{3}.
in org. compds., 2767^{4}.
in solvent mixts., 1734^{3}.
diffusion coeff. and, 2105^{9}.
of elements, variation with temp., 2266^{2}.
of metals, relation to sp. gr., 850^{8}.
of polymeric substances, detn. of upper limit by x-ray analysis, 2117^{9}.
pressure and, at const. temp., 3600^{3}.
of rare earth metals, 867^{1}.

Molecules, acid-base function of, and its dependency on elec. charge type, 2931[7].
activated, existence in chem. reactions, 1563[4].
activation of, 3644[6].
active, in chem. statics, 2933[5].
activity of, transference of, 2935[3].
adsorption of, constancy on any surface, 687[1].
adsorption of neutral, effect of elec. field on, 1932[3], 2928[5].
adsorption on large, in soln., 3368[4].
books: Structure des, 329[9], Die Existenz der, 2277[8].
catalysis and change in form of, 1392[8].

strength of, as influenced by grading of the sand, 3792^8.
Morus alba. See *Mulberry.*
Mosquito, development of, effect of elec. current on, 2552^7.
ecology, phys. factors in, 2543^3.
larvae, effect of changes of H-ion concn. on growth of, 2026^7.
malaria-bearing, storage water supply lakes as breeding places for, 960^1.
Mosses, gaseous exchange of, effect of electrolytes in medium on, 1429^3.
hydration and respiration in, 3308^9.
hydration with water vapor, 1425^7.
Spanish, compn. of ash of, 3179^3.

Mossite, crystal structure of, 3415[1].
Motalin, as internal-combustion fuel, 2403[1].
Mother-of-pearl, formation of, 2929[6].
Mother-of-pearl substitutes, P 3786[4].
Moths, felt, etc., proof against, P 297[2].
-proofing compds., 1327[7].
proofing textiles against, P 993[9], P 3240[9]
proofing wool, furs, etc., against, P 511[7], P 2080[3].
textile damages by, 3240[9]
Motion, periodicity of, separability of Hamilton differential equations for, 1555[7]
Motors. See *Electric motors; Engines, Fuels.*
Mowrah-seed oil, 2083[7].
Mucic acid, 900[7].
as food, 787[3].
reaction with beryllium carbonate, 1396[9].
reaction with methylene blue, 742[6]
salts, 1058[7,8].
Mucilage. (See also *Adhesives.*)
from seaweeds, 3310[1]
Mucin, effect on pancreatic juice secretion, 3495[6].
Muconamic acid, α,δ - **bis(p - chlorophenyl)-β,γ dihydroxy-,** lactone, 2849[7].
——, **β,γ - dihydroxy - α,δ - di - p - tolyl-,** lactone, 2849[6].
Muconic acid (*1,4 - butadienedicarboxylic acid*).
——, α,δ - **bis(p - chlorophenyl) - β,γ-dihydroxy-,** lactones, and their derivs., 2849[6].
monolactone, esters, 2849[6].
——, α,δ - **bis(p - chlorophenyl) - β - ethoxy-γ-hydroxy-,** lactone, methyl ester, 2849[6].
——, α,δ - **bis(p - chlorophenyl) - β - hydroxy - γ - methoxy-,** lactone, esters, 2849[6].
——, **β,γ - dihydroxy - α,δ - diphenyl-,** γ-lactone, esters, 2849[7].
——, **β,γ - dihydroxy - α,δ - di - p - tolyl-,** lactones, and their derivs., 2849[5].
——, **β - ethoxy - γ - hydroxy - α,δ - di-p-tolyl-,** lactone, Me ester, 2849[6].
——, **β - hydroxy - γ - methoxy - α,δ - di-p-tolyl-,** lactone, esters, 2849[5].
Mucononitrile, α,δ - **bis(p - chlorophenyl)-β,γ-dihydroxy-,** 2849[6]
Mucoproteins, of snails, 459[2].
Mucors, sexes in, 1832[8]
zygospore formation in, effect of external factors on, 2179[5].
Mucous membranes, catalase activity of oral, 1836[9].
choline in, of small intestine, 624[6,8].
hydrochloric acid formation by gastric, 2531[2]
of stomach, effect of some salts on, 2370[7].
Mucus, book: Hexosamines and Mucoproteins, 430[7].
nasal, proteolytic and amylolytic power of, 2008[6].
of stomach, 440[9].
Mud balls, compn. of, 466[9].
Muds, lower, of vicinity of Paris, 30[9]
Mulberry, tanning substances in, 2518[1].
Mullein, flowers of, substitute for, 3536[1].
Mullite, crystal structure of, 2601[3], 3105[3].
from dumortierite, 3409[2].
expansion by heat, 807[8].
in firebrick, 806[5].
formation from cyanite, 2235[2,3].
formation from cyanite, andalusite and sillimanite, 650[3].
formation in fired clays, 1308[3].
in glass tank blocks, 3788[4].
Multirotation. See *Optical rotation.*
Mung bean, copper in, 616[3].
vitamin B crystals from, 1258[4].
Munroe, Charles Edward, biography, 1341[8].
Muntz metal, condenser tube plates of, specifications of A. S. T. M. for, 954[5], 1121[4].
endurance properties of, 31[9].
microscopic examns. of, 3679[3].
Murraya, oil from *M. koenigii, M. exotica,* and *M. exotica var. ovatifolata,* 2720[6].
Musca domestica. See *Flies.*
Muscarine, effect on plexus-free prepns. of small intestine, 2707[8].
effect on secretion of Harder's glands, 447[3].
uterus contraction from, 2204[9].
Muscle extract, effect on intestinal secretion, 2875[3].
enzymes in, cleavage of glucose and other hexoses by, 3304[9].
Muscles. (See also *Exercise, Fatigue (physiological); Work.*)
acid production of excised, effect of changes in concn. of ions on, 2527[4].
activity of, effect of glucose and insulin on, 946[8]
activity of skeletal, effect of secretin on, 950[2].
activity of voluntary, effect on basal metabolism, 3312[9]
adrenalectomy effect on, 2534[4].
albumin of, 429[1].
amine action on organs contg. involuntary, 241[9].
arthritic atrophy of, O consumption in, 2201[2].
autolysis of, effect of quinine and of hormone prepns. on phosphoric acid hydrolysis during, 3707[1].
bacteria in tissue of, 1424[2].
benzylamine effect on smooth, 1852[6].
of blood vessels, pilocarpine effect on smooth, 1463[2].
calcium effect on, 2357[8].
camphor effect on, 2206[9].
carbohydrate metabolism in, relation to pancreas, 228[8].
carbohydrate metabolism in skeletal, effect of phosphates on, 940[9].
carbohydrate regeneration in, 227[4].
carbohydrate synthesis in, 439[9]
cells of, reaction with acetylcholine, 3743[1]
cholesterogenesis in, effect of internal splenic secretion on, 1440[9].
cholesterol effect on, of intestine and uterus, 3507[7].
cholesterol in, in HCN poisoning and in beriberi, 67[1].
choline in, of small intestine, 624[6,8].
chronaxy of skeletal and cardiac, effect of acidosis and of alkalosis on, 1842[7].
cocaine effect on iris compared with effect on other structure contg. smooth, 3046[4].
contractility of smooth, effect of inorg ions on, 624[2].
contraction of, 3181[7], 3499[1].
cause of, 1816[9].
mechanism of, 777[5].
origin of heat in, 1261[3].
role of lactic acid in, 437[7].
surface tension theory of, 64[3].
theory of, 3313[9].

in tremors and convulsions, O deficiency theory of, 1109[8].
cozymase of, 212[8].
cramp of skeletal, effect of CO_2 retention on, 2527[3].
creatine content of, effect of denervating striated muscle on, 2362[2].
effect of innervation on, 1246[5].
effect of toxic contractures of striated muscles on, 2362[2].
of crustacea (normal and moulting), 2882[3].
dehydrases of, 1102[5].
dehydrases of, effect of insulin on, 942[3].
dehydrogenases of, effect of quinine derivs. on, 3466[1].
in diabetes, effect of insulin on sugar balance in, 1280[7].
effect of barbituric acid derivs. on smooth, 3043[3].
effect of pituitary ext. and histamine on smooth, 2707[4].
effect of water loss through osmosis on function of, 442[3].
effect on glucose, 3302[1].
electrolyte effect on, of invertebrates, 629[6].
of embryonic heart, temp. for contraction rate of, 3496[7].
of esophagus, effect of cations on, 3744[6].
ethyl alc. effect on, in relation to temp., 2018[2].
extractive of, 1243[9].
fibers, differentiation by Fe salt formation, 215[2].
function of, paralyzed by cutting their motor nerves, 2191[3].
glucose consumption of perfused skeletal, effect of insulin on, 2205[5].
glycogen content of, in As poisoning, 2701[7].
effect of hemorrhage on, 2699[6].
effect of hepatectomy on, 68[5], 938[9].
glycogen synthesis from lactic acid by, 2338[9].
glyoxylate content of rabbit, 2523[2].
guanidine effect on cold-blooded, displacements of electrolytes in, 2205[5].
hardness of, effect of caffeine, quinine and strophanthin on, 3040[6].
hardness of, effect of Ringer soln. on, 3040[2].
heart, acid action on, 2509[4].
effects of diphtheria toxin on, 1456[2].
irritability of, 1112[9].
lactic acid in, rigor mortis max. and glycogen content and changes in H-ion concn., 777[2,3,4].
unsatd. fatty acids in, 1999[1].
heat production in voluntary, 2510[9].
hemoglobin of, identity with blood hemoglobin, 2509[8].
hemoglobin of striated, 2509[8].
hexosediphosphatase of, 941[7].
of hibernating frogs, relation between breaking-up of albumin and fat content of striped, 2025[1].
hydrogen-ion concn. of, effect of fatigue on, 2010[3].
inhibition of strength by cold, and resuscitation by salicylic acid and EtOH, 2703[3].
insulin complement in, 2337[6], 3724[1].
insulin content of, effect of vagus stimulation or ligation of portal vein on, 3496[5].
insulin in, in normal and pancreatic diabetic dog, 441[6].
intermediary carbohydrate changes in, under identical conditions of gas metabolism, 226[6].
irritability of, alteration of indirect galvanic, 1112[8].
lactacidogen content of skeletal, insulin effect on, 2874[6].
lactic acid content of, 1657[4].
during prolonged activity, 1262[5].
O intake during exercise and, 938[5].
lactic acid content of heart, tension development and, 3495[7].
lactic acid effect on artificially perfused frog, 1442[5].
lactic acid formation in smooth, after death, 2530[6].
lactic acid formation in, tetany and, 1260[6].
lactic acid formation in, time relationships between contraction and, 1091[5].
lactic acid formation on death of smooth, 3493[8].
lactic-acid-forming enzyme in, sepn. of, 1635[9].
lactic acid in, reaction with hexoses, 3462[5].
lactic acid oxidation by, 3494[6].
lactic acid production in, 1283[2].
magnesium ion effect on skeletal, 1858[9].
metabolites, effect on adrenal secretion, 2017[4].
motion of, laws of, 2874[4].
movements of, surface tension changes underlying, 2001[3].
mucosa musculature of stomach, 2370[6].
myoglobin in red and white, 1099[8].
narcotic effect on, 3511[1].
narcotic effect on skeletal, 1865[8].
-nerve prepns., effect of chlorophyll on, 949[8].
neutrality regulation by, 625[5].
nucleic P index of, 3304[4].
oxidation in, effect of H-ion concn. on, 2362[8].
oxidation-reduction system of, effect of dihydroxyacetone and zymophosphate on, 2684[4].
oxygen consumption by, influence of O tension on, 608[8].
oxygen utilization by, 2534[2].
pancreatin effect on, 1858[3].
permeability to hexoses and pentoses, 3721[1].
pharmacology of denervated mammalian, 3047[4].
phosphates in non-irritable, 3176[1].
phosphoric acid in, effect of fatiguing work on, 1260[2,5].
phosphorus and fat distribution in resting and fatigued, 1656[9].
phosphorus distribution in, 3728[1].
physiology of, tetany spasm as disturbance in, 2878[5].
pigments, myohematin and, 1417[7], 2333[9].
postmortem changes in function of isolated, 1840[9].
potassium fixation in ventricular, effect on heart function, 3498[8].
potassium in, effect of electrolytes on, 3497[7].
protein N in tissue of, 2695[5].
proteins of, colloidal behavior of, 211[1].
isoelec. point of, 229[2].
nutritive value of, 2695[2].
pulp, cyanogen absorption by, 3190[6].
pyramidone effect on intestinal, 1465[8].
respiration and carbohydrate exchange in, 3494[4].
respiration of, 1816[1].
respiration of, effect of insulin on, 941[9].

respiratory quotient of resting, 3490[6]
rigor mortis of, 2194[5]
chemism of, 227[7].
onset of, 2529[7].
rigor mortis in fish, lactic acid and, 2511[2]
Rontgen ray effect on irritability of, 628[9]
saponin effect on, 1114[1].
skeletal, extension and loading in acetyl choline contraction and in tetany, 626[2]
sodium nitrite effect on striated, 2540[7]
spasms of unstriped, from substance in sputum during asthmatic attacks, 232[1]
spermine in, 3172[7]
sphincter, of gall bladder, effect of novocaine and glycerol on, 2701[5]
staining with fuchsin, 2531[1]
stimulation by body fluids, 1468[1]
stimulation by sympathetic nerves, effect of ergotamine on, 2208[7]
stimulation of, effect of poisons on, 1859[8]
striated, effect of snake and scorpion venoms on, 1862[4]
striped, innervation and chemistry of, 2357[7]
succinic acid in, 1283[7]
sugars of, 911[8]
temp. effect on, 3175[6]
tetanic contraction of heart and stomach, alterations in concn of ions, 3492[3]
thiocyanate effect on, 1169[5]
tissue, autolytic NH_3 formation in, 3726[1]
effect on glucose *in vitro*, 3723[9]
effect on rotatory and reducing values of glucose, 2360[7]
interaction with insulin and glucose, 1101[5], 3182[6]
sp. rotatory power of glucose-insulin solns in contact with, 3725[4].
tonus, 2020[1].
tonus of, K ions and, 3497[6]
tonus of skeletal, effect of drugs on, 1859[2]
tortoise, relation of work and heat in, 3494[7]
ultr olet idi effe olu 1273[1]
urethan effect on involuntary, 457[6]
uterus, Ringer soln effect on, 1276[1], 3511[6]
vegetative stimulating substances in active, formation of, 1141[7]
viscous elastic properties of smooth, 2874[5]
water content of striated, variation of, 2876[1]
Muscol, esters, 2831[1]
Muscone, isoxime, 2834[4]
Muscovites, -chlorite and -biotite, compn. of, 2968[5]
constitution of, 2301[6]
hydrolysis of, 1045[6]
from Pisek, 3667[9]
purple, from New Mexico, 1372[7]
Museum, of science at South Kensington, London, 682[6].
Mushrooms, enzymes of, 3485[7,8]
toxic action on nerve centers, 1861[8]
Musk, artificial, 265[8]
derivs. of natural, 2831[2]
natural, review on, 3535[8]
prepn. of odorous principles of, 1792[2]
Muskmelons, fertilizer expts on, 962[3]
Mussels, oxygen requirement of, food supply and, 1282[1]
substance in edible, giving positive naphthol reaction, 1673[3].
Mustard, allyl isothiocyanate detn. in ground, 2028[9].
catalase activity during germination, 2520[4].
fertilizer expts. with black, 2715[9].
fertilizer for, $CaCl_2$ as, 3057[9].
fertilizers for, 1485[7,8]
germination of white, org. N compds as fertilizers for, 1881[9]
nitrogen source for, 1646[8].
oxygen intake by *Sinapis alba*, 1426[9]
permeability to O of embryo of *Sinapis alba*, 1427[1]
seed of black, differentiation from charlock seed, 1887[7]
table, 787[2]
Mustard gas See *Sulfide, bis(β chloroethyl)*
Mustard oil See *Isothiocyanates;* and "mustard," under *Oils*
Musts, Algerian grape, of 1925 vintage, 1681[5]
ammonia detn in grape, effect of sugar on, 1885[1]
analysis of grape, 175[6]
citric acid content of Greek, 2892[6]
defecation with mercuric salts, 2224[7]
sulfur dioxide content of grape, 475[1]
Musy, Ignace, obituary, 2391[3]
Mutarotation See *Optical rotation*
Mutton-bird oil, 3754[9]
Mya arenaria See *Clam*
Mycology See *Fungi*
Mycorrhiza, activity of proteolytic and related enzymes of *Hymenomycetae* in assocn known as, 1421[7]
Mydriasis, of irradiation, 452[5]
Myelins, in corpus luteum in pregnancy, 2009[2]
in subcutaneous fat of man and in lipomas, 1419[7]
Myoalbumin See "muscle" under *Albumin*
Myocarditis, calcium and digitalis effect on, 1466[3]
Myochromogen, spectrum of, 2334[7]
Myogen, isoelec point and conditions of stability of, 211[1].
isoelec point of, 229[2]
Myoglobin, in red and white muscle, 1099[3]
Myohematin, muscle pigment and, 1417[7], 2333[9]
Myoma, uric acid excretion in, effect of Ra or Rontgen irradiation on, 1273[6].
Myoporum laetum, constituents of, 186[5].
Myoprotein, isoelec point of, 229[2].
Myosin, isoelec. point and soly of, 211[2]
isoelec point of, 229[2]
from meat, tryptophan in, 1252[2].
Myoxocephalus, blood sugar of, effects of asphyxia and isletectomy on, 3495[8]
Myrica asplenifolia, oil of, 2896[3].
Myricetin, hexamethyl ether—see *Flavone, 3,5,7,3′,4′,5′-hexamethoxy-*.
Myricitrin, spectrum of, 1991[4].
Myricyl alcohol, 3441[4]
Myristic acid, activity coeffs. of Na and K salts of, 3617[8]
behavior on surface of water, 134[2].
piperidide, pungency of, 2845[1].
prepn of, 3280[7]
spreading on water surfaces, 1544[7].
thallium salt, 367[2], 2818[1].
——, **β-keto-**, ethyl ester, hydrolysis of, 2660[7]
——, **γ-keto-**, and oxime, 3445[2].
Myristin, hydrolysis of, 3280[7].
prepn of, 3283[1].
Myristonitrile, γ - Δ[2] - cyclopentenyl- See *Chaulmoogryl cyanide*.
Myrobalan, ext., insol. matter of, 3587[3]
properties of, 3586[6].

Myrrh, enzymes in, 60[2].
Myrrhis odorata, oil from, 795[8].
Myxedema, blood in, fat-cholesterol quants. in, 1846[6].
blood vol. in, 3731[9].
diiodotyrosine effect on, 3189[7]
thyroxin effect on respiratory and nitrogenous metabolism in, 447[6].
thyroxin in, 780[8].
Myxoglobulin, in blood, 2343[3]
Myxoglucan, 434[3].
Myxomycetes, fruit walls of, chem constituents of, 434[1].
protoplasm of, protein of, 1819[7].
trehalose and trehalase of, 2003[6]

Nachtblau. See *Night blue*.
Nandazurine, 420[9].
Nandina domestica, alkaloid of, 420[5]
Nandinine, constitution of, 420[6].
Naphtha (See also *Gasoline*)
crit. temp. of, 496[9].
distn. of, methods of A. S. T M. for testing, 1121[7]
recovery from water, app for, P 1715[2]
solvent —see *Benzine*
1,2 - Naphthacridine - 14 - carboxylic acid, 3,4-dihydro-. See *Tetrophan*
Naphthalamic acid, *N* - (*β* - **aminoethyl**)-, and lead salt, 1075[4].
——, *N* - (**1 - amino - 2 - naphthyl**)-, and silver salt, 1075[6]
——, *N* - (*o* - **aminophenyl**)-, and silver salt, 1075[6].
1 - Naphthaldehyde, 5 - bromo-, and derivs., 1216[4].
——, **2,4-dinitro-**, 2325[4].
——, **2-hydroxy-**, reaction with PhNC, 3165[9].
2-Naphthaldehyde, 6-bromo-, and derivs., 1216[5].
Naphthalene, absorption of *β*-rays by, 3127[8].
bromonitro derivs., prepn. of, 382[9].
chlorination of, app. for, P 425[4].
constitution of, and derivs., 909[6], 1616[1].
depolarization of diffuse light by, 2113[1].
detection in flour, 1284[5].
detn. in coke, 2905[9].
detn. in gas, 3226[6].
elec cond. of, 1751[9].
heat of combustion of, 326[9], 327[1], 327[3].
heat of crystn. and sp. heat of, 2778[2].
hydrogenation of, P 1514[4], 1791[2], P 1996[8].
hydrogenation of, high pressures in, 2712[3].
nitration of, P 917[1].
oxidation of, in the vapor phase, 2990[8].
prepn of, 2491[7].
reaction with bicarbamic esters, 410[8].
with ketene in presence of $AlCl_3$, 42[8].
with lactones and $AlCl_3$, 751[2].
with quinolinic anhydride and $AlCl_3$, 764[7].
removal from fuel gas, P 1710[8], 2406[6], 3556[9].
app. for, 679[3].
effect on heating value, 1899[3].
with silicic acid gel, 2727[7].
with tetralin, 2905[1].
sepn. from sugar by dialysis, 1547[2].
soly of, 3258[1].
soln. in C_6H_6, surface tension change as function of concn., 2607[8].
solns. in org. solvents, viscosity and apparent mol. heat of, 538[8].
solns. in xylene and in PhMe, d.-temp. curves of, 3117[1].
spectrum of, 190[1], 1178[8], 2953[9].
spectrum of, and derivs., 2791[7].
structure of, 2114[5].
sulfonation of, with SO_3, 2153[9].
system: BzOH–, 1745[7].
system: cyclohexane–, 1548[3].
systems with *p*-nitrophenol, pyrocatechol or picric acid, "thaw"-m.-p. diagrams for, 693[8,9].
valency problem in, 1550[7].
Naphthalene, acetyl-. See *Acetonaphthone*.

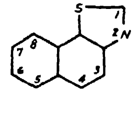
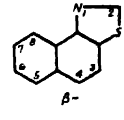
Naphthoquinolinium compounds, 10 - acetamido - 5,6,6₁,7 - tetrahydro - 1,2,11-trimethoxy - 6,6 - dimethyl - 6,4 - *peri* — iodide, 3458[3]
5,6,6₁,7 - tetrahydro 9,10 - dimethoxy-6,6 - dimethyl - 6,4 - *peri*— methosulfate, 3158[3]
Naphthoquinone, derivs., 2159[2].
α - Naphthoquinone. See *1,4 - Naphthoquinone*
β-Naphthoquinone See *1,2 - Naphthoquinone*
1,2-Naphthoquinone, 1,1′ (or 2,2′ or 1,2′)-thiocarbohydrazone, 1810[8]
———, **3,4-dichloro-**, reaction with Na_2S, 3002[1]
———, **3,4-dihydro-**, 2 oxime, 383[2]
———, **4-nitro-**, dioxime peroxide*, 2677[1].
———, **3,3′ - thiobis[4 - chloro-**, and stannic chloride addn compd, 3002[2,7].
1,4 - Naphthoquinone (*α - naphthoquinone*), anil—see *1,4 - Naphthoquinonimine, N-phenyl*.
prepn. of, 190[6].
———, **2-anilino-**, sulfonation of, 2308[6].
———, **2-anilino-3,6,7-tribromo-**, 1804[1].
———, **2,3-dibromo-**, prepn. of, 1803[9].
———, **5,8** (or **5,6**) **- dihydroxy-**. See *Naphthazarin*.
———, **5 - hydroxy-**. See *Juglone*.
———, **2,3,6,7-tetrabromo-**, prepn of, 1803[9].
———, **2,6,7 - tribromo - 3 - hydroxy-**, and $PhNH_2$ salt, 1803[9].
1,4 - Naphthoquinonimine, 2 - anilino-*N*-phenyl-, sulfonation of, 2308[3].
———, **2 hydroxy-*N*-phenyl-**, 191[1].
sulfonation of, 2308[5].
Naphthothiazole,

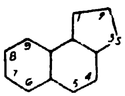




β-

α - Naphthothiazole, 2 - amino-, and tetrabromide, 2858[6].
———, **1 - (2 - naphthylamino)-**, bromo derivs., 195[4].
β - Naphthothiazole, 2 - amino-, and tetrabromide, 2858[5,6].
———, **2 - (1 - naphthylamino) -** , and bromo derivs., 195[2,3,4].

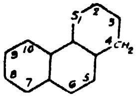
β-Naphthothiophene,

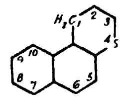


β-

2 - β - Naphthothiophenealdehyde, 1 - hydroxy-, 203[1].

Naphthothiopyran,





4,1-β-

-, **keto-**. See *Naphthothiopyrone*.

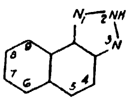
1,4 - α - Naphthothiopyrone, 2,3,7,8,9,10-hexahydro-, isomers, and semicarbazones, 202[3,4].
spectrochemistry of, 204[2].

4,1 - β - Naphthothiopyrone, 2 - bromo-, 202[7].

——, **2,2-dibromo-2,3-dihydro-,** 202[6].

——, **2,3 - dihydro-,** spectrochemistry of, 204[2].

αβ-Naphthotriazole,



——, **4,5 - dimethoxy - 2 - phenyl-,** melting p. 99–100°, 2859[7].

——, **2-s-pseudocumyl-,** 1080[8].

5,6 - αβ - Naphthotriazoledicarboxylic acid, 2-phenyl-, 1081[4].

4,5 - αβ - Naphthotriazolediol, 2 - phenyl-, and esters, 2859[6,7].

4,5 - αβ - Naphthotriazoledione, 7 - amino-2-(p-aminophenyl)-, 2859[9].

——, **7 - nitro - 2 - (p - nitrophenyl)-,** 2859[8].

——, **2-phenyl-,** and derivs., 2859[4,7], 2860[1].

αβ - Naphthotriazole - 5 - sulfonic acid, 2-phenyl-(?), sodium salt, 195[7].

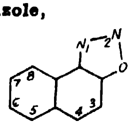
4 (or 5) - αβ - Naphthotriazolol, 7 - nitro-2 - (p - nitrophenyl) - 5 (or 4) - phenylazo-, 2859[9].

1,3,2-β-Naphthoxazine,

1,3,2-β-

1,3,2 - β - Naphthoxazine - 2,4(3) - dione, 1616[4].

β-Naphthoxdiazole,



3 - β - Naphthoxdiazolecarboxylic acid, 1233[7].

4 - β - Naphthoxdiazolecarboxylic acid, 1233[7].

Naphthoxthin. See *Dibenzophenothioxin*.

2 - Naphthoyl azide, 3-hydroxy-, 1616[5].

1 - Naphthoyl chloride, 2 - hydroxy-, acetate, 1226[5].

——, **3-hydroxy-,** acetate, 1233[4].

2 - Naphthoyl chloride, 3 - carboxyoxy-, ethyl ester, 1616[4].

——, **4-chloro-3-hydroxy-,** 1616[4].

——, **3 (and 6)-methoxy-,** 1616[9], 1617[1].

1,2 - (1′,8′ - Naphthoylene)benzimidazole. See *7-Benzimidazobenzisoquinolinone*.

1,2 - (1′,8′ - Naphthoylene)imidazole. See *7-Imidazobenzisoquinolinone*.

1,2 - (1′,8′ - Naphthoylene) - α - naphthimidazole. See *14 - Naphthimidazobenzisoquinolinone*.

o - Naphthoylene - 2,3 - phenazinoiminazole*, 1805[6].

Naphthylamine, color reaction of, 2300[8].
as fertilizer, 1881[9].

1 - Naphthylamine, prepn. of, 1232[6].
salt of *dl*-α-iodopropionic acid, 2978[2].
spectrum of, 384[9].
system: p-dinitrobenzene—, "thaw"-m.-p. diagram for, 693[9].
systems of, with acids, 1224[7,8,9].

——, *N*, *N*-**diethyl-,** spectrum of, 384[9].

——, *N*, *N*-**dimethyl-,** spectrum of, 384[9].

——, *N*-**(2,6-dinitro-m-tolyl)-,** 3448[4].

——, *N* - **(α,α - diphenyl - o - tolyl) - 2,4-dinitro-,** 1801[9].

——, **2,4(?) - dithiocyano-,** 1603[7].

——, *N*-**ethyl-,** spectrum of, 384[9].

——, *N*-**methyl-,** spectrum of, 384[9].

——, **4 - (p - nitrophenylazo) - 8 - phenyl-,** 1401[6].

——, **5,6,7,8-tetrahydro-,** 1627[9].

——, **4-thiocyano-,** 1603[8].

2-Naphthylamine, heat of combustion of, 326[9].
systems of, with acids, 1224[7,8,9].
systems with α-naphthol, 1,3,5 - trinitrobenzene, nitrosodimethylaniline or p-dinitrobenzene, "thaw"-m.-p. diagrams for, 693[8,9].

——, **(5 - isopropyl - 3 - s - triazolylazo)-,** 3294[1].

——, *N*-**phenyl-,** mercuri compd. of, 1401[6].

——, **(5 - propyl - 3 - s - triazolylazo)-,** 3294[2].

——, **5,6,7,8-tetrahydro-,** 1627[9].
1-thiocyano-, 1603[8].

1,4 - Naphthylenediamine, *N*, *N′* - **diacetyl-5-phenyl-,** 1401[6].

——, *N*, *N′*-**dibenzoyl-†,** 410[6].

——, **5-phenyl-,** 1401[6].

1,8 - Naphthylenediamine, sulfonation of, 1074[6].

Naphthyl group, affinitive capacity of, 3684[3].

2-Naphthyl mercaptan, reaction with alkyl nitrites, 2976[6].

1 (and 2) - Naphthylsulfuric acid, potassium salt, 1796[4].

Napier grass. See *Pennisetum typhoidium*.

Narceine, dissocn. const. for, 2108[5].
effect on double refraction of Al_2O_3 fibers, 1350[8].
effect on small intestine, 2707[3].
indicator for, 1493[9].
melting p. and H_2O of crystn. of, 2725[9].
picrate of, 94[3].
prepn. of, 1795[6].

Narcophine, effect on digestion of meat in dogs, 1270[7].

Narcosis. (See also *Anesthesia*.)

antagonism of stimulating substances for, 3513^{9}.
blood alterations in, 3743^{8}.
blood in, ratio Ca:Mg in, 2368^{1}.
book: Zur Theorie der Narkose. Untersuchungen über die Verteilung der indifferenten Narkotika in dem tierischen Organismus, 1281^{8}.
distribution coeff. of hypnotics between water and org. solvents, 2540^{8}.
by ethyl ether, death from, 2702^{5}.
lipoid theory of, 2367^{9}.
by morphine derivs., effect of radicals on, 2022^{2}.
Narcotics, absorption and distribution of indiff., in cold-bloobed animals, 1864^{7}.
aliphatic alcs. as, 1851^{9}.
book: Zur Theorie der Narkose. Untersuchungen über die Verteilung der indifferenten Narkotika in dem tierischen Organismus, 1281^{8}.
effect on blood serum, 1115^{6}.
on glucose adsorption of blood corpuscles, 1471^{3}.
on intestine, 3514^{1}.
on muscles of leech and of intestine, 3511^{1}.
on sugar metabolism in liver, 1867^{8}
on surface tension, 2367^{1}.
halohydrocarbons as, 455^{4}.
propylene as, 1869^{3}.
Narcotine. (See also *Opium alkaloids*)
dissocn. const. for, 2108^{5}.
effect on small intestine, 2707^{3}.
indicator for, 1494^{1}.
picrate of, 94^{3}.
spectrum of, 1178^{2}.
Nasturtium, diastatic activity of, 1297^{3}.
Natica clausa, bones of, mineral compn. of, 2210^{1}.
National independence, science and, 3322^{3}
Natrolite, from Mt. Tzkhra-Tzkharo, 884^{8}.
Natronalaskite, 2474^{2}.
Naucoris cimicoides, respiration of, 2544^{6}.
Navy bean. See *Beans*.
Neat's-foot oil, 302^{7}, 998^{9}.
Necrologies. See *Obituaries*.
Necrosis, from radium, 3638^{1}.
Necturus, kidney tubule of, site of reabsorption in, 2542^{8}.
Neem oil, 2389^{7}.
Negatives. See *Photography*.
Negri bodies, coloration of, 612^{7}.
Nemathelminthes, Röntgen-ray effect on, 1443^{6}.
Nematic substances, diamagnetism of, 1024^{3}.
Neoarsphenamine. (See also *Arsphenamine*.)
in amebic dysentery treatment, 1275^{1}.
analysis of, 1853^{8}.
color reaction of, 2301^{1}.
detection of, 3143^{5}.
detection of inferior, 1686^{4}.
differentiating from sulfarsphenamine, 1885^{9}.
effect on *Entameba dysenteriae*, 2541^{9}.
effect on *Entameba gingivalis*, 3748^{4}.
excretion and fixation of therapeutic, 1278^{2}.
manuf. of, P 480^{1}.
reaction with O_2, 2993^{4}.
reagent for, strontiuran as, 261^{7,9}.
strontiuran as solvent and reagent for, 261^{7}, 646^{4}.
toxicity and reactions caused by, 1858^{3}.
tropical ulcer treatment with $CuSO_4$ and, 1274^{6}.
Neocinchophen (*tolysin*), hydrohalides, P 424^{7}.
Neocyanine, as sensitizer for infra-red, 1764^{4}.
Neodymium, adsorption of H by, 1158^{8}.
ionization potential of, 2945^{8}.
Röntgen-ray energy level of, detn. of outer, 2787^{6}.
spectrum of, 2791^{6}, 2943^{9}, 3641^{9}, 3386^{6}.
Neodymium, analysis, detn., 27^{2}.
Neodymium borates, $Nd_2B_2O_6$, $Nd_2B_4O_9$ and $Nd_2B_6O_{12}$, 3658^{1,2}.
Neodymium chromate, 879^{4}.
precipitation of, H-ion concn and, 1163^{1}.
Neodymium cobalt nitrate, soly. of, 3258^{1}.
Neodymium cuprosulfite, 558^{7}.
Neodymium cuprothiosulfate, 558^{8}.
Neodymium hydroxide, precipitation of, 27^{2}.
reaction with "aluminon," 2963^{6}.
Neodymium lactate, prepn. and properties of, 2797^{8}.
Neodymium magnesium nitrate, soly. of, 3258^{1}.
Neodymium nickel nitrate, soly. of, 3258^{1}.
Neodymium nitrate, magnetic susceptibility of, 2112^{4}.
Neodymium oxide, crystal structure of Nd_2O_3, 3597^{7}.
Neodymium phosphate, 3658^{2}.
Neodymium sodium sulfates, 879^{3}.
Neodymium sulfate, system: Na_2SO_4–H_2O–, 879^{3}.
system: Tl_2SO_4–H_2O–, 346^{5}.
Neodymium thallium sulfate, 346^{5}.
Neodymium uranyl sulfite, 558^{6}.
Neodymium zinc nitrate, soly. of, 3258^{1}.
Neoglucose, 3723^{9}.
detn. in body fluids, 2342^{6}.
in fermentation of glucose, 2337^{6}, 3724^{8}.
from glucose-insulin-muscle solns., 3725^{4}.
in liver, 944^{7}.
Neolactobionic acid, 3159^{6}.
Neolactose, constitution of, 3159^{5}.
and α- and β-octaacetates, 2483^{9}, 2484^{1,2}.

Nichrome. See *Chromium alloys* or *Nickel alloys.*

Nickel, adsorption of ethylene and H by, 1545².
affinity for S, 3420⁴.
anodes of, electrodeposition of, P 2462⁶.
atomic magnet of, structure of, 2611⁶, 3378⁵.
atomic nucleus of, reflection of α-particles from, 9⁴.
books: Elektritscheskoe osashdenie metallow, 553⁴; Cinc, estaño, and cobalto, 1974⁹.
brass plated with, effect on photographic fixing baths, 1037⁸.
as catalyst in decompn. of acid amides, 1054⁹.
for decompn. of $PhNHNH_2$ and its derivs., 598⁴.
for hydrogenation, 3452², 3625².
for hydrogenation of CO, 2814⁹.
for hydrogenation of C_2H_4, 1018².
in hydrogenation of unsatd. acids, 834¹.
in methane formation from CO and H, 860⁹, 861¹.
for reduction of α-cyanocamphor, P 2167⁷.
in reduction of nitriles, 1216¹·³·⁶.
for reduction of rubber, 3165⁵.

in synthesis of water, 5^{4}, 691^{9}, 1348^{4}.
catalysts of, compn. of reduced, 138^{4}.
effect of acid and alk. substances on, 2590^{4}.
fat from, 2758^{6}.
heat of adsorption of H for, 2442^{3}.
promoter action of thoria on, 325^{5}.
toxicity of thiophene for, 860^{1}.
x-ray crystallometry of, 131^{5}.
catalytic, P 515^{8}.
catalytic action on union of CO and O, 2443^{1}.
catalytic, crit. potentials of H in presence of, 1548^{9}.
catalytic febrile biperiodic reactions, 1019^{8}.
cementation with B, 3429^{2}.
cementation with Sn, 2812^{1}.
coating Al with, 2461^{2}
coating ferrous metals with, to prevent corrosion, P 1587^{6}.
coatings on, spectrometric measurement of, 2135^{4}.
coating steel, etc., with, P 575^{4}.
in copper, 3419^{9}.
in copper-refining electrolytes, changes in concn. of, 551^{9}.
as corrosion resistant, for org. chemicals and foodstuffs, 2814^{1}.
crit. temp. of, magnetization and, 2781^{8}.
crystal form and consts. of, 2601^{3}.
crystal structure of, 2601^{3}, 3105^{1}.
current-e. m. f. curves for, 141^{8}
dental plates, electrolytic production of, P 2126^{9}.
displacement from solns. of org. salts and cyanide compds. by H under pressure, 2959^{9}.
displacement of perlite point by, 1973^{9}.
effect on carbide soly. in ferrite, 3436^{1}.
on cast Fe, 3426^{3}.
on corrosion of Fe and steel, 573^{4}.
on insulin action, 3041^{6}.
on welding of Cr alloys, 3430^{6}.
elec. resistance of, variation with temp., 539^{1}.
elec. resistance to 1.3° K., 3629^{8}.
electrode capacity in $NiSO_4$, 1023^{4}.
electrodeposited, orientations of crystals in, 131^{5}.
electrodeposition of, 874^{1}, P 876^{2}, 1034^{9}, P 1958^{1}, P 2126^{6}.
on Al, 1180^{9}.
cell for, P 875^{9}.
electrolytic, x-ray investigation of, 874^{1}.
electron emission from, crit. potentials in secondary, 7^{2}.
electroplating baths, 3648^{5}.
electroplating baths, H-ion control of, 713^{5}.
electroplating with, P 151^{8}, P 342^{7}, 552^{4}, $1565^{4,6}$, P 1958^{6}, 2461^{6}.
app. for, 3395^{8}.
of castings, defective phenomena in, 552^{3}.
defects in, 552^{9}.
of flexible metals, P 342^{1}.
H-ion concn. in, 1168^{8}.
measuring polarization and resistivity in, 1359^{3}.
of steel, 150^{8}.
electroplating with Cu and, P 554^{6}.
equil.: $NiO + H_2 \rightleftarrows Ni + H_2O$, 1937^{8}.
films, Hall effect and sp. resistance in, 2610^{8}.
film (transparent) of, 525^{9}.
fluorescent energy transformation coeff. of, 2943^{2}.
foils, velocity of cathode rays in, 1758^{7}.
in foods and excreta, 2508^{3}.
galvanoplastic plating with, 3395^{9}.
hydrogen absorption by, 1018^{3}.
hydrogen diffusion through, 2926^{3}.
hydrogen diffusion through cathodes of, 2446^{5}.
idiosyncrasy to, anaphylaxis and, 3034^{9}.
industry in Germany, 565^{6}.
industry in 1925, 3674^{3}.
-iron equil. diagrams, 2274^{2}.
isomorphism with Hg, 1963^{7}.
lattice const. of, 2768^{1}.
magnetic transformations of, 3426^{9}.
magnetic transverse effects in, 2612^{3}.
magnetization and magnetocaloric phenomena of, 1941^{2}.
magnetostriction in, $3125^{1,2}$.
mats, Fe removal from, 2808^{2}.
melting, P 36^{6}.
melting, refractories for, 3068^{3}.
membranes for ultrafiltration, prepn. of, 3113^{3}.
meteoric iron contg., relation to artificial ferro-nickels, 727^{9}.
molecules, elec. symmetry of, 1170^{9}, 3595^{9}.
in pancreas, 2875^{9}.
passivity of, 165^{7}, 327^{6}.
permeability to H, effect of pressure on, 1544^{6}.
precipitation in non-aq. solns., 3619^{6}.
properties of, effect of cold working on, 2135^{2}.
pyrophoric, H and CO_2 absorption by, 3255^{6}.
reduction from Ni formate, 2960^{1}.
removal from amalgams, 3376^{8}.
resistance to corrosion or high temps., 2814^{1}.
resources of U. S. in 1924, 3415^{4}.
review of mining and trade information, 888^{1}.
Röntgen-ray absorption limits of, 1176^{1}.
Röntgen rays (soft) from, 700^{8}, 705^{7}, 1354^{6}.
secondary emission from, due to slow positive-ion bombardment, 700^{7}.
sepn. from Co, P 167^{6}, P 3271^{1}.
sepn. from Cu, P 1382^{6}.
solid soln. with Fe, tempering color in, 33^{5}.
specific heat of, 3631^{6}.
spectrum of, 14^{1}, 18^{4}, 330^{8}, 336^{7}, 337^{1}, 1354^{9}, 1951^{4}, 2948^{7}, 3636^{3}, 3386^{6}.
spectrum of, in after-glow of discharge through mixt. of N and A, 1950^{8}.
spectrum of exploded wire of, 1950^{6}.
spectrum (Röntgen) of, effect of Co on, 2617^{8}.
in steels (high-speed), 2139^{9}.
system: Al–Mo–, 2970^{7}.
system: Bi–Cu–, 3410^{8}.
system: C–Fe–, 570^{8}.
system: Fe–, 570^{7}.
system: Mo–Sn–, 2970^{6}.
temp. coeff. of, increasing, 1566^{4}.
Thomson effect in, effect of strain on, 853^{2}.
Nickel, analysis, detection, 2325^{6}, 2962^{6}.

splash head for, 1967[5].
Nitrogen chloride, (NCl_3), in bleaching of flour, P 248[2].
manuf. of, P 3785[3].
Nitrogen compounds, catalytic activity of, 2443[6].
in cauliflower bud, 3715[8].
in coal, 1312[6].
cyclic, new series, 1085[2].
decompn. in higher regions of the atmosphere, 545[6].
detn. in tobacco, 968[4].
effect on beer stability, 3771[2].
effect on decompn. of cellulose in soil, 257[7].
in fertilizer manuf., 3062[5].
in fish meal, 461[9].
in infusoria cultures, 3317[1].
ionization potential for, 2787[6]
of molasses residues of fermented beet sugar, 3207[6].
org., aldehyde synthesis in, 2857[3].
nitro and *pseudo*-, valency problems in, 1550[7].
in oak, autumnal migration of, 2692[7].
oxidation to nitrate at low temps., 1362[9].
in petroleum, 106[9].
relation between m. p. and configuration, 576[6].
in saliva, 948[5].
silicon-, with bridging Si, 1185[7].
in soil, transformation and relation to nitrification, 2382[6].
spectrochemistry of, 3385[7].
stereochemistry of, 1811[2], 3168[2].
in sugar beet molasses, 1533[8].
synthesis of natural, 2346[5].
Nitrogen fixation. (See also *Ammonia manufacture; Bacillus radicicola; Bacteria; Calcium cyanamide.*)
from air, 1132[5].
by alfalfa, 2218[3].
in alkali metal cyanide manuf., P 3214[1]
app. for, 3333[9].
by *Azotobacter agile*, 3478[8].
by barium carbonate and C, 1761[2], 3539[9].
book: The Atmospheric N Industry, 3541[6].
catalyzers for, P 2395[6,7].
cyanide process, 1132[6].
electricity in, 2620[9].
gases from, concg., P 3541[7]
in high-tension arc, 2393[7].
in manuf. of NH_3 and HNO_3 from NaCN, 3062[8].
nitric acid manuf. by, 3397[5].
nitric oxide formation at high temps., 3333[6].
nitride manuf., P 3784[1]
by non-leguminous plants, 2352[4].
by non-symbiotic organisms, 2553[7].
oxide formation, P 2232[6], P 2395[1], P 3651[6].
oxide formation from Rumanian natural gas, 276[8].
plant at Muscle Shoals, 954[3,4]
with *Pseudomonas radicicola*, 929[3].
radioactivity and, 1484[4]
reviews, 481[2,3], 801[6], 1890[8], 3756[9]
sodium cyanide production from atm. N, Na_2CO_3 and C, 1305[6]
sodium nitrite manuf., 481[2].
by soils, 2382[6].
by soils, detn. of, 2889[8]
in soils in the Punjab, 86[1]
in soils of Bombay Deccan, 1482[9]
by soils of Kansas, 1878[9].
by *Spirillum lipoferrum*, 219[4].
in Wash. (state), 1132[5]
by yeast as function of H ion concn., 613[8].
Nitrogenization, of steel, 2138[1]
Nitrogen oxides, absorption in water, P 1306[7].
analysis of colored, 1013[1].
analysis of gas mixts. contg., 3661[2].
concn. of, P 648[3], P 3541[7].
as elec. resistors with large temp. coeffs., 1566[6].
intoxication by, 2175[9]
manuf. of, P 97[2]
poisoning by, 2214[9].
poisoning, treatment of, 2215[1].
reaction with 1,2-dihydronaphthalene, 382[9].
scrubber or absorber for, from nitric acid manuf., P 1306[7].
valency problems in, 1550[7].
N_2O, anesthesia from mixt. of C_2H_2, O and, 71[1].
anesthesia from O and, 71[2].
as anesthetic, 1870[6]
crit. potential of, 2618[3].
decompn. by heat, 547[8], 3372[9].
decompn. by Pt in closed vessels, 2776[6].
decompn. of, energy distribution in, 149[8].
effect on muscular activity of gastrointestinal tract, 1869[8].
elec. cond. and oxidation potential of solns. of, 2468[4].
luminescence of solidified, 2284[1].
mol. diam. of, 2101[5].
reaction with H on Au surface, 3260[9].
reaction with H, photosensitivity and mechanism of, 546[3].

reduction of, 2468^{8}.
reduction of, by H, Rh as catalyst in, 5^{9}.
spectrum of, 1951^{3}.
structure of, 1734^{4}.
synthesis of, 3143^{2}.
NO, bubbles in water, surface phenomena of, 2605^{6}.
catalytic decompn. at surface of Pt, 3375^{2}.
compression and decompn. of, 685^{5}, 1542^{1}.
cryoscopic measurements of solns. in liquids, 2267^{2}.
decompn. by heat, 3372^{9}.
energy levels of mol. of, 2614^{4}.
ionization potential of, 2118^{7}.
reaction velocity with O, effect of moisture and paraffin surface on, 3373^{2}.
reaction with Cl, speed in a magnetic field, 3621^{1}.
reaction with H, 2440^{8}.
reaction with SO_2, 2728^{1}.
reduction by H, Rh as catalyst in, 5^{9}.
soly. in C_6H_6, $CHBr_3$ and $PhNO_2$, 853^{8}.
spectrum of, 1951^{3}.
systems: CS_2–N–, and CS_2–CO_2–, 1549^{5}.
NO_2 (N_2O_4), as diazotizing agent, 372^{1}.
manuf. of, P 1695^{6}.
reaction with anthracene derivs., 192^{5}.
reaction with Hg, acceleration by light, 550^{7}
reaction with olefins, 1049^{9}.
reaction with rubber, 1228^{3}.
reaction with Ph_3N, 2834^{7}.
spectrum of, 544^{1}, 1951^{3}.
N_2O_5, decompn of, 1936^{9}.
decompn. of, by heat, at low pressures, 536^{8}.
decompn. of, effect of infra-red radiation on, 1180^{1}.
decompn. of, infra-red radiation and, 1179^{9}.
decompn. of, radiation theory of, 548^{1}.
spectrum of, 544^{1}.
Nitrogen oxychloride. See *Nitrosyl chloride*.
Nitroglycerin, absorption from peritoneal cavity, 1868^{6}.
detn. in drugs, 3211^{4}.
effect on blood pressure, 3043^{7}.
effect on circulation in lungs, 1851^{7}.
manuf. of, prevention of after-sepn. in, 1141^{3}.
powders, reaction to Angeli test and relation between this reaction and their stability on being heated, 1523^{9}.
Nitro group, effect on affinitive capacity of aromatic radicals, 3684^{8}.
effect on benzylation velocity of amines, 174^{7}.
on formation of glucosides by polynitrophenols and nitronaphthols, 2487^{1}.
on reactivity of benzene substituents, 174^{2}.
on reactivity of Br, 1066^{2}.
on reactivity of the CHO group, 402^{6}.
on resinification, 749^{9}.
Nitrohydroxylamic acid, from oxidation of NH_3, 2625^{9}.
Nitroimino group, detn. of, 763^{1}.
Nitrolim. See *Calcium cyanamide*.
Nitrometers, Schiff's, 1539^{6}.
Nitrone (CH_2:NH:O).
——, α - [β - (*N* - **hydroxyanilino)isobutyl]-α - methyl - *N* - phenyl-(?), and derivs.**, 2837^{4,5}.
——, α - **phenyl** - *N* - (*p* - **phenylphenyl)-**, 2992^{7}.
——, *N*,α,α-**triphenyl-**, 421^{4}.
Nitrones, di-, prepn. of, 1067^{5}.
o (and *p*) - **Nitrophenylsulfuric acid**, potassium salts, 1796^{1,2}.
Nitrosates, of olefins, 1049^{9}.
Nitrosation, of phenols, 178^{4}, 3449^{2}.
Nitrosic acid, as depolarizer in action of metals on HNO_3, 3619^{7}.
Nitrosiselenic acid, 1573^{2}.
Nitroso compounds, bactericidal action of, 2689^{3}.
reactions with alkaloids, 3404^{4}.
reaction with unsatd. compds., 1067^{5}.
Nitrosoferropentacyanides, 1769^{6}.
Nitrostarch, drying of, P 1525^{3}.
Nitrosulfonic acid. See "mixed" under *Acids*
Nitrosyl chloride, chemistry of, 3659^{2}.
flour treatment with, P 2213^{8}.
reactions of, 360^{2}.
reaction with 1,2 - dihydronaphthalene, 382^{9}.
reaction with mercaptans, 2975^{8}.
Nitrosyl mercaptides, 2975^{8}, 2976^{1}.
Nitrosylsulfuric acid, constitution and properties of, 3142^{8}.
detn. in sulfuric acid solns., 3662^{5}.
Nitrosylsulfuric anhydride, from nitrosylsulfuric acid, 3142^{9}.
Nitrous acid, at anode, 3629^{4}.
detection of, 158^{6}, 350^{6}.
detn. of, 3661^{4}.
detn. of, chloramine-T as reagent for, 3660^{8}.
reaction with amides and amino compds., 370^{3}.
with *p* - iodo - *N*, *N* - dimethylaniline, 3287^{9}.
with $SnCl_2$, 3661^{4}.
with SO_2 and with SO_2 in presence of H_2SO_4, 2728^{1}.
stability in presence of H_2SO_4 and reaction with SO_2, 2728^{1}.
Nitrous ether. See *Ethyl nitrite*.
Nitrous gases. See *Nitrogen oxides*.
Nobili's rings, colors shown by, 1024^{9}.

alkali effect on, 1297[9].
catalase activity during germination, 2520[4].
compn. of, effect of irrigation on, 1283[7].
cooked, preventing rancidity of, P 2377[6].
decompn. of, 3056[5].
diet, kidney disturbances from, 936[9].
digestibility trials with poultry, 3520[5].
as feed for horses, 3755[3].
fertilizer expts. on, 962[3].
fertilizer for, $CaCl_2$ as, 3057[9].
fertilizer for, nitrate N as, 2221[8].
fertilizing, effect of method on yield, 1488[7].
germination of, effect of $KClO_3$ on, 3022[4].
hull detn. in ground, 2212[9].
leaves of, N in, 3484[3].
Liesegang ring formation in zone pptns. in root hairs of germinating, 2107[3].
manganese fertilizer for, 1485[6].
moisture detn. in, 2213[8].
nitrogen availability studies on, harvested at different stages of growth, 2040[2].
nutritive value of, 1835[9].
protein detn. in, 2029[5].
protein of, protoctin from, 3703[3].
Puccinia coronata on, control of, 259[5].
seedlings, effect of H_2SO_4 on, 1648[1].
silage from peas and, compn. of, 2377[4].
as silage in Central Alberto, 1475[4].
silage of green, 3755[3].
smut, control of, 793[4], 3329[1].
stimulation by chemical ordinarily toxic, 2040[8].
straw, effect on soil fertility, 3326[4].
tryptophan in, 1252[8].
Obelia, elec. polarity of, and its reversible inhibition by cyanide, Et_2O and $CHCl_3$, 3467[4].
Obesity, blood in, fat-cholesterol quants. in, 1846[6].
cause of hypophyseal and cerebral forms of, 3029[4].
thyroid gland therapy in, 2368[8].

industry during 1925, 998^{2}.
industry in America, 2754^{1}.
industry in Palestine, 2422^{7}.
insulating, purification of, 2035^{7}.
intravenous injections of, 2874^{9}.
iodine no detn.—see *Iodine number*.
iodine no. in examn of, 302^{6}.
of jasmine, 2560^{5}, 3780^{5}.
of *Johannesia princeps*, 2083^{5}.
of *Juniperus excelsa*, 2717^{9}.
juniper, water in, 798^{2}.
kanaga, 2017^{2}.
kapok, compn. of, 2590^{1}.
katukar, poisoning by, 2022^{7}.
"Kuromoji," acids of oleic series in, 2420^{8}.
of "kurrajong" seeds, 2759^{3}.
lactone no. of, 3828^{1}.
of *Laurus nobilis*, 1886^{8}, 2717^{8}, 2718^{7,8}.

of *Lavandula spica*, water in, 798^1.
of lavender, 478^4, $2718^{3,8}$, 2894^1.
lavender, water in, 798^1.
for leather, 3834^2.
for leather manuf., analysis of, 308^6.
of *Ledum groenlandicum*, 3778^8.
lemon, 646^3.
  deterioration of, 1301^2.
  extn. of, 797^1.
  as fungicide, 3021^5.
  pharmacol. action of EtOH soln. of terpeneless, 451^3.
  in Sicily and Calabria in 1925–1926, 2046^7.
  water in, 798^2.
lemongrass, 2047^1.
lemongrass, water in, 798^2
of lemon leaves and branches, 2718^4, 2719^3.
leprosy therapy with, not in chaulmoogra group, 1275^3.
licury, oleic acid content of fatty acids in foots of, 998^3.
lime, adulteration of, 478^5, 2388^5.
lime-pip, 2759^5.
linseed— see *Linseed oil*.
of *Liquidambar orientalis*, 2719^1.
of *Liquidambar styraciflua*, 2718^9.
liver, boiler for manuf. of, P 675^2.
liver, effect on photographic plates, 3719^5.
from liver of *Centrophorus lusitanicus*, fatty acids of, 2421^2.
lubricating —see *Lubricants*.
lubricating and allied, 3233^4
luminescence of, subjected to gamma radiation, 3381^8.
of *Lupinus luteus* flowers, 3780^5.
of Macadamia nut, 2084^3.
of mahua from Punjab, 1483^6.
of mandarin peel, 2718^8.
of mandarins ("Unschiu"), 2718^4.
manuf. at Karlshamn, 3092^3.
of Manuka, 645^8, 2047^8.
from marine animals, 1336^8.
marine, emulsions of, 675^1.
marine, treating, P 2257^3.
of marjoram, detn. of carvacrol in, 261^5.
from Massoi bark, 797^5.
Medang losoh, 797^7, 2893^9.
of *Melaleuca linarifolia* and *M. alternifolia*, 2720^9.
of *Melaleuca uncinata*, 2720^4.
of *Melissa officinalis*, $2718^{2,9}$.
of *Mercurialis* species, 1258^2.
microchem. examn of, 478^3.
mineral—see *Petroleum*.
mint and peppermint, 2390^1.
mint, of Japan, 645^9.
  of *Mentha arvensis*, effect of climatic conditions on yield and quality of, 1691^7.
  of *Mentha citrata*, 93^6.
  of *Mentha mirennae*, 1887^5.
  of *Mentha pulegium*, 2225^4.
  of *Mentha pulegium*, *M. crispa* and *M. piperita*, 2719^1.
  of *Mentha sativa f. arvensis*, 2718^9.
  of *Mentha silvestris*, 2717^8.
  water in, 798^2.
mixing with H_2SO_4, app. for, P 1340^8.
mowrah seed, 2083^7.
from *Murraya koenigii*, *M. exotica* and *M. exotica* var. *ovatifolata*, 2720^5.
mustard—see also "allyl ester" under *Isothiocyanic acid*.
mustard, effect of chem. constitution on odor of, 1088^4.
  as fungicide, 3021^5.
  origin, compn and uses of, 2389^7.
  of Punjab, 1483^6.
mutton-bird, vitamin A content of, 3754^9.
of *Myrica asplenifolia*, 2896^3.
in *Myrrhis odorata*, 795^8.
neat's foot, prepn. and properties of sulfonated, 302^7, 998^9.
Neem, origin, compn. and uses of, 2389^7.
of *Nepeta catria*, 2718^2.
nepetella, 1690^2.
nutritive values and physiol. effects of, 776^3.
of Ochna pulchra berries, 1724^2.
oleo, digestibility of, 2006^3.
oleo, vitamin A in, 2356^5.
olive— see *Olive oil*
orange-blossom (Travancore wild), 1494^2.
orange, deterioration of, 1301^2.
orange, from Calif., 2387^6.
of *Origanum Maru*, 797^6.
of *Origanum virens*, 2225^4.
oxidation and polymerization of, 673^2.
oxidation of, P 515^7.
oxidizing, satg. fibrous substances with, P 3514^7.
oxidizing siccative, P 1913^8, P 3580^4.
ox-liver, unsatd. acids in, 833^3.
oxygen exclusion from oxidizable solns. with, 3109^9.
for paints, properties of, 1529^6.
in paints, varnishes, enamels and lacquers, bulking values of, 1912^3.
palm, 1331^6.
  detn. in butter, 77^2.
  detn. in fruits, 3582^8.
  extn. of, P 3584^7.
  extn. press for, 3582^5.
  in French West Africa, 515^1.
  from Malaya, 2083^8.
  mech. production of, 3243^7.
palmarosa, 478^5.
palmarosa, water in, 798^1.
palm-kernel, consts. of, 2989^5.
  detection in cacao butter, 118^9.
  detn. in margarine, 1873^9.
  oleic acid content of fatty acids in foots of, 998^3.
  in soaps, 302^9.
patchouli, 2047^2, 3330^2.
peanut—see *Peanut oil*
peppermint, 92^9, 2226^8, 2390^2, 2721^6.
  aldehydes of, 1301^6.
  deterioration of, 1301^2.
  detn. in spirit of peppermint, 3779^1.
  detn. of esters and menthol in, 1688^6.
  as fungicide, 3021^5.
  Japanese, 2226^4.
  from Japanese strain grown in Wisconsin, 2392^3.
  d-pulegone from, 3212^3.
perilla, 1330^2, 3583^1.
perilla, as linseed oil substitute, 299^4.
of *Perovskia atriplicifolia*, 3774^7.
of petitgrain from S. America, 263^8.
phosphatide removal from, P 3830^4.
of pimento, detn. of eugenol in, 261^5.
in *Pimpinella anisum*, effect of row spacing on content of, 3772^4.
pine, autoxidation products of, 1799^6.
  compn. of, 3243^4.
  distn. of, 2244^9.

extn. from wood, P 3354^{9}.
formation in *Pinus cembra*, 1426^{4}.
as larvicides for screw worm and other flies, 2555^{3}.
of *Pinus excelsa* and *P. pithyusa*, 2718^{6}.
of *Pinus mughus* and *P. pumilio*, pharmacol. action of, 449^{6}.
of *Pinus pumilio*, 407^{7}.
in *Pinus strobus*, formation and transformation of, 1426^{7}.
of *Pinus sylvestris*, 407^{7}.
poisoning by, 2712^{5}
from sulfate pulp manuf., fatty acids in, 3566^{1}.
turpentine oil substitutes from, 816^{8}, P 3242^{9}.
of *Pistacia mutica*, 2718^{2}.
of *Pistacia vera*, 2030^{7}
polymerization during drying and boiling, 3827^{3}.
polymerization of fatty, 2756^{9}, 3355^{1}.
of *Pongamia glabra*, 2895^{2}
poppy-seed, 797^{2}.
analysis of polymerized, 2757^{6}.
biol. control of influence of N and CaO on development of, 2554^{6}.
compn. and I no. of, 3829^{2}.
consts. of, 2989^{5}.
effect on color of, on brightness and tint of white pigments, 831^{2}.
preserving, P 3214^{1}.
pressing or extg., 304^{1}.
production of vegetable, 1146^{3}.
product resembling factice, 2095^{7}.
of *Pseudotsuga douglasii* needles, 2718^{5}, 3059^{9}.
rabbit-foot, org. ammoniate fertilizer from, 2912^{7}.
raisin-seed, 2590^{3}.
raisin-seed, industry, 999^{1}.
rancidity of, 1915^{2}.
rancidity of, and its effects on telegraph perforator tape, 1521^{8}.
rape, compn. and I no. of, 3829^{2}.
consts. of, 2989^{5}.
detection of, 1724^{3}.
origin, compn. and uses of, 2389^{7}.
from Punjab, 1483^{6}.
refraction of, 3091^{4}.
ray-liver, 118^{8}.
ray-liver, unsaponifiable constituents of, 2845^{2}.
refining, 118^{8}, P 675^{1}, P 1000^{1}, P 2591^{8}, 3355^{6}, P 3830^{4}.
centrifuge for, P 128^{4}.
column still for, P 1000^{1}.
revivifying decolorizing clay used in, P 268^{5}.
testing adsorbents for, P 974^{1}.
refining and decolorizing, P 1725^{6}.
refining of vegetable, P 119^{7}.
refining vegetable and mineral, P 2085^{1}.
refractive index of, relation to I no., 2580^{7}.
releasing, in electrolyte of batteries, device for, P 340^{7}.
removal from bilge water, app. for, P 848^{2}.
from boiler feed water, P 1482^{3}.
from Sn plate, P 3443^{4}.
from water, app. for, 1291^{8}, P 1340^{8}, 1540^{5}.
from water, etc., app. for, P 1515^{2}.
rendering surfaces impervious to, P 1508^{8}.
research on, 994^{3}.
-resin mixts. for cable insulation, effect on metals, 2885^{4}.
review for 1923, 513^{7}.
of *Rhus cotinus*, 2717^{9}.
of rice embryo, 3243^{8}.
of roses, manuf. of, 2560^{4}.
rose, standards of Bulgarian, 1687^{9}.
rosewood, water in, 798^{1}.
rosin—see *Rosin oil*.
of *Rosmarinus officinalis*, $2718^{1,4}$.
of *Ruta graveolens*, 2718^{4}.
safflower-seed, 1330^{3}, 1331^{7}.
safflower-seed, from Punjab, 1483^{6}.
of saffron, 797^{8}.
salmon body, vitamin potency of, 2188^{5}.
of *Salvia grandiflora*, 2717^{8}.
from *Salvia sclarea*, 302^{9}, 2718^{2}.
sampler for tank-car shipment, 1331^{4}.
sampling of, bibliography on, 1914^{3}.
sandalwood, from West Australia, 264^{3}.
sandalwood, water in, 798^{1}.
of *Santolina chamaecyparis*, 2718^{2}
of *Santolina glauca*, 2718^{9}.
sardine, compn. and I no. of, 3829^{2}.
formation of iso-unsatd. solid acids during hydrogenation of, 834^{5}.
hydrogenation of Me esters of unsatd. acids of, 834^{1}.
of sarson from Punjab, 1483^{6}.
"satn.," for alc. and sugar industries, compn. of, 2045^{6}.
of *Satureja eugenioides*, 3211^{9}.
of *Satureja hortensis*, 2719^{2}.
savonade in manuf. of, for boring, drawing and spinning, etc., 304^{3}.
of savory, 2226^{9}.
seal, antirachitic value of, 1654^{7}
sedimentation and sepn. of water and, app. for, P 2433^{9}.
from seeds by continuous press, quality of, 514^{8}.
of seeds, fatty acid formation in, effect of climatic factors on, 2349^{6}.
sepg. saponifiable, from mineral oils, 514^{1}
sepn. from heavier liquids, app. for, P 3592^{9}.
sepn. from whale speck, flesh, etc., P 675^{1}.
sesame, colloid prepn. in, 1011^{2}.
consts. of, 2989^{5}.
modification of reaction by treatment with adsorbents, 786^{7}.
from Punjab, 1483^{6}.
shark, 80^{6}.
shark, compn. of, effect of "blowing" on, 2758^{2}.
shark liver, 118^{8}.
fatty acids in, 2912^{6}.
squalene and spinacene in, 576^{6}.
unsaponifiable constituents of, 2845^{2}.
of *Sideritis taurica*, 2718^{2}.
of *Siler trilobum*, 2717^{8}.
in soap industry, interchangeability with fats, 2759^{7}.
solvent for, methylene chloride as, P 3757^{6}.
soy-bean—see *Soy-bean oil*.
sperm, 1723^{8}.
compn. of, effect of "blowing" on, 2758^{2}.
constitution of unsatd. acid from, 2482^{2}.
viscosity at higher temps., 3255^{4}.
spreading velocity of, on water, 3604^{7}.
spruce, compn. of, 3243^{4}.
stabilizing agents for, 1146^{3}.
of star anise, 2226^{7}, 3535^{6}.

star-anise, distinguishing from anise oil, 3208^{7}.
from sturgeon liver, 2420^{9}.
sulfonated, 2589^{9}.
analysis of, 123^{1}.
constitution of, 303^{7}.
detn. of acid and lime stability of, 514^{7}.
stability of, 3828^{4}.
sunflower-seed, 1096^{2}, 1914^{8}.
adulteration with Manchurian bean oil, detection of, 999^{3}.
compn. and I no. of, 3829^{2}.
consts. of, 2989^{5}.
oxidation and polymerization of, 673^{8}.
refraction of, 3091^{1}.
soap, polymerization of, 3092^{5}.
of *Tagetes glandulifera*, 407^{2}.
tall, 514^{6}.
tall, from sulfate pulp manuf., 2072^{7}.
tanning with, P 3360^{4}.
tar—see *Tar oils*.
of taramira seed from Punjab, 1483^{6}.
testing methods for fatty, 833^{1}.
of *Teucrium polium* and *T. chamaedris*, 2718^{2}.
textile, 2251^{8}.
textile, detection of methylhexalin in, 827^{2}.
in textile industry, accidents from, 3351^{9}, 3352^{1}.
in textile processes, 3819^{9}.
thiocyanogen value of, 3243^{3}.
of *Thuja*, 2561^{4}, 3775^{1}.
of *Thuja gigantea*, 2718^{8}.
of *Thuja occidentalis*, 2718^{1}.
of *Thuja occidentalis* and *T. orientalis*, 2718^{5}.
thyme, 1690^{3}.
of thyme, detn. of thymol in, 261^{5}.
of *Thymus serpillum*, 2717^{7}, 2718^{9}.
of *Thymus vulgaris*, 2718^{3}, 2719^{2}.
of tiger globe fish liver, 2420^{9}.
tjempaka, 2047^{2}.
of tobacco, 967^{1}.
of tobacco, detn. of, 968^{4}.
of toria, from Punjab, 1483^{6}.
transformer—see *Petroleum*.
transil, effect of moisture and air content on, 21^{2}.
treating, compn for, P 3563^{5}.
treatment of cotton and other fibers with, P 297^{2}.
treatment with steam or gas, app. for, P 2085^{2}.
"Tsuzu," acids of oleic series in, 2420^{3}.
tuberose, 1690^{1}.
tung—see "wood" below.
tunny, in paint industry, 512^{1}.
Turkey-red—see *Turkey-red oil*.
of turmeric, consts. of, 3774^{5}.
turpentine—see *Turpentine oil*.
from unripe fallen mandarins, 2897^{7}.
unsaponifiable, detection in fats, surface tension in, 3091^{4}.
unsaponifiable matter of, biol. significance of, 2506^{8}.
of *Valeriana officinalis*, 2719^{2}.
vegetable and fruit, effect on fertility and lactation, 3025^{9}.
vegetable, as internal-combustion fuels, 1898^{8}.
vegetable, review for 1925, 955^{4}.
vetiver, 646^{1}, 2047^{3}, 3330^{1}.
of violet leaves, 3780^{4}.
viscometer for, 1543^{8}, P 3364^{6}.
vitamin A in, color reactions for, 1096^{6}.
vulcanized fatty, molded articles from, 3093^{1}.
vulcanizing, as varnishes, P 513^{3}.
walnut, compn. and I no. of, 3829^{2}.
water detn. in, 659^{7}, 1914^{1}.
water detn. in, app. for, 2433^{5}.
whale, compn. and I no. of, 3829^{2}.
compn. of, effect of "blowing" on, 2758^{2}.
glycerides of hardened, 303^{7}.
wheat, 1425^{1}.
wheat, lactation-promoting factor in unsaponifiable matter from, 3026^{2}.
wild-duck, 2421^{4}.
wintergreen—see *Wintergreen oil*.
wood, 117^{3}, 671^{6}, 1144^{8}, 1912^{8}, 2910^{9}, 2911^{1}, 3583^{2}.
analysis of polymerized, 2757^{6}.
binding agent from, P 1697^{3}.
catalytic effect of Pb and Mn on drying of, 994^{7}.
compn. and I no. of, 3829^{2}.
consts. of, 1330^{1}, 2989^{5,8}.
crystn. of films of, 2418^{4}.
detection in mixts., 2758^{1}.
eleostearic acid of, 3583^{3}.
eleostearins from, 1329^{9}.
gelatinization and crystn. of, 1530^{2}.
gelatinization of, and wood oil "Erscheinung," 2418^{5}.
in lacquer for exterior wood surfaces, 1912^{7}.
oxidation of, 299^{4}.
oxidation processes in drying of, 2255^{4}.
for paint or varnish, etc., P 1330^{7}.
pharmacol. action and production of β-eleostearin from, 2370^{1}.
plant treatment of, 1912^{6}.
polymerization of, 2756^{9}, 3092^{4}.
requirements of A. S. T. M. for sampling, 1329^{4}.
specifications of A. S. T. M. for, 954^{6}, 1121^{5}.
standard control samples of, 2256^{8}.
and substitutes, 299^{4}.
in wool lubrication, rancidity and oxidation of fatty, 2416^{5}.
of wormseed (American), 2047^{3}.
of *Xanthoxylum bungei*, 2718^{6}.
zinc in animal and vegetable, 3314^{2}.
Oil shale. See *Shales*.
Ointments, ammoniated Hg, 91^{9}.
gum dammar in prepn. of, 320^{9}.
mercurial, extemporaneous prepn. of, 965^{8}.
mercury detn. in, 2559^{8}.
mercury thiocyanogen compd. for use in, P 3780^{9}.
of oleoresins and capsicum, British Pharm. method for prepn. of, 969^{9}.
prepn. of, 3777^{6}.
Okaite, analysis of, 2303^{4}.
Oleander, effect on irritability of frog heart, 452^{7}.
Oleates, adsorption isotherm of solns. of, 3^{1}.
Olefin oxides, P 3015^{7}.
Olefins, in cracked spirit, polymerization of, 1712^{8}.
di-, from alkylvinyl carbinols, 2146^{2,4,5}.
di-, synthesis of, 2145^{9}.
hydration of, P 1996^{9}.
oxides, manuf. of, P 917^{8}.
oxides, rearrangements of, 1610^{7}, 2850^{3}.
prepn. of 1-, 3443^{9}.

reaction with N_2O_4, 1049[9].
synthesis of, 2819[3].
Oleic acid, ammonium salt, hydrodynamic behavior of solns of, 3606[2].
ammonium salt, modulus of shearing of sols of, 3607[3,8].
ammonium salt, viscosity of solns of, 3605[9], 3606[4].
antioxygens for, 2819[9].
bismuth salt, toxicity and urinary elimination of, 3045[3].
and calcium salt, photoactivation by ultraviolet light, 1651[1].
civetone from, 1791[6]
from corn starch, 2310[9]
detn. in drying oils, 3829[1].
effect on acid fastness of *B. tuberculosis*, 3480[3].
in fatty acids in foots of palm-kernel, babassu and licury oil, 998[3]
films of, 855[6].
from ι-hydroxystearic acid, 1591[3]
methyl ester, ozonization of, 1590[1].
natural, 1385[7].
nutritive value and physiol. effect of, 770[4]
oxidation of, 301[6].
examn. with x-ray spectra, 706[9]
products of, 41[8].
oxidation of, and derivs. to dihydroxy stearic acid, 3280[7]
photoactivation by x-rays, 3303[2].
potassium salt, system $KCl-H_2O-$, 1725[2].
reaction with BrI and with HOI, 1591[9].
sodium salt, colloidal, thickness of layer of adsorbed substances on, 1738[8]
cond. and surface tension in molten state, 3117[6]
effect on blood non-protein N, 3724[6].
effects of bases, salts and acids on interfacial tension between C_6H_6 and aq. solns of, 855[2].
hydration as function of age, 2606[4].
lysis of pneumococci by, 1457[7], 1458[2].
stereoisomerism of, 2310[9].
thallium salt, 2818[3].
zinc salt, prepn. of, 2930[9]
Oleic acid, λ-hydroxy-. See *Ricinoleic acid*.
Olein, for textile industry, 2251[8]
Oleomargarine. See *Margarine*
Oleoresins See *Resins*
Oleostearin, digestibility of, 2006[3]
vitamin A in, 2356[5].
Olfaction. See *Odors*.

refraction of, 3091[4]
researches on, 3091[8]
stability of, increasing, P 1531[5].
stabilizing agents for, 1146[1]
sulfur, 1914[9]
sulfur detection in, 3243[5].
Olivine. See *Chrysolite*
Ombilin, in wood preservation, 810[1].
Omnadin, toxicity of, 3035[1]
Onion, cells of, $CHCl_3$ effect on protoplasm, nucleus and chondriome of, 3304[1].
edible fat flavored by, P 3830[7].
growth of, effect of anesthesia on, 1096[1].
Onion smut See *Urocystis cepulae*.
Onium compounds, nomenclature of, 1782[5].
physiol activity of, basis for, 364[1], 451[8], 1053[8], 2311[6], 2976[7], 3688[8]
Onium ions, mobilities of, 2976[7].
Onnes, H. Kamerlingh, 2100[5], 2264[4], 2434[1], 2599[9], 2600[1].
Ontogenesis, 3496[7].
energy in, sources of, 3464[5].
Oöcytin, 621[8]
Oölites, in Pre Cambrian formations, 1047[2].
Opacifiers, in enameled ware, 1894[7].
for enamels, 1894[7].
Opacity, of white paints, 830[8].
Opal, crystal structure of, 29[4].
from Jugoslavia, 562[8].
pseudomorph after calcite from Moravia, 3667[3].
Opalescence, of binary liquid mixts., 1030[8].
in negatives dried with spirits, 1183[6].
surface tension and, 143[1].
Ophiolite, of Bracco, Liguria, 2132[6].
Ophiopleura borealis, bones of, mineral compn of, 2210[1].
Ophrys. See *Orchids*.
Opianic acid, spectrum of, 1178[2].
Opium, deterioration of Indian, 2563[1].
effect on respiration and on insulin action on respiration, 3038[5].
Indian, 2387[6].
Japanese, 2725[6].
morphine content of latex, oil of seed and ash of, 797[1,2,3].
morphine detn. in, 479[1].
morphine loss from, and its prepns., 1304[2].
production in Asia Minor, 1129[8].
Opium alkaloids, constitution of, 765[6,8], 2332[1].
detn. and sepn. in Japanese opium, 2725[6].
detn. of, 476[6].
effect on digestive tract contractions, 3046[8].
effect on intestine, intervention of excito-peristaltic substances in, 1463[1].
extn. of, 646[6].
picrates of, 94[2].
Opsanus tau, motility and behavior reactions in, 2542[6].
Opsonins, in blood serum, 1844[4].
Optical activity. See *Optical rotation*.
Optical dispersion. See *Dispersion*.

Optical instruments, of Rijksuniversiteit Utrecht, 3251^{4}.
Optical isomerism. See *Isomerism*.
Optical properties, of alkali perchlorate crystals, 3105^{6}.
anomalies of, fine structure and, 3598^{5}.

Organic compounds. (See also *Carbon compounds; Chemical compounds; Cyclic compounds; Heterocyclic compounds; Hydrogenation; Unsaturated compounds;*

and compounds of the individual elements, as *Arsenic compounds.*)
addition—see *Chemical compounds.*
alkylation of, with esters of aromatic sulfonic acids, 1795^{2}.
arsenic detn. in, 2300^{3}.
book: The Prepn. and Analysis of, 3015^{6}.
bromination and iodination of, 2660^{9}.
chem. constitution of—see *Chemical constitution.*
condensation of, P 2333^{4}.
contraction in vol. of aromatic, during formation at abs. zero, 3595^{7}.
contraction of vol. during formation of aliphatic, at zero abs., 2266^{1}.
crystals of, 3597^{2,5}.
decompn. of, by catalytic splitting of CO, 2983^{5}.
density at zero abs. and total expansion of, 524^{9}.
dissocn. consts. of complex, 587^{9}.
films of, structure of, 3604^{8}.
firmness of attachment of org. residues in, 390^{1}, 2990^{8}.
halogenated—see "org." under *Halogen compounds.*
halogen detn. in, 2300^{5}.
halogen in, labile nature of, 2825^{7}.
heat action on, 1588^{1}.
heat capacity of solid aliphatic, 2777^{4}.
hydrogen liberated from, 1588^{2}.
interatomic effects in, 3683^{8,9}.
interfacial tensions between water or aq. solns. and, 2927^{6}.
light scattering in liquid, 17^{8}.
melting p. detn. in, app. for, 1005^{4}, 3102^{8}.
melting p. of, effect of dissolved air on, 855^{2}.
mercuration of aromatic, 1793^{9}.
natural, of high mol. wt., detn. of formula for, 2656^{8}.
nitration of, with $Bi(NO_3)_3$, 1602^{9}.
oxidation (electrochem.) of, 3634^{2}.
oxidation of, P 51^{5}, P 2333^{4}, 2990^{6}.
oxidation of, in reversible systems, 2611^{8}.
oxygen-contg., from CO, 3684^{6}.
oxygen-contg., synthesis of, 424^{6}.
photoöxidation of, 1224^{9}.
polarization of H atom in, 3684^{4}.
polynuclear, constitution of aromatic, 1620^{4}, 1801^{1}.
prepn. of, by catalytic splitting of CO, 2983^{5}.
prepn. of, use of Cl in, 1587^{9}.
properties of aromatic, chem. constitution and, 1601^{8}.
reactions of aliphatic and aromatic, 1611^{4}, 2843^{9}, 2990^{5}.
reaction with C_2H_2, P 607^{8}.
reaction with $NaHSO_4$, 3686^{1}.
reduction and oxidation (irreversible) of, electrochem. formulation of, 2611^{5}.
reduction (irreversible) of, 1593^{7}, 3161^{7}.
reduction of, PtO as catalyst for, 1054^{5}.
refractive index of, at. structure and, 1553^{9}.
repelling action of equal and different groups in satd., 37^{6}.
residual affinity of, 1785^{2}.
Röntgen rays in analysis of, 899^{1}.
Röntgen ray spectrographs of long-chain, 3365^{9}.
selenocyano group introduced into, 3288^{3}.
sepn. from mixts. with non-absorbable gases, P 2379^{1}.
spectra of, 14^{7}, 1949^{8}, 2850^{2}, 2943^{8}.
spectrum (Röntgen) of long-chain, 15^{6}.
sulfurization of, P 916^{9}.
superheating of, 1228^{7}.
synthesis of aliphatic-aromatic, 391^{4}, 905^{4}.
thermal data on, 2444^{9}.
volatility and fuming of, 3602^{2}.
Organic matter, analysis of high ash content, 2131^{3}.
destruction by perhydrol, 2297^{1}.
destruction by Na perborate, 726^{7}.
dissolving, P 3084^{4}.
dissolving and electrolyzing, P 2957^{2}.
electrodeposition from aq. emulsions, P 2956^{4}.
electrodeposition of, P 2957^{3}.
electrodeposition of cellular, P 2956^{9}, P 2957^{1}.
evapg. and electrolyzing, P 2957^{4}.
in lake water, 3323^{3}.

Organochromium compounds. See "org." under *Chromium compounds.*
Organogels. See *Colloids.*
Organomagnesium halides. See *Grignard reagents.*
Organosols. See *Colloids.*
Organs. (See also *Glands; Organ extracts.*)
adsorbing power of, 1739^{3}.
amine action on, contg. involuntary muscles, 241^{9}.
arginase in, 55^{8}, 56^{1}.
arsenic detn. in, 927^{6}.
arsenic distribution in, after intravenous injection, 1469^{1}.
arsenic localization in acute intoxication, 1278^{2}.
autolysis at room temp., 3314^{1}.
autolysis of, isolation of non-phosphorized anticoagulant by, 1639^{2}.
autolytic products of, effect on CH_3OH exts. of tubercle bacilli and of the timothy bacillus, 432^{8}.
barbital in, in barbital poisoning, 783^{9}.
bile pigment formation in surviving, 1276^{8}.
blood vessels of, effect of sp. lymphagogs on, 2530^{2}.
bromine content of, 3726^{8}.
of cadavers, whitish granulations on surface or inside of, 2001^{1}.
calcium effect on, 2357^{9}.
cataphoresis in pathol., 2014^{7}.
cholesterol content of, with scorbutic diet, 1654^{8}.
cobalt in, 3028^{3}.
cystine deposition in, in nephritis, etc., 2014^{2}.
hexose phosphatase in, 922^{9}.
hunger effect on, 1097^{5}.
hydrogen-ion concn. of, changes of, 780^{9}.
iodine detn. in, 1092^{8}.
ions in, micro-detn. of, 3407^{3}.
lactase and invertase in, 1816^{8}.
lead in, detn. of, 27^{9}.
lecithin, cholesterol and fatty acids in, during vitamin B-free diet, 934^{4}.
lipoid antibody specificity of, 2364^{1}.
metabolism of, thyroid action and products of, 1440^{2}.
pelvic, inflammatory lesions of female, proteins in treatment of, 2701^{1}.
perfusion of isolated, buffered soln. for, 216^{8}.

phosphorus retention in, in parathyroidectomy, 3492^4.
poisoning by arsenal, 1272^6.
poisoning by Na cacodylate, 1272^6
postmortem changes in function of isolated, 1840^7.
radioactive substances in, after death by poisoning, 3734^2
reaction of, effect of lymph-tissue materials on, 2011^{1,2}.
respiration of surviving warm-blooded, 2192^7.
sulfatase in human, 922^6
water and salts in, during fever, 3033^2.

Orientation (See also *Crystals*.)
effect of ionic charges on unsatd systems, 3288^5.

Origanum, *majorana*, culture of, 3536^2
maru, oil of, 797^6
virens, oil of, 2225^4

Ornithine (*α,δ-diaminovaleric acid*)
d-, configuration and [α]D of, and di-HCl, 2982^{5,6}.
prepn. from arginine, 1815^6
——, **$N^α$-benzoyl-**, *d*-, 2148^1
——, **$N^δ$-benzoyl-**, 2147^7.
——, **$N^δ$ - benzoyl - $N^α$ - methyl - $N^α$ - *p*-tolylsulfonyl-**, 3690^9.
——, **$N^δ$ - benzoyl - $N^α$ - *p* - tolylsulfonyl-**, 3690^8
——, ***N, N'*** **- dibenzoyl-**. See *Ornithuric acid*.
——, **$N^δ$-guanyl-**. See *Arginine*.
——, **$N^α$ - methyl - $N^α$ - *p* - tolylsulfonyl-**, and -HCl, 3690^9.

Ornithuric acid, 2147^7
d-, and esters, [α] of, 2982^6, 2983^2

Oro. See *Irvingia barteri*.

Oropon, 2260^5.

Orsat apparatus, 846^6

Orthite, from Ambatofotsikely, Madagascar, 1969^6.

Orthoclase. See *Feldspar*.

Osmium oxide, (OsO_2), crystal structure of, 3414^9.
prepn of, 718^3.

Osmometer, 3363^8.

Osmosis. (See also *Cataphoresis*.)
of acids into gelatin, 427^5.
in alc. solns, effect of ionic charge on, 3619^7.
of anesthetics in water and lipoid-contg. gels, 427^3
antagonistic action of ions in, 2448^2
in aqueous gel with and without lipoids, 427^4.
cholesterol and, 1547^3.
clay treatment by, plant for, 485^4.
in closing cells of stomata, effect of chem. agents on, 2351^6.
Debye-Hückel theory and, 322^{8,9}.
electro-end, acetonitrile effect on, 1819^6.
in contiguous immiscible electrolytes, 321^7.
elec transport of water and, 1350^3.
through serous membranes, 609^8, 2338^6.
electro-, in electrochemical industries of Austria, 1761^1.
in industry, 80^5.
in purification of clay and kaolin, 1698^9.
purification of enzymes by, 3707^9.
in purification of glue and gelatin, P 1728^4.
in saccharine juice purification, P 1726^6.
in tanning, 1336^9.
lesson in, 700^1.
Nernst theory of, non-aq. solns. and, 1162^9.
phase rule and, 3626^5.
of plant cells, application of Donnan membrane equil. to, 924^5.
resistance of red blood cells to, effect of cations on, 3465^7.
in swelling in cells, kinetics of, 2512^8.
water loss through, effect on function of nerves and muscles, 442^3.

Osmotherapy, physiol. basis of, 3183^8

Osmotic pressure, boiling point and, 2267^5.
of cerous chloride solns, 859^4.
colloid-, of serum, membrane equil. and, 2170^3.
effect of physiol indifferent substances on unicellular animals, 213^1.
effect on kidney, 1867^4.
effect on nerve stimulation, 439^1.
of electrolytes in aq. soln., calcn. of, 1169^8.
in exudates and blood serum in inflammation, 3035^8.
of gelatin in salt solns., 2511^5.
of hemoglobin in absence of salts, 52^5.
of plant sap, 962^3.
of proteins of blood plasma, 3300^3.
of proteins of serum and plasma, 3464^7.
of protein solns., 1283^1.
relation of cells and serum, 3725^6.
of sap, effect on winter killing and leaf fall, 3177^6.

Ossification. See *Bones*.

Ouabain, susceptibility to, effect of vitamin-deficient diet on, 2371^4.

Ovalbumin. See *Albumin*; *Egg white*.

Ovarian extract, effect on blood sugar and blood pressure, 1438^8.
effect on fatty acids of liver undergoing autolysis, 2007^7.
effect on metabolism, 3733^8.

Ovarian fluid, physiol. action of, 231^4.

Ovaries, adrenal function effect on, 1439[3].
cerebrospinal fluid and, 3183[1].
dependence on excitability of central nervous system, 1658[6].
effect of emulsions of, on N and gaseous metabolism, 65[5].
effect on Ca content of blood serum, 1264[7].
follicular fluid of, cholesterol content of, 2194[1].
function of, 2008[2].
lipoids and, 1262[3].
relation of skin reactivity to, 2358[3]
relation to K and Ca content of blood, 779[8].
function (specific) of, 3490[9]
hormone of, 3471[7].
corpus luteum as source of, 1656[7].
estrual cycle of white mice as test object for demonstration of, 3020[8].
extn. and properties of, 3301[7]
prepn. and standardization of, 612[3].
prepn. of aq. solns of, 927[1].
in urine, 3028[7].
internal secretions of, 3495[4].
lipoid feeding effect on, 1452[6].
perfusion fluid of, effect on heart and blood pressure, 3183[7].
protein in residue of, 3185[9].
substitution therapy with Ovarnon, 1861[6].
Ovarnon, ovarian substitution therapy with, 1861[6].
Ovens. (See also *Drying apparatus.*)
Cowper—see *Stoves.*
design of, 1581[8].
for detg moisture content of paper pulp, 1323[2].
elec , 522[7].
elec. core, P 342[8].
elec., for baking, 3591[7]
for heat treatment, P 1341[3].
lab., P 3593[1].
reflex, employing surface combustion, P 2[7].
thermoregulator for, P 1341[4].
thermoregulator for gas-fired industrial, P 317[1].
thermostat for elec. heated, P 3652[2].
Overvoltage, electrolytic, 2112[3].
of hydrogen, film theory of, 2446[2].
at Hg cathode, 2939[9].
penetration of electrolytic H through Fe as function of, 1930[8].
theory of, 873[9].
of hydrogen on finely divided metals and its relation to catalytic action of metals on soln. of Zn, 1019[4].
at lead and Hg cathodes, 141[9].
theory of, 1930[8].
Ovokeratin. See *Keratin.*
Ovoprotein, bromine deriv., 919[5].
Ovowop. See *Ovarnon.*
1,2,4 - **Oxadiimine rings**, supposed formation of, from nitroso compds. and methylene-arylamines, 207[8].
Oxalacetic acid (*ketosuccinic acid*), aspartic acid from, 56[6].
esters of, thermal decompn. of, 1936[9].
fermentation of, 920[3].
Oxalaldehyde. See *Glyoxal.*
Oxalamide. See *Oxamide.*
Oxalanilic acid. See *Oxanilic acid.*
Oxalate ion, effect on viscosity of colloidal Hg derivs. of sulfosalicylate, 3611[8].
Oxalates, from bark by froth flotation, P 1631[1].
effect on nervous central functions, 1859[1].
manuf. of, P 3696[4].
nephritis from, excretion of H_2O, urea and chlorides in, 238[8].
reactions with permanganates, detn. of order of, 2775[2].
in urine, 927[8]
Oxalemia, 3739[2].
Oxalic acid. (*Oxalates of inorganic bases have their own vocabulary headings, as* Calcium oxalate.)
absorption of β-rays by, 3127[9].
adsorbents for, 2104[1].
adsorption of, by active C, 2929[1].
on charcoals, 1132[8].
by metallic oxides, 2604[3].
atomic heat of, 2777[6].
in blood serum, 3739[2].
chem. constitution of, alc. sensitivity in EtOH and, 2608[4].
decompn. of, by Ac_2O, 363[3].
decompn. of soln. with $HgCl_2$, 2459[4].
detection of, 2803[8]
detn. of, 2630[3].
and diethyl ester, prepn. of, 46[6].
diethyl ester, reaction with pyrrylmagnesium bromide, 1406[5].
diethyl ester, sapon. of, and mutarotation, 1219[6].
esterification of, with phenols, precursory compds. in, 46[7].
esters, 3689[4, 5].
esters, reactions with alkali alcoholates, 737[5, 7].
from ethyl ether oxidation, 736[9].
heat of combustion of, 2937[4].
manuf. of, P 3696[4].
manuf. of, from corn cobs, 2312[1].
in oxaluria, source of, 1448[5].
oxidation by iodic acid, 3373[4].
oxidation by $KMnO_4$, 1163[4].
phosphate soly. in, 2223[2].
precipitation of, with $BiONO_3$, 28[8].
reaction velocity with Br, and with H_2CrO_4 + $MnSO_4$ + H_2SO_4, and with $KMnO_4$ + $MnSO_4$ + H_2SO_4, 1953[9].
reaction with alkali metal chlorides and nitrates, 2795[4].
with HIO_3, 2981[3].
with uranyl sulfate, effect of C on, 1018[6].
silver salts, reaction with I, 409[5].
system: BeC_2O_4–H_2O–, 3141[3]
vapor pressure of, 2768[8].
Oxalic acid, dithiol-, (4 - bromo - o - phenylene) cyclic ester†, 1797[9].
Oxalobromodithiocatechol*, 1797[9].
Oxaluria, calculi formation in, 2015[4].
from colon bacillus, 69[5].
oxalic acid source in, 1448[5].
Oxalyl urea. See *Parabanic acid.*
Oxamic acid, hydrazide—see *Semioxamazide.*
——, **phenyl-**. See *Oxanilic acid.*

Oxonitine, and derivs., 765[4].
Oxonium compounds, 361[4].
Oxy-acetylene. See *Welding*.
Oxyberberine*, synthesis of, 1085[9]
Oxycellulose, 3805[9].
in coal formation, 3348[5].
crystal structure of, 1222[2].
detection in dyed cotton, 293[7].
physico-chem. study of, 287[6].
properties and prepn. of, 1515[4]
staining capacity of, 1830[7].
Oxychlorocruorin, 1247[5].
Oxydimorphine*, detection of, 1826[6].
"Oxydisilin." See *Siloxene*.
"Oxydoreductases," 1820[2].
Oxygen. (See also *Anoxemia; Detonating gas; Respiration, animal.*)
absorption by alk. pyrogallol, 5[2].
by polluted waters, effect of Cl on, 3763[9].
by pyrogallol, 2131[3].
by Ag, 1579[5].
activation of, 2322[1].
active, hydrogen peroxide from, 3646[3].
adsorption by activated charcoal at very low pressures, 1346[4].
by charcoal, 3615[3].
by MnO_2, Cu_2O_3 and their mixts., 2443[7].
by Pt black, 2927[9].
adsorptive equil. of mixts. with CO and with HCl, 2438[3].
alpha rays traversing, app. for counting scintillations produced by, 1756[4].
anesthesia from mixt. of N_2O, C_2H_2 and, 71[2].
anesthesia from N_2O and, 71[2].
in aquariums, app. for increasing dissolved, 522[2].
atmosphere rich in, effect on normal and tubercular rabbits, 2535[1].
atom, effect on substitution in aromatic compds., 2840[1,5].
atomic wt. of, 1006[6].
atom, univalent, 412[2]
in bamboo stems, 1831[3].
basic properties of, 189[5]
beta-ray production in, 2787[7].
blast enriched in, in Thomas steel process, 1973[3].
in blood, 2874[2].
effect of venesection on, 1662[5].
in pneumonia, 2364[9].
in relation to hemoglobin, CO, and p_H, 229[3].
bubbles in water, surface phenomena of, 2605[6].
capacity in circulatory diseases, exercise effect on, 3186[9].
catalytic removal from gas mixts. contg. H, 3063[6].
cataphoresis of, 1820[7].
in cellular proliferation, 3735[8].
chamber, 3709[4].
coal and, 1312[4].
combustion of electrolytic gas in d. c. discharge, 2053[2].
combustion of mixts. with CO, 2414[2], 2923[1].
compressibility of, 853[4].
condition equation for, 2610[6].
consumption of, in arthritic muscular atrophy, 2201[2].
by blood, hormonal and pharmacologic influence on, 59[9].
in blood in children, 2362[9].
effect of exercise on, 938[3].
during exercise under low barometric pressure, 939[4].
by frogs, light effect on, 1843[2].
by frogs submerged in water, 72[1].
by marine fish and invertebrates, insulin effect on, 2542[8].
in metabolism, detn. of, 2174[6].
relation to internal secretion, 241[5].
in respiration, app. for graphic registration of, 1092[1].
temp. effect on, 3304[7].
in unicellular organisms, factors influencing rate of, 2025[5].
corresponding states in, 864[4].

crit. potential of, 2618[3].
crit. potentials and spectra of, 2790[6].
crystal structure at liquid-H temp., 1155[1].
decompn. by α-rays, 1556[8].
deficiency—see *Atmosphere*.
deficiency theory, tetany and, 1109[8].
dielec. const. and optical properties of, 1342[5].
diffusion between blood and tissues, 1263[3].
diffusion in stomach and intestines, 2509[2].
directive effect on substitution, 3290[1].
dissocn. energy of, 3645[2].
dried, effect of ultra-violet light on O and, 711[7].
effect of exercise on supply and utilization of, 437[6].
effect of increased pressure of, on growth of normal and malignant tissue cells, 1668[8].
effect of inhalation of, on blood sugar, 3038[6], 3508[3].
effect of Pb and Sn with, on cond. and ductility of Cu, 2640[9].
effect of tension of, on biol. oxidation process, 608[8].
effect of tension of, on virulence and growth characteristics of *Bacterium lepisepticum*, 217[8].
effect on aging of wine, 475[3].
on alkali cellulose, 3806[4]
on basicity of amines, 2309[6]
on behavior of *B. coli* towards lytic principle, 2346[1].
on energy yield in development of vegetable organisms, 435[3].
on fermentation by yeast, 1817[7], 1884[6].
on germination of potatoes, 2350[9].
on Fe and steel, 3427[6].
on luminescence of P, 3391[6].
on metabolism of cold-blooded animals and plants, 1998[5].
on wines, 474[6].
elec. arc (low-voltage) in, 704[4].
elec. glow discharge in, in high-frequency fields, 9[7].
electrode potentials of org. substances, 328[3].
electron affinity of, 3390[8].
-enriched air, effect of breathing, on excretion of lactic acid, 3489[8].
equil. of CO_2 with, in corona discharge, 700[2].
equil. with hemoglobin, effect of temp. on, 924[6].
equil. with W, 325[7].
evolved by living organism, micro-app. for measuring, 1640[9].
exchange, blood and the circulation, 1263[4].
exclusion from oxidizable solns. with oils, 3109[9].
explosion of A- and He-dild. mixt. of H and, 2414[8].
explosion of ether and, during surgical operation, 824[4].
explosion regions of mixt. of H, NH_3 and, 1906[9].
explosions of, in welding, 112[2].
explosions of mixts. of CO and, catalysis in, 2953[1].
explosion with H, effect of C_2H_4 on limits of detonating gas, 1906[5].
flow through a porous wall, rate of, 3601[8].
in foundry practice, 890[5].
in gas producers, 657[1].
gas-thermometric investigations with, 2936[2].
generation from C electrodes in elec. water heaters and boilers, 2955[1].
generator for, P 3592[6].
heat of adsorption by coal and charcoal, 1167[9].
heat of dissocn. of, 867[3], 2933[6], 2946[7].
hemoglobin and, in submammalian forms of life, 1099[3].
hydrogen flame, formation of O_3 and H_2O_2 in, 2110[2].
ignition pts. of mixts. with H and with CH_4, 1716[5].
inhalers for aviation at high altitudes, 2263[9].
intake by plants, 1426[9].
intake of, while breathing concd. mixts. of, detn. of, 64[7].
ionization by electron impact, 2946[6].
ionization potential of, 2118[7].
iron as carrier of, in respiratory enzyme, 213[5].
isothermals and isometrics of, and of mixts. of N and O, 862[2].
isotherms of, 862[3], 1168[6], 2610[5], 2926[8].
isotope, excitation energy necessary for production of, 331[9].
liquefaction of, heat exchange system for, P 2215[7].
liquefying and sepg. from air, app. and heat-exchange system for, P 1152[7].
liquid—see also *Explosives*.
liquid, app. for making, and accidents therewith, 788[6,7].
containers for, P 2[5], P 483[4], P 3543[8].
heat of vaporization of mixts. with liquid N, 695[6].
plant of the Real del Monte Co., 291[9].
temp. coeff. of dielec. const. of, 1751[1].
"loosely combined," stabilizing solns. contg., P 97[4].
luminescence of solidified, 2284[1].
magnetism of, 1350[8].
manometer for, 2097[5].
manuf. of, 2230[2].
electrolytic, 20[5], P 1762[5], P 2462[7].
electrolytic, app. for, P 341[2], P 1567[9], P 3136[6], P 3270[9], P 3397[3], P 3650[7].
electrolytic, device for preventing explosions in, P 2076[8].
in England, 2749[5].
plant for, 1[3].
measurement at high pressures, 3322[8].
metabolism in *Drosophila melanogaster*, 950[9].
in metal cutting, relative effect of temp. and purity of, 3440[5].
in methemoglobin, 1632[5], 1821[2,3], 3462[9].
mixts. with H and with H and NH_3, velocity of sound in, 865[7].
mixts. with N, action on elements, 3141[6].
mol. diam. of, 2101[5].
mol. orientation in magnetic field, 2449[5].
mol., reaction with arsenobenzene derivs., 2993[3].
oxidation of NH_3 to nitrite by, 1744[5].
as oxidizing agent in cells, 1637[8].
ozone formation by action of cathode rays on, 1032[8].
partial pressure of, in thermal decompn. of sulfates, 347[1].
permeability of embryo of *Sinapis alba* to, 1427[1].
permeability of frog membrane and frog lungs to, 443[7].
photoelec. effect (compound) in, 705[9].

in plant cells, production of EtOH and AcH in relation to concn. of, 1830^4.
pneumonia treatment with, 1856^2.
poisoning, 1865^1, 3508^7.
positive ions in, distribution of, 3639^5.
positive rays of, Doppler effect in, 1355^9.
pressure in pyrite roasting, 3276^8.
purity of, effect on explosive properties of L. O. X., 2412^9.
quadrivalent, as valency problem, 1550^7.
reactions in, produced by α-particles, 145^5.
reaction velocity with NO, effect of moisture and paraffin surface on, 3373^2.
reaction with $CaCl_2$ and with $BaCl_2$, 3134^5.
with CO in contact with Au, 537^7.
with H (active), 3645^1.
with H, catalysis in, 5^5.
with H, catalysis with Ni in, 1348^4
with H in light, 2459^5.
with H in presence of resonance radiation, 2792^2.
with H in ultra violet light after sensitization by excited Hg atoms, 871^4.
with H, photosensitivity and mechanism of, 546^3.
with H when sensitized by Hg vapor, 3645^7.
with metallic chlorides, 3402^6.
with $Ni(CO)_4$, 1570^5.
with Ni, Cu and their oxides, catalysis of, 2443^1.
with NiO, 2441^7.
with N produced by β and γ-rays of Ra, 3638^4.
reduction of, effect on heart, 2533^8.
refractive index in magnetic field, 2113^9.
removal of—see also *Metallurgy*.
removal of dissolved, from liquids, 1773^4.
removal of, from Al bronze, P 358^3.
from animal cells and fluids, 3749^8.
from elec. app., app for, P 3650^7.
from H and N for NH_3 synthesis, P 3065^2.
from N, P 2566^6.
from polluted waters, rate of, 636^8.
from sewage, effect of temp. on, 958^9.
from steel, P 735^8.
from steel in gutter of open-hearth furnace, 2637^1.
from water—see *Water, purification of*
requirement for running, 2529^6.
requirement of aquatic animals, food supply and, 1281^9
requirement of plant roots, 3483^2.
respiration of muscle and liver, 2534^2.
Röntgen-ray effect on, in photographic plate, 542^2.
sepn. from air, 788^6, P 1478^8, 2885^5, P 3202^1, P 3757^9.
sepn. from air, app. for, 788^8, P 1732^5, P 3364^3.
solid solns. of water and, 1011^7.
soln. rate of, as agent in biol. purification, 1679^3.
spectrum of, 13^7, 18^5, 543^1, 701^8, 704^4, 1351^8, 1560^9, 1951^3, 2121^7, 2285^1, 2457^4, 2458^2, 2949^3, 3266^9, 3385^2, 3386^6.
detection in spectrum of Mars, 1951^9.
in presence of He group, 1356^8.
in steel manuf., elimination of, 2808^4.
stream pollution and balance of, 2380^4.
subcutaneous injection of, 1095^1.
supersatn. in liquids, 319^9.
system: EtBr–NH_3–N–, explosion space of, 2907^6.
system: Fe–, 3149^9.
systems: Fe–H–, and Fe–C–, 164^1.
systems: H–N–, H–C_2H_4–, H–NH_3–, and H–S–, 1549^5.
tension in tissue, 2510^8.
tension in tissue, esp. in tetany and convulsions, 783^2.
therapy, 1095^2.
transportases, identity with H transportases, 3302^4.
transport by blood, 2532^8.
transport by blood contg. hemocyanin, 3316^4.
univalent, 2434^7.
in urine and bile, 2511^2.
utilization during exercise, 64^6.
utilization in climbing, 3498^4.
utilization in walking on horizontal pathway, 2533^3.
in washing compds., loss of, 303^1.
in water-gas machines, 105^4.
in water gas manuf., 276^5.
Oxygen, analysis, app. for, 3475^7.
detection, 26^4, P 562^2.
detection in gas mixts., 1773^4.
detn., 2131^3.
detn., calorimeter for, 3306^2.
detn. in blood, 1825^1.
in coal, 3794^8.
in copper, 1366^2.
in gas, 3796^7.
in iron, 2129^8.
in metals, 1193^3.
in N or other inert gases, app. for, 723^5
in org. compds., 3407^9.
in sewage, 2217^5.
in water, 957^7, 1480^7, 3760^1.
in water in presence of NO_2^-, $790^{3,5}$.
in water in presence of HNO_2, 2887^4.
Oxygen ion, mol. refraction in alk. earth oxides, 1028^7.
Oxyhemocyanin, in blood, equil. with O, CO_2 and hemocyanin, 3316^4.
dissocn. of, 2170^9.
of *Helix pomatia*, effect of freezing on, 2168^6.
Oxyhemoglobin, adsorption compd. with Fe, 1636^8.
catalase properties of, 2685^3.
detn. in blood and prepn. from blood, 3470^5.
elements in, 1249^8.
formation from methemoglobin by perfusion, 442^8.
nitrite effect on, 1102^9.
from reaction between globin and hematin, 3464^7.
reaction with NH_2OH, 1821^4.
reaction with $K_3Fe(CN)_6$, 1821^4.
spreading of, 1816^9.
Oxymesoporphyrin, from hematoporphyrin, 1634^2.
Oxymethylene. See *Trioxymethylene*.
Oxyneurine. See *Betaine*.
Oxynitrilese, purification and properties of, 608^9.
Oxyns, P 3580^6, 3825^7.
Oxytocic substances, in cerebrospinal fluid, 1656^2.
Oyamalite, from Japan, 563^2.
Oysters, calcareous metabolism in, 950^8.
chlorine treatment of contaminated, 1292^4.
substance in, giving positive naphthol reaction, 1673^3.

viability of typhoid bacilli in, 219^{9}, 220^{1}.
Ozocerite, burning, furnace for, 3064^{4}.
cracking, 499^{3}.
crystal structure of, 29^{4}.
Ozocodeine, chlorodihydro-*, and picrate, 2165^{4}.

atm. (upper) and, 2935^{2}.
bubbles in water, surface phenomena of, 2605^{6}.
in cold storage, 1677^{7}.
collisions of mols. of, with electrons, 868^{9}.
decompn. of, by Cl, effect of foreign gases on, 871^{8}.
existence of activated mols. in, 1563^{4}.
by heat, 323^{8,9}.
by light, 323^{9}.
in red light, 711^{1}.
deodorizing hair, feathers, etc., with, P 1341^{3}.
detn. of, 723^{7}
detn. of, in air, 685^{6}.
in drying of varnishes, 3241^{7}.
effect on petroleum, 1512^{9}.
effect on rubber subjected to corona and tension simultaneously, 678^{2}.
formation of, under action of α-particles, 1760^{9}.
from air under increased pressure, 1034^{4}.
by electron impact, 1032^{9}.
by high-frequency a. c., 1034^{6}.
at low pressures in elec. discharge, effect of electrodes on, 3135^{7}.
by optically excited Hg vapor, 1954^{1}.
in oxyhydrogen flame, 2110^{2}.
in Siemens tube, 1172^{5}.
by silent discharge at low pressures, 1032^{3}.
in glue and gelatin industry, 1002^{6}.
manuf. of, P 1696^{4}.
oxidation of complex Pt compds. with, 1765^{2}.
oxidation with, 181^{1}.
reaction with Cl, 549^{9}.
with dihydrocodeine and with ethyldihydromorphine, 2164^{5}.
with oils, 1713^{1}.
transfer of excited energy from, to H and N, 2286^{7}.
treating liquids with, app. for, P 3103^{1}.
vapor pressure of, at very low temps., 3601^{2}.
Ozonization, of unsatd. acids, 1590^{1}.
Ozonizers, P 554^{8}, P 1958^{5}, P 2462^{7}, P 3398^{7}.
cooling electrodes of, P 1361^{3}.
liquid-cooled, P 3103^{4}.
Siemens, detn. of current voltage of, 2922^{4}.

*p*H. See *Hydrogen-ion concentration*.
Packaging, app. for, 127^{7}.
Packing industry, wastes, treatment of, 1292^{1}, 3525^{8}, 3765^{3,8}.
Packing materials. (See also *Filling materials.*)
in chem. works, 2885^{4}.
coke as, in NH_3 manuf., 3063^{2}.
for journal boxes, P 3238^{6}.
for pipe joints, P 974^{5}.
quartz, shrinkage in Glover tower of H_2SO_4 plants, 2896^{7}.
Pain, hydrogen-ion concn. and, 3192^{1}.
Paint. (See also *Coating(s); Driers; Oils; Turpentine substitutes;* etc.) P 512^{9}.
aluminum, 671^{4}.
analysis of white linseed oil, methods of A. S. T. M. for, 954^{7}, 1121^{8}, 1329^{4}.
anti-fouling, 1329^{6}, 1529^{5}.
anti-fouling, specifications of A. S. T. M. for, 1329^{3}.
asphalt from petroleum sludge as, P 662^{5}.
for automobile bodies, P 513^{1}.
barium sulfate effect on, 3579^{8}.
bituminous, P 672^{6}.
bituminous liquid compns. for, P 301^{3}.
books: Volatile Solvents and Thinners, 832^{5}; Pyroxylin Enamels, 832^{6}; The Chemistry and Technology of, 996^{9}; Rezepte und seltene Arbeitsweisen für, Lackierer und Anstreicher, 1723^{4}; The Chem. Trade Year Book and Buyers' Guide to the Oil, Paint and Colour Industries, 1926, 3052^{1}; L'industria dei, 3580^{1}.
bulking values of ingredients used in, 1912^{3}.

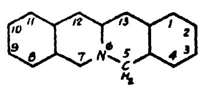
rod mill in, industry, 3810^7.
Röntgen rays scattered by, J phenomenon in, 146^4.
roofing, anthracene oil absorption test for, 2057^1.
anthracene oil for, 2738^1.
for agr. purposes, 791^6.
fireproof, 2570^8.
nomenclature of, 810^1, 1135^7.
standards for raw, 2057^1.
tar, 1897^5.
tar, fire-proof qualities of, 3551^8.
testing, 1520^5.
testing raw paper for, 1135^8.
rosin in manuf. of, 286^7.
rubberized, P 823^3.
from Sabai grass, 3566^6.
safety, P 1906^1, P 2248^9, P 2584^8, P 3084^9, 3812^6.
for bonds, etc., P 1905^5.
protected currency, etc., of, P 1523^5.
testing currency, 3081^9.
sizes for, P 267^6, P $3569^{2,3}$.
rubber resins as, 665^8.
from soy bean protein substance, P 3544^1.
substitutes for rosin, 2746^2.
sizing, P $111^{5,6}$, P 2073^9, 3083^1.
Al resinate in, 3813^5.
detn. of degree of, 3813^2.
detn. of nature of, 2746^4.
effect of glue top-sizing on properties of rosin and starch-sized, 3813^6.
effect of reactivity of pulp on, 1520^6.
with hard water, 284^8.
prepn. for, P 666^9.
with resins, colloidal nature of, $1521^{5,6}$.
with resins, effect of Fe in, 1521^7.
with rosin, 287^3, 2071^6.
with rosin, theory of, $2746^{2,3}$.
sizing and coating, gelatin in, 3083^6.
Sporobolus pyramidalis as material for making, 3811^8.
stability at high temps., 3051^4.
stiffness of, detn. of, 2248^4.
straw, mill waste water, 3080^9.
strength of fine, 288^9.
substitute for hard, P 988^9.
Swedish fibers for manuf. of, 1516^4.
testing, 3081^8.
testing, atm. conditions for, 2071^2.
testing, const.-humidity cabinet for, 1340^2.
transparent, P 823^4, P 1323^6.
wall, P 2248^9.
wall, blended-color, P 1323^7.
waste, molding, P 649^8.
recovered material from, P 2584^7.
recovery of paraffin-coated, 3083^8.
waste in manuf. of, comm. rept. on, 1522^4.
compn. of, 3765^3.
recovery and use of, 955^5.
stream pollution by, 1876^8, 3080^9.
waste liquor and gases from manuf. of, 987^6.
water consumption for sulfite and wrapping-paper mill, calcn. of, 3810^7.
water detn. in, influence of moisture of air on, 289^4.
water effect on, during manuf., 1519^6.
water for, 2072^1.
water for making, analysis of, 2072^2.
water-hyacinth as material for, 3811^2.
waterproof, P 3237^1, P 3349^1.
waterproofed and fireproofed, P 1905^7.
waterproofing, 289^5, P 3084^9, P 3216^5.
water purification for manuf. of, 3812^8.
water-resistant, 3236^9.
wood for making, comparison of heart and outer, 988^4.
woods for, and their substitutes, 3080^5.
woods from Nigeria for making, 3811^2.
working stock, app. for, P 2073^8.
xanthate reaction on stock, P 3569^5.
from zonolite, 728^4.
Paperboard, 288^3, P 504^2.
from bagasse, P 1523^2.
book: Die Pappenfabrikation, 822^6.
from chestnut chips by semi-chem. process, 3808^2.

coating, P 988^{9}.
impregnation of, 287^{7}
machine for, felt for drier portion of, P 1523^{4}.
machine for manuf. of, P 823^{5}.
manuf. of, P 3568^{5,6}.
mill for, 3812^{9}
ornamenting surfaces of, P 666^{7}
from peat, 1322^{4}.
from straw, developments in, 3812^{9}
waste, compn of, 3765^{1}.
waste water, 3080^{9}.
waterproof, P 3237^{1}
waterproof and fire-resistant building materials from, 2747^{1}.
waterproofing, P 2248^{7}
waterproofing compd for, bentonite in manuf. of, 2411^{6}
wear-resisting surfaces of, P 974^{8}

Paper pulp. (See also *Cellulose*.) P 111^{5,7}, P 2248^{7}, P 2584^{5}, P 3568^{1,4,7,8,9}, P 3569^{1,2}, P 3814^{5,6}
absorption of NaOH by sulfate, 2715^{9}
alkali loss in manuf of sulfate, 1519^{2}
alkali requirement in manuf of, 2715^{8}
alky variation during cooking of soda and sulfate, 1517^{7}
alpha cellulose detn in, 283^{8}, 502^{5}, 3806^{3}.
alpha-cellulose rich, P 3566^{9}, P 3814^{4}
alpha cellulose test, significance of, 1520^{1}.
from *Alstonia congensis*, 285^{7}
from bagasse, etc., P 1323^{8}.
from bald cypress, 287^{5}.
from bamboo, 2071^{7}
beater for, P 3349^{3}, P 3569^{7}
beating, 3082^{8}
beating app. for making, from paper, rags, etc., P 989^{1}.
from beech wood, 503^{3}
bleach damages, detection of, 987^{4}.
bleaching agents for sulfite, effect of sol. silicates on hypochlorite, 1143^{7}.
bleaching (high-d) of, 1520^{1}, 2071^{3}, 3809^{7,8}.
bleaching of, 1517^{1}, P 1523^{1}, P 1905^{4}, 2748^{1}, 2748^{7}, 3083^{2}, P 3567^{8}, P 3569^{4}, 3809^{6}.
app. for, P 3236^{9}
under pressure, 987^{7}
Thorne process for, 2748^{6,7}, 3809^{6}
in vacuum with hypochlorite, 1321^{7}.
bleaching of sulfite, 3809^{4}.
book: Praktische Handbuch der Papierfabrikation, 3084^{1}.
from Bordeaux pine by Chevalier Girard process, 285^{2}.
chemical recovery in soda and sulfate mills, furnace for, 1521^{9}.
chloramine as I substitute in manuf. of sulfite, 3083^{1}.
chlorination process for, 287^{8}.
chlorine in manuf. of, 1518^{9}.
control of sulfite cooking, P 290^{3}.
control system in manuf. of sulfate, 3807^{6,8}.
cooking wood, $(NH_4)_2SO_3$ and Na_2SO_3 in, 2071^{6}.
corrosion in manuf. of, 3680^{9}.
cymene recovery in manuf. of, 288^{6}.
from decayed wood, 2746^{9}.
decay in, control of, 2072^{5}.
detection of bleached and unbleached, 3081^{9}.
differentiation between sulfite and soda, fibers in paper, 503^{5}.
from different parts of the tree, 254^{9}.
digester for, P 504^{9}, P 1323^{9}.
digesters, calcns. relating to strength of plane container walls, 3813^{8}.
digesters, prevention of corrosion in, P 358^{3}.
digester (sulfite) bricks, 3083^{7}
digesting by soda process, 2069^{6}.
Dorr save-all operation in manuf of, 3081^{5}.
drainage capacity of, app for testing, P 3237^{2}.
drying app. for, 3566^{4}.
dryness detn of, 2747^{1}.
dyeing, P 666^{8}
effect of drying of plant fibers on, 3807^{1}.
elec. gas purification for manuf. of, 1520^{7}.
from esparto, 3083^{2}.
evaluating, 3082^{7}
evaluation of sulfite, 1516^{3}.
felt of, for vacuum filtrations, 2799^{1}.
fiber length of sulfite, 3810^{6}
fibers, swelling and adsorption of, 284^{2}
fluorescence of sulfite, 2716^{8}, 3808^{5}.
freeness of sulfite, 3808^{1}.
freeness test for sulfite and groundwood, 1322^{9}
Fresk digester filler in manuf of, 1322^{8}
grinding app, P 2219^{1,2}
grinding app, charging app for, P 2219^{2}
"Half-sickness" from waste of manuf of, 2748^{9}, 2749^{1,2}.
halfstuffs, P 3569^{4}, P 3814^{3}
concg, leaching and washing, 2068^{5}
from vegetable fibers, P 111^{2}
hardness of sulfite, 3808^{2}
heat problems in sulfate mill, 1322^{3}.
hydrating, heating and refining app for making, P 111^{6}
hydrogen-ion control in manuf. of, 1519^{2}.
indicators for, industry, 3807^{7,8}, 3809^{1}.
industry in Germany, 2747^{4}.
industry, review of, 3348^{4}.
international statistics on, 3811^{1}.
ketone chlorides in, solubilizing, P 3236^{5}.
kraft, 1517^{4}.
lignin detn. in, 2746^{6}.
lignin detn in, Cl no. and, 3083^{4}.
lime for manuf. of sulfite, specifications of A. S. T. M. for, 1121^{4}
lime-sludge analysis, 1522^{2}
lye recovery from digested, app for, P 2412^{1}.
magnesia cooking liquors contg. large amts. of bases, use of, 2748^{1}.
manuf. in America, 1518^{2}, 3811^{1}.
manuf. in 1925, 287^{2}.
mech. production of wood, P 823^{1}.
moisture content of, elec. oven for detg., 1323^{2}.
molding, P 649^{8}, P 3523^{1}.
paper-making properties of, effect of chemicals on, 1518^{4}.
particles in, size of, 1518^{3}.
phloroglucinol reaction with incompletely cooked sulfite, 3809^{2}.
physico-chem. study of, 287^{6}.
pine oil from manuf. of sulfate, fatty acids in, 3566^{3}.
pine-wood cooking by sulfite process, 3810^{3}.
plant control, 289^{9}, 1323^{4}.
power and fuel requirements for manuf. of, 1517^{4,5}.
pulverizing, P 465^{2}.
purified, properties of, 3565^{4}.
"quick-cook" manuf. of sulfite, P 111^{5}.
reactivity of, sizing of paper and, 1520^{6}.

reddening of sulfite, 1322^{4}.
reduction, P 2073^{6}.
from reeds, 502^{9}.
refining, 503^{1}.
refining and finishing of, 285^{4}.
"refining engine" for, P 2584^{9}.
research on, 3080^{4}.
from resinous wood, P 111^{7}.
resolution of plant materials in manuf. of, with HNO_3, 1521^{3}.
review on, 2748^{2}.
from rice hulls, P 823^{3}, P 2584^{6}.
rod mill in, industry, 3810^{7}.
rubber combination with, P 666^{7}.
sampling and testing for moisture, 2070^{1}.
semi-chem. pulping, 285^{3}, 3807^{8}.
sizing, P 2248^{8}.
soda, app. and method for manuf. of, 1517^{6}.
mill for, 1517^{7}.
yield and quality as affected by length of chip, 3810^{1}.
soda mill operation, 2071^{7}.
from sorghum from Madagascar, 285^{9}.
spinning qualities of, improvement of, P 116^{2}.
spruce, penetration by Ca and Mg bisulfite liquors, 2747^{5}.
standards, comm. rept. on, 2070^{7}.
stock concn , control of, 3809^{1}
strength of, detn. of, 286^{2}, 3565^{6}, 3813^{1}.
strength of sulfite, detn. of, 2069^{2}.
strength tests of, 288^{8}.
sulfate production from, P 3569^{9}.
sulfite, app. for, P 1905^{4}.
effect of shortened preliminary cooking time on, 3808^{7}.
manuf. of, 3082^{8}.
from straw and resinous woods, 1322^{5}.
and uses, 3808^{4}.
yield, quality and cooking conditions of, 2071^{8}.
sulfite cooking conditions and yield and quality of, 285^{1}.
sulfite process, 284^{9}, P 504^{1}, P 3084^{7}.
CO_2 formation in, 2748^{1}.
catalysts in, 3565^{7}.
chemistry of, 821^{6}, 3807^{2}.
effect of H-ion concn. in, 1516^{9}.
inventor of, 3807^{5}.
ionic reactions in, 281^{6}.
sulfites and bisulfites in manuf. of, 284^{9}.
sulfur dioxide recovery from blow-pit gases in manuf. of, P 3569^{8}.
sulfuric acid-treated articles of, P 1523^{2}.
tall oil from manuf. of sulfate, 2072^{7}.
testing sulfite, interpretation of results in, 2069^{4}.
trees available for making, in west Australia, 2747^{2}.
waste from manuf. of, stream pollution by, 3080^{9}.
waste, furnace for prepg. decolorizing C from, P 3652^{1}.
waste gas and heat from digester blow-off exhaust vapors, app. for recovering, P 1905^{3}.
waste gases from sulfate pulp mills, utilization and deodorization of, 3810^{1}.
waste gas from soda furnaces, recovering valuable substances from, P 666^{4}.
waste in manuf. of, comm. rept. on, 1522^{4}.
waste liquors—see also *Sulfite liquor.*
waste liquors, alkali recovery from, app. for, P 1523^{1}.
app. for caustic hydroxide recovery from, P 1341^{1}.
stream pollution by, 1876^{8}.
treating, P 3236^{6}.
waste liquors from soda process, alkali regeneration from, 288^{3}.
rosin from, P 290^{4}.
Na_2CO_3 from, 3063^{1}.
waste liquor from sulfate process, alkali detn. in, 1517^{8}, 1518^{6}.
waste liquor from sulfate process, regeneration of, P 1522^{9}, P 1905^{3}.
water requirement for news-print mill, 3081^{7}.
weighing, sampling and testing, 2070^{6}.
wetness of, importance of, 1322^{9}.
whiteness measurements on bleached, 3809^{8}.
white water in news-print mill, 3081^{6}.
white water treatment in book-paper mills, 3081^{1,2}.
white water treatment in manuf. of, 1520^{2}, 3081^{4}.
white water waste in manuf. of, 3081^{3}.
from wood, P 1905^{8}
from wood chips, etc , P 1323^{9}.
wood of Ivory Coast for, 1322^{1}.
from wood stock, P 2073^{7}.
Papier mâché, coating, P 988^{9}.
compns., 988^{4}.
Paprika. (See also *Peppers.*)
fertilizers for, 3535^{8}.
Para. See *Rubber.*
Paraacetaldehyde. See *Paraldehyde.*
Parabanic acid (*oxalylurea*).
prepn. of, 2662^{4}.
Paraberine,



1083^{7}.
——, **7,12 - dihydro - 2,3** (or **9,10**) **- dimethoxy - 9,10** (or **2,3**) **- methylenedioxy-**, and salts, 1084^{3}.
——, **7,12,12^{1},13 - tetrahydro - 2,3 - dimethoxy - 9,10 - methylenedioxy-**, and derivs., 1084^{3}.
Parabutyraldehyde, P 1631^{1}.
Paracasein, 1997^{4}.
of skim milk, action of rennet ext. as affected by org. acids on, 1120^{2}.
Paracelsus, library at Hahnemann Med. College and Hospital, 3594^{3}.

Patchouli oil, 2047[2], 3330[3].
Patents, Austrian law, adjustment of inventor's rights in accordance with new, 1122[9].
book: Die patentierte Erfindung in neurer Darstellung und Beanspruchung, 1289[9].
compulsory working of, 1122[3].

dating of, Supreme court decision on, 1875[4].
dye-making and dye-using industries in relation to, 825[4].
scientific research and, 3201[3].
utilization of unprotected things in Germany, 955[6].

Pathology, books: Chem., 1270[2], Lehrbuch der physiol. und pathol. Chemie, 2170[7].

Paullinia cupana, metabolism of, effect of caffeine on, 2518[2].

Paving. (See also *Asphalt; Brick; Roads*)
asphaltic material for, P 100[8], P 1507[8], P 3224[3].
asphaltic mixts. for, deformation test for, 2401[3].
asphaltic mixts. for, detn. of stability of, 2401[4].
binders, bituminous emulsions for, P 663[1, 2].
bituminous materials for, P 489[5], P 810[9]
nomenclature of, 2903[9]
stability test for, 2401[4]
blocks, compn. for, P 1703[6].
brick, specifications of A. S T. M. for, 955[2].
from citrus waste, 2376[3].
cork, sawdust, slag, etc, mixt. for, P 2402[1].
cracks in, color-blending filler for, P 810[8].
material for, from Canadian tar sands, 496[4].
materials for, P 978[6], P 1897[9], P 2238[6], P 3794[2,3,4].
monolithic, P 1507[5].
rubber-contg. material for, P 2571[1], P 3552[7].
sand for asphalt and bituminous concrete, specifications of A S. T. M. for, 954[6]
waterproofing in, bituminous soap for, P 489[6].

Pavlov, Michel Alexandrovitch, 565[3].

Peaches, fertilizers for, 1882[7]
fertilizing, 3324[9].
mineral removal from soil by, 2039[9].
scurvy prevention with, 1432[6].
stocks for apricot and plum trees, effect of alkali soils on, 1883[6].

Peanut oil, adulteration with Manchurian bean oil, detection of, 999[8].
compn. and I no. of, 3829[2].
consts. of, 2989[5].
detection in olive oil, 2084[2].
detn. in peanut cake, 515[1].
ethyl esters of fatty acids of, oiling scoured wool with, 2586[6].
fatty acids of, 1590[9], 2482[2]
refraction of, 3091[4].
satd. acids of, 3582[7].

Peanuts, copper in, 616[2].
hulls, production of alc., AcOH, etc., from, 2230[5].
meal, as protein source in milk production, 2373[9].
meal, nitrification under tropical conditions, 3768[3].
nutritive value of, 1836[1].
sampling of shelled, 1914[5].

Pear, chlorotic trees, Fe distribution in, 2183[9].
juice, clarification of, 2549[8].
stone cells of, 3022[6].
tree tissue, phlorhizin in, 2003[9].

Pearl essence, 802[2], P 1892[2], P 2233[3].
refining, P 1499[8].

Pearlite, austenite change to, 3432[2,9].
compn. of, 1205[3].
formation in low-C semisteel, effect of Mn on, 3433[3].
formation in steel, linear velocity of, 3432[4].
interval, effect of Mn, Si and P on, 2137[2].
steel, tensile properties of, effect of heat treatment on, 3432[6].
tempering color in, 33[6]

Pearls, identification with x rays, 1946[8].
natural and cultivated, 1132[9], 1281[6].

Pearl substitutes, manuf of, 1695[3].

Pear midge, sprays for, 3328[9]

Pear-seed oil, 2590[4]

Peas. (See also *Cowpeas; Lathyrus, Legumes*)
acid- and base-forming elements in fresh green, 459[7].
ashing, 3318[9].
Bacillus botulinus in, 1287[1]
canned green, vitamins in, 617[?]
canned, size and maturity of, 1674[9]
cannery waste, 3765[3]
canning, grading for, 1119[4], 2546[9]
catalase activity during germination, 2520[4]
compn. of, effect of maturity on, 2546[9].
copper in, 616[2]
distinguishing "regenerated" preserved dry peas from preserved green, 1675[1].
fat-forming power of growing point of, 3484[9]
fertilizer expts. on, 962[3]
lactic acid formation by, 3715[7]
of Punjab, 1483[7].
seeds, chem changes during growth and ripening of, 2183[6]
silage from oats and, compn of, 2377[4].

Peat, analysis of, theories of coal formation and, 3342[9].
bacterial decompn. of, 2634[6].
bleaching of soy-bean oil with, 2256[7].
bogs, influence of H-ion concn. on flora of, 2872[4]
boiler fired with, 656[3].
book: Der Torf und seine Verwendung, 814[6].
briquets, 102[6], P 982[8].
briquets of mixts. of wood and, analyses of, 3554[1].
briquets, origin of coal and, 2061[9].
burning mixt. of oil and, app. for, P 1901[3].
carbonization of, P 3228[8].
extn. of uncondensable gases in, 3226[7].
at low-temps., 1138[5].
carbonization of Canadian, 1314[5], 1509[5], 2060[2].
clay or kaolin formation by weathering beneath, 1046[8].
coal-like product from, P 1710[2].
colloid chemistry of, 1546[7].
concg. or drying app. for, P 1340[9].
decompn. of phosphate with, 3325[1].
definition of, 2240[9], 2904[2].
distn. and gasification of, app. for, P 3800[3].
distn. of, 1898[3], P 2064[3].
distn. of, app. for, P 106[8], P 3798[9].
distinguishing from coal, brown coal, etc., 2240[9], 2904[2], 3342[8].
drying, P 2243[7].
app. for, P 1316[4], P 3558[5].
artificial after-, 1136[9].
with steam under pressure, P 982[8].
drying, briquetting and distn. of, 276[2].
effect on phosphate soly., 961[7].
as fertilizer and compost, 1487[6].
formation of, 978[9].
friability tests on Canadian, 2402[3].
gas producer for, 2739[6].

humification of, detn. of degree of, 656[1].
hydrogen-ion concn. variations in *Sphagnum* bogs of France, 1429[4].
industry, review of, 3072[2].
Kauri, from New Zealand, 2571[7].
lignin and humins in, 3179[1].
moss, decompn. of phosphorite by, 2715[7].
nitrogen, assimilation by plants, 1298[7].
oils, waxes, etc., from, P 815[1].
origin of, humus compds. in deteriorated fabrics and, 1721[4].
paper and cardboard from, 1322[3].
-phosphate fertilizer mixt., 1487[3].
recovery of, hydraulic process for, 655[9].
Russian, 2058[9].
soils—see *Soils*.
sterilization of, partially, 1878[3].
in Sweden, 2571[4]
tar oils, 1071[2].
treating, P 2243[6]
utilization of, 656[6].

Peat oil, Kauri, from New Zealand, 2571[7].

Pecans, rosettes of, effect of soil conditions on, 1489[9].

Pecten, *islandicus*, bones of, mineral compn. of, 2210[1].
maximus, intestine of, H-ion concn. of, 2024[8]

Pectic acid, constitution of, 784[2].
in flax, 3310[5].
of Wichmann and Chernoff, identity with digalacturonic acid, 3158[4].

Pectic substances, review, 2375[6].

Pectinase, of *Sclerotinia cinerea*, 212[7].

Pectins, of apples, changes during senescence in storage, 1283[4].
ash-free, prepn. of, 3176[9].
book, 1420[5]
citrus, 2711[2].
citrus and apple, 784[4].
compn. of com. prepns. of, 1287[6].
cooking effect on, 3753[9].
decompn. of, 3049[4].
detn and constitution of, 784[1].
detn. of, 1673[4], 2711[2].
in com. solns., 1474[8]
in jams, jellies and preserves, 77[6].
effect on jelly formation, 2547[1].
extn. in jelly making, 2376[4].
in flax fiber, 828[2]
formation of, influence of acidity on, 78[3].
galacturonic acid in, detn. of, 581[2].
grape, wine mellowness and, 3534[3].
jells, jelly strength of, 688[6].
for jelly making, 461[8].
manuf. of, P 2213[5], 2375[8].
in manuf. of marmalades, jellies, etc., 78[4].
manuf. of, patents on, 1110[1], 1474[8].
manuf. of sirups and powder, 2029[2].
prepn. and colloidal properties of, 2376[1].
raw material, evaluation of, 784[3].
review, 3519[3].
sirups and powd. pectin, manuf. of, 2711[3].
staining capacity of, 1830[7].
starch detn. in, 2002[9], 2884[7].
from sugar beets, compn. of, 2519[7].

Pectolite, analyses of, 3409[1].
in Khibin tundra, 1372[5].

Pedicellariae, hemolytic properties of, of sea urchins, 1118[1].

Pediculicides. See *Louse*.

Pegmatites, diopside-bearing, of Aberdeenshire, 3414[4].
granite, from central Maine, paragenesis of, 1375[2].
from Kensington Mica Mine, Montgomery Co., Md., 1371[9].
lithium, genesis of, 30[8].
migmatic, of the Urals, 3672[9].
monazite-bearing, 1195[7].
titanite from, concn. of, 2304[8].
uraninite in, of Madagascar, 1970[2]
from Virginian Piedmonts, 2635[2].

Pelagia noctiluca, ion effect on, 1281[7].
luminescence in, galvanic stimulation of, 2338[7].

Pelargonaldehyde, prepn of, 2310[2].
——, **η-keto-**(?), disemicarbazone, 2151[1].
——, **β-methyl-**, synthesis of, 2310[2].

Pelargonamide, **N - 3,4 - dihydroxybenzyl-**, 404[9].
——, **N-p-hydroxybenzyl-**, 404[9].
——, **N - p - methoxybenzyl-**, 405[1].
——, **N-piperonyl-**, 404[9].
——, **N-vanillyl-**, 404[8].

Pelargonic acid, from oleic acid, 301[6].
piperidide, pungency of, 2845[1]
thallium salt, 2818[1].
——, **θ - cyclohexyl-**. See *Cyclohexanepelargonic acid*.
——, **θ-formyl-**, derivs , 1590[2].

Pelargonophenone, 2,4-dihydroxy-, 2320[2].

Pellagra, accessory factor P-P in foods in relation to, 2693[9]
cholesterolemia in, 942[7].
preventives, butter, fresh beef and yeast as, 1431[4].
production by corn, 1655[6].

Pellastol C, 837[6].

Pellastol N, 837[6].

Pelletierine, dissocn. const. for, 2108[5].

Peltier effect, elastic deformation effect on, 1349[9].
galvanic action and, 874[5].
in single metal crystals, 326[3].
for zinc and Cd crystals, 2778[7].

Peltigera, sweet constituent of *P. polydactyla* and *P. canina*, 1832[5].

Pelts. See *Hides*.

Pelvic organs, inflammatory lesions in female, proteins in treatment of, 2701[1].

Pencils, graphite, manuf. of, 806[8]

Penetrometers, P 316[9].

Penicillium, *glaucum*, growth on irradiated lipoid-contg. food, 2089[7]
glaucum, inulin-splitting power of ext. of, 3017[8].
oxidation of sugars by, 3713[7].
preservatives and, 3712[7].
urea excretion by, 2344[7].
roqueforti, growth of, 1120[7], 2003[3]

Pennisetum, *purpureum*—see "elephant" under *Grass*.
typhoidium, compn. and use as feeding stuff, 2374[6].

Pennyroyal (*Hedeoma pulegioides*), diosmin from, 799[6].
glucosides from, 391[2].

Penroseite, 1194[9].

Pens, alloys for points of, P 358[1], P 736[4], P 1383[9].

Pentacyclopentadiene*, 2148[6].

Pentadecane, 1,15-dibromo-, 1789[2].
——, **1,15-dimethoxy-**, 1789[4].

1,15 - Pentadecanedicarboxylic acid, and dimethyl ester, 1789[6], 1791[9].

1,15 - Pentadecanediol, and diacetate, 1789[1,4].

2,4-Pentadecanedione, 738⁹.
1-Pentadecanol, 15-bromo-, 1789².
Δ³ - 2 - Pentadecenone, 4 - hydroxy-, copper deriv., 738⁹.
Pentadecylaldehyde*, prepn. of, and derivs., 362⁷.
α,γ - Pentadienaldehyde, γ - bromo - δ-hydroxy-, benzoate, 741⁹.
——, **δ-2-furyl-**. See *2 - Furan - α,γ - pentadienaldehyde.*
——, **δ-hydroxy-**, derivs., reaction with halogens, 741⁹.
——, **δ - hydroxy - γ - iodo-**, and benzoate, 741⁹, 742¹.
1,2-Pentadiene, synthesis of, 2145⁹.
1,3-Pentadiene. See *Piperylene.*
Δ¹,³ - 1 - Pentadienecarboxylic acid. See *Sorbic acid.*
Δ¹,⁴ - 1,5 - Pentadienedicarboxylic acid, 3-keto-, esters, light action on, 180⁸,⁹.
α,γ - Pentadienic acid, β,δ - diphenyl-, methyl ester, 1592⁴.
——, **δ-phenyl-**, *allo-*, rearrangement of, 1799⁵.
Δ²,⁴ - Pentadien - 1 - ol, 1,1,3,5 - tetraphenyl-, 1592⁴.
Δ¹,⁴ - Pentadienone, 1,5 - bis[2 (and 6)-hydroxy - *m* - anisyl]-, 2833⁴,⁵.
——, **1,5 - bis(2 - hydroxy - *p* - anisyl)-**. 2833⁴.
——, **1,5 - bis(4 - hydroxy - *m* - anisyl)-**, hydrate, 2833⁵.
Δ²,⁴ - 1 - Pentadienone, 5 - *p* - anisyl - 1-(*m*-nitrophenyl)-, 749⁸.
——, **1,5 - di - *p* - anisyl-**, and dimethyl acetal, 403⁴,⁵.
——, **1 - (*p* - hydroxyphenyl) - 5 - phenyl-**, glucoside, 593³.
——, **1 - (*m* - nitrophenyl) - 5 - phenyl-**, light action on, 749⁷.
systems contg., 749⁹, 750¹.
3 - Pentadienone, 1 - [*m* (and *p*) - acetamidophenyl] - 5 - *p* - anisyl-†, salts, 2156⁹, 2157¹.
——, **1 - [*m* (and *p*) - acetamidophenyl]-5-phenyl-**†, salts, 2156⁹.
——, **1 (or 2) - chloro - 1,5 - diphenyl-**, 2996⁹.
——, **1,5 - di - *p* - anisyl-**, light action on, and salts, 180⁷.
——, **1,5-di-2-furyl-**, 413², 3005¹.
——, **1,5-diphenyl-**, 403².
halogen addn. to, 2996⁷.
light action on, and salts, 180⁴.
perchlorate, detn. of $HClO_4$ in, 2162⁹.
Δ¹,³ - Pentadienylamine, β - bromo - *N*-phenyl - ε - phenylimino-, -HBr, 741⁹.
——, ***N* - phenyl - ε - phenylimino-**, di-HI, 742¹.
Pentaerythritol, acetals of, hydrolysis of, 2108⁹.
crystals of, C atom in, 526⁴.
crystal structure of, 2435⁸.
prepn. of, 43².
tetraacetate, P 1996⁵.
Pentamethylenediamine. See *Cadaverine.*
Pentane, as anesthetic, 1869⁵.
expansion coeff. and free space, 3595⁷.
from petroleum, 2742⁷.
——, **3,3-bis(ethylselenyl)-**, 1051⁵.
——, **3-chloro-3-methyl-**, 2481⁴.
——, **1,2-dibromo-**, 3443⁹.
——, **2,2 - dimethyl-**, prepn and phys. consts. of, 2480⁴.
——, **2,4-dimethyl-**, phys. consts. of, 2480⁴.
——, **2-iodo-4-methyl-**, 577⁴.
——, **1,2,2,3-tetrabromo-**, 2146².
——, **1,2,3-tribromo-**, 2146¹.
1 - Pentanecarboxylic acid. See *Caproic acid.*
1,4 - Pentanediamine, *N* - δ - chlorobutyl-, salts, 417⁹.
1,5-Pentanediamine. See *Cadaverine.*
1,5 - Pentanedicarboxylic acid. See *Pimelic acid.*
Pentanedioic acid. See *Glutaric acid.*
1,4 - Pentanediol, 2,3 - dibromo-, *cis-* and *trans-*, reaction with KOH, 3155⁹.
2,3-Pentanediol, 2,4-dimethyl-, 1786⁴.
——, **2,3,4-trimethyl-**, 2482⁹, 2483².
1,5 - Pentanedione, 1,5 - bis(*p* - chlorophenyl)-, heat action on, 1229³.
——, **1,5-diphenyl-**, heat action on, 1229².
2,4 - Pentanedione, absorption spectrum of, 1788⁷.
——, **3-*sec*-butyl-**, 413⁷.
——, **3 - (*p* - chlorophenylmercapto)-**, 3289⁶.
——, **3 - (2,5 - dichlorophenylmercapto)-**, 3289⁶.
——, **3-ethyl-**, 192⁹.
——, **3-isobutyl-**, and copper deriv., 413⁵.
——, **(5 - isopropyl - 3 - *s* - triazolylazo)-**, 3294¹.
——, **3-methyl-**, tautomerism of, 44⁹.
——, **3-β-methylbutyl-**, and copper deriv., 413⁷.
——, **3 - (*o* - nitrophenylmercapto)-**, 3289⁶.
——, **(5 - propyl - 3 - *s* - triazolylazo)-**, 3294¹.
——, **3-(*p*-tolylmercapto)-**, 3289⁵.
Pentane 1,5-oxide. See *Pyran, tetrahydro-.*
2 - Pentanesulfonic acid, 4 - methyl-, barium salt, 577⁸.
1,1,2,3 - Pentanetetracarboxylic acid, 2-acetyl - 4 - keto-, tetraethyl ester, 3690¹.
1,2,3,4-Pentanetetrol(?), *dl-*, 3156¹.
1,2,4 - Pentanetricarboxylic acid, 2 - (carboxymethyl) - 3 - keto - 4 - methyl-, tetraethyl ester, 2490⁸.
——, **3-keto-4-methyl-**, triethyl ester, 2490⁸.
——, **4-methyl-**, 2490⁸.
1,2,4-Pentanetriol, 4-methyl-, effect on cond. of H_3BO_3 soln., 3158².
2,3,4-Pentanetriol, triformate, 2146⁸.
1-Pentanol, 5-amino-, and chloroplatinate, 2658³.
2-Pentanol, detn. in aq. and cottonseed oil solns., 1742⁹.
——, **1-hydroxamino-**, oxalate, 1052³.
——, **1 - hydroxamino - 4 - methyl-**, oxalate, 1052³.
——, **4-methyl-**, *d-*, and acid phthalate, 577⁴.
——, **4-methyl-1-nitro-**, 1052².
——, **2 - methyl - 3 - nitroso-**, nitrate, 1050⁶.
——, **1-nitro-**, 1052².
——, **1-trichloro-**, and derivs., 1218¹.
3-Pentanol, 1-naphthalenecarbamate, 1233¹.
——, **1,1,2,2,4,5-hexabromo-**, 3444⁸.
2-Pentanone, absorption in the infra-red by, 709⁷.

azine, reduction of, 899[9], 2309[5].
diethyl acetal, sapon. of, 2937[7].
prepn. of, 1602[4,8].
reaction with BzH, 1985[8].
reaction with mesityl oxide, 3157[5].
reduction of, 739[3].
——, **4 - amino - 4 - methyl-**. See *Diacetonamine*.
——, **4 - (p - chloroanilino) - 4 - methyl-**, and semicarbazone, 2837[5].

Δ[3]-2-Pentenone, consts. of, 761[6].
——, **4-hydroxy-**, alkali metal derivs., dihydrates, 741[3].
sodium deriv., 192[9].
——, **4-methyl-**. See *Mesityl oxide*.
β - Pentenonitrile, α - dimethylamino-, 1053[5].
α - Pentenophenone, β - ethyl-, and derivs., 3447[8].
β - Pentenophenone, β - ethyl-, and semicarbazone, 3447[8].
γ-Pentenophenone, β-phenyl-, 1592[4].
1-Pentine, 1-bromo-, 1783[1].
——, **1-iodo-**, 1783[3].
1 - Pentine - 1 - carboxylic acid. See *Propiolic acid, propyl-*.
4-Pentine-2,3-diol, 1-chloro-, 577[1].
——, **1-methoxy-**, 577[1].
1-Pentin-3-ol, 4,5-dichloro-, 3444[3].
——, **3,4-dimethyl-**, and allophanate, 2481[6].
2-Pentin-1-ol, acetate, 2979[9].
Pentlandite, genesis of, of Emory Creek, B. C., 30[8].
Pentosan, methyl-, detection of, 2803[3].
detn. of, 2803[1].
Pentosans, in crude fiber, relation to cell membrane, 3516[7].

detn. of, 2803[1].
detn. of, in wood, 110[2].
in manure, decompn. of, 259[3].
Pentoses, absorption from intestinal tract, rate of, 1100[6].
absorption from peritoneal cavity, 3720[9].
in apple juice, changes during senescence in storage, 1283[4].
permeability of liver and muscles for, 3721[1].
Pentosides, theophylline, 1812[5]
Pentosuria, carbohydrate utilization in chronic, 3731[8].
types of, 1108[6].
Peonidin, chloride, synthesis of, 3457[5].
Peppermint, culture of, 3536[2].
ext. of, detn of oil and of alc. in, 247[7,8].
Franco-Mitcham, 2721[6]
leaves of, substitute for, 3536[1].
spirit of, oil detn in, 3779[1].
Peppermint oil. See *Oils*.
Peppers. (See also *Capsicum*; *Paprika*)
constituents of *P. methysticum*, 405[2]
development and compn. of, effect of length of day on, 3309[6]
New Zealand—see *Wintera colorata*
shells, detection in pepper, 3198[5].
water—see *Smartweed*.
Pepsin, action, detn of, 1421[1].
action of, effect of bases on, 611[4].
action of, mode of, 3700[2]
action on serum albumin, kinetics of, 609[4].
activity of, colloid chemistry of, 2508[2].
adsorption of, 3706[2].
adsorption of, by filter papers and vegetable pulps, 3707[2].
casein digestion by, effect of buffers on, 1632[4].
casein digestion by, H-ion concn. of medium during, 2000[9].
compd. with protein, 3176[2].
detn. of, 1632[2], 1640[8].
in gastric juice, 1250[5].
prepn. of standards for, 214[6].
in stomach contents, 1641[3].
digestion by, resistance of animal organism to, 2512[3].
effect of HCl and, on dissolved proteins, 1087[1].
effect of radioactive radiations and x-rays on, 2338[4].
effect on fibrin, edestin and vitellin, 3174[4].
effect on fibrin, kinetics of, 211[8].
elixir, effect of Bi glycerite on, 2894[8].
in gelatin manuf. from collagen, 122[8].
impurities in com., 2170[6].
prepns., 1691[8].
protein digestion by, 3173[1].
quinine effect on gastric, 1819[1].
radiochem. inactivation by β-rays, effect of temp. on, 2338[5].
radiochem. inactivation of, effect of variations of thickness of absorbing layer of solns. on, 2338[4].
rennet and, 1637[4].
rennet-like action of, 1418[9].
secretion of, effect of avitaminosis on, 63[3].
stability of prepns. of, 3778[7].
synthetic action of, 3466[4].
temp. effect on, 3303[9].
ultra-violet radiation effect on solns. of, 1249[6].
Pepsinogen, formation of, effect of avitaminosis on, 63[3].
Peptase, action of, effect of high concns. of neutral substances on, 1820[6].
Peptidase, affinity in, 2169[9].
in blood serum and in urine in fever, 2363[9].
in blood serum of paralytic, 1265[5].
in epilepsy, effect of hyperventilation on, 3186[5].
excretion of, 52[7].
Peptides. (See also *Dipeptides*; *Polypeptides*; *Tetrapeptides*; *Tripeptides*.)
in blood, 226[4].
constitution of, 3298[7].
prepn of, 3298[3].
reaction with alkalies, 420[2].
rearrangements of peptide-like substances, 1787[8], 2682[3,5,6].
splitting by yeast enzymes, kinetics of, 1829[1].
-splitting enzymes, from yeast, 1828[6].
Peptization. See *Colloids*.
Peptones, adrenaline discharge from injection into adrenal medulla, 1862[6].
blood and symptomatic changes following intravenous injection of, 1855[7].
bromine deriv., 919[5]
from casein, effect of formalin on anaphylactic power of, 2179[3]
cleavage at definite H-ion concn, 1087[4].
cleavage of albumin, by papain, bromelin and pumpkin protease, 1245[7,8].
detn. in plant proteases, 1633[6].
effect on action of adrenaline and insulin on glucemia, 1863[2].
effect on blood viscosity, 2367[8].
as fertilizer, 1881[9].
manuf. of, in slaughter houses, 632[8].
permeability of red corpuscles to, 2510[5].
permeability of skin in fish for, 1442[9].
precipitation of colloidal Au with, 2169[6].
sepn. from albumin, carbohydrates, aliphatic acids and oxyacids, 1641[5].
shock, blood clotting in, 2698[9].
in thyroidectomy, 948[3].
thyroidin secretion and, 1848[7].
vol. of red blood corpuscles in, 948[1].
silk, oxidation of, 1087[7].
spectrography of, 3462[6].
system: neutral salt–amino acid–, starch decompn. through, 1998[4].
toxicity of, 3035[1].
trypsin effect on, 924[1].
Peracetic acid, ethyl and Me esters, light absorption in ultra-violet by, 2455[9].
Peratoner, Albert, 2307[8], 2766[5].
Perbenzoic acid, oxidation of unsatd. compds. by, velocity of, 2674[5].
prepn. of, 908[4].
prepn. of, effect of solvents on, 2322[1].
reaction with unsatd. hydrocarbons, 1397[6].
sodium salt, instability of, 1688[6].
Perborates. (See also *Alkali metal perborates*.)
as bleaching agent, 801[8].
detection in presence of borates, 3145[4].
formation of, by electrolysis, 20[7].
manuf. of, by electrolysis, 2288[4].
pseudoperborates and, 882[2].
stabilization of solns. of, 2728[8].
Perboric acid, absorption of β-rays by, 3127[8].
Perchlorates. (See also *Alkali metal perchlorates*.)
density of aq. solns. of, 2270[7].
detection and detn. in Chili saltpeter and in chlorate, 1967[1].
detn. of, 2129[1].

detn. of, in saltpeter, 1367[8], 1966[9].
manuf. in Italy, 2460[9].
org., detn. of $HClO_4$ in, 2162[8].
refractive indices of, 699[3].
Perchloric acid, as analytical reagent, 2631[3].
detection of, 158[6].
detn. of, 1773[8], 2964[7].
detn. of, in org. perchlorates, 2162[8].
refractive index of, 699[4], 2270[9].
specifications for, 2468[7].
specific vol. of, 2270[8].
Perchlorous acid, detn. of, 1040[4].
Perchromates, mixed crystals of pertantalates, columbates and, 3106[7].
Percolation, in neutral atms., app. for, 2597[9].
Per compounds, stabilization of org., P 768[3].
Percussion figures, optical study of, 1941[4].
Perfumes. (See also *Odors*.) P 480[6].
anisaldehyde in, 1690[1].
books, 647[1], 2048[9].
chemistry of, 3537[7].
citronellol and geraniol as, 2226[7].
diethyl phthalate detn. in, 3779[5].
fixing agents for, waxes of solid petrolic ether exts as, 1689[7].
formation in plants, 263[9].
industry, development of, 3332[1].
industry in France, 3212[1].
ionone, 2226[6].
Marseille soap, 1724[9].
production in America, 3816[7].
review, 2226[7].
synthetic, furoates as, 2225[8].
for vanishing creams, 795[9].
water-sol., P 1890[1].
Perfusion, of isolated organs, buffered soln. for, 216[3].
in kidneys, 227[3].
Perhydridase, of colostrum and milk, 1841[2].
Perhydrol See *Hydrogen peroxide*.
Periclase, elec. resistivity at high temps, 2568[6].
Perilla, culture expts. of 1925, 1330[2].
oil content of seeds, 3583[1].
Perilla oil, 299[4], 1330[2], 3583[1].
Periodic acid, potentiometric titration of, 2471[3].
Periodic law, atomic wt. detn. with, 3365[5].
and theory of cyclic unsatd. compds., 369[6].
Periodic system. (See also *Elements*.) 3594[9].
alkyl compds. of elements and, 2435[5].
atomic structure and, 2782[7].
Bohr-Stoner, 540[2].
inner development of atoms in, effect on ionic radii, 2278[3].
main and subsidiary groups of, 2264[9].
new form of, 2923[4], 3251[5].
new form of, applications of, 2923[6].
spectra and, 149[3].
spiral representation of, wall chart for, 849[6].
Per iodine number, of fats, difference from I.no., 2083[2].
Periplocin, pharmacol. properties of, 2708[2].
Peristalsis. See *Intestines*.
Peritoneal cavity, absorption of drugs from, 1868[9].
absorption of hexoses and pentoses from, 3720[9].
Peritoneal fluid, muscle stimulation by, 1468[4].
of whale, 1672[1].
Peritoneum, inflammation of, effect of H-ion concn. in treatment of, 2688[6].
resorption of trypan blue in, effect of adsorbents on, 3466[3].
urea diffusion through, 942[6].
Peritonitis, treatment of, adsorbents in, 3466[3].
treatment with mercurochrome-220 sol., 2370[8].
Perkin medal, award to R. B. Moore, 1027[1].
Perlite, point, displacement by Ni and by Cr, 1973[9].
Permalloy, magnetic properties of, 3426[7].
magnetization and magnetic hysteresis in, effect of tension on, 2112[9].
magnetostriction in, 3125[1,2].
Permanganates, book: Estudios acerca de, 1573[4].
desoxidation in alk. soln., 3259[2].
mol. vol. variations in formation of solid, 1343[3].
oxidation of Mn to, 2443[5].
oxidation of manganous ion to, 1553[4].
reactions with oxalates, detn. of order of, 2775[2].
reaction with chloral hydrate, velocity of, 2440[6].
Permanganic acid, oxidation of Mn to, 3662[7].
reaction with H_3AsO_3, catalysis of, 2442[5].
Permax, magnetic properties of, 1208[6].

bleaching earths for, effect of high temp. on, 2591[7].
from Bolivian Andes, 1578[9].
books: Mineralöle, 464[9]; American Petroleum Supply and Demand, 500[9]; The Oil Industry, 661[4]; Éléments de la technique du, 986[8]; La genèse du, 1200[1]; The Lab. Book of, Testing, 1320[6]; Beiträge zum russischen Erdölproblem, 1713[8]; L'azote et le, 1875[8]; Die Erdöl-Wirtschaft der Welt, 3077[2]; -Vademecum—Internatl. Petroleum Tables, 3234[2].
brine-contg., treating, P 3234[6].
brine yield from wells near Sand Springs, 3540[5].
burners—see *Burners.*
burning equipment for, 2244[5].
burning mixt. of turf and, app. for, P 1901[3].
for cable wrapping satn., P 3236[1].
calcium chloride waters from, fields in Ventura Co., Calif., 1199[4].
Californian, sp. heats, heats of vaporization and crit. temps. of, 496[8].
in Canada, 2301[9].
chemistry of, future of, 3800[6].
coke, calcining, P 495[9].
coke, manuf. of, 3230[8].
cold-point detn. of, app. for, 1317[9], 2408[5].
in colloidal systems, changes of, 496[6].
colloids in, 1139[9].
in Colombia, sources of, 3671[1].
combustion of, 3561[5].
compn. for high temp. use, P 3235[9].
cordage oils, 3800[6].
corrosion of Cu tubes by, 3439[4].
cracked, compn. of, 1712[7].
cracked, H_2SO_4 action on, 1712[8].
creosote detn. in, 3550[2].
crude, comm. rept. on, 1512[9].
decompn. by elec. arc, products of, 3075[1].
decompn. by heat, 985[9].
dehydration of, P 3234[5,7], P 3562[4].
app. for, P 1714[1].
by filtration method, 2580[5].
deposits, study by means of gas analysis, 1317[7].
detn. in mixts. with wax, 1713[6].
detn. in sprays, 2555[9].
displacement from sand by water, 279[8].
distn. of, lab. method for, 660[9].
distn. test of products of, methods of A. S. T. M. for, 954[7].
domestic heating by, 3553[2].
economic phase of, 2059[7].
in Egypt, 1711[6].
emulsifying, hydrogenating or cracking, P 1514[4].
emulsions, P 3562[3].
app. for breaking, P 817[6], P 2067[1], P 3234[7], P 3347[9].
breaking of, 2578[8]; (*Patents.*) 108[5,6], 465[1], 500[9], 501[1,2], 817[9], 1320[9], 1514[6], 1903[2,6], 3077[5], 3136[5], 3347[1,3,6,8], 3563[9], 3804[7,9].
chem. treatment of, 2580[3].
as sprays, 2555[7].
emulsions contg. Philippine coal, 655[2].
engineering, 278[7].
evaluation by gravity, 3230[7].
evapn. in transportation and storage, 2580[4].
evapn. of, and its effect in operation of air filters with oil films, 2408[5].
expansion by heat of, from Calif., 497[2].
fabric impervious to vapors of, P 511[6].
filter for, P 602[8].
filtering with silicates, 2578[9].
fire protection and prevention in production of, 1318[2].
flash and fire ps. of, app for testing, P 2067[2].
flash p. of, app. for testing, P 3563[8].
foots oil, disposal of, 1140[3].
formolite reaction, 498[4], 3229[6].
fuel, combustion in power-plant boilers, 2403[2].
as fuel for kilns, P 3790[6].
fuel oil, analyses of products of combustion of, with various burners, 3233[3].
fuel-oil purifying system, 3230[6].
fuel oil situation as it affects gas manuf. in Calif., 653[5].
fuels, tech. standards for, 2743[4].
gas oil, calcn. of energy contd. in, 1317[8].
gas oil, methods of A. S. T. M. for testing, 954[8], 1121[7].
gasoline detn. in, 2580[9].
of Gbely, 985[2].
geological formations, nomenclature of, 2580[5].
geology of, 3560[8].
in Germany (northern), 3672[4].
heat interchanger for, P 501[2].
heats of vaporization of distillates from paraffin-base, 660[7].
hydrocarbons, 1510[8].
hydrocarbons of, review on, 1510[8].
hydrogenation and production of non-sludging oils, P 3804[8].
hydrogenation of, P 495[9], P 3803[4,7].
industry, at Baku, 1711[7].
chlorine in, 1512[4].
in 1925, 3800[7].
research in, 3074[7].
review of, 3346[8].

in Roumania in 1925, 2578^{6}.
in Russia, 2578^{6}.
technologic progress in, 2579^{7}.
as insecticide, 1683^{6}.
insecticides from, 963^{4}.
insulating, alteration of, 2409^{9}.
in Italy, 496^{2}.
Japanese, 3413^{2}.
ketone detn. in, distillates, 1902^{2}.
losses in treating for bottom settlings, 498^{2}.
of Maracaibo Basin, 3801^{1}
in Marathon fold, Texas, 1778^{2}.
melting p. of, app for detn of, 1^{9}.
Mesozoic era and, 1046^{1}.
meters, 2582^{3}.
micrographic analysis of, subjected to oxidation tests, 1317^{3}.
Mid-Continent crude, effect of pressure and temp. on total vol. of partially vaporized, 3074^{8}.
migration in rocks, influence of water on, 162^{2}.
mining for lost, 3559^{4}.
mining of, in France and Germany, 2579^{8}.
mixts. with creosote, calcn. of viscosity of, 3551^{4}.
in Montana, 1711^{2}
naphthenic acids derived from kerosene distillate of Calif., 2407^{8}
naphthenic acids from, 2832^{1}.
naphthenic acids from gas-oil distillate of Calif., 985^{4}.
naphthenic acids from Nishiyama, 583^{9}.
natural gas and air in, soly. and effects of, 2408^{2}.
neutralization no. detn. in, 1512^{8}.
nitrogen compds. in, 106^{9}
non-saponifiable compn. with wax, P 3563^{7}.
Ohio, reclassification of, 3229^{5}.
oiliness of, test for, 3075^{8}.
of Ontario, Quebec and Maritime Provinces, 3413^{1}.
of Oregon basin, Wyo , 2967^{8}.
origin of, 162^{4}, 2065^{5}, 2480^{5}, 2578^{7}, 2634^{7}.
kerogen and, 1196^{7}.
org. theories of, 3671^{1}.
review on, 354^{1}.
origin of California, from diatoms, 3671^{5}.
origin of California, relation of Foraminifera to, 3671^{6}.
origin of Peruvian, 2407^{7}.
oxidation of, 660^{6}, 1512^{6}, 2408^{2}, 3074^{9}
oxygen bomb detns. with, pressures in, 1193^{8}.
ozone effect on, 1512^{9}.
paints for industry, 3241^{5}.
Panhandle, analyses of, 3559^{7,9}.
of Palestine (southern), 2303^{1}.
paraffin wax content of Grosny, 1318^{3}.

adsorption by activated charcoal, 856^{1}.
adsorption by charcoal prepns., 1009^{4}.
in blood in renal insufficiency, 1447^{8}.
chem. constitution of, alc. sensitivity in EtOH and, 2608^{5}.
compds. with S, P 3822^{5}.
crystal structure of *p* derivs. of, 3597^{3}.
detection of, 3143^{5}, 3665^{5}.
detn. in cresol, 3665^{9}.
dielec. const. of soln. in C_6H_6, 2607^{9}.
as disinfectant, 1301^{6}.
as disinfectant for textiles, 3240^{3}.
disinfecting power of, effect of charcoal on, 3744^{8}.
distribution of HCl and H_2SO_4 between water and, 1023^{8}.
effect on intestinal contraction, 2533^{3}.
as fungicide, 3021^{5}.
heat of combustion of, 327^{1}.
heat of soln. of, 2275^{4}.
hydrogenation of, 744^{5}.
hydrogenation of, catalysis by metallized SiO_2 gel, 2109^{8}.
iodine binding by, 1089^{1}.
ionization in aq. MeOH, 2608^{6}.
light scattering by, 329^{2}.
in malaria treatment, 240^{8}.
methylation of, 2319^{1}.
1 - naphthalenecarbamate, 2319^{4}.
nitration of, P 917^{1}.
oxalic acid derivs., $471^{,8}$.
poisoning, symptoms of true uremia and, 1666^{3}.
synergistic action of camphor in, 2208^{4}.
treatment of, 2215^{1}.
as preservative, 3712^{8}.
proteins in, mol. wts. of, 3018^{9}.
reaction with lead subacetate, 3777^{8}.
with MeOH, 906^{3}.
with *N*-methylcarbanilyl chloride, 1798^{4}.
with Tl and with Na, 2111^{2}.
with Tl or Na, thermochemistry of, 3123^{2}.
with triacetin, 900^{4}.
review, 906^{8}.
in soils, disappearance of, 470^{1}.
soly. (mutual) of water and, 1743^{2}.
spectrum (ultra-violet absorption) of, 708^{2}, 1559^{6}.
as stabilizing agent for oils, $1146^{4,7}$.
system: $AsBr_3$-, phase diagram of, 1165^{3}.
system: decalin-MeOH-, decalin-EtOH-, decalin-acetone-, decalin-isopropyl alc.-, and decalin-isobutyl alc.-, 2851^{8}.
system: EtOH-, phys. properties in vicinity of crit. temp. of miscibility, 1544^{3}.
system: salicylaldehyde-, 1224^{7}.
systems: water-, and cresol-, vapor compn. relationships in, 277^{8}.

systems with picric acid or urea, "thaw"-m.-p. diagrams for, 693[9].
system: H_2O–, relationship of salts in dil. aq. solns. as detd. by their influence on crit. soln. temp. of, 689[4].
system: H_2O–salicylic acid–, 693[1].
tastes in water from, 1125[1].
excess Cl treatment of, 1122[9].
at Marquette, Mich., 249[9].
thallium deriv., 49[7].
vapor pressure depression on mixing of MeOAc, EtOAc, and $CHCl_3$ with cyclohexanol and, 788[5].
water pollution by, prevention of, 1123[8].

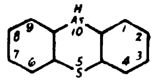
Phenopiazine. See *Quinoxaline.*

Phenopyrylium compounds. See *Benzopyrylium compounds.*

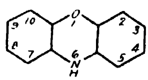
Phenosafranine, amino-, 1084^{6}.
——, **diamino-***, in dyeing, 3239^{8}.

Phenothiarsine,



-, **10-chloro-**, 2839[3].
Phenoxarsine,

——, **2,6 (3,6** and **4,6)-dichloro-**, 176[2].
——, **6-iodo-**, 2839[4].
Phenoxarsinic acid, 7 (and **8**) **- chloro-***, 176[2].
Phenoxarsonium compounds, 3 (and 4)-chloro-6-hydroxy— oxide, 176[2].
6, 6-dimethyl— iodide, 2839[4].
Phenoxazine,



——, **dodecahydro-**, -HCl, 2831[6].
——, **dodecahydro-6-nitroso-**, 2831[6].
Phenoxazone. See *Isophenoxazone.*
Phenoxides. (See also *Potassium phenoxide; Sodium phenoxide;* etc.)
prepn. of, 399[1].
Phenoxtellurine,

derivs., 1063[9], 1064[1].
Phenoxy group, effect on reaction velocity of org. with inorg. halides, 3687[8].
effect on taste, 1603[3].
Phenpiazine. See *Quinoxaline.*
Phentriazine. See *Benzotriazine.*
Phentriazole. See *Benzotriazole.*
Phenylamine. See *Aniline.*
Phenylamines, detection of, 2300[7].
infra-red absorption of, 1356[3].
Phenylarsonic acid See *Benzenearsonic acid.*
Phenylazocarboxamide. See *Formamide, (phenylazo)-.*
Phenyl borate, reaction with Grignard reagents, 1605[1].
p-**Phenylenearsinic acid***, 2486[9].
Phenylenediamine, compds. with Co, 2627[4].
poisoning by, in rubber industry, 1920[5].
——, *N*-**acetyl-**. See *Acetanilide, amino-.*
——, *ar*-**methyl-**. See *Tolylenediamine.*
m-**Phenylenediamine,** condensation reactions of, 2327[6].
dissocn. const. of, 2313[5].
systems of, with acids, 1224[8,9].
——, **5 - chloro -** *N, N'* **- di - 2 - naphthyl-2,4-dinitro-**, 1222[7].
——, **5-chloro-4,6-dinitro-**, 1222[7].
——, **5 - chloro - 2,4 - dinitro -** *N, N'*-**di-*p*-tolyl-**, 1222[7].
——, **4,6-dinitro-*N*[1]-phenyl-**, 590[6].
——, **5 - methoxy - 2,4 - dinitro -** *N, N'*-**diphenyl-**, 1609[8].
——, **4,4' - (*m* - phenylenedithio)bis-**, 3163[2].
——, **4 - phenylmercapto-**, as dye intermediate, 1142[8].
o-**Phenylenediamine,** dissocn. const. of, 2313[5].
systems of, with acids, 1224[8,9].
——, **2-bromo-5-nitro-**, 2666[8].
——, **4-methoxy-5-nitro-**, 2667[5].
——, **4 - nitro -** *N*[1] **- (*p* - phenylazophenyl)-**, 1084[5].
p-**Phenylenediamine,** dissocn. const. of, 2313[5].
edema of, prevention by drugs acting on adrenals, 2024[2].
pharmacol. action of, 1856[1].
reactions with CH_2O and H_2O_2, 53[1].
system: BzOH–, 1745[7].
systems of, with acids, 1224[8,9].
——, *N, N*-**dimethyl-**, meriquinone from, oxidation-reduction potential of, 2779[8].
picrate, 203[3].
——, *N, N'* **- dimethyl -** *N, N'* **- diphenyl-**, 3161[5].
Phenylenediarsonic acid. See *Benzenediarsonic acid.*
m **- Phenylenedimercaptan,** *S,S'* **- bis(*p*-aminophenyl)-**†, and stannic chloride salt, 3163[4].
——, *S,S'* **- bis(2,4 - diaminophenyl)-**†, 3163[2].
——, *S,S'* **- bis(2,4 - dinitrophenyl)-**†, 3163[1].
——, *S,S'*-**bis(4-nitrophenyl)-**†, 3163[2].
o-**Phenylenedimercaptan,** prepn. of, and derivs., 1797[5,7].
prepn. of, and properties of, 3289[8].
——, **4-bromo-**, and derivs., 1797[6,8].
o-**Phenylene disulfide,** 1797[7].
Phenyleneoxamide*, tautomerism of, and derivs., 382[1].
o-**Phenyleneurea***, tautomerism of, and derivs., 381[9].
Phenyl ether, reaction with HNO_3, velocity of, 2835[1].
system: EtOH–, phys. properties in vicinity of crit. temp. of miscibility, 1544[2].
Phenyl group, affinitive capacity of, 3684[3].
effect on hydrogenation of azines, 3282[9].
effect on reaction velocity of org. with inorg halides, 3687[8].
necessity of, in semipinacolin rearrangements, 3000[1].
Phenylhydrazine. See *Hydrazine, phenyl-.*
Phenylhydrazones. See *Hydrazones,* phenyl-.
Phenyl isocyanate. See "phenyl ester" under *Isocyanic acid.*
Phenyl isocyanide. See *Benzene, isocyano-.*
Phenyl isothiocyanate. See "phenyl ester" under *Isothiocyanic acid.*
Phenyl ketone. See *Benzophenone.*
Phenylmagnesium bromide. See *Magnesium compounds.*
Phenyl mercaptan, prepn. of, 177[6].
reaction with alkyl nitrites, 2976[6].
——, *o*-**amino-**, reactions with aldehydes and ketones, 386[6].
reaction with acid chlorides, anhydrides, and esters, 600[1].
——, *o*-**ethyl-**, phys. consts. of, 193[4], 1804[6]
——, **2-methoxy-**. See *Guaiacol, thio-.*
——, *o*-**nitro-**, reaction with alkyl nitrites, 2976[6].
(Phenylmercuri)amine, 1607[1].
Phenyl mustard oil. See "phenyl ester" under *Isothiocyanic acid.*

Phenyl phosphite, reaction with Grignard reagents, 1605[8].
Phenyl potassium phosphate, hydrolysis by phosphatase, 3704[5].
Phenyl pyrophosphate, hydrolysis of $Ph_2H_2P_2O_7$ by phosphatase, 3704[5].
Phenyl sulfide, mercuration of, 1605[6].
Phenyl sulfite, reaction with PhMgBr, 3694[1].
Phenyl sulfoxide, effect of petroleum-refining agents on, dissolved in naphtha, 1784[2].
Phenylsulfoxylic acid, o-amino-, reaction with O_2, 2993[6].
Phenylsulfuric acid, salts, 1796[2].
Phenylthiourethan sulfide*, reaction with NH_2OH, 2161[5].
Philanization, 507[5].
Phillips, Perigrine, biography, 2228[9].
Phiso experiment, 2782[6].
Phlogetan, toxicity of, 3035[1].
Phlogopite, classification of, 2966[8].
utilization of altered, 728[2].
Phloretic acid (*p - hydroxyhydrocinnamic acid*).
3,5-dihydroxyphenyl ester—see *Phloretin*.
——, **α-amino-.** See *Tyrosine*.

——, **1 methyl-**, spectrum (ultra violet) of, 1991^{5}
——, **2,2,6 - trimethyl-**, benzoyl deriv. See β *Eucaine*
4 - Piperidone, 2,2,6,6 - tetramethyl - 1-nitroso-, catalytic decompn. of, 3375^{8}
salt effect in catalytic decompn. of, 325^{3}
Piperine, dissocn. const. for, 2108^{5}.
Piperitone (*Δ*^{1} *- 3 p menthenone*)
dl, reduction of, 751^{7}
reaction with aldehydes, 3457^{7}.
reaction with S, 2670^{6}
——, **7-anisal-**, 3457^{7}.
——, **7-opianylidene-***, and calcium salt, 3457^{8}.
——, **7-piperonylidene-**, 3457^{8}.
——, **7-salicylal-**, 3457^{7}.
Piperonal (*heliotropin, 3,4 - methylenedioxy benzaldehyde, protocatechualdehyde methyl ether*),
condensations with 1-methyl-2,4-dinitronaphthalene and with 2,4,6 - trinitrotoluene, 3001^{9}.
condensation with 2,4,6 - trinitrotoluene, 3000^{8}.
detection in sugar solns., 2376^{5}.
detn. of, 796^{7}.
(4,5 - dimethoxy - 3 - nitro - *o* - tolyl)hydrazone, 3449^{9}.
2-methylsemicarbazone, 914^{8}
oxidation of, 3695^{5}.
α oxime, and its Na salt, phys. consts. of, 3450^{8}
oximes, derivs., isomerism of, 179^{3,4,5}.
prepn. of, 181^{2}
thiocarbohydrazone, 1811^{1}.
Piperonaldoximes See "oximes" under *Piperonal*
Piperonyl alcohol, 2 - bromo - α - (α - **bromo-ethyl**) **- 5,6 - dimethoxy-**, and benzoate, 3450^{9}.
——, α - (α -**bromoethyl**) **- 5,6 - dimethoxy-**, 3450^{1}
Piperonylaldehyde. See *Piperonal*.
Piperonylamine, -HCl, 405^{1}
Piperonylic acid, from piperonal, 3695^{5}
——, **6-(cyanomethyl)-**, 2331^{2}.
Piperonylideneëthane. See *Isosafrole*
Piperonyloin, oxime, Cu deriv., 1055^{3}
Piperylene (*1,3 - pentadiene*), *cis-* and *trans*, 2979^{7}
Pipes (See also *Gas pipes*, *Sewer pipes*; *Tobacco pipes*; *Tubes*, *Water pipes*.)
alloys of Ni and Cu for, P 575^{8}.
annealing centrifugally cast Fe, furnace for, P 3154^{8}
annealing ends of, app. for, P 1384^{4}
cast-Fe, properties of, 2650^{5}
cement asbestos, tests of, 2903^{7}
of cement, etc., casting, P 3224^{5}
cement lined cast-Fe, 3053^{9}.
cement, manuf. of, 809^{6}
cleaning, P 649^{8}
corrosion by salt brines, 3438^{8}
corrosion in, carrying sugar condensates, 2916^{3}
corrosion of, and protective coverings, 2477^{6}
corrosion of Fe, by water in economizers, 3363^{7}
corrosion (punctiform) of Fe, 2649^{3}
covering for, zonolite as, 728^{7}
enameling interior of, P 1701^{7}
explosions of gas in, device for preventing propagation of, P 2076^{2}.
of fibrous material, waterproofing, P 2052^{8}
flow in, detn. of, 3759^{8}
flow of air and steam in, 3757^{4}
flow of gas in, 2551^{4}
flow of liquids through, device for control of, P 317^{2}
fuel, generation of electricity in, 1325^{2}
heat insulation for, P 81^{7}
incrustation of, of evaporators, stills, etc., preventing, P 1876^{4}
for industrial power plants, 1875^{3}
lead, solder manuf. with scrap, 3440^{2}
lining with rubber, P 1730^{7}
from Nyasaland clays, 98^{7}
of rubber, etc., P 2262^{8}.
sealing compn. for, P 36^{6}.
steam, insulation of, 3322^{6}.
steel and iron, specifications of A. S. T. M. for, 955^{2}
steel, cleaning electrolytically, P 3398^{7}.

protected by reinforced concrete, 2[1].
specifications of A. S. T. M. for, 1122[1].
welding (bronze) of cast Fe, 1049[1], 1381[9], 2306[4].
wooden, 3592[5].
wooden, and their use, 2433[3].

Pipets, for absorption of gases, 1731[7].
for acids, 1731[9]
automatic, for measuring noxious fluids, 817[8].
graduated, accuracy of, 1005[4].
micro delivery, 3250[1].
one-mark, accuracy of, 1005[3].
for potassium analysis, 679[9]
viscosity, standardization of, 1[4]

Pirus aucuparia, glucoside of HCN in root of, 645[6].

Pisang, *radja* and *ambon*, antiscorbutic vitamin in, 2006[6]

Pistachio, fruit and oil of *Pistacia vera*, 2030[7]
oil of *Pistacia mutica*, 2718[2]

Pisum, *arvense*, catalase activity during germination, 2520[8].
sativum—see *Peas*

Pitch, books, 266[1], 2410[5].
burning, furnace for, 3064[4]
coking, P 496[2].
dehydrogenating, P 2064[4].
deposition in hydraulic mains of gas retort settings, app. for preventing, P 2244[1]
expansion coeff. of, detn. of, 1314[9]
expansion coeff. of, variations in, 2021[6]
gas from, app. for making, P 3558[8]
handling machinery for, 1900[7]
heating electrically, 2575[8]
nomenclature of, 2577, 2907[1]
petroleum, 986[9]
poisoning in gas works, 2062[8]
review for 1925, 975[4]
for road making, specifications of, 1703[8]
for stone-block filler, specifications of A. S. T. M. for, 951[8]
tar, as road building material, 1135[7]
tar, methods of A. S. T. M. for detg. d. of, 951[9]
viscosity at higher temps., 3256[4].

Pitchblende, compn. of, 2865[5]
in Karelia (northern), 3668[5].
zirconium in Colorado, 2633[7]

Pitometers, flushing of orifices of, device for, 251[6].

Pituglandol. *See Hypophysin*

Pituitary body, active principle of posterior lobe of, 620[8], 2559[7]
antidiuretic action of, 3046[7]
basal metabolism alteration by x-ray and diathermy treatment of, 2013[7]
bromine content of, 3726[9]
carbohydrate metabolism and, 619[5]
chemistry of, 3172[4]
chronic hunger effect on, 1432[1]
effect on adrenaline content of blood in pregnancy and in parturition, 2705[8]
on metabolism in pregnancy, 3733[8]
on ovulation in fowl, 939[7]
on phosphate secretion by kidney, 2528[7]
fat dystrophy with hyperglucemia and glucosuria, 1104[8].
glucosuria, 3730[9].
hormone of, 3172[3]
antagonistic action of insulin and, on water content, 1276[3].
effect on metabolism before and during puberty of, 228[1].
in fluid of cisterna cerebellomedullaris, 922[2].
oxytocic principle of, 2506[7].
physiology of, 2533[5].
prepns. of, effect on respiration of animal tissue, 1277[3].
prepns. of, physiol. assay of, 261[7], 1303[8].
removal of, effect on diuresis and edema, 2533[6].
removal of, glucemia and glycogen following, 1842[4].
secretion after injection of intestinal ext., 3739[9].

Pituitary extract (See also *Hypophysin; Pituitrin*.)
active principles of, 158[4]
antagonistic action of insulin and, 1163[8]
assay of, 418[4]
diuresis inhibition with, 2532[9].
effect on blood fat and ketone bodies, 3029[1].
on blood vessels of frog tongue, 15[illegible]
on cerebral blood vessels, 2209[1].
on diuresis, antagonism of insulin to, 117
on heart, 3190[1]
on kidneys, 3195[7]
on O metabolism, 241[7]
on pregnant uterus, 3510[8]
on respiratory center, 1261[4]
on smooth muscle, 2707
on stomach, 1099
on uterus, 158, 1868[6]
effect when administered by alimentary canal, 1272
evaluation with guinea-pig uterus, 3512[8]
kidney function and, 2[illegible]
muscle stimulation by, 1168[4]
stability of, effect of acidity of solvent on, 3061[7]
standardization of, 1139[8], 2102[8], 3[illegible]
testing lab. for, 3777[1]
vaso-hypertensive and oxytocic activities of, 1194[9]

Pituitrin, antagonism to insulin on diuresis, 3512[8]
effect on arteries, coronary, [illegible] 14[6]
on bacterial growth, 3122[8]
on blood, 37[illegible]
on blood and on lymph and urine production, 116[2]
on blood fat, on ketone bodies and on blood sugar, 3029[1]
on blood sugar, action of Ca and K ions on, 119
on exudation and edema, 118[5]
on insulin action on glucose utilization, 1670[4]
on intestine, 1168[4]
on isolated vein rings, 167[5]
on kidneys, 3195[7]
on mineral metabolism of lymph, 2309[8]
on O metabolism, 241[7]
on H_3PO_4 hydrolysis during autolysis of muscle and liver, 3707[1]
on respiration and min. vol. during heat puncture hyperthermia, 1279[4]
on shivering reflex, 3191[1]
on uterus, 1166[8], 2201[9].
on water and P content of muscles and liver, 3728[5]
on water economy, 3512[7].
glucemia, effect of Ca and K on, 2102[4].
secretion of, 2529[4].

Pivalaldehyde, rearrangement of, 1988[6].

Pivalic acid, beryllium salt, crystal structure and chem constitution of, 3598[1].

Placenta, autolyzates, complement deviation by ultrafiltrates of, 3736[7].
calcium in, 3031[5].
effect on adrenaline content of blood in pregnancy and in parturition, 2705[6].
hormone of, 1841[5].
infection through, by filterable tuberculosis virus, 415[8]
proteases of, 3723[8].
respiration of, 1262[3].
sugar in, decompn of, 1658[9].

Placental extract, effect on metabolism, 3733[6].
effect on uterus, 1166[6].

Plagioclase, basanite in Banat, 1016[3].
classification of, 562[9].
detn of, 1015[1]
in crushed rocks, 3672[6].
in thin sections, 3408[4]
of Saint Croix, 564[7]
zonal growth of, in syenitic magma, 3408[8].

Plaice. See *Pleuronectes platessa.*

Planaria, control of biaxial development in reconstitution of pieces of, 243[1]
dorotocephala, oxidative metabolism of, effect of KCN on, 3415
locomotion in, temp effect on, 2514[1]
maculata, nutrition of, 72[7]

Planchéite, 1 72

Planck, Max, quantum theory and, 699[9]

Planck-Einstein formula, derivation of, 3635.

Planck's law See *I*

Plane tree See *Platanus orientalis*

Plankton, alg., phosphate content of sea water in relation to growth of, 3715[4]

Plantago lanceolata See *Plantain*

Plantain, ch content of *P lanceolata,* 965[2]
leaves of, substitute for, 3536[1]
nitrogen and mineral requirements of, 1188[4]
seeds as feeding stuff, 3200[6]

Plants. (See also *Anaerobism, Cells, plant, Cumarin(?), Leaves, Life, Metabolism, Media, Nutrient media, Nutrition, plant, Photosynthesis, Respiration, plant, Ripening, Roots, Salt, Seedlings, Tissue, plant, Transpiration,* and specific kinds of plants, as *Wheat.*)
absorption of inorg. elements by, effect of CO_2 content of soil air on, 611[8]
absorption of ions by, 1648[3]
absorption of H_3PO_4 and of K by, effect of light on, 2521
adsorbing power of, 1730[1]
adsorption by, app for studying, 3255[8].
alkali chloride effect on, 1297[4]
alkaloids in, formation and role of, 3486[5].
allantoic acid in, 2182[6]
aluminum content of soil in relation to growth of, 640[2]
aluminum in, 926[2]
anaerobic expts. on, N and He as inert gases in, 3177[2]
antagonism of walnuts to, 931[4]
ash content of, effect of external factors on, 1488[5].
ash from, in relation to inorg. constituents of coal, 275[1]
ashing, 3418[6]
asperuloside detection in, 2182[8]
benzidine as reagent in, 1832[6].
of bogs, effect of H ion concn. on, 2872[6].

synthesis of, 2684^{4}.
synthesis of, contg. S or Se, 2148^{4}.
Polyspirans See *Spiro compounds*
Polystictus versicolor, growth of, effect of H-ion concn. of media on, 1647^{6}.
Polysulfides. See *Sulfides*
Polyterpenes, synthetic, 3453^{5}
Polythionates, decompn. of, in aq. soln., 558^{9}
reaction with alkali, 559^{1}.
reaction with H_2S, 559^{4}.
stability of, effect of thiosulfate and sulfite on, 559^{2}
Polythionic acids, formation in thermal synthesis of colloidal S, 2439^{7}.
Polytoma uvella, attraction by chemotaxis, effect of compn. of compd. on, 1281^{1}.
Polytomella citri, encystment in, 1117^{7}.
Polyuria. (See also *Diuresis*.)
following extirpation of hypophysis or cerebral lesions, 1842^{4}.
Pomace, apple, detection in feeds, 2033^{7}.
apple, drying, 2030^{8}.
fruit, ext. of, P 3755^{9}.
Pomace fly. See *Drosophila*.
Pomelo. See *Grape fruit*
Ponderometric force, in gravitation and electromagnetism, 2782^{6}.
Pongamia glabra, oil of, 2895^{2}.
Pope, Frank George, obituary, 2100^{3}.
Poppy, morphine detn. in exts. of, 3777^{7}.
morphine production in, increase from lesions, 2358^{4}
sirup of, nomenclature in pharmacy, 1303^{6}.
Poppyseed oil See *Oils*.
Porcelain (See also *Ceramic ware*; *China*; *Insulators, electric*.)
app. for lab., 1539^{1}.
as catalyzer in oxidation of HCN, 3625^{9}.
centrifuge tubes of, 521^{5}.
cleaning compn. for, P 3544^{5}
colors that are undesirable in, 3219^{9}
crucible of, P 650^{8}.
dental plates, P 487^{7,8}.
driers for dry press, 3789^{1}.
for elec. purposes, 3220^{5}.
elec. resistance of, 2611^{2}
enameled ware, kiln for, P 809^{4}
firing and porosity, 3539^{2}
glazes—see *Glazes*
for insulators (high tension), 1309^{4,5}.
kilns for, SiC in, 3393^{3}.
manuf. of, P 2055^{4}
metal coating on, P 99^{9}
phys. properties of true, effect of compn. of body and glaze on, 1134^{5}
puncture voltage of, 2055^{1}.
quartz soly. in feldspar in, effect of grain size on, 1504^{3}
review, 2735^{8}
semi., kaolins from Georgia and N. C. in, 2735^{1}.
thermal expansion of whiteware, 2900^{4}.
translucency of, 2735^{9}.
wet-process elec., 3547^{2}.
zirconium oxide in manuf. of, 265^{5}.
Pores, in filter stones, detn. of diam. of, 1545^{6}.
Porosimeters, 2235^{9}
for vitrified ware, 807^{4}
Porosity, corrosion and, 2648^{3}
detn. of, app. for, 1152^{4}
in ceramic ware, 1308^{6}
in coke, 2576^{8}
of porcelain, firing and, 3339^{2}
of soil, 469^{4}.
of textiles, testing, P 3523^{1}.
Porous materials, gas flow through, rate of, 3601^{4}.
impermeable, P 2552^{4}
molding, P 848^{3}
Porphyratins, from cytochrome cleavage, 1632^{9}
natural, 3018^{3}
spectrochem. investigation of, 1245^{8}.
spectrochem. reaction of Fe, with KOH, NaCN and hydrazine hydrate, 3701^{1}
from yeast and plant seeds, 3174^{2}.
Porphyrins (See also *Coproporphyrin*; *Coproporphyrin*; *Etioporphyrin*; *Hematoporphyrin*; *Uroporphyrin*.) 2513^{7}, 3170^{4}.
action in body, effect of Ca salts on, 1266^{2}.

active H detn. in, 1815^{8}.
from blood pigment, 770^{3}
blood pigments and, 608^{6}.
of chlorocruorin, 1247^{8}.
constitution of, 1633^{9}.
from cytochrome, 1632^{9}.
detn. in urine, 3709^{6}.
diseases, recognition of, 2013^{8}.
from hydroxyhemin anhydride, 3700^{9}
natural, 57^{6,7}, 426^{1}, 3018^{3}, 3173^{4}, 3701^{1}.
sensitization by mixts. of blood serum and, 1845^{9}.
sensitizing effect of, 1845^{7}, 2513^{1}.
spectrochem. investigations on, 1215^{8}.
Porphyrinuria, 426^{1}, 608^{6}.
calcium treatment of, 1266^{3}.
congenital, pigment account of, 2878^{8}
Porphyry, of China (eastern), 2635^{4}.
Porpoises, urine of, compn. of, 1672^{5}.
Portland cement. See *Cement, hydraulic*
Portuguese, book: Vocabulario Tecnico: Portugués-Inglés-Francés, 143^{3}.
Potamogeton perfoliatus, endodermis of, macrochemistry of, 2871^{5}.
Potash. (See also *Fertilizers; Potassium, analysis; Potassium carbonates, Potassium hydroxide, Potassium oxides.*)

in blood, in circulatory diseases, 3732^{8}.
effect of irradiation on, 940^{1}
insulin effect on content of, 1470^{2}.
in narcosis, 3743^{8}.
in blood plasma, morphine effect on, 2705^{3}
in blood serum and corpuscles, effect of hemorrhage on, 2538^{9}.
in blood serum, electrodialysis of, 3030^{1}
normal and in disease, 2014^{1}
normal and in renal disease, 441^{9}
reaction with protein, 921^{1}.
relation to ovarian function, 779^{8}
relation to vegetative nervous system, 1841^{9}
in tuberculosis, 2501^{1}
diamagnetism of, 1557^{8}
effect on action of adrenaline and of insulin, 2370^{8}
on adrenaline action on heart, 1861^{7}
on development of normal and neoplastic tissue *in vitro*, 3734^{8}
on diuresis in infants, 626.
on heart, antagonism of nonelectrolytes, 3194^{9}
on heart, counteraction by camphor of, 2193^{6}
on intestine and uterus, 1859^{8}
on intestine, 1462^{7}.
on isolated vein rings, 457
on pituitrin hyperglycemia, 2192^{9}
on saliva secretion, 1448^{5}
on uterus, 458, 2204^{9}
elec. resistance of, at low temp., 864^{9}
elec. resistance of, under pressure, 605^{8}
explosion with, 1716^{3}
gaseous ions of, energies of soln. of, 2446^{1}
as heat source in earth's crust, 2116^{1}.
hydrogen absorption in vapor arcs of, 1175^{4}
infra red emission and absorption of vapor of, 1030^{8}
luminescence of vapor of, in electrodeless discharge, 3642^{9}
magnetic properties of atoms of, 2614^{6}
in muscle, effect of electrolytes on, 3497^{7}
in muscles, effect on heart function, 3498^{4}
in nutrition, 1259
in oxyhemoglobin in horse blood, 1249^{9}.
photoelec. effect (selective) of, 869^{8}
photoelec. emission and optical reflection power of, 2152^{7}
photoelec. valve coated with, 333^{9}
physiol. action of, 2357^{4}
in plant cells, localization of, 5300^{8}.
plants contg., 3716^{5}.
radioactivity of, 8^{9}
reaction with I, spectroscopy of chemiluminescence of, 1179^{1}
reaction with (solid) I, 2294^{5}
rye consumption of, 1617^{4}
in skin, 2528^{3}

in skin of mice on acid or basic diet, 3726^{9}.
in soil, effect on compn. of plants, 2033^{1}.
in soils as growth factor, 1293^{1}.
spectrum of, 17^{2}, 330^{8}, 1029^{5}, 1178^{5}, 1948^{9}, 2118^{9}, 2285^{4}, 2619^{1}, 3387^{5}, 3389^{9}.
spectrum of, in spontaneous combination with Cl, 148^{4}.
spectrum of ionized, 2616^{7}.
spectrum of reaction with $HgCl_2$, 1947^{4}.
in tears, 1419^{1}
"Treppe" formation and spasms from, 2368^{9}.
vapor pressure and thermal properties of, 3600^{9}.
vapor, thermionic phenomena of, 2943^{7}
in wheat seedlings, 1648^{6}
Potassium, analysis, detection, 1189^{8}, 2129^{7}, 2801^{7}
detection in plants, 3716^{1}
detn., 1366^{3}, 1771^{7}, 2469^{1}, 2631^{3}, 2800^{1}, 3407^{4}
detn. in fertilizers, $2221^{5,6}$.
in Li minerals, 724^{8}.
in silicates, 1576^{5}
in Na oxalate and in NaOH, 3406^{7}.
in soils, 470^{7}, 3055^{4}
in soils and plants, 3204^{6}
pipets for, 679^{9}
sepn. from Na, 3660^{6}
Potassium acetate (See also *Alkali metal acetates.*)
activity coeff. of, 3617^{8}
effect on fermentation by yeast, 2866^{8}
viscosities of solns. of, 851^{1}
Potassium alloys (See also *Alkali metal alloys.*)
amalgam, vapor pressure of, 3109^{3}
rubidium, 1927^{3}
Potassium aluminate. See *Alkali metal aluminates*
Potassium aluminum fluoride, 550^{1}
Potassium aluminum nitrate, as fertilizer, P 1290^{3}
Potassium aluminum sulfate. See *Alums*
Potassium amide (See also *Alkali metal amides.*)
reactions in liquid NH_3, 720^{8}
Potassium ammonostannite, 720^{9}
Potassium antimonyl tartrate. See *Tartar emetic*
Potassium arsenate. See *Alkali metal arsenates*
Potassium azide (See also *Alkali metal azides.*)
crystal structure of, 318^{1}.
Potassium azodisulfonate, 1571^{5}.
Potassium beryllium sulfate, thermal decompn. of, 347^{2}.
Potassium borofluoride, cesium bearing, in products of contemporary activity of Vesuvius, 3275^{6}.
Potassium bromate, reaction with Se_2Cl_2, 2294^{4}.
titration with, Me orange as indicator in, 883^{1}.
Potassium bromide, absorption of β rays by solns. of, 3127^{9}.
crystals, producing large, 2602^{6}.
crystals, "selective reflection" of x-rays by, 1758^{9}, 1759^{1}.
effect on diastatic effect of saliva, 2507^{7}
effect on liver arginase activity, 3706^{9}.
elec. cond. in single crystals and in solid solns. with KCl, 3377^{6}.
elec. cond. of, 2939^{2}.
elec. cond. of mixt. with AgBr, 2276^{5}.
equil. with HCl, 3142^{3}.
ionization of water in soln. of, 3372^{2}.
mutual soly. increase of org. compd. and, in aq. EtOH, 3116^{8}.
reaction with $MeCHICO_2H$, 861^{5}
Rontgen ray reflection from, 146^{6}.
soly. of Br in, 1161^{2}.
solns. in MeOH, viscosity and d. of, 3616^{5}.
system: AgBr–, 2776^{7}.
system: $AgBr–H_2O–$, 2777^{1}.
Potassium cadmiopyrophosphate, 2794^{2}.
Potassium cadmium bromide, formation of, 3119^{6}.
Potassium cadmium cyanide, isomorphism of $K_2Hg(CN)_4$ and, 2798^{4}.
Potassium carbonate. (See also *Alkali metal carbonates.*)
manuf. of, P 482^{5}, P 803^{2}
reactions with $BaSO_4$ and $PbSO_4$, 324^{8}.
reaction with ferric sulfate, 3259^{1}
specifications for, 2798^{5}
surface tension of solns. of, 2770^{6}
systems: MeOH–, EtOH– and Me_2CO–, e. m. fs. at boundaries, 2780^{5}
Potassium caseinate. See *Alkali metal caseinates*
Potassium cerium sulfates, 3401^{8}
Potassium chlorate, assay of, 159^{4}
decompn. of, catalytic effect of MnO_2 and Fe_2O_3 and their mixts. on, 2627^{2}.
effect of Fe_2O_3 on, 2272^{6}.
in presence of Fe_2O_3, 2272^{4}.
decompn. of mixts. with MnO_2, effect of pressure on rate of, 2271^{5}.
detonation rate of mixts. with Hg fulminate, 1142^{1}
effect on germination of rye, wheat, barley and oats, 3022^{4}
effect on yeast, 3308^{1}.
mol. contraction of aq. solns. of, 3118^{7}.
reaction with Se_2Cl_2, 2294^{4}
weighing small amts. of, 2629^{8}.
Potassium chloride (See also *Alkali metal chlorides; Sylvite.*)
absorption by intestine, 2009^{3}
activity coeffs. calcd. from f.-p. data, 1317^{9}.
adsorption isotherms of, 3605^{2}.
antagonism to NaCl in hemolysis, 625^{3}.
in arterial hypertension treatment, 949^{6}.
from brine, P 3214^{5}
crystals, producing large, 2602^{6}
detn. in mixts. with NaCl, 2299^{4}, 2629^{6}
dispersion of, 709^{4}
effect on acetone body formation and excretion, 3719^{4}
on colloidal As_2S_3, 1933^{9}.
on diuresis, 1855^{7}
on hemolysis, 2507^{4}
on mucosa musculature of stomach, 2370^{7}
on plants, 1682^{4}.
on protoplasm of *Amoeba proteus*, 2511^{7}.
on yeast, 3308^{1}.
elec. cond. of, 3618^{5}.
in single crystals and in solid solns. with KBr, 3377^{6}.
in water and in acetone-water mixts., 1743^{6}.
elec. cond. of AmOH in equil. with soln. of, 141^{5}.
elec. cond. of, and of its binary and ternary mixts. with HCl and NaCl, 2270^{9}.

as fertilizer, 3205[9].
as fertilizer for hill soil, 86[3].
as fertilizer for tomatoes, 2041[7].
flow of, 132[5].
heat of diln. of, 1749[4].
heat of soln. of, 1749[2].
ionic equil. across a $Cu_2Fe(CN)_6$ membrane, 136[8]
ionic radius of, 3258[4].
ionization of, effect of H_3BO_3 on, 2933[2].
mixed crystals of NaCl and, flow-pressures of, 884[4].
mol. refraction of, 1028[5]
photoelec. effect in, 2785[8].
potential diff. between H electrode and quinhydrone electrode in solns of HCl and, 1191[1].
reaction: $Cl_2 + 2KOH = KCl + KClO + H_2O$, 720[8]
reaction with K_3IrCl_6, 694[8].
satn. pt. of aq. soln. of, 2459[4].
sepn. from brines, P 3214[7]
soly. in NaCl and $MgCl_2$ soln., 480[9].
soly. in H_2O, effect of Me_2CO and EtOH on, 1930[1].
soly. (mutual) increase of org. compd. and, in aq. EtOH, 3116[5].
solns. in MeOH, viscosity and d. of, 3616[1]
specifications for, 2798[8]
standard soln. of, 2795[5].
surface tension and activity of soln. of, 855[4]
system: $MgCl_2$–$BaCl_2$–, 2813[2]
system: K oleate–H_2O–, 1725[4].
system: $K_2C_2O_4$–H_2O–, 2466[4].
systems: MeOH–, EtOH– and Me_2CO–, e. m. fs. at boundaries, 2780[7].
system: NaCl–H_2O–, 1970[6].
transference nos. and ionic cond. of, 3119[1]
vapor pressure of, and its mixt. with NaCl, 2103[7].
Potassium chloroaurate, thermal dissocn. of, 2110[6]
Potassium chloroiridate, decompn. by heat, 694[5]
heat of soln. of, 695[1].
Potassium chloroiridite, heat of soln. of, 695[1]
reduction by Co and by $CrCl_2$ and soly. in water, 695[2].
Potassium chloropalladate, as catalyst for HCHO decompn., 38[3].
Potassium chloroplatinate, decompn. by heat, 694[7].
heat of soln. of, and of reaction of, with Co, 695[1].
from K_2PtCl_4, 1765[3].
Potassium chloroplatinite, decompn. by heat, 694[9].
Potassium chlororutheniate, 3139[4, 5]
Potassium chromate. (See also *Alkali metal chromates.*)
crystal structure of, 3253[2].
effect on germination of beans and lentils, 2182[4].
photochemistry of, 3389[9]
radon effect on, 1556[9].
reaction with $AgNO_3$, effect of lyophilic colloids on, 2772[4].
Potassium chromiphosphite, 2793[8].
Potassium chromium oxalate, vapor tension of hydrates of, 1344[8]
Potassium chromosilicate, synthetic, 1364[6]
Potassium cobalt carbonyl cyanate, prepn. of, 2467[4].
Potassium cobalto-phosphite, 2794[1].
Potassium cobalt oxalate, vapor tension of hydrates of, 1344[8].
Potassium cobalt selenate, dissoc. pressure of hydrated, 347[5].
Potassium compounds. (See also *Alkali metal compounds; Potash.*)
ammino-, work of adding NH_3 or removing it from $KI\cdot 6NH_3$, 692[8]
sepn. from Al compds., P 649[2]
in textile printing practice, 3352[2].
Potassium copper selenate, dissoc. pressure of hydrated, 347[5].
Potassium copper thiosulfate, 1767[4].
Potassium cuprocyanide, hydrolysis by H_2SO_4, 3141[9].
Potassium cyanate. (See also *Alkali metal cyanates.*)
crystal structure of, 318[1]
oxidation to nitrate, 1363[7]
Potassium cyanide. (See also *Alkali metal cyanides, Cyanide process.*)
chloride detn. in, 2632[7]
effect on catalase of blood, 2337[2]
on liver arginase activity, 3706[2].
on nerves, 2020[6]
on oxidative metabolism of *Planaria dorotocephala*, 3515[5].
on O metabolism of *Planaria dorotocephala*, antagonism of anesthetics to, 3516[1]
on urease, 210[2]
melting p. of, 2103[8].
poisoning by, 3041[2]
prepn. of, 2103[8]
reaction with $C_6H_5CO_2H$ and AcH, 2906[7]
with oximes, 2322[2]
with pernitroso derivs., 595[9]
from sugar beet molasses, 2563[2]
Potassium deposits. See *Potash*
Potassium dichromate, actinoscopic reaction of, 545[5].
analysis of, 3406[2]
for analytical work, specifications for, 3406[5]
catalytic decompn. of H_2O_2 by, Co salts as promoters in, 3266[6].
chromium atom in, configuration of, 2781
const. paramagnetism of, 2781[9]
effect on yeast, 3308[1].
radon effect on, 1556[4].
reactions on boundary between solns. of $Pb(NO_3)_2$ in water and of, in gelatin, 1010[7]
titrations with, diphenylamine and K ferricyanide as indicators in, 2963[7]
Potassium diiodoselenocyanate, 346[1].
Potassium dimolybdomalate, 1181[9].
Potassium diphenyl phosphate, hydrolysis by phosphatase, 3701[4]
Potassium dithionate, formation of, 1187[1].
system: H_2O–BaS_2O_6–, 2293[8].
Potassium ferrate, 157[1]
Potassium ferricyanide, absorption of β rays by, 3127[9].
as indicator in titrations with $K_2Cr_2O_7$, 2963[7].
manuf. of, P 3065[6]
methemoglobin formation from hemoglobin by, 1099[8].
polarization of Pt electrodes in aq. solns. of, 2939[2].
reaction with blood pigments, 926[1].
with carbohydrates, 742[4]
with hemoglobin, oxyhemoglobin and carbonylhemoglobin, 1821[8]
with morphine, 691[1]

with $Na_2N_2O_2$, 1769^{9}.
Potassium ferriphosphite, 2793^{9}.
Potassium ferrocyanide. (See also *Alkali metal ferrocyanides*.)
compds. with ferrocyanides of Co, Ni, Fe, Sn and Sb, 2797^{6}.
decompn in light, 1357^{6}.
effect on case-hardening, 3428^{4}.
as iron source for plants, 1298^{1}.
oxidation by Br water, rate of, 1348^{3}
polarization of Pt electrodes in aq. solns. of, 2939^{1}
precipitation of colloidal $Fe(OH)_3$ with, 3609^{6}.
soly. of, 1160^{6}.
Potassium fluoborate. See *Potassium borofluoride*.
Potassium fluoride. (See also *Alkali metal fluorides*.)
analysis of KHF_2, 1966^{6}
heat of formation of KF, 2111^{1}
photoelec. effect in KF, 2785^{8}
Potassium fluorosulfonate, prepn of, 2293^{8}.
Potassium fluosilicate, manuf. of, P 1499^{1}.
Potassium formate, effect on fermentation by yeast, 2866^{6}
reaction velocity with I, 1953^{9}
viscosity of *N* soln. of, 851^{3}
Potassium halides (See also *Alkali metal halides*.)
equil of amalgams with mixts. of Na halides and, ionic activity *vs* concn in, 2932^{1}
potentials of mercurous halide electrodes in aq solns of, 3377^{1}
soly in alc -water mixts, 2772^{9}, 2773^{1}.
system. Pb halide water-, 3402^{5}.
trihalides, spectrum of, 2451^{6}
Potassium hydrogen permonosulfate, prepn. of, 1573^{2}.
Potassium hydroxide (See also *Alkalies*.)
activity coeff of, 1935^{9}
activity coeffs. in solns. of KBr and KI, 3372^{9}.
adsorbents for, 2104^{1}
adsorption by cellulose, 2771^{4}
alc, as catalyst for racemization of optically active ketones, 2325^{1}.
analysis of, 3406^{6}.
for analytical work, specifications for, 3406^{4,8}.
bubbles in aq. solns. of, surface phenomena of, 2605^{6}.
manuf. from crude potash, 2621^{8}.
potassium detn in, 3406^{7}.
reaction: $Cl_2 + 2KOH = KCl + KClO + H_2O$, 720^{8}
reaction of alc., with arylhydroxylamines, 2153^{7}
reaction of alc, with chloronitrobenzene, 1793^{6}.
reaction of fused, with EtOH, with AcH, and with Me_2CO, 1588^{2}.
reaction with carbohydrates, 3692^{3,9}.
with $Fe_2(SO_4)_3$, 3259^{1}.
with Fe porphyratins, 3701^{1}.
recovery from beet molasses or fermentation residues, P 676^{1}.
sepn. from NaOH, P 482^{8}, P 802^{9}.
solid soln with NaCl, P 2566^{3}.
specifications for, 2798^{8}.
Potassium hypochlorite. (See also *Alkali metal hypochlorites*.)
reaction: $Cl_2 + 2KOH = KCl + KClO + H_2O$, 720^{8}.
Potassium iodate, acid salt $[KH(IO_3)_2]$ as volumetric standard, 348^{6}.
adsorption isotherms of, 3605^{6}.
reaction with Se_2Cl_2, 2294^{4}.
standardization of HCl against, 1040^{9}, 2129^{1}.
Potassium iodide, absorption by skin, 1091^{7}.
absorption of β-rays by solns. of, 3127^{9}.
absorption spectra in solns., variability in relation to charge distribution in mols., 3130^{8}.
absorption spectra of KI_3, 2120^{1}.
actinoscopic reaction of, 545^{7}.
adsorption isotherms of, 3605^{8}.
crystals, producing large, 2602^{6}.
crystal structure of, 131^{1}.
effect in N fertilizers, 259^{1}.
effect on circulation, 1856^{9}.
on colloidal As_2S_3, 1933^{9}.
on diastatic effect of saliva, 2507^{7}.
on I loss from alc. solns., 3208^{9}.
on liver arginase activity, 3706^{9}.
on yeast, 3308^{1}.
elec. cond. of, 3618^{5}.
elec. cond. of aq. solns of, effect of I on, 1015^{3}
elec cond. of mixt. with AgI, 2276^{5}.
formation of KI_3 from KI, 3119^{5}
in goiter prevention in pregnant ewes, 450^{4}
iodine soly. in, 1938^{7}.
peptizing action on gelatin in H_2O, 3626^{3}
photoelec effect in, 2785^{8}.
purity of com, 2559^{9}.
reaction velocity with $K_2S_2O_8$, 1953^{9}.
reaction with $MeCHBrCO_2H$, 861^{5}
reaction with $SnCl_4$, 25^{8}.
soly of I in, 1161^{4,5}
solns in MeOH, viscosity and d. of, 3616^{5}.
spectrography of solns. of mixts of I and, 3119^{4}.
spectrum of, 2789^{9}
system HgI_2-acetone-, 2035^{9}
Potassium iododiselenocyanate, 346^{1}
Potassium ion. (See also *Alkali metal ions*.)
absorption and liberation of, in colloids of clay, 2890^{2}.
absorption by intestine, 2009^{3}
in blood, effect on reaction and ion equil, 1098^{4}.
coagulation of Au sols by, 3613^{4}.
detn. in ocular fluids, 2507^{1}.
effect on autolytic NH_3 formation in tissues, 3726^{5}
on blood sugar, 1164^{1}
on cardiac fibers of vagus, 1162^{3}.
on concn. in intestine and uterus, 1860^{8}.
on diuresis, 1855^{2}.
on edema in nephritis, 237^{4}
on gastric gland secretion, 1275^{8}
on pituitrin blood-sugar reaction, 449^{3}.
on sugar assimilation by oxygenated yeast, 1829^{6}.
on urine secretion, 777^{7}.
on viscosity of colloidal Hg derivs. of sulfosalicylic acid, 3611^{4}.
hydration of, 536^{2}.
muscle tonus and, 3497^{6}.
permeability of plant cells to, 3022^{4}.
size of, effect on equation of state for KCl, 1928^{3}.
transference no. in KNO_3, 3118^{6}.
Potassium iron sulfate. See *Alums*.
Potassium lead bromides, 3402^{5}.
Potassium lead chlorides, 3402^{5}.
Potassium lead iodide, 3402^{5}.

Potassium lead nitrate, 879[9].

Potassium magnesium chloride. See *Alkali metal magnesium chlorides; Carnallite*.

Potassium magnesium sulfate, thermal decompn. of, 347[2].

Potassium manganioxalate, decompn. in light, 3646[8].

Potassium mercury chloride, formation of, 3119[5].
satn. pt. of aq. soln. of, 2459[4].

Potassium mercury cyanide, isomorphism of $K_2Zn(CN)_4$ and, 2798[2].

Potassium mercury iodides, 2935[9].

Potassium mercury oxalates, 2466[4,5].

Potassium meta-arsenite, oxidation by atm. O, kinetics of, 1017[4].

Potassium metabisulfite, spectrum of, 541[9], 1355[6].

Potassium metaphosphate, luminescence of, U as activator of, 2286[4].
system $Na_4P_2O_7$–, ionization in, 2614[3].

Potassium molybdenum bromides, 2796[8].

Potassium nickelo-phosphite, 2794[1].

Potassium nickel selenate, dissoc. pressure of hydrated, 347[5].

Potassium nitrate. (See also *Alkali metal nitrates*.)
absorption of β-rays by, 3127[5].
absorption spectra in solns., variability in relation to charge distribution in mols., 3130[4].
Beer's law in dil. solns. of, 3620[6].
decompn. of, 2467[1].
effect on growth of wheat roots, 2181[1]
as fertilizer, 258[9]
heat of diln. of, 1749[4]
manuf. of, in Mongolia, 788[9].
mutual soly. increase of org. compd. and, in aq. EtOH, 3116[8]
production in Germany 200 years ago, 1132[2].
reaction with Sn_2H_2, 1768[1].
spectrum of, 3250[1].
system $(NH_4)_2SO_4 + 2KNO_3 \rightleftarrows 2NH_4NO_3 + K_2SO_4$, 537[8]
system. $Pb(NO_3)_2$–$Ba(NO_3)_2$–H_2O–, 879[9].
system. K_2SO_4–H_2O, 693[4].
systems. K_2SO_4–H_2O–, $NaNO_3$–H_2O–, and H_2O–Na_2SO_4–K_2SO_4–$NaNO_3$–, 1164[1,8].
system. H_2O–NH_4NO_3–, 693[4].
transference no. of K ions in, 3118[4].

Potassium nitrite, surface tension of solns. of, 2770[6].

Potassium osmate, as catalyst for HCHO decompn., 38[3].

Potassium oxalate. (See also *Alkali metal oxalates*.)
effect on blood glucolysis rate, 2539[4].
effect on blood sugar detns., 1824[1].
photochem. reaction with I, measurement of energy absorption attending, 1032[6].
reaction with I, effect of intensity of illumination on velocity of, 2123[4].
system: HgC_2O_4–H_2O–, 2466[4].
system: KCl–H_2O, 2466[4]
system: water–, 3143[2].

Potassium oxides, 2626[9].
reduction of, 2103[8]

Potassium palladium oxalate, prepn. and properties of, 2625[4].

Potassium pentaborate. See *Alkali metal pentaborates*.

Potassium pentaformatothoriate, 1569[6].

Potassium pentathionate, decompn. of, in aq. soln., 559[1].

Potassium perborate. See *Alkali metal perborates*.

Potassium perchlorate. (See also *Alkali metal perchlorates*.)
crystal structure of, 526[1], 3597[4].
detn. of, 3660[6].

Potassium permanganate, crystal structure of, 526[1], 3597[4].
desoxidation in alk. soln., 3259[3].
effect on tetanus toxin, 3731[8].
effect on yeast, 3308[1].
manganese atom in, configuration of, 2781[5].
-manganese dioxide electrode, 1940[7].
manuf. of, analytical control in, 3145[2]
mixt. with thyroid ext., 3777[4].
oxalic acid oxidation by, 1163[4].
oxidation of mixed soln. of 2 reducing agents with, 2775[7].
oxidimetric detns. by, 3661[1].
radon effect on, 1556[9]
reaction velocity with $H_2C_2O_4 + MnSO_4 + H_2SO_4$, 1953[9].
reaction with H_2S, 1186[9].
reduction of, velocity of, 160[5]
reduction with org. reducing gases, prepn. of colloidal MnO_2 by, 3111[9]
solid soln. with $BaSO_4$, P 2566[1]
specifications for, 2798[5].
spectrum of, 1952[3]
standardization of, 1770[7]
standardization of, fixanals for, 1771[2].
standardization of thiosulfate solns. with, 2630[5]
titration of arsenious acid with, 3145[1]
titration with H_3AsO_3, 2142[6]
in water for poultry, 252[3]

Potassium persulfate, corrosion of Cu, brass or bronze by, 2770[8]

Potassium phenoxide, detection of moisture in, 2840[7].
prepn. of, 2840[7].

Potassium phosphate. (See also *Alkali metal phosphates*.)
crystal structure of KH_2PO_4, 526[2]
effect of KH_2PO_4 on diuresis, 1855[7]

Potassium plumbopyrophosphate, 2794[2].

Potassium polyselenide, 559[5].

Potassium polysulfide. (See also *Alkali metal polysulfides*.) 559[6].
as fungicides, 2223[6].
prepn. of, 2294[8]

Potassium pyrocatechol aquotungstate, 557[3].

Potassium pyrosulfite. See *Potassium metabisulfite*.

Potassium salts. (See also *Alkali metal salts; Fertilizers; Potash*.)
properties of, comparison with Na salts, 2103[7].
of saliva, action of vegetative poisons on, 456[9].
sepn. from Na salts, NH_4 oxalate as reagent for, 1189[6]
in soil media, effect on carbohydrate metabolism of plants, 297[4].
from sugar beet molasses, 2593[9].
vol. change in dissoln. of, theory of internal pressure and, 2931[2].

Potassium silicate. See *Alkali metal silicates*.

Potassium sodium tartrate, chromium extn. from leather by means of, 3834[4].
crystn. of, P 1696[1].
crystals, angle variation during growth of, 2602[4]

Potassium sulfates. (See also *Alkali metal sulfates*.)
oxidation with F, 2794[3].
$KHSO_4$, absorption of β-rays by, 3127[8].
reaction with F, 2293[5].
K_2SO_4, activity coeff. of, 1347[9], 1935[8].
as fertilizer, 3205[9].
reaction with F, 2293[5].
specifications for, 2798[8].
system: $(NH_4)_2SO_4 + 2KNO_3 \rightleftarrows 2NH_4NO_3 + K_2SO_4$, 537[8].
system: $Ce_2(SO_4)_3$-H_2O-, 3401[7].
system: HNO_3-H_2O-, 693[5].
systems: KNO_3-H_2O-, Na_2SO_4-H_2O-, and H_2O-Na_2SO_4-$NaNO_3$-KNO_3-, 1161[5,6].
Potassium sulfide. See *Alkali metal polysulfides; Potassium polysulfide*.
Potassium sulfite. See *Alkali metal sulfites*.
Potassium tartrate, $KHC_4H_4O_6$, detn. of, 1043[2]
effect on wine development, 3771[3].
Potassium tellurite, in differential media, 1645[7]
Potassium thiosulfate, reaction velocity of KI with, 1953[9]
Potassium tin iodide, 25[9]
Potassium trihalides See under *Potassium halides*
Potassium triiodide. See under *Potassium iodide*.
Potassium tripyrocatecholatomanganate, 717[6].
Potassium tripyrocatecholatostannate, 3404[2]
Potassium triselenocyanate, 346[1].
Potassium trithionate, decompn. of, in aq. soln., 559[1]
Potassium uranylphosphite, 2793[7].
Potassium vanadate, 558[1].
Potassium vanadium sulfate, 2626[3].
Potassium zinc cyanide, isomorphism of $K_2Cd(CN)_4$ and, 2798[2]
Potassium zinc selenate, dissoc. pressure of hydrated, 347[6]
Potato (See also *Sweet potato*.)
acid- and base-forming elements in peeled raw, 459[7]
adsorbing power of, 1739[3].
black heart of, 2351[4].
bud inhibition and apical dominance of, effect of thiourea on, 2351[2].
cellulose content of, 3476[6].
compn. of Colorado, 3714[2].
disease resistance of, fertilizing in relation to, 471[5,8].
drying of, P 1288[3].
fertilizer expts. on, 962[3].
fertilizers for, 88[1], 1681[8], 3057[7].
$Ca(NO_3)_2$ as, 3531[2].
potash as, 642[8], 1683[1].
fertilizers (nitrogenous) for, 3531[1].
fertilizing, effect of method on yield, 1488[7].
germination of, 2350[9].
growth in sand cultures, effect of nutrient solns. on, 1298[3].
leaf-roll disease, effect on compn. of tuber and "mother tuber," 2182[9].
moisture and N in, variation during growth and storage, 434[1].
oxidation mechanism of, 1840[4].
ripening and maturing of, 3716[9].
soft rot of, differentiating bacteria causing, 3481[2].
soils for, 2220[1].
starch extn. from, without loss in nutrients, 3319[6].
tuberization in, chem. changes in, 3483[4].
tuber tissue, isoelec. pt. for, 2352[2].
wart disease in, soil treatment for, 88[1], 2385[4].
wart disease in, treatment with S, 3769[5].
Potato beetle. See *Leptinotarsa decemlineata*.
Potential, electric. (See also *Overvoltage; Photoelectric effect, Photoelectricity; Piezoelectricity; Thermoelectric effect; Thermoelectricity*.)
of accumulators, dependence on amt of acid present, 2267[3].
of aluminum, 864[8].
in animal organism, theory of, 430[2].
at anodes of Cu and Ag, periodic changes in, 3377[3].
biol., Röntgen ray effect on, 3303[7]
book: Studien uber d. elektromotorische Verhalten d. Aluminiums u. seine Verflüchtigung als Halogenid, 700[5].
at boundary of 2 liquid phases, 328[4], 1023[7]
at boundary of 2 liquid phases, thermodynamic difference of, 2780[4].
of cadmium Mg alloys, 1165[9].
of calcium electrodes, 2939[5].
of carbon arcs with arbitrarily varying currents, 339[2]
cathode fall in Kr and Xe, 1025[7].
in cell, seat of, 874[5].
of cells of pairs of reference electrodes, 2112[2].
of cells, origin of differences between interior and exterior, 1246[9].
of chromium ions, 2417[8].
of colloids of cells and tissues, effect on staining capacity, 1817[5]
concn., of solns contg. acid, 327[9].
of copper oxide electrodes, 1023[2].
of copper refining cells, 3394[1].
of copper to cuprous ion, 1745[9].
of copper-Zn cell, increasing, 2954[9].
crit., 2947[4].
of emanation, 2450[6]
of hydrogen, 211[6].
of light atoms, 2618[3].
of mercury vapor, 3128[9].
of oxygen, 2790[6].
of secondary electron emission from Fe, Ni and Mo, 7[2].
current e. m. f. curves of Ni and Al, 141[8].
decompn., of metallic chlorides dissolved in anhyd. pyridine, 690[1].
dependence of time-lag of sparking on, 2451[8].
diffusion, liquid boundaries and, 2938[4].
distribution in layer of liquid dielec. medium, 2780[7].
effect on corrosion rate of Fe in presence of CO_2 and air, 2648[4]
effect on current efficiency in electrolysis, 3394[6].
electrode, 532[3].
of aldehydes, as a measure of their reactivity, 2977[4].
of calomel, effect of temp. on, 2611[2].
electrokinetics and, 2779[4].
of manganese and its alloys, 3123[7].
of mercury against its ions in aq. methanol, acetone and pyridine, 1347[5].
Nernst's theory of, 2104[9].
significance of, 2446[4].
for steel, 2644[9].
of thallium, 2276[8].

theory of, 687[2].
of electrodes (heterogeneous), 2780[2].
in electrolysis, graphic analysis of, 1359[3].
of electrolytic cell, app. for measuring, 2447[4].
excitation, of N band spectra, 1355[1].
excitation, of spectra A II and Ne II, 1950[2].
of fluorine, 141[7], 697[6], 1937[9], 2938[5]
formation of, hydration and adsorption in mechanism of, 2939[4].
of glycocoll solns., effect of neutral salts on, 3629[9]
between hydrogen electrode and quinhydrone electrode, 1194[1].
of hydrogen electrode, change with pressure, 1169[9].
of hydrogen electrode, effect of Ra rays on, 1352[4].
of hydrogen in presence of catalytic Ni and Cu, 1548[2].
increase when reducing agents are added to oxidants, 2272[2]
ionization, absorption spectra and, 2118[7].
Bohr theory and, 3636[2].
calcn. of, 331[4]
effect on thermodynamic stability, 1749[5]
of hydrogen, 350[7].
of ionized Mn, 2784[9].
of methane, 3129[8]
of Nt and HF, 145[6]
of NO mol., 2614[5]
for nitrogen compds., 2787[6]
of nitrogen in relation to its neg. band spectrum, 704[1]
by positive ion impact, 2281[2]
of rare earth elements, 2945[8]
relation to chem. function of the elements, 331[5]
of silver, 2946[3]

Praseodymium oxides, 341[6].
crystal structure of Pr_2O_3, 3597[7].

Praseodymium phosphate, 3658[2].

Praseodymium praseodymate, 344[8].

Praseodymium uranyl sulfite, 558[6].

Praseodymium zinc nitrate, soly. of, 3258[1].

Precious stones. See *Gems*.

Precipitates. (See also *Liesegang rings*.)
color of, influence of adsorption on, 686[5]
hemolysin in heterogenetic, 1661[4].
ignition of, likely to be reduced by hot carbonaceous material, 3660[2].
measurement of vol. of, analysis by, 2469[4].
particles in, detn. of size distribution of, 469[7].
stirring, app. for, 522[2]
washing app. for, 2921[7]

Precipitation. (See also *Cyanide process*, *Separation*.)
of dust in port. cement mills, app. for, 2236[7].
elec., 150[9], 151[1], 340[2], P 1568[3]
app. for, P 714[9], P 715[1], P 876[3], P 1360[7,8], P 1958[3], P 2127[3], P 2290[2], P 2462[6], P 3398[4].
in brown coal briquet factories, 811[7], 1567[2], 2904[3], 3554[3].
in cement plants, 2237[6].
in chem. industry, 2125[5].
by Cottrell app., radio interference from, 1761[9]
in gas streams, 3648[7].
from P vapors, P 2162[8].
phys. theory of, 1956[7].
of rubber on metals and wood, 3839[7].
from smoke and gas, 1567[1].
for SO_3 purification, 1520[7].
of tar from gas, 2242[9].
in textile industries, 714[3].
electrometric study of, water-alc. mixts. in, 1770[4].
fractional, 1009[8], 1935[2].
of inorg. chemicals, losses in, 955[7].
of metals in solns. by gas, app. for, P 1541[1].
stages of, 854[6].

Precipitin reaction, in animal relationship study, 1461[3]
antigen and antibody in, 1455[6].
autolysate-, in typhoid fever, 2196[8].
blood serum in, classification of, 1266[9].
effect of proteins, *d*-glucose and sucrose on, 2365[4].

Precipitins. (See also *Agglutinins*.)
of hemoglobin, 1270[2]
milk reaction to, of blood serum, 1669[2].
specificity of bacterial globulins for homologous, 2365[7]

Pregnancy. (See also *Abderhalden reaction*.)
acetonuria in, 3031[9].
acid base equil. of blood in, 628[6], 3729[3].
adrenaline content of blood in, effect of placenta and hypophysis on, 2705[6].
albuminuria of, 1109[4].
amino acid excretion in urine in, 3497[6].
bile in, cholesterol content of, 1845[6]
bile in, lipoid content of, 1845[6]
blood and blood sugar during, effect of changes in, 1264[2]
blood coagulability during, 3733[8].
blood in, amino acids and polypeptides of, 1265[7]
blood lipoids in, 621[6].
blood serum in, enzyme content of, 3034[3].
lipoids of, 3031[6].
lipolytic enzymes in, 1453[7].
nephelometry of, 1822[7].
photochem. reaction of, 2015[1].
blood sugar in, 945[2], 3031[8].
carbohydrate metabolism in, 1667[7]
cerebrospinal fluid in, cholesterol in, 942[7].
cholesterol in blood and duodenal fluid during, 1453[6]
complement deviation by serum in, 3736[7].
corpus luteum in, myelins in, 2009[5].
diagnosis of, 235[3], 2364[2].
diuresis and metabolism in, action of I-thyroglobulin on, 780[2].
edema of, origin of, 3187[2].
gastric juice in, 2362[6].
glucosuria of, insulin effect on, 1662[1].
goiter prevention in, with KI, 450[4].
hemoglobin in, resistance of, 3035[1].
insulin and glucose in, 1272[4]
internal secretion, basal metabolism and transformation of protein in, 3733[4].
ketosis in, 3036[8].
kidney function in, 1108[1], 3032[3].
effect of displacement of ions in blood on, 1265[6].
indicanemia as test of, 3032[4].
metabolism in, 1106[8], 1264[6].
metabolism of cholesterol and phosphatides in, 1834[9].
mineral utilization by ewes during, 225[5].
pigment metabolism of liver in, 3032[3].
skin resistance during, 945[8]
syphilis treatment in, 3039[4].
tetany of, guanidine poisoning and, 1451[7].
tissues in, cholesterol and phosphatide distribution in, 1839[2].
toxemia of, acidosis tendency in, 3731[4].
toxemia of, edema in, 3503[8].

toxicosis in, acetone body concn. in blood in, 235^6.
trypsin flocculation reaction in serum in, 1662^3.
in tuberculosis, prognostic value of blood cholesterol of, 1847^6.
urobilinemia in, 3028^6
vitamin A storage by young white rats by feeding horseflesh to mother during, 616^9.
vitamin B intake in, 3720^5
water metabolism in, 779^9.

Prehnite, 3409^3.
in dolerite, 2805^5.
of Fichtelgebirge, 885^1.
from Mount Botogail in Siberia, 3667^9.

Preservation. (See also *Foods*, *Meat; Wood;* etc.)
of org. materials, P 2215^6

Preservatives (See also *Food; Wood;* etc.)
chem. constitution and properties of, 3712^7.

Preserves. See *Conserves*.

Press. (See also *Filters*.)
for extn. of palm oil, 3582^6.
for oil seeds, 514^5
for paraffin, etc., P 316^9
soap, 304^2.

Press board See *Paper board*.

Press cake. See *Oil cake*

Pressure (See also *Atmosphere*, *Blood pressure; Compressibility*, *Manometers*, *Osmotic pressure*, *Vacuum; Vapor pressure*, *Vacuum*.)
coeff. of cohesion in metals, 1736^9
controlling, in x-ray tubes, etc., P 317^4.
crit.—see *Critical constants*
effect on absorption of HCl in infra red, 1550^7
on decompn. rate of $KClO_3$-MnO_2 mixts., 2271^5.
on equil. of binary systems, 1021^1, 1164^8, 3627^4.
on explosion wave formation, 3570^9
on kidney, 1867^4
on potential of H electrode, 1109^9.
on salt deposit mineral, 884^2.
on surface tension, 2938^3
on thermal cond. of gases, 2111^4
on viscosity of liquids, 133^7, 1737^7.
in explosion of gaseous mixts. at high ds., 1524^2.
of explosions in closed vessels, measurement of, 1141^8.
of gases, relation to temp. and d., 1736^9.
high, alkali metals under, 1542^8
catalytic hydrogenation of CO group at, 3163^9
catalytic reduction of CO group in aromatic compds. at, 2487^6
catalytic synthesis at, 1937^5
in chem. industry, 2712^3
elec. resistance of K under, 698^4
pump for circulating gases under, 1439^5
reactions, app. for, 2765^7.
reactions between gases at, 3373^7
hydrogenation under, at high temp., 1587^9.
indicators for boilers in sugar factories, 1532^8.
inter-mol. forces and, 143^7
internal, and free space, 3595^5
history of, 1178^2.
theory of, 133^4.
theory of, vol. change in dissoln. and, 2931^7
low, adsorption of gases by activated charcoal at, 1346^4.
low, catalytic hydrogenation at, 382^9.
measurement of, app. for, 1731^4.
in can of food, 72^6.
device for, for use in molding cement mortar briquets, 3791^3.
of hydriodic acid gas, 3595^4.
in mold of brown coal briquet press, 2241^1.
in oxygen bomb detns., 1193^2.
recording small differences, app. for, 2922^1.
reduced, metabolism under, 1836^9
regulation in distns., app. for, 3101^5.
regulation of, of gas at oil wells, P 662^9
regulators, 522^3, P 848^4, 2739^7, 3592^3.
seal for gases under, P 2099^1
susceptibility of diamagnetic gases and, 2781^2.
temp. charts, 686^3.
treating materials continuously under, app. for, P 2068^8.
in vacuum pumps, regulator for, 2765^8
in vacuum, variation with temp., 3382^4

Pressure gage See *Manometers*

Priestley, Joseph, 3594^3.

Primers. See *Detonators*, *Cartridges*.

Primeverase, in emulsion of almonds, 435^1, 1632^5.

Primeverose, 1631^8.
from enzymic hydrolysis of rhamnicoside, 220^7

Primeverosidase, 1631^8
in emulsin of almonds, 435^1, 1632^6.

Primeverosides, 1631^8

Primroses (*Primula*), flowers of, substitute for, 3536^1.
saponin of *Primula elatior*, effect on cholesterol content of serum, 3509^9

Primula. See *Primrose*

Primulic acid, toxicity of, and detoxication by cholesterol, 2202^9

Printing (See also *Dyeing*, *Engraving*, *Photography; Inks*.) P 3273^1
blankets of rubber for, P 974^8
blanket with nitrocellulose back and rubber face, P 1697^4
book, reproductions for, P 556^4
colloid chemistry and, 3579^7
collotype plate for, P 1362^4
electrodeposited surfaces of Cr or Cr alloy, P 2126^9.
intaglio plates or cylinders, photographic and C. tissue resist etching process for producing, P 1569^3
multicolor, P 3354^8
photocollographic plates, P 2292^8
photocollographic plates, film for, P 3399^7
of photographs in natural colors on paper, P 715^9.
photomech. plates, P 155^2.
photomech. plates, colloids for, P 974^4
photomech., surfaces for, P 974^3, P 1184^1, P 1961^2, P 3216^8.
plates for, from celluloid, P 504^4.
Cr plating on, 1565^4.
electroplating, P 342^7.
photographically sensitive compn. for, P 1569^4.
reproducing half tone, P 155^1.
polychromatic "security" print, P 1184^2
surfaces for, P 804^9.

Procaine, anesthetic action of, modification by

cephalin and its decompn. products, 1464[1].
borax solns. of, 2390[4].
color reaction of, 2300[9].
diffusion into gelatin contg. lecithin, 427[2].
dissocn. const. for, 2108[5].
distinguishing from cocaine, 2225[7].
effect on small intestine, 452[3].
on sphincter muscle of gall bladder, 2701[8].
on tonus of skeletal muscle, 1859[3].
esters of the type of, 3168[7]
hydrogen-ion concn. of, effect of sterilization on, 1131[3]
as local anesthetic, 1851[1].
potentiation of solns. of, 1852[4].
synergistic analgesia and anesthesia with, 1851[4].
Producer gas. See *Gas, illuminating and fuel.*
Proganol, silver content of, 3778[4].
Projectiles, bands on, alloy for, P 35[9].
guanidine picrate in, P 112[9].
hand grenades, 3237[7].
Projection screens. See *Screens.*
Prolamines, immunological properties of, 626[9].
isoelec pts. of, 1420[7].
"Prolectite," 1776[8].
Proline (*2 pyrrolidinecarboxylic acid*)
attempted synthesis of, 2493[1]
and derivs., 1621[8].
detn in hydrolytic products, 3708[8].
dl-, copper salt, 2148[2].
dl, prepn. and phys. consts. of, 2493[1].
effect on tryptophan-aldehyde reaction, 3708[7].
l-, configuration of, 2982[3].
sepn. from hydrolyzed proteins, 1815[4].

β-Propylene glycol See *1,3 Propanediol.*
Propyl ether, prepn. of, 361^9
Propyl group, effect on hydrogenation of azines, 3282^9
Propyl iodide See *Propane, 1 iodo*
Propyl mercaptan, γ-(γ-chloropropylmercapto)-, 737^7
——, **γ-ethoxy-,** 737^4
Propyl sulfide, in petroleum distillates, action of NaOCl on, 278^5
Prosopis juliflora, gum from, 300^5
Prostate, carcinoma of, 3562^2
effect of injection of emulsion of, on N metabolism of normal, castrated and thyroidectomized rabbits, 776^2
Protalbumose See *Albumoses*
Protamines, cleavage by erepsin, 212^1
Protargentum, silver content of, 3778^4
Protargol, silver content of, 3778^4
silver dispersion in, 796^2
silver in, state of, 1495^9
Proteases, action of, 918^9, 1631^7
of *Bacillus proteus*, 2314^5
of blood serum, 3465^2
buffers in study of, 1632^3, 1998^1
constitution of, and mechanism of their action, 1631^8
digestibility of deaminated proteins through, 2337^6.
effect on tuberculin proteins, 2535^7.
ereptic components of plant, 1633^7.
in herring decompn., 3018^9
hydrocyanic acid activation and inhibition by plant, 1245^4.
of *Hymenomycetae*, activity in assocn. known as *Mycorrhiza*, 1424^7.
review of, 1636^1.
specificity of animal, 212^1, 921^7, 3700^2.
from *Staphylococcus albus*, effect of lime on, 2260^9.
synthetic effect of plant, 1820^5.
of yeast, 3018^5.
Protein metabolism. See *Metabolism.*
Proteins. (See also *Albuminous substances; Amino acids; Proteolysis.*)
absorption of incompletely digested, 2697^8.
absorption of undigested, 3505^1.
acid, 1819^4.
acid amide linkage in, 1088^2.
acid-base equil. of, effect of temp. on, 2861^4.
adsorption isotherm of solns. of, 3^1.
adsorption of decompn. products of, by form elements of blood, 1276^5.
of Adzuki bean, 2520^6
in albuminuria in nephritis, source of, 67^8.
in albuminuria, sepn. of, 2343^7
alcoholytic splitting of, 1116^4.
amino acids from, 2311^8
amino acids from hydrolysis of, detn. of, 59^2
amino N of, interaction with glucose, 1635^4.
amyloidosis from injections of, 1662^7
anaphylaxis, production by, effect of stage of artificial digestion on, 1849^4
anaphylaxis, reaction in tuberculosis to "Tebeprotein" as, 782^4
of antidiphtheria serum, pptn. of antitoxin, 948^2.
antigen antibody reaction, 235^7
antigenic character of heated, 1267^5
antigenic, in exts. of horse dander, 2698^1
in antipneumococcus sera, immunol. characteristics of, 2697^4
arginine free, 925^5.
arginine in, mode of combination and detn. of, 925^7
assimilation in leeches, 2004^6
assimilation in leeches, production of glycogen and fat reserves during, 2004^1
in *Bacillus typhosus* old broth cultures, 1257^1
of bacteria, 2365^8
of barley, changes in dispersion during malting, mashing and fermentation, 1491^9
of beet roots and seeds, 2317^5
binding of acids and alkalies by, 429^7
of blood, 609^2, 920^1
acetylation of, 3017^1.
effect of bleeding on, 4035^6
tuberculin reaction and, 1415^2
in blood corpuscles (red), measure of variations of, 2171^4
in blood plasma, 1264^3
analysis of, 2174^3
"effective" osmotic pressure of, 3300^7
effect of India ink injection on, 3728^4
effect on coagulation time, 3726^7
function of, 1410^8.
in health and disease, 1101^5
of blood serum, 2507^2
acid pptn. of, 3701^8.
alkali union with, 2685^9
buffering properties of, 1637^1
colloidal condition of, 1661^8.
detn. in tuberculosis, 1446^2.
effect of nutritional factors on, 2526^7
effect of phys. influences on colloidal condition of, 1636^4.
effect of thyroid feeding on, 1440^9.
electrodialysis of, 3704^4.
nomenclature of, 2170^1.

refraction of, 2685^{6}.
relation to cholesterol, 624^{1}.
sp. rotation dispersion of, 1819^{9}.
tyrosine and tryptophan content of, 2012^{4}.
viscosity and detn. of, 937^{7}.
viscosity of, 623^{9}.
in blood serum of animals suffering from burns, 1844^{2}.
books. 3020^{6}; Mucoproteins, 430^{7} Chemistry of the, and its Econ. Applications, 3020^{6}.
bread, biol. value of, 2523^{2}.
of cacao bean, isoelec pt. of, 1681^{4}.
in cancerous tissue, 3735^{6}.
catabolism products of, effect on insulin action on respiration, 3038^{5}.
in cauliflower bud, 3715^{8}
in cecal contents, 3500^{6}.
in cerebrospinal fluid, 1450^{9}.
colloid reactions of, 1268^{1}.
in sleep, 2357^{9}
chemistry of, 692^{8}.
coagulation of, 2685^{4}
in drops, 1266^{9}, 3303^{6}
with org. acids in relation to structure, 3115^{9}.
coagulation of colloidal Au by, 1106^{6}.
colloidal state of solns of, 58^{6}.
complexes with hydroxides of tervalent metals, 1249^{7}
compds. with bases and acids and with halogens and S, 3817^{9}.
compds with trypsin and pepsin, 3176^{7}
constitution of, review, 767^{5}.
in corn, variation of, 62^{6}
cystine detn. in, 1252^{6}
cystine of muscular, in contraction, 3181^{9}.
deaminated, digestibility through proteolytic enzymes, 2337^{6}.
decompn of liver, effect of tuberculin on, 1445^{7}.
decompn products of, in blood, 2695^{9}.
decompn with trypsin during dialysis, 3302^{6}
degradation by hypobromite, 423^{2}.
denatured, prepn. of, 532^{9}
depolymerization of, and re synthesis of protein like substances from fission products, 918^{7}.
derivs , with high Br content, 919^{5}
detn. of, 2029^{4}, 3710^{1}.
in blood serum, 927^{9}, 1250^{7}, 2514^{7}
in cereals, 3317^{6}.
in cerebrospinal fluid, 3305^{8}.
in flour and grain, 460^{9}.
in milk, 2027^{8}
in wheat, 3321^{2}.
detn. of tyrosine, histidine and tyramine in, 1093^{8}.
detn of tyrosine, tryptophan and cystine in, 3306^{2}.
in diabetic blood, ratio with fats, 948^{6}.
diet, effect on kidneys, 1833^{9}.
diet, effect on N in urine of ruminants, 1437^{6}.
in diet of rats, egg white *vs.* casein as source of, 933^{2}.
diet rich in, effect on growth of white mouse, 1835^{2}.
diet rich in, in renal insufficiency, 2014^{4}.
diet without, metabolism of urinary N with, 1654^{9}.
-digesting power of papain, effect of reaction on, 3701^{2}.
digestion by pepsin, 3173^{1}.
in dough, colloidal behavior of, 74^{6}.
effect of superheated water on, 2863^{9}.
effect on acidity of fasting gastric juice, 2531^{8}.
on calcification, 439^{5}.
on Ca diffusibility, 1244^{1}, 2512^{2}.
on chloride equil. between plasma and cerebrospinal fluid, 3030^{8}.
on cond. of blood serum, 230^{2}.
on Au sols, 1545^{8}.
on H-ion concn. detn with bromothymol blue, 1094^{6}.
on ketone body elimination in diabetes, 235^{4}.
on metabolism of alkaptonurics, 945^{9}.
on N retention during growth, 2355^{9}.
on precipitin reaction, 2365^{5}.
on sensitivity to insulin, 1670^{1}.
on tryptophan-aldehyde reaction, 3708^{7}.
of eggs, N distribution in, 2171^{8}.
elasticity of solns. of, 610^{4}.
elec. conductance analysis of, 2630^{4}.
of embryonic tissue ext , effect on fibroblasts, 3467^{7}.
in feeding stuffs, 2550^{2}
in feeding stuffs for milk production, 3180^{3}.
fermentative hydrolysis of, nephelometric investigation of, 609^{4}.
films of, in rubber, 677^{6}.
films on collodion membranes, 321^{3}.
of fish muscles, transformation of, 952^{4}.
fixation by hydroxides of tervalent metals, 3168^{8}.
fixation by liver, 446^{4}
in flour from hard red spring and durum wheats, relation to baking quality, 2548^{6}.
in flour from New Zealand wheat, 2547^{9}.
fluids contg , changes in, 2439^{2}.
from follicular liquid, hydrolysis of, 2896^{2}.
in food, caloric values of, 619^{3}.
of forage plants, 2347^{1}.
formation in animals and plants, 3301^{5}.
formation in green plants, effect of chloroplasts on, 1426^{2}.
formation in plants, 1650^{3}
formol titration of, 3476^{9}.
gonococcus, in syphilis treatment, 2022^{9}.
halogenated, 767^{6}.
hemolysis of, effect of immune hemolytic serums on, 3019^{9}.
of *Hevea* latex, 1920^{9}.
hide, combining with Cr, 2090^{4}.
decompn. of, 1727^{6}.
ultra-violet light effect on, 123^{4}
hydrochloric acid effect on (with and without pepsin), 1087^{1}.
hydrogen-ion concn. of, detn. with quinhydrone electrode, 1193^{9}
hydrolysis by enzymes, 3303^{1}.
hydrolysis products of, 2683^{1}, 3703^{3}.
hydrolysis with alkali, 925^{7}
hydrolytic decompn products of, utilization by micrococci, 1829^{7}.
immunological properties of alc.-sol. vegetable, 626^{8}.
insulin activation by, 945^{2}.
iodine binding and dispersion of, 1089^{1}.
isoelec. pts. of, 1420^{2}, 1681^{4}.
isoelec. pts of plant, 1425^{8}.
in Japanese foods, nutritive values of, 1835^{4}.
in kieselguhr deposits of Luneburg heath, 2106^{2}.

labile, in plants, 1831[2].
of leaf cells, 1830[8].
leaf cytoplasmic, 1430[2].
liberation of adsorbed substances from, 3724[6].
lipo-—see *Lipoproteins*.
in liver during hunger, 3180[2].
maintenance values for, of milk, meat, bread and milk, and soy bean curd, 1436[2].
in manure, decompn. of, 259[2].
meat, nutritive value of, 2695[2]
in meat production, 775[9].
membranes of, ionic permeability of, 1940[5].
membranes of, permeability for ampholytes, 2513[3].
metabolism—see *Metabolism*.
metallic compds. of, similarities to soaps, 3088[2]
metamorphosis in germinating seeds, 2871[6]
milk—see *Milk*.
in milk production, peanut meal,[4] cottonseed meal and soy-bean meal as sources of, 2373[9].
mobility of, detn. of, 3612[3].
mol. state of, 611[2].
mol. wt. detn. of, 1256[1].
mol. wts. of, in phenol, 3018[9].
mol., detn. of cyclic complexes in, 430[2]
of muscle, colloidal behavior of, 211[1].
of muscle, isoelec. point of, 229[2]
of myxomycetes protoplasm, 1819[2].
in neoplastic autolyzates and filtrates, 3735[2]
nephritis requirements, relation of albuminuria to, 1450[9].
nitrogen detn. in, 2173[5].
nitrogen distribution in, detn. of, 2171[7].
nitrogen in muscle tissue, 2695[4].
nitrogen of, sepn. from non-protein N, 1825[7]
non sp. reaction, 1419[8].
nucleic acid compds. of, 52[2].
nutrition and, 617[2]
nutritive value of, in veal and calf sweet breads and in beef and pork meat, 2691[3].
osmotic pressure of, of serum and plasma, 3464[5].
osmotic pressure of solns. of, 1283[1].
in ovarian residue, 318[9].
oxidation of, effect of glutathione on, 426[4].
parenteral injection of, effect on blood, 3034[6]
parenteral reaction, dependence on nourishment, 2012[3].
in perspiration of horses, 3197[5]
phosphorous-free, of pancreatic cells, 3175[9].
photoöxidation of, velocity of, 2506[4]
from phycoerythrin and phycocyanine, 919[1, 2].
phys.-chem. characterization of, 2681[8]
phys. chemistry of, 1089[9]
in plant cells, labile modification of reserve, 2872[8].
poisoning from decompn. products of, 1266[9].
precipitation of, 1640[2]
precipitation of colloidal Au with, 2169[2]
prepn. of pure, 784[6]
in preserved foods, transformation of, 951[4]
properties of, 1246[4].
in puerperal serum, 1453[9].
radiated, 2508[7]
reaction with hypochlorites, 3010[2].
reaction with K of blood serum, 921[1].
requirement of cattle as indicated by fasting catabolism of dry cows, 1432[7].
requirements for milk cows, 2189[8].
requirements in acromegalia, 2364[9].
retention, relation of feed consumed to, 2356[6].
in rice (polished), 1090[3].
salt combinations with, 2343[1].
of seeds, effect on absorption of ions, 771[4].
in seeds, transformation during germination, 2690[7].
sensitization—see *Anaphylaxis*
sex differences in requirements of, 1430[6]
silver compds., soly. in blood and body fluids, 454[2]
silver compds. with, analysis of, 3211[3]
silver, official titles of, 3537[5]
silver, prepns., P 2019[4, 5], 3778[9]
soly. in fats, 926[3].
solns., chem. state of, 58[8]
solns., electrolytic concn. of, 3612[3]
soy bean, P 3543[9].
soy bean, decompn. of, 3302[7], 3463[6]
specific dynamic action of, 1836[7].
before and during puberty, 228[1]
causes of, 2694[1]
effect of venesection on, 3182[3]
relation to amino acid content of blood, 2192[5]

interference in mixed crystals, 684^{1}.
interferences, symmetry of, 1175^{7}.
internal absorption and "spark" lines, 3635^{6}.
ionization of air by, 2943^{4}.
ionometric measurement of, 1949^{8}.
irradiating melanosarcoma with, melanin excretion after, 2107^{7}.
irradiation in exophthalmic goiter, effect of thyroid on carbohydrate metabolism in, 1653^{5}.
J phenomenon in scattered, 146^{4}.
J-transformation of, 870^{1}.
J-transformation of, spectroscopic evidence of, 146^{8}.
K absorption discontinuity, magnitude of, 1351^{7}.
lab. for research on, 334^{8}.
law of Bunsen and Roscoe verification for, 2616^{9}.
laws in optics, 1354^{2}
measurement of intensity of, 1758^{2}, 2280^{7}
measurement of, spectrograph for, 15^{4}
in metal examn., 165^{1}, 526^{9}, 2637^{4}, 2650^{7}, 2651^{5}
in mol. wt. detns. on polymeric substances, 2117^{4}
from nickel, Fe and Cu, 707^{7}
in optical anomalies of crystals, 3130^{2}
in org. chemistry, 1587^{2}
penetration in alloys, correction for, 2601^{3}
penetration of salts into wood detd. by, 652^{2}, 3069^{8}.
photoactivation of cholesterol, fats, etc., by 3303^{2}.
photoelec. effect (compound) from, 70_{5}
photographic blackening law for, 117^{9}
plaster opaque to, P 1703^{4}
polarization by reflection from crystals, 1949^{5}
polarization of independent, theory of, 3635^{4}
polarization of primary beam of, effect of scattering substance on, 3266^{3}
protective material, P 3647^{6}
protective material, $BaSO_4$ as, 1029^{7}.
pulses, spreading of, 1176^{9}.
recrystn. and loss of strength as shown by, 1155^{9}.
reflection angles of elements from rock-salt crystals, 2786^{6}.
from reflection grating, 334^{7}.
reflection of, 706^{1}, $2453^{6,7}$, $2617^{1,2}$.
by calcite, effect of low temp. on, 2616^{8}.
on crystal lattice, 3266^{4}.
effect of crystal size on intensity of, 2786^{9}.
from fatty acids, 3130^{6}.
from fluorite crystals, 1354^{7}, 2925^{9}.
by LiF, NaF and CaF, 2786^{7}.
from KBr crystals, 146^{6}, 1758^{8}.
theory of, 2117^{6}.
refraction and dispersion by crystal reflection in mica, 1918^{9}.
refraction of, 706^{1}.
refraction of, in prisms, 1351^{7}, 2943^{2}.
refractive index and total reflection in vicinity of an absorption discontinuity of the mirror, 1175^{7}.
refractive index of, 3640^{1}.
resonance absorption of, 1354^{1}.
rubber, etc., examn. by, $3837^{2,6}$.
scattered, change of wave length of, 701^{1}.
directed quanta of, 11^{8}.
β-rays assocd. with, 114^{4}, 2787^{6}.
total intensity of, 146^{7}.
wave length of, 11^{9}.
scattering of, by Ca and F, 2453^{9}.
coeff. for, 1176^{5}.
coeff. of, ratio of modified to total, 2943^{3}.
coeffs. of, sepn. of modified and unmodified, 2117^{5}
Compton's theory of, 2787^{1}.
quantum theory of, 334^{6}.
selective effect in, 7^{7}.
theory of, 3639^{9}.
scattering of inhomogeneous, by microcryst. substances, 2280^{7}.
screen, P 2099^{6}.
sensitization of red blood cells for, by putrefaction-porphyrin, 2513^{1}.
soft, 2615^{9}, 2787^{5}
soft, from Fe, Co, Ni and Cu, 700^{8}.
spectrograph, 1923^{6}.
spectrometer for, 684^{1}
spectroscopy with, 2786^{4}, 3385^{1}.
spreading in crystals, continuity theory of, 2281^{6}
staining of tissues under influence of, 1218^{5}.
in steel examn., 32^{4}.
study method for soft, 512^{2}.
superposed, coherence of, 542^{5}
superposition and scattering of, 1351^{9}.
target, P 1541^{3}
term values, 2947^{4}.
therapy, phys. considerations in, 1106^{1}.
time lag of, 706^{6}.
transformation of energy in ionization by, 1758^{5}.
wave length measurements of soft, crystal for, 1029^{6}.
wave lengths of, 706^{3}.
in weld examn., 3140^{1}
yeast as a means of demonstrating the effect of, on various substances, 3744^{1}.
Rays, ultra-violet See *Light, ultra violet.*
α-Rays (See also *Helium*)
from actinium emanation and its next disintegration product, 1556^{5}.
anomalous dispersion of, 2278^{7}.
atom disintegration by, 1556^{7}.
collisions with atomic nuclei, 540^{8}.
delta rays produced by, in diff. gases, 1173^{7}.

effect on acetylene, 540^{9}, 1556^{6}.
effect on benzene vapor, 1556^{9}.
effect on heart action, 1246^{7}.
electron capture and loss by, 144^{9}.
electron capture by, in H, 2944^{5}.
excitation of x rays by impact of positive rays and, 2117^{6}.
ionization curves for, effect of metallic screens on form of, 3128^{3}.
ionization effect of, measurement of, 2116^{1}
ions produced by, chem. action of, 145^{1}, 2459^{6}, 3391^{2}.
of isotopes, 3264^{7}
long-range, from radioactive substances, 1756^{1}.
ozone formation under action of, 1760^{3}
from polonium, photographic action and luminescent power of, 3380^{4}
of radium, effect on titer of agglutinating serums, 627^{9}.
range of, theory of, 703^{1}
reflection from at. nuclei, 9^{4}.
retardation by material, 3638^{7}
scattering by at. nuclei and the law of force, 113^{5}
scattering through small angles, 3380^{6}
stopping powers of metals for, 3128^{5}
from thorium active deposit, 3380^{1}.
of thorium C + C′, 3380^{3}.
track app., 3128^{3}
with unitary charge, 3380^{5}
β-**Rays**, absorption by matter, 702^{7}, 1352^{7}, 3127^{7}.
absorption of, measuring, 2784^{3}
assocd. with scattered x rays, 141^{4}, 2787^{6}.
desensitization of heart for, 1246^{6}.
effect on bacterial growth, 3711^{9}
on enzymes, 2338^{4}.
on invertase, 1249^{6}
on pepsin, influence of temp. on, 2338^{5}.
on protoplasm of *Nereis* eggs, 950^{9}.

catalytic, of acid chlorides, solvents for, 1395⁹, 1396³.
electrolytic, app. for, 181⁴.
of immunol. substances, 3037⁶.
irreversible, 1593⁷, 3161⁷.
irreversible, electrochem. formulation of, 2611⁵.
with Jones reductor, effect of air in, 2297².
in living membranes, 610⁷, 2178³.
mechanism of, 744³, 1016⁷.
of nitroaryls, 2153².
of nitro compds., by Mg in NH_4Cl soln., 2835⁵.
of nitro compds., with Zn dust, 2323⁵.
nomenclature of, 317⁷.
oxidation-, 1017⁶.
oxidation-, cellular oxidation potential and, 2337³.
indicators, penetration into *Valonia*, 1424⁹.
intermol., of aldehydes or ketones and alcs., 1611².
potential of cell interior, 1999⁸.
potential of cell-interior of marine eggs before and after fertilization and cleavage, 1116⁹.
potential of 2-hydroxy-3-indolinepropionic acid and its halogen derivs., 2855².
potential of meriquinones, 2779⁸.
potential of org. substances, 328².
potential of reversible systems, 2611³.
potential of spores of *Equisetum arvense*, 2521⁵.
potential of succinic-fumaric mixts., 2277².
potential of *Valonia*, 2691⁹.
systems of cysteine-cystine and reduced and oxidized glutathione, 3446¹.
systems of yeast and muscle, effect of dihydroxyacetone and zymophosphate on, 2684⁴.
potentials in cell suspensions, 2779⁹.
in tuberculous lesion, 1444⁹.
Reeds, as paper-making material, 502⁹, 1510⁴.
resolution with HNO_3 for paper pulp manuf., 1521⁸.
Reflection. (See also *Rays, Röntgen*.)
depolarization of light in diffuse, 7⁸.
electron theory and, 7¹.
by potassium, 2452⁷.
total, disturbance in second medium in, 7⁹.
by white interior paints, 2754⁹.
Refraction, absorption and, 3130⁷.
by alkali perchlorates, 3105⁷.
by alumina fibers, 1350⁸.
atomic, of Hg in Hg dimethyl and Hg diethyl, 2448⁴.
atomic, of Zn in its dialkyl compds., 2467⁹.
double, of amorphous liquids in relation to mol. form, 539⁴.
calcn. from crystal structure data, 3597⁷.
of calomel, 3598³.
of camphor, 2941⁵.
of carbonates, nitrates and sulfates, 3253⁴.
of cellulose and chitin fibers, 3634⁸.
in colloids, 2106⁵, 3606⁹.
colloids with anomalous accidental, 3634⁹.
expressions in adsorption, 3634⁹.
magnetic rotatory dispersion and, 3125².
of Hg_2Cl_2, 852⁷.
Röntgen interpretation of crystal structure and, 3635¹.
of streaming sols contg. nonspherical particles, 1545⁸, 3612⁶.
elec. double, anomalous, 1558⁹.
detg. consts. of, 2612⁶.
dispersion of, 2612⁴.
of limonene, 1024⁹.
of sodium vapor, 142⁴.
of electrolytic aq. solns., 136⁹.
electron theory and, 7¹.
history of specific, 2766⁷.
measurement of, wave lengths and light sources for, 3125³.
mol., in liquid mixts., 682⁹.
mol., of simple compds., 1028⁵.
in salt solns., relation to contraction and light absorption, 699⁸.
of solns. of GeO_2 and of As_2O_3, 1547⁸.
Refractive index, of asparagine isomers, law of, 2448³.
of binary mixts., 3600⁷.
cohesion and, 3252¹.
detn. in blood serum, 2514⁷.
detn. of, of birefringent substances, 329⁵.
detn. under microscope, 3102⁴.
of gases and vapors in a magnetic field, 2113⁹.
of helium, effect of glow discharge on, 1949⁸.
laws of relation between atms., at. no., *d.*, crystal form isomorphism and, 3415².
of mixts., 3124⁵.
of oils, relation to I no., 2580⁷.
of org. substances, at. structure and, 1553⁹.
of Röntgen rays, 3640¹.
of Röntgen rays in vicinity of an absorption discontinuity of the mirror, 1175⁷.
of ternary liquid mixts., 1776⁸.
Refractivity, ionization potentials, absorption spectra and, 2118⁷.
Refractometers, P 848¹.
precision, 2598⁷.
Refractometry, of benzene derivs., 1981⁸.
of binary systems, 2612⁴.
"speculative" and "comparative," 2448³.
in sugar beet selection, 1726³, 2085⁸.
Refractory materials. (See also *Bricks; Linings;* and such specific manufactured refractory materials as *Carborundum*.) P 270⁷, P 1700⁸, P 2232⁸, P 2235⁹, P 3221⁷,⁸.
agalmatolith, 3547⁶.
analysis of, 808¹.
articles of, P 100¹, P 2236¹.
artificial sillimanite, 1893⁴.
ash from furnaces as, 487¹.
basic, P 100².
behavior at cone 40, 808⁹.

for blast furnaces and coke ovens, 1134[9].
for boiler fire boxes, 2235[5].
bonding and purifying Fe-contg., P 2235[9].
books: A Bibliography of Magnesite, 1309[6]; A Bibliography of Silica, 1309[7]; Argiles réfractaires, 2736[9].
bulk and pore vols. of, detn. of, 2235[5].
in carbonizing practice, 1314[2], 2902[2].
chemical-resisting, P 1700[9].
classification of, 3339[5].
from clay, P 976[4].
clay tubes, 2569[4].
compn. and refractoriness of, 486[7].
crucibles, saggers, etc., P 1701[1].
cupola, in gray-Fe foundry, 808[4].
cupola, in malleable-cast-Fe foundry, 808[4].
of cupolas, effect of cupola practice on, 808[3].
cyanite clay, 2235[2].
drying of, temp. and humidity regulation in, P 976[4].
effect of oxidizing and reducing atms. on, 487[2].
for elec. app., P 3215[5].
for elec. furnaces, 2735[7].
elec.-furnace, analyses of, 712[6].
for elec. furnaces, etc., 1700[1]
for elec. furnaces, silicon carbide as, 3393[3].
for elec. insulators, etc., P 1310[2].
elec. resistance of, 2611[1], 3220[1].
expansion by heat, 807[2].
fireclay, 3392[9].
fireclay, effect of arsenic compds. on, 2735[6].
fire-clay, U. S. Gov. master specifications for, 975[8].
for foundry, 3789[4].
fractional fusion of, 186[5].
for furnace linings, 273[2], 2735[1].
fused oxides, thermal expansion of, 3547[5].
for gas generator linings, 3797[2].
for gas plants, 2735[5].
for gas retorts, 1504[5].
in glass industry, life of, 3789[3].
for glass making, sillimanite as, 3067[8], 3217[4,6].
glass melt effect on, 2733[8].
high-temp. test on, 975[8].
hollow ware from, P 976[7].
for industrial chemistry, 1309[1].
industry in Argentina, 805[4].
industry of Germany, 3220[3].
for iron and steel industry, 2735[7].
load-bearing capacities at high temps., testing of, 486[3].
load-carrying capacity of, furnace for testing, 808[6].
load test for, effect of atm. conditions on, 2235[4].
of magnesia, elec. cond. at high temps., 270[2].
manuf. of, specifications for, 3339[8].
for marine (French) use, 808[2].
at Mellon Inst., 1134[9].
for melting Fe, Ni and Pt, 3068[3].
melting pts. of, detn. of, 99[1].
for metallurgical furnaces, 1700[1].
mullite, 3409[2].
for oil-gas generators, 3556[2].
for open-hearth furnace, 976[1], 3415[9].
of open-hearth furnace, effect of operating conditions on life of, 808[3].
review, 2569[2].
for roofs of metallurgical furnaces, etc., P 3068[8].
from rutile, P 650[8].
for safes, etc., P 1310[3].
selection of, 3547[1].
selection of, specific heat in, 2569[3].
of silica, P 487[9].
silica, storage of, 3339[7].
silit as, 19[9].
slag for making, P 976[5].
standards for and industrial research on, 2400[3].
for steel manuf., 2569[2].
temp.-load detns., 1504[7].
temp. measurement during load test, 2735[6].
testing of, etching and staining in, 99[2].
thermal endurance of, 2900[3].
from tungsten powder, 3649[3].
in vertical retorts, 492[4].
for water-gas sets, 105[6].
from zirconiferous ores, P 3790[5].
zirconium oxide and Zr silicate as, 265[3].

Refrigerating apparatus, 1340[5].
absorption, P 636[6], P 2099[3].
mobile unit, 1151[6]
book: Mech., 2713[1].
compns. for use in, P 789[1].
with dichloroethylene, P 1876[3], P 2036[4].
in electrolysis of salt solns., 873[4].
engineering problems in, 1289[4].
flow of liquids in, 1677[4].
hydrocarbons and their derivs. in, 788[9].
insulating materials for, calcn. of, 2551[5].
insulator for, coke breeze as, 3796[9].
insulator for, glass wool as, 3788[3].
of liquids, app. for simultaneous carbonation and, P 3202[3].
of meat, 3319[1].
ozone in, 1677[7].
Raschig rings in, 2214[3].
salt for, P 2232[3].
in textile mills, 3820[4].
thermoregulator for, P 1341[4].

Refuse. (See also *Garbage; Sewage; Waste.*)
burning of, powd. coal as fuel for, 2739[2].
carbonizing municipal, P 2037[2].
fuel from, P 1316[1].
incinerators, selling of excess steam from, 959[9].

Regeneration, after dissocn. in sponges, 243[4].
in respiration in *Tubularia*, 2026[3].
of roots and tops on tomato cuttings, relation to compn., 2183[9].
temp. effect on, 3304[7].

Regenerators, P 3364[2].
calculation of Cowpers and of Siemens, 3147[5].
glass-furnace, surface deposits formed in, 3788[2].

Relativity, application to atomic and mol. systems, 3633[9].
Bohr's at. model from standpoint of general, 3126[1].
relation of ether and matter to, 7[9].

Relativity theory, of fine structure of spectra, 2120[8].
optics and, 2448[6].
space-expanded electron in, 3638[8].
tests of, 2113[3].

Remedies. See *Drugs; Pharmaceutical preparations*.

Rennet, action of, 1998[9].
coagulation by, 1473[4].
coagulation by, colloid chemistry of, 1997[2].
effect on complex Ca caseinate + Ca phosphate, 3019[7].

effect on paracasein of skim milk as affected by org. acids, 1120[2].
effect on proteins of milk, 3300[7].
enzymes, purification of, 1998[8].
pepsin and, 1637[4].
reaction with milk, effect of NaCl and lactic acid on, 951[6].

Replacement. See *Substitution*.

Reproduction. (See also *Sterility*.)
diet and, 1096[8], 1655[7], 1835[4], 2186[7], 2525[2], 3024[6], 3025[9], 3488[3].
diet for, cholesterol effect on, 3027[4].
light effect on rate of, of *Volvox aureus* and *Closterium acerosum*, 1649[1].
mineral effect on, 936[3].
physiology of, 65[3].
physiology of, in birds, 2531[4].
review of animal, 934[2].
vitamin E and, 2693[7].
vitamin for, 2186[4].

Reproductive organs, biochemistry of, 2025[2].
desiccated prepns. of, 965[5].
effect on metabolism, 65[5].
hormones of, physiology of, 3183[7].
inner secretion of, 1438[7].
metabolism and, 776[9].
protein metabolism of, effect of bile acids on, 3727[9].

Reptiles, arginase in, 925[9]

Resacetophenone. See *Acetophenone, 2,4-dihydroxy-*.

Research, in aliphatic chemistry, 1215[6]
books: Notes on Chem., 700[4], Popular Research Narratives, 866[2], Le budget du personnel des recherches scientifiques en France, 1754[9], in Progress at the Univ. of Minn., July 1924–July 1925, 2612[9], A Bibliography on, 2912[7]
in engineering, 80[4].
financial support of, need for, 682[6].
industrial, administration of, 463[9]
in industry, 954[2].
isolation or coöperation in, 3594[6].
organization in British Empire, 317[5]
patents and, 3201[3].
practical aspects of, 2600[1].
relations between engineering colleges and industry, 3756[7].
relation to government and the public, 1121[2].
Röntgen-ray crystal analysis in org. chem., 1054[8].
scientific and industrial, in Holland, 3594[6]

Reserve cellulose. See *Lichenin*.

Residual affinity. See *Affinity*.

Resin acids, 766[6].
book, 2423[8].
in copal, 2756[2].
detn. of, 1913[1].
of hops, 744[3].
inter-esterification on heating of glycerides with, 117[6], 672[3].
of *Pinus pinea*, 3458[7].

Resinates, of lead, 208[1], 3089[6].
reaction with drying oils, 2254[7].

Resinification, of paraffin oils, 3560[3].

Resin oils, for paints and varnishes, 832[4].

Resinophores, 749[9].

Resinous products, P 484[4], P 997[3,4,6], P 3827[1].
of acrolein, mol. wt. of, 3121[2].
aldehyde, refining, P 3354[9].
bakelite, volatility with spirit vapors, 117[8].
catalysis in manuf. of, 463[9].
coloring synthetic, P 997[5].
copal substitutes, P 2082[8].
coumarone, 832[4,7].
coumarone, emulsions of, 300[2].
cyclohexanol-aldehyde, P 301[3].
by Friedel-Crafts reaction, P 832[7].
furfural-acetone, P 2082[6].
furfural, for molded articles, P 997[8].
glycerol-phthalic anhydride, P 3580[9].
keto-alc., P 301[3].
linoxyn-like substance, P 3580[6].
magnesium-contg., P 1913[7].
manuf. of, by-products from saccharin manuf. in, 2910[4].
metallic alkyl, P 2504[7].
molded articles of, P 3242[4].
molding, P 1696[8].
from naphthenates, P 513[5]
natural and artificial, 1723[3], 2419[4].
phenol-aldehyde, P 2082[5,6], 2394[4], P 2419[9], P 2420[1], P 3242[5], P 3581[1,2,3,4].
phenol-aldehyde, detection of, 2419[6].
phenol aldehyde, for lacquers and varnishes, 672[2].
phenolic, P 1530[7], 1723[4], P 3091[2], P 3242[6,7]
phenolic, compn. of fibrous material and, P 267[9].
phenolic, detection of, 2755[6].
phenolic, for coating paper or cloth, P 3242[7]
phenolic, sulfur-contg., P 2589[5].
for photographic media, P 2292[4,5,6].
of polyhydric alcs. and org. acids, P 1913[7]
production in America, 3816[7].
review, 832[4].
sheets of fibrous material and, P 3355[1]
sticking to molds, prevention of, P 513[6].
from styrene, P 649[6]
from sulfite liquor (chlorinated), P 666[2].
synthetic, 2255[7].
for varnishes, 3354[2].
in varnishes and lacquers, 2756[2]
for varnishes, etc., P 3826[9].

Resins (See also *Balsam; Copals; Dammar; Elemi; Kauri; Podophyllin; Resinous products, Rosin; Sandarac;* etc.)
adsorption by paraffin wax, 3075[6].
books: Ueber das Harz der Nadelholzer und die Entharzung von Zellstoffen, 1323[5]; Geol. Harzfuhrer, 2304[2].
of *Boswellia serrata*, enzymes in gum from, 60[2].
bulking values of, in paints, varnishes, enamels and lacquers, 1912[3].
burning, furnace for, 3064[4].
capsicum ointment, British Pharm. method for prepn. of, 969[9].
in coal, 2904[3].
as coating, exposure tests on, 1145[3].
color detn. in, 117[7], 2421[7].
colored lacquer contg., durability of, 1115[4].
detection of, 2755[6].
detn. in paper, 3081[8].
detn. in sheep dips, 963[8,9].
detn. in tobacco, 968[4].
dissoln. in org. solvents, P 3522[8].
distg., P 1331[2].
euphorbia, from latex, 3354[6].
formation in conifers, 1426[4].
fossil, of lignite bitumen, 3554[3].
in gasoline, 3555[5].
hop, nomenclature of constituents of, 2044[6].
from low-temp. tar, 2905[7].
from lupulic acid decompn., 218[6].
from maritime pine, 2244[8].
naphthenates in manuf. of, 2744[3].

natural and artificial, 1723[3], 2419[4].
-oil mixts., for cable insulation, effect on metals, 2885[4].
oleo-, CCl_4 as solvent for, 3777[9].
oleo-, detection of, 3143[5].
oleo-, of pyrethrum in lice destruction, 467[7].
oleo-, of vanilla, evaluation of, 1131[1].
petroleum, compn. of, 1902[1].
of rubber, 2429[8], 3099[8].
rubber, acid nos. of, 312[9].
from rubber as sizing agents, 665[8].
santonin detn. in, 2387[9].
sapropel, formolites from, 1912[8].
sizing paper with, colloidal nature of, 1521[5,6].
sizing paper with, effect of Fe in, 1521[7].
softening points of, 2419[4].
solvents for, 299[9].
glycol ethers as, 2910[2].
methylene chloride as, P 3757[6].
toxicity of, 311[3].
spruce, turpentine of, 3076[9].
structure of, x-rays in study of, 3837[3].
thermoplastic compns. from, P 3580[8].
in tobacco, 967[3,7].
washing, P 997[8].
wood, 2718[2].
Resistance. See *Electric resistance*.
Resistors. See *Electric resistors*.

Roofing, P 272^{5}, P 1508^{1}, P 3070^{4}, P 3224^{5}, P 3794^{4}.
asphalt and tar-satd. felt, specifications of A. S. T. M. for, 954^{6}.
asphalt for, prepn. of, 1135^{9}.
asphalt for, specifications of A. S. T. M. for, 1121^{5}.
bituminous and asphalt materials for, methods of A. S. T. M. for testing, 1121^{8}.
bituminous compn. for, P 1321^{4}, P 2067^{7}, P 3805^{5}.
electrolytic coating of, P 100^{9}, P 1360^{8}, P 1762^{4}, P 3136^{7}.
felt for, P 1507^{9}.
felt for, bituminous emulsion for treating, P 811^{1}, P 2067^{8}.
felt for, colored granulated slag for covering, P 2058^{3}.
fireproof, from zonolite, 728^{3}.
fireproof paper for, 2570^{5}.
fire-proof qualities of tar paper, 3551^{8}.
mastic for, P 1508^{3}.
papers for, 1897^{5}.
paper for, anthracene oil absorption test for, 2057^{1}.
anthracene oil in, 2738^{1}.
nomenclature of, 810^{1}, 1135^{7}.
standards for raw, 2057^{1}.
testing, 1135^{8}, 1520^{5}.
slate for, durability of, 809^{9}.
specifications for, 3551^{8}.
testing of, methods of A. S. T. M. for, 954^{9}.
tile—see *Tiles*.
waste from manuf. of, 3765^{3}.
Roots. (See also *Plants*.)
chemotropism of, 3716^{6}.
of germinating oats, wheat, rice and rape seed, Liesegang ring formation in, 2107^{3}.
growth of, effect of stimulating agents on, 1647^{8}.
growth of wheat, effect of salt solns. on, 2180^{9}.
in oxygen-deficient atm. of soil, effect on soil temp., 2181^{9}.
oxygen requirements of, 3483^{2}.
regeneration on tomato cuttings, relation to chem. compn., 2183^{9}.
solutes exuded from vines by pressure of, 1648^{7}.
squash, meristematic growth studies with, 3714^{5}.
of wheat, effect of superphosphate on, 2383^{7}.
Rope, oils, 3800^{8}.
wire hoisting, testing, 3278^{2}.
Rosa. See *Roses*.
Rose bengal, excretion of, as liver function test, 446^{1}.
life period of activated, detn. of, 1563^{1}.
Roses, oil of, 1687^{9}, 2560^{4}.
solid petrolic ether exts. of, 1689^{9}.
wax of, 3092^{7}.
Rosewood oil, water in, 798^{1}.
Rosin. (See also *Ester gum; Sizes; Sizing.*)
abietic acid from, 512^{4}, 2756^{5}, 3012^{8}.
abietic acid in, detn. of, 2165^{7}.
coloring black, P 997^{5}.
color of, detn. of, 117^{8}.
compn., P 3580^{8}.
compn. for violin bows, P 3827^{2}.
compn. of, 2419^{4}.
constituents of French and Am., 832^{1}.
in core-oil manuf., 3090^{2}.
detection of, 2341^{5}, 2755^{7}.
detection of, in linseed oils, 832^{2}.
detn., 1913^{1}.
detn. in bakelite solns., 2255^{8}.
detn. in paper size, 2746^{7}.
detn. in soap, 673^{9}.
effect on case-hardening, 3428^{5}.
esters of, 512^{7}, 832^{3}.
esters of, in varnish production, 2254^{6}.
expansion coeff. of, variations in, 2924^{9}.
extn. from wood, P 3354^{9}.
extn. from wood, app. for, P 3077^{8}.
in Finland, 2746^{2}.
from firs of Bukovina, 3579^{9}.
for floor-covering industry, 3826^{1}.
for fly paper, 3090^{4}.
gum, manuf. of, 3090^{4}.
improving, 672^{3}.
in insulating and potting compds. and in sealing wax, 3089^{9}.
melting and softening ps. of, 299^{7}.
from paper pulp mill black liquor, P 290^{4}.
in printing inks, 3090^{1}.
reaction with fatty acid glycerides, 117^{6}.
for rosin oil manuf., 3090^{4}.
in soap kettle-charge, calcn. of, 1332^{6}.
for soap making, 3089^{9}.
symposium on, 3089^{7}.
unsapon. constituents of com., 299^{5}.
for varnishes, 3089^{8}.
varnishes from, thinners for, 3353^{3}.
viscosity of solns. of, relation to constitution of solvent, 2081^{7}.
wood, 3090^{4}.
Rosinduline (*5, 7-dihydro-5-imino-7-phenyl-α-benzophenazine*).
isomers, 601^{9}.
reaction with carbohydrates, 742^{8}.
——, **phenyl-**, synthesis of, 1992^{7}.
Rosin oil, 299^{5}, 514^{6}, 2072^{7}.

from Bukowina pines, compn. of, 1320^{1}.
rosin for manuf. of, 3090^{3}.
Rosmarinus officinalis, oil of, 2718^{1,4}.
Rotameter, 523^{1}.
Rotatory dispersion. See "rotatory" under *Dispersion*.
Rotatory power. See *Optical rotation*.

"Rotoxit", 2971^{3}.
Rottlerin, and derivs., 182^{4,5}.
Rubber. (See also *Balloons; Hevea brasiliensis; Tires.*)
acetone extn., effect of fineness on time of, 1729^{5}.
acidity of, and its resins, 312^{9}.
adhesion of, controlling, P 3247^{5}.
adhesive compn. of, P 2262^{6}.
adhesive plasters and insulating tapes of, testing of, 843^{2}.
African, and its future, 3836^{7}.
"age-resisting" compn., P 1537^{8}.
aggregation and reaggregation of raw, 2430^{7}, 3837^{9}.
aging (artificial) of, 3099^{6}.
aging bath for, 679^{4}.
aging, effect of ultra-violet light on, 2093^{1}.
aging properties of, effect of glue on, 2428^{4}
aging tests on, coagulated with AcOH and *p*-nitrophenol, 125^{3}.
aging tests on plantation, 3837^{7}.
aging test with O, 1537^{4}.
analysis of, 2763^{5}.
analysis of soft rubber goods, 311^{9}.
aqueous dispersions of, P 678^{7}.
articles of vulcanized, P 843^{9}.
artificial flowers of, P 3247^{6}.
balata detn. in, 125^{8}.
balls, P 1338^{5}.
balls or other hollow articles of, app. for making, P 1538^{1,2}.
in beer tubing, specifications for, 3246^{8}
books: Manual de l'industrie du, 1730^{4}, Technologie der Kautschukwaren, 1922^{1}, The Chemistry of, Manuf, 2432^{1}, Systematic Survey of, Chemistry, 2920, Analyse des caoutchoucs bruts et manufactures, 3100^{8}, Les caoutchoucs, factices ou huiles vulcanisées, 3100^{8}; Technologie du, souple, 3100^{8}; and Its Uses in Building Works, 3362^{6}.
for bottle washers, 2432^{1}.
boxes of hard, covered with wood impregnated with a phenolic condensation product, P 520^{2}.
buttons, P 2096^{6}.
calender and shrinkage effects of unvulcanized, 839^{1}.
calender in, industry, 1728^{9}.
carbon black for, 3839^{3}.
carbon detn. in, P 29^{2}.
catalytic reduction of, 3165^{4}.
cement for, P 520^{1}.
cementing and vulcanizing leather with, P 1730^{9}.
in Ceylon, research on, 2428^{2}.
chemistry of, 1337^{7}, 1536^{4}, 3096^{4}.
in civilization, 3836^{6}.
clay filler for, P 314^{2}.
coagulation of latex, 312^{1}, 676^{9}, P 1338^{4}, 1681^{5}, 2094^{2}, 2429^{8}.
coagulation of latex, compn. for, 3839^{8}.
formic acid in, 312^{4,5}.
partial, 843^{6}.
with sodium fluosilicate, 311^{2}, 1729^{7}.
with Na fluosilicate and *p*-nitrophenol, 841^{9}.
tanks lined with Al for, 2431^{9}.
coating compn. contg., P 2596^{7}.
coating Fe rolls with, 2262^{1}.
coating leather with, P 3587^{5}.
coating metal with, P 2479^{4}.
coating of, for metal surfaces for protection from acids, etc., P 1330^{7}.
coating textiles with, P 2096^{3}.
coating textiles with glue and, P 3824^{1}.
coating weftless-cord fabric with, P 1538^{1}.
cold-cured, tensile strength of, 841^{1}.
colloidal crystn. of, shell aggregation and, 1149^{9}.
colloidal, dispersibility of, 3113^{2}
colloidal, oxidizing capacity of one phase gel compared with raw rubber, 1149^{6}.
colloidal structure of, elastic hysteresis and, 1536^{5}.
coloring of, P 1330^{6}, P 2596^{8}, P 3842^{6}.
combining with paper pulp, P 666^{7}.
compn., P 125^{9}, P 126^{1}, P 313^{8}, P 519^{5}, P 1338^{2}, P 3842^{4,5}.
compn. of, with aluminous cement, P 3589^{8}.
with cellulose derivs., P 3567^{7}
with cork for shoe soles, etc, P 3247^{7}.
with hydrocellulose, P 3589^{8}.
for leather substitute, etc, P 519^{4}, P 2596^{9}.
for molded articles, P 519^{5}
for shoe soles and heels, etc, P 1730^{8,9}.
compounding, P 126^{1}, 677^{9}, 1728^{9}.
blending of ingredients for, 2093^{4}.
Catalpa clay in, 519^{1}.
tendencies in, 840^{5}
consistency of crude, measurement of, 310^{3}.
container lined with, for acids, etc, P 2051^{2}
containers of, P 1338^{4}.
corona effects on, measuring, 678^{2}.
crepe, prepd with diff. reagents, 1730^{3}.
cure and quality of, effect of accelerators on, 1004^{1}.
cure criteria, 3246^{9}.
density of, as function of aggregation, vulcanization, deformation and temp., 3361^{7}.
dental, 1537^{4}
detection of, 2341^{6}.
deterioration of, effect of antioxidants on, 3840^{9}.
"deterioration retarders" for, P 2262^{7}.
deterioration with time of crude and vulcanized, 1728^{8}.
deviation from law of Poiseuille by, 311^{7}, 2095^{7}.
devulcanizing, P 3590^{6}, P 3842^{9}.
devulcanizing, app. for, P 3590^{6}.
dielec. const, power factor and resistivity of, 842^{2}.
as dispersion medium, 3837^{8}.
dispersion of, chagges in state of, 1149^{4}.
dispersion of, Pratt process of, 266^{1}.
distg., P 1004^{6}.
drying and oxidizing, P 465^{9}.
drying and smoking, 124^{4}.
drying sheets of, P 2262^{9}.
dusting of, 3246^{4}.
of Dutch East Indies, 1730^{9}.
dye behavior in, relation to adsorption by clays, 310^{8}.
dyeing, P 126^{5}.

dyes in vulcanized, 3099^{3}.
elastic properties of raw, d. and, 3361^{6}.
electrodeposition of, P 1702^{5}, 2091^{5}, 2429^{2}, 2622^{8}, P $2956^{5,8}$, 3839^{7}.
electrodeposition of, under gas-removing conditions, P 2096^{4}.
electrodeposition on fabrics, etc., P 2956^{5}.
electrodeposition on metal wire, P 2956^{7}.
embossed articles of sheet, P 1922^{2}.
etching, P 3590^{6}.
fabrics impregnated with, P 313^{8}.
fatty acids in acetone ext. of *Hevea*, 310^{8}.
felt treated with, P 1722^{6}.
fertilizer for, 1487^{7}.
fertilizing gardens in Java, 3839^{7}.
fiber compn., P 3247^{4}, P 3362^{8}, P 3589^{8}.
fibrous materials impregnated with, P 314^{2}.
floor-covering contg., P 2262^{9}.
flooring, P 1922^{3}.
as flooring material, endurance of, 1701^{5}.
forming articles of unvulcanized, P 3362^{7}.
grinding, mixing or masticating app. for, P 678^{8}.
guayule, 676^{9}.
  botany and cultural problems of, 3841^{8}.
  chemistry of, 3841^{9}.
  production of, 3841^{9}.
hard, articles of, P 1537^{8}.
hard, in chem. technic, 2766^{3}.
health hazards in manuf. of, 1920^{4}.
heat action on, 3165^{3}, 3588^{9}.
heat-resistant vulcanized mixts. of, 3841^{1}
heels, comparative resilience of leather heels and, 517^{1}.
history of, 1920^{4}, 3360^{6}.
hydrocarbon, prepn. from rubber latex and its sepn. into fractions, 2429^{5}.
hydrocarbons, treating, P 314^{3}.
hydrocarbon, synthesis of, 3685^{6}.
hydrohalides, formation of cyclo-rubber from, 3587^{9}.
hysteresis detn. in, P 3362^{9}.
incorporation in non-aq. liquids, P 519^{6}.
industry during 1925, 1003^{9}.
industry in Mindanao, 3589^{6}.
industry, research in, 2426^{3}.
insulating compds. for cables and conduits, 310^{8}.
insulating, gloves and boots, P 844^{1}.
insulation with, mech. test for, 1921^{9}.
joining hard and soft, P 3842^{6}.
joining, to metals, P 844^{1}, P 1922^{2}.
Joule effect in, 841^{6}, 3246^{5}.
lampblack for manuf. of, 840^{2}.
latex, addn. to unvulcanized rubber, P 126^{9}.
  albumin of, 3837^{7}.
  Brownian movement in, 3840^{8}.
  concn. of, 1337^{9}, 1728^{7}, P 3842^{8}.
  direct use of, 3840^{6}.
  drying, 312^{1}, P 2096^{6}.
  dyes for, 3099^{1}.
  effect of disinfectants on coagulation phenomena in, 1730^{5}.
  history of, 1728^{6}.
  as insecticide, 89^{1}.
  lab. imitation of, 3096^{7}.
  mixing with other substances, P 678^{5}.
  paper treated with, P 823^{4}.
  in photography, 2623^{7}.
  preservation of, 2430^{2}.
  proteins and coalescing enzymes of, 1920^{9}.
  seamless articles from, P 678^{6}.
  shaping, before complete conversion to, P 3590^{2}.
  sheet making with clotted, 1921^{6}.
  sp. gr. of, 1921^{5}.
  spraying of, 1728^{6}.
  spraying with protective colloids, 518^{7}.
  thickening and stabilizing, P 1004^{3}.
  treatment of, P 126^{5}, P 1004^{4}, P 1338^{1}, P 2262^{6}.
  treatment to obtain crude, P 678^{5}.
  tubing from, P 1004^{7}.
  ultrafilter in concn. of, 311^{9}.
  uses of, 676^{9}.
  using, P 3590^{2}.
  utilization of serum of, 1003^{9}
  viscometer for, 3096^{8}.
  vulcanized, 2595^{3}.
  waterproofing cement mixts., etc., with, P 3793^{6}.
lead poisoning in manuf. of, 3100^{6}.
lime in manuf. of, 677^{9}
lining of, resistant to acids, 843^{2}.
lining pipes with, P 1730^{7}.
for lining tubes, P 3590^{1}
manuf. of, science in, 3360^{5}.
maturated, 309^{3}, 518^{7}, 841^{2}.
membranes of, ionic permeability of, 1940^{6}.
metallic sheet material contg., for textiles, P 3216^{6}.
microscopic examn. of, 309^{9}.
mineral fillers for, detn. of fineness, 3099^{4}.
mineral ingredients for, 2594^{4}.
mixing app. for, 1921^{7}.
molded articles from fibrous materials and, P 3589^{9}.
molded vulcanized, P 2596^{9}.
mold for, P 3247^{7}.
mold for, Al alloy for, P 1214^{6}.
molding, P 519^{6}.
molding and vulcanizing, P 1922^{1}.
mold on sheet, *p*-nitrophenol as preventive of, 3837^{9}
mold prevention on, 3839^{6}.
mold prevention on smoked sheet, coagulation and, 1730^{4}.
mol., shape of, 3836^{9}.
mols., size of, 2428^{9}.
mols., structure of, 3096^{8}.
Netherlands Gov. Inst., 839^{9}
nitrogen detn. in, 1537^{3}.
nitrosite-nitrosate sols, 3360^{8}.
oil product resembling factice, 2095^{7}.
oxidation of, 3165^{5}.
oxidation of, exposed to light, 2093^{9}.
oxidation of, retardation of, P 126^{4}.
oxidation tests for goods of, 841^{7}.
paint contg., P 2589^{3}
particle shape and, 3838^{4}.
particle size effects in, subjected to repeated stress, 3838^{5}.
particle size in manuf. of, 3838^{3}.
paving and surfacing material contg., P 3552^{7}.
paving or floors, P 2571^{1}.
phys. properties of hard, effect of accelerated aging on, 2093^{3}.
phys. properties of vulcanized, effect of $CaCO_3$, white potters' clay and $BaSO_4$ on, 2920^{8}.
pigments for, 313^{6}.
pigments, grit detection in, 3839^{1}.
pigments, particle character of, 3838^{4}.
pigments, particle size of, 3838^{7}, 3838^{9}.

plantation industry, botanical and chem. developments in, 3841^{7}.
planting in Netherlands Indies, 3841^{6}.
plasticity in crude, detn. of, 124^{8}.
plasticity of, 310^{3}.
plasticity of sole crepe, 1728^{8}.
plasticity of unvulcanized, 2094^{2}.
polymeric formula of, 3837^{4}.
porous, P 2262^{8}.
porous articles of, P 2096^{2}.
prepn. of plantation, 3841^{1}.
prepn. of raw, 840^{1}.
preserving, P 1338^{3}.
production in tropical America and Africa, 3841^{8}.
proofing garments with, 3839^{4}.
protein film in, 677^{6}.
purification by diffusion, 2430^{1}.
quality of raw, detn. of, 1729^{1}.
reaction with N_2O_4, 1228^{3}.
reaction with S, 2763^{7}.
reclaimed, as substitute for new rubber, 2092^{3}.
reclaimed, cable mixts. contg., 2764^{1}.
reclaimed, treatment of, P 126^{3}.
reclaimed, wearing qualities of tire treads contg., 310^{8}.
reclaiming, from tire stock, 3839^{7}.
reclaiming process, 843^{7}.
reënforcing agents, effect of, 2429^{2}.
repairing articles of, P 1338^{3}.
research in 1925, 2762^{7}.
research on, chem. and phys. methods in, 309^{8}.
research work on plantations, 1729^{4}.
resin in, condition of, 2429^{2}.
resin of, 3099^{8}.
resinous coating compn. contg. chlorinated, P 1331^{1}.
resins from, as sizing agents, 665^{6}.
review, 839^{9}, 2428^{2}.
seamless goods of, P 1730^{8}.
seed cake, 75^{2}.
selenium effect on, 2092^{7}.
single texture finishes, 842^{1}.
smoked sheet, coagulated with AcOH and H_2CO_2 contg. p-nitrophenol, 125^{4}.
smoked sheets, prepn. of, 3840^{8}.
softeners for, 311^{7}, 313^{8}, 2594^{7}.
solvents for, 687^{2}, 3089^{6}.
handling, 678^{1}.
methylene chloride as, P 3757^{8}.
recovery of volatile, 81^{1}.
toxicity of, 311^{3}.
splicing uncured, P 313^{9}.
sponge, tubes, P 2432^{4}.
spotting of crepe, 125^{6}.
spraying of trees with Bordeaux mixt., 2428^{5}.
stability of hard, at high temps., 3051^{4}.
sterol from slab, 3100^{3}.
stiffening with C blacks, 2095^{4}.
stoppers, specifications of U. S. Gov. for, 2094^{2}.
stress-strain curve, concavity factor of, 312^{8}.
stress-strain curve of, prepd. with and without accelerator, effect of heat on, 312^{2}.
stress-strain curve of vulcanized, effect of temp. on, 2431^{5}.
stress-strain relationship under compression, 1920^{6}.
stretching of, origin of interferences in, 3361^{4}.
structure of, 310^{3}, 677^{2,6}, 840^{4}, 2594^{6}, 3360^{5}.
structure of, and paint films, 298^{1}.
structure of stretched, 1536^{9}, 2428^{9}, 3360^{9}, 3837^{6}.
structure of, theory of, 1149^{7}.
structure of, x-ray contributions to analysis of, 3837^{2}.
sulfides in, test for distribution of, 125^{2}.
sulfur combination with, in hard rubber, rate of, 841^{4}.
sulfur detn., 2763^{4}, 3840^{3}.
sulfuric acid-, 1729^{8}.
sulfur in, 1729^{4}.
sulfur removal from, 1920^{6}, P 2432^{5}.
with surfaces of contrasting color, P 126^{2}.
swelling of, chem. constitution of solvent and, 2762^{7}.
synthetic *vs.* natural, 3756^{9}.
tearing tendency of, 3246^{9}.
tensile properties of, effect of heat generated during stressing on, 2426^{5}.
tensile strength of sulfur vulcanizates, 2595^{8}.
treatment with C and absorbed gases, P 126^{3}.
tubes, P 2262^{8}.
tubing, specifications of U. S. Gov. for, 2094^{2}.
unsatn. of, 2091^{5}.
variability, accelerator action and testing criteria of, 3246^{7}.
variegated, P 126^{2}.
viscosity of solns. of, 124^{4}, 1003^{9}.
viscosity of solns. of, detn. of, 529^{6}, 843^{3}, 2763^{1}.
vulcanization accelerators, 309^{5}, 313^{4}, 1921^{4}, 3839^{8}, (*Patents.*) 126^{7,8}, 313^{9}, 314^{1,2}, 519^{7,8,9}, 1004^{8,9}, 1537^{8,9}, 1538^{1}, 3100^{9}, 3590^{7,9}, 3697^{2}, 3842^{8}.
vulcanization accelerators, effect on temp. of mixts., 1338^{1}.
furfural derivs. as, 3840^{1}.
oxidation products of aromatic thioureas as, 313^{8}.
production in America, 3816^{7}.
super, 3098^{2}.
vulcanization of, 125^{8}, 3302^{2}, (*Patents.*) 126^{6,7}, 1730^{7}, 2096^{4,5}, 2596^{8}, 3247^{8,9}, 3248^{1,2}, 3362^{8}, 3590^{2,4,6}, 3842^{9}.
vulcanization of, acceleration of, 313^{2}, 2430^{8}, 2920^{8}, 3098^{1}.
acceleration of, by alkaloids, 1730^{1}.
app. for, P 520^{1}, P 678^{9}, P 3100^{9}.
by cooling, 2431^{2}.
effect of degree on quality and type or stiffness, 3247^{2}.
effect on mech. properties of formation of colloidal ppts. during, 3097^{2}.
elec. heating in, 3591^{7}.
heat reactions in, 2595^{9}.
in hot air, 312^{8}, 1004^{1}.
at low temps., 1921^{6}.
molds for, P 126^{8}.
molds for glossy, collodion soln. for painting, 3580^{8}.
Peachey process of, 2762^{4}.
phys. and normal, 2430^{8}.
in soln., 2095^{1}.
with sulfur chloride vapor, 843^{3}.
superficial, P 519^{9}.
thermostatic control device for, P 3593^{5}.
in various gases, 3097^{4}.
Vultex process of, 519^{2}.
vulcanization of diffused, 2426^{7}.
vulcanized dough, P 3247^{8}.

vulcanized products from plants bearing, P 3590^{6}.
vulcanized, resistance to extension of, 3362^{2}.
vulcanized, sub-permanent set of, 3097^{9}.
vulcanizing properties of, testing, 2428^{2}.
vulcone action, 843^{3}.
Vulkan dyes in manuf. of, 2763^{9}.
wall covering of, P 1730^{9}.
water absorption by, 842^{8}, 2092^{7}.
water combination with, 677^{8}.
waterproofing with, P $3590^{1,2}$.
weathering of vulcanized, 2595^{4}.
wire and cable insulated with, and insulating tape, specifications of A. S. T. M. for, 954^{7}.
work of Bur. of Standards on, 1536^{5}.

mutual soly. increase of electrolyte and, in aq. EtOH, 3116[3].
phenyl ester—see *Salol*.
as preservative for wine samples, 1681[6]
preservative properties of, 3712[8].
salicylate—see *Diplosal*.
sodium salt—see *Sodium salicylate*.
soly. in C_6H_6 and $CHCl_3$, effect of water on, 1164[7].
soly. in C_6H_6, influence of traces of water on, 137[1].
spectrum of, 708[4].
spectrum of derivs. of, 2455[5].
spectrum of salts of, 1030[2].
as stabilizing agent for oils, 1146[3].
as standard in calorimetry, 1747[9].
system: acetamide—, "thaw"-m.-p diagram for, 693[9].
system: azobenzene—, 1224[5].
system: phenol–H_2O–, 693[1].
systems of, with amines, 1224[6].
volatility of, 1774[8].
Salicylic acid, 3-acetyl-5-chloro-, 1238[3].
——, **cyanomercuri-**, differentiation of *o*- from *p*-, 1685[2].
salts of, 91[8].
——, **5,5′-dithiobis-**, 182[8].
——, **3-hydroxy-**. See *o-Pyrocatechuic acid*.
——, **hydroxymercuri-**, cyclic anhydride, differentiation of *o*- from *p*-, 1685[2].
——, **iodo-**, salts of, 91[8].
——, **5-mercapto-**, 182[8].
——, **methyl-**, mercury salt, detection of, 3773[6].
——, **sulfo-**, adsorbents for, 2104[1].
detection of, 2720[2].
mercury deriv. of, optical anisotropicity of colored sols of, 3611[5].
mercury derivs. of, colloid properties of, 3611[5].
mercury salt, modulus of shearing of sols of, 3607[8].
mercury salt, viscosity of colloidal solns. of, in structural, laminar and turbulence regions, 3607[7].
——, **thio-**. See *Benzoic acid, o-mercapto-*.
——, **5-thiocyano-**, 1603[9].
Salicylonitrile, reduction of, 1216[6].
——, **3,5-dibromo-**, acetate, 403[9].
——, **4-nitro-**, 2324[4,5].
——, **5-nitro-**, sodium deriv., and polymer, 1230[4].
Salicylosalicylic acid. See *Diplosal*.
Salicyluric acid, in urine, from salicylic acid in diet, 231[9].
Salinity. See *Salts*.
Saliva, activity and electrolyte content of, effect of section and of stimulation of nerves on, 457[2].
amylase index of, 2335[6].
amylase in infants, 1261[9].
amylolysis by, in relation to time of glandular activity, 3182[1].
amylolytic activity of, 2357[4].
calcium content of, effect of diet on, 3730[1].
colloidal Au prepn. with, 3610[1].
compn. of, 780[4].
concretions of, formation of, 3503[3].
diastatic action of, effect of KBr and KI on, 2507[7].
digestion in stomach and intestines, 1439[1].
Entameba gingivalis in filtered, 2542[1].
equil. with enamel of teeth, 2695[7].
hydrogen and OH ions in, effect of vagotropic substances on concn. of, 1273[3].
nitrogen compds. in, 948[5].
poison of, of *Octopus macropus*, 1872[2]
reaction of, and bacteriotropic action of, 780[4].
secretion, effect of ephedrine on, 1870[1]
secretion, effect of K, Ca, adrenaline and insulin on, 1148[3].
sugar in, 1302[1].
urea in blood and, 928[7].
vegetative poison effect on activity and on electrolyte content of, 456[9].
Salivary glands, elec. cond. of, alteration during functional activity, 2873[6,8].
elec. cond. of, elec potential and H-ion concn of, 3475[1].
excitability of submaxillary, 2018[3]
glycogen in, effect on excretion of sugar and glycogen, 2007[1]
insulin in, of normal and pancreatic diabetic dog, 441[6].
lysocithin in ext. of, 1165[6].
restoration of, 1103[6].
secretion by, effect of secretin on, 1854[6].
Salluen, effect on blood colloids, 1273[4].
Salmon, canned, gases in, 72[7]
iodine content of Pacific coast, 1872[7].
magnesium ammonium phosphate crystals in canned, 1673[6].
oil of body of, vitamin potency of, 2188[5].
Salmonidae, morphologic tendencies during development, effect of luminous radiation on, 3196[2].
Salol, crystn. of, 2102[6].
Salt. See *Sodium chloride*.
Salt-bridge, 680[2].
Saltbushes, as feeding stuffs, 1120[8].
Salt deposits, American salt-dome problems, 1198[4].

behavior of minerals of, under high pressure at changing temps., 884[4].
Big Hill salt dome, Texas, 1197[9].
domes, origin of, 2968[8].
iodine in, of northern Germany, 1045[9].
locating, significance of S waters in, 1290[9].
mixed, 1970[6].
in North America, origin of, 1198[2].
potash-bearing, of Malagash, Nova Scotia, 3412[4].
Sulphur salt dome, La., 1197[8].
water-bearing strata in, detection of, 163[1].
waters from, chem. relation of, 1290[8].

Salting in, 3116[7].

Salting out, 858[9].
effect of electrolytes on soly. of I in water, 1014[4].
of liquid mixts., 1929[9].
of soap, 2423[3], 2932[2].
of soap, transposition of potash and soda by, 2423[4].

Saltpeter. See *Potassium nitrate*.

Saltpeter, Chile. See *Sodium nitrate*.

Saltpeter, Leuna. See *Ammonium sulfate-nitrate*.

Salts. (*Only entries of general interest are made under this heading. Salts are indexed under such group names as* Sulfates *when that is appropriate. Individual inorganic salts are entered under their common names, as* Sodium chloride. *Organic salts, as well as esters, with a few exceptions, all of which are explained by notes in appropriate places in the index, are entered under the names of the acids. See also* Double salts, Electrolytes, Hypertonic solutions; Ions, electrolytic; Neutral salt action; Physiological saline solutions.)
absorption by vegetable cells, 220[6].
acid action on inner frictions and ds. of solns. of, 1935[6].
-acid boundaries, diffusion potentials of, 2938[4]
acidity in solns of, produced by *Sphagnum*, 435[6].
adsorption by Kambara earth, 3525[2].
adsorption by SiO_2, $Al(OH)_3$ and kaolin, relation to chem constitution, 1931[7].
adsorption through corrosion- and rust-protective color films, 2080[7].
alcoholysis of, of weak bases with weak acids in EtOH and MeOH, 3622[2].
antagonism to protoplasm, 2510[3].
basic, 2625[2].
in blood corpuscles and plasma, ratio of, 921[1].
of blood, diuresis and, 2875[3].
in blood, relation of certain endocrines to, 1108[9].
in blood serum, accumulation as preliminary to sweating, 778[8].
from brine from oil wells near Sand Springs, 3540[6].
brines, evapn. of, P 3214[7].
brines, sepn. of components of, P 3214[7].
as catalysts in soln. of Zn in acids, 1019[1].
cementation of metals by, 2639[7]
coating, with inert particles, P 483[7].
complex, formation of, 1936[1].
concn. cell, e. m. f. of, 134[9].
coördinative quadrivalent complex, *cis-trans*-isomerism of, 1961[6].
corrosion of pipes by brines, 3438[8].
crit. temp. calcn. from expansion coeff. of molten, 1008[2].
crystn. from saline waters, P 1695[9].
crystals (large) of, P 803[6].
crystal structure of, 3597[3].
as desensitizers of AgBr and of bleach-out dyes, 1568[7].
dielec. polarization in solns. of, 3620[6].
effect of solns. of, on aluminous cements, 3792[7].
effect on absorption and germination of seeds, 773[8].
on antibody production, 1269[5].
on blood reaction in newborn, 1448[7].
on cider sickness bacillus, 3479[6].
on colloids, 2772[1].

extn. from drugs, influence of alkali on, 262^{5}.
d-glucuronic acid in beet, 740^{5}.
hemolysis by, effect of neutral salts on, 2335^{2}.
effect of sugars on, 2335^{1}.
resistance of red blood cells normally and in beriberi to, 2700^{1}.
salt action and, 443^{7}.
in plants of Philippine Islands, 932^{1}.
of *Primula elatior*, effect on cholesterol content of serum, 3509^{2}.
and related compds., 2332^{4}
review, 798^{9}.
surface tension of ext. of, 966^{6}.
toxicity of, and detoxication by cholesterol, 2202^{8}.
Saponite, of Keweenawan Cu deposits, 1372^{1}.
Sapotoxin, toxicity of, and detoxication by cholesterol, 2202^{9}.
Sapphire, spectroscopic investigation of, 1014^{4}.
Sapphire substitutes, P 483^{7}.
Sapphirinidae, "shining epithelium" and iridescence of, 3748^{7}.
Sapropelites, artificial naphtha from Balkash, 2065^{5}.
Sapropel resin. See *Resins*.
Sarcina, *flava*, preservatives and, 3712^{7}.
infection of beer by, 90^{4}.
Sarcoma. (See also *Cancer; Carcinoma; Melanosarcoma; Neoplasms; Tumors*.)
under anaerobic conditions, 914^{9}.
arsenic effect on, 1848^{6}.
blood plasma in, as medium for culture of tissues, 1821^{8}.
cytolysis in, 3735^{4}.
effect of Se compds. on, 1668^{7}.
growth of, effect of increased O pressure on, 1668^{6}.
growth of, effect of nutrition on, 1668^{5}.
lactic acid formation in, during growth, 1443^{6}.
production of spindle cell, by indole, 1849^{4}.
tissue, electrolyte adsorption by, 1844^{6}.
Sarcosinamideglucoside*, 2660^{6}.
Sarcosine (*N-methylglycine*), from creatinine, 3691^{2}.
Sarcosine anhydride See *2,5-Piperazinedione, 1,4-dimethyl-*.
Sarcosineglucoside, O-tetraatyl-*, ethyl ester, 2660^{5}.
Sardine oil. See *Oils*.
Sarson, from Punjab, compn. of seeds and cake, 1483^{6}.
Satin white. See *Pigments*.
Sativin, histidine and tyrosine content of, 1090^{2}.
Sativol, from saffron oil, 797^{8}.
Saturation, vapor-pressure lowering as function of degree of, 535^{2}, 2103^{4}.
Satureja, *eugenioides*, oil of, 3211^{9}.
hortensis, oil of, 2719^{2}.
Sauerkraut, beverage from, P 3521^{7}.
curing process for, 787^{2}.
mineral content of, 1286^{8}.
Sausage. See *Meat*
Savonade, as emulsifier, 304^{9}.
Savory oil, 2226^{9}.
Sawdust, agglomeration of, 2403^{8}, P 3786^{7}.
briquetting, P 1901^{4}.
disintegration in soils, 1881^{4}.
distn. app., P 3564^{8}.
hydrolyzed, compn., digestibility and feeding value of, 2550^{7}.
irradiated, effect on photographic plate, 1635^{6}.
irradiated with ultra-violet light, effect on growth and calcification with diet deficient in fat-sol. vitamins, 2523^{3}.
mixt. with powd. coal for firing boilers, 3795^{1}.
molding, P 649^{8}.
Scabiosa, *succisa*, β methylglucoside in leaves of, 1646^{7}
Scandium, spectrum of, 18^{3}, 330^{6}, 1759^{4}, 2949^{3}, 2949^{4}
Zeeman effect in, 3386^{1}.
Scandium oxide, glowing of Sc_2O_3 on heating, 527^{6}.
Scapolites, synthesis and modes of occurrence of, 2805^{3}.
Scarlet fever, toxin and antitoxin of, P 3781^{3}.
Scarlet red, effect of feeding, on tissues and lipoids, 1448^{6}.
Scenedesmus, org. compd. utilization by cultures of, 2180^{8}.
Schafarzikite, crystallography and physical properties of, 3409^{7}.
Scheelite, analysis of, 725^{7}
crystal structure of, 2600^{9}.
in Kharanor, 3669^{1}.
Schefhaütl, K E., biography, 2623^{5}.
Schiff bases; reaction with isocyanates and with HNCO, 3168^{9}.
Schistosoma hematobium, complement fixation with, 627^{5}.
Schists, bituminous, at Resiutta, 1711^{3}, 3233^{4}.
chloritoid, in Krivoy-Rog ore-bearing dist., 3673^{2}.
contact metamorphism in Big Thompson, of Colo., 1778^{9}.
crushing of, 1477^{6}.
from leverrierite, 29^{9}.
low-temp. carbonization of, 1138^{5}.
mica, with piedmontite, 1372^{1}.
mineral, transformations in cryst., 2968^{5}.
Schizolite, from Russia, 3667^{9}.
Schizophyllum commune, growth of, effect of H-ion concn. of media on, 1647^{6}.
Schreibersite, -rhabdite in meteorite from Tepla, Bohemia, 3669^{2}.
Schulze-Hardy law. See *Laws*.
"Schwartzbrot," digestion of, 1097^{1}.
Schweinfurth green. See *Dyes*.
Science. (See also *History*.)
appeal to the community, 129^{1}.
books: Catalogue of British Scientific Technical Books, 329^{6}; Early Steps in, 330^{4}; Sins of, 1025^{2}; How to Teach General, Notes and Suggestions of Practical Aid

to Every Science Teacher, 1171[5]; Teaching, in the Schools, 1171[5]; Discoveries and Inventions of the 20th Century, 1351[1]; Where to Seek for Sci. Facts, 1351[2]; The Boy's Playbook of, 1351[5]; of Home and Community, 1351[8]; et Industrie, 1478[6]; and Scientists in the 19th Century, 1555[2]; for Boys and Girls, 1555[3]; of Everyday Life, 1555[4]; dans la vie moderne, 1753[5]; Open Doors to, 1753[5]; Early, in Oxford, 1753[6], Historic Instruments for the Advancement of, 1753[6]; First Year of, 1753[8]; Le mouvement scientifique contemporain en France, 1753[9]; Everyday Problems in, 1754[1]; General, 1754[3]; Essentials of Sci. Method, 1754[4]; in the Modern World, 1754[4], Linking, and Industry, 1875[9], Great Moments in, 1941[8]; Einführung in das Studium der organischen Chemie für Studierende der Chemie, Medizin, Pharmazie, Naturwissenschaft, Forstwissenschaft, u. s. w., 2332[9]; The American Year Book, 2612[9]; 1914–1924, Dix aus d'efforts scientifiques industriels et coloniaux, 2942[8]; Phases of Modern, 3125[8]; Catalog of, and Technology, 3379[5]; an Introductory Textbook, 3379[6].
chemistry and pure, 1541[8].
coöperation with industry, 2213[9].
museum of, at South Kensington, London, 682[6].
national econ. independence and, 3322[3].
Scientific attitude, detn. of, 3591[7].
Scilla. See *Squill.*
Scillitoxin, effect on heart, 455[1].
Sclera, whale, compn. of, 1672[3].
Sclerema neonatorum, subcutaneous fat in, 1843[9].
Scleroproteins, nitrogen distribution in, 54[1].
Scleroscope, P 2480[3].
Sclerotinia cinerea, pectinase of, 212[7].
Scopolamine (*hyoscine*), detection of, 455[7].
effect on phosphoric acid in brain tissue, 2023[2].
effect on respiration, 2020[8].
indicator for, 1493[9].
N-oxide, physiol. effect of, 1114[8].
in post-encephalitis lethargica, 2700[5].
reaction with furfural-H_2SO_4, 1687[7].
Scopolia, alkaloid content of, 1688[3].
Scorodite, 2967[2].
reduction of ferric arsenate to, 2960[3].
Scorpion, glucosuria from sting of, 232[9].
venom, effect on adrenaline secretion, 2703[6].
venom, effect on striated muscle, 1862[3].
Screens. (See also *Rays, Röntgen; Sieves;* and "light" under *Filters.*)
definitions of A. S. T. M. for, 1121[9], 1329[5].
fluoroscopic, P 343[8].
non-ferrous insect, specifications of A. S. T. M. for, 954[5], 1121[4].
projection, P 154[9], P 556[2].
Screw worm fly. See *Cochliomycia macellaria.*
Scrophularia nodosa, diosmin from, 799[6].
glucosides from, 391[1].
Scrubbers. (See also *Absorption apparatus; Gas, illuminating and fuel; Washing apparatus.*)
for air, etc., P 848[3].
for fumes in smelting sulfide ores, P 3441[9].
for mist formed in H_2SO_4 evapn., etc., P 2230[8].
for nitrous fumes in HNO_3 manuf., etc., P 1306[7].
Scurvy. (See also *Vitamins.*)
antiscorbutic power of old sweetened condensed milk, 3181[3].
antiscorbutic properties of milk, effect of Degerma process on, 932[8].
antiscorbutic value of goat milk and buttermilk, 932[9].
antiscorbutic value of winter-ripened fruit, 2006[7].
blood and vessel wall changes in, 3733[2].
cabbage effect on, 2524[3].
energetic metabolism in, 3187[9].
glycogenic reserves and arterial glucemia in, 1437[1].
intercellular substances in, 1663[7].
prevention with bananas, 1432[4].
from sulfur or sulfides in mineral waters, 2203[4].
tuberculosis and, 1430[9]
ultra-violet light effect on, 2526[6].
Scyllitol, from dogwood, 2518[4].
α-Scymnol*, 401[8].
Scymnol-sulfuric acid*, 401[8].
Seal, blood of, 1672[8].
Sealing compositions, P 268[4].
for dry cell elec. batteries, etc., P 98[3].
for pipes, P 36[8].
waxes, 265[8].
waxes, rosin in, 3089[9].
Sealing device, for gases under pressure, P 2099[1]
valves of gas-mfg. plants, P 278[6].
Seal oil, antirachitic value of, 1654[2].
Sea-urchins, pedicellariae of, hemolytic properties of, 1118[1].
sperm and larvae of, effect of Ag on, 3316[8].
sperm of, effect of H_2CO_3 on, 3317[2].
Sea water. See *Waters, natural.*
Seaweeds. (See also *Algae; Laminaria.*)
compn. and use as fertilizer and feeding stuff, 1487[5].
mucilaginous exts. of, 3310[1].
nutritive properties of, 3519[9].
utilization of, 2565[2].
Sebacic acid, cyclononanone from, 2150[7].
heat of combustion of, 2937[4].
monomethyl ester, 1590[4].
reaction with beryllium carbonate, 1396[9].
Secacorin, effect on uterus, 1466[8].
Secale cereale. See *Rye.*
Secalin, histidine and tyrosine content of, 1090[2].
Secretin, bile effect on, 3495[6].
duodenal, hypoglucemic action of, 1656[7].
effect on antibodies of blood, 1146[7].
on gland secretion, 1854[6].
on kidneys, 58[6].
on skeletal muscle activity, 950[2].
formation of, relation to entrance of acid chyme into small intestine, 2510[3].
from nettles, effect on bile secretion, 1273[2].
pancreatic secretion after injections of, effect of alkaloids on, 2368[6].
portal circulation and, 3494[9].
of spinach, effect on intermediary carbohydrate metabolism, 933[7].
Secretions. (See also *Glands.*)
book: The Chemical and Physiological Properties of the Internal, 430[7].
electrolyte effect on innervation mechanism of, 456[9].
endocrine, antagonistic actions of, 54[9].
effect on blood, 3028[3].
effect on fat in liver, 3499[4,6].
effect on reproduction, 65[3].

nutrition and effect of, 3489^5.
of parathyroid, 3723^1.
in pregnancy, 3733^4.
regulation of fat mobilization by, 3499^4.
relation to gas metabolism and minute vol., 241^5.
review on, 3707^4.
Sedimentation, analysis by, 1005^2.
book: Treatise on, 2969^6.
colloid analysis by, 2214^1.
factors influencing, 3051^3.
hysteresis in, 3606^8.
of particles in polydisperse systems, app. for detg. rate of, 3101^6.
in potash slimes, 481^1, P 2433^9.
for oil sepn. from heavier liquids, P 3592^9.
for oil sepn. from water, P 3805^1.
for pulps, etc., P 3364^5.
Sediments, analysis by continuous weighing, error in, 530^7.
analysis of, 1779^1.
Seed cake, rubber, 75^2.
Seedlings, corn, age as factor in resistance to NaCl, 1429^8.
corn, N metabolism in etiolated, 2184^7.
growth of, effect of EtOH on, 1649^6.
reaction sensitivity of, 1647^9.
wheat, changes in N, K and P content during germination and early stages, 1648^6.
Seedolin, as fungicide for wheat bunt, 2385^2.
Seeds. (See also *Germination.*)
absorption by, effect of salt solns. on, 773^8.
absorption of water by barley, 3715^3.
catalase activity of, 2520^3.
disinfectants for, P 791^4, P 2556^9.
disinfectants for control of wheat bunt and smut of oats and barley, 793^4.
disinfecting action of substances pathological to plants, 1426^8.
disinfection of, P 259^9, 472^4, P 473^3.
germinating vitality in vacuum at temp. of liquid He, 1428^5.
hemochromogen reaction of, 771^7.
ion absorption (selective) by, 774^3.
moisture detn. in, 2213^2.
monocotyledonous, anatomy of, 799^2.
oil, continuous press for, 514^8.
oil, fat detn. in, 3581^7.
oxidation in, equil. of cellular constituents and intensity of, 1420^1.
permeability to O of *Sinapis alba*, 1427^1.
phospholipin detn. in, 3021^1.
poisoning, 2042^5.
porphyratin from, 3174^2.
protein metamorphosis in germinating, 2871^6.
respiration in dormant, 434^4.
stimulation of, 3717^1.
sulfur and P detn. in, 2299^9.
tobacco, disinfection of, 793^1.
tomato, effect of P on production of, 2185^4.
vitamin D in germinating, 224^3.
Seger cones. See *Pyrometric cones*.
Seidlitz water, tartaric acid detection in, 3775^8.
Seignette salts. See *Potassium sodium tartrate*.
Selenates. (See also *Polyhydroselenates.*)
double, dissoc. pressures of hydrated, 347^5.
Selenene, constitution of, review, 752^4.
Selenia tetralunaria, poisoning of eggs of, 3769^7.
Selenic acid, acid nature of, 694^6.
adsorption isotherms of, 3605^6
compds. with uranic acid, 3139^8.
Selenide, diantipyryl, 1364^3.
Selenides, alkyl, prepn. of, P 1631^2, 3273^8.
Selenious acid, acid nature of, 694^5.
Selenium, atomic wt. of, 1006^6.
cathodes, disintegration in H, 2446^7.
as chlorine carrier, 860^5.
colloidal, crystal violet adsorption on, 2104^2.
effect of electrolytes on flocculation of, 1741^8.
prepn. of, 532^9.
crystal structure of, 131^1.
cytolytic action of, 1668^7.
dielec. const. and optical properties of, 1342^5.
effect of mesothorium radiations on, 1943^8.
glass—see *Glass*.
industry in 1925, 3783^2.
insecticide and fungicide contg., P 3770^6.
light-sensitivity of, 1953^1.
photoelec. cond. in, 1947^2.
photosensibility of, 2458^8.
physiol. relations of, 949^7.
reaction with Cd, 137^7.
with cyanides in liquid NH_3, 3373^6.
with S_2Cl_2, 2294^3.
recovery from Pb-chamber slime, 2896^8.
review of mining and trade information, 888^1.
sepn. from SO_2, 265^3.
soly. in Se_2Cl_2, 2294^3.
spectrum (Rontgen) of, 1354^9, 3266^1, 3640^2.
stereoisomerism of quadrivalent, 362^2.
sublimation of, for photoelec. cells, P 875^9.
system: SeO_2–, oxidation potential of, 3628^7.
thermal cond. of, effect of light on, 146^3.
thermal properties of diff. forms of, 2936^4.
toning with—see *Photography*.
Selenium, analysis, detn., 1773^3, 2801^6, 3663^4.
detn., app. for, 1339^5.
in org. compds., 3666^6.
in sulfide ores, 1575^6.
sepn. from As, 2799^8.
sepn. from Te, 1774^2.
Selenium cells. See *Cells, voltaic*.
Selenium chloride, properties of, 2294^3.
Selenium compounds, cytolytic action of, 1668^7.
disaccharides from sugar derivs. contg. Se, 379^2.
with iron and NO, constitution and absorption spectra of, 2455^2.
with nitrosisulfuric acid, 1573^8.
org., 592^3, 1051^4, 3156^2.
polysaccharides contg. Se, 2148^3.
reaction with H_2F_2, 1186^4.
with uranic acid, 3139^8.
waste, recovery and use of, 634^6.
Selenium cyanides, prepn. of, 1364^3.
Selenium ion, diffusion in Ag_2S contg. Ag_2Se, 697^9.
Selenium oxide, reaction with Se_2Cl_2, 2294^4.
system: Se–, oxidation potential of, 3628^7.
Selenium salts, effect on respiration of normal and neoplastic cells, 1664^9.
tuberculosis therapy with, 2879^7.
Selenium tetrachloride, reaction with Cu, 3140^5.
Selenocyanates, 3288^4.
Selenocyanic acid, reaction with I, 1364^3.
Selenocyanogen, equil. with iodine, AgI, and AgCNSe, 345^9.
prepn. of, 1364^1.
Selenocyano group, introduction into aromatic compds., 3288^3.
Selenofuran. See *Selenophene*.
Selenomercaptans, alkyl, prepn. of, 3273^9.

Selenonium compounds, ethyl— tribromide, 1051[5].

in protargol and collargol, state of, 1495^{9}.
reactions with Cl, Br and I, measurement of thickness of layers formed by, 1753^{1}.
with HNO_3 and with H_2S, 2627^{7}.
with Se_2Cl_2, 2294^{5}.

recovery from alloys, filings, turnings, etc., 26[1].
from films, P 1961[3].
from old fixing baths, 153[3], 1183[9].
recrystn. of rolled plate, 892[4].
removal from Wollaston wires, 2098[3].
resistant to corrosion or high temps., 2814[1].
resources of U. S. in 1924, 3415[3].
review of mining and trade information, 888[1].
Röntgen electrons from, asymmetry of discharge of, 706[7].
Röntgen-ray effect on, in photographic plate, 542[2].
Röntgen-ray refraction in prisms of, 2943[2].
screens of, effect on form of α-ray ionization curves, 3128[4].
solid solns. of, 32[9].
spectrum of, 336[7,9], 1029[6], 1354[1], 2283[4], 3640[2].
system: Cu–, unmixing of supersatd. mixed crystals in, 3599[1].
system: Pb–Zn–, 3416[8].
systems: Al–, Sn–, and Zn–, 2654[4].
tarnish, compn. for preventing, P 268[8].
tensile strength of hot, 569[1].
toning—see *Photography*.
in Utah in 1924, 2635[6].
vapor pressure const. for, 1734[9].
wire, plating with "white Au," P 1587[4]

Silver, analysis. (See also *Cupellation.*)
detection, 1037[1].
detection in dental alloys, 3664[7].
detection of small quantities, 3664[1].
detn., 27[3], 1966[2].
detn. in anode slimes, 3664[4].
in Cu-Au-Pd concentrates, 1365[7].
in dental alloys, 3664[7].
in jeweller's sweeps and in photographic residues, 2130[4].
in Pb, 1772[8].
in photographic emulsions, 1568[6], 3271[7,8].
in presence of Pb, 1967[7].
in Ag arsenobenzenes, 263[3].
in Zn retort ash, 1575[4].
sepn. from Pb, 1041[7].

Silver, metallurgy of. (See also *Amalgamation; Cyanide process.*) P 734[9].
electrolytic recovery, 1564[8], P 2290[1].
electrolytic recovery, app. for, P 1567[8].
filters for, P 3681[3].
from lead ores, 889[1], P 1781[3].
from lead-ZnS ores, P 356[4].
from manganese-contg. ores, P 356[7].
from manganese-Ag ore at Tambang Sawah, 3676[2].
from minerals contg. As and Sb, P 3278[9].
from ores contg. Cu, Au and Ag, P 1586[8].
recovery from speiss, 889[5].
refining, P 896[7].
refining by electrolysis, 1565[2], 2124[4].
removal from Pb, 1048[3].
review, 3673[9].
sepn. from Au, 3269[1].
sepn. from Au, cond. of electrolytes in, 1564[9].
from sulfide ores, P 1213[4], P 3441[1].
volatilization from ores, P 3152[9].

Silver acetate, reaction with I, 408[9].
reduction by Na formate, 2440[7].

Silver acetylide, emulsions of, 2958[8].

Silver alloys. (See also "system" under *Silver.*)
aluminum-, electrolysis of, 2939[1].
aluminum-Mn-, P 2974[6].
cadmium-, and zinc-, heat treatment effect on, 2141[3].
cadmium-, electrodeposition of, 2289[4].
chromium-Cu-Au-Zn-, P 1782[1].
copper-, coating Cu with, 2656[3].
copper-Au-, 3149[2].
copper-Sn-, for dental amalgams with Hg, P 1384[2].
gold-, and Pd-, 1927[1].
gold-, effect of compn. on elastic properties of, 733[4].
for elec. contacts, P 36[1].
HNO_3 action on, 2627[7].
Röntgen-ray study of, 2651[8].
gold-Ni , P 3442[5].
heat treatment effect on, 2141[3].
palladium-, contg. H, x-ray examn. of, 683[9].
resistant to corrosion or high temps., 2814[1].
structure and mechanical properties of, 32[9].
tin-, 3420[5].
zinc-, elec. cond. of, 1023[1].

Silver ammonia ion, catalytic effect in oxidation of NH_3 by peroxysulfates, 2609[4].

Silver ammonium nitrate, surface tension of solns of, 2770[6].

Silver arsphenamine, meningitis treatment with, 3713[4].
reaction with O_2, 2993[4].

Silver bismuthide, 2628[9].

Silver bromide. (See also *Photography.*)
desensitizers of, neutral salts and dyes as, 1568[7].
elec. cond. of mixts. with AgI, KBr and with $PbBr_2$, 2276[5].
electrochem. reduction of, 150[6].
emulsions, light effect on, 2463[8].
grain, behavior during development, 2291[6].
photochem. darkening of, 1032[1].
photochemistry of, 2458[9].
sepn. from AgI and AgCl, 1967[3].
spectral sensitivity of, and effect of color sensitizers, 2624[3].
spectral sensitivity of mixts. with AgI, 2290[1].
system: KBr–H_2O–, 2777[1].
systems: NaBr–, and KBr–, 2776[7].

Silver carbonate, compn. and decompn. of, 2625[5].
dissocn. velocity of, 3623[2].
reaction with Na halides, 324[8].

Silver cesium gold halides, 3139[2].

Silver chloride. (See also *Photographic plates, Photography.* etc.)
decompn. by light, 711[4].
dielec. const. of, effect of exposure to light on, 1762[9].
electrochem. reduction of, 150[6].
heat of vaporization and b. p. of, 2603[8].
photochemistry of, 2458[9].
sepn. from AgI and AgBr, 1967[3].
soly. product in EtOH, 3618[3].
spectral sensitivity of, and effect of color sensitizers, 2624[3].
system: NaCl–, 2776[7].
weighing small amts. of, 2629[8].

Silver chloroaurate, thermal dissocn. of, 2110[6].

Silver chromate, Liesegang rings in silicic acid gel, 3112[3].
precipitation of, effect of lyophilic colloids on, 2772[2].

Silver compounds. (See also *Silver preparations.*)
ammino-, thermal dissocn. of, 3631[6].
copper-, 879[6].

in diabetes mellitus treatment, 448[6].
double salt of Ag hexachlororhodite with NH_4NO_3, 2625[8].
with iridium and α-picoline, 2295[9].
org., 3156[2].
of tervalent silver, 1744[9].
tin-, 1768[1].

Silver cyanide, detection with x-rays, 2947[9].

Silver ferrate, 157[1].

Silver fluoride, crystal structure of, 3106[3].
heat of formation of, 2111[1].

Silver gold cesium halides, 3273[6].

Silver gold rubidium halides, 3139[2], 3273[6].

Silver halides. (See also *Photographic plates; Photography;* etc.)
analysis of, 2632[5].
atomic rays of, 3381[9].
decompn. by light, 1031[9].
isomorphic relations with Cu halides, 3253[9].
lattice consts. of, 2768[2].
manuf. of, P 3651[3].
mixed crystals of, x-ray analysis of, 318[7].

Silver hydride, spectrum of, 2948[6].

Silver hydroxide, colloidal, coagulation by KNO_3, 1741[1].
precipitation of, 27[3].
soly. product of, 1770[1].

Silvering, of glass by CH_2O process, 2398[9].
of mirrors, P 2569[6].

Silver iodate, soly. of, 1162[1].

Silver iodide, bleached-out pictures in, 23[1].
bleach-out films of, optical sensitizing of, 1764[1].
elec. cond. of mixts. with AgBr and with KI, 2276[5].
electrochem. reduction of, 150[5].
photochem. decompn. of, microbalance in study of, 3390[7].
photochemistry of, 1035[4].
in photographic emulsions, 2290[6].
in photovoltaic cell, behavior of, 710[7].
sepn. from AgBr and AgCl, 1967[3].
spectral sensitivity of, and effect of color sensitizers, 2024[3].
spectral sensitivity of, and of its mixts. with AgBr, 2290[4].

Silver ions, catalysis by, in oxidation of chromic salts by peroxysulfuric acid, 1744[9].
concn. necessary for disinfection, 454[4].
replacement of Na ions adsorbed on SiO_2 gel by, 688[5].
transport no. of, 328[1].

Silver neoarsphenamine, reaction with O_2, 2993[4].

Silver nitrate, disinfection with, effect of H-ion concn. on, 2688[8].
elec. cond. of pure and mixed solns. of, 1565[1].
electrode capacity of Ag in, 1023[4].
electrolysis in Am alc., acetonitrile, aniline and quinoline, 1022[9].
photochem. sensitizer for, ZnO as, 1954[2].
photolysis of, sensitized with ZnO, 550[5].
reactions with alkalies, 1770[1].
with basic oxides, 324[8].
with BiH_3, 2628[9].
with K_2CrO_4, effect of lyophilic colloids on, 2772[4].
with SnH_4, 1768[1].
sepn. from S by dialysis, 1547[2].
surface tension and activity of soln. of, 855[6].
surface tension of solns. of, 2770[6].
system: $Cu(OH)_2$–H_2O–, 879[8].
zone pptns. in root hairs of germinating oats, wheat and rice produced by, Liesegang ring formation in, 2107[3].

Silver ores, of Alaska (near Ruby), 3411[4].
in Aspen dist., Colo., 2302[5].
from Bolivian Andes, 1578[9].
in British Columbia, of Chilko Lake and vicinity, 30[7].
of Driftwood Creek map-area, 30[6].
of Pemberton area, Lillooet dist., 30[7].
Prince Rupert to Burns Lake, 30[6].
from Dominion Claims, Manitoba, 2305[3].
elec. cond. of veins at Kongsberg works, 728[2].
fizelyite, 3408[6].
in granite of Dartmoor, 2967[6].
in Japan, origin of, 3669[7].
lead-, of Alaska (near Ruby), 3411[2].
concn. at Hecla mine, 3674[8].
from Portland Canal dist., Stewart, B. C., concn. of, 2304[8].
of Mount Stewart, Leadville, N. S. W., 886[6].
sepn. from Au and Cu ores, etc., app. for, P 1383[1].
of Yoquivo, Chihuahua, mining dist., 3670[3].

Silver oxalate, decompn. of, formation and growth of Ag nuclei in, 1163[2].
explosive properties of, 3571[1].

Silver oxides, Ag_2O, colloidal, glycogen in prepn. of, 2105[4].
Ag_2O, soly. in mixts. of H_2O and EtOH, 3616[3].
Ag_2O_2, 155[4], 344[9].

Silver perchlorate, system: C_7H_8–, H_2O– and, 139[1].
transition p. of, 1168[3].

Silver permanganate, in pharmacy, 91[8].

Silver preparations. (See also *Collargol; Elektrokollargol; Protargol.*)
action of sugar in conjunction with, in gonococcic urethritis, 2701[7].
albumose-, 796[1].
emulsion from casein, P 3539[5].
oligodynamic action of, 1112[8].
protein, P 2049[2,3], 3778[2].
proteinates, analysis of, 3211[2].
protein, official titles of, 3537[5].

Silver salts, bactericidal action of ionized, in infectious diseases, 1866[4].
of carboxylic acids, reaction with I, 408[9].
of nitroaromatic compds., explosive properties of, 3571[1].
photochemistry of, 1036[2].
reaction with P, 2796[7].
reaction with tartaric acid, 3446[7].
soly. in blood and body fluids, 454[2].
soly. of, effect of electrolytes of body on, 71[3].

Silver sodium chloride, heat of vaporization and b. p. of, 2603[3].

Silver sulfate, compd. with HCl, 345[8], 2292[9].
effect of, in absorption of C_2H_4 by meta- ortho- and pyrophosphoric acids, 1782[8].
electromotive force (concn.) in, contg. H_2SO_4, 328[1].
reaction with basic oxides, 324[8].
system: $Al_2(SO_4)_3$–H_2O–, 693[6].
thermal decompn. of, 1167[2].

Silver sulfide, electrochem. reduction of, 150[6].
ionic mobilities in solid, 697[8].
in photographic toning, 22[9].
reactions with alk. earth oxides, 3405[1].
with heavy metal salts in presence of alc., 2797[1].

with SO_3, 2294[1].
sensitization by nuclei of, 2624[7].
Silver thallium nitrate, elec. cond. of, 1553[1].
surface tension of solns. of, 2770[6].
Silver thiocyanate, photochemistry of, 2458[9].
Silver tripyrocatecholatostannate, 3404[2].
Silver uranate, prepn. of, 3657[3].
Silver uranyl carbonate, 1962[7].
Silvol, silver content of, 3778[4].
Similitudes, theory of, dimensional analysis and, 1172[5].
Sinapis. See *Mustard*.
Singeing, corrosion of Ni-alloy singe rolls, 3680[4].
Sinigrin, constitution of, 2148[4].
enzymic cleavage of, 3300[6].
Sintering. (See also *Ores, treatment of.*)
refractory metals, P 358[6].
Siphons, automatic nonbreaking, 1731[9].
Sipunculus nudus, liquid in cavities of, H-ion concn. of, 1842[9].
Sirups. (See also *Glucose.*)
beet, rendering palatablé, P 516[2].
cane, compn. and food value of, 1000[9].
detn. of viscosity of, 120[6].
invertase process in manuf. of, 1000[7].
manuf. of, 1918[3], 3244[8].
reheating of, 121[1].
standardization of Louisiana, 3832[2].
density of, theory of, 1686[7].
diastatic malt, P 1493[1].
Easton's, increase in sp. gr. on keeping, 94[3].
of ferrous iodide, detn. of iodide and ferrous Fe content of, 3778[5].
filters for, P 316[3], P 3250[5].
fluorescence of, polarization of, 1952[8].
fruit, evaluation of, 2710[4].
of glycerophosphates, decolorization of, 799[3].
of iodotannic acid, prepn. of, 1689[3].
pectin, manuf. of, 2029[2], 2711[8].
prepn. and contamination of, 787[3].
preservation of, 2387[9].
specific gr. of, app. for automatically controlling, P 1340[9].
tartaric acid detection in, 3775[7].
water detn. in, 2088[8].
Sitosterol, anti-rachitic properties of irradiated, 3179[7].
growth promotion by irradiated, 1431[4].
Six hundred and six (606). See *Arsphenamine*.
Sizes, animal, 265[8].
for artificial silk, potato starch as, 2908[9].
book: The Use of Na Silicate for the Sizing of Paper, 2411[7].
of casein, P 267[6].
cold, 295[9].
effect on elastic behavior of flax yarns, 1909[5].
mold fungi growth on, 1327[2].
for paper, P 3569[2,4].
in paper, detn. of nature of, 2746[4].
for paper or cloth, from soy-bean protein substance, P 3544[1].
for paper or other materials, P 2073[9].
for paper, rubber resins as, 665[8].
for plaster walls, P 1530[5].
removal from textiles, 3574[8].
rosin, analysis of, 2746[7].
rosin, substitutes for, 2746[2].
sodium fluoride in cold, 295[9].
on yarn, tests for, 2076[9].
Sizing, of artificial silk, 507[3].
book: Theorie und Praxis der Harzleimung, 1522[6].
of cellulose fibers, P 3084[9].
of paper, P 111[8,9], P 2073[9], 3083[1], 3813[3].
Al resinate in, 3813[5].
detn. of degree of, 3813[3].
effect of glue top-sizing on properties of rosin and starch-sized papers, 3813[4].
effect of reactivity of pulp on, 1520[8].
gelatin in, 3083[6].
hard water in, 284[5].
with resins, colloidal nature of, 1521[3,4].
with resins, effect of Fe in, 1521[7].
with rosin, 286[7], 287[3], 2071[8].
of paper pulp, P 2248[8].
of ribbons, 293[7].
Skin. (See also *Hides.*)
absorption of gases by, 71[8].
collagenous fibrils of, 425[6].
diseases of, blood Ca in, 1448[9].
in blue print worker due to Cr compds., 249[5].
treatment with NaBr, 449[8].
disinfectant for, mercurochrome as, 2226[4].
elec. polarity of frog, and its reversible inhibition by cyanide, Et_2O and $CHCl_3$, 3467[4].
electrophysiology of, 2192[7].
enzyme content of, effect of light on, 1637[3]
enzymes in, 1636[8], 1637[2].
injury, vascular reactions to, 1844[8].
irritant of, wolfsmilk as, 1687[2].
keratin substances of, colloid chemistry and pharmacology of, 1090[7].
lesions, picrates of local anesthetics for treatment of, P 3781[1].
local anesthetic action on, 1866[8].
melanin formation in, detection of, 2176[7].
mineral content of, 2528[2].
mineral metabolism of, 3726[9].
permeability of fish, for solns. of org. food substances, 1442[9].
physico-chem. equil. of, disturbance by acidity or alkalinity, 1666[7].
potassium iodide absorption by, 1091[7].
potential, electrode for measurements of, 1824[5].
protecting from dirt, oil, grease, etc., mixt. for, P 1307[6].
reaction of, after repeated treatment of the same spot, 1266[4].
reaction to antigens of horse-dander ext., 2698[3].
reactivity of, relation to ovarian function, 2358[9].
resistance during pregnancy, 945[8].
secretion of vitamin A by, 1834[7].
specific reaction of, in tuberculosis diagnosis, 2196[3].
sulfhydryl reaction of, 1657[4].
temp. in children, 439[2].
temp. of human, 938[1].
urinary acidity and intracutaneous injections, 3182[2].
water elimination from, effect of absence of sweat glands on, 2193[4].
water output of, reduction by reducing fluid intake, 625[2].
Skunk cabbage. See *Lysichiton camtshatcense*.
Sky, light of night, 329[8].
Slags. (See also *Cement, hydraulic.*)
basic, citrate-soly. of phosphates of, 471[1].
as fertilizer, 470[9].
as fertilizer, evaluation of, 471[2].
as fertilizer for grassland, 471[8].
as fertilizer for hay, 87[1,3].
blast-furnace, 31[4].

analyses of, 2969^{8}, 3415^{7}.
as building material, 3223^{7}.
compn. of, 3675^{8}.
cooling and disintegration of, 3220^{8}.
drying of, 891^{7,8,9}.
mold for bricks of, P 650^{7}.
thermal investigations on, 3223^{2}.
blast furnace evaluation as function of quantity of, 1048^{7}.
book: Die Separation von Feuerungsrückständen und ihre Wirtschaftlichkeit, einschliesslich der Briquettierung und Schlackensteinherstellung, 1315^{9}.
broken, specifications of A.S.T.M. for, 955^{2}, 1122^{2}.
casting buildings *in situ* from, P 2238^{8}.
colored granulated, P 2058^{3}.
copper, in ancient times, 3410^{7}.
in construction work, 3549^{6}.
Cu content of, 1377^{3}.
hydraulic cement from, 1895^{4}.
effect on lime status of soils, 2220^{8}.
effect on P content of soil soln. and of soil exts., 3325^{9}.
elec. furnace, analyses of, 712^{8}.
ferric oxide in open-hearth, function of, 164^{4}.
from ferrous metals, types of, 566^{3}.
fluorine detn. in basic, 724^{4}.
formation of, 1579^{8}.
in cupola furnace, fluorite and, 2476^{5}.
in steel manuf., 3148^{4}.
formation temps. of some ferrous, effect of ZnO on, 891^{4}.
granulation of, 891^{6}, 2476^{9}.
heat for steam from, app. for, P 3559^{3}.
for highway construction, specifications of A.S.T.M. for, 954^{6}.
lead blast-furnace, Zn in, 1376^{9}.
lead, of India, 3410^{1}.
in open-hearth furnace, sweeper for, P 1214^{2}.
phosphates in, citric acid soly. of, 2222^{9}.
phosphoric acid detn. in, 1773^{7}.
pocket for, in open-hearth furnaces, P 897^{3}.
reactions in, 164^{9}.
for refractory articles, P 976^{5}.
sulfur removal from, 890^{9}.
treatment of, P 574^{8}.
utilization of, 651^{7}.
volcanic, hygroscopic water in, 3275^{8}.
wool, heat-insulation with, 487^{3}.
Slate, absorption and flexure of, methods of A. S. T. M. for testing, 1121^{8}.
bituminous, extn. of oils, waxes, etc., from, P 815^{1}.
of Cambrian belt of Nantile, Carnarvonshire, stratigraphy and structure of, 3413^{9}.
clay-, of Karelisch Isthmus, 887^{4}.
coloring of granulated, P 1307^{2}.
as flooring material, endurance of, 1701^{6}.
petroleum sepn. and extn. from, app. for, P 662^{7}.
powder in paint and related industries, 2254^{3}.
resources of U. S. in 1924, 972^{1}.
roofing, durability of, 809^{9}.
sepn. from coal, mixing sand and H_2O for, P 249^{8}.
of Wales, 3414^{4}.
water absorption and flexure of, methods of A. S. T. M. for testing, 954^{9}.
Slaughter house, by-products of, manuf. and drying of, 632^{5}.
waste from, salvage of, 3054^{7}.
Sleep. (See also *Hypnotics; Soporifics.*)
basal metabolism in, 3318^{1}.
effect on P excretion in urine, 938^{9}.
effect on urinary chlorides and H-ion concn., 2359^{4}.
studies on, 2357^{9}.
Sleeping sickness. See "lethargic" under *Encephalitis.*
Slide rule, for submerged orifices and Cipolletti weirs, 3760^{1}.
for sugar purity calcn., 2592^{7,8}.
Slimes. (See also *Ores, treatment of.*)
conveying, pressure app. for, 1540^{6}.
Slip, casting, P 2236^{1}.
deflocculation of clay, and related properties, 2234^{6}.
hydrogen-ion concn. of clay, 3547^{1}.
Sludge. See *Petroleum refining; Sewage.*
Smartweed, fluid ext. from, 3060^{8}.
Smectic substances, fatty acids as, 1736^{9}.
Smelter fumes. See *Fumes.*
Smelters. See *Furnace; Metallurgy.*

suspensions of, methods for studying and estg., 726^{8}.
tobacco—see *Tobacco.*
toxic, manuf. and properties of, 955^{9}.
Smoke stacks. See *Chimneys.*
Smoking, of fish, app. for, P 3756^{9}.
Smoluchowski coefficient, variation in, 3608^{5}.
Smut, of cereals, dry treatment for, 472^{3}.
grain, testing of fungicides for, 963^{2}.
oat, 3329^{1}.
of oats and barley, control of, 793^{4}.
wheat, 3329^{1}.
action of Cu compds. on, 793^{3}.
control of, 472^{3}.
effect of Hg compds. on spores of, 1489^{4}.
Snails, cholesterol in, 2024^{9}.
enzyme from the pancreatic juice of the vineyard, and its action on xylan, 2484^{8}.
mucoproteins of, 459^{2}.
oxyhemocyanine of *Helix pomatia*, effect of freezing on, 2168^{6}.
pond-, chemical study of, 1471^{6}.
Sniafil. See "staple" under *Fibers.*
Snow, compn. of, 2379^{3}.
nitrogen compds. in, 257^{9}.
as nitrogen fertilizer, 1488^{2}.
Snow substitutes, P 804^{8}.
Soaps, P 119^{6}, P 3830^{8}.
activity coeff. of solns. of, 3617^{8}.
adsorption at benzine-soap interface, 2770^{7}.
aging of liquid, 1146^{9}.
alc., P 3830^{9}.
alkali, British Pharm. method for prepn. of, 969^{8}.
alk. earth, colloid chemistry of, 2930^{2}.
alky. detn. in, 3829^{9}.
antitrypsin effect of, 3802^{8}.

autoclaved solns. of, effect of time, temp. and concn. on, 515[3].
bases for, manuf. of, 303[8].
bituminous, for binding and waterproofing, P 489[6].
bleaching of, 3583[8].
bleaching with persulfates, 999[7].
boiling, chem. control of, 2423[5].
detg. reaction velocity in, 1724[9].
equil. underlying, 1725[2].
foam-beating app. for, 3356[6].
books: 647[1], 2048[9]; Industrie der, 464[6]; Grundzüge der allgemeinen Chemie und die Technik der Untersuchung der Rohmaterialien und der Betriebskontrolle in der Seifenindustrie, 999[9]; Praktisches Rezeptbuch für die gesamte Fett-, Öl-, Seifen- und Schmiermittel-industrie, 2084[9]; The Modern, and Detergent Industry, 3243[9]; L'Industria dé, 3356[9].
borate detn. in, 3829[8].
building of, 2591[3].
casein in, 972[3].
chem. constitution of, 3365[9].
chips, drying of, P 3357[1].
chromium, P 675[8].
clarification of brines with, 2564[8].
coconut and palm-kernel oil in, 302[9].
coconut oil and linseed oil, germicidal efficiency of, 1827[8].
coconut oil, antioxygens for, 2819[9].
cold process for manuf. of, 2590[9]
colloidal, water in, 1550[8].
colloid theory and, 321[6].
concn.-temp. curves of, 515[4].
consumption of, in use of water contg. waste liquor from potash manuf., 2713[3].
curd, P 3830[6].
hardened fats and lathering ability of, 304[1].
utilization of dirty fats and oils for, 999[7].
decompn. and discoloration of, prevention of, P 3584[8].
in dentifrices, 263[2].
detection of traces of, 1968[7].
detn. in feces, 3473[7].
detn. in sheep dips, 963[8].
drier for, P 675[3].
drying of, 2591[3].
drying of, humidity and, 3584[2].
effect on pharmacol. action of drugs on intestines, 1464[1].
emulsifying power of solns. of, measurement of, 3092[8].
emulsions with mineral oil, analysis of, 2223[4].
emulsions with oils, 2301[9].
Eschweger, manuf. of, 3356[5].
evaluation of, 1915[2].
fillers for, colloidal clays as, 2423[1].
films, compn. of, 687[2].
films (monomol.) of, in emulsions, 4[3].
flaked, P 1000[4].
foaming of textile, 2591[6].
foam value of, detn. of, 2913[1].
germicidal properties of, 1828[2].
glycerol, P 119[9].
green coloration of, 2722[8].
history of, 515[6], 1915[2].
industry, 999[4].
in Palestine, 2422[7].
review of, 3356[3].
light-colored, fat splitting and, 2759[6].
of linseed and sunflower-seed oils, polymerization of, 3092[5].
liquid, detn. of concn. of, 2423[8].
liquid, shampoos of, 2423[6].
manuf. of, app. for, 304[2], 673[7], P 835[2], 1146[8].
manuf. of, interchangeability of oils and fats in, 2759[7].
metallic, in lacquers, 1912[7].
milled toilet, gloss and smoothness in, 674[6].
mixts. with solvents, 834[8].
naphthenic, 834[9].
naphthenic acid for manuf. of, 2422[8].
naphthenic acid, properties of, 2744[2].
perfume essences in Marseille, 1724[9].
from petroleum oils, 1512[7].
phenol solns. contg., analyses of, 1332[1].
phenyl stearate-contg., P 2257[4].
porous tablets of, P 119[9].
powdering, without milling, 999[8].
powder, manuf. of, 2913[1].
pressure in manuf. of, 3829[7].
properties of, effect of degree of hydrogenation of oils used on, 3356[3]
radioactive medicinal, P 1890[2].
rancidity and spot formation in toilet, 674[6].
rancidity and yellowing of, 999[5].
rancidity of, 1915[2].
review for 1923, 513[9].
rosin detn. in, 673[9].
rosin in kettle-charge in manuf. of, calcn of, 1332[6].
rosin in manuf. of, 3089[9].
rust-preventive, review on, 995[6].
salting out of, 2423[3].
concn. of electrolytes required for, 2932[6].
transposition of potash and soda by, 2423[4]
savonade in prepn. of benzine and petroleum, 304[3].
scented, manuf. of, 1725[2].
shaving, P 119[8], 1332[3], 2759[7].
sodium chloride detn. in bar, 2912[9].
soln. for milk fat detn., prepn. of coconut oil, 1674[6].
solns., effect of age on, 119[5].
prepn. of, app. for, P 2591[9].
purifying app. for, P 675[4].
surface properties of, 1738[3].
surface tension of, 966[6].
surface tension of, effect of ions on, 322[7].
viscosity and elasticity of, 2108[1].
from soy-bean oil, 1531[3].
specks on textiles, 2753[7].
in sprays, 89[2].
stain-removing, 1725[2].
stocks, corn oil and soy-bean oil in, 119[4].
swelling consts. of, 3829[5].
from tallow and its fatty acids, 3092[8].
textile, 304[2].
in textile fulling, 507[4].
toilet, manuf. of, 3584[4].
toxin mixts. of, as antigens, 444[4].
treating wool, silk and other textiles with solns. of, P 3823[9].
turbidity point of solns. of, detn. of, 673[8], 1146[9].
vitamin, 3356[6].
washing compds. *vs.*, in laundering, 3351[9].
water detn. in, 2223[4].
in waterproofing of concrete, 1506[7].
for wool, 2909[3].
Soapstone. (See also *Talc.*)
industry in 1925, 3783[8].
resources of U. S. in 1924, 2565[9].

Soda. See *Sodium carbonates; Sodium hydroxide.*
Soda ash, densifying and granulating, P 3065[4].
heating of fused, electrically, P 3651[9].
hydration of, P 85[1].
in petroleum recovery from sands, 3801[2].
washing app. for black, P 316[6].
Sodamide. See *Sodium amide.*
Soda pulp. See *Paper pulp.*
Sodefuri mame, copper in, 616[2].
Sodium. (See also *Alkali metals; Sodium ions.*)
addn. compd. with $AlPh_3$, 2993[1].
arc in a vacuum, 2451[7].
balance in health and in diabetes, 3180[8].
in blood, effect of bleeding on, 3035[6].
in blood in narcosis, 3743[8].
in blood serum, activity of, 1658[2].
electrodialysis of, 3030[1].
state of dispersion of, 921[1].
in blood serum and corpuscles, effect of hemorrhage on, 2538[9].
in blood serum normally and in renal disease, 441[9].
diamagnetism of, 1557[8].
effect on Al-Si alloys, 3423[6,8], 3424[2].
on cell division rate, 2539[9].
on heart, antagonism of nonelectrolytes to, 3194[9].
on heart automatism, 3497[2].
on silumin, 3423[8].
on sugar metabolism in liver, 2358[5].
on wheat diet, 3024[4].
elec. double refraction of vapor of, 142[4].
elec. resistance of, at low temp., 864[6].
excretion of, effect of K on, 1259[7].
excretion of, in calcium therapy, 2019[7].
gaseous ions of, energies of soln. of, 2446[1].
glow discharge of Ca mixed with, 2121[6].
heat of ionization of, 331[4].
heat of reaction with several substances, 3123[2].
ionization potential of, 331[4], 2945[8].
light absorption in vapor of, 1555[7].
magnetic properties of atoms of, 2614[5].
manuf. of, P 2126[6], 2288[4].
manuf. of, electrolytic cell for, P 1957[8].
mol. wt. of, relation to sp. gr., 850[8].
mols., relations between electronic structure and band-spectrum structure in, 2458[1].
in org. syntheses, compared with Li, 2320[9].
in oxyhemoglobin in horse blood, 1249[8].
Paschen-Back effect of, 2618[9].
photoelec. effect (selective) of, 869[8].
polarization effects with, 2952[5].
production, properties and uses of, 1695[1].
reaction with alcs. and acids, 2111[2].
with alkyl disulfides, 1217[3].
with bromoethylene derivs., 359[8].
with I, spectroscopy of chemiluminescence of, 1179[1].
with Se_2Cl_2, 2294[5].
with S in solid phase, 3622[9].
refractive index of vapor of, in magnetic field, 2113[9].
resonance fluorescence of, extinction of, 2119[2].
resonance fluorescence of, polarization of, 3133[2].
Röntgen rays from, 706[2].
in skin, 2528[3].
in soil, effect on compn. of plants, 2033[1].
spectrum of, 12[1], 543[1], 1555[7], 1562[2], 2118[6], 2283[4], 2284[9], 2618[8], 2949[3], 3132[2], 3387[4,5].
spectrum of reactions with $HgCl_2$, Cl_2, Br_2 and I_2, 1947[9].
system: Hg-, 1021[8].
system: Sn-, 1747[9].
in tears, 1419[1].
vapor, electro-optical investigations in, 1558[8].
vapor, excitation by light, 2613[7].
Sodium, analysis, detection, 159[9], 1189[8], 2297[5], 2801[7].
detection in presence of K, 2797[7].
detn., 1771[3], 2802[2], 3144[8], 3407[4].
in lime sludge, 1522[3].
in silicates, 1576[5].
in soils, 3055[8].
sepn. from K, 3660[6].
Sodium acetate, activity coeff. of, 3617[3].
effect on fermentation by yeast, 2866[6].
effect on intestine in presence of atropine, 2203[2].
epileptic attack from injection of, 235[2].
light absorption in ultra-violet, 2456[1].
reaction with benzyl chloride, effect of rate of stirring on velocity of, 1937[3].
with Bi_2O_3, 899[8].
with salts of weak metallic bases, H electrode studies of, 2447[5].
viscosities of solns. of, 854[3].
Sodium alloys. (See also *Alkali metal alloys;* and "system" under *Sodium.*)
amalgam-, distn. of, 686[1].
electrolysis of, 2938[8].
manuf. of, app. for, P 3398[3].
reaction velocity with aq. solns., 1017[2].
vapor pressure of, 3109[3].
Sodium aluminate. (See also *Alkali metal aluminates.*)
from alumina and soda, 2564[7].
as coagulant in water purification, 1123[9].
manuf. of, P 3215[1].
Sodium aluminum fluoride, 559[7].
Sodium amide. (See also *Alkali metal amides.*)
reaction with org. compds., 2491[6].
Sodium ammonostannite, 720[9].
Sodium antimonyl tartrate, reaction with polyhydric phenols, 1987[2].
Sodium aquoferricyanide, reaction with $Na_2N_2O_2$, 1769[8].
Sodium arsenate. See *Alkali metal arsenates.*
Sodium arsenite. (See also *Alkali metal arsenites.*)
effect on blood sugar concn., 71[6].
effect on nerves, 2020[6].
induced oxidation of, 849[4].
as insecticide for sheep blow-fly, 793[9].
as killing soln. for plants, 259[4].
oxidation by O, effect of rate of stirring on velocity of, 1937[2].
Sodium arsphenamine, reaction with O_2, 2993[4,8].
Sodium aurothiosulfate. (See also *Sanocrysin.*)
prepn. of, 559[7].
Sodium azide. (See also *Alkali metal azides.*)
from ammonolysis of $NaNO_3$ with $NaNH_2$, 1185[9].
crystal structure of, 318[1].
Sodium barbital, identification of, 476[9], 2719[5].
with paraldehyde, effect on cocaine poisoning, 3509[7].
Sodium benzoate, behavior in animal organism, 3496[1].
chlorine in, 2389[7].
oxidation-reduction potentials of, 328[3].

pharmacol. action of, 450[9].
preservative properties of, 3712[8].
Sodium benzyloxide, reaction with alkyl iodides, 2671[4].
Sodium beryllium fluoride, 881[1].
Sodium bicarbonate. See *Sodium carbonates*.
Sodium bisulfate. See *Sodium sulfates*.
Sodium bisulfite. See *Sodium sulfites*.
Sodium bromide, absorption of β-rays by solns. of, 3127[9].
crystals, producing large, 2602[6].
in dermatology, 449[8].
effect on blood vessels of brain, 3514[8].
effect on H_3PO_4 in brain tissue, 2023[2].
elec. cond. of, 3618[5].
in mixts. of MeOH and EtOH, 1553[7].
in single crystals and in cryst. aggregates, 3377[6].
heat of soln. of, 1749[2].
ionization in abs. EtOH, 3618[2].
ionization of water in soln. of, 3372[2].
nervous system in animals treated with, carbohydrate and glycogen content of, 2530[7].
photoelec. effect in, 2785[8].
solns. in MeOH, viscosity and d. of, 3616[5].
system: EtOH–, 1746[3].
system: AgBr–, 2776[7].
Sodium butoxide, in indanthrene prepn., P 1814[1].
Sodium cadmiopyrophosphate, 2794[2].
Sodium calcium carbonate, decompn. of, 685[5].
Sodium calcium silicates, 3624[2].
Sodium carbide, dissoc. by heat, 695[8].
Sodium carbonates (See also *Alkali metal carbonates; Soda ash.*)
barium detn. in, 2964[3].
from black liquor from paper pulp manuf., 3063[1].
book: Fabrikation der Soda, 802[4].
in British Columbia, 2302[8].
compd. of, P 2051[3].
effect on case-hardening, 3428[4,8].
effect on intestinal contraction, 2533[3]
manuf. of, large pots and boilers for, 3782[1].
in salt pans of S. Africa, 1132[2].
$NaHCO_3$, Be compds. with, 2127[9].
detn. of, 883[3].
dyspepsia treatment with, 3041[7].
effect on alkaloid salt action on eyes, 3513[2].
effect on diuresis, 1855[2].
effect on H-ion concn. of blood, 2189[8].
effect on H-ion concn. of feces, 1841[1].
effect on milk yield and compn., 1657[9].
incompatibility with Na salicylate and $FeCl_3$, 2563[3].
from lake brines, P 1306[8].
manuf. of, P 3784[8].
reaction with ferric sulfate, 3259[1].
specifications for, 2798[9].
Na_2CO_3, ammonia soda process, P 802[8].
for analytical work, specifications for, 3406[5].
crystn. of supersatd. solns. of, 2128[2].
decompn. by H_3BO_3 and H_3AsO_4, 1186[1].
detn. in sodium oxalate, 3406[8].
effect on acid soils, 3768[1].
effect on adrenaline discharge, 2206[7].
effect on ammonification, nitrification and plant growth, 1879[9].
effect on germs and plant growth, 433[6].
formation on contact of Fe with Na_2SO_4 and air, 3150[8].
impurities in, detn. of, 3407[1].
manuf. of, P 96[9].
mol. contraction of aq. solns. of, 3118[7].
in petroleum recovery from sands, 3801[1].
reaction with Al_2O_3, 2564[7].
reaction with $BaSO_4$, 3374[1].
reaction with $BaSO_4$ and $PbSO_4$, 324[8].
reaction with ferric sulfate, 3259[1].
sepn. from brines, P 3214[7].
sepn. from Na_2SO_4 and NaCl, P 482[4].
standardization of HCl with, 1041[1].
system: $CaCO_3$–H_2O–, soly. curve fo 960[7].
system: Li_2CO_3–, ionization in, 2614[3].
transformation temp. of hydrates of, detn. of, 1745[3].
Sodium caseinate. (See also *Alkali metal caseinates.*)
effect on membrane hydrolysis, 3465[4].
Sodium chlorate, crystals, angle variation during growth of, 2602[4].
manuf. in dye-houses, 508[4].
Sodium chloride. (See also *Alkali metal chlorides; Physiological saline solutions*)
absorption by intestine, 2009[3].
for analytical work, specifications and tests for, 3406[9].
antagonism to KCl in hemolysis, 625[3].
blood and symptomatic changes following intravenous injections of, 1855[7].
in blood, effect of secretion of gastric juice on concn. of, 1098[6].
during fatigue, 2357[3].
relation to formation of gastric HCl, 441[4].
variation with food ingested, 1652[9].
of blood plasma in pneumonia, 2364[8].
books: 1942[1]; dans le sérum du cheval, 1263[9].
bromism treatment with, 1850[4].
in butter and its influence on quality, 245[4].
calcium and Mg removal from, P 3337[5].
chlorine from, isotopic compn. and at. wt. of, 1755[6].
corrosion of Al by, 3438[9].
craving for, theory of, 922[4].
crystn. of, P 972[9].
crystn. of, effect of colloids on, 1738[9].
crystals, producing large, 2602[6].
crystal structure of, 683[7].
deposits of Mich. and Ontario and manuf. of pure, 801[1].
deposits of S. Africa, 1132[2].
detection in feeds, 2212[9].
detn. in mixts. with KCl, 2299[4], 2629[8].
detn. in soaps (bar), 2912[9].
dialysis of, membrane for, 1547[3].
diffusion in pressed yeast, 1088[6].
dispersion of, 709[4].
Donnan membrane equil. between casein and, detn. of size and charge of colloidal particles with, 3113[1].
drying of, furnace for heating gases for, P 848[2].
effect on acetone body formation and excretion, 3719[4].
on adsorption of dyes by SiO_2, kieselguhr, asbestos and cotton, 2928[7].
on ammonification, nitrification and plant growth, 1879[9].
on arterial, cerebrospinal and lymph fluid pressure, 1273[7].
on bacterial growth, 3712[1].

on blood and on liquid and salt exchange between tissues and blood, 1096[4].
on case-hardening, 3428[3].
on chlorine metabolism in hyperchlorhydria, 3034[9].
on clay soil, 2634[4].
on corn ration for growing animals, 2005[5].
on ferrous metals, 573[8].
on gall bladder, 1855[5].
on gastric secretion, 223[7].
on growth of pigs, 618[9].
on hemolysis, 2507[4].
on intestine, 1860[9].
on lymph, 3045[5].
on plants, 1682[4].
on protoplasm of *Amoeba proteus*, 2511[7].
on rennet action on milk, 951[9].
on sugar fermentation by yeast, 1265[2].
on yeast, 3308[1].
elec. cond. in cryst., 1553[8], 3377[6].
elec. cond. of, 2939[2], 3618[5].
elec. cond. of, and of its binary and ternary mixts. with HCl and KCl, 2270[9].
elec. cond. on surface of rock-salt crystals, effect of electrostatic charge on, 1022[9].
electrolysis of, 2288[2], P 3398[1].
anode effect in, 3134[9].
cell for, P 341[2].
with diaphram cells, 3269[5].
epileptic attack from injection of, 235[1].
excretion by undisturbed kidney, 1103[7].
flow of, 132[5].
flow pressure of, 2435[6].
flow pressures of halite, 884[4].
in gas analysis, use of concd. soln. as con fining liquid in, 1370[2].
heat of fusion of, 694[9].
heat of soln. of, 1749[2].
heat of vaporization and b. p. of, 2603[8].
hypertonic, in adynamic ileus, 1850[7].
industry in Poland, 265[4].
intracutaneous test, 3187[9].
iodine in, 239[1].
iodized, effect on lactation, 3181[7].
iodized, in goiter prevention, 2371[2].
ionic radius for, 3258[4].
lead iodide soly. in solns. of, 3371[5].
light scattering in solns. of, 2113[2].
from marine water, 3540[2].
metabolism in burns, 3037[1].
metabolism in nephrosis, effect on urinary H-ion concn., 1659[7].
mixed crystals of KCl and, flow pressures of, 884[4].
mol. refraction of, 1028[8].
mutual orientation of crystals of NH_4Br and, 1736[2].
mutual soly. increase of org. compd. and, in aq. EtOH, 3116[8].
nomenclature in pharmacy, 1303[6].
in perspiration, 2532[1]
photoelec. cond. of, at low temps., 869[7].
photoelec. effect in, 2785[6].
photosensitivity of crystals of, 869[9].
plasticity of, 529[4].
potassium chloride soly. in $MgCl_2$ and, 480[9].
potential difference and equil. across semipermeable collodion membrane in, 864[1].
potential difference between H electrode and quinhydrone electrode in solns. of, detn. of, 1194[1].
reaction with $Ba(NO_3)_2$, 1363[8].
with F, heat of, 2110[9].
with I, 3372[3].
recovery from brines, P 3214[7], P 3542[7].
recovery from mixed salts, P 3065[4].
for refrigeration, P 2232[3].
resistance of maize to, age of seedlings as factor in, 1429[8].
resources of U. S. in 1924, 801[2].
rock salt, bending in air and water, 3253[5].
bending of crystals of, 852[5].
cohesive strength of, 1927[3].
coloration by radiation, 3146[4].
deposits of Germany, metamorphism of salts in, 2967[7].
expansion coeffs. at low temps., detn. of, 3376[7].
in Marathon fold, Texas, 1778[2].
photoelec. and optical measurements on blue and yellow crystals, of, 1948[5].
photoelec. cond. in, 3129[5].
puncture of, 1751[6].
Ra effect on, 3127[9].
strength increase in, 3253[7].
surface tension of, 2927[3].
tenacity, deformation and recrystn. of, 2102[9].
two kinds of colored, 2131[8].
variations of reticular distances on application of a force, 2435[6].
Röntgen-ray reflection by, effect of crystal size on, 2786[9].
from saline liquors, P 1695[8].
sepn. from Na_2CO_3 and Na_2SO_4, P 482[4].
sodium-colored halite, 2131[8].
solid soln. with KOH, P 2566[3].
soly. in H_2O, effect of Me_2CO and EtOH on, 1930[1].
soly. of metals and alloys in 5%, 689[9].
spectrum of rock salt, 1558[6].
spectrum (Röntgen) of, 12[1].
standard soln. of, 2795[5].
surface tension and activity of soln. of, 855[8].
surface tension of solns. of, development with time, 2927[5].
in sylvinite, fertilizing with, 3206[2].
in synthetic saltpeter manuf., 1497[2].
system: $KCl-H_2O-$, 1970[6].
system: $AgCl-$, 2776[7].
system: $NaOH-H_2O-$, space diagram for, 3627[5].
system: $Na_2SO_4-MgSO_4-MgCl_2-H_2O-$, 325[8].
in Texas and N. Mexico, 1196[4].
thermal cond. in rock salt, quantum theory of, 700[1].
in tissue fluids, effect on mineral exchange and cellular permeability, 226[9].
in tuberculous organism, 1446[3].
vapor pressure of, and its mixt. with KCl, 2103[7].
Sodium chloroiodide, from iodine and NaCl, 3372[3].
Sodium chloroiridate. See *Alkali metal chloroiridates.*
Sodium chloroiridite, as catalyst for HCHO decompn., 38[8].
Sodium chloroplatinate, decompn. by heat, 694[7].
heat of soln. of, and of reaction of, with Co, 691[1].
vapor tension of hydrates of, 1344[8].
Sodium chlororhodite, decompn. by heat, 694[8].
heat of soln. of, and hydrates, 695[1,2].
Sodium chromate. (See also *Alkali metal chromates.*)

recovery from NaCl brine, 1132[4].
refining caliche, P 483[5].
review, 2041[7].
sepn. from NH_4Cl, P 3784[2].
solid soln. with $CaCO_3$ as fertilizer, P 2566[3].
synthetic, sodium chloride in manuf. of, 1497[3].
systems: KNO_3–H_2O–, and H_2O–Na_2SO_4–$NaNO_3$–K_2SO_4–, 1164[5,6].
Sodium nitrite, effect on circulation in lungs, 1851[6].
effect on striated muscles and nerve trunks, 2540[7].
induced oxidation of, 849[4].
manuf. of, by arc process, 481[2].
in meat curing, 461[9], 3754[6].
methemoglobin formation from hemoglobin by, 1099[9].
oxidation by Br-water, rate of, 1348[3].
oxidation of, catalysis in, 2935[4].
photochem. reaction with I, measurement of energy absorption attending, 1032[6].
Sodium oxalate. (See also *Alkali metal oxalates.*)
analysis of, 3406[6].
for analytical work, specifications for, 3406[4], 3406[8].
effect on potassium content of erythrocytes, 2539[1].
induced oxidation of, 849[4].
potassium detn. in, 3406[7].
reaction with salts of weak metallic bases, H electrode studies of, 2447[5].
Sodium oxides, 2626[9].
reduction of, 2103[3].
Na_2O, system: SiO_2–CaO–, 1503[4].
systems with SiO_2, Al_2O_3 and CaO, 2960[6].
Na_2O_2, manuf. of, 2622[2].
Sodium palladium oxalate, prepn. and properties of, 2625[4].
Sodium pentaborate. (See also *Alkali metal pentaborates.*)
manuf. of, P 2232[2]
Sodium perborate. (See also *Alkali metal perborates.*)
destruction of org. matter with 726[7].
manuf. of, 2288[4].
stabilizing solns. of, P 97[4].
Sodium perchlorate. (See also *Alkali metal perchlorates.*)
effect on lead sulfide precipitation from $Pb(ClO_4)_2$, 2294[7].
refractive index of, 699[4].
specific vol. of, 2270[6].
Sodium periodate, crystal structure of, 3253[3].
Sodium perzirconate, 156[7].
Sodium phenobarbital, effect on blood pressure, 1851[2].
effect on cerebral circulation, 2209[2].
effect on coronary circulation, 2208[9].
Sodium phenoxide, reaction with C_2H_5I, velocity of, 2840[6].
———, *o*-**amino-**, reaction with O_2, 2993[8].
———, *m*(*o* and *p*) **chloro-**, reaction with C_2H_5I, velocity of, 2840[6].
———, **2,4-dichloro-**, reaction with C_2H_5I, velocity of, 2840[6].
Sodium phosgeno-aluminate, 534[9].
Sodium phosphates. (See also *Alkali metal phosphates.*)
NaH_2PO_4, effect on hydrogen-ion concn. of feces, 1841[1].
effect on sugar fermentation by yeast, 1265[9].
incompatibility with methenamine, 2895[1].
parathyroid overdosage phenomena produced by, 2509[6].
Na_2HPO_4, effect on calcium and P metabolism in thyroparathyroidectomy, 2538[4].
effect on diuresis, 1855[2].
effect on insulin hypoglucemia, 233[7].
effect on milk yield and compn., 1657[3].
excretion of Ca, P and Mg after injection of, 2537[9].
melting p. of, 3779[2].
reaction with *d*-fructose and with *d*-glucose, 3691[9].
Na_3PO_4, reaction with $Ca(OH)_2$, 3273[5].
Sodium plumbite, effect on org. S compds dissolved in naphtha, 1784[2].
recovery in oil industry, 661[2].
Sodium plumbopyrophosphate, 2794[2].
Sodium polyselenide, 559[5].
Sodium polysulfide. (See also *Alkali metal polysulfides.*) 559[5].
as fungicides, 2223[6].
prepn. of, 2294[8].
unhairing action of, 1336[5].
Sodium potassium tartrate. See *Potassium sodium tartrate.*
Sodium pyrogalloaquomolybdate. See *Alkali metal pyrogalloaquomolybdates.*
Sodium pyrophosphate, crystn. of acid, P 803[4].
system: KPO_3–, ionization in, 2614[3].
Sodium rare earth chromates. See *Alkali metal rare earth chromates*
Sodium rare earth sulfates. See *Alkali metal rare earth sulfates.*
Sodium salicylate, blood and symptomatic changes following intravenous injection of, 1855[7].
diuretic action of, 1860[1].
effect on blood vessels of brain, 3514[9].
on chloroform syncope, 2206[4].
on respiration and min. vol. during heat puncture hyperthermia, 1279[3].
on yeast, 3308[1].
incompatibility with $NaHCO_3$ and $FeCl_3$, 2563[3].
preservative properties of, 3712[8].
Sodium salts. (See also *Alkali metal salts.*)
in commerce, 3782[2].
effect on starch synthesis in plants, 62[3].
industry in 1925, 3782[1].
properties of, comparison with K salts, 2103[7].
for salting out soap solns., concn. of, 2932[2]
sepn. from K salts, NH_4 oxalate as reagent for, 1189[8].
vol. change in dissoln. of, theory of internal pressure and, 2931[8].
Sodium silicates. (See also *Alkali metal silicates.*)
aqueous solns. of, prepn., elec. cond. and transport nos. of, 2931[4,5].
books: Das Wasserglas, 481[7]; The Use of, for the Sizing of Paper, 2411[7].
as coating for artificial stone, 977[9].
as corrosion preventive, 896[3].
effect on casting properties of ceramic materials, 3339[6].
effect on egg production in *Lecane inermis*, 3515[7].
in fire-protecting varnishes, 298[7].
hydrolysis of, 3257[8].
manuf. of, 3336[8].
in printing vat dyes, 506[4].

scattering of light by aq. solns. of, 2941[9].
sodium ion activity in aq. solns. of, 3372[5].
solns. in H_2O, 3616[9].
system: $CaO.SiO_2$–SiO_2–, 3624[1].
washing compds. contg., 3829[8].

Sodium silver chloride, heat of vaporization and b. p. of, 2603[8].

Sodium sulfates. (See also *Alkali metal sulfates.*)
action on hydraulic cement, 3069[4].
effect on refining of mats, 2133[5].
effect on synthetic tanning materials, 3586[5].
$NaHSO_4$, granulating, P 648[9].
reaction with org. compds., 3686[1].
Na_2SO_4, activity coeff. of, 1935[9].
causticizing, 2220[1].
compressibility of solns. of, 1014[1].
cond. of, 2939[2].
crystn. of supersatd. solns. of, 2128[2].
dialysis of, membrane for, 1547[3].
dissocn. pressure of, 2097[7].
dissocn. pressures and transition point of, measurement of, 3261[4].
effect on ammonification, nitrification and crop yield, 1880[1].
effect on bile secretion, 3193[2].
effect on growth of pigs, 618[6].
effect on kidney, 1867[4].
effect on refining of mats, 354[6].
equil. with H_2O vapor, effect of presence of air on concn. and activity of, 2111[9].
light scattering in solns. of, 2113[2].
manuf. of, P 972[7], P 3542[6].
mol. contraction of aq. solns. of, 3118[7].
reaction with calcium aluminates, 488[5].
sepn. from brines, P 3214[7].
sepn. from Na_2CO_3 and NaCl, P 482[4].
from sodium bisulfate and NH_3, 3334[3].
sodium carbonate formation on contact of Fe with air and, 3150[8].
from sodium dichromate manuf., utilization of, 647[6].
specifications for, 2798[8].
system: $La_2(SO_4)_3$–H_2O–, 346[8].
system: $Nd_2(SO_4)_3$–H_2O–, 879[3].
system: Na_2Cl_2–$MgSO_4$–$MgCl_2$–H_2O–, 325[8].
system: Na_2S–H_2O–, 2444[5].
system: $Na_2S_2O_3$–H_2O–, 2444[2].
systems: K_2SO_4–H_2O–, $NaNO_3$–H_2O–, and H_2O–$NaNO_3$–K_2SO_4–KNO_3–, 1164[5,6].
system: H_2SO_4–EtOH–, 3627[6].

Sodium sulfate-carbonate, crystallography of, 2601[6].

Sodium sulfide. (See also *Alkali metal sulfides; Sodium polysulfide.*)
as analytical reagent, 722[6].
detn. of, 1042[7].
effect on linen, 2251[9].
granulating, P 648[9].
manuf. of, P 2051[2], P 3785[1].
in paper pulp manufe, 1517[9].
prepn., 1693[9].
reaction with SO_2, 2294[1].
reduction of nitrosophenols with, 178[2].
system: Na_2SO_4–H_2O–, 2444[5].

Sodium sulfites. (See also *Alkali metal sulfites.*)
in cooking straw and wood, 2071[6].
$NaHSO_3$, from calcium magnesium acid sulfite, P 3542[6].
formaldehyde compds., 2309[6].
oxidation by Br-water, rate of, 1348[3].
recovery from waste sulfite pulp, P 112[1].
spectrum of, 1355[6].
Na_2SO_3, as fixing agent in printing-out, 154[4].
manuf. of, P 3784[9].
oxidation by atm. O, effect of ultra-violet light on, 1759[6].
oxidation by atm. O, kinetics of, 1017[4].
oxidation potential of solns. of, 2468[4].
for paper pulp manuf. from straw and resinous woods, 1322[6].
reaction with S, 1363[5].
spectrum of, 1355[6].
thermal oxidation of, dust particles as catalysts in, 3375[1].

Sodium tetraborate. See *Borax.*

Sodium tetrathionate, decompn. of, in aq. soln., 559[1].

Sodium thiocyanate, manuf. of, P 803[1], P 2231[4].

Sodium thiosulfate, manuf. of, P 648[9], 801[2], P 803[1], P 2051[2].
in mercuric chloride poisoning treatment, 2369[6].
in metallic intoxication treatment, 1115[1].
oxidation by Br-water, rate of, 1348[3].
recovery from Na_2S prepn., 1693[9].
from sodium sulfite and S, 1363[5].
specifications for, 2798[8].
stability of solns. of, 26[2].
standardizing, 1770[7], 3407[1].
standard solns. of, preservation of, 2800[5].
sulfite and sulfate removal from, 1305[8].
syphilis therapy with, 1865[6].
system: Na_2SO_4–H_2O–, 2444[2].
titration of I with, new type of end point for, 3144[2].
vapor tension of hydrates of, 1344[8].

Sodium tripyrocatecholatomanganate, 717[6].

Sodium tungstates, effect on gelatin sols, 1742[1].
reduction of, 156[4].

Sodium uranylphosphite, 2793[7].

Sodium uranylpyrophosphate, 2793[7].

Sodium vanadate, $Na_4V_6O_{17}$, 558[1].

Sodium vanadium sulfate, 2626[2].

Sodium vanadyl sulfate. See *Alkali metal vanadyl sulfates.*

Sodium zinc sulfide, 886[1].

Soils. (See also *Fertilizers; Loam.*)
absorption by, 3203[8].
absorption capacity of, detn. of, 1482[6], 3204[2].
absorption of fertilizers by Ceylon, 3768[4].
acid, Al and, 3527[2].
biol. activities in, 2037[4].
effect of $CaCO_3$, gypsum and Na_2CO_3 on, 3768[1].
plant growth on, 640[1].
acidity of, 256[8], 1126[6], 1680[2].
adsorption by activated charcoal and, 3527[5].
effect of liming on, 2038[7], 3767[3].
effect on ammonification and nitrification of woodland soils, 1878[5].
effect on flax growth, 2553[5].
effect on hookworm larvae, 256[2], 1292[5].
in North Wales, 468[4].
plant life and, 2889[7].
quinhydrone method and, 1679[8].
review, 1880[1].
vegetation expts. on, 3767[3].
acids in, resistance of limestone to, 1485[4].
adsorption of $(NH_4)_2SO_4$ in, 85[4].

adsorption of H ions in, effect of electrolytes on, 2714[1].
algae of, relation to C compds., 2180[9].
alkali, 3055[9].
  durability of cement drain tile and concrete in, 1897[3].
  effect on peach stocks employed for apricot and plum trees, 1883[6].
  origin of, 1680[4], 3326[5], 3528[4].
  of the Sudan, 468[3].
alkali chloride effect on, 1297[4].
alkali effect on barley and oats in, 1297[3,9].
alkalies of, bibliography of, 256[7].
alkalies of, effect on cement and concrete, 2382[5].
alk. reaction of, effect on plants, 1485[6].
alky. of, lithological constitution and, 960[7].
aluminum in, 2218[4].
aluminum of, relation to soil reaction and plant growth, 640[2].
amebae in, effect of antiseptics on, 1879[3], 3529[9].
amelioration with molasses, 1917[5].
amonia content of, relation to total N, nitrates and soil reaction, 1483[4].
ammonification in—see *Ammonification*.
analyses of, 565[1].
anion retention by, effect of nature of exchangeable bases on, 2553[4].
for apricot and plum trees, 1883[5].
Azotobacter effect on, 3478[9].
Azotobacter in, multiplication with respect to soil reaction and content of $CaCO_3$ and H_3PO_4, 2715[3].
Bacillus radicicola in, 2554[3].
bacteria (green) in, 1423[1].
bacteria in, counting, 1483[9], 3766[3].
bacteria in frozen, 2039[6].
bacteria in, temp. conditions and adaptability to climate of, 3530[1].
bacterial flora of wind-blown, 1484[1].
bacteria of colon-aërogenes group in, 2890[2].
bacteriol. processes in, effect of H-ion concn. on, 217[8].
bacteriol. studies at Idaho Sta., 1879[8].
"baraggian," calcareous fertilization on, 2222[5].
base exchange in, 3766[1].
base exchange in relation to alkali, 1295[2].
biochem. investigation of, 2037[4]
biol. processes of, effect of disinfecting sugar-beet seed on, 2040[7].
biology of, 2553[6].
blackening of sand, 3203[2].
books: The Science of, 473[2]; Bacteria in Relation to Soil Fertility, 643[4], Petrografische Werkzaamheden ten Behoeve van het Bodenkundig Onderzoek in Ned.-Oost-Indie. Die Petrographie der Residenz von Bantam, 728[5]; Soil Characteristics, 1491[3]; Grundriss der Mineralogie, Gesteins- und Bodenkunde, 1579[3]; Klima und, in ihrer Wirkung auf des Pflanzenleben, 1683[7]; Kalkfrage, Bodenreaktion und Pflanzenwachstum, 1884[1]; Boden und Bodenbildung in kolloidchemischer Betrachtung, 2042[9]; Chem. Decompn. in the Egyptian Deserts, 2223[9]; Scheikunde voor land- en tuinbouwwintercursussen, 2385[9].
buffer property of, 3203[9].
calcium and Mg outgo in, effect of CaO and MgO fertilizers on, 3325[4].
calcium of, as indicator of their response to liming, 641[3].
capillary forces in ideal, 3526[9].
carbonates in Minnesota, 3327[7].
carbon dioxide in air of, effects on absorption of inorg. elements by plants, 641[8].
carbon dioxide in sub-, of the Ardenne, 354[3].
carbon dioxide production in, 3767[6].
carbon-N ratio in, 2553[6].
carrying away by rivers, 1485[9].
cation concn. in, relation of biol. processes to, 1294[7].
cation replacement and absorption in, 3528[6].
cellulose decompn. in, microorganisms of, 3056[6].
cellulose fermentation in, effect of available N on, 1482[7].
cellulose in, disintegration of combined, 1881[4].
cellulose in, effect of N compds. on decompn. of, 257[7].
of Chatsworth area in N. J, 2039[3].
chemistry of, review on, 960[6].
chernozem, effect of forest plantation on chem.-morphol structure of, 3528[2]
chernozem, phosphate fertilizers for, 961[6].
classification of, 1877[8], 2382[1].
clay suspensions of, electrolyte effect on, 2713[9].
cohesion in colloidal, 468[9].
cohesion in, from capillary forces, 469[2].
colloidal, 1294[3].
colloidal behavior of, effect on fertility, 2039[5].
colloidal solns. of, effect of hydration on stability of, 1293[9].
colloid chemistry of, 3766[5]
colloids of, 85[6], 3766[5].
  base exchange capacity of, electrokinetic behavior and, 3203[4].
  base exchange in, 2553[2].
  clay as, 639[1].
  electrodialysis of, exchangeable bases and, 3766[2].
  fertility and, 639[7].
  heat of wetting of, 639[2].
  properties of, 3528[3]
  relation of the action of SiO_2 gel on the efficiency of phosphates to, 792[6].
  relation to sol. Fe, 1293[8].
  sepn. by centrifugation, 3055[4].
  structure of, 3327[2].
conditions of, effect of fertilizing methods on, 1298[9].
conservation of, 3766[1].
decantation with water, 3528[8].
decompn. of org. matter in, effect of lime on, 1296[7].
denitrification in—see *Denitrification*.
denitrifying bacteria in, effect of liming on, 1483[8].
depletion in Cu, Mn and Zn, 248[1].
disinfectant for, sulgin as, 1299[4].
disinfection of, for potato wart, 2385[4].
of Dolgoprudnoe, 1295[6].
effect of limestones, marls and certain Ca and Mg compds. on, 1127[1].
effect of mulching paper on, 3328[1].
effect of "Promoloid Asahi" on, 1882[9].
effect of straw on, 1881[6].
effect on ash content of plants, 1488[5].
  on barley, 1126[9].
  on carbon monoxide, 2715[2].
  on infestation of *Vicia faba* with *Aphis rumicis*, 2543[1].

on nodule formation of *Crotalaria juncea*, 3767[5].
on pecan tree rosettes, 1489[9].
on phosphate soly., 961[8].
on plants, 3328[2].
Egyptian, 3057[2].
elec. cond. of, 469[3].
exchangeable bases in Scottish, 468[6].
"exchange" acidity of, effect of plants on, 3768[2].
exts., phosphate absorption by Pasteur-Chamberlain filters used in prepg., 641[5].
fertility of, effect of oat straw on, 3326[4].
fertility of, isoelec. theory and, 1681[4]
fertilizer requirements of, detn of, 1680[6,8], 1681[3], 3205[4], 3529[6].
fertilizing with N-fixing and cellulose decomposing organisms, 2220[4].
flocculating agents, neutral or acid salts *vs.* alk. salts as, 2218[5].
flocculation (anomalous) in colloidal, 1127[2].
flocculation by gypsum, 2041[7].
forest, humification of, 1680[8]
forest, of South Saghalien, 3411[6]
fumigant for, K xanthate as, 793[6].
fumigation by HCN, 3769[3].
gas permeability of, effect on CO_2 production, 3328[4].
of Georgia (Rabun Co), 791[4].
for grapes, analysis as basis for fertilizing, 3530[9].
for grass, 1682[1].
of Groningen, 1296[3]
gypsum effect on, of Iowa, 642[3].
"hager," 640[6].
hardpan formation in acid clay, H-ion concn. for, 1294[5].
heat of wetting and absorption of water by, 639[4].
heat of wetting of, effect of replaceable base on, 1294[1].
humid, N loss in, 1879[1].
humid-tropical and humid-temperate American, 3326[9].
humification of org. matter in, detn. of degree of, 470[2].
humus formation from cellulose in, 3203[1].
humus in, analyses of, 85[3].
formation and decompn. of, 1482[6].
H-ion concn. and, 3056[1].
lime effect on, 3204[8].
titration curves of, 2037[7].
humus removal from, effect on productiveness, 1878[3].
hydrogen-ion concn. of, 1168[8], 1648[1], 2913[5].
effect of H_2CO_3 and soil-water ratio on, 1294[9].
effect of ion exchange on, 2382[2].
effect of salt treatments on, 1297[2].
effect on development of plant communities, 2037[5].
effect on plant growth, 1680[9].
hygroscopic coeff. of, 1877[9].
of Illinois (Johnson Co.), 791[3].
of Illinois (Mercer Co.), 791[8].
infertility in, bacterial action and, 2553[9].
inoculation with *Azotobacter*, 641[7].
inorg. constituents of, 85[8].
insecticides, arsenates as, 2891[7].
investigations of, bearing on field exptl. work, 2381[9].
iodine content of, from goiterous region of Bavaria, 3743[5].
iron effect on, 2715[1].
irrigation effect on, 791[5].
of Java, fertilizer expts. with, 960[9].
laterite, isoelec. pt. of Al_2O_3 of, 1681[6].
leaching of fertilizers from, 1486[1].
lime absorption by, 3204[6].
lime and phosphate effect on, 1297[1].
lime content of, effect of manner of formation on, 2382[1].
lime effect on, 1296[8], 1485[2].
lime effect on clay, 1295[9].
lime effect on "roodoorn," 1296[4].
lime effect on, treated with barnyard manure, 1298[4].
lime fertilizers for, synthetic Ca silicates as, 3325[7].
lime in, 470[5].
effect on crops, 1485[1,2].
importance of, 2033[1].
injurious action of high applications of, 3205[1].
lime requirement of, 640[9], 1484[9].
lime requirement of, detn. of. 1484[5,7].
lime status of, effect of basic slag on, 2220[6]
limestone and dolomite disintegration in, 1296[9].
liming, 2218[4,7].
liming and P applications of, 1484[4].
loess of China, 1482[6].
lysimeter for, 1293[2].
of Madras field No. 53, 1880[7].
manure decompn. in, 3206[8].
of Mediterranean region, H-ion concn. and Ca content of, 2219[4].
microbiol. research on, 1483[9].
microflora of, effect of S on, 2383[5]
microörganisms in Louisiana, 3529[6].
mineral, failure of concrete drain tile in, 3223[8].
mineral removal from, by peach trees, 2039[9].
muck, effects of lime and potash fertilizers on, 1682[3].
muck, of Michigan, 2039[4].
nitrate accumulation in mulched, 1294[8].
nitrate content of, in relation to *Anemone nemorosa*, 3205[2].
nitrate depression in, effects of timothy and clover on, 1680[6].
nitrate formation in, effect of S on, 1880[5].
nitrate loss from cropped, 3056[3].
nitrate N content of, effect on wheat growth, 2040[2].
nitrates and marl in, effect on orchards, 88[5].
nitrates, effect of liming on, 1296[7].
effect of straw on, 642[4].
effect of sweet clover on, 3326[2].
nitrogen changes in, effect of pressure on, 85[9].
nitrogen compds. in, transformation and relation to nitrification, 2382[8].
nitrification in—see *Nitrification*.
nitrogen fixation in—see *Nitrogen fixation*.
nitrogen-fixing bacteria in Vesuvian, 2220[2].
nitrogen-fixing power of, 2382[6].
nitrogen-fixing power of, detn. of, 2889[8].
nitrogen-fixing power of, in the Punjab, 86[1].
nitrogen loss from Kansas, 1878[9].
nitrogen mineralization in, effect of $MnSO_4$ on, 2383[2].
nitrogen of, effect of bacteria on, 3327[3].
nitrogen of, effect of ridging on, 3530[7].
nitrogen recuperation in, of Bombay Deccan, 1482[9].
nutrient conditions of, effect on colloidal properties of vegetables, 2040[4].
as nutrient medium for agr. plants, 3530[4].

nutrients of, in relation to vegetation and reproduction, 470^4.
of Nyasaland, 1295^6.
org. matter in, decompn. of, 3056^5.
org. matter in, effect of S fertilizers on, 1881^2.
org. matter relationships of, N in, 3529^1.
oxalic acid in testing, 2223^2.
of Palestine (southern), 2303^1.
particles in, detn. of size distribution of, 469^7.
peat, fertilizers for, 1878^6.
peat, K_2O deficiency of Wisconsin, 2218^4.
percolation in colloidal, in relation to swelling and cohesiveness, 469^2.
phenols in, disappearance of, 470^1.
phosphate effect on, 1682^9.
for phosphate fertilization, 961^4.
phosphates (available) in, 468^6.
phosphatic fertilizers for acid and non-acid, 1882^1.
phosphoric acid absorption by, 1484^8.
phosphoric acid in, effect of lime on, 1484^8.
phosphoric acid podsol, effect of nitrification on soly. of, 3327^3.
phosphorus in, 2222^8.
better use of, 1682^8.
effect of lime and phosphatic fertilizers on, 3325^3.
phys. structure of, effect of salts on, 1547^7.
physics of, application of research on, 2713^9.
plant nutrition from subsoil, 1127^3.
plasticity of, 3528^6.
podsol, dynamics of biochem. processes in, 3530^3.
podsol, effect of excessive liming on, 1484^9.
podsol profile, distribution of N in, 641^6.
potash of, effect of manure on soly. of, 2218^8.
potash soly. in, 2714^6.
potassium salts in, effect on carbohydrate metabolism of plants, 1297^3.
for potatoes, 2220^1.
productivity of, as function of its phys. structure, 1680^7.
productivity of, microbiol. processes and, 3204^1.
pumice, 3326^5.
punctiform-colony-forming bacteria in, 1870^4.
of Punjab, 1483^6.
Punjab, *Azotobacter* isolation from, 1483^6.
Pusa, continuous growth of Java indigo in, 2220^4.
reaction of, 639^6.
effect of earthworms on, 2038^4.
effect of fertilizer salts on, 1485^7.
effect of plants on, 3768^2.
effect on absorption of P and K in presence of phosphatic fertilizers, 470^5.
effect on germination of meadow grass and clover, 2714^2.
plant diseases and, 1880^2.
relation to denitrification, 1483^2.
of Transvaal, 2218^9.
reactions with dil. acids, 1878^1.
research on, 468^2.
respiration app. for studies of, 640^5.
review of German literature for 1924, 1293^1.
Rhodesian, 3767^4.
for rubber cultivation, analyses of, 3589^6.
salinized, 2889^5.
salt concn. of, physico-chem. properties of leaf tissue fluid of cotton and, 2714^4.
salts in, influence of liming, temp. and compaction of movement of sol., 641^1.
salts in, loss in runoff water, 3327^6.
from sandstone weathering, 1046^9.
Scottish, 3057^1.
Scottish, mineralogical compn. of, 1880^6.
sodium chloride effect on clay, 2634^4.
soln., inorg. nutrition of plants in relation to, 1880^8.
sourness of, 1679^7.
"stanchezza" of, 2038^5.
sterilization with steam, effect on plants, 2219^9.
streptothrices of Vesuvian, 2220^2.
structure of, 469^4, 3527^7.
subgrade, testing, 2057^2.
suction force for water, measurement of, 2219^8.
suction force of, application to soil-plant system, 1295^6.
sugar cane "diseases" and, 1335^1.
sulfate and nitrate outgo in, effect of CaO and MgO fertilizers on, 3325^6.
sulfate production and use in humid and arid, as affected by cropping and S treatments, 2039^8.
sulfur extn. from, 1293^4.
sulfur oxidation in, 1295^8, 1484^2.
sulfur oxidation in, effect of fineness of grinding on rate of, 3327^9.
sulfur oxidation in pond, by bacteria, 1422^9.
sulfur treatment of, for wart disease in potatoes, 88^1.
surface, reciprocal repression by calcic and magnesic additions to, 2714^8.
tar effect on, 3530^8.
for tea growing, acidity requirement of, 1484^6.
temp., effect of roots growing in O-deficient soil atm. on, 2182^1.
of Texas (4 counties), 2039^2.
texture in, 3527^7.
tobacco seedbed, disinfectants for, 1883^2.
Transvaal, compn. of fractions sepd. by mech. analysis from, 1880^2.
treatments, effect on draft of plows, 2384^8.
vesicular coeffs. of, detn. of, 3055^2.
volcanic, of Clermont-Ferrand dist., 3414^7.
of Wales, survey proposals for, 2381^9.
of waste lands of Lleyn, Wales, 468^2.
water absorption from air by, 3766^7.
water equiv. of, 3326^7.
water in, condensation of, 791^5.
effect of fallowing on, 2382^5.
effect on yield and compn. of tobacco, 962^4.
movement of, 469^9.
relation to vapor pressure, 469^8.
water relations of, 639^8.
Soils, analysis, 2219^2.
book: Chem. Bodenanalyse, 2223^9.
detection of acid soils, 3204^4.
detn. of acidity, $85^{6,7}$, 470^7, 1126^6, 2219^4, 2889^7.
of Al, 2218^4.
of availability of calcium, 2553^4.
of available P_2O_5, 468^6.
of colloidal material, 2219^7.
of hydrogen-ion concn., 468^6, 1023^8, 1294^9, 1484^7, 1679^8, 2037^9, 2038^2, 2218^7, 2219^5, 3766^7.
of lime requirement, $1484^{6,7}$.
of moisture equivalent, methods of A. S. T. M. for, 1121^7.
of nitrogen, 470^3.
of phosphoric acid, 470^7, 961^9, 2038^6, 2714^7.

of phosphoric acid and potash sol. to roots, 3205^{6}.
of phosphoric acid requirement, 640^{9}.
of phosphorus, 1681^{2}.
of potassium, 470^{7}.
of replaceable bases, 3055^{7}.
sulfur, 1293^{5}.
of water, 954^{9}.
mech., 960^{6}, 3055^{5}, 3528^{6}.
methods of A. S. T. M. for, 954^{9}.
methods of A.S.T.M. for sub-grade, 1121^{7}.
sampler for, 1293^{3}, 3528^{9}.
Solanaceae, alkaloids in, 1688^{8}.
as intoxicating agents, 2705^{4}.
Solanine, dissocn consts. for, 2108^{5}.
Solanum dulcamara, alkaloid content of, 1688^{8}.
Solargentum, silver content of, 3778^{4}.
Solarization. See "reversal" under *Photography*.
Solar oil. See *Tar oils*.
Soldaine's reagent, oxidation of *d*-glucose with, 368^{4}.
Solder, P 359^{4}.
for aluminum, P 1977^{1}.
for aluminum, etc., P 1215^{4}.
for gold, P 36^{6}.
lead and Sn, tensile properties of, 1212^{3}.
from lead pipe scrap, 3440^{2}.
noble metal, 2656^{1}.
volatilization of Pb from, in flame of blast lamps, 2143^{7}.
Soldering, P 36^{9}.
aluminum, P 36^{3}, P 1384^{5}, P 2145^{7}.
aluminum, alloy for, P 575^{9}.
elec., 1780^{4}.
flux for, P 168^{8}, P 898^{9}, P 1782^{3}, P 2480^{2}.
lead, burner for, 896^{3}.
soft, of copper, 3440^{2}.
soln. for use in, P 576^{2}.
Solids. (See also *Particles; Precipitation; Separation; Separators.*)
brittleness and plasticity of, 3604^{2}.
chemistry of, 319^{6}, 1927^{3}.
comminuting, and forming colloidal solns., P 1678^{2}.
decompn. velocity of, 3623^{1,2}.
deflocculating, P 3201^{9}.
density detn.—see *Density*.
equation of state of—see *Condition equation*.
flow of, 132^{5}.
flow pressure of, 2435^{8}.
liquid treatment of, app. for, P 1341^{2}.
luminescence of, 3391^{7}
mixing liquids and, P 249^{6}.
reaction between—see *Reactions*.
recovery from buttermilk, etc., P 2215^{6}.
retention of characteristic properties in soln., 3116^{9}.
spreading on water surfaces, 1544^{7}.
surface tension of, 2927^{1}.
thermal agitation in, 3254^{4}.
Solid solutions. See *Solutions, solid*.
Solid state. (See also *States of matter*.)
complexity of, 3107^{8}.
constitution of substances at low temps. in, x-ray investigation of, 852^{4}.
elasticity coeffs. and thermodynamic integration factor for, 3373^{9}.
form of, 1342^{9}.
metallurgy and chemistry of, 567^{2}.
Sols. See *Colloids*.
Solubility, of ampholytes, 697^{2}.
in binary liquid mixts., 3617^{2}.
in binary systems, effect of pressure on, 1021^{1}.
of boiler metals, 689^{8}.
chem. constitution and, of aromatic compds., 1601^{4}.
crystal-water binding in relation to, 688^{9}.
curves, tangent ratio law for, 1742^{5}.
detn. of, 2773^{7}, 3257^{8}, 3258^{2}.
of dibasic acids, detn. of 2nd dissocn. consts. from, 3372^{7}.
distribution of a dissolved substance between 2 solvents and the, 1935^{4}.
effect on temp. coeffs., 1161^{2}.
of electrolyte and org. compd. in same solvent, mutual increase of, 3116^{7}.
of electrolytes, adsorption and, 3615^{9}.
equil., effect of traces of water on, 1164^{7}, 1550^{4}.
expression for, 1938^{7}.
of gases and of vapors in liquids, 2065^{6}.
grain size and, 2107^{7}.
influences on, 858^{7}.
ionic strength and, 3117^{7}.
of isomers, 135^{9}, 322^{1}, 859^{1}.
of monoalkyl ethers of ethylene glycol and water, effect of temp. on reciprocal, 1347^{3}.
mutual, of liquids, 2101^{7}.
mutual, of phenol and H_2O and of BuOH and H_2O, 1743^{2}.
of nonelectrolytes in electrolytes, 3372^{3}.
of org. acids, influence of electrolytes on, 689^{2}.
relation to absorption of Ca salts from intestine, 2505^{8}.
of salts, 2271^{3}.
of salts in water and org. solvents, distribution coeffs. and, 3258^{2}.
of salts in water, effect of nonelectrolytes on, 3616^{2}.
ternary diagram, construction and use in analysis, 322^{1}.
theory of Debye, water equil. in relation to, 3626^{4}.
water effect on, in non-aq. solvents, 137^{1}.
Solubility product, of alkaloids, 2108^{4}.
Solutes, adsorption of, 531^{9}, 3367^{9}.
compd. formation with solvents, 3258^{2}.
effect on boiling pts. of solvents, 2777^{3}.
ionized, inter-ionic attraction theory of, 1162^{1}, 2932^{3}.
mol. heat of, viscosity of solns. and, 2609^{7}.
reactions with colloidal particles, 2105^{5}.
retention of properties characteristic of solid state, 3116^{9}.
ultra-violet spectrum of, effect of solvent on, 1178^{1}.
vol. of, relation between viscosity of solns. and, 3616^{4}.
Solution. See *Dissolution; Heat of solution*.
Solutions. (See also *Heat of solution; Hypertonic solutions; Optical rotation; Osmosis; Physiological saline solutions; Standard solutions; Supersaturation.*)
absorption spectra in, variability in relation to charge distribution in mols., 3130^{7}.
adhesive forces in, 531^{3}, 1009^{4}, 3605^{4}, 3615^{9}.
adsorption on large mols. in, 3368^{4}.
anti-freeze—see *Anti-freeze substances*.
Beer's law in dil. electrolytic, 3620^{5}.
chemistry of, electron in, 2451^{8}.
circulating and standardizing app. for, 523^{6}.
colloidal—see *Colloids*.

compressibility of, kinetic theory of, 1013[9].
concd., theory of, 1548[1], 3371[7,9].
concn. by freezing, app. for, P 1340[7].
const. paramagnetism of, 1170[6].
cooling app. for satd., 3363[3].
density of, app. for automatically controlling, P 1340[9].
density of aqueous, in graphic construction, 2931[3].
dielec. consts. of electrolytic, 697[9].
dielec. polarization of aq., 3620[7].
diffusion expts. in, 1013[4].
dilution of concd., 1347[4].
elec. cond. of—see *Conductivity, electric*.
electrochemistry of non-aq., 1022[8].
of electrolytes, hydration and viscosity of aq., 1162[3].
of electrolytes in org. solvents, Debye-Hückel's theory on, 322[7].
of electrolytes in water and gel growth of structures formed by reactions on boundary between, 1010[1].
electrolytic, of low dielec. const., 322[8].
electromotive force (concn.) in acid, 327[9].
equil. of, effect of traces of water on, 1160[8].
evapn. of—see *Evaporation*.
of gases, cryoscopy of, 853[7].
of gases in liquids, cryoscopic measurements of, 2267[1,2].
hydrogen-ion concn. of unbuffered, detn. of, 217[1].
ideal, 2781[2].
ideal, theory of, 135[9].
inner frictions and ds. of mixed aq. salt and acid, 1935[6].
interfacial tensions between org. liquids and aq., 2927[4].
light absorption by, of electrolytes, 548[4].
light scattering in salt, 2113[2].
magnetic susceptibility of binary, 2612[1].
mol. contraction in, at diff. temps., 3118[7].
mol. vols. of, assocn. and, 2773[5].
neutral salt action in concd., law of, 1548[3].
non-aq., Nernst osmotic theory and, 1162[9].
optical research on electrolytic aq., 136[9].
polarized photoluminescence of, 2619[9].
precipitation of metals in non-aq., 3619[5].
reaction of, 1742[7].
reaction of, expression of, 321[7].
salt, acidity produced by *Sphagnum* in, 435[6].
clarification with soaps and pastes, 2564[8].
dielec. polarization in, 3620[6].
effect on growth of wheat roots, 2180[9].
effect on hydration and swelling of plant tissues, 2181[5].
relations between contraction, light refraction and light absorption in aq., 699[4].
structure of films of water on, 1738[9].
salt content of, effect on detns. of H-ion concn., 1743[8].
soap, activity coeff. of, 3617[9].
surface properties of, 1738[8].
viscosity and elasticity of, 2108[1].
Soret effect, 3620[1].
specific heat of, ion hydrates and, 2774[3].
specific heat of, kinetic theory of, 1344[9].
spectra (infra-red) of, 2455[1].
spreading on Hg, 1738[2].
structure of true, 1742[9].
sulfate, cells without liquid junction contg., 1935[7].
superficial, 855[3].
supersatd. gas, initiation of bubbles in, 320[1].
supersatd., nucleus formation in, 1928[3].
supersatd., of MgC_2O_4, 2773[9].
surface, gas laws in, 2266[7], 2770[2].
surface tension between crystal and, relation to e. m. f., 134[9].
surface tension of, change as function of concn., 2607[8].
surface tension of, relation to spreading qualities, 1489[1].
thermochemistry of, 2274[9].
treating with pptg. gas, app. for, P 1541[1].
vapors from, app. for measuring temp. of, 1539[8].
vapors from, temp. of, 695[4], 1928[2], 2610[2], 2774[2], 2931[7], 3118[9].
viscosity of, relation to vol. of solute, 3616[4].
Solutions, solid, in alloys, 2601[1].
anomalous, 2925[7].
of beryllium oxalate with oxalic acid, 3141[3].
book: Die chemischen und galvanischen Eigenschaften von Mischkristallreihen und ihre Atom-Verteilung, 1942[4].
of calcium and Ce molybdates, 1157[6].
compds. in, potentiometric measurements for detg., 1165[9].
between compds. of elements with diff. valences, 1344[1].
distribution of atoms in, 1736[1].
fluorescence intensity in, relation to concn., 2954[2].
formation of, relation to coeff. of expansion, 6[7].
of gold-Cu and Pd-Cu, at. arrangement in, 1154[7].
from intermetallic compds., 1747[4].
metallic, 3627[7].
metallic pairs forming continuous series of, 1926[9].
optically anomalous, 3130[4].
palladium-Ag, contg. H, x-ray examn. of, 683[9].
of perchromates, pertantalates and columbates, 3106[7]
photoluminescence of, 2619[9], 2953[8]
of potassium chloride with KBr, elec. cond. of, 3377[4].
review of, 3107[1].
Röntgen-radiograms of, 1949[1].
Röntgen-ray interference in, 684[1].
of silver halides, x-ray analysis of, 318[7].
stable, P 2566[7].
structure of, 1735[4].
in systems with limited soly. in solid state, 32[9].
systems with, "thaw-m. p. diagram" of, 3120[7].
thermal anomalies of, 3420[2].
thermodynamic treatment of occurrence of miscibility gaps and compds. in, of binary systems, 3633[9].
of tungsten and Mo, resistance limits of, 3108[8]
unmixing of supersatd., 3599[1].
of water and O, 1014[7].
Solvation, 3119[6].
theory of, 3371[7].
Solvatochromism, 3000[6].
Solvent naphtha. See *Benzine*.
Solvents. (See also *Paint removers; Varnish removers*.) 3801[7].
adsorption from mixed, 1009[4].
amphoteric, as catalysts for mutarotation of sugars, 1163[7].

in analysis of metals and alloys, AcOH and H_2O_2 mixt. as, 2799^4.
for arsphenamine, strontiuran as, 261^7, 3189^6.
atmosphere pollution by vapors of, 3522^3.
boiling pts. of, effect of solutes on, 2777^3.
books: Solvents: Cotton Solutions and Plasticizers for Lacquers, 464^9; The Use of, in Synthetic Org. Chemistry, 607^2; Volatile, 832^5.
bulking values of, for paints, varnishes, enamels and lacquers, 1912^3.
carbon tetrachloride as, in pharmacy, 3777^8.
for catalytic reduction of acid chlorides, $1396^{1,3}$.
for celluloid manuf., testing of, 3810^9.
for cellulose acetate, P 3568^2.
for cellulose acetates and rubber, 3089^6.
for cellulose esters and for rubber, 687^9.
for cellulose esters, ether derivs. of alkyl glycols as, 2910^1.
for cellulose ethers, P 3567^4.
for cellulose lacquers, trade names of, 3825^2.
chem. constitution of, effect on swelling of rubber, 2762^7.
chem. constitution of, effect on viscosity of rosin solns., 2081^7.
compd. formation from distribution coeffs., 3258^2.
for cryoscopy, $PhNO_2$ and C_6H_6 as, 690^3.
for cryoscopy of gases, $2267^{1,2}$.
for cryoscopy, trinitrotoluene as, 1925^8.
Debye-Huckel's theory on solns. of electrolytes in org., 322^8.
detn. in paints, varnishes, etc., receiver for, 2754^9.
detn. of volatile, in paints, varnishes, etc., 994^6.
diffusion rate and, 3116^6.
distribution of a mixt. between 2 immiscible, 1745^4.
for dry cleaning, 3233^3.
effect of optical properties of, on fluorescence and colors in soln. of aminoacridones, 1802^1.
effect on absorption spectrum of simple azo dyes, 1178^3.
on hydrogenation of azines, 3282^8.
on optical rotation, 187^5.
on prepn. of BzO_2H, 2322^1.
on reaction velocity, 1348^3.
on stability of CCl_3CO_2H, and on its reaction with 2-methyl-2-butene, $2820^{2,3}$.
on ultra-violet spectrum of solutes, 1178^1.
for electrolytes, molten salts as, 3118^9.
electromotive forces and, 3377^1.
electrostriction of, free energy of hydration of ions and the 3632^4.
explosions by elec. sparks, prevention of, 2751^5.
for fats, 2256^4.
fire hazards of org., 116^9.
for flavoring exts., ethyl lactate as, P 3756^5.
glycol diacetate as, for explosives, 1978^9.
for horn, alkali sulfides as, 3017^9.
"Ketol," 2214^3.
lipoid, effect on spore formation in aerobic bacteria, 1422^4.
methanol as amphoteric, for mutarotation of sugars, 3446^9.
methylene chloride as, for org. substances, P 3757^6.
mixed, Nernst's theory of, 683^3.
mol. wt. detn. in mixts. of, 1734^2.
naphthenic acid soaps as emulsifying agents for org., 2744^2.
for neoarsphenamine, strontiuran as, 261^7.
for nitrocellulose, P 289^9, 1530^2, P 2412^1, P 3077^8.
poisoning by org., 116^9, 2712^5.
recovery of, 81^1, 788^3, P 1876^1, $2035^{3,4}$, $2378^{5,6}$.
app. for, P 316^5.
by Brégeat system, 80^9.
in cellulose manuf., P 3568^1.
in extn. app., 521^3.
from gas mixts., P 2036^2.
in manuf. of photographic films, 555^2.
with solid absorbents, 493^3.
refractive index of, 1912^6.
in rubber industry, handling of, 678^1.
for rubber, resins and cellulose esters, toxicity of, 311^3.
selective action of, 535^4, 3116^7.
for spectrophotometric dye analysis, 1908^4.
of tannins, 3024^2.
theory of systems of, 4^1.
vanadium oxytrichloride as, 689^7.
vapor pressure of, activity coeff. of electrolytes from, 3617^6.
for varnishes, etc., P 118^3.
volatile, in varnish industry, 2418^2.
volatile, review for 1925, 955^4.
water removal from, 265^5.
Solvo acids, 4^2.
Solvo bases, 4^2.
Solvo salts, 4^2.
Somnifen, effect on coronary circulation, 2209^1.
pharmacodynamic and toxicol. study of, 1469^2.
Sonchus arvensis, 3023^2.
Sonnié-Moret, Louis, obituary of, 3776^5.
Soot, in air, app. for measurement of, 3526^3.
Soporifics. (See also *Hypnotics*.)
barbituric acid deriv., P 3333^1.
book: Schlafmittel-Therapie, 459^1.
cibalgin as, 2022^3.
Sorbic acid, ester of 3-(hydroxymethyl)camphor, 1228^1.
reaction with sulfite, 1165^6.
Sorbitol (*sorbite*), alkali action on, 3722^3.
benzoic acetal of, organogels from, 3611^2.
compd. with Bi nitrate, constitution of, 1571^8.
d-, oxidation of, 369^1, 583^5.
Sorbose, *d*-, prepn. from *d*-sorbitol, 583^5.
Soret effect, 3620^1.
Sorghum, hydrocyanic acid content of, 2350^7.
paper pulp from, 285^9.
seed, as food, 1833^8.
in Sudan grass, poisoning from, 2377^2.
Sorghumin, histidine and tyrosine content of, 1092^2.
Sorption. (See also *Absorption; Adsorption*.)
balance, 1151^8.
chem., 2268^7.
diffusion and, 3256^3.
of gases by noble metals, 1169^2.
kinetics of, 2268^9.
phenomena of, 2926^9.
of vapors by Al_2O_3, 1346^7.
of wool in liquids, relation to sp. gr., 1326^5.
Sound, amplifying horns, etc., wood for, P 1307^8.

gas testing by wave effects, app. for, P 848[4].
plaster for absorbing, P 1897[7].
velocity of, in gas mixts., 865[7].
in liquids, heat of vaporization and, 3109[7].
in mixts., 3371[9].
Sound records, P 98[5], P 1696[9], P 2053[1], P 2233[6].
dies for, P 2126[6].
electrodeposition of duplicates of, P 342[3].
from skins of chondropterygians and plagiostomes, P 3240[9].
Sound reproducers, diaphragms for, P 1307[6], P 3338[4].
Sound waves, measurement of abs. temp. in stationary, 1748[1].
Soup, effect on gastric juice secretion, 2190[9].
Soy bean, bacteria of, 929[2].
copper in, 616[2].
development and compn. of, effect of length of day on, 3309[6].
diet, effect on blood compn., 2355[2].
effect of cultivation in solns. lacking essential elements, 773[6].
effect on blood lipase, 3488[7].
energy yield during growth as function of O content of surrounding air, 435[3].
feeding stuff from, P 787[9].
lecithin from, bromination of, 606[9].
milk substitute from, P 79[4].
nitrogen of, grown in association with wheat, 2346[6].
phosphatides from, 2683[5].
protein of, decompn of, 3302[2], 3463[6].
proteins of curd of, maintenance values of, 1436[2].
protein substances from, P 3543[9].
root tips, isoelec. pt for, 2352[2].
therapeutic and industrial products from, 3773[6].
urease from, effect of lime on, 2260[9].
wetting, heat evolved on, 3328[3].
Soy-bean cake, sampling of, 1914[4].
Soy-bean meal, as protein source in milk production, 2373[9]
Soy-bean oil, bleaching, 2256[7], 3827[6].
by-product analysis of, 1723[7].
compn. and I no. of, 3829[2].
compn. of, 2911[7].
consts. of, 2989[4].
fatty acids of, effect of activated earths on, 1724[7].
fuel oil prepn. by distn. of lime soap of, 2759[9].
in leprosy therapy, 1275[2,4].
linseed oil detn. in, 2911[4].
phosphatide removal from, P 3830[6].
polymerization of boiled, 3355[4].
refraction of, 3091[4].
as soap-making material, 1531[3].
as soap-making material, effect of hydrogenation on, 3356[3].
in soap stocks, 119[4].
specifications of A. S. T. M. for, 954[8].
stability of, increasing, P 1531[5].
vitamin A in, 1835[9].
Space, free, expansion coeff. and, 3595[6].
free, internal pressure and, 3595[6].
Space lattice. See *Crystal structure*.
Spalling, mechanism of, 2735[3].
Spark plugs, high-temp. test on, 975[9].
Sparks, produced in crystn. of CS_2, 2276[9].
Sparteine, detn. in lupines, 3774[8].
dissocn. const. for, 2108[5].
effect on heart, 2206[6].
effect on sedimentation velocity of erythrocytes, 1419[8].
indicator for, 1494[1].
pharmacol. action of, 2707[8].
toxicity of, 1865[2].
oxy-*, pharmacol. action of, 2707[8].
Spasmophilia, chloral hydrate action in, 783[4].
Spathulatine, toxicity of, 1865[2].
Spatial relations. See *Stereochemistry*.
Species, blood group of Australian aboriginals, 2001[5].
hybridizing not closely related, by ionolysis, 3482[6].
origin of, 2348[7].
Specifications, purchase of materials on, 1121[3].
Specific gravity. See *Density*.
Specific gravity bottle. See *Pycnometers*.
Specific heat. (See also *Atomic heat*.)

of hydrofluoric acid, 14[6].
of hydrogen, 13[7,8], 15[4,6], 16[5], 143[6], 147[4], 330[7], 333[2], 335[9], 543[7,8], 707[7], 1030[4], 1031[2], 1177[8], 1355[4], 1356[4], 1755[8,9], 1942[5], 1949[8], 2119[1,4], 2120[3], 2282[8], 2285[8], 2452[4], 2617[8], 2790[7], 2948[9], 2949[6,7], 3267[9], 3386[1], 3388[9], 3391[6], 3642[2,4].

crit. potentials and heat of dissocn. as detd. by ultra-violet band, 2115^6.
excitation by electron collision, 1027^6.
in solar chromosphere, 2951^7.
in stars, 3267^3.
in stars and in lab., 2454^5.
of hydrogen sulfide, 14^8.
of hydroxyl group, 2619^8.
hyperfine structure of, regularities in, 16^9.
of ice, 18^9.
of indium, 1356^6, 1560^3, 1951^1.
infra-red absorption in ethers, esters, etc., 3641^6.
infra-red absorption, in liquids, effect of intermol. reactions on, 2950^1.
infra-red, of certain elements, 337^4.
infra-red, of solns., 2455^1.
intensities of, 2120^1.
intensities of, of band, 148^5.
intensities of, summation rules for, 147^3.
intensity calcn., quant. statement of correspondence principle and, 1555^9.
intensity distribution and cascade transitions in Bohr at. model, 2788^6.
intensity of lines, 3633^4.
intensity rule of Burger and Dorgelo, 2284^7.
interpretation of, 18^2, 2949^8.
of iodine, 14^9, 147^6, 2613^1, 2789^9.
of iridium, 2454^9
of iron, 18^4, 330^8, 336^9, 542^9, 1177^8, 1355^2, 1356^9, 2284^6, 2285^2, 2617^9, 2618^7, 3266^8, 3387^2
in iron series, 3636^2.
of iron sulfide-NO compds., 2455^1.
of isotopes, 2791^4
isotopic effect in band, 8^7.
of ketones, 708^3.
of ketones and derivs., 870^5.
of krypton, 2454^8
of lanthanum, 710^4, 3641^9.
laws of optical, 1354^3, 2788^5.
of lead, 18^5, 147^6, 1355^4, 1560^3, 2118^7.
of lead isotopes, 870^7.
of lightning, 2790^8.
lines, bands and continuous, app. for simultaneous observation of, 2121^5.
of lithium, 13^8, 16^1, 870^7, 1560^1, 2285^2, 2791^1, 2949^3, 3385^3.
luminescence, of Geissler tubes, 2620^1.
of magnesium, 16^4, 543^1, 1175^7, 2949^3.
of magnesium hydride, 1561^3, 2454^4.
in magnetic fields, intensity of forbidden lines in, 2951^1
of manganese, 7^4, 18^1, 147^6, 330^8, 336^9, 700^8 2457^1, 2790^3, 3132^1.
mass, of light elements, 13^8.
of mercury, 14^5, $17^{3,5}$, 18^2, 148^6, 333^8, 335^9, 337^4, 1177^7, 1560^3, 1562^2, 1563^6, 1947^8, 1952^5, 2283^1, $2448^{6,7}$, 2457^2, 2458^3, 2619^3, 2789^1, 2948^3, 3267^4.
app. for exciting, 2118^9.
effect of elec. field on, 3267^5.
He effect on, 3385^4.
of mercury fulminate and of azides, 2791^2.
of mercury hydride, 1561^9, 1755^7, 2282^1.
of meriquinones, 2779^6.
of metals under heavy current excitation, 2283^2.
of methane, 14^8, $147^{6,7}$, 1951^3.
of methane halogen derivs., 2119^8.
of methemoglobin, 2000^8.
mol., interpretation of phenomena in, 2283^5.
mol. size detn. from, law of force and, 2783^2.
of molybdenum, 12^5, 709^3, 1560^8, 1948^9, 3265^4.
of morphine, 149^3.
multiple electron transitions and primed spectral terms, 16^3.
multiplet lines in, 710^4.
multiplets, intensity of, 15^2, 16^1.
multiplet structure and Zeeman effect, 1177^3.
multiplet structure of, spinning electrons and, 2945^6.
of myochromogen, 2334^2.
of naphthalene, 190^4.
of naphthalene and its derivs., 1178^8, 2791^7.
of narcotine and of its decompn. products, 1178^2.
of neodymium, 2791^6, 3386^6, 3641^9.
of neon, 13^4, 18^5, 148^1, 1177^8, 1355^5, 1356^3, 1559^9, 1560^6, 1563^4, 2449^5, 2454^5, 2613^2, $2789^{4,5}$, 2949^3, 3386^6.
of neon II, 1950^2.
of nickel, 14^1, 18^4, 330^8, 336^7, 337^1, 1951^4, 2948^7, 3386^6, 3636^2.
of nitrogen, $13^{7,8}$, 148^7, 333^2, $337^{4,6}$, 543^1, 704^1, 707^1, 1355^1, 1951^3, $2285^{2,8}$, 2458^7, 2617^5, 2949^3, 3386^6, 3391^8.
of nitrogen and of solidified mixts. of N with inert gases, 1355^9.
of nitrogen in presence of He group, 1356^8.
of nitrogen oxides, 544^1, 1951^3.
of nitrogen, quantum analysis of, 1030^3.
of nitromethane, 129^8, 544^2.
of org. compds., 14^2, 1949^8, 2943^8.
of osmium, 2454^9.
of oxygen, 13^7, 18^5, 543^1, 704^4, 1351^8, 1560^9, 1951^3, 2121^7, 2285^2, 2457^4, 2458^7, 2790^6, 2949^3, 3266^9, 3386^6.
detection in spectrum of Mars, 1951^9.
in presence of He group, 1356^8.
of palladium, 16^8, 2454^9, 2457^6, 2788^7, 3386^8
phenol identification by, 1225^3.
of phosphorus, 1175^7, 1559^4, 3388^5.
photographic, of triboluminescence, 1562^1.
photographs (colored) of line, 707^4.
photography of, app for, 1025^6.
of platinum, 2454^9, 2457^3, 2948^7
of positive rays, distribution of intensity of lines of, 3265^5.
of potassium, 17^2, 330^8, 1030^6, 1948^9, 2118^6, 2285^4, 2616^2, 2619^1, 3387^5, 3389^8.
of potassium in spontaneous combination with Cl, 148^4.
of potassium iodide, 2789^9.
of potassium nitrate, 3250^1.
of potassium permanganate, 1952^3.
of potassium trihalides, 2454^6.
of praseodymium, 2791^6, 3641^9.
primed terms in, of lighter elements, 708^5.
of 2-pyrrolealdehyde, 597^8.
of pyruvic acid, 900^6.
quantum principles and line, 3635^9.
of quinone, 3389^4.
of rare earth crystals and modification in magnetic field at temp. of liquid He, 707^5.
of rare earths, 3392^2.
ray, emission by radioactive atoms, 701^9.
of reactions: Na + $HgCl_2$, + Cl_2, + Br_2 and + I_2 and of K + $HgCl_2$, 1947^6.
regularities, graphic method for representing and finding, 2788^3.
relation between chem. elements in effect of elec. field on their series lines, 1558^9.
relation to variation with temp. of cond. of solid salts, 13^3.

"relativity" doublets of spinning electrons, 3381^{8}.
relativity fine structure, 144^{8}.
resonance, of helium group, 3131^{8}.
of resorcinolbenzein, 1988^{4}.
of rhodium, 2454^{9}.
Röntgen, of aluminum, 12^{1}, 1354^{1}.
of antimony, 1950^{1}, 2943^{9}, 3640^{2}.
apparent shape of lines and absorption limits, 700^{9}.
of argon, 2788^{1}, 3641^{2}.
of arsenic, 1354^{9}, 3640^{2}.
atomic no. and, 146^{8}.
atomic structure and, 2113^{8}.
of barium, 2943^{9}, 3385^{2}, 3640^{2}.
of beryllium, 12^{1}.
of bismuth, 1354^{8}.
of boron, 3385^{2}.
breadth of lines of, 2617^{2}.
of bromine, 1354^{9}, 2284^{8}, 3640^{2}.
of cadmium, 3640^{2}.
of carbon, 12^{1}, 2285^{3}, 3385^{2}.
of cellulose, 1222^{2}.
of cellulose acetate, 3079^{6}.
of cerium, 2943^{9}.
of cesium, 2943^{9}, 3640^{2}.
chem. compn. and, 3387^{7}.
of chromium, 15^{5}, 1354^{9}, 3266^{1}, 3385^{2}.
of cobalt, 1354^{9}.
of columbium, 3266^{1}, 3640^{2}.
of Compton effect and of Clark-Duane pseudo-lines, 1949^{6}.
continuous, theory of, 542^{8}, 1176^{1}.
of copper, 700^{9}, 1354^{1,9}, 3266^{1}, 3640^{2}.
detn. of alloys by, 2617^{3}.
in differentiation between ionic gratings and at. gratings, 3266^{2}.
of dysprosium, 2943^{9}, 3266^{1}.
of eka-cesium, 2278^{2}.
of elements of lower at. no., 2943^{9}
energy distribution in continuous, 1176^{7}.
of erbium, 2943^{9}, 3266^{1}.
of europium, 2943^{9}.
of fluorine, 15^{4}, 1354^{9}.
following of chem. reactions by, 706^{8}.
of gadolinite, 3385^{5}
of gadolinium, 2943^{9}, 3266^{1}.
of gallium, 3640^{2}.
of gelatin and collagen, 528^{3}.
of gelatin prepns., 3608^{4}.
of germanium, 3640^{2}.
of gold, 1354^{8}.
of hafnium, 2943^{9}.
of holmium, 3266^{1}.
of hydrocellulose, 1222^{2}.
of illinium, 2600^{4,5}, 3384^{8}.
of indium, 3640^{2}.
intensities of, 2617^{4}, 3130^{1,2}.
intensity of, dependence on exciting voltage, 3382^{2}.
of iodine, 2943^{9}, 3640^{2}.
of iridium, 1354^{8}.
of iron, 15^{4}, 1354^{9}, 3385^{2}.
of krypton, 3640^{2}.
of lanthanum, 2943^{9}, 3640^{2}.
of lead, 1354^{8}, 3266^{1}.
of lichenin, 1222^{2}.
of lithium, 12^{1}.
of long-chain org. compds., 15^{8}.
of lutecium, 2943^{9}, 3266^{1}.
of magnesium, 12^{1}.
of manganese, 15^{4}, 1354^{9}, 3266^{1}, 3385^{2}.
of masurium, 129^{4,5}, 3640^{2}.
of molybdenum, 700^{9}, 869^{9}, 3266^{1}, 3640^{2}.
of neodymium, 2943^{9}.
of nickel, 1354^{9}.
of nickel, effect of Co on, 2617^{3}.
of osmium, 1354^{8}.
of oxycellulose, 1222^{2}.
of oxygen, 701^{3}, 3385^{2}.
of palladium, 869^{9}, 3640^{2}.
of phosphorus, 1029^{5}.
photometry of, 2281^{6}.
Planck's radiation law and continuous, 1029^{5}.
of platinum, 1354^{8}, 2280^{2}, 3266^{1}.
of potassium, 1029^{5}.
potentials for production of, 10^{9}.
of praseodymium, 2943^{9}.
of radium B, 1177^{1}.
reflection on crystal lattice in, 3266^{4}.
of rhenium, 129^{4,5}, 2278^{2}.
of rhodium, 3266^{1}, 3640^{2}.
of rubidium, 1354^{9}, 3640^{2}.
of ruthenium, 3266^{1}, 3640^{2}.
of samarium, 2943^{9}, 3266^{1}.
of selenium, 1354^{9}, 3266^{1}, 3640^{2}.
short wave length limit of continuous, 2785^{3}.
of silicon, 1354^{1}, 3387^{7}.
of silver, 1354^{1}, 3640^{2}.
of silver halides, 318^{7}.
of sodium, 12^{1}.
of sodium chloride, 12^{1}.
"spark" lines, internal absorption and, 3635^{6}
of strontium, 3640^{2}.
of sulfur, 12^{1}, 1354^{1}, 3387^{7}.
of tantalum, 1354^{8}, 3266^{1}, 3385^{2}.
of tellurium, 2943^{9}, 3640^{2}.
of terbium, 3266^{1}.
of thallium, 1354^{8}, 3266^{1}.
of thorium, 2943^{9}, 3266^{1}.
of thulium, 2943^{9}.
of tin, 2943^{9}, 3640^{2}.
of tungsten, 12^{1}, 700^{9}, 1354^{8,9}, 2280^{2}, 3266^{1}, 3385^{2}.
of uranium, 3266^{1}.
of xenon, 3640^{2}.
of ytterbium, 2943^{9}, 3266^{1}.
of yttrium, 3266^{1}, 3640^{2}
of zinc, 1354^{9}, 3266^{1}, 3640^{2}.
of zirconium, 3640^{2}.
of rubidium, 18^{1}, 708^{2}, 2454^{8}.
of ruthenium, 335^{8}, 1560^{4}, 2454^{9}, 2616^{7}.
of salicylic acid derivs., 2455^{5}.
of samarium, 2791^{6}, 3641^{8}.
of scandium, 18^{3}, 330^{3}, 1759^{4}, 2949^{3,4}.
series endings and mol. fields, 3640^{6}.
series, magnitude of, 2457^{7}.
of silicon, 17^{4}, 1175^{7}, 1948^{9}, 2789^{2}, 3388^{4}.
of silicon nitride, 8^{7}.
of silver, 336^{7,9}.
of sodium, 543^{1}, 1555^{7}, 1562^{3}, 2118^{6}, 2285^{3}, 2618^{8}, 2949^{8}, 3132^{2}, 3387^{4,5}.
of sodium chloride, 1558^{6}, 1948^{6}.
of sodium in comets, 2284^{9}.
of solutes, effect of solvent on, 1178^{1}.
spark between C rods impregnated with mixt. of oxides of Mo, Ti and V as source of closely spaced line, 1560^{6}.
structure of, 543^{3}.
structure of, spinning electrons and, 2120^{3}, 2279^{8}, 2280^{1}.
of sucrose, 3250^{1}.
of sugar products, effect on decolorizing efficiency of bone char, 3094^{4}.
of sugar products from beet, 305^{7}.

of sulfur, 14[8], 1175[7], 3388[8].

2,2' - Spirobi[1,2 - benzopyran], 3-benzyl-, 3008[4].
——, 3-methyl-, 3008[3].
2,2' - Spirobi[benzosuberan]-1,1'-dione, 911[2].

Spiro[Δ^2 - bicyclopentene - 5,1′ - cyclohexane], 1,3 - dimethoxy-4-nitro-, 3286[8].
Spiro[Δ^2-bicyclopentene-5,1′-cyclohexane]-1,3-diol, 4-nitro-, 3286[7].
——, **4-nitroso-(?),** 3286[6].
5,5′-Spirobi[*m*-dioxane], hydrolysis of, 2108[9].
——, **2,2′-diethyl-,** hydrolysis of, 2109[1].
——, **2,2′-diisopropyl-,** hydrolysis of, 2109[1].
——, **2,2′-dimethyl-,** hydrolysis of, 2109[1].
——, **2,2,2′,2′-tetramethyl-,** hydrolysis of, 2109[2].
5,5′-Spirobi[hydantoin], derivs., 2826[6].
——, **1,1′(or 3,3′)-diacetyl-,** 2826[6]
——, **1,1′ - diacetyl - 3,3′ - dimethyl-,** 2826[7].
1,2′ - Spirobi[indan]-1′,3′-dione, 3-methyl-, 185[8].
2,2′ - Spirobi[indan]-1,1′-dione, bisphenylhydrazone, isomer, 1620[2].
2,2′-Spirobi[indan]-1,3-dione, 185[8].
1,2′-Spirobi[indan]-3,1′,3′-trione, 185[8].
3,3′ - Spirobi[4,3-β-naphthopyran], 2-benzyl-, 3008[5].
——, **2-methyl-,** 3008[4].
——, **2-phenyl-,** 3008[5].
1,1′-Spirobi[piperidine] - 4 - carboxylic acid, *N*-bromo-4′-phenyl-, Et ester, 699[1].
——, ***N*-hydroxy-,** salts, and their Et esters, 385[6].
Spirochaeta, *ictero-hemorragiae*, effect of Ra on, 930[6].
pallida, compn. of, 1422[7].
pallida, dentium and *recurrens*, cultures of, 2688[9].
Spirochetes, arsenic compd. action on, 613[6].
arsphenamine action on, 613[5].
Spirocheticides, P 2228[2].
benzoylaminophenolarsonic acids, P 2563[9].
Spiro compounds, color of, 185[7].
formation and stability of, 3693[3].
prepn. of, 911[2].
thiosalicylic phthalidene ether ester*, 182[7]
Spiro[cyclohexane - 1,4′ - cyclopentene]-3′,5′-dione, 2′-hydroxy-, 3′-oxime and dioxime, 3286[6].
——, **2′-methoxy-,** and 3′-oxime, 3286[7].
1,3′(2′) - Spiro[cyclohexanefuran]-2′,5′(4′)-dione†, 3693[4].
1,4′ - Spiro[Δ^2 - cyclohexenepiperidine], 3′,5′ - dicyano - 2′,6′ - diketo-3-methyl-, and ammonium salt, 2832[5].
Spiro[cyclopentane - 1,2′ - morpholine-6′,1′′ - cyclopentane] - 3′,6′-dione, 4′-phenyl-†, 172[1].
Spiro[cyclopentane - 1,2′ - 1,4 - oxazine-5′(6′),1′′ - cyclopentane], 3′4′,-dihydro - 3′,6′-diketo-4′-*p*-tolyl-, 2831[3].
5,6-Spirodecane-1,3-dione, 3693[5].
Δ^3 - 5,6 - Spirodecen-2-one, 6-bromo-4-hydroxy-, 3693[5].
Δ^7 - 5,6 - Spirodecen-6-one, 8(phenyl-, semicarbazone, 3447[8].
3(2),2′ - Spiro[furan - indan]-2,1′,3′-trione, 4,5 - dihydro - 5 - methyl-, 185[8].
6(4),9′ - Spiro[2,1,3,5 - furotriazolexanthene] - 4 - one, 3′,6′-dihydroxy-2-phenyl-, and tetrabromo deriv., 1410[2,3].
$\Delta^{1,3}$ - *s* - Spirohendecadiene, 2,4-dichloro-, 1061[1].
***s*-Spirohendecane,** 1060[9].
2-*s*-Spirohendecanol, and *p*-nitrobenzoate, 1060[8].
2 - *s* - Spirohendecanone, and derivs., 1060[8].
Δ^3 - *s* - Spirohendecen-2-one, 4-chloro-, and semicarbazone, 1060[8].
——, **4-phenyl-,** and semicarbazone, 3447[6].
Spiro[indan - 2,1′ - cyclopentane-2′,2′′-indan]-1,3,1′′,3′′-tetrone, 185[8].
Spiro[indan - 2,1′ - cyclopropane-2′,2′′-indan]-3,1′′,3′′-tetrone, 185[8].
Spiro[indan - 2,2′(3′) - naphthalene-3′,2′′-indan] - 1,3,1′′,3′′ - tetrone, 1′,4′-dihydro-, 185[8].
1(2),9′ - Spiro[isobenzofuran - xanthene]-2-one. See *Fluoran*.
Spiro[isoindole - 2,1′ - piperazine-4′,2′′-isoindole], *N*, *N*′ - dibromo-1,3,1′′,3′′ tetrahydro-, 2862[8].
Spiro[isoquinoline-2,1′-piperazine - 4′,2′′-isoquinoline], *N*, *N*′ - dibromo-1,2,3,-4,1′′,2′′,3′′,4′′-octahydro-, 2862[9].
Spiro[piperidine - 1,1′ - piperazine-4′,1′′-piperidine], *N*, *N*′-dibromo-, reaction with NH_3, 2862[8].
Spirostoma, sensitivity to cinchona alkaloids, 2207[1].
Spirostonum ambiguum, reaction to stimulation, 1117[3].
Splanchnectomy, blood sugar in, effect of choline, pilocarpine and ergotamine on, 3509[3].
effect in diphtheria, 69[8].
hypothermia after, 231[9].
vomiting from apomorphine after, 2206[1].
Spleen, bile pigment formation in surviving, 1276[2].
bilirubin formation in, 939[6].
cholesterogenic function of, 1410[9].
cystine deposition in, in nephritis, etc., 2014[3].
effect on Fe metabolism, 946[9].
on metabolism, 940[6].
on pancreas secretion and duodenal digestion, 2191[7].
feeding dried, effect on erythrocyte and hemoglobin contents of blood, 2190[7].
insulin in, of normal and pancreatic diabetic dog, 441[6].
iron content of, 3463[9].
iron pigments in, 3036[5].
nucleic P index of, 3304[4].
pigments of toad, 1636[9].
in porphyrinuria, coproporphyrin in, 426[2].
protein in beef, nutritive value of, 2694[8].
relation to thyroid, thymus and bone marrow, 1658[8], 1839[7], 1840[1].
resistance of red cells and, 3495[7].
spermine in, 3172[7].
tissue, autolytic NH_3 formation in, 3726[4].
in vitamin insufficiency, 776[6].
Spleen extract, effect on decompn. of nucleic acid, 51[8].
effect on digestive tract movements, 620[2].
effect on peristalsis, 2008[9].
hemolytic and hemopoietic action of, 2533[6].
Splenectomy, effect on energy metabolism, 1839[4].
effect on excretion of N and creatinine, 940[6].
on Fe metabolism, 3493[2].
on reticulo-endothelial app., 1664[2].
on salt content of blood, 1109[1].
Splenomegalia, blood vol. detn. in, 1447[7].
febrile reaction of vaccines in, 1264[8].
Spodumene, alterations in Etta Mine, S. D., 1776[4].
compressibility of monoclinic, 525[4].

Sponge, regeneration after dissocn. in, 243^{4}.
spicules from, analysis of, 1375^{5}.
Spongin, nitrogen in, 54^{3}.
occurrence and detection of, 1419^{8}.
Spontaneous combustion. See *Ignition*.
Sporobolus pyramidalis, as paper-making material, 3811^{8}.
Spraying apparatus, for fused caustic soda, P 3784^{4}.
oil, for water gas machines, 491^{9}.
for washing and absorption towers, 522^{6}.
Sprays. (See also *Bordeaux mixture; Disinfectants; Fungicides; Insecticides; Lime sulfur.*) 472^{2}, P 643^{8}.
arsenic, for apples, 3531^{9}.
for black scale on citrus, 1490^{5}.
for citrus, colloidal clays as emulsifiers for mineral oils used as, 1489^{8}.
for citrus, effect on compn. and flavor of fruit, 88^{6}.
cupric, compn. and action of, 1299^{6}.
effect on oranges, 775^{2}.
emulsions of mineral oils in cupric, 472^{6}.
for flies on dairy cattle, 2556^{2}.
fly, effect on milk production, 2555^{4}.
fruit contamination from, 472^{8}.
lead arsenate, $Ca(OH)_2$ in, 2384^{9}.
of lime S mixed with Pb arsenate, 1883^{7}.
mechanics of using, 1490^{5}.
oil, 1883^{3}.
oil, effect of Ca caseinate on, 1489^{9}.
for pear midge, 3328^{9}.
petroleum, 2555^{7}.
petroleum detn. in, 2555^{9}.
physics of liquid, 2554^{8}.
"polysulfide" S in, estn. of, 642^{6}.
for screw worm and other flies, 2555^{2}.
soap in, 89^{2}.
in soil, effect on orchards, 88^{6}.
spreaders for, 472^{7}, 1489^{1}.
standard, 2531^{6}.
for weeds, 1490^{2}.
winter, for fruit trees, 88^{7}, 3206^{9}.
Sprew, duodenal contents in, 2364^{5}.
Springs. (See also *Waters, natural.*)
helical, of phosphor-bronze from standpoint of precision instruments, 315^{9}.
quartz spiral, $521^{7,8}$, 1340^{1}.
Sprouts, berberis, compn. of etiolated and green, 2351^{8}.
Spruce. (See also *Wood.*)
cellulose from, wood, 664^{9}.
gum, turpentine of, 3076^{9}.
lignin, constitution of, 3566^{9}.
lignin from, 1516^{8}.
as paper-making material, 1516^{4}.
Spruce oil, compn. of, 3243^{4}.
Sprue. See *Sprew.*
Sputokrimp, bactericidal effect on tuberculous sputum, 3713^{6}.
Sputum, in asthma, spasm-inciting substance in, 232^{4}.
chemistry of, 3700^{5}.
disinfection of, 3773^{3}.
disinfection with $HgCl_2$, 2688^{7}.
homogenization of, 2002^{7}.
protein in, in diagnosis of tuberculosis, 233^{5}.
tuberculous, bactericidal effect of sputokrimp on, 3713^{6}.
tuberculosis diagnosis by presence of albumin and of tyrosine in, 445^{9}.
Squalene, biol. significance of, 2506^{8}.
constitution of, 2845^{2}.
from shark liver oils, 576^{8}.
Squash, root, meristematic growth studies with, 3714^{5}.
seed globulin, histidine and tyrosine content of, 1090^{2}.
storage of Hubbard, 1874^{2}.
Squill, biol. assay of, 1495^{9}.
compn. of, and its action on heart, 3332^{2}.
effect on irritability of frog heart, 452^{7}.
heart-affecting glucoside from, P 1692^{6}.
testing lab. for, 3777^{3}.
"**Stabilit**," stability at high temps., 3051^{4}.
Stability, thermodynamic, factors detg., 1749^{5}.
Stachydrine, from animal organism, 2025^{4}.
l-, configuration of, 2982^{8}.
Stacks. See *Chimneys.*
Stadenic acid, 13-keto-*, and trimethyl ester, 2166^{6}.

treatment of fruits for canning, P 79^{9}.
volcanic, utilization in Larderello, 955^{4}.
water separator for high-pressure, 3363^{4}.
Steaming, in dyeing fabrics or warps, app. for, P 1328^{4}.
of grain, app. for, P 1493^{2}.
Stearanilide, melting p. of, 309^{8}.
Stearates, adsorption isotherm of solns. of, 3^{1}.
Stearic acid, activity coeffs. of Na and K salts of, 3617^{8}.
cellulose ester of, 3806^{6}.
crystal structure of, 1006^{8}.
elec. cond. of, 1752^{1}.
2,3-epoxypropyl ester, 2658^{8}, 2659^{1}.
and esters, phys. consts. of, $2818^{6,7,8,9}$.
ethyl ester, leprosy therapy with, 1275^{4}.
film on water, Young's modulus for, 134^{7}.
magnesium salt, prepn. of, 2930^{9}.
monomol. film on water, 134^{6}.
polarity of surfaces of, measuring, 1346^{1}.
reaction of C_2H_4 and Cl_2 at surface of, 1744^{8}.
sodium salt, emulsification of, 135^{2}.
solns. of, 1550^{8}.
viscosity in water soln., 3616^{7}.
soly. in Et_2O, 1724^{3}.
thallium salt, 2818^{2}.
zinc salt, poisoning by, 2205^{2}.
Stearic acid, λ,μ-dibromo-, and ethyl ester, 1591^{7}.
———, **dibromodiiodo-**, and Ca salt, 1592^{1}.
———, **dihydroxy-**, isomerism of, 3280^{7}.
oxidation of, 41^{3}.
———, **dihydroxydiiodo-**, and Ca salt, 1592^{2}.
———, **ι-hydroxy-**, effect on acidosis, 622^{3}.
———, **ι(and λ)-hydroxy-**, unsatd. acids from, $1591^{2,4}$.
———, **μ-hydroxy-**, glyceride inter-esterification of, 303^{6}.
———, **hydroxyiodo-**, and Ca salt, 1592^{2}.
———, **β-keto-**, Et ester, hydrolysis of, 2660^{7}.
———, **θ-keto-**, and oxime, 3445^{2}.
Stearic anhydride, refractive index of, 2818^{7}.
Stearin, arachobeheno-, from hardened whale oil, 303^{8}.
α,γ-dipalmito-†, 2818^{6}.
effect on double refraction of Al_2O_3 fibers, 1350^{4}.
α-mono-, prepn. of, 2658^{8}, 2659^{1}.
palmitodi-, detection of α- and β- in presence of each other, 2759^{1}.
β-palmitodi-, 2818^{6}.
Stearolactone*, prepn. of, 1785^{3}.
Stearolic acid, crystn. in, 2601^{5}.
crystal structure of, 1006^{9}.

hydration of, 3445^{2}.
hydrogenation of, 2310^{7}.
Steel. (See also *Armor plate; Castings; Converters; Enamels; Forgings; Iron, analysis; Iron, metallurgy of; Iron alloys; Martensite; Pipes; Projectiles; Troostite; Welds.*)
adhesion of plates of, preventing, P 1383^{3}.
adhesion to molds during casting, prevention of, P 897^{8}.
for aircraft, 732^{1}.
for airplane motor valves, selection of, 1205^{7}.
alloy, P 35^{1}, P 168^{3}, P 341^{9}, P 898^{1,2}, P 1214^{5}, P 2307^{2}, P 3153^{8,9}, P 3442^{9}.
with aluminum, P 35^{4}.
for hard bearings, etc., P 736^{3}.
for making rolls for steel mills, P 3683^{1}.
resistant to SO_2, P 2479^{8}.
review, 893^{6}.
stress-strain-cycle relationship and corrosion fatigue of, 3680^{8}.
alloys hardened by nitrogenization, P 3683^{1}.
ammunition for small arms, season cracking in, 1206^{9}.
annealing sheet, P 575^{9}, P 735^{9}.
annealing sheet, furnace for, P 735^{9}.
"Antinit," calorimeter bombs of, 521^{7}
arsenic effect on, 2644^{4}.
austenite in, direct change to troostite, 3432^{9}.
austenite in, equil. with C oxides, 2810^{2}
austenitic, 1379^{9}.
automobile axles, inspecting and testing, 1379^{9}.
automotive, 892^{7}.
balanced reactions in manuf. of, 1972^{5}.
ball-bearing, manuf. of, 3277^{3}.
banded structure of rolled and forged mild, ghost lines and, 2646^{2}.
bits, temp. control system for dressing and tempering fishtail, 166^{4}.
in boiler construction, 893^{7}.
boiler plate, embrittlement of, 2814^{3}.
bond between concrete and, 1135^{4}.
books: 1049^{2}, Cold Working of, 355^{5}, The Making, Shaping and Treating of, 355^{8}, Bau und Betrieb moderner Konverterstahlwerke und Kleinbessemereien, 355^{9}, Der Weg des Eisens vom Erz zum Stahl, 1213^{3}, Métallurgie de la fonte, du fer et de l'acier, 1213^{4}; Mo, Ce and Related Alloy, 1586^{3}; The Story of, 1975^{3}; Die Qual und wirtschaftliche Bedeutung des sauren Elektrostahles, 2280^{9}; Stahl- und Temperguss, 2306^{7}, Principles of Metallurgy of Ferrous Metals, A Manual for Mech. Engineers, 2973^{7}; Stainless, 2973^{7}; The Metallography and Heat Treatment of, 2973^{8}; The Metallography of, 2973^{8}; Mo, Ce and Related Alloy, 3278^{5}; "Staybrite," 3440^{7}.
bright drawn, 892^{6}.
briquets of cast Fe and rusted and unrusted, cupola burdens with, 1971^{7}.
carbides from Cr, Cr-Fe equil. in, 571^{4}.
carbides in, spheroidization of, 731^{1}.
carbon, changes of length of, 1207^{7}.
carbon in chrome and W, identification of soly. lines of, 2477^{4}.
carbon elimination in open hearth, 3147^{6}.
carbonizing, electrically, 2287^{6}.
carbon migration in, effect of other elements on, 571^{6}.
carbon-scrap process for manuf. of, 1201^{3}.
carburizing compn. for, P 36^{8}.
carburizing, Cu "migration" in, 2130^{2}.
in rotary elec. furnace, 2642^{6}.
by solid cements, 2139^{2}.
case-hardening, P 359^{2,3}, P 898^{5}, P 3082^{3}.
compds. for, 3428^{2}.
Krupp N process for, 1379^{8}.
case-hardening app. for small articles of, P 1384^{4}.
case-hardening (selective) of, P 575^{8}.
casting—see *Casting process*.
cast-in parts of, heat-resisting alloy for fusing with, P 2480^{1}.
for catalyst bombs, 3334^{2}.
cathodes for electrolytic depositions, 2963^{8}.
cementation with Al, 2654^{9}.
with B, 3429^{2}.
with Cr, 567^{7}.
with Si, 3150^{4}.
with W, 3426^{5}.
with W, Mo and Ta, 3680^{1}.
cementite from α- and β-martensites, heat of pptn. of, 1204^{9}.
cementite in, spheroidization of, 2810^{6}.
chain, impact resistance at low temps., effect of treatment on, 3437^{6}.
chemically resistant, 3277^{1}.
chrome, P 3278^{9}, P 3681^{7}.
manuf. of, 3149^{6}.
for permanent magnets, 1208^{5}.
uses of, 1581^{7}.
chrome Ni, elec. furnace ingots of, 1561^{1}
impact tests of, 2645^{9}.
properties of heat-treated, 1583^{8}
resistance to chem. action, 1521^{4}
cleaning of, electrolytically, P 3398^{2}.
cleaning sheet, P 897^{6}.
coating—see *Coating(s)*
cold-rolled, fragility of, 1205^{5}.
cold rolling of strip, 2139^{5}.
cold working, effect on strength of hollow cylinders, 2139^{6}
compacting, app for, P 898^{1}.
converter action in Thomas and Bessemer processes, 3148^{2}
corrosion of—see *Corrosion*
corrosion prevention in, P 358^{4}, 895^{9}, P 1214^{3}, P 1587^{6}, P 1781^{6}, P 3442^{6}.
corrosion preventives for, 3439^{2}
corrosion resistant, 731^{6}, 893^{6}.
corrosion-resistant, in app. construction, 895^{8}.
electrochem. behavior of, 3438^{3}.
in hydraulic installations, 2647^{8}.
crystal structure of, effect on properties, 2306^{1}
cutting tests with high-speed, 1585^{7}.
cutting, with oxy-C_2H_2, 1212^{5}.
defects in, 355^{6}.
definition of, 165^{7}.
detempering, P 3682^{1}.
for dies and cutting tools, P 3442^{4}.
drill, 166^{2}.
economic phases of, 2059^{7}.
effect of phosphorus, S and Mn on, 2807^{2}.
elastic properties of, variation with compn., 733^{4}.
elec.-furnace, 2287^{4}.
elec.-furnace, analyses of basic, 712^{5}.
elec.-furnace manuf. of, 19^{6}, 1779^{6}.
in France during past 25 yrs., 1954^{9}.
in Italy, 19^{4}.
reactions of, 3134^{2}.
elec. furnaces for making—see *Furnace, electric*.
electricity in industry, 338^{7}.

electrochem. potentials of C and Cr in, 3437^{9}.
electroplating app. of, 3395^{8}.
electroplating with Ni, 150^{8}.
enameled—see *Enameled Ware*.
endurance limit of low-C, P effect on, 3150^{1}.
in engineering industry, 2135^{7}.
etching of, 1208^{1}.
etching reagents for alloy, 2651^{5}.
fatigue failures in, 1203^{8}, 1380^{8}.
fatigue tests at high temp., 1203^{5}.
ferrite crystals in, behavior under stress, 1205^{9}, 2137^{4}.
ferrite crystals in, deformation lines in large and small, 2638^{2}.
ferrite formation in, 32^{5}.
flow in, at various temps., methods of test in relation to, 2643^{2}.
flow in low-C, 32^{2}.
fluidity of, increasing, P 3279^{5}.
forgeability of, detn. by Brinell machine, 2643^{1}.
forging, gas for, 814^{2}.
forging, manuf. by basic open-hearth process, 3675^{6}.
furnace for manuf. of, 2138^{5}.
furnaces, coal-dust and air supply for, P 897^{3}.
galvanization of—see *Galvanization*.
grain growth in critically strained, restraint of, 3417^{6}.
graphitization at const. temp., 2650^{6}.
hardened, tests of, 3434^{4}.
hardening of, 3150^{7}.
hardening of, theories of, 2646^{7}.
hardening properties of, effect of form of cementite on, 3150^{5}.
hardness of, 732^{4}, 2642^{3}.
effect of quenching liquids on, 1207^{6}.
effect of strain and of heat on, 572^{5}.
penetrator for testing, P 897^{9}.
theories of, 888^{6}.
hardness of C, at high temps., 2643^{9}.
hardness testing machines, ring for verification of Brinell, 2134^{8}.
hardness testing of hardened, 2134^{6}.
heat conduction in spherical, anomalies in, 3436^{2}.
heating furnace for, P 168^{2}.
heat-resistant, P 35^{3}, 273^{2}, P 357^{3}, 2140^{4}, 2651^{4}.
heat-treated, proportion to total production, 2139^{1}.
heat-treated spring, mech. properties of, 3434^{6}.
heat-treating drill, P 897^{6}.
heat-treating drill, app. for, P 3154^{8}.
heat treatment of, P 575^{4}, 893^{6}, 2138^{6}, 2287^{9}, P 2479^{4}, 2646^{3}, 3431^{7}, 3434^{8}.
detg. transformation points in, P 357^{5}.
dilatometric method of, 2138^{6}.
elec. furnace in, 1180^{5}.
practice of A. S. T. M. for, 955^{2}.
salt mixts. for, P 1384^{2}.
heat treatment of carburized, practice of A. S. T. M. for, 955^{1}.
heat-treatment of case-hardened, practice of A. S. T. M. for, 1122^{3}.
heat treatment of dies, 572^{2}.
heat treatment of high-speed, P 3681^{8}.
heat treatment of high-speed tool, crucible for, P 1383^{4}.
heat treatment of Ni, effect of mass in, 2647^{1}.
heat-treatment of Zr, P 35^{1}.
high-speed, 1208^{3}, 3435^{2}.
hardening and tempering of, 2646^{4}.
Ni, Ta, Co and Mo in, 2139^{9}.
hollow drill, etc., P 357^{4}.
inclusions in, detection by means of x-rays, 3660^{1}.
industry, effect of World War on, 2140^{2}.
elec. application in, 872^{5}.
in 1925, 3674^{1}.
of Pittsburgh, power and fuel consumption in, 354^{9}.
refractory materials for, 2735^{7}.
ingots, P 2974^{5}.
finishing melting temps. of, 1380^{1}.
heterogeneity of, 2136^{1}.
pouring, 890^{2}.
silicate distribution in, 2643^{8}.
time of pouring large, 567^{1}
ladles, elec. heater for, P 1781^{9}.
low-C, P 976^{5}, P 3153^{6}.
low-C, resistance to repeated alternating stresses, effect of P on, 3433^{5}.
low-C semi-, manuf. of, 3433^{3}.
magnet, P 898^{7}, 2136^{8}.
magnet, P 2307^{1}, 3149^{4}
magnetic changes below 400°, 2644^{2}.
magnetic, heat treatment of, P 3154^{2}.
magnetic induction and hysteresis data for quenched C, 896^{5}.
magnetic properties of, effect of heat treatment on, 1208^{9}.
magnetic transformations of, 3426^{8}.
magnetization (self) under torsion, 3427^{1}.
malleability limit in hot state, 1205^{4}.
manganese, bibliography of, 3277^{1}.
heat treatment of castings of, P 3651^{8}.
phosphide in, 1584^{3}.
rails, repairing by welding, 2143^{9}.
treating, 3435^{7}.
manuf. and working of, 2140^{3}.
manuf. of, P 897^{4}, P 1214^{2}, 2636^{8}, 2808^{4}.
in Bosshardt furnace, 3675^{4}.
direct process for, 354^{9}, 2475^{9}.
future trends in, 3675^{6}.
in 1925, 888^{7}.
scientific principles in, 3148^{4}.
scrap C process of, 1779^{9}.
slag reactions in, 164^{9}.
in Sweden, 1580^{2}, 2642^{9}.
in Thomas converter, 1972^{9}.
by Thomas process, blast enriched in O in, 1973^{3}
martensite formation in, 571^{7}, 2136^{9}.
mech. properties of, 730^{5}.
melting units, 731^{8}.
melting with elec. heat, 3392^{7}.
molds for—see *Molds (I)*.
molybdenum in manuf. of, 2970^{5}.
molybdenum, tests with balls of, 1005^{8}.
Neumann bands, effect of air gap in explosion system on production of, 2134^{4}.
nickel, effect of Mn on strength of, 571^{1}.
nickel, magnetic properties of, 1208^{7}.
nitrogen effect on, 2138^{5}.
nitrogenization of plain and alloy, 2138^{4}.
non-magnetic, P 1383^{4}.
in notched-bar impact test, effect of temp. on behavior of, 1206^{3}.
notched-bar impact-testing of, 2651^{1}.
open-hearth, P 1214^{3}.
open-hearth boils, 566^{6,7,8}.
open-hearth furnace, 892^{1}.
application of blast-furnace gas to, 1972^{2}.
dimensions and output of German, 31^{4}.
operation of, 3147^{8}.

temp. in, optical measurements of, 3147^9.
open-hearth plant, 890^4.
open-hearth process, acid, 2133^8.
basic, 2133^9, 2305^7.
calcn. of charges of ore scrap-iron in, 1379^4.
equil. of Mn, C and P in, 1972^7.
metalloid elimination in basic, 1379^6.
reactions of, 3276^9.
oxide removal from, P 1215^3.
oxygen and gas removal from, P 735^8.
oxygen effect on, 3427^6.
oxygen-enriched air in manuf. of, 890^{6,7}.
oxygen removal from, in gutter of open-hearth furnace, 2637^1.
pearlite formation in, linear velocity of, 3432^4.
pearlite interval, effect of Mn, Si and P on, 2137^2.
pearlite point, displacement by Ni and by Cr, 1973^9.
pearlitic, tensile properties of, effect of heat treatment on, 3432^6.
phosphorus removal from, P 575^2.
physical properties in cold and in heat, 2642^7.
phys. properties of, and their detn., 2644^9.
phys. properties of C, effect of temp., time and rate of cooling on, 2645^6.
pickling, P 341^8, P 1215^4, P 1384^3, 1894^6.
pickling effect on elastic washers of pressed, 166^1.
plant of Inland Steel Co., 3148^4.

Stilbene dibromide, 3,4′-dinitro-*, 2850^{8}.
Stilbene dichloride, 3,4′-dinitro-*, α-, and β-, 1801^{5}.
Stilbite, analysis of, 3409^{4}.
pseudomorph after apophyllite, 884^{5}.
Still. See *Distillation apparatus.*
Stimulation, effect on *Spirostonum ambiguum*, 1117^{8}.
intracutaneous, 453^{8}.
ionic theory of, 3497^{4}.

stomach-vagus, humoral transmission of, 443³.
of tissues, kinetics of colloidal processes in, 1814⁸.

Stirring, effect on reaction velocity, 1937¹.

Stirring apparatus, 1⁷.
in chemical industry, 2263².
construction of, 847⁷.
lab., 2599⁴.
preventing bumping with, 2098¹

Stizolobium. See "velvet" under *Beans*.

Stoichiometry, book: Industrial, 2378⁰

Stokers. See *Firing*.

Stokes' law. See *Laws*.

Stomach. (See also *Absorption, Digestion, Digestive glands; Digestive tract, Gastric juice*)
acidity of, effect of stomach operations on, 1439¹.
anacidity of, 3723².
atropine effect on, 3509⁶.
cancer of, albumin in gastric juice in, 3734⁰
cancer of, gastric enzymes in, 1661⁷
chemistry, kinetic method of studying, 3176⁷.
decomposing dog, Vitali test on, 607⁹.
detg. secretory vol, acidity and motility simultaneously, 3492⁸.
diseases of, dietetics for, 1096⁹.
drug effect on muscles of, 2702⁹
enzymes of infants, 926⁵.
functional diagnosis of, 927³
gas, sampling and analysis of, 1823⁶
hydrochloric acid formation in, from chlorides of blood, 3193².
hydrochloric acid formation in, relation of NaCl of blood to, 441³
hydrogen-ion concn. of, relation to plasmal formation from plasmalogens, 229¹
lumen of, gaseous exchange between blood and, 2509²
motility of, effect of ethylene anesthesia on, 3510⁵.
motility of, vitamin B and, 3488⁵
movements of, effect of NH_4OH and NH_4Cl on, 1266⁸.
mucosa musculature of, 2370⁶.
mucosa of, HCl formation by, 2531²
mucus of, 440⁹.
muscles of, tetanic contraction by alterations in concn. of ions, 3492³.
muscular activity of, effect of carminative volatile oils on, 1871¹.
neutral red excretion into, 68⁴.
papaverine action on, 1855³.
parenteral excitation of activity of, effect on blood, 439⁶.
pepsin of, effect of quinine salts on, 1819¹
physiology of, 1261⁷.
pituitary ext. effect on, 1099¹.
poison adsorption from, by charcoal, 3509⁸.
poisoning by acids, 1666⁶.
salivary digestion in, 1439¹
secretions of, physiology and pathology of, 1666¹.
secretory disturbances of, chlorine metabolism in, 3034⁷.
smooth muscles of frog, effect of inorg. ions on contractility of, 624²
stimulant for, caffeine as, 1091⁹.
tumor of, lactic acid in diagnosis of, 3732⁹.
ulcers of, from anaphylaxis, 3504¹.
Cl and H_2O metabolism in, 946⁷.
treatment with "Paraglandol," 2702³.
treatment with NaOH, 1272⁷.
-vagus stimulation in rabbits, humoral transmission of, 443³.
of whales, physiol. importance of divisions of, 1671⁴.
whey retention in, 619⁹.

Stomach contents, acidity of, effect of belladonna and fats on, 2880⁶.
acidity of, relation to H-ion concn. of urine, 1105¹.
bases in, detn. of, 217³.
hydrochloric acid detn. in, 1823⁹.
hydrochloric acid effect on (normal and in achlorhydria), 3508⁴.
hydrocyanic acid and cyanide in, detection of, 3477⁵
hydrogen-ion concn. of, detn. of, 2865³.
pepsin detn. in, 1641³.
surface tension of, relation to true acidity, 781⁴.
wine detection in, 1254⁸.

Stomata. See *Plants*.

Stone. (See also *Rocks*.)
bituminous material for treating, P 2067⁸
book: Precious and Colored, of Russia, 3673⁴.
building, of Gallup-zuni basin, N. M., 1196⁶.
cleaning compns for, P 1500⁵, P 2053².
coating for, bituminous emulsions for, P 1321⁴
dust, in prevention of coal-dust explosions, 989⁴, 2413⁹.
for highway construction, specifications of A. S. T. M. for, 954⁶.
ornamenting, in imitation of natural wood grain or other designs, photographic transfer processes for, P 1184².
permeability of, 2903⁸.
preservation of, P 272⁴, P 2238⁷.
waterproofing, bituminous emulsion for, P 811¹.

Stone, artificial. (See also *Bricks; Concrete.*) (*Patents.*) 272³, 652⁴, 810⁶, 1507⁶, 1703⁵, 2238⁶,⁷, 2570⁸, 3070⁶, 3552⁴,⁵.
book: Cours de connaissance des matériaux. Les matériaux pierreux, 464⁹.
from coal clinker or slag, P 1897⁸.
coatings for, 977⁹.
inscriptions on, P 2738³, P 2570⁹.
from magnesia (calcined), P 1307⁴
marble, P 3340⁸.
ornamenting, P 1703⁸.
pitch filler, specifications of A. S. T. M. for, 954⁶.

Stoneware. (See also *Ceramic ware.*) P 1897⁸.
chem. industry and, 1699⁴.
coloring of, 3219⁸.
defects in, calcn. for detn. of, 1892⁵.
durability of, 1892⁸.
glazes, defects in, 2902⁴.
phys. properties of, 1699³.

Stoppers, for Kjeldahl flask, 1152³.
loosening glass, 2433⁵.
rubber, specifications of U. S. Govt for, 2094².

Storage battery. See *Accumulators*.

Storage-battery plates. See *Accumulators*.

Storax, Oriental, 3773¹.

Stovaine, effect on cornea, 2018⁹.
hydrogen-ion concn. of, effect of sterilization on, 1131³.

Stovarsol, 2726⁸.
amebic dysentery treatment with, 1275⁸.
effect of *Entamoeba dysenteriae*, 2541⁹.
effect on *Entamoeba gingivalis*, 3748⁴.

therapeutic properties of, 1279^{8}.
Stovarsolate, malaria treatment with, 3316^{1}.
Stove polish, P 513^{5}.
Stoves, blast-furnace, 1581^{5}.
flue gas of Cowper, recording compn. of, 3102^{2}.
temp. distribution in shaft, 3796^{6}.
Strain theory, color and, 2836^{4}.
and formation and stability of cyclic compds., 3284^{2}.
Stramonium. See *Datura*.

bleaching braid of, P 670^{8}.
book: Über die Natur der Cellulose aus Getreidestroh, 988^{6}.
disintegration in soils, 1881^{4}.
effect of oat, on soil fertility, 3326^{4}.
effect on nitrate accumulation and crop growth, 642^{4}.
effect on plant growth, 1881^{6}.
humification of, 1881^{3}, 3203^{1}.
paper mill waste water, 3080^{9}.
pinto bean, nutritive properties of, 2033^{8}.
resolution with HNO_3 for paper pulp manuf., 1521^{3}.
treatment with Na_2SO_3 and $(NH_4)_2SO_3$, 1322^{5}, 2071^{6}
vitamin A from wheat, 2188^{4}.
Strawberry root weevil, poisoned bait for, 1883^{4}
Strawboard. See *Paperboard*.
Streams. See *Water, pollution of; Waters, natural*.
Strecker reaction, mechanism of, 2116^{9}.
Streptococcus, acriflavine effect on, influence of soaps on, 2345^{4}
distinction of resistant types from sensitive types and from pneumococci, 1615^{7}.
of endocarditis, culture media for, 930^{9}.
growth of, water-sol. vitamin and, 1641^{7}
hemolytic, sepn of sol sp substance from, 1458^{5}.
infection and immunity, 3032^{9}.
lactic-acid-producing, effect on flavor of cheddar cheese, 2546^{3}.
lacticus, symbiosis in yoghurt, acid formation in, 2688^{1}.
scarlatinae, reactions to filtrate of, 1443^{4}.
scarlatinae, toxin from blood-bouillon cultures of, 2178^{5}.
Streptolysin, oxidation and reduction of, 3037^{9}.
Streptothrices, of Vesuvian soils, 2220^{2}.
Streptovinylene compounds*, 1235^{4}.
Strongylocentrotus drobachiensis, bones of, mineral compn. of, 2210^{1}.
Strontium. (See also *Alkaline earth metals*.)
biochem. action of, 449^{9}.
effect on heart, 1280^{1}, 1462^{5}, 2203^{7}
gaseous ions of, energies of soln. of, 2446^{1}.
glow discharge of Ca mixed with, 2121^{6}.
industry in 1925, 3783^{1}.
ionization potential of, 331^{7}.
parathyroid tetany prevention with, 3504^{9}.
as pharmacol. substitute for Ca, 449^{2}.
as source of error in blood Ca detns., 2515^{1}.
spectrum of, 2282^{6}, 2283^{4}, 3640^{2}.
tetany treatment with, 1860^{5}.
Strontium, analysis, detection, 158^{7}, 2631^{4}.
detection and detn., 2472^{3}.
detn. in W powder, 3664^{3}.
Strontium acetate, viscosities of solns. of, 854^{3}.
Strontium alloys, amalgam-, soln. in acids, rate of, 2649^{9}.
Strontium arsenate. (See *Alkaline earth arsenates*.)
arsenic removal from, 3660^{7}.
Strontium azide, spectrum of, 2791^{2}.
Strontium bromide, hydrolytic action of low-pressure superheated steam on, 2467^{1}.
system: $AsBr_3$–, phase diagram of, 1165^{3}.
Strontium carbide. See *Alkaline earth carbides*.
Strontium carbonate (See also *Alkaline earth carbonates*.)
hydrolytic action of low-pressure superheated steam on, 2467^{1}.
prepn. of, 2795^{8}.
reactions with WO_3 and MoO_3, 324^{7}.
Strontium chloride, activity coeff. of, 1162^{8}.
complex salt with quinoline-HCl, 601^{6}.
compressibility of solns. of, 1014^{1}.
crystal structure of, 3106^{3}.
hydrolytic action of low-pressure superheated steam on, 2467^{1}.
system: $BaCl_2$–, ionization in, 2614^{3}.
Strontium compounds. (See also *Alkaline earth compounds*.) P 3784^{6}.
isomorphic relations between Sa compds. and, 3658^{7}.
Strontium dithionate, prepn. and properties of, and study of systems contg., 2293^{8}.
system: H_2O–EtOH–, 2293^{8}.
Strontium ferrate, 157^{2}.
Strontium ferrocyanide. (See also *Alkaline earth ferrocyanides*.)
compds. with ferrocyanides of Co, Ni, Fe, Sn and Sb, 2797^{6}.
Strontium fluoride, heat of formation of, 2111^{1}.
Strontium halides. See *Alkaline earth halides*.
Strontium hexaformatothoriate, 1569^{6}.
Strontium ions. See *Alkaline earth ions*.
Strontium molybdate. (See also *Alkaline earth molybdates*.)
isomorphism with rare earth molybdates, 1157^{2}.
Strontium oxide. (See also *Alkaline earth oxides*.)
cathodes of, cooling effect on, 2784^{8}.
melting p. of, 1155^{9}.
reaction with sulfates of Zn, Pb, Cu, Ag and Mg and with $AgNO_3$, 324^{8}.
Strontium permanganate. See *Alkaline earth permanganates*.

Succinamide, **α-benzamido-**, 49[9].
——, **(ethoxymethyl)-**, 2823[9].
Succinamidic acid. See *Succinamic acid*.
Succinanil*, nitration of, 186[5].
Succinanilic acid, diketo-*N*-methyl-, ethyl ester, *β*-oxime, 3403[7].
——, **o,o′-dithiobis-**, 600[1].
Succinic acid, benzyl ester, Na salt—see *Benzycin*.
borneol and isoborneol monoesters, 2998[4].
β-carbethoxyethyl ethyl ester, 409[2].
chem. constitution of, alc. sensitivity in EtOH and, 2608[4].
disilver salt, reaction with I, 409[5].
effect on respiration, 446[9].
esters, 3689[5,6].
fermentation, 212[9].
from fermentation of sugar by yeast in presence of $CaCO_3$, 474[1].
formation in fermentation of glycerol by *B. coli*, 218[5].
free radicals from arylated derivs. of, 1402[3].
glycol cyclic ester, heat action on, 2823[4].
heat of combustion of, 1551[6], 2937[4].
ionization in aq. MeOH, 2608[6].
ionization of, effect of H_3BO_3 on, 2933[2].
lactic acid formation in liver from, 942[3].
in muscle, 1283[2].
photolysis of, 369[2].
recovery from beet molasses or fermentation residues, P 676[1].
reduction-oxidation potential of mixt. with fumaric acid, 2277[2].
silver salt, Et ester, reaction with I, 409[1].
soly. of benzoic, cinnamic and hippuric acids in Na salt solns. of, 3372[8].
system: azobenzene–, 1224[5].
systems of, with amines, 1224[6].
thallium salt, 49[7].
in tomatoes, 952[2].
——, **α-(p-acetamidophenylazo) - α,β - diacetyl-**, diethyl ester, 598[8].
——, **α - [p-(p-acetamidophenyl)phenylazo]-α,β-diacetyl-**, diethyl ester, 599[1].
——, **α-acetyl-β-methyl-**, derivs., 2824[2].
——, **α-amino-**. See *Aspartic acid*.
——, **p-anisyl-**, 1078[9].
——, **benzal-**, 1797[4].
——, **α,α′-p-biphenylenedisazobis[α,β - diacetyl-**, tetraethyl ester, 599[2].
——, **α,β - bis(2-naphthylsulfonamido)-**, 2313[1].
——, **α,β - bis(β-phenylcarbamido)-**, 2313[2].
——, **bromo-**, salts of, sapon. of, 2108[8].
——, **chloro-**, *d*- and *l*-, consts., 3280[1].
——, **α-(α-chloroethylidene) - β - methyl-**, and derivs., 2824[4].
——, **diacetyl-**, diethyl ester, absorption spectrum of, 1788[8].
——, **α,β - diamino-**, isomers, and salts, 2312[3], 2413[1,2].
stereoisomers, configuration of, 48[3].
——, **dibenzal-**, 1796[9].
——, **α,β-dibenzamido-**, and morphine salt, resolution of, 48[6].
——, **α,β-dibromo-**, prepn. of, 1980[3].
——, **diethoxyacetyl-**, diethyl ester, 388[7].
——, **(diethylcarbamylmercapto)-**, stereochemistry of, 373[3].
——, **α,β-dihydroxy-**. See *Tartaric acid*.
——, **α,β-dimethoxy-**, esters, rotatory dispersion of, 47[7,8,9].
——, **(dimethylcarbamylmercapto)-**, stereochemistry of, and Et ester, 373[1].
——, **dithiocarbethoxyoxy-**, stereochemistry of, and derivs., 372[6,8,9].
——, **α,β-epoxy-**, *cis*- and *trans*-, yeast action on, 367[8].
——, **(ethoxymethyl)-**, diethyl ester, 2823[9].
——, **hydroxy-**. See *Malic acid*.
——, **α - (α-hydroxyethylidene)-β-methyl-**, *γ*-lactone, and its derivs., 2824[3].
——, **methyl-**. See *Pyrotartaric acid*.
——, **methylene-**. See *Itaconic acid*.
——, **phenyl-**, in animal body, fate of, 1657[2].
——, **p-tolyl-**, 1079[1].
——, **triethyl-**, heat of combustion of, 1551[7].
Succinic anhydride, heat of hydration of, 1551[9].
hydrolysis in aq. solns. of electrolytes and nonelectrolytes, velocity of, 3621[6].
——, **α - (α-chloroethylidene)-β-methyl-** 2824[4].
——, **dimethylene-**. See *Fulgide*.
——, **hydroxy-**. See *Malic anhydride*.
Succinimide, **α-acetamido-**, 50[1].
——, **α-benzamido-**, 49[8].
——, **α - benzamido-N-(chloromethyl)-** 49[9].
——, **α - benzamido-N-(hydroxymethyl)-**, 49[9].
——, **N-(bromomethyl)-**, 365[6].
——, **N-(chloromethyl)-**, 365[6].
——, **N-(ethoxymethyl)-**, 365[7].
——, **N-(hydroxymethyl)-**, and acetate, 365[6,7].
——, **N-phenyl-**, nitration of, 186[5].
——, **N-1-piperidylmethyl-**, 365[6].
——, **N-p-tolyl-**, nitration of, 186[3].
Succinonitrile, reaction with resorcinol, 2995[9].
——, **tetra-p-anisyl-**, 1402[4].
——, **tetraphenyl-**, dissociation of, 1402[4].
Succin-p-tolil*, nitration of, 186[3].
Succin-p-toluidic acid, 2-nitro-*, 186[4].
Sucrase. See *Invertase*.
Sucrose. (See also *Fermentation; Saccharification; Sugar, analysis; Sugar, manufacture; Sugars.*)

Sulfonation, of *p*-cymene, 293^{4}.
of fatty acids, 3355^{8}.
of oils, 2589^{9}.
π value of, 2153^{8}.
Sulfone, benzene-o-dimethyl-*, 3289^{9}.
——, **benzohydryl phenyl,** 2669^{8}.
——, **benzyl γ-ethoxypropyl*,** 737^{2}.
——, **bis(β-chloroethyl),** addn. compds. with pyridine and with quinoline, chloroplatinates, 40^{4}.
——, **bis(γ-chloropropyl),** 362^{9}.
——, **bis(β-dibutylaminoethyl)*,** and di-HCl, 40^{3}.
——, **bis(β-diethylaminoethyl)*,** di-HCl, 40^{3}.
——, **bis(β-dimethylaminoethyl)*,** and derivs., 40^{3,4}.
——, **bis(β-dipropylaminoethyl)*,** and di-HCl, 40^{3}.
——, **bis(β-ethylselenylethyl),** 1051^{6}.
——, **bis(β-piperidylethyl)*,** 40^{3}.
——, **5-chloro-o-anisyl methyl†,** 398^{7}.
——, **1,1-dicellosyl*,** and tetradecaacetate, 379^{7,8}.
——, **1,1-digalactosyl*,** and octaacetate, 379^{6,7}.
——, **1,1-diglucosyl*,** and octaacetate, 379^{6}.
——, **6,6-di(methylglucosyl)*,** hexaacetate, 379^{8}.
——, **nitro-2-methoxyphenyl*,** isomers, 3290^{6}
Sulfonefluoran, dibromo-3,6-dimethyl-, 3001^{5}.
——, **3,6-dimethyl-,** 3001^{3}.
Sulfonegallein*, and derivs., 2491^{3,4}.
——, **dibromo-*,** and tetrabenzoate, 2491^{5,6}.
Sulfonegallin*, zinc salt, 2491^{6}.
Sulfonic acids, alkyl esters of aromatic, alkylation with, 1795^{3}.
of arylamino derivs. of naphthoquinones, 2308^{2}.
chlorine compds. of, as disinfectants, 1861^{2}.
as emulsifying agents, P 2108^{2}.
esters of aromatic, manuf. of, P 917^{5}.
from mercaptans, 577^{7}.
mercuration of aromatic, 1225^{2}.
sodium salts of aromatic, P 423^{8}.
——, **chloroiminobis-,** disodium salt-, see *Chlorimide.*
Sulfonium compounds, bis(γ-chloropropyl)-methyl— iodide, HgI_2 addn. compd., 362^{9}.
ethylenebis[ethylmethyl— salts], isomers, 1217^{4,5,6,7}.
β-hydroxyethyldimethyl— iodide, 1053^{4}.
(hydroxymethyl)dimethyl— bromide, acetate, hydrolysis of, 2311^{7}.
(hydroxymethyl)dimethyl — bromide, acetate, pharmacol. action of, 1053^{8}.
β-ketotrimethylenebis[ethylmethyl— iodide], 737^{2}.
tribenzyl— iodide, CHI_3, addn. compds., 2815^{9}.
triethyl— bromide, decompn. in liquid media, 1744^{2}.
trimethylenebis[ethylmethyl— iodide], 1217^{7}.
Sulforicinates, analysis of, 303^{4}.
Sulfosept oil, 477^{8}.
Sulfoxide, benzohydryl 1-naphthyl, 2669^{9}.
——, **benzohydryl phenyl,** 2669^{8}.
——, **bis(β-diethylaminoethyl)*,** di-HCl, 40^{3}.
——, **bis(β-dimethylaminoethyl)*,** derivs., 40^{3}.
——, **bis(β-dipropylaminoethyl)*,** di-HCl, 40^{3}.
——, **bis(β-ethylselenylethyl),** 1051^{6}.
——, **4-nitro-2-methoxyphenyl methyl*,** 3290^{6}.
——, **phenyl triphenylmethyl,** 2669^{8}.
Sulfoxides, resolution into optically active forms, 3448^{5}.

Sulfoxylarsphenamine*, reaction with O_2, 2993[4].
Sulfur. (See also *Fumes.*)
absorption of β-rays by, 3127[8].
from activated C, P 3543[7].
affinity between metals and, 3420[4].
in anglesite and galena from Monteponi, 1969[4].
in arsphenamine and its relation to mode of synthesis and toxicity, 176[8].
artificial asphalts prepd. with, 3802[9].
atom, asymmetric, 1217[4].
atoms of, energy values of $L_{II}L_{III}$ levels of, 709[1].
bacteria as indicators of, polluted water, 3525[5].
bacteria, energy source of, 217[7].
in benzene, its effect on Cu and brass and its detn., 1137[9], 1138[1].
in Big Hill salt dome, Texas, 1197[9].

as by-product of gas, 3556[7].
circulation in the body, 448[9].
in coal and coke, 979[1].
in coal, effect on carbonization and gasification, 490[8].
in coals of Iowa, 3554[8].
colloidal, P 2051[8].
colors of, 1932[8].
detns. of adsorption of HCl on, 1346[6].
effect of electrolytes on life period of, 856[7].
effect on germination of potatoes, 2351[1].
effect on transformation rate of maleic acid into fumaric acid, 1932[9].
prepn. of, 532[9].
thermal synthesis of, 2439[1].
colored layers on Cu from vapor of, 3152[2].
color in glass from, 2397[4].
combination with rubber in hard rubber, rate of, 841[4].
corrosion in petroleum refining by, 2579[2].
corrosion of metals and alloys by free, 2638[9].
deposits in coast zone of southwest Africa, 884[1].
deposits in New Zealand, 1196[4].
detn. in halogens, 2802[4].
detn. in soils, 1293[4].
dielec. const. and optical properties of, 1342[5].
directive effect on substitution, 3290[3].
distn. of, P 97[3].
effect of petroleum-refining agents on, dissolved in naphtha, 1784[3].
effect on blast-furnace processes, 1378[3].
on color of azo dyes, 1062[9].
on glycogen storing in liver, 2204[9].
on hydrolysis of esters, 367[5].
on microflora of soil, 2383[5].
on nitrate formation in soils, 1880[5].
on nitrification of bone meal, 2553[9].
on nitrogen content of legumes, 472[9].
on respiration, 3507[3].
on steel, 2807[2].
on wart disease of potato, 3769[5].
elastic, formation of, 313[5].
elec. cond. of mixt. with CuS, 2276[5].
elec. cond. of, x-ray effect on, 3124[4].
excretion from exudates into blood, 2200[4].
as fertilizer, 1881[2], 2222[6].
for alfalfa, 87[4,5].
on Iowa soils, 642[2].
for legumes, 87[6].
for sugar cane, 3358[7].
fertilizing with, effect on sulfate production in humid and arid soils, 2039[8].
flowers of, manuf. of, 2565[3].
formation in effusions, 1849[6].
as fungicide, 89[1], 3769[6].
in fungicides, adherence to foliage, 3058[2].
in gas, increase during C_6H_6 washing, 104[4].
in gas production, coal analysis and, 3072[9].
heat of dissocn. of, 2933[6].
hydrogen sulfide intoxication by external application of salves contg., 1470[3].
impregnated tile, effect of alkali on, 1310[5].
impregnating wood with, P 3552[9].
impregnation of concrete articles with, P 272[2].
industry in 1925, 3782[7].
for insecticides, P 2224[2].
as insecticide, 89[1].
isotopes of, 2791[5].
manuf. as a by-product in refining metals, 3782[4].
manuf. of, P 2051[8], P 3785[7].
in Marathon fold, Texas, 1778[2].
in melanoderma from cirrhosis, 3188[2].
melting, furnace for, 3336[5].

hydrogen-ion concn. detn. in liquors in, 2930[9].
hydrogen-ion concn. in, 1168[5].
industry of 1800, 2090[1].
with iron salts, theory of, 2089[8].
lime for, 3834[9].
liquors for, size of particles in, 122[8].
magnesium salt deposition in hide previous to, P 676[6].
marine animal skins, 1002[5].
oil, P 3360[4].
plumping power of liquors for, detn. of, 123[7], 3359[3].
poisoning of workers in, industry, 3834[5].
quinone, 518[2], 1535[1].
reducing agents in, 3835[2].
review, 1002[2].
review of vegetable, 308[6]
rolls for, coating with rubber, 2262[1].
of shark skins, 80[6].
of sole leather, 3095[4], 3586[6].
of sole leather with fir bark, 516[5].
straight-line function in the tan wheel, 123[7]
sulfur, 1002[4].
sulfurous acid in, 2260[6].
swelling during, control of, P 123[6].
with syntans, 1002[5].
"true degree of tannage," 2919[5].
two-bath, 3586[7].
vegetable, 1727[7], 2426[9].
with vegetable and mineral material combined, 3095[4].
waste, recovery and use of, 1728[1].
treating and evacuating, 3835[8].
treatment of, 3096[3], 3525[8], 3765[6].
Tanning materials. (See also *Gambier; Quebracho.*) P 124[1,2], 308[7], P 518[6], P 2091[2], 2260[5], P 2261[6], P 2261[7], 3095[4], 3834[8].
Acacia arabica, 1535[8].
acidity detn. in synthetic, 2090[2].
Anti-oxydul, Pellastol C and Pellastol N, 837[5].
astringency of vegetable, 517[9]
cellulose from chestnut wood residues in manuf. of, 2411[3], 3236[3].
colloidal grinders in prepg., 3095[4], 3834[8].
divi-divi, fermentation of, 3586[7].
effect of neutral-salt-treated hide powder on, 3095[9].
fluorescence of acetone exts. of, 2260[5], 3245[9].
from *Lagerstroemia*, analyses of, 2090[3].
in leather, testing, 1337[2].
licrol, chromalin and purgatol, 123[6].
myrobalan ext., insol. matter of, 3587[1]
natural, chemistry of, 3359[6].
oakwood ext., insol. matter in, 3246[1].
from phenols and cellulose, 1535[3].
production of synthetic, in America, 3816[7].
quebracho exts., reactions of pure, sulfited and cellulose ext.-contg., 308[8].
reaction of synthetic, toward hide substance, 1535[4].
saccharin manuf. by-products as, 3586[8].
sodium sulfate effect on synthetic, 3586[6].
South Indian, 3586[5].
from spent alk. liquor in paper manuf., 1518[8]
sulfite cellulose ext. for, 308[7].
sulfite cellulose exts., fluorescence of, 3245[9].
from sulfite liquor, P 666[2], P 838[9], P 1003[4], 2747[8], P 3236[7].
sulfite liquor as, 2762[1].
sumac extn. for analysis, 3835[8].
sumac, review on, 3587[4].
synthetic, 837[6], 1336[9].
thiophenolsulfonic acid-contg., P 3587[6].
ultrafiltration of vegetable, 837[7].
ultra-violet light in examn. of, 2261[2], 3835[1].
vegetable exts., P 1920[2].
work of expt. station at Naples, 1535[6].
work of expt. sta. at Turin, 1535[6].
Tanning materials, analysis. (See also *Hide powder; Tannic acids, analysis.*) 123[6], 3835[8].
committee report on, 517[4].
detection of sulfited cellulose, 2260[6].
detection of synthetic tannins in vegetable exts., 517[8].
detn., 1337[8].
detn. of moisture, 3095[6].
fluorescence test in, 1535[7].
oak and chestnut exts., 3095[5].
synthetic tannins, 2919[4].
Tannins. (See *Tannic acids; Tanning materials.*)
Tantalum, cementation of ferrous and cuprous alloys by, 3680[1].
in high-speed steels, 2139[9].
melting p. of, 2948[7].
photoelec. effect of, 2947[2].
phys. properties of, as function of temp., 3104[3].
properties of, 1211[2].
rectifier, 2124[8].
resources of U. S. in 1924, 3415[1].
spectrum of, 1354[8], 2948[7], 3266[1], 3385[2].
thermal cond. of wires and rods of, 1021[8].
tools and dies of, P 37[4].
Tantalum, analysis, detection in Cb compds., 721[9].
detection of C, 1211[4].
detn. in Cb compds., 721[9].
sepn. from Cb, 721[9], 1040[5].
Tantalum, metallurgy of, oxide reduction in, P 2055[8,9].
Tantalum alloys, chromium-Ni-, P 2479[9].
copper-Ag-Sn-, for dental amalgams with Hg, P 1384[2]
Tantalum chlorides, derivs. of $TaCl_5$, 557[6].
reduction of $TaCl_5$, 557[5].
Tantalum oxide, glowing of Ta_2O_5 on heating, 527[6]
insulating, device for making break-down tests on, 1122[4].
insulating, specifications of A. S. T. M. for rubber, 954[7]
insulating, testing of rubber, 843[2].
telegraph perforator, effect of rancidity of oils on, 1521[8].
Tapiolite, crystal structure of, 3415[1].
Tar. (*Coal tar is usually meant unless otherwise stated.*)
acid, removal from petroleum, P 283[2].
aeration in presence of HNO_3 and N oxides, P 659[5].
books: 2410[5], The Industrial Applications of Coal Tar Products, 494[9]; Dyestuffs and Coal Tar Products, 2741[8].
burning of, open-hearth furnace for, P 495[8].
cancer, arsenic in formation of, 1849[6].
cancer, effect of fats on, 942[9].
carburetting water gas by, 3344[2].
carcinoma, effect of glucose on growth of, 2197[8].

effect of insulin on, 235^6.
effect of temp. on production of, 1451^9.
histological genesis of, 68^9.
catalytic decompn. of, P 3800^8.
cement, specifications of A. S. T. M. for, 954^6.
from coal from Lupeni, Roumania, 658^1.
compn. of, 1709^6.
condensation from coal gas, 3226^3.
creosote, products from oxidation under pressure of lignite, 3227^1.
creosote removal from, 3227^2.
dehydration and distn. of, 2905^7.
dehydration of, 3557^3.
dehydrogenating, P 2064^4.
distn. app. for, P 659^6, P 3345^9.
distn. app. for, corrosion in, 1510^9.
distn. of, 105^8, 1315^2, P 1512^2, P 2064^4, P 2244^3.
by metal baths, 655^1.
plant and process for, 493^7.
plant at a steel works for, 1315^2.
plant for, 2242^8.
effect on soil, 3530^8.
fractional condensation of, from gas, 814^3.
fuels from, 101^4.
gas from, app. for making, P 3558^6.
in gas industry, 1510^4.
hydrocarbons, 1510^8.
hydrocarbons of, review, 1510^8.
hydrogenation of paste of coal and, 3225^1.
indene from, 755^7
lignite, 1509^5, 2240^9.
from lignite gas producers, 658^3.
lignite, low-temp. recovery gas producer and plant for, 978^7.
from lignite of Bohemia, phenolic constituents of, 2905^8.
lignite, recovery in production of cold producer gas, 105^9.
liver necrosis and cirrhosis from, 627^6.
low-temp., 657^9, 2240^5.
low-temp., Ca salts of phenols from, 88^9
from Canadian fuels, 1509^5.
compn. of semi-com., 493^5.
detn. of yield of, 658^1.
from Hungarian coals, 493^4.
re-processing, 1709^5.
sepn. and conversion of products from, 2905^6.
from low-temp. carbonization with Fellner-Ziegler process, 275^9.
manuf. of, P 1710^9.
nomenclature of, 2907^1, 3557^3.
as paint, 297^4.
petroleum, 986^2.
phenols from, extn. app. for, P 3229^4.
pressure, treating, P 3229^3.
primary yield in Al assay retort, detn. of, 3344^5.
production in Italy, 2063^5.
products for road-making, 488^8.
reclaiming from aq. emulsions, P 3074^5.
removal from gas, 2242^9.
from gas, app. for, P 278^6, P 2064^7, 2739^9.
from pyroligneous vapors of wood distn., P 3564^7.
residue, rubber compns. contg., P 3842^4.
road, production of, 3226^7.
for roads, specifications of A. S. T. M. for, 954^6.
in road surfacing, 100^7.
for road surfacing, manuf. of, 1135^6.
supropel, insulating material from, 2551^3
sulfur removal from acid fractions of, 2740^9.
tumors from, cytology of, 67^5.
utilization of, relation to coal carbonization, 493^4.
vapors, increasing heating value of gases by decompn. of, 3343^9.
water-gas, 814^2.
water-gas, continuous distn. of, 2575^7, 3797^8.
water, treating, P 1710^9.
wood, and its tech. application, 3803^1.
in wood preservation—see *Wood*.
Taramira, from Punjab, compn. of seed and cake, 1483^6.
Taramite, 2805^1.
Tarnish, of metals, colors of, 2649^4.
Tarnishing. (See also *Corrosion*.)
of silver, compn. for preventing, P 268^8
Tar number, detn. of, auto-oxidation of mineral oils and, 2743^2.
Tar oils. (See also *Hydrocarbon oils; Naphtha*.)
absorption of C_6H_6 by, 788^6.
benzene-absorbing power of, app. for detg., 981^5.
benzene, detn. of acid oils and bases in, 2905^9.
benzene recovery with, 2740^4.
benzene sepn. from, P 278^4.
benzene wash oil, valuation of, 1138^2.
benzenized, distn. app. for, P 1710^8.
bituminous, constituents rich in S, 3005^6.
blue, from lignite, 2741^1.
cracking, P 1512^1
cracking, review on, 2408^3.
with creosote content high, working up, 2063^4.
creosote removal from, 3227^2.
detn. in coke, 2905^9.
distn. app. for, P 278^5.
distn of, P 659^6, P 2064^3.
distn. plant for, 2242^8.
distinction of lignite and coal, 1315^1.
as fuel for Diesel motors, 3342^2.
in gas industry, 1510^4.
hydrogenating, P 984^2.
1 - indanone from, 1618^7.
ketone detn. in, 1902^2.
light, 2063^3
light oils from primary, compn. of, 3073^7.
from lignite, purification of, P 108^1.
from low-temp. carbonization, 2240^7.
manuf. of, for fuels for internal-combustion engines, 102^2.
nitrocellulose solvent from wood-, P 289^9.
from peat, 1071^2
phenols recovered from, P 1996^5
reclaiming from aq. emulsions, P 3074^5.
removal from coal gas by silicic acid gel, 2727^7.
spraying (winter) of fruit trees with, 3206^9.
as sprays for *Cochliomyia macellaria*, 2556^2.
standards for solar oil, 2743^6.
terpenes in, ferrocyanic acid as reagent for, 2323^2.
testing by C_6H_6 wash-oil method at coke oven, thickening process in, 3073^5
washing app. for, P 278^5.
from wood, treating, P 3077^8.
Tarsi, of muscid flies, chem sensitivity of, 3749^9.
Tartar emetic, in bilharzia treatment, 1275^5.
biochem. action of, 1865^7.
Tartaric acid. (See also *Tartrates*.)

adsorption by activated C, 2929[1].
4 - (o - aminophenyl)imidazole salt, 395[6].
bismuth salt, constitution of, 1571[7].
bismuth salt, toxicity and urinary elimination of, 3045[2].
book: Contribution à l'étude de la valeur therapeutique du tartre stibie, 2371[7].
compds. with α-ethylbenzylamine, 1615[1].
detection of, 352[3], 3775[6].
detection of, in self-raising flour, 2709[2].
detn., 1043[2], 1774[9], 2299[9].
detn. in fruit and fruit products, 78[1].
detn. in wines, 3196[8].
d-, dibenzoate, derivs., 1789[5].
dl-, prepn. of, 3284[3].
diacetate, rotatory dispersion of, 50[2].
disilver salt, reaction with I, 409[5].
esters, rotatory dispersion of, 47[9], 48[1].
extn. from marcs, lees and weak wines, 3534[2].
in grape must, effect on wine, 475[6].
heat of combustion of, 1166[1].
hydrolysis by lipase, 3176[1].
inactive, and its hydrates, 1594[6].
lactic acid formation in liver from, 942[3].
l-, prepn. of, 1219[9].
monoethyl ester, electrolysis of salts of, 2312[2].
optical rotation of, effect of H_3BO_3 on, 1980[4].
oxidation by Ag salt solns., 3446[7].
potassium salt—see *Potassium tartrate*
pyridine and quinoline salts, 3294[2].
reaction velocity with Br, 1953[5].
reaction with Br in light, 870[5].
rotatory dispersion of, 2483[6].
rotatory power of, 3125[4,5].
sodium salt, reaction with salts of weak metallic bases, H electrode studies of, 2447[5]
sodium salt, soly. of benzoic, cinnamic and hippuric acids in solns. of, 3372[8].
specific rotatory power of, effect of viscosity on, 2941[6].
tetrathallium salt, 49[7].
Tartaric anhydride, *d*-, dibenzoate, transformation products of, 1789[4].
diacetate, rotatory dispersion of, 50[2].
Tartramic acid, crystallography of, 1926[4].
Tartranilic acid, *d*-, dibenzoate, aniline salt, 1789[5].
Tartranilide, from the dibenzoate of tartaric anhydride and aniline, 1789[6].
Tartrates. (See also *Tartaric acid.*)
effect on arteries, 1868[1].
manuf. of, P 3696[3].
Tartrimide, *N*-phenyl-, dibenzoate, 1789[6].
Tartrobismuthates, complex, 3403[7].
Tartronamic acid, crystallography of, 1926[3].
Taste. (See also *Pungency; Sweetness; Water, potable and industrial; Water, purification of.*)
of acids, 2335[6].
chem. constitution and, 1603[2], 3707[4].
of sweet-tasting substances, relation to chem. structure, 2170[1].
Taurine, in cystine-deficient diets, 3312[7].
cystine replacement by, in diet, 3312[8].
effect on uterine muscle, 1452[8].
Taurocholates, adsorption isotherm of solns. of, 3[1].
Taurocholic acid. (See also *Bile acids.*)
sodium salt, effect on uterine muscle, 1452[8].
Tautomerism. See *Isomerism*.
Taxic acid*, 767[2].
Taxine, constitution of, 767[2].
Taxinol*, 767[2].
Taxinolamine*, 767[2].
Taxodium. See *Cypress*.
Taxus, leaves, constituents of, 767[2].
Taylor, Robert Llewellyn, obituary, 2100[8].
Tb bacillol, disinfecting sputum with, 3773[2].
Tea, adenine nucleotide prepn. from leaves of, 2514[6].
chemistry and technology of, 3049[9].
curing app. for, P 1288[6].
effect on gastric juice secretion, 2190[9].
ext., P 3321[9].
fertilizers for, 1486[1].
soil acidity requirement of, effect of lime on, 1484[6].
Teaching. See *Education*.
Tears. (See also *Lachrymators.*)
constituents of, 1419[1].
Tea vine. See *Micromeria douglassi*.
Tebeprotin, reaction in tuberculosis, 782[4].
in tuberculosis serodiagnosis, 3186[9].
Technical chemistry. See *Chemical industry; Industry; Research*.
Tectin, prepn. and properties of, 1636[6].
Teeth. (See also *Dental fillings; Dentifrices.*)
affected by dental caries and by pyorrhea alveolaris, chem. analysis of, 946[3].
anesthesia in, production of, P 3539[5].
artificial, P 2053[5].
caries, etiology of, 780[4].
caries, relation of *B. acidophilus* to, 3733[2].
development of, balance between dietary Ca and vitamins C and D and, 3717[8].
diet and, 776[5].
enamel, decalcification of, 938[2].
enamel of, equil. with saliva, 2695[7].
endocrine gland and, 3723[4].
microscopical specimens of, machines for prepn. of, 3592[3].
prenatal diet and, 2522[2].
sealing root canals of, compn. for, P 3786[9].
Tektites, 3669[3].
Telegony, diagnosis of, pptg. serum for, 2175[1].
Teleostei, embryonal metabolism of, 243[9].
Tellina calcarea, bones of, mineral compn. of, 2210[1].
Telluric acid, acid nature of, 694[6].
crystal structure of cubic, 3598[4].
Telluride, *p*-anisyl methyl, 907[8].
——, **bis(*o*-anisyl)**, as disinfectant, 2315[8].
——, **bis(*p*-anisyl)**, 2670[1].
Tellurides, alkyl, prepn. of, P 1631[2], 3273[8].
gold ores bearing, treatment of, 1376[7].
prepn. of, 881[9].
Tellurium, absorption of β-rays by, 3127[8].
cathodes, disintegration in H, 2446[7].
colloidal, 858[2].
colloidal, prepn. of, 532[9].
crystal structure of, 131[1].
Hall effect in, retardation in magnetic field, 3262[7].
industry in 1925, 3783[2].
for metal refining or modifying, P 736[1].
reaction with cyanides in liquid NH_3, 3373[9].
reaction with Se_2Cl_2, 2294[4].
review of mining and trade information, 888[1].
Röntgen-ray energy level of, detn. of outer, 2787[9].
sepn. of Pt metals, 718[3].
spectrum of, 337[4], 2943[7,8], 3640[2].
stereochemistry of quadrivalent, 362[2].

system: Bi–, magnetic susceptibility in, 1209[4].
thermal cond. and thermal e. m. f. of crystals of, 1939[8].
Tellurium, analysis, detn., 2801[6], 3663[4].
detn. in alk. sulfide solns. and sepn. from heavy metals and from Se, 1774[2].
detn. in presence of ferric Fe, Se and Cu, 560[6].
Tellurium chlorides, $TeCl_3$, dielec. const. of, effect of exposure to light on, 1762[9].
$TeCl_2$, reaction with Se_2Cl_2, 2294[4].
$TeCl_4$, reaction with alkyl aryl ethers, 907[1], 2669[9].
reaction with ketones, 413[2,8].
Tellurium compounds. (See also *Telluronium compounds.*)
p-anisylmethyl— diiodide, 907[8].
p-anisyl— trihalide, 2669[9], 2670[1].
bis(2,4 - dimethoxyphenyl)— dichloride, 907[4].
bis(β-ketoamyl)— dichloride, 413[8].
bis(β - keto - γ,γ - dimethylbutyl)tellurium dichloride, 413[9].
bis(β - ketohexyl)— dichloride, 413[9].
bis(β - ketoisoamyl)— dichloride, 413[9].
bis(β - ketoisohexyl)— dichloride, 413[9].
bis(β - ketopropyl)— dichloride, 413[8].
bis(*p* - phenoxyphenyl)— dichloride, 1063[8].
5 (or 6) - bromo - *o* (or *p*) - anisyl— trihalide, 2670[2].
(α - carboxyethyl)— trihalide, 2670[2].
di - *p* - anisyl— dihalide, 2670[1].
(2,4 - dimethoxyphenyl)— trichloride, 907[3].
di - *p* - phenetyl— dichloride, 907[2].
as disinfectants, 2315[7].
α - ethyl - β - ketoamyl— trichloride, 413[9].
α-ethylphenacyl— trichloride, 414[1].
3 - hydroxy - *p* - anisyl— trichloride, 907[5].
β-ketobutyl— trichloride, 413[8].
β - keto - γ,γ - dimethylbutyl— trichloride, 413[9].
β - keto - α - methylbutyl— trichloride, 413[9].
4 (or 2) - methyl - *o* (or *p*) - anisyl— trichloride, 2670[2].
5 (and 3) - methyl - *o* (and *p*) - anisyl— trichloride, 2670[1].
α - methylphenacyl— trichloride, 414[1].
org., 3156[2].
p-phenetyl— trichloride, 907[1].
p - phenoxyphenyl— trichloride, 1063[8].
α - phenylphenacyl— trichloride, 414[1].
from reaction of alkyl aryl ethers with $TeCl_4$, 907[1], 2669[9].
from reaction of monoketones with $TeCl_4$, 413[8,9], 414[1].
reaction with H_2F_2, 1186[4].
Tellurium nitride, prepn. of, 1039[2].
Tellurium oxide, TeO_2, crystal structure of, 3414[9].
reaction with H_2F_2, 1065[5].
reaction with Se_2Cl_2, 2294[4].
Telluronium compounds, *p*-anisyldimethyl— iodide, 907[7].

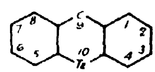
Tellurous acid, acid nature of, 694[6].
Telluroxanthene,



–, **9-keto-.** See *Telluroxanthone.*
Telluroxanthone, as disinfectant, 2315[8].
Temperature. (See also *Heat; Pyrometers; Pyrometric cones; Pyrometry; Refrigeration; Thermometers; Thermoregulators; Zero absolute.*)
of beginning of reactions between solids, detn. of, 3374[2].
book: Methods of Measuring, 2782[1].
in casti[illegible]n bronze, effect on phys. properties, 3421[1].
of ceramic ware, measurements during load test, 1504[6], 3220[3].
coeffs. of reference electrodes, 2112[2].
of combustion and its graphical detn., 2738[5].
of combustion, calcn. of, 3796[4].
controllers for gas furnaces, 103[9].
controlling and recording device, P 2433[9].
controlling system for, in drying clays, etc., P 2400[6].
control of, app. for, 2922[2].
in drying refractory ware, P 976[4].
in elec. furnaces, P 342[5], P 1567[8].
in industrial furnaces, 491[2].
at low temps., device for, 1924[1].
in melting Fe, P 1587[2].
in sugar crystallizers, 2258[4].
control system for dressing and tempering fishtail bits, 166[4].
critical—see *Critical constants.*
density and, 320[2].
distribution in shaft stoves, 3796[6].
distribution of crit., for biol. processes, 2512[4].
effect on basal metabolism of young women under usual conditions of dress, 2193[8].
on biol. processes, 3304[6].
on drying rate of liquids, 528[9].
on elec. sparking potential, 1175[2].
on germination of seeds in absence of Ca, 1650[2].
on locomotion in *Planaria*, 2544[3].
on locomotor activity in tent caterpillars, 629[9].
on locomotor activity of *Paramecium*, 630[1].
on magnetism, 701[4].
on metabolism, 2191[9].

on metabolism of plant tissues, 932[1].
on perfused heart, 3746[7].
on plants, interrelation with relative day length, 1648[5].
on reaction rate, derivation of equation for, 3[5].
elasticity modulus and, 132[7].
energy of a gas and, 3636[9].
of equil. of liquid and its vapor, mol. distance and, 1345[7].
of explosions, calcn. from sp. heats and from explosion pressures, 2413[7].
of flame in furnaces for glass, distribution of, 2398[5].
of gases, relation to pressure and d., 1736[9].
gradient of gas producer, 277[3].
for heart beat of *Limax maximus*, modification with glucose, 2544[4].
of heart rate in *Pterotrachea* and *Tiedemannia*, 1282[2].
high, alloy steels for, 2651[4].
breakdown of insulators at, 1555[8].
density measurements at, 3148[8].
effect on hydrogenation under pressure, 1587[9].
heat insulation in installations for, 464[3].
hydrogen-ion concn. detn. at, 1750[2].
hydrogen soly. in Sn and Al at, 1544[9].
measurement and production of, 1349[3].
photo-elec. properties of thin films of alkali metal at, 3639[6].
researches at, 2777[7], 3365[3]
at high altitudes, recorder for, 1923[7].
van't Hoff-Arrhenius equation, nomogram for, 3630[7].
indicator and recorder of, P
indicator for machine parts, etc , P 523[8]
Knietemperatur, 3598[9].
low, app. for detg. f p. and viscosity at, 2264[7].
bath for examns. at, 3363[3]
constitution in liquid and solid states of substances at, x-ray investigation of, 852[4].
elec. resistance at, 141[3].
elec. resistance of Co, Pb, Sn and Au at, 864[7].
elec. resistance of Au, Zn, Cd, Pt, Ni, Fe and Ag to 1.3° K , 3629[8].
elec. resistance of Na and K at, 864[6]
equipment of the Physikalisch-Technische Reichsanstalt, 864[7].
expansion coeffs. at, measurement of, 3376[7].
explosions in liquid air baths for producing, 1716[9].
explosions of mixts. of inflammable compds. and liquid air at, 1325[1]
germinating vitality of seeds in vacuum at, 1428[5].
internatl. temp. scale of, 862[7].
isotherms of He at, 861[9], 2926[1].
isotherms of H at, 862[4].
isotherms of N at, 2610[2].
isotherms of O at, 862[3], 1168[6], 2926[3].
magnetic properties of chlorides at, 6[8].
magnetic rotatory power of paramagnetic minerals at, 727[6].
modification of absorption spectra of rare earth crystals in a magnetic field at, 707[5].
photoelec. cond. at, 869[7].
production of, 1677[8].
spectrograph for, 3363[7].
use in chem. industries, 464[1].
vapor pressure of Hg at, 854[1].
vapor tension and heat of vaporization at, 862[9].
measurement of, 2110[6].
app. for, 2597[2].
by CO_2 content of combustion gases, app. for, P 1541[2].
in chimney shells, 3227[7].
of furnace gas, app. for, P 1924[8].
of gases, 3322[4].
in heat-treating furnaces, etc., test blocks for, P 316[9].
installation of elec. instruments for, 1540[1].
of materials in furnaces or crucibles, etc., app. for, P 2098[8].
of metals during melting and hardening operations, 2143[4].
in mold of brown coal briquet press, 2241[1].
in molten metals, 3416[8].
of non-ferrous alloys, 895[1].
of refractories, during load test, 2735[6].
in stationary sound waves, 1748[1].
in steel, 3436[2].
by thermocouples in inequally heated enclosures, 863[3].
measurement of high, 3599[9].
measurement of high, spectrophotography in, 863[2].
measurement of low, 6[4], 140[5].
measurement of surface, 3121[7].
measurement of surface, app. for, 2597[8].
of metastable non-variant systems, relation to velocity of transformation, 1016[3].
in open-hearth furnace, optical measurements of, 3147[9].
paints sensitive to heat, 2754[2].
of plasticity, detn. in coals, 1704[3].
pressure-, charts, 686[3].
pressure variation with, in evacuated vessels, 3382[5].
scale for tungsten, 3121[6].
scale to —193°, 326[1].
of skin in children, 439[2,3].
Soret effect, 3620[1].
spark potential and, 3638[9].
in steel bodies cooled in air, distribution of, 2140[4].
teeming and annealing, effects on Fe phosphide eutectic, 2651[3]
time-, curves for mixts. of isomers, app. for detn. of, 136[1].
of vapor from a soln , 695[4], 1928[2], 2610[2], 2774[2], 2931[7], 3118[8].
of vapor from a soln., app. for measuring, 1539[8].
Tempering, of alloys, P 168[6].
of cast Mn steel car wheels, etc., P 358[5]
colors, in Fe alloys and mixed crystals, 33[5].
of drill steel, 2306[1].
of fishtail bits, temp. control system for, 166[4].
flux for, P 168[9].
of iron articles, P 575[2].
of iron, compn. for, P 3154[4].
layers on metal surfaces, measurement of thickness of, 1752[9].
of metals, P 1384[8].
ovens for, heat governor for, P 317[1].
of steel, dimensional changes accompanying, 2138[7].

of steel, effect on tensility and Brinell hardness, 2138^{9}.
thermoelectricity of steels in relation to, 1583^{4}.
Tendons, heat contraction of untanned and CH_2O-tanned, 3835^{6}.
whale, compn. of, 1672^{3}.
Tenebrio molitor, development and metabolism of, effect of food on, 1871^{8}.
Tenite, segregation in a meteorite, 728^{1}.
Tennantite, at Magna Mine, Superior, Arizona, 3670^{3}.
Tennis courts, surface compn. for, P 978^{6}.
Tensile strength, intermetallic compounds and, 1747^{5}.
Tensimeter. See *Manometers*.
Tephrosia, *toxicaria*, toxicity to *Aphis rumicis*, 3769^{8}.
Terap. See *Artocarpus kunstleri*.
Terbium, spectrum (Röntgen) of, 3266^{1}.
Terbium sulfate, magnetic susceptibility of, 2112^{4}.
Teredo. (See also *Wood*.)
toxicity studies, 3792^{6}.
wood destruction by, 1507^{2}.
Terephthalic acid (*p-benzenedicarboxylic acid*), disilver salt, reaction with I, 409^{6}
—, **2,5-bis(aminomethyl)-**, di-γ-lactam, 380^{2}.
—, **2,5 - bis(anilinomethyl)-**, di-γ-lactam, 380^{3}.
—, **2,5 - bis(*p* - carboxybenzoyl)-**, and barium salt, 385^{9}
—, **2,5 - bis(dibromo - 4 - hydroxybenzoyl)-**, 386^{1}.
—, **2,5 - bis(hydroxymethyl)-**, di-γ-lactone, 380^{1}.
—, **2,5-diformyl-**, and derivs., 380^{5}.
—, **2,3** (and **2,5**) **- dihydroxy-**, heat action on, 1613^{3}.
—, **2,3-dimethoxy-**, 1798^{2}.
—, **2-formyl-**, and oxime, 184^{6}.
—, **2 - (hydroxymethyl)-**, 184^{4}.
Terephthalonitrile, **2,5 - dimethyl-** See *β Cumidonitrile*.
Terephthalyl alcohol, **α,α′ - diphenyl-**, 3451^{5}.
Terephthalyl chloride, reduction of, 380^{6}.
Teresantalaldehyde, semicarbazone, 1227^{4}.
Teresantalic acid, constitution of, and semicarbazone, 1227^{4}.
Terminalia superba, as paper-making material, 3811^{2}.
Terpene alcohols. See *Alcohols*.
Terpene ketones See *Ketones*.
Terpenes. (See also *Diterpenes; Sesquiterpenes; Triterpenes*.)
aliphatic, and derivs., 2975^{3}.
chemistry of, 2388^{7}.
cymene detection in, 2721^{4}.
derivs. of higher, 421^{5}, 1226^{9}.
detection of, 2341^{4}.
ferrocyanic acid as reagent for, in tar oils, 2323^{2}.
halo derivs., from optically active bases, 2990^{1}.
of mitsubazeri, 1070^{7}, 2490^{4}.
ozonized, P 2168^{1}.
from pine oil, 1799^{8}.
reaction with chromyl chloride, 2997^{9}.
reaction with H_3PO_4, 1070^{6}.
rearrangements of, 2846^{9}.
review, 3695^{5}.
synthetic, 3453^{5}.
Terphenyl, from atromentin, 406^{2}.
Terpin. See *Terpinol*.
Terpineol, isomers, and derivs., 1398^{1,6}.
from pine oil, 1799^{8}.
in turpentine from production of terpinol hydrate, 3076^{8}.
α-Terpineol, acid phthalate, dissocn. const. for, 1015^{3}.
oxidation of, by BzO_2H, 2674^{7}.
Terpinol, hydrate, turpentine from production of, terpineol content of, 3076^{8}.
Terra cotta, bibliography on, 3339^{4}.
cleaning compn. for, P 119^{9}.
drying, 2568^{8}.
firing in open kiln, 3547^{1}.
grog for, 2736^{7}.
maturing of, estn. of, 807^{4}.
polychrome, overglaze for, 2234^{8}.
Terrazzo, as flooring material, endurance of, 1701^{6}.
Teschenite, of Charlestown, Fife, 3414^{3}.
Testicles, arginase in, 56^{1}.
effect of emulsions of, on N and gaseous metabolism, 65^{5}.
effect of injection of emulsion of, on N metabolism of normal, castrated and thyroidectomized rabbits, 776^{9}.
effect of vitamin-A deficiency and of total underfeeding on, 437^{1}.
effect on metabolism, 2009^{9}.
ethyl alcoholism effect on, 1277^{9}.
insulin in, of normal and pancreatic diabetic dog, 441^{6}.
Testicular extract, effect of injection of insulin-like, on N metabolism of normal, castrated and thyroidectomized rabbits, 776^{9}.
effect on blood sugar and blood pressure, 1438^{8}.
Testicular fluid, properties of, 3183^{6}.
Testing of materials, book: Das Materialprüfungswesen, 865^{9}.
containers for, weighting and weight-adjusting band for, P 128^{3}.
elec. app. for, P 3579^{4}.
for fatigue, app. for, P 128^{5}.
standards of Am. Soc. for, 954^{4}, 1121^{3}.
for strength and ductility, P 2036^{3}.
Tetanolysin, oxidation and reduction of, 3037^{6}.
Tetanus, antitoxin, formation by use of nontoxic culture filtrates, 1268^{6}.
cryptotoxin of, 3187^{7}.
immunization against, 1847^{7}.
lactic acid formation in, 1260^{6}.
of muscles of heart and stomach by alternations in concn. of ions, 3492^{3}.
pseudoglobulin from sera immune to, sensitization with, 1847^{1}.
therapy with vaccine and Mn salts, 2879^{7}.
toxin and its destruction, 3731^{7}.
toxin, effect on motor ganglion cells of spinal cord, 1857^{9}.
Tetany, blood serum Ca in, 2877^{9}.
blood serum in, hexose phosphatase of, 923^{1}.
blood serum in, inorg. constituents of, 2696^{4}.
causes of, 1107^{2}.
effect on acid content of blood, 1668^{3}.
effect on blood, 2197^{5}.
from guanidine poisoning, 2363^{7}.
guanidine theory, 3730^{7}.
from hot baths, 3494^{8}.
infantile, increase of guanidine bases in, 2696^{6}.

inorg. metabolism in, 1452[9].
oxygen deficiency theory and, 1109[8].
oxygen tension of tissue in, 783[2].
parathyroid, effect of NH_4Cl on, 3194[8].
guanidine and, 2366[1].
guanidine intoxication and, 1461[9].
isolation of methylated guanidines from urine in, 1110[2].
prevention with parathyroid hormone, 779[2].
treatment of, 3723[1].
treatment with parathyroid ext., 2367[1].
parathyroid gland ext. effect on, 2193[8].
pathogenesis of, 2538[2,4], 3504[7].
of pregnancy, guanidine poisoning and, 1451[7].
prevention of, $Ca_3(PO_4)_2$ soly. product and, 3301[8].
skeletal muscle extension and loading in, 626[2].
spasm of, as disturbance in physiology of muscle, 2878[5].
strontium effect on, 1860[5].
strychnine, tonic component of, 3497[6].
sub-parathyroid, treatment with parathyroid ext., 3730[6].
from thyroparathyroidectomy, prevention of, 1447[4].
thyroparathyroid, effect of bleeding on, 1838[9].
ultra-violet radiation effect on, 1846[5].
α-Tetraamylose*, octanitrate, 380[9].
1,24 - Tetracosanedicarboxylic acid, 12,13-dihydroxy-, dimethyl ester, 1599[1].
Tetracyclopentadiene*, 2148[6].

differentiation of linen and cotton, 2586^{4}.
disinfectants, tests for, 3240^{4}.
draperies, dyeing of cotton, 3574^{7}.
Dresden Institute, work in 1925, 3349^{7}.
dressings (loaded and colored) for, 827^{1}.
dry cleaning, filtration of benzine for, 2078^{2}.
dry cleaning with benzine, 669^{7}.
drying app. for, P 829^{9}.
drying cotton at high temp., effect on strength, 295^{3}.
drying woolen and cotton, 3820^{3}.
dust in manuf. of, elec. pptn. of, 714^{3}.
effect of variation in yarn structure on, 508^{3}.
electrodeposition of rubber, etc., on, P 2956^{6}
equipment for industry, 295^{2}.
fastness of dyed and printed cottons to washing agents, 294^{6}.
fat and wax removal from, P 3578^{6}.
fats for, synthetic fatty acid esters as, 507^{9}
fats in sized, identification of, 669^{6}.
faults and discolorations in wool, 114^{2}.
faults in, 294^{8}.
filler for, viscose as, 1325^{9}.
finishes on, 3575^{2}.
finishes on, tests for, 2076^{9}.
finish for, viscose as, 3819^{6}.
finishing, P 3823^{3}.
finishing and dyeing, compn. for, P 1910^{7}.
finishing artificial silk fabrics and mixed fabrics, 3818^{3}.
finishing bleached woven stripes and figured shirtings for Indian trade, 2586^{8}.
finishing cotton, history of, 1720^{9}.
finishing cotton piece goods, 2415^{9}.
finishing cotton with activin treated starch, 1721^{2}.
finishing dept., sectional costs of, 2077^{1}.
finishing materials, analysis of, 827^{8}.
finishing of, wts. and measures in, 113^{8}.
finishing removal from cotton and woolen, analysis of products used for, 2078^{2}.
finishing, review for 1925, 2077^{1}.
finishing softener for, 3575^{3}.
finishing woolen and worsted, 113^{9}.
finishing worsted, 2416^{1}.
finish of, uniformity in, 507^{4}.
fireproofing, 669^{2}, P 3216^{3}.
formic acid in, industry, 3817^{8}.
gas-tight, P 2254^{1}.
"glass-cloth," P 805^{3}.
glycerol detection and detn. in cotton, 1908^{9}.
greasing fibers, P 3578^{6}.

humidity regulation in manuf. of, 1143^{2}.
humus compds. in deteriorated, origin of peat and coal in relation to, 1721^{4}.
hydrogen-ion concn. and, 2077^{1}, 3088^{1}.
imitation weaving or embroidery effects on, 2586^{7}.
impervious to petroleum hydrocarbon vapors, P 511^{6}.
impregnating, P 3353^{2}
impregnating bag fabric, P 1328^{7}.
industry, importance of tech. men to, 1525^{6}
ink removal from, 2077^{8}.
ink removal from, compn. for, P 2233^{6}
inks for, 1143^{6}.
inspection of, 2908^{7}.
iridescent coating for, P 3065^{9}.
jig dyeing of cotton, prepn. for, 1325^{1}.
kapok adulteration of cotton, detection of, 2416^{4}.
lab., microscope in, 1721^{3}.
lactic acid in, industry, 113^{8}.
laminated, indurated product from, P 2080^{1}.
light effect on, 668^{9}.
linen and woolen plants of Ford, 508^{3}.
linen-like finish on cotton fabrics, P 511^{6}, P 670^{8}.
lustrous, P 1722^{4}.
machinery, Monel metal in, 505^{8}.
manuf., coordination of lab. and purchasing dept. in, 1526^{9}.
mercerizing vegetable fibers in mixed, P 2253^{8}.
metallic powder on, printing of, 291^{8}.
metallic sheet material for, P 3216^{6}.
micro-technic of, 508^{2}.
mildew in cotton, 1327^{2}
mildew of, prevention with rare earths, 2909^{7}.
mildew-resistant, 2909^{6}.
moisture content of, temp. and, 3575^{3}.
moth damage of, 3240^{2}.
moth-proofing, P 993^{9}, P 2080^{3}, P 3240^{9}.
moth-proofing compds. for, 1327^{4}
multi-ply fabrics, P 830^{2}.
oiled slicker, 827^{8}
oiling cotton before spinning, 827^{1}.
oils and fats in manuf. of, accidents from, 3351^{9}, 3352^{1}
oils and oil products in manuf of, 3819^{9}.
olein for, 2251^{8}.
paint and grease on, cleaning compn. for, P 120^{1}
for paper-making machines, P 2412^{2}.
pile, manuf. of, P 3578^{7}
porosity of, testing, P 3523^{1}
pressure kier for treating, P 1328^{7}.
refrigeration in mills, 3820^{4}.
report of Research Committee, 668^{6}.
research lab. design for, mfg. plant, 1142^{9}.
review, 826^{8}.
rolls for manuf. of, coating with rubber, 2262^{1}.
in rope form, dyeing, washing, and fulling of, P 829^{7}.
rubber-coated weftless-cord, P 1538^{1}.
rubberized, P 313^{8}, P 2096^{3}, P 3589^{8}, 3839^{4}.
satd. with bituminous materials, methods of A. S. T. M. for testing, 954^{9}.
scouring and dyeing of cotton, 2908^{6}.
scouring app. for, P 2588^{4}.
sensitizing soln. for, P 3823^{8}.
sepg. silk and cotton mixts., P 3089^{1}.
shrinking woolens, P 3824^{1}.
silky gloss, brilliance and elastic feel, P 829^{7}.
singe rolls of Ni alloys, corrosion of, 3680^{4}.
size (cold) for, 295^{9}.
size for, P 267^{6}.
size for, NaF in, 295^{9}.
size removal from, 3574^{8}.
sizes for, from soy bean protein substance, P 3544^{1}.
from skins of chondropterygians and plagiostomes, P 3240^{9}.
soaps for, lanadin and hydraphthal, 2908^{7}
soap specks on, 2753^{7}.
specifications of A. S. T M. for, 1121^{6}
specifications of U. S. Gov. for, 991^{1}.
spinning, alky. detn. in water used in, 3524^{1}.
spinning of, prepn. for, P 2080^{2}.
spinning, prepg. fibers for, P 116^{2}.
stain removal, 508^{4}, 2416^{9}.
stains from corn and cottonseed oils, removal of, 2251^{2}.
stains from milling, 3574^{9}.
starch in industry of, 295^{8}.
steam accumulator in mills, 3820^{4,5}.
strength tests, humidity control in, 1720^{9}.
of suction-sweeper bags, treatment of, P 830^{7}.
surface tension in manuf. of, 3240^{1}.
surface tension of, effect of scouring and dyeing on, 2076^{9}.
swelling and sorption in liquids, relation to sp gr, 1326^{5}.
tentering process, 827^{7}
tent fabrics, life of, 827^{9}.
testing, 1142^{5}.
testing, elec app. for, P 3579^{4}.
testing machines for, specifications of A S. T M. for, 954^{7}.
testing (mech) of, 669^{2}
testing strength of, P 3823^{9}
tinting of, compn for, P 829^{6}
transparent, wool-like and other finishes on cellulosic, P 1328^{6}
treating, app for, P 2253^{9}, P 3823^{2}.
treating in piled condition, app. for, P 1529^{3}
treating to facilitate molding or shaping, P 3578^{4}
treating, with liquids or gases, P 511^{9}.
treating with soap solns., P 3823^{9}.
uniting with phenolic condensation products, P 804^{9}.
unshrinkable wool, P 2080^{4}.
vegetable, P 3578^{6}.
vegetable material for treating, P 2417^{5}.
washing app. for, P 1528^{8}.
washing with suint, etc., P 2253^{5}.
wastes, lime in treatment of, 668^{4}.
water content of bleached and mercerized cottons, 827^{8}.
waterproofing, 294^{5}, 507^{3}, 1720^{9}, P 2080^{2}.
  Cr compd. for, 2626^{1}.
  compn. for, P 2052^{8}.
  by impregnation, 3574^{9}.
  with rubber, P 3590^{1,3}.
waterproofing shade, P 2588^{6}.
water-retaining properties of wool, 507^{4}.
water supplies for, treating, 2217^{2}.
water supply for mills, 466^{6}.
weakening by hypochlorite bleaching agents, effect of Na silicates on, 1143^{7}.
wearing tests on, 3240^{1}.

wetting capacity of, 1142[9].
wetting of, 3575[1].

soly. in liquids, 2065^{6}.
sorption by Al_2O_3, 1346^{7}.
temp. of, from solns., 695^{4}, 1928^{2}, 2610^{2}, 2774^{2}, 2931^{7}, 3118^{8}.
temp. of, from solns., app. for measuring, 1539^{8}.
Vargol, silver content of, 3778^{4}.
Variolite, from Rhobell Fawr dist., 1197^{4}.
Varnish. (See also *Coating(s); Dopes; Driers; Lacquers; Oils; Resinous products.*) P 118^{2}, P 3090^{9}.
acetylene-phenol-aldehyde, P 3580^{7}.

airplane, durability of, 2755^{9}.
amber, 3242^{1}.
analysis of oil, 2589^{2}.
anti-rust, 2254^{4}.
bakelite, volatility of resins in, 117^{8}.
books: 1913^{4}, 3090^{6}; Cellulose Ester, 300^{9}; L'industria dei, 3580^{1}.
bulking values of ingredients used in, 1912^{8}.
carbohydrate esters for making, P 2167^{5}.
cellulose, 2418^{2}.
of cellulose acetate, P 3826^{8}.
cellulose-acetate, colored, P 832^{6}.
cellulose-ester, P 2419^{9}.
cellulose ester compns. for, P 3567^{4}.
chemist in manuf. of, 512^{4}.
clarification of, 2418^{3}.
clarification of, centrifuge for, 2254^{5}.
coloring black, P 997^{5}.
color of, detn. of, 117^{7}, 298^{8,9}, 996^{2}.
for conserve cans, 2081^{4}.
copal and shellac, decorating surfaces with, P 118^{3}.
from copals melted with exclusion of air, 299^{3}.
corrosion prevention with, 1722^{9}.
of decalin and hydroterpinol, 299^{2}.
drying of Chinese lacquer-oil, 2254^{8}.
drying of, ozone in, 3241^{7}.
for elec. conductors, P 2082^{4}.
fire hazard in manuf. of, 116^{6}, 1145^{3}.
fire-protective, contg. water glass, 298^{7}.
fires, fume control for, 3353^{8}.
flash pt. of, 2754^{5}.
industry in America, 2754^{1}.
insulating, 1912^{6}.
methods of A. S. T. M. for testing, 1121^{8}.
thiolite in, 2712^{9}.
leather, 3834^{6}.
life of, 3353^{4}.
light-sensitive, for photographic use, P 1362^{2}.
linseed-oil and wood-oil, 298^{6}.
linseed oil improvement for, P 3580^{7}.
litharges of diff. dispersion in relation to, 831^{9}.
manuf. of, app. for, P 2589^{5}.
mat effects on glass, P 1330^{6}.
nitrocellulose, P 997^{1}, 2418^{3}.
oil-resin, inter-esterification in manuf. of, 117^{7}.
paracoumarone-contg., P 2419^{9}.
plant design, 1143^{9}.
polarity of surfaces of, measurement of, 1346^{1}.
polishing, 265^{8}.
primer, P 3826^{7}.
research at the Bur. of Standards, 2909^{9}.
resin compn. for, P 997^{7}.
resin detection in linseed-oil, 2755^{6}.
resinous compns. for, P 3826^{9}.
resins for, from phenol and CH_2O, 672^{2}.
reviews, 994^{2}, 2255^{4}, 3353^{4}.
rosin for, 3089^{8}.
rosin oils for, 832^{4}.
rosin, production of, 2254^{6}.
from rubber and cellulose derivs., P 3567^{7}.
from rubber distn. residue, P 1004^{7}.
running of, 298^{8}.
sediments in, 298^{7}.
shellac, methods of A. S. T. M. for testing, 954^{7}, 1121^{6}, 1329^{4}.
solvent and vehicle for, P 118^{3}.
solvent detn. in, receiver for, 2754^{9}.
solvents in, detn. of volatile, 994^{8}.
spar, relation of body and non-volatile to durability of, 2755^{9}.
specification of U. S. Gov. for, 1912^{8}.
from synthetic resins, P 118^{2}, 3354^{2}.
from synthetic resins and rosin, thinners for, 3353^{8}.
synthetic resins in, 2756^{2}.
technology, 1328^{9}.
testing in lab. and on test fence, 1329^{1}.
testing, uniformity in, 116^{5}.
tung oil, 1911^{7}.
volatile compds. in manuf. of, 2418^{2}.
vulcanizing oils for, 513^{3}.
water removal from, P 956^{3}.
weathering of, ultra-violet light in, 3353^{7}.
wood oil for, plant treatment of, 1912^{6}.
Varnished surfaces. (See also *Polishing materials.*)
cleaner for, P 3354^{8}.
Varnish removers. (See also *Paint removers.*) P 118^{1}, P 672^{7}, P 1530^{4}, P 1913^{6}, P 2082^{2}, P 3091^{1}, P 3354^{7}.
classification of, 3824^{6}.
Vaseline. See *Petrolatum.*
Vasoliment, prepn. of, British Pharm. method for, 969^{8}.
Vaterite, 29^{6}.
crystal structure of, 29^{1}, 131^{2}.
Vegetable ivory. See *Ivory nut.*
Vegetables. (See also *Canned goods; Canning.*)
adsorbing power of, effect of cooking on, 1739^{3}.
Bacillus botulinus in, 1287^{1}.
cell membranes of, relation to crude fiber, 3516^{6}.
cold storage of, temp. effect in, 932^{4}.
colored with Cu salts, absorption of Cu during digestion of, 775^{4}.
cooking and extg., P 462^{9}.
from cooking, loss of mineral and other constituents, 783^{8}.
copper detn. in preserved, 2029^{8}.
decay of, prevention of, P 79^{8,9}.
for diabetics, 3720^{7}.
diet of fat and, metabolism on, 2189^{1}.
diet of uncooked, nutrient value during phys. and mental work, 3025^{4}.
drying app. for, P 1476^{2}, P 3593^{2}, P 3756^{1}.
drying of, 2546^{7}.
preservation of, 1283^{2}, P 1288^{4}, P 2213^{6}, P 2377^{9}, P 3521^{4}.
soft rot of, differentiating bacteria causing, 3481^{2}.
vitamin B content of Philippine, 3180^{2}.
of Western India, compn. of, 3049^{3}.
Veins. See *Blood vessels.*
Velocite B, ozone action on, 1713^{1}.
Velocity. See *Reaction velocity.*
Velvet beans. See *Beans.*
Venoms, 1112^{2}.
adrenaline discharge from injection into adrenal medulla, 1862^{6}.
cobra, hemolysis by, resistance of red blood cells normally and in beriberi to, 2700^{1}.
cobra, hemolytic action of silicic acid and, lecithin effect on, 1463^{9}.
daboia, effect of formalin on, 240^{7}.
effect of snake, on blood cholesterol, 3466^{7}.
immunization with toxoids, 1268^{9}.
lysocithin from, hemorrhagic action of, 1465^{8}.
poisoning by, cause of, 1465^{7}.
protein of, eosinophilic index as guide to intramuscular injection of, 1449^{9}.

scorpion, effect on adrenaline secretion, 2703^6.
snake and scorpion, effect on striated muscle, 1862^8.
Ventilation, book: Fresh Air and, 2889^4.
in dye houses, 1325^8.
in dye house to eliminate vapors and prevent condensation, P 1328^5.
in paper and cellulose plants, 284^6.
of tunnels, 2739^3.
in tunnels at Pittsburgh, CO recorder for controlling, 255^8.
Venturi tube. See *Meters.*
Veramone, 262^4.
Veratraldehyde, α-oxime, and its Na salt, phys. consts. of, 3450^4.
prepn. of, 181^1.
o-Veratraldehyde, synthesis of, and *p*-nitrophenylhydrazone, 1065^{8,9}.
o-Veratramide, 1065^9.
Veratric acid (*3,4-dimethoxybenzoic acid*).
——, **6-(β-amino-α-hydroxyethyl)-**, 2331^3.
——, **6-(β-benzalamino-α-hydroxyethyl)-**, 2331^3.
——, **6-(cyanomethyl)-**, 2331^4.
——, **6-(α-hydroxy-β-methylaminoethyl)-**, 2331^3.
o-Veratric acid (*2,3-dimethoxybenzoic acid*).
——, **5-amino-**, 1793^1.
——, **6-(β-amino-α-hydroxyethyl)-**, 2330^9.
lactone—see *Meconin, 2-(aminomethyl)-*.
——, **6-(α-hydroxy-β-methylaminoethyl)-**, 2331^2.
——, **6-[β-(4-isopropyl-3-keto-Δ^1-cyclohexenyl)vinyl]-**, and calcium salt, 3457^8.
Veratrine (*cevadine*), adrenaline discharge from injection into adrenaline medulla, 1862^8.
dissocn. const. for, 2108^6.
effect on adrenal, 3040^8.
on heart, counteraction by camphor of, 3193^8.
on tonus of skeletal muscle, 1859^3.
reaction with furfural-H_2SO_4, 1687^7.
Veratrole (*o-dimethoxybenzene*), condensation with aryl carbinols, 2849^8.
demethylation of, 2670^7.
phys. consts. of, solns. and addn. compds. of, 1786^2.
as preservative, 3712^8.
——, **3-allyl-**, 1798^2.
——, **4-allyl-**, 1798^2.
——, **6-allyl-3,4-methylenedioxy-**. See *Apiol.*
——, **4-bromo-3-(β-bromo-α-ethoxypropyl)-5,6-methylenedioxy-**, 3450^2.
——, **4-bromo-3-(β-bromo-α-methoxypropyl)-5,6-methylenedioxy-**, 3450^2.
——, **4-bromo-3-(β-bromo-α-propoxypropyl)-5,6-methylenedioxy-**, 3450^2.
——, **4-bromo-3-(α,β-epoxypropyl)-5,6-methylenedioxy-†**, 3450^3.
——, **4-bromomethyl-**, 405^6.
——, **3,6-diallyl-**, 1798^2.
——, **6-(α,β-dibromopropyl)-3,4-methylenedioxy-**, 3450^1.
——, **6-(α,β-epoxypropyl)-3,4-methylenedioxy-†**, 3450^1.
——, **6-(β,γ-epoxypropyl)-3,4-methylenedioxy-†**, 3450^1.
——, **4-methyl-**. See *Homoveratrole.*
——, **4-(o-methylbenzohydryl)-**, 2849^8.
——, **3,4-methylenedioxy-6-propenyl-**. See *Isoapiol.*
o-Veratroyl chloride, 1065^9.
Veratrum. See *Hellebore.*
o-Veratryl alcohol, 5-bromo-, 1792^9.
——, **5-nitro-**, 1792^9.
Veratryl bromide. See *Veratrole, 4-(bromomethyl)-*.
Verbascum thapsiforme, culture of, 3536^3.
Verbenene, pharmacol. action of, 1867^2.
Verbenone, pharmacol. action of, 1867^2.
Verodigen, effect on heart, 455^1.
transfer from blood vessels to tissues, 1469^5.
Veronal. See *Barbital.*
Veronal (?)-glucoside, tetraacetyl-*, 1596^2.
Vessels. See *Blood vessels; Containers.*
Vesuvianites, of Fichtelgebirge, 885^1.
from Russian deposits, 2966^7.
Vetch, copper in, 616^3.
decompn. of, 3056^5.
fat-forming power of, 3484^9.
infestation with *Aphis rumicis*, 2543^1.
nodules on, effect of B on, 62^2
nutrient soln. for, effect on anatomical structure of absence of B in, 2180^5.
proteins of, 2347^2.
Vetiver oil, 646^1, 2047^3, 3330^1.
Vibrio, *cholerae*—see *Cholera vibriones.*
percolans, filters for, 3481^5.
thermodesulfuricans, 219^5.
Vicia, *faba*—see *Vetch.*
sativa—see *Peas.*
Vicianose, from gein, 435^2.
prepn. of, 1632^4.
Vigna sinensis. See *Cowpeas.*
Vinasses, ammonia from, P 1493^2.
Vinegar, acidification of milk with, in infant feeding, 2005^9.
bacteria, generator capacity and optimum temp. for, 795^3, 2386^2.
chemistry of, 795^1.
dried-apple, 795^2.
dry residue of, detn. of, 633^2.
evapn. losses in quick-vinegar process, 260^6.
ext. of, detn. of, 1042^9, 3059^7.
fermentation, sp. gr. in, 2893^4.
fermented, manuf. of, 795^1.
formic acid in, 795^1.
generators of Frings, 260^8.
generator, temp. conditions in, 1684^7.
manuf. of, chemistry and physics in, 3059^7.
in Italy, 2716^7.
temp. of generator and effect on production in, 1300^7.
sugar in, detn. of, 633^2.
tannic acid in, detection of, 633^1.
wine, analysis of, 2386^8.
wine, manuf. of, 2716^7.
Vines, as feeding stuff, 2377^3.
Vinification. See *Wine.*
Vinyl alcohol, esters, manuf. of, P 3696^6.
esters, polymerization of, P 2333^6.
valency problem in, 1550^7.
Vinyl chloride. See *Ethylene, chloro-*.
Viola cornuta glucoside from, 2682^8.
Violanthrone, *bs*-**2,2-dibenzoyl-***, 3293^4.
Violanthrone-*bs*-2,2-dicarboxylic acid*, 3293^3.
Viola tricolor. See *Pansy.*
Violet, solid petrolic ether exts. of leaves of, 1689^9.
Violet oil, from leaves, 3780^4.
synthetic, 2847^7.
Violins, rosin compn. for bows, P 3827^2.
Violuric acid, ionization in, correlation of absorption spectra with, 708^7.
Violutoside*, 2682^8.

Virulence, chemotherapeutic activity and, 2879[8].
Virus. (See also *Antitoxins; Toxins;* and such headings as *Rabies.*)
filters for, 3481[3].
microörganisms of, 2344[1].
of pathogenic bacteria, 2688[9].
radium effect on filterable, 930[8].
Viscera, alkaloid detection in, 2175[6].
aniline detection in, in poisoning, 2175[7].
Viscometers, P 2[4], P 317[2], 2604[1], P 3364[5].
for abs. measurements, 3101[3].
air-bubble, 1543[8].
calibration of, of Vogel-Ossag, 1[6].
for ceramics, 1503[9].
as consistometers, 529[8].
as control instrument for dextrin industry, 1532[9].
falling-sphere, 124[4].
for higher temps., 3255[4].
for latex, 3096[8].
for oils, P 3364[6].
Ostwald, measurements with, and conversion to Redwood scale, 107[5].
for petroleum, 2408[4].
standardization of, 1[4].
torsion, 3699[1].
Viscose. (See also *Silk, artificial; Threads.*)
coagulating baths for, 2252[1].
compn. of, 2247[4].
dyeing of, 3351[8].
dyeing with insol. azo colors, "blinding" in, 3087[1].
effect of factors in caustic soda absorption of cellulose, 2247[8].
fibers, etc., from, P 3353[2].
filaments and films from, P 830[3,8], P 1722[2].
filaments, app. for manuf of, P 671[1,2].
filaments, etc., from, P 2253[6].
filaments from, P 3241[3].
as filler for textiles, 1325[9].
hollow articles from, P 3084[5].
industry, electrolytic alkalies and, 2460[9].
manuf. of, P 115[9], 293[9], P 830[4], P 1722[2].
manuf. of, sci. basis of, 2077[4].
plasticity of, 529[8].
prepn. of, 1526[8].
products from, P 1529[1].
properties of, 2247[4].
ripening of, 1719[8], 3078[9], 3087[4], 3819[5].
sausage casings from, P 3756[3].
solns. of, P 511[6].
spinning, P 1328[4].
from sulfite pulps, 3565[5].
sulfur dioxide in manuf. of, 3352[4].
as textile finish, 3819[5].
viscosity of, 2252[1].
wool-like fibers of, 1719[8].
Viscosimetry, methods of, 2105[8].
"Viscosine," refining of, noxious gases in, 1711[7].
Viscosity. (See also *Fluidity.*)
of acetates of metals, 854[2].
of ammonium oleate solns., 3605[9], 3606[4].
of binary mixts., relation to vapor pressure, 1012[7].

of solns. of org. substances in water, 3116[4].
of solns., relation to vol. of solute, 3616[4].
surface tension and, of liquids, 2267[4].
temp. coeff. of, mol. forces and, 3601[6].
theory of, 687[2].
vapor pressure and, 3603[9].
Vision, peripheral, application of theory of quanta to, 1638[9].
theory of, 428[5].
Vistra. See "staple" under *Fibers.*
Visual purple, elec. cond. of, influence of illumination on, 428[5].
Vital coloring. See *Staining.*
Vitallin, in eggs of *Hemifusus tuba*, 3515[1].
Vitamins. (See also *Avitaminosis; Beriberi; Bios; Coenzymes; Growth; Oryzanin; Pellagra; Scurvy; Xerophthalmia;* and "accessory factors" under *Food.*)
action in animal organism, 2371[4].
action of, point of, 1837[8].
adsorption of B and D, by colloidal $Fe(OH)_3$, 1652[4].
A, in beef, pork and lamb, 437[3].
in cheese, 3488[8].
chemistry of, 1653[7], 1816[4].
in foods, storage effect on, 1430[9].
metabolism and, 2186[6].
in nutrition of calves, 2188[3].
in oleo oil and oleostearin, 2356[5].
in poultry flesh and fat, 2882[4].

properties and physiol. significance of, 618[6].
in soy-bean oil, 1835[9].
antineuritic, 2005[8].
antineuritic, from yeast, 2354[3].
antirachitic, butyl nitrite effect on, 1654[2].
of cod-liver oil, 3027[9].
in fish liver, 2006[7].
fluorescence of oils contg., 1836[6].
in foods and medicines, development of, P 953[4].
antirachitic egg, effect of ultra-violet light on, 936[4], 1435[2].
antirachitic properties of purified rations in study of A, effect of ultra-violet light on, 3312[2].
antiscorbutic, in citrus species and in bananas, 2006[5].
effect of reducing agents on, 3025[3].
effect of ultra-violet light on, 1651[8].
egg yolk as source of, 2525[1].
in nutrition of calves, 1432[8].
Bacillus coli as synthetic agent for water-sol., 1644[8].
bacterial growth and, 2343[9], 3479[8].
bacterial growth and water-sol., 1643[7].
B, in corn kernel, 933[4].
deficiency of, manifestation in 2nd generation, 3720[3].
dual character of, 436[5].
in evapd. milk, 3180[6].
in excreta of rats on diet low in this factor, 224[4].
feather formation and, 3497[1].
of fruits and vegetables of P. I., 3180[2].
gastric motility and, 3488[5].
lactating rat's diet and, 1651[9].
of lemon rind, 1652[5].
metabolism and, 1433[1].
requirement of calf, 3719[7].
review on, 222[4], 933[3], 3312[8].
in rice and adlay, 1285[2].
in tikitiki ext., 63[6].
in blood, growth-promoting and antirachitic, 3024[9].
books: 1437[8]; in Diet and Health, 437[5]; Our Present Knowledge of the, 1098[1]; Vital Factors of, 1836[8].
in butter, effect of food on content of A, 3025[5].
in canned foods, 617[3], 1432[4].
as catalysts, 52[4].
C, in grass, 2693[2].
in milk (raw and pasteurized), 3717[4].
in nutrition of chickens, 1435[7].
of orange and tomato juice, effect of fermentation on, 1259[6].
in orange juice (com.), 2006[6].
in pineapple (fresh and canned), 2004[9].
classification of, 1651[8].
in cod-liver oil, 933[9], 1495[6], 2188[5], 3489[3].
cod-liver oil as source of, A, 3720[5].
in cod-liver oil, effect of high temps. on, 223[9].
color reactions assocd. with A, 1096[6], 3020[7].
compn. of A, 3720[6].
concn. of B, 224[5].
crystals of B, from mung bean, 1258[4].
deficiency—see *Diet*.
definition of, 1651[4].
desiccator for substances contg., P 3050[9].
detection of A, 215[8].
detn. of A, in cod-liver oil, 937[1].
differentiation of water-sol. growth-promoting, from antineuritic, 3312[5].
D, in germinating seeds, 224[3].
effect of A and C, on phosphate and Ca content of blood, 64[1].
effect of A, on absorption of foreign fats, 2187[8].
effect of B, on enzymes (digestive and tissue), 1834[8].
effect of B, on weight changes and vitamin storage in adult pigeons, 63[7].
effect of carriers of, on photographic plates, 3719[5].
effect of excessive amts. of B, on basal metabolism, 2525[4].
effect on development and metabolism of *Tenebrio molitor*, 1871[8].
effect on surface tension of water, 775[9].
of eggs, effect of chem. preservation on stability of, 1673[6].
E, existence of, 2525[2].
in milk powder, 3752[1].
reproduction on synthetic and milk diets and, 2693[7].
review on, 934[3].
fat-sol., 225[4], 1437[5].
biol. assay of, 1652[5].
maintenance of standardized breed of young rats for work on, 1652[6].
fat-sol. growth, 1431[3].
in feeding expts., 3025[4].
in feeding expts. with poultry, 775[6].
food rich in, P 3755[7].
foods contg., manuf. with addn. of liver oil, P 787[8].
in foods, effect of boric acid on, 3317[9].
in foods, testing, 1432[3].
formation by bacteria, 1645[5], 2003[1].
formation of A, during germination of seeds, 1432[2].
in fruit juices, 3179[5].
in fungi, 3311[9].
growth and, 2873[4].
growth-promoting, 222[8].
growth-promoting, in diet, 3487[4].
growth stimulation of *Aspergillus niger* by prepn. of B, 929[6].
heat-resistance of B, 1833[9].
in heat-sterilized food, 2526[4].
hydrogenated vegetable oil as source of E, 2525[3].
identification of, 3180[5].
inactivation of A, by rancid fat, 3181[4].
inorg. blood P and bone ash in rats fed on normal, rachitic and irradiated rachitic diets, 1433[4].
isolation of B, 1430[6].
in lemon peel, 225[9].
malt prepn. contg., P 644[5].
margarine contg., P 634[3], P 2377[8].
metabolism of fats, cholesterol and "steroids" in rats growing in presence or absence of A, 1097[2].
in milk, effect of Cu on potency of, 1286[4].
effect of diet and sunlight on A and D, 3180[1].
effect of elec. pasteurization on C, 3752[5].
effect of feeding cod-liver oil on content of, 620[1].
effect of irradiation on fat-sol., 1434[1].
effect of Jonas Nielsen sterilizing process on A, 3181[5].
effect of light and diet during production on, 3181[1].
effect of pasteurization on C, 619[8].
effect of ultra-violet light on A, 3027[2].

preserving, P 3050[9].
in milk (human), 933[1], 2187[9].
mixt. of substances rich in, with margarine, etc., P 1476[1].
molybdophosphotungstic acid reagent for, prepn. of, 3477[5].
mother substances of, 923[2].
mutton-bird oil and fish oil content of A, 3754[9].
nomenclature of, 62[9], 932[7].
in nutrition, 2353[5].
in nutritional and developmental disorders of childhood, 3487[8].
in nutrition of mice, 1835[8].
in orange juice (dried), preservation of C, 3312[8].
of papaya, 3025[8].
parenteral administration of A and D, 224[3].
in peas (canned), 934[8].
pepsin secretion and, 63[2].
photoactivation of A, by ultra-violet light, 1653[9].
prepn. of, P 480[6].
properties of, 2005[1].
quant. aspects of function of B, 223[3].
relation of factor P-P of pellagra and black-tongue to B, 1431[4].
replacement of A, by light, 1259[5].
for reproduction, 2186[4], 3488[4].
requirements of, relation to compn. of food, 62[8].
reviews, 933[2], 1653[1], 2693[8], 3180[5].
rickets as combined (B + C) avitaminosis, 1097[8].
secretion of A, through skin, 1834[7].
sex differences in requirements of B, 1430[6].
soaps, 3356[6].
soly. of B, in C_6H_6, 2522[4].
source of A, in nature, 2525[8].
source of B, in nature, 2525[7].
standardization of, 2046[9].
storage of A, 2005[4].
storage of A, by young white rats after feeding horseflesh to mother, 616[9]
in string beans, effect of H-ion concn. and heat on B, 2710[6].
study of, 2693[4].
albino rat in, 3720[8].
through enforced crystn., 3366[1].
study of B, 617[4].
teeth development as influenced by balance of Ca and, C and D in diet, 3717[8].
testing for A, 1651[6].
theory of, 3311[7].
tissue growth and, 2524[4].
in tomatoes (fresh and preserved), 2693[3].
in vegetables, 2029[6].
in velvet bean, 1437[2].
X, in foods, 2693[4].
in yeast, 224[2], 936[6], 3027[7].
effect of piperazine and its derivs. on, 3311[5].
existence previously in culture medium, 3027[8].
yeast prepn. rich in, P 1493[3].
Vitasterols, 63[1].
Vitellase, 2867[4].
Vitellin, 2867[4].
pepsin action on, 3174[4].
Vitellogen, 2867[4].
"Viterbite," from Santa Rosa deViterbo, Boyaca, 3668[7].
Viviatine, and salts, 3159[1]
Vitis. See *Grapes*.
Vitrain, 2239[4].
in coal, 1704[9].
decompn. of, 2573[1].
humic nature of, 1312[5].
Vitreosil, crucibles for detn. of volatile matter in coal, 3795[6].
Vitreous humor. See *Eye*.
Vivatex, mildew-proofing with, 2909[7].
Vivianite, in blue wood, 2132[9].
compn. of, continuous change in, 1011[7].
from Rodna Vecche, 3409[7].
Viviparus. See "pond" under *Snails*.
Volatility, detn. of, of org. materials, 3602[4].
of mixed gas components, 696[6].
Volcanoes. (See also *Lava; Rocks*.)
alkali sulfite in products of Vesuvius during normal activity, 2806[8].
ash, effect on port. cement, 1895[6].
ash from, of Acatenango, Guatemala, 564[4].
calcite-rich bombs from limestone of Oberscheld, 1046[4].
cesium compds. in products of Vesuvius, 2969[3].
ferrous chloride in products of Vesuvius during normal activity, 2806[7].
lead sulfobismuthite from, 1044[5].
potassium fluoborate bearing Cs in products of contemporary activity of Vesuvius, 3275[6].
Santorin, 564[5].
Santorini eruption of 1925, 3673[3].
Santorin, spectrum analysis of flames from, 1375[1].
slag from, hygroscopic water in, 3275[9].
sylvite from eruption of Vesuvius in 1906, Br and Tl in, 2806[7].
Volta effect. See *Potential, electric*.
Voltage. See *Potential, electric*.
Voltaic cell. See *Cells, voltaic*.
Voltameters, 150[4].
Voltmeters. See *Millivoltmeter*.
Voltol, 281[8].
Volume. (See also *Specific volume*; "free" under *Space*.)
changes in dissoln., theory of internal pressure and, 2931[1].
co-. See *Covolume*.
of gases, tables for calcn. of, 1122[5].
Volumenometers, 127[6].
Volumetric analysis. See *Analysis*.
Volumetric apparatus. See *Burets; Flasks; Pipets;* etc.
Voluntal, compd. with pyramidone, 1686[5].
Volutin, in yeast cells, 794[9].
Volvox aureus, reproduction rate of, effect of light on, 1649[1].
Vomiting, acetonemic, Ca lactophosphate in, 3741[8].
in ammonia elimination, 2358[9], 3490[9].
apomorphine, antagonism of trichloroisobutyl and trichloroisopropyl alcs. to, 3512[3].
effect on blood serum electrolytes, 1107[7].
emetic action and, 2205[9].
in pregnancy, 3032[8].
in pregnancy, effect of changes in blood and blood sugar during, 1264[3].
recurrent, etiology of, 2704[1].
from *k*-strophanthidin in cats with denervated hearts, 1869[6].
Vucine (*isoöctylhydrocupriene; Vusine*), disinfection with, effect of H-ion concn. on, 2688[6].
effect on dehydrogenases of muscles, 3466[1].

meningitis treatment with, 3713^{4}.
Vulcanization. (See also *Rubber; Tires.*)
of oils for varnishes, P 513^{3}.
Vulcanized fiber. See *Fibers.*
Vulcone, action of, 843^{3}.
Vulpic acid*, constitution of, and derivs., 2849^{4}.
——, p,p'-**dichloro-*,** 2849^{6}.
——, p,p'-**dimethyl-*,** 2849^{5}.
Vuzine. See *Vucine.*

Waals, van der, equation. See *Condition equation.*
Wad, from Waderalpe, Tyrol, 884^{6}.
Wagner reaction, cooling system for, 2979^{7}.
Walden inversion, 577^{6,7}, 1601^{1}.
effect of solvent on, 2848^{3}.
of α - 1 (and 2) - naphthoxypropionic acid and derivs., 1617^{5}.
Walking, energy expenditure of women during, 229^{7}.
Wall board. See *Building materials.*
Walls, plastic compn. for, P 2567^{3}.
rubber coverings for, P 519^{6}, P 1730^{9}.
rubberized fiber compns. for, P 3247^{4}, P 3362^{8}.
Walnut, antagonism to plants, 931^{4}.
bark of, chemistry of, 3022^{9}.
drying app. for, P 1476^{2}.
trees, hydrostatic system of, 3177^{9}.
Walnut oil, compn. and I no. of, 3829^{2}.
Warburg, Emil, biography, 1541^{7}.
Warfare, books: Der Gaskampf und die chemischen Kampfstoffe, 464^{9}, Medical Aspects of Chem., 1822^{6}.
chlorine in, 955^{3}.
with gas, chem. industry and, 249^{2}.
raw materials for, 2749^{4}.
War gases. See *Poison gases.*
Warthaite, from Hungary, 3409^{8}.
Wash bottles, non-spattering, continuous stream, 2433^{8}.
valve for, 128^{1}.
Washing apparatus. (See also *Scrubbers.*)
for air, P 1732^{4}.
for artificial silk, P 2253^{4}.
for coal, P 3345^{6}.
for cotton or woolen fabrics, P 1528^{8}.
for gases, 1^{3}, P 681^{5}, 1539^{6}, P 1710^{5}, P 2099^{2}, 2905^{1}.
for metal articles, etc., P 3682^{7}.
for precipitates, 2921^{2}.
spray head for, 522^{6}.
for zeolites, etc., P 848^{4}.
Washing compositions. See *Cleaning compositions.*
Wasps, poison of, 1465^{7}.
Wassermann reaction, 1270^{1}, 1454^{7}.
antigen in, effect of heat on heart ext. used as, 1660^{6}.
antigens for, 782^{5}.
benzochol exts. in, 1269^{7}.
blood serum changes which det., 3732^{7}.
in blood serum filtered through collodion sacs, 1108^{6}.
dry complement in, 1268^{7}.
effect of gonococcus protein injection on, 2022^{9}.
globulin effect on, 1661^{6}.
hydrogen-ion concn. as factor in, 1660^{4}.
Röntgen, Ra and ultra-violet rays in, 1267^{9}.
surface tension in, 1446^{9}.
in tuberculosis, 66^{7}, 2196^{2}, 3501^{3}.
tuberculosis antigen, 1268^{9}.
Wassermann substance and antibodies in, 3503^{1}.
Wastes. (See also *Acids; Flue gas; Fuels; Heat; Molasses; Paper; Paper pulp; Pomace; Sewage; Sugar, manufacture; Sulfite liquor; Water, pollution of;* and "reclaiming" under *Rubber* and "slop" under *Distillery.*)
acid waters from metallurgical plants, treatment of, 3440^{5}.
alkali recovery from, app. for, P 1523^{1}.
in ammonia manuf., treatment and disposal of, 981^{6,7}.
animal, detection of leather in fertilizers from solubilized, 2042^{1}.
from artificial silk manuf., NH_3 recovery from, P 671^{1}.
from artificial silk plants and mercerization processes, purification of, 3818^{7,8}.
asphalt reclamation from, app. for, P 818^{1}.
in bleaching, elimination of, 2077^{2}.
in brewing, app. for dewatering, P 2046^{3}.
briquetting of, 3553^{9}.
carbide residue from C_2H_2 generators, utilization of, 647^{7}.
caustic hydroxide recovery from solns., app. for, P 1341^{1}.
from caustic plant, control of, 2050^{6}.
chlorine in treatment of, 1126^{1}.
citrus, as binder for powd. fuels, 2376^{2}.
from coal distn. plants, 813^{8}.
dairy, purification of, 959^{6}.
disposal, electrolytic cond. and H-ion control of, 467^{6}.
disposal of, 1876^{9}.
domestic, problem of, 3765^{3}.
domestic, removal, treatment and utilization in France, 3765^{2}.
dye and textile, lime in treatment of, 668^{4}.
dye works, water, 2585^{4}.
fermentation of, app. for, P 3250^{9}.
from fermentation of beet molasses, electrolytic treatment of, P 675^{9}.
as fertilizer, 1486^{4}.
fish and slaughterhouse, salvage of, 3054^{7}.
fish, app. for cooking and digesting, P 2034^{8}.
industrial, analyses of, 3765^{3}.
control of, 2381^{4}.
creosote taste in water from, prevention of, 3765^{4}.
disposal of org., 3765^{3}.
O-demand test and, 84^{5}.
water supply and, 3765^{8}.
lime treatment of, 1876^{9}.
liquids, preheating and spray desiccation of, P 249^{7}.
liquors, deodorizing and disinfecting action of NaOCl on, 3054^{1}.
metalliferous, treatment of, P 574^{6}.
mine and domestic, treatment of, 2636^{8}.
mordants from, 3817^{7}.
from packing houses, app. for reducing to grease and tankage, P 463^{7}.
from packing houses, treatment of, 1292^{1}.
phenol-bearing gas, elimination of, 2405^{7}.
potash liquor, consumption of soap in use of water contg., 2713^{3}.
protein, foods from, P 3756^{2}.
recovery and use of, 634^{6}, 955^{5}, 2888^{8}.
review, 3756^{9}.
silk crop, recovering silk from, P 511^{4}.
in tanning, recovery and use of, 1728^{1}.
tanning, treatment of, 3096^{3}.
treatment of, 3525^{9}.

treatment of household and street, P 3202^{9}.
in varnish and paint industries, fire hazard of, 116^{6}.
water, clarification and decolorization of, P 2553^{1}.
clarification by OMS process, 466^{7}.
clarification, sterilization and filtration of, 3053^{4}.
N loss during purification of, 1879^{1}.
wood—see *Sawdust; Wood.*
wool, mixing with grease, P 515^{7}.
wool wash waters, ultra-filtration of, 827^{6}.
Water. (See also *Dehydration; Drying; Heat of wetting; Emulsions; Humidity; Milk, analysis; Steam;* and the following headings.)
absorption from air by soils, 3766^{7}.
absorption of, by barley seeds, 3715^{3}.
by brain tissue, effect of adrenaline and thyroxin on, 3505^{4}.
by central nervous system tissue, 1839^{3}.
by cottons of various origins, 1326^{6}.
by fibers, 2747^{2}.
by hydraulic cement during storage, 1703^{1}.
by rubber, 842^{8}, 2092^{7}.
by soils, 639^{4}.
by stretched and relaxed muscle, 3499^{1}.
absorption of high-frequency radiation in, 2790^{2}.
absorption of β-rays by, 3127^{9}.
accumulation on glass, prevention of—see "moisture, etc.," under *Glass.*
acetone mixts. with, properties of, 1011^{6}.
adsorption of, 1739^{6}.
adsorption of, by charcoal prepns., 1009^{4}.
air in pure and alk., 3613^{8}.
in animal organism during hibernation, 937^{6}.
anticatalytic action of, in esterification, 536^{2}.
balance, effect of euphylline diuresis on, 1464^{5}.
balance in blood plasma, effect of plasma proteins on, 1440^{6}.
balance, psychic modification of, 1837^{3}.
blood diln. after ingesting, 938^{1}.
brix-free, detn. in cane, 2918^{3}.
bubbles in, surface phenomena of, 2605^{5}.
as catalyzer in explosions of mixts. of CO and O, effect of infra-red emission on, 2952^{9}.
as catalyzer in polymerization of CH_2O, 2816^{7}.
in coal as component of volatile matter, 275^{5}.
colloidal, 2101^{9}.
compressibility of mixts. with AcOH, 1014^{1}.
condensate, return device for, 2599^{6}.
condensation from air on hygroscopic crystals, 2103^{9}.
condensation in the ground, 791^{5}.
Congo red color change in acidified acetone-, solns., 3620^{4}.
of constitution, distinguishing H_2O of crystn. from, 142^{3}.
crit. soln. temp. of mixts. of acrolein and, 3121^{8}.
density and mol. wt. of, 3600^{5,6}.
detection in proteins, 3019^{1}.
detection in solids, 3374^{4}.
detection of added, in fruit juices, 632^{9}.
detection or detn. of added, in milk—see *Milk, analysis.*
detn. of, 1575^{9}, 1576^{1}, 2130^{3}, 2964^{2}.
app. for, 1340^{4}.
in Bi nitrates, 559^{9}.
in bread, flour, etc., 73^{7}.
in casein, 3783^{4}.
in ceramic products, 3546^{3,4}.
in cereals, 3317^{6}.
in cereals, etc., P 3200^{9}.
in cheese, 3197^{9}.
in cloves, 1494^{3}.
in coke, 2576^{6}, 2905^{9}.
in cotton seed, 1914^{2}.
in creosote, 3549^{9}.
in crystals, 137^{2}.
in dextrin, 2258^{6}.
in dried milk, 3198^{1}.
in eggs, 246^{3,4}.
in fibrous materials, 2130^{4}.
in fir-needle ext., 3061^{1}.
in flour, 73^{6,7,8}, 75^{2}, 3751^{1}.
in flour and grain, 460^{9}.
in food products, 2211^{1}.
in gases, app. for, 2097^{6}.
in gas mixt., 1368^{7}.
in gas oils, methods of A. S. T. M. for, 954^{8}, 1121^{7}.
in glue (liquid), 676^{5}.
in grain, flour, meal, etc., Brown-Duvel app. for, 1340^{3}.
in honey, 1118^{7}.
in hydrocarbon oils, shales and lignites, 1317^{4}.
in leather, 123^{2}, 3359^{4}.
in lignite, 2738^{6}.
in Li minerals, 724^{8}.
in malts, 794^{7}.
in meat ext., 3048^{9}.
in metals, 1193^{5}
in mixts. with acetone and EtOH, 1370^{8}
in oils, 1914^{1}.
in oils and fats, 659^{7}.
in oils, foods, etc., app. for, 2433^{5}.
in paper, influence of moisture of air on, 289^{4}.
in paper pulp, elec. oven for, 1323^{3}.
in petroleum, 3229^{7}.
in seed, 2213^{2}.
in sheep dips, 963^{8}.
in sirups and molasses, 2088^{8}.
in soap, 2223^{4}.
in sodium oxalate, 3406^{6}.
in sugar-house products, 2259^{3}, 2592^{2}.
in sulfur dioxide, app. for, P 3250^{7}.
in tannery materials, 3095^{6}.
in tar, 658^{2}.
in tissue, 3306^{8}.
in trass, 2737^{7}.
in wheat and flour, 1675^{4}.
detn. of added, in grape juice, 77^{5}.
dielec. const. of, 864^{5}.
dielec. const. of, change with temp., 3602^{7}.
diffusion of, 2607^{5}.
diffusion of, through membranes, effect of surface-active substances on, 3605^{1}.
dissocn. of, 3390^{1}.
distn. app. for, 679^{4}.
distn. app. for, with thermostatic regulator, P 3593^{4}.
distd., CO_2 content of, 3613^{8}.
pure neutral, 1929^{8}.
toxic action on plants, 1682^{4}, 2350^{6}.
distribution of a mixt. between AmOH and, and between Et_2O and, 1745^{4}.
distribution of HCl and picric acid between C_6H_6 and, 2607^{8}.

distribution of HCl and H_2SO_4 between phenol and, 1023[8].
distribution of pyridine between C_6H_6 and, 537[6].
diuresis, phosphate excretion during, 1657[6].
dust-free, prepn. by distn., 3002[4].
economy, effect of insulin and pituitrin on, 3512[7].
effect on acid-base equil. in blood, 1843[4].
  on aluminous cements, 3792[7].
  on anhydremia, 1849[7].
  on diuresis, 1855[2].

  on reaction of C_2H_4 and Cl_2, 1744[8].
  on reaction velocity of NO with O, 3373[2].
  on soly. equil., 1164[7], 1550[4].
  on soln. equil. of traces of, 137[1].
  on viscosity of MeOH, 3616[5].
elec. transport of, electroendosmosis and, 1350[8].
electrolysis of, 20[5], P 1762[5], P 2462[7].
  cells for, P 341[2], P 1567[9], P 3136[6], P 3270[9], P 3397[3], P 3650[7].
  effect on metals immersed in the water, 3262[1].
electrolytic, corrosion by, 2446[9].
electrolytic transport of, in alkali chloride solns., 3117[8].
emulsion in oils, use of gum dammar for, 320[9].
equil., 3626[3].
equil.: $NiO + H_2 \rightleftarrows Ni + H_2O$, 1937[8].
equil. with H_2O vapor, effect of presence of air on activity coeff. of, 2111[9].
evacuation of, 2264[8].
evapn. into air, temps. of, 1676[9].
evapn. of, effect of surface films on, 855[4].
evapn. rate of, adsorbed by surface of metals and of their oxides, 3111[6].
exchange between salts and, by blood and tissues, 1096[5].
exchange, heat regulation and, 778[8].
excretion of, by frogs submerged in water, 72[1].
  in oxalate nephritis, 238[8].
  through skin, reduction by reducing fluid intake, 625[2].
expansion coeff. and free space, 3595[7].
in expired air, effect of heat on, 2361[8].
fall of particles in still, cinematograph in study of laws of, 3369[3].
films on, 134[5].
films on salt solns., structure of, 1738[6].
heaters, thermoregulator for, P 317[3].
heat losses from surface of, ratio of conduction and evapn., 3122[3].
heat of adsorption on SiO_2 and on Pt, 3367[8].
heat of mixing, with acetic acid and with isopropyl alc., 3630[4].
heat of wetting of active charcoal with, 3630[2].
hydrogen-ion concn. of, 854[5].
hygroscopic, in volcanic slag, 3275[8].
interfacial tensions between org. liquids and, 2927[6].
ion activity-coeff. of, 1935[9].
ionic activity product in mixts. with glycerol, 1162[2].
ionization from spraying, 1353[4].
ionization in LiCl solns., 859[8].
ionization in KBr and NaBr solns., 3372[2].
kinetic phenomena on surface of, 1930[9].
in leaves, carbohydrates and, 2183[4].
loss through osmosis, effect on function of nerves and muscles, 442[8].
luminescence of, subjected to gamma radiation, 3381[2].
metabolism, 1450[6], 1837[5], 3492[7].
  in ameba, 3516[1].
  central regulation of, 2532[9].
  in diabetes mellitus and effect of insulin, 1265[3].
  effect on sp. dynamic action of carbohydrates, 947[1].
  kidney function and, 2194[9].
  in nephrosis, effect on urinary H-ion concn., 1659[7].
  in pregnancy, 779[9].
  reticulo-endothelial system and, 1661[9].
mixts. with EtOH and BuOH, 3[8].
mixts. with MeOH and C_6H_6, miscibility, ds. and refractive indices of, 2607[4].
mol. assocn. of, 3603[3].
in muscle and liver, effect of insulin and of pituitrin on, 3728[2].
in muscle (striated), variation of content of, 2870[1].
in neoplastic tissues, 1662[7].
nucleus formation in supersatd., 1928[3].
oil on, spreading velocity of, 3604[7].
oil sepn. from, app. for, P 1713[9].
in organs during fever, 3033[2].
in paper pulp, sampling and testing for, 2070[1].
in perspiration, 2532[1].
polymerization of, 3116[4].
in potato, variation during growth and storage, 434[5].
reaction of neutral and of distd., 1014[6], 1928[3].
reaction velocity with amalgams of Na and Zn, 1017[2].
reaction with CO, Pd as catalyzer in, 1017[8].
  with NaH_2PO_2, Pd as catalyzer in, 2272[8].
  with S_2Cl_2, 2274[3].
  with Tl or Na, 2111[2].
  with Tl or Na, thermochemistry of, 3123[2].
reduction by $Fe(OH)_2$ or $FeCO_3$, Pd salts as catalyzers in, 1017[6].
resorption from subcutaneous tissues, nephrosis and, 2200[6].
resorption of, frog membrane as organ of, 443[2].
role in acid-base equil. of blood, 3721[7].
satn. pressure of, relation of temp. to, 3633[7].
sepn. from compressed gases, filter for, P 3592[8].
sepn. from gas and oil, P 1713[9].
separator for gas, oil sand and, P 662[6].
separator for high-pressure steam, 3363[4].
in silicic acid hydrogel, replacement by alc., 2438[9].
in soap gels, constitution of, 1550[6].
soil moisture—see *Soils*.
solid solns. of O and, 1011[7].
soly. (mutual) of phenol and of BuOH and, 1743[2].
soly. (reciprocal) of monoalkyl ethers of ethylene glycol and, effect of temp. on, 1347[8].
solns. in EtOH and MeOH, viscosity and d. of, 3616[8].

specific heat of homogeneous phases involving, 3631[9].
spectrum of, 700[8], 1951[9], 2455[1].
spreading of solids on, 1544[7].
spreading on Hg, 1738[1].
suction force of soil for, measurement of, 2219[8].
as surface-active material, 2770[9].
surfaces, photoelec. effect of, 3129[2].
surface tension of, 2437[7], 3110[5].
  detn. of, 1008[6].
  effect of vitamins on, 775[8].
  time variation of, 2267[8].
  viscosity and, 2267[8].
synthesis of, Al_2O_3 as catalyst for, 691[9].
  catalysis at high temps. by metals and alloys inactive at room temp., 691[2].
  catalysis by ions of inert gases, 702[4].
  catalysis by metals of Fe group and their binary alloys with Pt group metals, 5[6].

lime for, specifications of A. S. T. M. for, 1121[4].
at Liverpool, 3525[2].
at London, 3202[4].
at Louisville, 466[9].
at Lucknow, 249[9].
at Manchester, 3202[5].
manganese removal, 3052[9].
metallurgical problems in, 3202[6].
at Miami, Fla., 253[3].
military needs of, 1482[1].
at Montreal, 1125[9].
mud balls, compn. of, 466[9].
natural, in Ohio and Illinois rivers, 636[9].
in Ohio, 1480[4].
oil removal from boiler-feed, P 1482[2].
oil sepn., app. for, P 1340[8], P 1515[2], 1540[5], P 2922[8].
at Omaha, 956[7].
at Ontario, Canada, 2888[9].
at Orlando, Fla., 2216[2].
oxidation and re-aeration, 1123[4].
oxygen in, rate of soln. of, 1679[2].
oxygen removal, 2216[8], 3680[7].
with ozone, app. for, P 1482[2], P 3103[1].
phenol taste and odor prevention, 1123[8].
phenol taste, excess Cl treatment of, 1122[9].
for plantations, 3053[5].
plant design and operation, 253[2], 637[2].
with potassium permanganate for poultry, 252[3].
prechlorination at Ironton, Ohio, 3524[6].
proportioning chemicals for, app. for, P 3102[8].
pulverized fuel in water-works plants, 3758[3].
for railroads, 466[5,6], 3758[4].
Chicago and Northwestern, 2885[7].
future development of, 2887[8].
Illinois Central, 2885[9].
Lackawanna, 466[2].
Missouri-Kansas-Texas, 466[3]
Norfolk and Western Ry., 2886[8].
Rock Island lines, 957[4].
recarbonation of lime-soda-softened water, 3524[7].
"red water," treatment with lime, 637[5].
reviews, 957[2], 1877[1], 3523[3], 3758[3].
scale-forming ingredients of boiler-feed, sepn. of, P 1679[4].
of sea water, P 3526[7].
sedimentation and sepn. of oil, app. for, P 2433[9].
settling basins, 2217[1].
for small cities, 2886[5].
softening, 466[1], 957[3,6], P 960[3], 1876[6], 2636[5], P 3055[1].
advantages of, 1479[7].
app. for, P 2218[2], P 2381[7], 2886[7].
with Ba silicate, P 1482[2], P 3526[6].
base-exchange filter for, P 638[9].
with base-exchange material, app. for, P 85[1].
base-exchange materials for, prepn. and comparative performance of, 251[8].
base-exchange methods of, 1479[4], P 3256[6], P 3526[8].
British practice in, 637[4].
chem. supervision of, 790[5].
doucil as material for, 251[9].
for laundries, 466[8].
lime in, 1123[9].
permutite process, 3524[6].
for railways, 2886[9].
reagents for, P 2381[6,7].
treating alumino-silicate minerals for, P 790[9].
zeolite or base-exchange plants for, 1678[5].
with zeolite, plant for, 2217[1].
with zeolites, 637[5], 3758[4].
with zeolites, testing progress of, P 2552[5].
zeolitic materials for, prepn. of, 2380[2].
sterilization by "ferrochlor," 790[1].
storage period and microörganisms in reservoirs, 1125[5].
at Stuttgart, Wurtemberg, 253[6].
in swimming pools, 255[7,8], 638[6], 3053[7].
at Tallin, Esthonia, 1124[7].
at Tampa, 1124[5].
tech. supervision of, 3758[2].
for textile mills, 466[6], 2217[3].
at Toronto, Ohio, 1123[3].
on vessels in U. S., 82[3,5].
at Walton on Thames, 3524[8].
at Washington, D. C., 3052[7].
Water blue, sensitizing to insulin with, 1817[6].
Water cress, effect on metabolism, 1868[2].
Water gas. See *Gas, illuminating and fuel.*
Water glass. See *Sodium silicate.*
Water hyacinth, food from, P 633[9].
paper-making qualities of, 3811[2].
"self-sized" sheets or webs from, P 3338[2].
Water of adsorption, transformation of water of hydration into, 531[2].
Water of crystallization. See *Water of hydration.*
Water of hydration. (See also *Hydrates.*
of cryst. compds., 1344[7].
detn. in trass, 2737[7].
distinguishing, from H_2O of constitution, 142[3].
mol. vol. of, 1343[7].
soly. in relation to, 688[9].
transformation into water of adsorption, 531[2].
Water pipes, capacities of, calcn. of, 2036[6].
cast Fe (De Lavaud), 3759[9].
cement-lined cast-Fe, 3053[9].
corrosion of, 166[8], 467[5], 1124[3], 1381[1].
effect of "hot wall" in, 1211[5].
prevention of, 3439[1].
by red water, 3052[8].
of 2 metals, reducing, 2649[2].
by water contg. NH_3, 1211[8].
design, construction and maintenance of, 2888[1].
elec. welded, 958[2].
flow in, 2888[2].
friction losses in, detn. of, 2888[2].
iron deposits in, prevention of, 1125[8].
iron incrustation in, from algae, 467[4].
leakage tests of cast-iron, 957[8].
pressure drop detn., 1481[6].
of reinforced concrete, 253[8].
renewal at Lowell, 957[9].
St. Paul conduit, 789[5].
small service, 467[2].
steel for, shipped flat, then rolled and welded, 958[2].
sterilization after laying, 957[8].
wood, life of, 3759[4].
Waterproofing. (See also *Coating(s); Dopes.*) 266[9].
bituminous emulsions for, P 663[1,2].

bituminous substances for, methods of A. S. T. M. for testing, 1121[8].
of cement, P 489[3,5,4].
cement mixts., etc., with rubber latex, P 3793[6].
of cinematographic films, etc., P 877[8].
coatings, 116[8].
compns. for, P 1697[1].
of concrete, P 3070[3], P 3552[2], P 3793[6].
agent for, P 3794[1].
soap in, 1506[7].
of conduit of fibrous material, P 2052[6].
of cordage, P 3241[1].
of fibrous materials, P 511[7], P 3224[1].
of films and filaments, P 1324[2].
of filter paper and fabrics, Cr compd. for, 2626[1].
of gloves, compn. for, P 2052[6].
of leather, cloth, etc., compn. for, P 2052[5].
of lime, compn. for, P 3552[3].
of matches, P 1717[5], P 3816[4].
materials for, specifications of A. S. T. M. for, 1121[5].
mortar with siliceous material, 2237[8].
of paper, 289[5], P 290[1], P 1905[7], P 3084[9].
of paper board, P 2248[7].
of paper board, bentonite in manuf. of compd. for, 2411[6].
of paper, etc., P 3216[6].
of paper or fiber board, P 3237[1].
paste for, P 3544[5].
resinous compn. for, P 3242[5].
of shade fabric, P 2588[6].
of silk or other fabrics, P 2080[2].
soap for, P 489[6].
specifications for, 3551[6].
of stone, wood, roofing felt, etc., bituminous emulsion for, P 811[1].
of straw hats, etc., P 511[8].
of textiles, 294[6], 507[3], 1720[9], 3574[9].
of wallboard, etc., from cornstalks, app. for, P 3552[6].
of wood, P 3224[6].
of wood, concrete, etc., P 1508[3].
wood tars in, 3803[1].
Waterproof materials, for clarifying transparent surfaces, P 3544[2].
for roofing, etc., P 1508[1].
Waters, natural, activity of surface, horizontal and vertical regions of, 465[9].
alkali, effect on concrete, 2236[5], 2400[9].
alk. mineral, from Neuenahr, effect on C:N ratio in urine, 3726[5].
analyses of, 565[1].
antimicrobial properties of river or sea, 1291[7].
artesian, salinity of Belgian, 465[7].
artesian wells of Christchurch area, 3523[6].
atm. reaeration of sewage polluted streams, 638[2].
bacilli in, morphological comparison of *B. typhosus* with, 432[6].
bacteriophages in surface, 1125[8].
books: Deterioration of Structures in Sea Water, 271[9]; Wasserversorgung und Brunnenbau, 638[8]; La concentration en ions hydrogene de l'eau de mer, 1025[9]; Die Mineralquellen und Kurmittel des Iodbades Tölz mit bes. Berücks. ihrer Anwendungsweise, 1292[8]; Étude sur les eaux sulfureuses de Pietropola-les-Bains, 2037[1].
bottled, compn. of imported, 1481[4].
breakdown of cement gallery by, 2737[8].
colloidal, of Red Sea at Witzenhausen on the Werra, 2887[1].
corrosion by, and H-ion concn., 573[2].
of Danzig vicinity, 2474[9].
of Dead Sea, eka-Cs and eka-I in, 2923[2].
geophys. methods in studies of, 1971[2].
ground, Darcy filtering law and flow of, 133[9].
ground, judging of, 2886[9].
hydrogen-ion concn. of, of Norwegian mts. and its bearing on classification of fresh-water localities, 2349[9].
hydrogen-ion concn. regulation by fresh water algae, effect of CO_2 on, 1647[2].
impurities in, 3762[2].
of Joliet quadrangle, 2634[2].
of Karelisch Isthmus, 887[4].
lake, NH_3 and nitrate content of, seasonal variations in, 2887[3].
of Lake Epecuén, compn. of, 2379[4].
of Lake Eyre and dist. (Australia), 1876[5].
lake, org. content of, 3323[3].
mine, of Ducktown dist., Tenn., 3411[6].
mineral, analyses of Agnano, 1125[2].
of Basilicata, 2474[6].
biol. properties of, 438[9].
of Carlsbad, diuresis tests with, 1854[9].
of Cheea, 3052[9].
of Courmajeur, 2132[6].
effect on building materials of carbonated and iron-bearing, 271[7].
of Hammam baths of Ouled Ali, radioactivity and chem. compn. of, 2784[6].
in Hungary, 3670[8].
hydrogen-ion concn. detn. in, 3053[1].
of Saint-Gervais-Les Bains le Fayet, 250[8].

of oil fields in Ventura Co., Calif., $CaCl_2$ in, 1199[4].
of oil field, sulfate reduction by bacteria in, 887[4].
in oil wells, elec. app. for locating source of, 1318[8].
protection of underground, 251[4,5].
quality of, biol. indicator for, 637[6].
radioactive P-As-Fe-sulfate springs of diadochite caves of Saalfled in Thüringen, 1174[1].
radioactive springs of Puy-de-Dôme, 3638[1].
radioactivity of mineral, of Hammam Meskoutine (Algeria), 702[4].
radioactivity of, of springs of "La Toja" baths, 2944[8].
of springs of Puy-de-Dôme, 2944[9].
of thermal spring of Chaudfontaine, 789[7].
rain, analyses of, effect of bird droppings on, 251[6].
compn. of, 2379[2].
impurities in, 256[4].
N compds. in, 257[6].
as N fertilizer, 1488[2].
sol. constituents of annual, 3526[4].
of Roselles, Groseto, 2474[7].
saline, Br extn. from, 3540[8].
of Nauheim baths, origin of, 2806[5].
of southern Palestine, 2303[1].
salt content of Colorado River, 3758[6].
of Salt Creek oil field, Wyo., 2579[9].
salt dome, chem. relation of, 1290[8].

salt mass of, of Sosnevskaya factory, Ivanovo-Vosniesensk, 1374[8].
of Santa Fe Springs Field, Calif., 1291[8].
sea, Ca and Mg pptn. from, 3703[9].
corrosion of alloys by, 1202[2].
corrosion of ferrous metals by salts in, 3151[4].
deterioration of structures in, 3792[6].
distn. app. for, P 2599[8].
effect of salinity of, on fish, 1282[7].
evaporator for, P 1732[4].
freezing point in contrast to that of blood of *Ascidia mentula*, 2026[5].
H-ion concn. of, regulation of, 2025[7].
ions in, effect on invertebrates, 1281[6].
nitrification in, 1423[9].
oxidation in, 1997[9].
as perfusion fluid for heart, 3725[8].
pharmacol. action on blood, 2367[4].
phosphate content of, in relation to growth of algal plankton, 3715[4].
K and Mg salt extn. from, 3213[2].
purifying, P 3526[7].
salt removal from ice from, 1164[4].
NaCl manuf. from, 3540[2].
of S. Venera, compn. of, 1480[1].
sweet ice from, 6[7].
from shell holes, irritant poisons in, 252[3].
silica and iron in river and sea, 1373[8].
silicic acid in, chem. form of, 1481[1].
spring, contg. CO_2 and H carbonates, amylase activation by, 2505[1].
spring, contg. H carbonates, activation of invertase from beer yeast by, 2505[2].
springs (fissure) of Balcones Fault zone, colon bacteria in, 1481[5].
springs (hot) in Madagascar and in Réunion, compn. of spontaneous gases from, 1970[7].
springs (hot) of Gastein and Karlsbad, Ra content of, 2278[8].
of springs (hot) of Nasavusavu, 2806[6].
of Strait of Messina, 3275[9].
sub-surface, of gypseous zone near Chieri, Torino, 2132[7].
sulfate, effect on concrete, 2056[4].
resistance of alumina cements to, 2237[2].
significance in locating salt domes, 1290[9].
sulfuretted mineral, effect on respiration, 3507[3].
sulfuretted mineral, tolerance to, 2203[4].
thermal, of Aix-les-Bains, Savoy, 1199[5].
thermal, of Capvern, analyses of, 1480[2].
transparence to ultra-violet rays, 251[1].
well flow measured by pitometer checked by orifice, 956[9].
well, iodates in, 1480[9].
Water-soluble B. See *Vitamins*.
Water vapor. (See also *Steam*.)
adsorption on quartz surfaces, 3367[8].
capillary condensation and adsorption on hydrated oxides, 3110[7].
effect on concrete products, 3340[7].
on decompn. velocity of NH_3, 813[7].
on dehydrogenation of EtOH by Cu, 2776[6].
equil. with Na_2SO_4, effect of presence of air on concn. and activity of, 2111[9].
equil. with W and O, 325[7].
evapn. and diffusion of, 3122[8].
ion mobility in air mixed with, 3383[9].
mol. assocn., adsorption and dielec. const. of, 2105[1].
sorption by Al_2O_3, 1346[7].
spectrum of, 1951[8].
spectrum of, detection in spectrum of Mars, 1951[9].
synthesis of, Ni as catalyst in, 1348[4].
thermal properties of, 3376[6].
Wattle bark, properties of, 3586[5].
Wave-lengths, detn. of, app. for, 1[4].
Waves, shock waves from explosives, propagation rate of, 2074[3].
Waxes. (See also *Beeswax; Paraffin wax.*) 119[3].
books: 515[6]; Analyse der, 515[6], 999[9].
chem. constitution of, 3366[1].
from coal, etc , P 815[1].
coloring of, P 1330[6].
of cotton of diff. origin, 669[6].
decomposing by sulfo acids, P 1531[4].
of flowers, 3092[7].
fossil—see *Ozocerite*.

Bulgarian, 1492[8].
of Canton Wallis during 1923 and 1924, 643[9].
citric acid detection and detn. in, 2893[3].
clarification of, 475[3].
coloring matter in, effect of gelatin on, 2558[1].
compn. of S. African, detecting irregularities in, 1684[7].
concn. of, 475[9].
defecation with mercuric salts, 2224[7].
detection in stomach contents, 1254[8].
development of, effect of $KHC_4H_4O_6$ on, 3771[3].
dextran effect on, from musts with *Botrytis*, 475[8].
distn. in pot stills, 1129[5].
effect of tartaric and malic acid contents of must on, 475[6].
ext. of, detn. of, 1042[9].
fermentation of fruit, effect of pure yeast, pressed yeast, $(NH_4)_2SO_4$ and SO_2 on, 2043[7].
fermentation of fruit, effect of temp. on purity of, 2043[8].
filter, P 1152[8].
from grapes affected by sunstroke, compn. of, 1128[8].
history of, 476[1].
hydrogen-ion concn. in prepn. and conservation of, 474[7].
industry at Marsala, 3207[6].
industry, sanitation in, 475[4].
iron in, oxidizability of, 1128[9].
lactic acid detn. in, 2045[4].
of Lebanon, Arabia, 2558[2].
manuf. of, solns. of NH_4 sulfophosphate in, 474[7].
mellowness of, grape pectins and, 3534[3].
old (100 yrs.), 1684[6].
oxidation and aeration of, in casks, 475[9].
oxygen effect on, 474[8].
preservative for, salicylic acid as, 1684[6].
preservative for, Na *p*-chlorobenzoate as, 2884[6].
preserving, 3059[1].
preserving, aging and refining of, 475[1].
sugar detn. in, 2716[8].
sulfur dioxide effect on, 2386[6].
sulfurization and clarification of, 3771[7].
sulfurous acid in, sensitiveness of taste towards, 644[1].
tannin detn. in, 3023[8].
tannins in manuf. of, 1128[7].
tartaric acid detection in, 3775[8].
tartaric acid detn. in, 3196[8].
tartaric acid extn. from, 3534[2].
tartar no. of natural abnormal, 3534[2].
Vierka yeasts in production of, 3534[1].
watered, differentiation from abnormal wine, 794[5].
watering of, detection of, 643[9].
Wintera colorata, leaves, substances in, 2692[3].
Wintergreen oil, poisoning by, 1854[7], 2205[2].
Wire, aluminum, arrangement of micro-crystals in, 131[2].
aluminum, mech. strength and cryst. form of, 1155[9].
annealing, furnace for, P 1976[2].
annealing of Cu, app. for, P 3279[7].
book: Drawing, 355[8].
bronze and Cu, specifications of A. S. T. M. for, 954[5].
bronze trolley, specifications of A. S. T. M. for, 955[2], 1121[4], 1122[2].
chromium-coated, as elec. leading-in connections, P 1360[9].
for concrete reinforcement, specifications of A. S. T. M. for, 954[4].
copper-Cd, 2142[8].
copper, coated with alloy of Ni and Fe, app. for heat treatment of, P 2307[5].
copper, specifications of A. S. T. M. for, 1122[1].
drawing, dies for, P 37[4].
elastic properties of, effect of tension on, 3599[2].
elec. cond. tests of, 875[1].
elec. resistance of Pt and Fe, effect of high vacuum on, 2436[6].
electrodeposition of metal on, app. for, P 151[8].
electrodeposition of rubber on metal, P 2956[7].
electroplating coiled, app. for, P 3652[1].
etching of steel, effect on brittleness, 2971[1].
galvanizing and heat-treating, app. for, P 1782[3].
galvanizing, app. for, P 1782[3].
heat-treatment in coils, furnace for, P 3442[1].
heat treatment of, furnace for, P 897[8].
hoisting rope of, testing, 3278[2].
iron and steel, production of, 2477[2,3].
quartz, cathodic coating of, 3591[8].
rubber-insulated, specifications of A. S. T. M. for, 954[6].
silver, plated with "white Au," P 1587[4].
spectrum of exploded, of Cu, Ni and Fe, 1950[6].
steel for, manuf. in Thomas converter, 1972[9].
steel, nonmagnetic, P 168[2].
thermal cond. of, 1021[7].
Thomson effect in, effect of strain on, 853[2].
of tungsten, P 151[9].
tungsten elgrain, 895[2].

tungsten, tensile strength at high temps., 895^{6}.
welding of, app. for arc, 3152^{6}.
zinc-coating, 2461^{2}.
Witchhazel, prepn. of, British Pharm. method for, 969^{8}.
Wodanite, 3409^{3}.
Wolfram. See *Tungsten.*

in closed vessels, 1902^{6}.
retort for, P 106^{8}, P 663^{4}.
carbonization of Moroccan conifers, 500^{5}.
cellulose extn. from, 3080^{1}.
coal substitute from, 811^{5}.
coloring black, P 997^{5}.
compn. of sapwood, heartwood, springwood and summerwood, 2410^{3}.
creosoted ties for sugar factory railways, 3069^{8}.
decay control in, for pulp, 2072^{5}.
decayed, pulp manuf. from, 2746^{9}.
decorative finish for, P 1898^{1}.
density of, app. for detn. of, 127^{8}.
detn. in paper, 3082^{6}.
digestion by shipworm, 3048^{5}.
disintegrating, P 1905^{1}.
disintegrating by low-temp. explosions, P 2584^{6}.
distillate in mixts. with cresol, absorption by tetralin, 788^{4}.
distn. gases, manuf. of acetate of const. compn. from, P 2246^{8}.
distn. industry, 500^{5}.
distn. of, P 109^{9}.
app. for, P 109^{9}, P 316^{4}, P 1341^{1}.
under H pressure with catalysts, 1515^{8}.
review of, 3346^{9}.
tar removal from pyroligneous vapors of, P 3564^{7}.
distn. products of, review for 1925, 955^{3}.
Douglas fir for construction purposes, specifications of A. S. T. M. for, 954^{5}.
drying, P 3202^{2}.
drying app. for, P 1316^{4}, P 2058^{5}, P 3553^{1}.
dyeing of, P 811^{3}.
ebony, properties of, 265^{5}.
extg. turpentine and rosins from, app. for, P 3077^{8}.
extg. turpentine, pine oil and rosin from, P 3354^{9}.
filler for, P 3242^{8}.
finishes, technology and application of, 2255^{4}.
finishing, P 2082^{9}, P 3341^{2}.
fir, 3080^{6}.
fireproofing, P 3224^{6}.
fireproofing material for, P 1697^{2}.
as flooring material, endurance of, 1701^{5}.
fluorescence of ext. of red, 337^{4}.
as fuel (internal-combustion), 2402^{9}.
fungus diseases of, and treatment, 3070^{1}.
glue for, 3360^{2}.
grained finish on, P 489^{7}.
grinders, corrosion in, 3680^{9}.
heating and chem. treatment of, P 811^{4}.
heating curves for, 3073^{3}.
heat treatment of beech sleepers, 3551^{8}.
hydrogenation of, 103^{2}.
impregnation with paraffin and asphalt, P 1311^{1}.
impregnation with preservatives or coloring substances, P 101^{2}.
incrustants in, 2185^{9}.
for industry, suitability of, 810^{2}.
lapachol in, 3310^{1}.
lignin detn. in, 1830^{5}, 2746^{6}.
lignin in, distribution of, 221^{7}.
logging wastes, utilization of, 1902^{6}.
marine destroyers of, 1507^{1}.
maritime pine, compn. of, 2244^{6}.
metallic primers for new, structures, 3354^{1}.
metallic salt penetration into, 3069^{8}.
mineral salts in timbers, 2692^{2}.
for paper, and substitutes, 3080^{5}.
for paper making, comparison of heart and outer, 988^{4}.
pentosans in, detn. of, 110^{2}.
pipe, 3592^{5}.
pipes and their use, 2433^{3}.
polishing, P 301^{4}, P 3826^{6}.
polishing and staining compn. for, P 3826^{7}.
preservation of, 271^{6}, P 489^{7}, 810^{1}, P 978^{6}, P 1508^{2,3}, 2057^{3}, 2238^{8}, P 2239^{1}, 3069^{5}, P 3224^{5}, 3549^{7}, P 3794^{4,5}.
antiseptic for, P 2058^{5}.
app. for impregnation, P 652^{6}.
compn. for, P 3794^{6}.
with creosote, 3549^{9}.
with creosote-coal tar soln., 3550^{9}.
creosote mixts. with petroleum for, calcn. of viscosity of, 3551^{4}.
with creosote-petroleum mixt., 3550^{8}.
detn. of metallic salt penetration in, 652^{2}.
elec. heating in, 340^{2}.
full-length creosoting of poles, 2057^{8}.
impregnating agent for, P 652^{8}.
impregnation process for, P 652^{6}, P 3341^{2}, P 3552^{9}.
with $HgCl_2$, 1508^{1}.
metal corrosion and, 3439^{5}.
with montan wax, P 101^{3}, 3550^{7}.
with β-naphthol, 3550^{6}.
for railway sleepers, 652^{1}.
with NaF, 3069^{5}.
with NaF, testing, 3551^{1}.
for use in sea water, 3792^{6}.
preservation of marine structures, P 2058^{6}.
preservation of mine timbers, 488^{8}, 651^{9}, 1897^{4}, 2238^{3}.

preservation of ship bottoms, toxic compns. for, 1329[5].
preservative for, P 101[1].
preservative oils, effect of temp. and viscosity on penetration and absorption of, 3550[5].
red-, industry in tropical America, 3817[8].

Xanthone (*9-xanthenone*), prepn. of, 2680[1].
——, **1,8 - dihydroxy-,** boroacetate*, acetate, 1052[9].
——, **2,7 - dimethyl - 9 - thio-,** and addn. compd. with $HgBr_2$, 365[1,2].
——, **1-hydroxy-,** boroacetate*, 1052[9].
magnesium deriv., 399[3].
——, **9-thio-,** addn. compd. with $HgCl_2$, 365[2].
reaction with Et_3P and with Et_3PO_3, 2077[1].
Xanthophores, of minnows, effect of infundin and adrenaline on color of, 1472[3].
Xanthophyll, 2166[2].
Xanthopterin*, and barium salt, pigment from wings of brimstone butterfly, 902[3,4].
Xanthopyrrolecarboxylic acid*, and derivs., 1236[8].
Xanthosiderin, in liver, spleen and kidneys, 3036[5].
Xanthosiderite, 527[9].
Xanthoxylum. See *Zanthoxylum.*
Xanthydrol, 9-*sec.*-butyl-, and perchlorate, 2328[7].
——, **9 - *p* - chlorobenzyl-,** perchlorate, 392[5].
9 - cyclohexyl-, and perchlorate, 392[7].
9-hexyl-, perchlorate, 392[7].
9-isoamyl-, and perchlorate, 392[6].
9-isobutyl-, and perchlorate, 2328[7].
9-isopropyl-, and perchlorate, 2328[6].
9-methyl-, perchlorate, 2328[4].
9 - (1 - naphthylmethyl)-, 2328[5].
9 - phenethyl-, perchlorate, 2328[8].
9 - (γ - phenylpropyl)-, perchlorate, 2328[5].
Xanthylium compounds, 3,6 - dihydroxy-9 - (4 - hydroxy - 3 - methoxystyryl)— chloride, 1807[2].
3,6 - dihydroxy - 9 - (*p* - hydroxystyryl)— chloride, 1807[1].
3,6 - dihydroxy - 9 - (*p* - methoxystyryl)— chloride, 1807[2].
3,6 - dihydroxy - 9 - (3,4 - methylenedioxystyryl)— chloride, 1807[2].
9 - (*p* - dimethylaminostyryl) - 3,6 - dihydroxy— chloride, 1807[2].
9 - (4 - hydroxy - 3 - methoxystyryl)— chloride, formic acid addn. compd., 1807[1].
9 - (*p* - hydroxystyryl)— chloride, formic acid addn. compd., 1807[1].
9 - (*p* - methoxystyryl)— salts, 1807[1].
9 - (3,4 - methylenedioxystyryl)— chloride, zinc chloride salt, 1807[1].
9-styryl— chloride, 1806[9].
Xenon. (See also *Helium group.*)

in air, amt. of, 2923[1], 3252[9].
catalysis by ions of, 2459[9].
cathode fall in, 1025[7].
condition equation for, 2610[6].
magnetic susceptibility of, 328[7].
mol. field of, 3599[8].
photoelec. effect (compound) in, 705[4].
Röntgen-ray energy levels of, detn. of outer, 2787[3].
sepn. from air, P 973[8].
similarity in m. p. and b. p. to pseudo- and nonelectrolytes, 130[6].
spectrum of, 3640[2].
Xenotime, absorption spectra of crystals of, and modification in magnetic field at temp. of liquid He, 707[5].

magnetic rotatory power of, at low temps., 727[8].
from Ytterby, 1195[6].
Xenylamine (*p - aminobiphenyl*), bromination and chlorination of, 1800[8].
prepn. of, 2848[2].
——, *N* - **anisal - 4' - phenylazo-**, 587[3].
——, **4',4''' - azobis[*N*, *N* - dimethyl-**, and ·HCl, 587[1].
——, *N* - **benzal - 4' - phenylazo-**, 587[2].
——, **4'-bromo-**, 1800[9].
——, **2-chloro-**, ·HCl, 1800[8].
——, *N*-**chloro-**, 2848[2].
——, **4' - chloro - 2,3' - dinitro-**, 3292[2].
——, **2,6-dibromo-**, 1800[9].
——, *N*, *N* - **dimethyl - 2,4' - dinitro-**, 586[9].
——, *N*, *N* - **dimethyl - 4' - nitro-**, 586[9].
——, *N*-**methyl-**, and ·HCl, 2848[2].
——, *N* - **methyl** - *N* - **nitroso-**, 2848[2].
——, **4'-phenylazo-**, 585[4].
——, **2,4',6 - tribromo-**, 1800[9].
——, **2,4',6 - trichloro-**, 1800[9].
Xerophthalmia, simultaneous production of rickets and, 436[2].
X-rays. See *Rays, Röntgen*.
2,4 - Xylaldehyde, 6 - hydroxy-, oxime, 2154[9].
3,5 - Xylaldehyde, α - **bromo - 4 - hydroxy - α,α,α',α' - tetraphenyl-**, 906[9].
——, **4 - hydroxy - α,α,α',α' - tetraphenyl-**, 906[9].
2,4 - Xylamide, 3,5 - dibromo - 6 - hydroxy-, 403[9].
——, α-**hexachloro-**, 184[7].
2,6 - Xylamide, 3,5 - dibromo - 4 - hydroxy-, 403[9].
Xylan, prepn. and hydrolysis (enzymic) of, 2484[4].
2,4 - Xylanilide, α - **hexachloro-**, 184[7].
——, α[2],α[2],α[4],α[4] - **tetrachloro-**, 184[4].
Xylene, antihemolytic action of, 1443[7].
heat of combustion of, 327[1].
as insecticide, 2556[4].
methylation of, 1983[9].
naphthalene solns. in, d.-temp. curves of, 3117[1].
poisoning by, 2712[4].
purification of, for solvent in catalytic reductions, 1395[9].
solns. of *p*-$MeC_6H_4NH_2$ in, d.-temp. curves of, 3117[1].
spectrum (ultra-violet absorption) of, 1550[6].
sulfonation of *m* and *p* as a means of their sepn., 2316[3].
Xylene, chloro-, oxidation of, P 1631[4].
——, **hexahydro-**. See *Cyclohexane, dimethyl-*.
——, **hydroxy-**. See *Xylenol*.
——, **nitro-**, oxidation of, P 1631[4].
***m*-Xylene**, auto-ignition of, 3341[6].
detn. of, and sepn. from the *p*-, 2316[3].
dispersion of elec. double refraction of, 2612[4].
heat of vaporization of, 1551[3].
ignition of mixt. of air and, 1706[2].
system: C_6H_6–, magnetic susceptibility of, 2612[3].
system: C_6H_6–, refractometry of, 2612[4].
systems: C_6H_6–, toluene–, and *p*-xylene–, fusion curves for, 1020[5].
——, α-**bromo-**, 1794[4].
——, **4-(bromoethinyl)-**, 1783[1].
——, **4-(α-chlorovinyl)-**†, 1783[1].
——, **4,6-dianisoyl-**, 386[2].
——, α,α'-**dibromo-**, prepn. of, 1794[4].
——, **4,6-di-*p*-toluyl-**, 386[1].
——, **4,β-diveratroyl-**, 386[2].
——, **4-ethinyl-**, 1783[1].
——, **4-iodoethinyl-**, 1783[4].
——, **methylmercapto-**, spectrochemistry of, 204[1].
——, **2**(and **4**)-**nitro-**, reduction of, 2153[4].
——, **4-propargyl-**, 587[9].
***o*-Xylene**, heat of vaporization of, 1551[3].
spectrum of, 2953[9].
——, **3**(and **4**)-**nitro-**, reduction of, 2153[4].
***p*-Xylene**, detn. of, and sepn. from the *m*-, 2316[3].
heat of vaporization of, 1551[3].
reaction with CON_6, 2500[6].
spectrum of, 2953[9].
system: S–, 3628[2]
system: *m*-xylene–, fusion curve for, 1020[5].
——, α-**bromo-**, as larvicide, 2555[6].
——, **2,5-diveratroyl-**, 386[1].
——, **2-nitro-**, reduction of, 2153[4].
——, **2-propargyl-**, 587[9].

absorbing power of, 1829[3], 2559[4].
absorption of $AuCl_3$ by, 2930[1].
acetoin effect on, 920[2].
adsorbing power of, 1739[4].
amidase from, effect of lime on, 2260[9].
Amphiernia rubra, 1300[8].
amylase complement from, 923[2].
amylase of, fermentation of polysaccharides and, 3018[1].
antineuritic concentrates of, 436[8].
antineuritic vitamin from, 2354[3].
antitoxin prepd. with, P 2049[6].
argon in, 59[1].
arsenic compds. (org.) combined with, P 1890[2].
arsphenamine action on, 613[5].
assimilation of N of nutrients in aerated fermentations by, 2689[6].
"assistant" for making bread, P 3521[5].
autodigested, treating hides and skins with, P 3587[6].
autolysis of, P 3772[1].
autolyzed, in leather manuf., P 838[8].
bakers', P 1885[7].
baking powder contg., P 953[6].
beer pressed from, 2043[8].
benzoic acid effect on, 2178[6].
black, 613[4].
black-tongue-preventing factor in, 2693[9].
blood pigment in, 3174[9].
"bone precipitate" as source of P and Ca for, P 1885[7].
books: The Toxicity of Acids toward, 1639[5]; Chemie der Hefe und der alkoholischen Gärung, 2387[2].
carbohydrate and fat metabolism of, 2866[4].
chloroform effect on *Saccharomyces ludwigii*, 3303[9].
compn. contg., P 261[3].
compressed, P 1885[8].
coproporphyrin synthesis by, 769[9], 1418[8], 3479[3], 3700[8].
cozymase of, 212[8].
culture of, in synthetic medium, 2869[9].
dehydrogenase of, 1088[2], 1815[2].
demonstration of the effect of Röntgen rays on various substances by, 3744[1].
devitalized, for bread, etc., P 1476[2].
dextrin-fermenting, 61[5].
dough raising with pure cultures of, 1118[4].
dry, 2884[3].
drying and conditioning, P 476[4].
drying and preserving, P 3535[3].
effect of drugs and radiation on, 3308[1].
effect of preliminary treatment of, on affinity const. of sucrase, 1417[8].
effect on blood pigments, 3016[8].
on fermentation of fruit wines in casks, 2043[7].
on glycidic acids, 367[9].
on lactic acid, 2866[5].
on *dl*-leucyl-γ-aminobutyric acid, 3300[8].
on weight loss from avitaminosis, 63[8].
elec. current and, 1256[7].
electrophoretic migration in, effect of electrolytes on, 1638[6].
enzymes, kinetics of peptide-splitting by, 1829[1].
explosion in chocolate-coated candies from, 633[5].
ext., growth factor F in, 3487[7].
ext. of, as pill mass, 3772[8].
fat formation by, 1257[5].
fat formation from sugar by *Endomyces vernalis*, 52[1].
fermentation and respiration of, formation of AcH and acetylmethycarbinol during, 3307[9].
fermentation by pressed, brewer's, wine and wild, effect of O on, 1817[8,9].
fermentation expts. in org. chemistry, possible errors in, 360[4].
for fermentation of alc., 1884[8].
filter for manuf. of, P 644[6].

food from autolyzed, P 953[7,8].
food from cheese and, P 1288[2], P 3051[1].
galactose fermentability by, effect of cultivation on galactose on, 769[2].
galactose fermentation by, 2179[8].
α-glucosidase of, action of, 1596[8].
glycogen, prepn. of, 1419[5].
glycogen synthesis and fermentation by maltase-free, 1418[5].
growth of, effect of irradiated sitosterol on, 1431[4].
effect of temp. on, 2559[1].
in wort, 2717[3].
hemochromogen reaction of, 771[7].
hypoglucemic effect of juices and exts. of beer, 2507[6].
improving durability of, P 3535[3].
insulin activity of, 219[3].
invertase fate in organisms immunized to, 1461[1].
invertase from beer, activation by spring waters contg. H carbonates, 2505[2].
invertase in, diminution of, 770[4].
lactic acid oxidation by, 3494[6].
from leaves of *Opuntia vulgaris*, 260[4].
as link between animal and vegetable kingdoms, 608[7].
malted milk contg., P 3050[8].
maltose fermentation by, rich in maltase, 1632[7].
maltose of, 211[8], 1244[5].
metabolism of, effect of light and CO on, 3308[6].
metabolism of, formation of acetylmethylcarbinol and 2,3-butylene glycol in, 930[1].
molasses prepn. for production of, P 795[6].
multiplication in synthetic nutrient solns., 1423[7].
new, 2870[2].
nitrogen assimilated by, 90[2].
nitrogen fixation by, as function of H-ion concn., 613[8].
nitrogen in, sucrase effect on, 3174[8].
nitrogenous constituents of, 2866[2].
nitrogenous food, P 3535[4].
nitrogen removal from wort by, during brewery fermentation, 1129[2].
nucleic acid—see *Nucleic acids*.
nuclei of, compn. of, 1829[8].
nutrient substances for, P 261[2].
nutrition expts. with brewer's, 1433[2].
nutrition of, 2182[3].
oxidation-reduction system of, effect of dihydroxyacetone and zymophosphate on, 2684[4].
as pellagra preventive, 1431[4].
peptide-splitting enzymes from, 1828[6].
permeability detn. in pressed, 1089[4].
phosphoric acid detn. in, 2559[4].
in pill masses, 1690[8].
poisoning by acids, 3481[6].
poisoning by salts, adaptation to, 2865[9].
polysaccharide hydrolysis by, 2179[1].
porphyratin from, 3174[2].
preliminary treatment of, effect on affinity consts. of sucrase, 3016[4].
prepn., 2717[3].
prepn. rich in vitamins and enzymes, P 1493[3].
preserving, P 795[7], P 1493[4].
pressed, P 476[3].
pressings, gravity of, 2043[9].
production of, in relation to brewery worts, 2044[9].
protease of, ereptic components of, 1633[4].
proteases of, 3018[6].
pyruvic acid formation by, 1643[4].
reductase of, 57[4], 3175[3].
reproduction in solns. in which no bios has been added, 220[4].
respiration and fermentation of, effect of H_2S on, 2170[2].
respiration of, effect of thyreoidin, cerebrin and cordin on anaerobic, 929[9].
respiratory pigment of, 58[1].
sepn. from liquid, app. for, P 1300[8].
sodium acetoacetate decompn. by, 936[2].
sugar assimilation by oxygenated, effect of ions on, 1829[6].
sulfur contg. amino acid in ext. of, 924[2].
sulfur-contg. constituent of, 2314[6].
thiosugar from, 583[3].
utilization of Finnish sulfite waste liquor by means of, 3808[8].
Vierka, in wine production, 3534[1].
vitamin B content of exts. of, 3027[7].
vitamin B in, existence previously in culture medium, 3027[8].
as vitamin B source, 224[2], 936[9], 1433[2].
vitamins in, 3312[5].
effect of boric acid on, 3317[9].
effect of piperazine and its derivs. on, 3311[5].
volutin in, 794[9].
p-xyloquinone effect on, 3308[2].
yield and nitrogen content of, effect of nutritive mediums of const. compn. on, 1885[1].
Yew. See *Taxus*.
Yocco, caffeine in, 3061[2].
Yoghurt, bacteria, prepn. of tablets of, 2388[1].
cultures of, app. for production of, P 3021[6].
enzyme activity of, detn. of, 3773[8].
prepn. of, app. for, P 1288[6].
prepns., 2722[2,3].
review, 3753[4].
symbiosis of *B. bulgaricus* and *Streptococcus lacticus* in, acid formation in, 2688[1].
Yohimbine, detection and detn. of, 2722[2].
effect on hypertension from nicotine, cytisine or lobeline, 1863[9].
effect on vasomotor sympathetic innervation of kidney, 1278[8].
indicator for, 1494[1].
reactions of, 964[9].
Yperite. See *Sulfide, bis(β-chloroethyl)*.

tin-, P 358[2].
Zirconium ammonium fluoride, decompn. of, 3658[3].
Zirconium borate, precipitation of, H-ion concn. and, 1163[1].
Zirconium carbide, from zirconium silicate, P 1360[6].
Zirconium carbonate, precipitation of, H-ion concn. and, 1163[1].
Zirconium chlorides, dextrose effect on $ZrCl_2$, 2447[6].
reaction of $ZrCl_4$ with 1,3-diketones, 403[1].
Zirconium compounds, bis(α-acetylphenacyl)-dichloride, 403[1].
with hafnium, P 2051[5].
manuf. of, P 973[6].
prepn. of, 881[6].
with pyrocatechol and pyridine, 717[7].
tris(α-acetylphenacyl)- chloride, 403[1].
Zirconium cuprothiosulfate, 558[6].
Zirconium fluorides, analysis of, 2466[6].
double, 1039[1].
Zirconium halides, double decompn. with P halides, 2936[1].
sepn. from Hf halides, P 2051[6].
Zirconium hydroxide, colloidal, synthesis of 3114[3].
precipitation of, 26[8].
reaction with "aluminon," 2963[6].
Zirconium ore, industrial uses of, 265[2].

refractory products from, P 3790⁵.
uranium in, 319⁴.
Zirconium oxide, (ZrO_2), in enamels, etc., P 487⁹.
expansion by heat, 807⁹.
glowing of, on heating, 527⁶.
luminescence of, 3268³.
manuf. of, P 2052².
as pigment for opaquing glass or enamels, P 2566⁸.
reactions with basic oxides, 324⁹.
as refractory, 265⁸, 1135¹.
as refractory for melting Fe, 3068⁴.
specific heat of system: water–, 3632¹.
thermal expansion of, and of its refractories, 3547⁵.
Zirconium phosphate, soly. in acids and bases, 156⁶.
Zirconium salts, effect on nutrition, 1436⁷.
reactions with acetate, oxalate and tartrate of Na, H electrode studies of, 2417⁶.
Zirconium silicate, as refractory, 265³.
Zirconium sulfate, isomorphism with $U(SO_4)_2$, 319³.
Zirconyl sulfates, prepn. from Zr ores, 2962³.
Zirkallit, for furnaces, 3220⁶.
Zonolite, utilization of, 728².
Zoöxanthellae, symbiosis of coral polyp with, 630⁶.
Zygnemacean, with red cell sap, 2348³.
Zygospore, formation in mucor, effect of external factors on, 2179⁵.
Zyklon C, danger indicator in, chloropicrin as, 3765⁷.
Zymase. (See also *Co-zymase.*) 1820³.
affinity in, 2169⁹.
fermentation and, 2169¹.
formation of, co-enzyme action and, 1418⁹.
oxidoreductase sepn. from, 3700⁶.
Zymogens, amylase, thermostability of, 3310⁴.
Zymohexose, in yeast, fermentation and oxidation of, 218⁹.
Zymonemata nigra, 613⁴.
Zymophosphate, formation, biochem. sugar conversion and, 1090⁷.
in oxidation-reduction system of yeast and muscle, 2684⁴.

III. FORMULA INDEX

KEY.

In using this index the following should be borne in mind:

1. The Formula Index is **supplementary** to the Subject Index; in no sense does it replace any part of the latter except that most of the organic compounds that were not named in the original papers are entered in the former only.

2. **Inorganic as well as organic compounds** have been entered.

3. **Entries under their own formulas** are made for all strictly inorganic and strictly organic compounds and for the true organic derivatives of organic compounds, both addition compounds and true reaction derivatives (this includes esters, hydrazones, methohalides, oximes, picrates, semicarbazones, etc.). Inorganic salts of organic acids and inorganic addition compounds of organic compounds (hydrohalides, chloroplatinates, perchlorates, sulfates, etc.) are not given separate entries but are indicated in modifying phrases under the formulas of the compounds from which they are derived (under the acid in the case of a salt). Salts of formic, acetic and oxalic acids are exceptions; these are entered as such.

4. The **arrangement of symbols in formulas** is alphabetical except that in carbon compounds C always comes first, followed immediately by H if hydrogen is also present.

5. The **arrangement of formulas** is also alphabetical except that the number of atoms of any specific kind influences the order of compounds. *E. g.*, all formulas with 1 C come before those with C_2, thus: CCl_2O, CCl_4, $CHCl_3$, CHN, CHNO, CH_2Br_2, CH_2O, CH_3Cl, CO, C_2Ca, $C_2H_4O_2$.

6. The **arrangement of entries under any heading** is strictly alphabetical according to the preferred names of the isomers.

7. **Entries consist of** (*a*) the formula (in bold-face type), (*b*) the name as it has been entered in the Subject Index (in light-face Roman type; *it should be noted particularly that the part of the entry in this type is the exact equivalent of the formula given*), (*c*) occasionally a modifying phrase or word such as "Ca salt" or "hydrochloride" (in italics, different type being used to set off that part of a compound being indexed which is not represented in the formula used; see ¶ 3 above), (*d*) the page reference, and (*e*) the fraction of the page in ninths (indicated by a small superior numeral) in which the compound will be found.

8. **Cross-references** are to the Subject Index.

9. **Water of hydration** is not made a part of the formulas indexed but is usually given in light-face type following the formulas.

10. **Polymers** having different names and recognized as different substances, *e. g.*, acetaldehyde and paraldehyde, are all entered under their accepted formulas. But definite compounds for which different polymeric formulas are in use are entered under the simplest formula only with cross-references under the polymeric formulas.

11. **A straight line,** thus ———, used under some headings to avoid repetition of names, always stands for the name of the "index compound," *i. e.*, that part of the preceding name (inverted) which comes before the comma.

12. "P" before a page number indicates that the abstract is of a **patent.**

13. The **names beryllium** (Be), **columbium** (Cb) **and hafnium** (Hf) are given preference over glucinum (Gl), niobium (Nb) and celtium (Ct), respectively, for these elements.

The Key to a formula index is necessarily lengthy. It would not be correct to conclude from this that this index is difficult to use. Experience is to the contrary.

INTRODUCTION.

General purpose and policy. The location of chemical compounds in an index by names is at times uncertain because names vary and in the case of complex compounds may be difficult to ascertain. New compounds are constantly being prepared, which, if named at all, may receive more than one name which is justified from one point of view or another and the possibilities of incorrect names are great. Since the kinds and number of component atoms of a chemical compound are unvarying characteristics the supplementary Formula Index to *Chemical Abstracts* is published for the purpose of eliminating this element of uncertainty in the Subject Index. Except that many unnamed compounds are no longer entered under the heading "Compound," the Subject Index is in no way altered on account of the Formula Index. In the Subject Index related compounds are *grouped* rather effectively and to good use by the present system of indexing on the basis of "parent compounds" or more accurately "index compounds;" in the Formula Index the certain location of *individual* compounds is the primary consideration. The Subject Index is more convenient to use in some respects and it frequently contains more information in the form of modifying phrases. The repetition of modifying phrases in the Formula Index beyond necessary brief phrases to indicate derivatives has been avoided as unnecessary for the accomplishment of the real purpose of this index, as stated above, and as inconsistent with necessary economy. Isomerism is not indicated in the Formula Index in cases in which the names differ only in position numbers or letters but it always is in the Subject Index when known. Ready reference to the Subject Index for the purpose of locating information regarding related compounds is made possible by the use in the Formula Index of names following the formulas written exactly as they appear in the former index.

All new compounds and all compounds for which new data are given have been entered. Most of the compounds have been entered under their own formulas. Some departure from a policy of making separate formula entries for derivatives of all kinds is reasonable and accords with custom. The only departures in this index (see ¶3

of the Key) have been in classes of compounds the natures of which would be more than likely apparent to the investigator. The interest in a salt of a complex organic acid, for example, is likely to be mainly in the acid and it is considered more valuable to have the record of it under the formula of the acid for the use of searchers looking up that acid.

In the case of unnamed organic compounds where possible the class, as acid, source and melting or boiling point have been given.

Cross-references to the Subject Index have been used for all simple inorganic compounds, for all minerals of definite composition and for the organic compounds more commonly met with, in general whenever it seemed likely that users of *Chemical Abstracts* would predominatingly refer to the Subject Index.

The system. The system, as described in the Key, is, with slight modifications, that worked out by Dr. Edwin A. Hill[1] and used by the Classification Division of the U. S. Patent Office. This system is preferred to the system of Richter's Lexikon because of its greater simplicity and its applicability with equal fitness to inorganic as well as to organic compounds.

$AgAuCl_4$ Silver chloroaurate, 2110^{6}.
$AgBr$ See *Silver bromide.*
$AgCl$ See *Silver chloride.*

$C_6H_2AgBrN_2O_5$ Phenol, bromodinitro-, Ag deriv., 1064^{5}.

$C_6H_2BrCl_3O$ Compd., decomps. about 114°, from 4-bromo-2,6-dichlorophenol and Cl, 1064^{2}.

$C_6H_2BrN_3O_5$ Benzene, 1-bromo-3,5-dinitro-2-nitroso-, 2666^{8}.

$C_6H_2BrN_3O_6$ Benzene, 1-bromo-2,3,5-trinitro-, 2666^{8}.

$C_6H_2BrN_3O_7$ Phenol, 3-bromo-2,5,6-trinitro-, 1064^{6}.

$C_6H_2BrN_3O_{10}S$ 1-Phenol-4-sulfonic acid, 3-bromo-2,5,6-trinitro-, *K salt*, 1064^{6}.

$C_6H_2Br_2Cl_2O$ *p*-Benzenone, dibromodichloro-, $2841^{2,3}$.
Phenol, dibromodichloro-, $2841^{2,3}$.

$C_6H_2Br_2N_2O_5$ Phenol, 3,5-dibromo-2,4-dinitro-, 1609^{8}.

$C_6H_2Br_3ClO$ *p*-Benzenone, 2,4,6-tribromo-4-chloro-, 1610^{1}.
Compd., decomps. about 115° from 2,6-dibromo-4-chlorophenol and Br, 1064^{2}.
Phenol, 2,3,6-tribromo-4-chloro-, 1610^{1}.

$C_6H_2Br_4O$ Phenol, 2,4,6-tribromo-, bromide, 1064^{1}.

$C_6H_2ClN_3O_5$ *o*-Quinonimine, *N*-chloro-4,6-dinitro-, 1552^{4}.

$C_6H_2ClN_3O_6$ Picryl chloride, 1061^{8}, 1395^{6}.

$C_6H_2Cl_2KN_3O$ Benzazimidole, 5,6-dichloro-, K deriv., 750^{7}.

$C_6H_2Cl_2N_2O_5$ Phenol, 3,5-dichloro-2,4-dinitro-, 1222^{8}.

$C_6H_2Cl_2N_4O_2$ Benzene, 1,2-dichloro-4-nitro-5-triazo-, 750^{7}.

$C_6H_2Cl_2N_4O_3$ Benzazimidol, 5,7-dichloro-6-nitro-, *and N_2H_4 salt*, 1222^{6}.

$C_6H_2Cl_3NO_2$ Benzene, 1,2,4-trichloro-5-nitro-, *N_2H_4 salt*, 750^{7}.

$C_6H_2N_4O_8$ Benzene, 1,2,4,5-tetranitro-, 2667^{9}.

$C_6H_2O_6$ Rhodizonic acid, *Na salt*, 1770^{7}.

$C_6H_3AsCl_2N_2O$ *o*-Quinonediazide, 4-dichloroarsyl-, *and HCl*, 2487^{1}.

$C_6H_3AsINO_4$ Phenol, 4-arsinoso-2-iodo-6-nitro-, 3289^{3}.

$C_6H_3BrCl_2$ Benzene, 4-bromo-1,2-dichloro-, 2152^{4}.

$C_6H_3BrCl_2O$ Phenol, 4-bromo-2,6-dichloro-, 1064^{2}.

$C_6H_3BrI_2O$ Phenol, 4-bromo-2,6-diiodo-, 2841^{3}.

$C_6H_3BrNNaO_3$ Phenol, 3-bromo-2-nitro-, Na deriv., 1064^{3}.

$C_6H_3BrN_2O_4$ Benzene, 1-bromo-2,4-dinitro-, 750^{1}.

$C_6H_3BrN_2O_5$ Phenol, bromodinitro-, 1064^{6}.

$C_6H_3BrOS_3$ Benzotrisulfole, 5-bromo-, 2-oxide, 1797^{9}.

$C_6H_3BrS_2$ *o*-Phenylene disulfide, 4-bromo-, 1797^{8}.

$C_6H_3Br_2ClO$ Phenol, 2,6-dibromo-4-chloro-, 1064^{2}, 1609^{9}.

$C_6H_3Br_2IO$ Phenol, 2,4-dibromo-6-iodo-, 2841[4].
$C_6H_3Br_3O$ Phenol, tribromo-, 1610[4], 2669[5].
$C_6H_3ClINO_2$ Benzene, 1-chloro-4-iodo-2-nitro-, 2152[4].
$C_6H_3ClI_2O$ Phenol, 4-chloro-2,6-diiodo-, 1610[1].
$C_6H_3ClKN_3O$ Benzazimidole, 5-chloro-, K deriv., 750[5].
$C_6H_3ClN_2O_4$ Benzene, 1-chloro-2,4-dinitro-, 2556[4].
$C_6H_3Cl_2F$ Benzene, 1,2-dichloro-4-fluoro-, 2152[4].
$C_6H_3Cl_2I$ Benzene, 1,2-dichloro-4-iodo-, 2152[4].
$C_6H_3Cl_2IO$ Phenol, 2,4-dichloro-6-iodo-, 2841[4].
$C_6H_3Cl_2NO$ Benzene, 1,2-dichloro-4-nitroso-, 2152[4].
Picolinyl chloride, chloro , 3294[4].
$C_6H_3Cl_2NO_2$ Benzene, 1,2-dichloro-4-nitro-, 2152[4].
$C_6H_3Cl_2N_3O$ Benzazimidole, 5,6-dichloro-, 750[7].
$C_6H_3Cl_2NaO$ Sodium phenoxide, 2,4-dichloro-, 2840[8].
$C_6H_3Cl_3$ Benzene, trichloro-, 2152[4], 2556[4].
$C_6H_3Cl_3O$ Phenol, 2,4,6-trichloro-, 2318[8], 2669[4].
$C_6H_3Cl_3O_7S_3$ 1,3,5-Benzenetrisulfonyl chloride, 2-hydroxy-, 1395[8].
$C_6H_3Cl_3O_8S_3$ 1,3,5-Benzenetrisulfonyl chloride, 2,4-dihydroxy-, 2841[7].
$C_6H_3Cl_4Hg_3N$ Aniline, 3-chloro-2,4,6-tri(chloromercuri)-, 2838[2].
$C_6H_3Cl_4N$ Compd., m. 89°, from 2,4,6-tris(acetoxymercuri)-3-chloroacetanilide, 2838[3].
$C_6H_3Cl_4N_2Sb$ 2-Chlorobenzenediazonium chloride, $SbCl_3$ inner complex salt, 2486[4].
$C_6H_3FeN_6$ See *Ferricyanic acid*.
$C_6H_3N_3O_6$ See *Benzene, trinitro-*.
$C_6H_3N_3O_7$ See *Picric acid*.
$C_6H_3N_3O_8$ Resorcinol, trinitro-, 3571[1].
$C_6H_3N_9$ Mellon, 3687[4].
$C_6H_4AgNO_4S_2$ *o*-Benzenedisulfonimide, Ag deriv., 3289[9].
C_6H_4AsBrO Benzene, arsinosobromo-, 393[4], 1606[3].
C_6H_4AsClO Benzene, 1-arsinoso-4-chloro-, 393[5].
$C_6H_4AsCl_3$ Arsine, dichloro(*p*-chlorophenyl)-, 393[6].
$C_6H_4AsCl_3N_2$ Benzenediazonium chloride, $AsCl_3$ inner complex salt, 2486[7].
$C_6H_4AsNO_4$ Phenol, 4-arsinoso-2-nitro-, 176[4].
C_6H_4BrClO Phenol, bromochloro-, 2152[9], 3449[1].
C_6H_4BrIO Phenol, 3-bromo-5-iodo-, 3449[2].
$C_6H_4BrKO_3S_2$ Benzenesulfonic acid, 5-bromo-2-mercapto-, K deriv., *K salt*, 1797[6].
$C_6H_4BrNO_2$ Benzene, bromonitro-, 386[5], 749[9], 1225[2], 2835[8], 3627[3].
Phenol, bromo-4-nitroso-, 178[4,5].
Quinone, 2-bromo-, 1-oxime, 178[4].
$C_6H_4BrNO_3$ Phenol, 3-bromo-2-nitro-, 1064[3].
$C_6H_4BrN_3O$ Benzazimidol, 6-bromo-, 3168[7].
$C_6H_4BrN_3O_5$ Hydroxylamine, β-(2-bromo-4,6-dinitrophenyl)-, 2666[7].
$C_6H_4Br_2ClN$ Aniline, 2,6-dibromo-4-chloro-, 2990[6].
$C_6H_4Br_2O$ Phenol, dibromo-, 2669[5].
$C_6H_4Br_2O_2$ Hydroquinol, dibromo-, 1394[2,3].
$C_6H_4Br_2O_4$ β-Resorcylic acid, dibromo-, 1613[3].
$C_6H_4Br_6$, 3075[2].
C_6H_4ClHgN Aniline, 2-chloro-4,5 (and 4,6) mercuri-, 589[4,5].
C_6H_4ClIO Phenol, chloroiodo-, 2152[9], 3449[2].
C_6H_4ClNO Isonicotinyl chloride, *and -HCl*, 3294[6].
Nicotinyl chloride, *and -HCl*, 3294[5].
Picolinyl chloride, 3294[4].
$C_6H_4ClNO_2$ (See also *Benzene, chloronitro-*.)
Picolinic acid, chloro-, 3294[4].
$C_6H_4ClN_3O$ Benzazimidole, chloro-, 750[4], 3168[7].
$C_6H_4ClN_3O_2$ Nitrobenzenediazonium chloride, 759[4].
$C_6H_4ClN_5O_5$ Hydrazine, α-(5-chloro-2,4-dinitrophenyl)-α-nitroso-, 750[5].
C_6H_4ClNaO Sodium phenoxide, chloro-, 2840[8].
$C_6H_4Cl_2$ See *Benzene, dichloro-*.
$C_6H_4Cl_2O$ Phenol, dichloro-, 2152[4], 2669[4].
$C_6H_4Cl_2O_3S$ Benzenesulfonic acid, 3,4-dichloro-, 2152[4].
$C_6H_4Cl_2O_5S_2$ *m*-Benzenedisulfonyl chloride, 4-hydroxy-, 1395[8].
$C_6H_4Cl_2O_6S_2$ *m*-Benzenedisulfonyl chloride, 4,6-dihydroxy-, 2841[7].
$C_6H_4Cl_3HgN$ Aniline, 2,4-dichloro-6-(chloromercuri)-, 2317[8].
$C_6H_4Cl_3Hg_2N$ Aniline, 2 chloro-4,6-bis(chloromercuri)-, 589[4].
$C_6H_4Cl_3N_2Sb$ Benzenediazonium chloride, $SbCl_3$ inner complex salts, 2486[6,8].
$C_6H_4FeN_6$ See *Ferrocyanic acid*.
$C_6H_4INO_2$ Phenol, 2-iodo-4-nitroso-, 178[7].
Quinone, 2-iodo-, 1-oxime, 178[6].
$C_6H_4INO_3$ Phenol, iodonitro-, 178[6], 3449[1].
$C_6H_4I_2$ Benzene, diiodo-, 3451[4].
$C_6H_4I_2Mg_2$ Phenylenedimagnesium diiodide, 3451[4].
$C_6H_4I_2N_2$ Piaziodonium iodide, *and hydrate*, 1239[4].
$C_6H_4I_3NO$ Ketone, 3,4,5-triiodo-2-pyrryl methyl, 597[4].
$C_6H_4KNO_3$ Phenol, *o*-nitro-, K deriv., 741[4].
$C_6H_4NNaO_3$ Phenol, *o*-nitro-, Na deriv., 741[3].
$C_6H_4N_2O_4$ See *Benzene, dinitro-*.
$C_6H_4N_2O_5$ See *Phenol, dinitro-*.

$C_6H_7NO_2S$ Phenylsulfoxylic acid, *o*-amino-, 2993[6].
$C_6H_7NO_3S$ Sulfanilic acid, 689[2].
C_6H_7NS Phenyl mercaptan, *o*-amino-, 386[6], 600[1].
$C_6H_7N_2NaOS$ Uracil, 5,6-dimethyl-2-thio-, Na deriv., 2681[9].
$C_6H_7N_3O_2$ Hydrazine, (*p*-nitrophenyl)-, 1604[2].
Pyridine, 1,2-dihydro-2-imino-5-nitro-, 396[2].
—, 1,2 - dihydro-1-methyl-2-nitroimino-, 396[3].
5 - Pyrimidinecarboxylic acid, 2-amino-4-methyl-, 206[5].
$C_6H_7N_5O_5$ Hydrazine, (5-hydroxamino 2,4-dinitrophenyl)-, 2667[5, 7].
$C_6H_7O_6TlW$ Thallium pyrocatecholaquotungstate, 557[2].
$C_6H_7O_7TlU$ Thallium pyrogallol aquouranate, 557[5].
$C_6H_7O_7TlW$ Thallium pyrogallolaquotungstate, 557[3].
C_6H_8 Benzene, dihydro-, 369[9].
$C_6H_8AsNO_3$ Arsanilic acid, 175[8].
$C_6H_8AsNO_4$ Arsanilic acid, hydroxy-, 393[1], P 2504[5], 3742[7]; *basic Bi salt*, 796[3]; *and -HCl*, 2993[9].
$C_6H_8AsNO_7S$ Benzenearsonic acid, 4-hydroxy-3-sulfamino-, *di-Ba salt*, 176[4].
$C_6H_8AsNO_{10}S_2$ Benzenearsonic acid, 4-hydroxy-3-sulfamino-5-sulfo-, *tri-Ba salt*, 176[4].
$C_6H_8As_2O_7$ *m*-Benzenediarsonic acid, 4-hydroxy-, *mono-Na salt*, 392[9].
$C_6H_8Br_2O_4$ Adipic acid, α,δ-dibromo , 581[6].
$C_6H_8ClN_3O_2$ 1,2,4 - Triazole-1-carboxylic acid, 3(or 5)-chloro - 5(or 3) - methyl , Et ester, 417[1].
$C_6H_8ClN_5O$ Benzazimidole, 5-chloro-, N_2H_4 salt, 750[4].
$C_6H_8CuN_2O_6$ Pyruvohydroxamic acid, Cu deriv., *salts*, 1978[7].
C_6H_8IN 1-Methylpyridinium iodide, 3008[9].
$C_6H_8IN_3O_2$ Pyridine, 2-amino - 5 - nitro-, methiodide, 396[4].
$C_6H_8I_2NSn$, 1570[9].
$C_6H_8MoO_7$ Pyrogallolaquomolybdic acid, 556[9].
$C_6H_8NO_3Sb$ Benzenestibonic acid, *p*-amino-, 1274[8].
$C_6H_8N_2$ (See also *Hydrazine, phenyl-; Phenylenediamine.*)
Picoline, 2-amino-, 395[8, 9].
Pyridine, 1,4-dihydro-4-imino - 1 - methyl-, *and salts*, 396[1, 2].
—, 4-methylamino-, *and chloroplatinate*, 396[1, 2]; *and salts*, 1238[6].
$C_6H_8N_2O$ Phenol, diamino-, 2301[1], 3452[5].
—, 2,4-diamino-, *-HCl*—see *Amidol.*
Pyrazolealdehyde, dimethyl-, 2857[1, 3].
$C_6H_8N_2O_2$ 2,5-Piperazinedione, 3-methyl-6-methylene-, 381[5], 2682[6, 7].
2,5 - Pyrazinediol, 3,6-dihydro-3-methyl-6-methylene-, 381[6].
Pyrazolecarboxylic acid, dimethyl-, 2493[5, 7], 2494[6].
$C_6H_8N_2O_2S$ Uracil, 5-(hydroxymethyl)-6-methyl-2-thio-, 2681[9].
$C_6H_8N_2O_2S_2$ Biphenyl, *p,p'* - bis(nitrosomercapto)-, 2975[9].
$C_6H_8N_2O_3$ Imidazolelactic acid, 2522[8], 3030[5].
Succinimide, α-acetamido-, 50[1].
$C_6H_8N_2O_3S$ Barbituric acid, 5-β-hydroxyethyl-2-thio-, 367[8].
Benzenesulfonic acid, *p*-hydrazino-, P 3696[4].
$C_6H_8N_2O_4$ Barbituric acid, 5-β-hydroxyethyl-, 367[8].
5-Hydantoinpropionic acid, 2010[9].
$C_6H_8N_2O_4S$ Sulfide, 2,4 dinitrophenyl phenyl, 1142[5].
$C_6H_8N_2O_5$ Alloxanic acid, Et ester, 3691[4].
4 - Imidazolecarboxylic acid, 4-ethoxytetrahydro-2,5-diketo-, 3691[6].
$C_6H_8N_2O_6S_2$ *m*-Benzenedisulfonamide, 4,6-dihydroxy-, 2841[7].
$C_6H_8N_4O_3$ Uracil, 6-amino-1-ethyl-5-nitroso-, 901[5].
$C_6H_8N_6O_4$ Benzene, 1,5-dihydrazino-2,4-dinitro-, *salts*, 750[6].
$C_6H_8N_6O_{18}$ Mannitol hexanitrate, 3043[7].
C_6H_8O Δ^2-Cyclohexenone, 1061[1].
$C_6H_8O_2$ (See also *Sorbic acid.*)
Δ^2-Cyclopentenone, 2-hydroxy - 3 - methyl-, 2484[6].
Propiolic acid, propyl-, 2978[1].
$C_6H_8O_4$ Lactide, 1787[7].
Succinic acid, glycol cyclic ester, 2823[4].
$C_6H_8O_5$ Adipic acid, α-keto , 1871[5].
$C_6H_8O_6$ Acetyl peroxide-succinic acid, 369[4].
Glucuronic acid, lactone, 2985[8].
Tricarballylic acid, 50[6].
$C_6H_8O_6U$ Pyrocatecholaquouranic acid, 557[5].
$C_6H_8O_7$ (See also *Citric acid.*)
Saccharic acid, monolactone, *Na salt*, 1057[9].
$C_6H_9AsN_2O_3$ Benzenearsonic acid, 3,4-diamino-, 1605[9].
$C_6H_9AsN_2O_4$ Benzenearsonic acid, 4,5-diamino-2-hydroxy-, 2318[6].
$C_6H_9Br_3O_3$ Paraldehyde, tribromo-, 362[4].
$C_6H_9Cd_2ClO_{10}$ + $3H_2O$, 720[2].
$C_6H_9ClN_2$ Imidazole, 5-chloro-1-ethyl-2-methyl-, *1624*[1].
$C_6H_9ClN_2O$ (See also *Amidol.*)
Isobutyronitrile, (α - chloroacetamido)-, 3299[2].
$C_6H_9ClO_2$ β-Pentenic acid, γ-chloro-α-methyl-(?), 2824[3].
$C_6H_9Cl_3O_2$ 2-Butanol, 1-trichloro-, acetate, 1218[1].
$C_6H_9IN_2$ 4 - Amino - 1 - methylpyridinium iodide, 1238[4].

C_6H_9NO *N*-Methylpyridinium hydroxide, 2025[4].

C_6H_9NOS Thiazole, 5-ethoxy-2-methyl-, 2679[7].
$C_6H_9N_3$ Hydrazine, (o-aminophenyl)-, *and -HCl*, 745[6,7].
$C_6H_9N_3O$ Pyrazolealdehyde, dimethyl-, oxime, 2857[1,2].
Pyrazolecarboxamide, dimethyl-, 2857[1,2,3].
$C_6H_9N_3O_2$ (See also *Cupferron; Histidine.*)
Δ^2 - 1 - Pyrazolinecarboxamide, 5-keto-3,4-dimethyl-, 1990[6].
Uracil, 6-amino-1-ethyl-, 901[5].
Urea, α-cyanoacetyl-β-ethyl-, 901[5].
$C_6H_9N_3O_2S$ Sulfanilic acid, hydrazide, *and di-HCl*, 1409[7,8].
$C_6H_9N_3O_3$ Hydantoin, 5-acetamido-3-methyl-, 1387[1].
Pyrazole, 5 ethoxy-3-methyl-4-nitro-, 2855[7].
$C_6H_9N_3O_4$ 4 - Imidazolecarboxamide, *N*-ethyl-tetrahydro-4-hydroxy-2,5-diketo-, 3691[5].
$C_6H_9N_5O$ Benzazimidole, N_2H_4 salt, 750[4].
$C_6H_9NaO_3$ + $2H_2O$ Acetoacetic acid, Et ester, Na deriv., 741[2].
$C_6H_9O_3Tl$ Acetoacetic acid, Et ester, Tl deriv., 49[7].
C_6H_{10} (See also *Cyclohexene.*)
Bicyclo[0.1.3]hexane, 406[6].
1,3-Butadiene, 2,3-dimethyl-, 3685[9].
1,2-Hexadiene, 3155[4].
$C_6H_{10}Br_2O_3$ Paraldehyde, dibromo-, 362[3].
$C_6H_{10}Br_4$ Bromination product from petroleum, 3559[6].
Hexane, tetrabromo-, 2146[5].
$C_6H_{10}Br_{12}Hg_6O_4$, 2295[6].
$C_6H_{10}ClNO_2$ Isovaleryl chloride, α-keto-β-methyl, oxime, 360[3].
$C_6H_{10}ClNO_3$ Carbamic acid, [β (chloroformyl)-isopropyl]-, Me ester, 44[3].
Isobutyric acid, (α-chloroacetamido)-, 3299[2].
$C_6H_{10}Cl_2O_2$ Propionic acid, 1,3-dichloropropyl ester, 2818[6].
$C_6H_{10}Cl_2O_2Te$ Bis(β-ketopropyl)tellurium dichloride, 413[8].
$C_6H_{10}MoNO_6$ Ammonium pyrogallolmolybdate, 3405[6].
$C_6H_{10}N_2$ Cyanamide, (cyclopropylmethyl)-methyl-, 390[3].
Pyrazole, 1-ethyl-3(and 5)-methyl-, 2494[2].
$C_6H_{10}N_2O$ Pyrazole, 5-ethoxy-3-methyl-, 2855[7].
-, 5-methoxy-3,4-dimethyl-, 2855[7].
5-Pyrazolone, 4-ethyl-3-methyl-, 1990[2].
—, 3,4,4-trimethyl-, 1990[2].
$C_6H_{10}N_2O_2$ Compd. from aminomethanesulfonic acid and Ac_2O, m. 90°, 3157[1].
1,2 - Cyclopentanedione, 3-methyl-, dioxime, 2484[9].
Glycine, *N*-(cyanomethyl)-, Et ester, 3283[2].
2,5-Piperazinedione, 3,6-dimethyl-, 1087[5], 1593[2], 2502[2].
Pyrazine, 1,4-dihydro 2,5-dimethoxy-, 57[9].
2,5 - Pyrazinediol, 1,4-dihydrodimethyl-, 3169[5].
$C_6H_{10}N_2O_2Te$ 1,2 - Telluropyran - 3,5(4,6)-dione, 2-methyl, dioxime, 413[6].
$C_6H_{10}N_2O_3$ Glyoxime, methyl-, mono-Me ether, Ac deriv., 746[8].
Hydantoin, 5-ethoxy-1-methyl-, 1387[8].
$C_6H_{10}N_2O_4$ Asparagine, N^{α}-acetyl-, 50[1].
$C_6H_{10}N_2O_5$ Allophanic acid, γ-(carboxymethyl)-, mono-Et ester, 2160[9].
Glutaric acid, α-carbamido-, 2010[9].
$C_6H_{10}N_2O_6$ Pyruvohydroxamic acid, dimer, 1978[8].
$C_6H_{10}N_4$ Cardiazole, 448[2], 3513[7].
$C_6H_{10}N_4O_2$ Uracil, 5,6-diamino-1-ethyl-, 901[6].
$C_6H_{10}N_6O_4$ 1,3,5 - Benzenetrihydrazine, 2,4-dinitro-, 1222[6].

$C_7H_5ClS_2$ Formic acid, chlorodithio-, Ph ester, 371[7].

$C_7H_5Cl_2IO$ Anisole, 2,4-dichloro-6-iodo-, 2841[4].
$C_7H_5Cl_2NO_2$ Anthranilic acid, 3,5-dichloro-, 908[5].
  Benzaldehyde, 2,4(and 2,6)-dichloro-3-hydroxy-, oxime, 1065[4].
  Benzoic acid, 4-amino-3,5-dichloro-, 908[6].
  Toluene, dichloronitro-, 1230[4], 2833[6].
$C_7H_5Cl_2N_3O$ 1,2,3-Benzotriazole, 5,6-dichloro-1-methoxy-, 750[7].
$C_7H_5Cl_3$ Toluene, α-trichloro-, P 51[3,4], 1396[4].
$C_7H_5Cl_3O_7S_3$ 1,3,5-Benzenetrisulfonyl chloride, 2-hydroxy-4-methyl-, 1395[8].
$C_7H_5FN_2O_5$ Anisole, 2-fluoro-4,6-dinitro-(?), 2840[5].
$C_7H_5HgIO_2$ Benzoic acid, *p*-(iodomercuri)-, *Na salt*, 1063[8].
$C_7H_5IN_2O_4$ Toluene, α-iodo-2,4-dinitro-, 905[2].
$C_7H_5IO_2$ Benzoic acid, iodo-, 2354[2].
  p-Toluquinone, 5-iodo-, 3449[4].
$C_7H_5IO_3$ Salicylic acid, iodo-, 91[5].
$C_7H_5IO_4$ Benzoic acid, *o*-iodoxy-, 3043[4].
$C_7H_5I_3O$ Anisole, 2,4,6-triiodo-, 1610[2].
$C_7H_5KO_6W$ Potassium monosalicylatotungstate, 3405[9].
$C_7H_5LiO_2$ + $2H_2O$ Salicylaldehyde, Li deriv., 741[3].
$C_7H_5MoO_6Tl$ + H_2O, 3656[9].
C_7H_5N Benzene, isocyano-, 593[7], 1070[9], 3165[9].
  Benzonitrile, 371[8], 2322[5].
C_7H_5NO (See also *Anthranil.*)
  Isocyanic acid, Ph ester, 901[2], 915[7], 3448[4].
  Salicylonitrile, 1216[6].
$C_7H_5NOS_2$ 1,3-Benzodisulfol-2-one, oxime, 3290[1].
$C_7H_5NO_2$ Benzoic acid, *o*-nitro-, 3396[2].
$C_7H_5NO_3$ (See also *Benzaldehyde, nitro-.*)
  Benzoic acid, *o*-nitroso-, 547[2].
$C_7H_5NO_3S$ See *Saccharin.*
$C_7H_5NO_4$ Benzoic acid, nitro, 181[9], 182[1], 689[2], 750[3], 1164[7], 2778[2].
  Quinolinic acid, 393[2].
$C_7H_5NO_5$ Chelidamic acid, 1991[5]
C_7H_5NS Benzisothiazole, *and $AgNO_3$ compd.*, 763[4].
  Isothiocyanic acid, Ph ester, 1081[5], 1223[2], 3288[2].
$C_7H_5NS_2$ Benzothiazole, 1-mercapto-, 1408[3].
$C_7H_5N_2NaO$ 2(3)-Benzimidazolone, mono-Na deriv., 381[9].
$C_7H_5N_2NaO_3$ Benzaldehyde, nitro-, oxime, *Na salt*, 3450[4].
$C_7H_5N_3O$ Benzoyl azide, 3448[4].
$C_7H_5N_3O_2$ Compd., m. 85–5.5°, from the phenylhydrazone of nitrophenylazoformaldehyde, 1223[7].
$C_7H_5N_3O_5$ Benzaldehyde, 2,4-dinitro-, oxime, 3450[4].
  Toluene, 3,5-dinitro-2-nitroso-, 2667[1].
$C_7H_5N_3O_6$ (See also *Toluene, trinitro-.*)
  Anisole, 2,4-dinitro-5-nitroso-, 2667[5].
$C_7H_5N_3O_7$ Anisole, 2,4,6-trinitro-, 177[5].
$C_7H_5N_3O_8$ Guaiacol, 4,5,6-trinitro-, 1394[9].
  Picric acid, methoxy-, 1394[8], 1395[5].
$C_7H_5N_5O_7$ Urea, picryl-, 1062[1].
$C_7H_5N_5O_8$ Tetryl, 2074[6], 2412[4].
$C_7H_5NaO_2$ See *Sodium benzoate.*
$C_7H_5NaO_3$ See *Sodium salicylate.*
$C_7H_5NaO_6W$ Sodium monosalicylatotungstate, 3405[9].
$C_7H_6AsNO_5$ 3-Benzoxazolinearsonic acid, 1,2-dihydro-1-keto-, P 2504[9].
C_7H_6BrCl Toluene, α-bromo-*m*(and *o*)-chloro-, 1066[1].
C_7H_6BrClO Anisole, 3-bromo-5-chloro-, 3449[1].
$C_7H_6BrCl_3OTe$ 5(or 6)-Bromo-*o*(or *p*)-anisyltellurium trichloride, 2670[2].
C_7H_6BrF Toluene, α-bromo-*m*(*o* and *p*)-fluoro-, 1066[1].
$C_7H_6BrHgNO_2$ Toluene, 4-(bromomercuri)-2-nitro-, 1794[1].
C_7H_6BrI Toluene, *m*(*o* and *p*)-bromo-α-iodo-, 1066[1].
C_7H_6BrNO Benzaldehyde, *o*-bromo-, oxime, *and -HCl*, 179[7].
$C_7H_6BrNO_2$ Cresol, bromonitroso-, 3449[2,3].
$C_7H_6BrNO_3$ Anisole, 3-bromo-2-nitro-, 1064[3].
  2-Pyrrolecarboxylic acid, 4-bromo-5-formyl-3-methyl-, 2160[3].
$C_7H_6Br_2$ Toluene, dibromo-, 1066[1].
$C_7H_6Br_4$ Bromination product, m. 273.5°, from Persian petroleum, 3559[6].
$C_7H_6Br_4OTe$ 5(or 6)-Bromo-*o*(or *p*)-anisyltellurium tribromide, 2670[2].
$C_7H_6ClHgNO_2$ Toluene, (chloromercuri)nitro-, 1794[1,2].
C_7H_6ClIO Anisole, 3-chloro-5-iodo-, 3449[1].
C_7H_6ClNO Benzaldehyde, *o*-chloro-, oxime, *-HCl*, 179[7].
$C_7H_6ClNO_2$ Benzaldehyde, chlorohydroxy-, oxime, 1065[3,4].
  Cresol, chloronitroso-, 3449[1].
  Picolinic acid, chloro-, Me ester, 3294[4].
  Toluene, chloronitro-, 174[6], 388[9], 2833[9].
  p-Toluquinone, 5-chloro-, 4-oxime, 3449[4].
$C_7H_6ClNO_3$ Anisole, 4-chloro-2-nitro-, 2319[7].
$C_7H_6Cl_2$ Toluene, 3,4-dichloro-, 2152[4].
$C_7H_6Cl_2N_2O_2$ *m*-Toluidine, 2,4-dichloro-6-nitro-, 2834[1].
$C_7H_6Cl_2O$ Benzyl alcohol, 3,4-dichloro-, 2152[5].
$C_7H_6Cl_2O_3S$ Benzenesulfonyl chloride, 5-chloro-2-methoxy-, 398[7].
$C_7H_6Cl_2O_4S_2$ Benzenedisulfonyl chloride, methyl-, 3586[8].
$C_7H_6Cl_2O_5S_2$ *m*-Benzenedisulfonyl chloride, 4-hydroxy-5-methyl-, 1395[6].
$C_7H_6FNO_3$ Anisole, 2-fluoro-4(and 6)-nitro-, 2840[6].
$C_7H_6HgINO_2$ Toluene, 4-(iodomercuri)-2-nitro-, 1794[1].
$C_7H_6HgO_3$ Benzoic acid, *p*-(hydroxymercuri)-, *Na salt*, 1063[2].
$C_7H_6HgO_3S$ *p*-Toluenesulfonic acid, 3-(hydroxymercuri)-, cyclic anhydride, 1225[3].
$C_7H_6INO_2$ Cresol, iodonitroso-, 3449[3,4].
  Toluene, α-iodo-3-nitro-, 905[2].
  p-Toluquinone, 5-iodo-, 4-oxime, 3449[4].
$C_7H_6INO_3$ Anisole, 3-iodo-5-nitro-, 3448[9].
$C_7H_6I_2O$ Anisole, 3,5-diiodo-, 3449[1].
$C_7H_6KNO_3$ *o*-Cresol, 6-nitro, K deriv., 741[4].
$C_7H_6LiNO_3$ *o*-Cresol, 6-nitro-, Li deriv., 741[4].
C_7H_6NNaO Benzaldehyde, oxime, Na salt, 3450[4].
$C_7H_6NNaO_3$ Benzoic acid, 3-amino-4-hydroxy-, Na deriv., 2993[8].
  o-Cresol, 6-nitro-, Na deriv., 741[4].
$C_7H_6N_2$ 1,4-Imidazopyridine, *and chloroplatinate*, 393[5,7].
$C_7H_6N_2O$ 2(3)-Benzimidazolone, 381[9].
$C_7H_6N_2O_3$ Benzaldehyde, nitro-, oxime, 3450[4].
$C_7H_6N_2O_4$ (See also *Toluene, dinitro-.*)
  Anthranilic acid, 4-nitro-, 2855[1].
  Pyrimidineacrylic acid, tetrahydrodiketo-, 3169[3].
  Salicylaldehyde, 5-nitro-, oxime, 1230[5].
$C_7H_6N_2O_5$ Anisole, 2,4-dinitro-, 2319[7].
  Cresol, dinitro-, 3769[6].
$C_7H_6N_2O_5S$ 4-Isoindazolesulfonic acid, 6,7-dihydroxy-, 1623[2].

$C_7H_6N_2O_6$ 4-Homopyrocatechol, 3,5-dinitro-, 3449^{6}.

$C_7H_8S_3$ Trithiodiacetylacetone cyclodisulfide (?) 199[9].
$C_7H_9BrN_2O_2$ Pyrazolecarboxylic acid, 4-bromo-1-ethylmethyl-, *and -HBr*, 2494[3,5].
—, 4-bromo-1,5-dimethyl-, Me ester, 2494[6].
$C_7H_9BrO_2$ Δ^2-Cyclopentenone, 2-bromo-3-hydroxy-4,4-dimethyl-, 3693[5].
$C_7H_9BrO_4$ 1,2-Cyclopropanedicarboxylic acid, 1-bromo-, di-Me ester, 49[1].
$C_7H_9ClN_2$ 2-*p*-Tolylenediamine, 5-chloro-, 174[3].
$C_7H_9ClN_2O$ 4-Pyrazolecarboxylyl chloride, 1,3,5-trimethyl-, 2856[9].
$C_7H_9ClO_4$ Succinic acid, α-(α-chloroethylidene)-β-methyl-, *and NH_3 addn. compd.*, 2824[4].
$C_7H_9Hg_2NO_2$ *o*-Toluidine, ?,?-bis(hydroxymercuri)-, 2318[1].
$C_7H_9LiO_4$ Salicylaldehyde, Li deriv., dihydrate, 741[3].
$C_7H_9MoNO_6$ + H_2O, 3656[3].
C_7H_9N (See also *Aniline, N-methyl-; Benzylamine; Toluidine.*)
2,5-Lutidine, *chloroplatinate*, 2501[1].
C_7H_9NO Cyclohexanone, 2-cyano-, P 2167[8].
Ketone, methyl 3-methyl-2-pyrryl, 3455[5].
$C_7H_9NO_2$ Pyrocatechol, 4-amino-, 405[1].
$C_7H_9NO_2S$ Aniline, *m*-(methylsulfonyl)-, *-HCl*, 1063[1].
$C_7H_9NO_4$ Succinimide, *N*-(hydroxymethyl)-, acetate, 365[7].
$C_7H_9N_3O$ Pyridine, 2-acetamido-5-amino-, 764[3].
Semicarbazide, 4-phenyl-, 3287[9].
$C_7H_9N_3O_3$ *o*-Phenylenediamine, 4-methoxy-5-nitro-, 2667[5].
5-Pyrimidinecarboxylic acid, 2-amino-1,4-dihydro-4-keto-, Et ester, 206[6].
2,3-Pyrroledicarboxylic acid, 4-methyl-, 3-hydrazide, 3455[6].
$C_7H_9N_3O_4$ Benzoic acid, nitro-, N_2H_4 salt, 750[3].
$C_7H_9N_3O_5$ Δ^2-1-Pyrazolinecarboxylic acid, 5-keto-3-methyl-4-nitro-, Et ester, 1990[7].
$C_7H_9O_4P$ Benzyl alcohol, phosphate, *Ba salt*, 1588[9].
$C_7H_{10}AgN_3O_2$ Δ^2-1-Pyrazolinecarboxamide, 4-ethyl-2-keto-3-methyl-, Ag deriv., 1990[7].
$C_7H_{10}AsNO_3$ Arsanilic acid, *N*-methyl-, 2838[5].
$C_7H_{10}Br_2O_4$ Glutaric acid, α,γ-dibromo-, di-Me ester, 48[8].
$C_7H_{10}ClNO_4$ Valeric acid, δ-chloro-γ,δ-diketo-, δ-oxime, Et ester, 360[3].
$C_7H_{10}Cl_2O_2$ Adipyl chloride, β-methyl-, 2990[1].
Malonyl chloride, diethyl-, 1226[3].
$C_7H_{10}Cl_2O_2Te$ 1,2-Telluropyran-3,5(4,6)-dione, 4-ethyl-, 1,1-dichloride, 193[1].
$C_7H_{10}IN$ 1-Ethylpyridinium iodide, 3008[9].
1-Methyl-2-picolinium iodide, 1627[8].
$C_7H_{10}I_2O_4$ Glutaric acid, α,γ-diiodo-, di-Me ester, 48[8].
$C_7H_{10}N_2$ Adiponitrile, β-methyl-, 2990[3].
Cyanamide, diallyl-, 169[2].
Hydrazine, benzyl-, 3006[1].
Pyridine, 4-dimethylamino-, *and salts*, 1238[7].
Tolylenediamine, P 210[6], 2301[5], 2961[2].
$C_7H_{10}N_2O_2$ Pyrazolecarboxylic acid, dimethyl-Me ester, 2494[6].
—, 1-ethylmethyl-, 2494[2].
—, 1,3,5-trimethyl-, 2856[9].
$C_7H_{10}N_2O_2S$ 2-Oxazolidone, 3-(allylthiocarbamyl)-, 2161[2].
4(1)-Pyrimidone, 5-(hydroxymethyl)-6-methyl-2-(methylmercapto)-, 2682[1].

$C_7H_{10}N_2O_3$ Δ^2 - 1 - Pyrazolinecarboxylic acid, 5-keto-3-methyl-, Et ester, 1990[8].
$C_7H_{10}N_2O_3S$ Toluenesulfonic acid, diamino-, *Na salt*, 3448[3].
$C_7H_{10}N_2O_4S_2$ *m*-Benzenedisulfonamide, 4-methyl-, 3450[5].
$C_7H_{10}N_4O$ Desoxytheobromine, 2827[3].
$C_7H_{10}N_6O_4$ Hydrazine, (2,4-dinitro-5-*m*-tolylene)bis-, 1222[9].
$C_7H_{10}O$ Δ^2-Cyclohexenone, methyl-, 744[8], 2150[1].
$C_7H_{10}O_2$ Cyclopenteneacetic acid, 3160[9].
Δ^2 - Cyclopentenone, 2-methoxy-3-methyl-, 2484[9].
2-Pentin-1-ol, acetate, 2979[9].
$C_7H_{10}O_2Te$ 1,2 - Telluropyran - 3,5(4,6) - dione, 4,4-dimethyl-, 1301[6].
—, ethyl-, 192[9], 2315[7].
$C_7H_{10}O_4$ Glutaconic acid, di-Me ester, 49[3].
α-Pentenic acid, *α*-hydroxy-*γ*-keto-, Et ester, 3006[2].
Valeric acid, *α*,*γ*-diketo-, Et ester, 2483[5], 3284[2].
$C_7H_{10}O_5$ 1,2 - Cyclopentanedicarboxylic acid, 1-hydroxy-, *and di-Ag salt*, 2830[8].
Glutaric acid, *α*-keto-*β*,*β*-dimethyl-, 3155[1].
Mesoxalic acid, di-Et ester, 50[5].
$C_7H_{10}O_5S_2$ Succinic acid, dithiocarbethoxyoxy-, *and Ba salt*, 372[8,9].
$C_7H_{10}O_6$ Glutaric acid, *β*-(carboxymethyl), 49[8].
$C_7H_{10}S$ Thiophene, 2 isopropyl-, 3005[7].
—, 2-propyl-, 3005[7].
$C_7H_{11}Br$ 1-Heptine, 1-bromo-, 1783[1].
$C_7H_{11}BrO_2$ Δ^2-1-Butenol, 3-bromo-2-methyl-, acetate, 38[8].
$C_7H_{11}Br_2N_3OS$ Oxazolidine, 3-(*β*,*γ*-dibromopropyl)thiocarbamyl-, 2161[2].
$C_7H_{11}ClO$ Cyclohexanone, 2-chloro-2-methyl-, 744[7].
$C_7H_{11}Cl_3O_2$ 2-Pentanol, 1-trichloro, acetate, 1218[1].
$C_7H_{11}I$ 1-Heptine, 1-iodo-, 1783[1].
$C_7H_{11}N$ Pyrrole, 2-ethyl-4-methyl-, 1236[5].
—, trimethyl-, 1236[2]; *$HgCl_2$ compd.*, 387[5].
$C_7H_{11}NO$ Δ^2-Cyclohexenone, 2-methyl-, oxime, 744[8].
$C_7H_{11}NO_2$ See *Arecoline*.
$C_7H_{11}NO_3$ Heptanetrione, monoxime, 3403[6].
Succinimide, *N*-(ethoxymethyl)-, 365[7].
$C_7H_{11}NO_5$ Glutamic acid, *N*-benzoyl-, 2983[2].
$C_7H_{11}NO_5S$ Succinic acid, (dimethylcarbamylmercapto)-, 373[1].
$C_7H_{11}NO_{17}STh_3$ + $7H_2O$, 1569[6].
$C_7H_{11}N_3$ Toluenetriamine, 3446[3].
$C_7H_{11}N_3O$ Imidazole, 2 - acetamido - 4,5 - dimethyl-, 193[9].
4 - Pyrazolecarboxamide, 1,3,5 - trimethyl-, 2857[1].
$C_7H_{11}N_3OS$ Oxazolidine, 3 - (allylthiocarbamyl)-2-imino-, 2161[2].
Δ^2 - Oxazoline, 2 - (*β* - allylthiocarbamido)-, 2161[2].
$C_7H_{11}N_3O_2$ Δ^2 - 1 - Pyrazolinecarboxamide, 4-ethyl-2-keto-3-methyl-, 1990[7].
$C_7H_{11}N_3O_4$ Hydroxonic acid, 3-methyl-, Et ester, 1387[2].
4 - Imidazolecarboxamide, 4 - ethoxytetrahydro - 2,5 - diketo - *N* - methyl-, 3691[5].
$C_7H_{11}N_3O_6$ Galacturonic acid, lactone, semicarbazone, 1059[2].
$C_7H_{11}N_3O_7$ Mannosaccharic acid, dilactone, monosemicarbazone, 1059[2].
$C_7H_{11}N_3O_7S_3$ 1,3,5 - Benzenetrisulfonamide, 2-hydroxy - 4 - methyl-, 1395[8].
$C_7H_{11}N_5O$ Pyrazolealdehyde, dimethyl-, semicarbazone, 2857[1,2].
$C_7H_{11}NaO_4$ Malonic acid, di-Et ester, Na deriv., 2320[6], 2823[8], 3446[4].
$C_7H_{11}O_6Tl_3$ Glucoside, methyl-, tri-Tl deriv., 2310[7].
C_7H_{12} Cyclohexene, methyl-, 2113[1].
Heptadiene, 2146[6], 3155[4].
$C_7H_{12}AsNO_3$ 3 - Pyrrolearsonic acid, 2,4,5-trimethyl-, 387[9].
$C_7H_{12}Br_2N_2O_2S$ 2 - Oxazolidone, 3 - (*β*,*γ* - dibromopropyl)thiocarbamyl-, 2161[2].
$C_7H_{12}Cl_2O_2$ Butyric acid, 1,3 - dichloropropyl ester, 2818[6].
$C_7H_{12}Cl_4O_2$ Methane, bis(*β*,*β*′ - dichloroisopropoxy)-, 3688[1].
$C_7H_{12}N_2$ *β* - Pentenonitrile, *α* - dimethylamino-, 1053[5].
$C_7H_{12}N_2O$ Pyrazole, 5 - ethoxy - 3,4 - dimethyl-, 2855[7].

Hexane, 3-methyl-, 2480[4].
Pentane, dimethyl-, 2480[4].
$C_7H_{16}BrNO_2$ (Carboxymethyl)trimethylammonium bromide, Et ester, 3688[8].
Choline, bromide, acetate, 2311[6].
$C_7H_{16}NO_4P$ Ethanephosphonic acid, β-carbamyl-, di-Et ester, 2978[9].
$C_7H_{16}N_2$ Base from spermine, 3172[9].
$C_7H_{16}N_2S$ Pseudourea, α,β-diethyl-α,γ-dimethylthio-, 374[8].
Urea, α,β-diethyl-α,β-dimethylthio-, 374[2].
Urea, *s*-dipropylthio-, 2835[3].
$C_7H_{16}N_4O_2$ Arginine, N^{α}-methyl-, *and salts*, 3691[1].
Lysine, N^{ϵ}-guanyl-, *and salts*, 3690[6,7].
$C_7H_{16}N_4O_3$ Propionic acid, α(or β)-amino-β(or α)-(α,β-diaminopropionylamino)-, Me ester, 2983[4].
$C_7H_{16}O$ 1-Butanol, 2-ethyl-2-methyl-, 2481[4].
Heptyl alcohol, 1865[9], 3280[2].
$C_7H_{16}O_2$ Acetone, di-Et acetal, 2937[7].
3,4-Heptanediol, 1386[3].
2,3-Pentanediol, 2,4-dimethyl-, 1786[4].
$C_7H_{16}O_3$ Orthoformic acid, tri-Et ester, 41[7].
$C_7H_{16}O_4$ Glyceraldehyde, di-Et acetal, 3692[9].
$C_7H_{16}O_4S_2$ See *Sulfonal.*
$C_7H_{16}Se_2$ Propane, 2,2-bis(ethylselenyl)-, 1051[5].
$C_7H_{16}Zn$, 2468[1].
$C_7H_{17}N$ *tert*-Amylamine, *N*,*N*-dimethyl-, 1053[7].
$C_7H_{17}NO$ 2-Butanol, 3-dimethylamino-2-methyl-, *and -HCl*, 2820.
Diethylamine, *N*-(ethoxymethyl)-, 2303[4].
Ethanol, 2-isoamylamino-, 1629[4].
$C_7H_{17}NO_2$ See *Choline, acetyl-.*
$C_7H_{17}N_3$ Guanidine, α-ethyl-α,β,γ,γ-tetramethyl-, 374[8].
$C_7H_{17}O_6P$ Glycerophosphoric acid, di-Me ester, di-Me ether, 1219[1,2,6].
$C_7H_{18}INO$ Diethyl(methoxymethyl)methylammonium iodide, 2309[7].
(γ-Hydroxy-α-methylpropyl)trimethylammonium iodide, 1788[6].
$C_7H_{19}NO$ Butyltrimethylammonium hydroxide, 3747[4].
$C_7H_{22}Cl_7FeN_4$, 25[5].
$C_8H_2As_2I_2N_2O_4S_2$ Thiophene, 2,2′-arsenobis-[5-iodonitro-, 1407[3].
$C_8H_3BrO_2S_2$ 1,4-Benzodithiin-2(3)-one, 6 (or 7)-bromo-, 1797[9].
$C_8H_3NO_3$ Quinolinic anhydride, 764[7].
$C_8H_4Ag_2N_2O_2$ 2,3(1,4)-Quinoxalinedione, di-Ag deriv., 382[1].
$C_8H_4As_2Br_2S_2$ Thiophene, 2,2′-arsenobis[5-bromo-, 1407[3].
$C_8H_4As_2I_2S_2$ Thiophene, 2,2′-arsenobis[5-iodo-, 1407[3].
$C_8H_4As_2N_2O_4S_2$ Thiophene, 2,2′-arsenobis[5-nitro-, 1407[3].
$C_8H_4BrClO_2$ 2(1)-Benzofuranone, 1-bromo-4-chloro-, 3004[7].
$C_8H_4Br_2O_6$ Phthalic acid, 3,5-dibromo-4,6-dihydroxy-, *and salts*, 1613[1,3].
$C_8H_4Br_5NO$ Acetanilide, *ar*-pentabromo-, 3162[3].
$C_8H_4Cl_2O_2$ Phthalyl chloride, 1226[2].
Terephthalyl chloride, 380[6].
$C_8H_4NNaO_2$ Isatin, Na deriv., 2997[4].
$C_8H_4N_2O_4$ Isatin, 5(and 6)-nitro-, 2854[9].
$C_8H_4N_2O_5$ Isatoic anhydride, 4(and 5)-nitro-, 2855[1].
$C_8H_4N_2S$ Benzonitrile, o-thiocyano-, 2995[9].
$C_8H_4N_4OS$ 2-Benzisothiazolecarboxylyl azide, 763[5].
$C_8H_4O_3$ Phthalic anhydride, 1075[6], 3164[2], P 3171[1], P 3460[8].
$C_8H_5AgN_2O_2$ 2,4(1,3)-Quinazolinedione, mono-Ag deriv., 382[1].
$C_8H_5AsO_6$ Phthalic acid, 3-arsono-, anhydride, 3162[8].
$C_8H_5BrClNO$ Benzoxazole, 6-bromo-4-chloro-1-methyl-, 194[2].
$C_8H_5BrOS_2 + 2H_2O$ 1,4-Benzodithiin-2,3-dione, 6-bromo-, 1797[8].
$C_8H_5BrO_6$ Isophthalic acid, 5-bromo-2,4-dihydroxy-, *and salts*, 1613[1,3].
$C_8H_5Br_2N$ *o*-Tolunitrile, α,α-dibromo-, 1614[2].
$C_8H_5Br_2NO$ Benzoxazole, 4,6-dibromo-1-methyl-, 194[2].
$C_8H_5Br_2NO_3$ Acetophenone, α,2-dibromo-5-nitro-, 1230[2].
$C_8H_5ClN_2O$ 1-Phthalazinol, 4-chloro-, 185[6].
$C_8H_5ClN_4O_2$ 1,2,3,5-Tetrazole, 4-(5-chlorosalicylyl)-, 3004[7].
$C_8H_5ClO_6$ Isophthalic acid, 5-chloro-2,4-dihydroxy-, *and salts*, 1613[1,3].
$C_8H_5Cl_2N_3O_2$ Benzazimidole, 5,6-dichloro-, acetate, 750[7].
$C_8H_5Cl_3O_2$ Benzaldehyde, 2,4,6-trichloro-3-methoxy-, 1065[8].
$C_8H_5Cl_3O_3$ Benzoic acid, 2,4,6-trichloro-3-methoxy-, 1065[8].
$C_8H_5FeO_4$ Gallacetophenone, Fe deriv., 405[9].
$C_8H_5HgNO_3$ Salicylic acid, cyanomercuri-, 91[3], 1685[1].
$C_8H_5KN_2O_2$ 2,3(1,4)-Quinoxalinedione, mono-K deriv., 382[1].
C_8H_5NO Benzoyl cyanide, 1798[7], 2323[8], 3448[8].
$C_8H_5NO_2$ Isatin, 193[1], 758[5], 1804[6].
Phthalimide, 184[9], P 424[9].
$C_8H_5NO_2S$ 2-Benzisothiazolecarboxylic acid, 763[4].
1-Benzothiazolecarboxylic acid, 600[1].
$C_8H_5NO_3$ Anthroxanic acid, 179[9], 1620[8].
$C_8H_5NO_3S$ Salicylic acid, 5-thiocyano-, 1603[9].
$C_8H_5N_2NaO_2$ 2,4(1,3)-Quinazolinedione, mono-Na deriv., 382[1].
$C_8H_5N_3O_2$ 2(1)-Benzofuranone, 1-triazo-, 3004[4].
$C_8H_5N_3O_7$ Acetophenone, 2,4,6-trinitro-, 376[1].
$C_8H_5N_3S_2$ Aniline, 2,4(?)-dithiocyano-, 1603[7].
$C_8H_5N_7O$ 1,2,3,5-Tetrazole-4-carboxylyl azide, 1-phenyl-, 763[9].
C_8H_6 Benzene, ethinyl-, 173[7].
$C_8H_6As_2S_2$ Thiophene, 2,2′-arsenobis-, 1407[3].
$C_8H_6BrClO_2$ Phenol, 3-bromo-5-chloro-, acetate, 3449[1].
$C_8H_6BrClO_4$ Quinone, 2-bromo-6-chloro-3,5-dimethoxy-, 1225[7].
$C_8H_6BrIO_2$ Phenol, 3-bromo-5-iodo-, acetate, 3449[2].
C_8H_6BrN See *Tolunitrile, bromo-.*
C_8H_6BrNO Benzoxazole, 4-bromo-1-methyl-, 194[2].
$C_8H_6BrNO_3$ Acetophenone, 2-bromo-5-nitro-, 1230[2].
$C_8H_6BrNO_4$ Phenol, 3-bromo-5-nitro-, acetate, 3448[9].
$C_8H_6Br_2Cl_2O_2$ Benzene, 1,3-dibromo-4,6-dichloro-2,5-dimethoxy-, 1609[8].
$C_8H_6Br_2N_2O_6$ Benzene, 1,3-dibromo-2,5-dimethoxy-4,6-dinitro-, 1394[2].
$C_8H_6Br_2O_2$ Phenol, 3,5-dibromo-, acetate, 3449[1].

$C_8H_6Br_3NaO_3$ Phenol, 3,4,5-tribromo-2,6-dimethoxy-, Na deriv., 2320[4].
$C_8H_6Br_4O_2$ Benzene, 1,2,4,5-tetrabromo-3,6-dimethoxy-, 1394[6].
$C_8H_6ClIO_2$ Phenol, 3-chloro-5-iodo-, acetate, 3449[2].
C_8H_6ClNO Benzoxazole, 4-chloro-1-methyl-, 194[1].
$C_8H_6ClNO_2$ Glyoxal, (*p*-chlorophenyl)-, oxime, 360[4].
Glyoxylyl chloride, phenyl-, oxime, 360[4].
$C_8H_6ClNO_4$ Anisoyl chloride, 3-nitro-, 394[3].
Phenol, 3-chloro-5-nitro-, acetate, 3448[9].
$C_8H_6ClN_3O_5$ Acetanilide, 5-chloro-2,4-dinitro-, 590[8].
$C_8H_6ClN_3O_8$ Benzene, 1-chloro-3,5-dimethoxy-2,4,6-trinitro-, 1395[5], 2317[4].
$C_8H_6Cl_2N_2O_6$ Benzene, 1,3-dichloro-2,5-dimethoxy-4,6-dinitro-, 1394[6].
$C_8H_6Cl_2O_2$ Benzaldehyde, 2,4(and 2,6)-dichloro-3-methoxy-, 1065[6].
Phenol, 3,5-dichloro-, acetate, 3449[1].
$C_8H_6Cl_2O_3$ Benzoic acid, 2,6-dichloro-3-methoxy-, 1065[6].
$C_8H_6Cl_2Hg_2NO$ Acetanilide, 2-chloro-4,6-bis-(chloromercuri)-, 589[5].
C_8H_6IN Tolunitrile, α-iodo-, 905[3], 1230[7].

$C_8H_8ClN_3O$ 1,2,3 - Benzotriazole, 5 - chloro-1-ethoxy-, 750^6.
$C_8H_8ClN_3O_2$ Benzaldehyde, chlorohydroxy-, semicarbazone, $1065^{3,4}$.
$C_8H_8Cl_2O$ Anisole, 2,5 - dichloro - 3 - methyl-, 2842^3.
$C_8H_8CuN_2O_2$ Mandelamide, oxime, Cu deriv., 1055^7.
$C_8H_8Cu_2Mo_4O_{22}$ Copper dimolybdomalate, 1184^9.
$C_8H_8K_4Mo_4O_{22}$ Potassium dimolybdomalate, 1184^9
$C_8H_8Li_4Mo_4O_{22}$ Lithium dimolybdomalate, 1184^9.
$C_8H_8Mo_4Na_2O_{22}$ Compd. from di-Et malate and MoO_3, 1591^1.
$C_8H_8Mo_4Na_4O_{22}$ Sodium dimolybdomalate, 1184^8.
$C_8H_8Mo_4Ni_2O_{22}$ Nickel dimolybdomalate, 1184^9.
$C_8H_8NNaO_2$ Anisaldehyde, oxime, Na salt, 3450^4.
Benzaldehyde, methoxy-, oxime, Na salt, 3450^4
$C_8H_8N_2$ Cyanamide, methylphenyl, 390^1.
1,4 - Imidazopyridine, 2(or 3) - methyl, *chloroplatinate*, 393^7.
$C_8H_8N_2O$ Glyoxal, monophenylhydrazone, 2821^6.
$C_8H_8N_2O_2$ Ricinine, 914^9.
$C_8H_8N_2O_3$ Glyoxylohydroxamic acid, phenyl-, oxime, 1978^8, 2822^5; *and salts*, $746^{4,5}$.
p-Tolualdehyde, 3-nitro-, oxime, *and -HCl*, 179^8.
$C_8H_8N_2O_3S$ Carbamic acid, thiol-, *p*-nitrobenzyl ester, 905^2
$C_8H_8N_2O_4$ Acetanilide, 2 - hydroxynitro-, 2318^3, 2840^3.
Acetophenone, 2 - hydroxy - 5 - nitro, oxime, 1230^3
Dipicolinic acid, 4 methylamino, 396^1, 1238^5
Picolinic acid, 3 (carboxymethyl)amino-, 396^7
$C_8H_8N_2O_5$ Anisole, 3°- methyl - 2,6 - dinitro-, 3448^3.
Phenetole, 2,4-dinitro-, 2319^7.
$C_8H_8N_2O_6$ Creosol, dinitro, 907^9, 908^1, 3449^6.
Isocreosol, 4,6-dinitro, 3449^5.
$C_8H_8N_2S$ Benzothiazole, 1-aminomethyl-, $2858^{3,4,5}$.
—, 1-methylamino, 2857^9.
Benzothiazoline, 1-imino 2 methyl-, 2857^9
$C_8H_8N_4O$ 1,2,4 - Oxdiazole, 3 (or 5) - amino-5(or 3) - anilino, *and salts*, 2161^6.
$C_8H_8N_4O_3S$ Sulfanilyl azide, *N*-acetyl, 1409^8.
$C_8H_8N_4O_5$ Urea, α - (2,4 - dinitrophenyl) β methyl, 590^4.
—, (dinitro - *m* - tolyl)-, $173^{5,6}$.
$C_8H_8N_6O$ 1,2,3,5 - Tetrazole - 4 - carboxylic acid, 1 - phenyl-, hydrazide, *and -HCl*, 763^8.
C_8H_8O See *Acetophenone; Tolualdehyde.*
$C_8H_8O_2$ (See also *Anisaldehyde; Toluic acid.*)
Acetic acid, Ph ester, 408^4.
Benzaldehyde, *o*-methoxy-, 2310^7.
Δ^3 - 2 - Butenone, 4-(2-furyl)-, 412^9, 3005^1.
p-Xyloquinone, 3308^2.
$C_8H_8O_2S$ Thionaphthene, 1,2 - dihydro-, *S*-dioxide, 193^6, 905^8.

m-Toluic acid, 6-mercapto-, 199^{4}, 202^{9}, 1396^{9}, 1397^{4}.

$C_8H_8O_3$ (See also *Mandelic acid; Vanillin.*)
Anisic acid, 795^{8}, 3060^{9}.
Benzoic acid, hydroxy-, methyl ester, 3712^{8}.
1,2-Phthalandiol, 3164^{2}.
Salicylic acid, Me ester, 523^{2}, 2021^{6}.
α-Toluic acid, *m*-hydroxy-, 2527^{9}.

$C_8H_8O_3S$ Benzoic acid, *m* - methylsulfinyl-, 3448^{7}.

$C_8H_8O_4$ Homogentisic acid, 946^{1}.
Quinone, 2,5 - dihydroxy - 3,6 - dimethyl-, 2842^{7}.

$C_8H_8O_4S$ Benzoic acid, *o*-(methylsulfonyl), 2995^{3}.
2,5 - Thiophenedicarboxylic acid, 3,4 - dimethyl-, *and salts*, 386^{9}, 387^{1}.

$C_8H_8O_5$ Acetic acid, (2,3 - dihydroxyphenoxy)-, 1987^{1}.
Addn. compd., m. 98°, of oxalic acid and PhOH, 47^{1}.
Gallic acid, Me ester, 1987^{3}.

$C_8H_8O_6$ Addn. compd., m. 197°, of hydroquinol and oxalic acid, 47^{3}.

$C_8H_8O_7$ (See also *Citric acid.*)
Tartaric anhydride, diacetate, 50^{2}.

$C_8H_8O_{12}U + 2H_2O$ Uranium tartrate, 3139^{7}.

C_8H_8S Isothionaphthene, 1,2-dihydro-, $905^{8,9}$, 1804^{6}, *and $HgCl_2$ compd*, 193^{5}.

$C_8H_9AsClNO_5$ *m* - Arsanilic acid, *N* - acetyl-5-chloro 4-hydroxy-, P 2504^{6}.
—, *N* - chloroacetyl - 4 - hydroxy-, *and Na salt*, 1985^{1}

$C_8H_9AsINO_5$ *m* - Arsanilic acid, *N* - acetyl - 4 - hydroxy - 5 - iodo, 1607^{1}, 3289^{2}.

$C_8H_9AsO_6$ Benzenearsonic acid, *m*(and *p*)-carboxyoxy, Me ester, 1984^{8}

C_8H_9Br Xylene, bromo-, 1794^{4}, 2555^{3}.

C_8H_9BrO Anisole, bromovinyl-, 3164^{9}
Ether, *o*(and *p*) bromobenzyl methyl, 1063^{7}.

$C_8H_9BrO_3$ Phenol, 3 - bromo - 2,6 - dimethoxy-, 1225^{6}.

C_8H_9Cl Benzene, chloroethyl-, P 1631^{4}
Xylene, chloro-, P 1631^{4}.

C_8H_9ClO Anisole, chloromethyl-, $2842^{1,2}$.
Ether, benzyl chloromethyl, 581^{8}.
Phenetole, β-chloro, 3687^{7}.

$C_8H_9ClO_3$ Phenol, 3 - chloro - 2,6 - dimethoxy-, 3694^{9}.

$C_8H_9ClO_3S$ Anisole, 4 - chloro - 2 - (methylsulfonyl)-, 398^{7}.

$C_8H_9Cl_3OTe$ Methylanisyltellurium trichloride, $2670^{1,2}$.
p - Phenetyltellurium trichloride, 907^{1}.

$C_8H_9Cl_3O_2Te$ (2,4 - Dimethoxyphenyl)tellurium trichloride, 907^{2}.

$C_8H_9IN_2O_2$ Aniline, 4 - iodo - *N*, *N* dimethyl-2 nitro-, 3288^{2}.

C_8H_9N Pyridine, 3-isopropenyl-, 2499^{4}.

C_8H_9NO (See also *Acetanilide.*)
Acetophenone, amino, 242^{2}, 750^{1}, 1926^{2}.
—, oxime, 1615^{1}.
α-Toluamide, 2997^{5}.

C_8H_9NOS Carbamic acid, thiono-, benzyl ester, 1395^{9}.

$C_8H_9NO_2$ Acetaldehyde, hydroxy-, 2778^{2}.
Anisaldehyde, oxime, 3450^{4}.
Anthranilaldehyde, methoxy-, *and -HCl*, $402^{8,9}$.
Anthranilic acid, Me ester, *-HCl*, 403^{7}.
Benzaldehyde, methoxy-, oxime, 3450^{4}.
Benzene, ethylnitro-, P 1631^{4}.
Benzoic acid, *p*-amino-, Me ester, 2322^{7}.
Formanilide, *o* - hydroxy - *N* - methyl-, 1079^{9}.
Mandelamide, 378^{3}.
Phenol, *p*-amino-, acetate, 2841^{4}.
Piperonylamine, *-HCl*, 405^{1}.
Toluic acid, amino-, 56^{6}, 182^{3}, 2527^{9}.
Xylene, nitro-, P 1631^{4}, 2153^{4}.

$C_8H_9NO_3$ Acetophenone, α - amino - *ar* - dihydroxy-, 242^{2}.
Phenetole, nitro-, 1793^{8}.
3 - Pyrrolecarboxylic acid, 5 - acetyl - 4-methyl-, 3455^{5}.

$C_8H_9NO_3S$ Anisole, methylmercaptonitro-, $1796^{6,7}$, $3290^{4,6}$.
Benzenesulfinic acid, *p*-acetamido-, 177^{4}.

$C_8H_9NO_4$ Benzene, 1,4 - dimethoxy - 2 - nitro-, 1394^{7}.
Creosol, 6-nitro, 908^{1}.
Isocreosol, 6-nitro, 3149^{8}.

$C_8H_9NO_4S$ Anisole, 2 - (methylsulfinyl) - 5 - nitro-, 3290^{6}.
Sulfanilic acid, *N*-acetyl-, *K salt*, 1061^{5}.

$C_8H_9NO_5S$ Anisole, 2 - (methylsulfonyl) - 3-(4,5 and 6) - nitro-, 3290^{5}.

$C_8H_9N_2O_3$ Acetanilide, *o*-nitro-, P 916^{9}.

$C_8H_9N_3$ Benzimidazole, 4(and 7) - amino - 2 - methyl-, 2497^{6}.

$C_8H_9N_3O_2$ Pyruvic acid, 4 - pyridylhydrazone, 1807^{5}.

$C_8H_9N_3O_5$ Hydroxylamine, β - (4,6 - dinitro-*o*-tolyl)-α-methyl-, 2667^{1}.

$C_8H_9N_3O_6$ Hydroxylamine, β-(4,6-dinitro-*m*-anisyl) α-methyl-, 2667^{4}.

$C_8H_9N_5O_4S$ Semicarbazide, 1-(dinitro-*m*-tolyl)thio-, $3062^{2,3}$.

C_8H_{10} See *Benzene, ethyl-; Xylene.*

Cyclopentanecarboxylic acid, 3-keto-, Et ester, 2823^{8}.
Cyclopentanone, 2 - hydroxy - 3 - methyl-, acetate, 2485^{1}.

$C_8H_{12}O_4$ 1,2 - Cyclohexanedicarboxylic acid, *di-Ag salt*, 409^{6}.
Fumaric acid, di-Et ester, 1033^{2}, 2335^{8}.
1,6 - Δ^1 - Hexenedicarboxylic acid, 2831^{1}.
Malic acid, di-Et ester, 1033^{2}.

$C_8H_{12}O_5$ Glutaric acid, β - ethyl - α - keto - β-methyl-, 3155^{1}.

$C_8H_{12}O_6$ Glutaric acid, β - (carboxymethyl)-β-methyl-, 49^{1}.
2,3,4 - Pentanetriol, triformate, 2146^{9}.

$C_8H_{12}O_8Pb$ See *Lead acetates*.

$C_8H_{12}S$ Thiophene, 2 (and 3)-butyl-, $3005^{4,5,7}$.

$C_8H_{13}BrN_2O_4$ Δ^2 - Oxazoline, 2 - acetamido - 5-(bromomethyl)-, acetate, 2161^{3}.

$C_8H_{13}BrO$ Acetophenone, α - bromohexahydro-, 1783^{7}.

$C_8H_{13}BrO_2$ Cyclohexanol, 2 - bromo-, acetate, 2979^{3}.

$C_8H_{13}Br_2NO_2$ Nipecotic acid, dibromo - 1,4-dimethyl-, *-HBr*, 1810^{6}.

$C_8H_{13}ClN_2O_4$ Alanine, *N* - (*N* - chloroacetylalanyl)-, 3299^{2}.
Δ^2 - Oxazoline, 2 - acetamido - 5 - (chloromethyl)-, acetate, 2161^{3}.

$C_8H_{13}ClO_2$ Cyclohexanol, 2-chloro-, acetate, 2831^{7}.

$C_8H_{13}IN_2$ Pyridine, 1,2-dihydro-1-methyl-2-methylimino-, methiodide, 3009^{1}.

$C_8H_{13}IN_2O_2$ 3 - Pyrazolecarboxylic acid, 1,5-dimethyl-, Me ester, methiodide, 3006^{6}.

$C_8H_{13}MoN_3O_8$ + $2H_2O$ Guanidine monogallatomolybdate, 3406^{1}.

$C_8H_{13}N$ Pyrrole, ethyldimethyl-, 1236^{1}, 1621^{2}.

$C_8H_{13}NO$ 2 - Furanpropylamine, α - methyl-, 413^{3}.

$C_8H_{13}NO_2$ (See also *Arecoline*.)
Nicotinic acid, tetrahydro - 1,4 - dimethyl-, *and derivs.*, $1810^{5,6}$.
NO_2Te 1,2 - Telluropyran - 3,5(4,6)-dione, 4 - ethyl - 2 - methyl-, monoxime, 413^{6}.

$C_8H_{13}NO_5$ Aspartic acid, *N* - acetyl-, di-Me ester, 1056^{9}.

$C_8H_{13}NO_6$ Propionic acid, α,α′ - [(carboxymethyl)imino]bis-, *and Cu salt*, 3283^{5}.

$C_8H_{13}N_3O_2$ Δ^2 - Cyclopentenone, 2 - methoxy-3 - methyl-, semicarbazone, 2484^{9}.

$C_8H_{13}N_3O_4$ 4 - Imidazolecarboxamide, 4 - ethoxy-*N* - ethyltetrahydro - 2,5 - diketo-, 3691^{5}.

$C_8H_{13}N_3S$ Δ^2 - Cyclohexenone, 3 - methyl-, thiosemicarbazone, 3161^{2}.

$C_8H_{13}N_3O$ 4 - Pyrazolealdehyde, 1,3,5 - trimethyl-, semicarbazone, 2857^{1}.

C_8H_{14} Octadiene, 3155^{6}.

$C_8H_{14}BrNO_3$ Isobutyric acid, α - (α - bromoisobutyrylamino)-, 1629^{1}.

$C_8H_{14}BrNS$ Trimethyl - 2 - thienylmethylammonium bromide, 390^{9}.

$C_8H_{14}Br_2O_2$ Butyric acid, γ - bromo - α - (β-bromoethyl)-, Et ester, 385^{5}.

$C_8H_{14}ClNO_3$ Isobutyric acid, (α - chloroacetamido)-, Et ester, 3299^{2}.

$C_8H_{14}N_2O$ Pyrazole, 5 - ethoxy - 4 - ethyl - 3-methyl-, 2855^{7}.
5 - Pyrazolone, 4,4 - diethyl - 3 - methyl-, 1990^{3}.

$C_8H_{14}N_2O_2$ 2,5-Piperazinedione, 3-isobutyl-, 420^{4}.
—, 3,3,6,6-tetramethyl-, 1629^{2}.
2,5 - Pyrazinediol, 1,4-dihydro - 3 - isobutyl-, 3169^{5}.
2(1) - Pyrazinone, 3,6 - diethyl - 3,4 - dihydro - 5 - hydroxy-, 1629^{2}.
—, 3,4 - dihydro - 5 - hydroxy - 3 - isobutyl-, 1629^{1}.
—, 3,4 - dihydro - 5 - hydroxy - 6 - isopropyl-3-methyl-, 1629^{2}.

$C_8H_{14}N_2O_2Te$ 1,2 - Telluropyran - 3,5(4,6)-dione, 4 - ethyl - 2 - methyl-, dioxime, 413^{6}.

$C_8H_{14}N_2O_3$ Cyclopentanol, 2-methyl-, allophanate, $1790^{8,9}$.

$C_8H_{14}N_2O_5$ Allophanic acid, γ - (carboxymethyl)-, di-Et ester, 2160^{9}.
Glutathione, 3446^{1}.
Glycine, *N* - (β - carbomethoxyaminobutyryl)-, 44^{5}.

$C_8H_{14}N_2O_5S$ Glutathione, 228^{5}, 426^{4}.

$C_8H_{14}N_4O$ Guanidine, α - (2 - methoxy - 3-methyl - Δ^2 - cyclopentenylideneamino)-, *-HNO_3*, 2484^{9}.

$C_8H_{14}N_4O_3$ 4 - Imidazolecarboxamide, tetrahydro - 2 - keto - *N*,3 - dimethyl - 5-methylimino - 4 - methoxy-, 1388^{1}.
2(5) - Imidazolone, 4 - (α,β - dimethylcarbamido) - 5 - methoxy-(?), *and salts*, 1387^{9}.

$C_8H_{14}N_4O_3S_2$ Triacetyl deriv., m. 151–2°, of thiourea, 1220^{3}.

$C_8H_{14}N_4O_4$ Butanetetracarboxamide, 3446^{5}.

$C_8H_{14}N_4O_4Pd$ Glyoxime, dimethyl-, Pd deriv., 1042^{7}.

$C_8H_{14}N_4O_4Pt$ Glyoxime, dimethyl-, Pt deriv., 1042^{7}.

$C_8H_{14}N_6O_2$ 1,2 - Cyclopentanedione, 3 - methyl-, disemicarbazone, 2484^{8}.

$C_8H_{14}O$ Acetophenone, hexahydro-, 1982^{2}.
Cyclohexanone, 2,5 - dimethyl-, $2149^{7,8}$, 2150^{4}.
Cyclooctanone, 1792^{6}, 2151^{6}.
Δ - 2 - Heptenone, 6 - methyl-, 1593^{5}, 3686^{9}.
1 - Heptin - 3 - ol, 3 - methyl-, 2481^{6}.
1 - Hexin - 3 - ol, 3,6 - dimethyl-, 2481^{6}.

$C_8H_{14}O_2$ Cyclohexaneacetic acid, 3160^{4}.
Cyclohexanol, acetate, 1396^{4}, 2491^{7}.
Cyclohexanone, 2-ethoxy-, 2665^{4}.
Phenetole, 1,2 - epoxyhexahydro-, 2665^{4}.

$C_8H_{14}O_3$ Butyric anhydride, 2818^{7}.
Caprylic acid, α-keto-, *Ca salt*, 1593^{1}.
Cyclohexaneacetic acid, α hydroxy-, 378^{4}.
4 - Pyrancarboxylic acid, tetrahydro - 2,6-dimethyl-, 1624^{3}.

$C_8H_{14}O_4$ Adipic acid, mono-Et ester, 3689^{6}.
Ethanediol, dipropionate, 3621^{6}.
Malonic acid, methyl-, di-Et ester, P 917^{1}, 1056^{2}.
Malonic acid, mono-Am ester, 3689^{7}.
Oxalic acid, di-Pr ester, 3689^{5}.

Suberic acid, 2151^5, 2937^4.
Succinic acid di-Et ester, 3689^6; mono-Bu ester, 3689^5.
$C_8H_{14}O_4Te$ Acetic acid, tellurobis-, di-Et ester, 2315^8.
$C_8H_{14}O_5$ γ - Arabonolactone, trimethyl-, 3445^6.
Arabonic acid, trimethyl-, γ-lactone, 1060^4.
Malic acid, di-Et ester, 1594^2.
Xylose, trimethyl-, lactone, 2314^{3,4}.
$C_8H_{14}O_6$ Gluconic acid, 2,3 - dimethyl-, lactone, 580^8.
Suberic acid, α,ζ - dihydroxy-, 2830^9.
Succinic acid, α,β - dimethoxy-, di-Me ester, 47^9.
Tartaric acid, di-Et ester, 48^1.
$C_8H_{14}O_7$ Arabotrimethoxyglutaric acid, *and Na salt*, 1059^9.
$C_8H_{14}O_7S$ Malic acid, di-Me ester, ethanesulfonate, 1056^8.
$C_8H_{14}O_8$ Galactonic acid, monoacetate, 1059^1.
$C_8H_{15}Br$ Cycloheptane, (bromomethyl)-, 3012^5.
Cyclohexane, (bromoethyl)-, 1599^4, 3160^1.
$C_8H_{15}Cl$ 2-Octene, 2-chloro-, 1592^9.
$C_8H_{15}ClO$ Ethylene oxide, α-chloro-β-hexyl-, 1592^9.
$C_8H_{15}ClO_2$ 2 - Heptanone, 3 - chloro - 4 - hydroxy-6-methyl-, 1787^1.
$C_8H_{15}CuNO_2$ 4 - Octanone, 5 - hydroxy-, oxime, Cu deriv., 1055^6.
$C_8H_{15}NO$ (See also *Pelletierine; Tropine.*)
Pseudotropine, 2108^5.
Valeronitrile, α - hydroxy - α - propyl-, 1787^3
$C_8H_{15}NO_2$ Cyclohexaneacetamide, α-hydroxy-, 378^5.
Nipecotic acid, 1,4 - dimethyl-, *and chloroaurate*, 1810^6.
4 - Pyrancarboxamide, tetrahydro - 2,6-dimethyl-, 1624^4.
$C_8H_{15}NO_3$ Leucine, *N*-acetyl-, 2983^4.
Nipecotic acid, 4 - hydroxy - 1,4 - dimethyl , *and derivs* , 1809^7, 1810^{4,5}.
$C_8H_{15}NO_3S$ Lactic acid, dimethylthionocarbamate, Et ester, 3281^{2,5}.
$C_8H_{15}NO_4$ + H_2O Diacetonamine, oxalate, 3280^5.
$C_8H_{15}NS$ Isothiocyanic acid, heptyl ester, 2835^3.
$C_8H_{15}N_3O$ Cycloheptanone, semicarbazone, 2150^9.
$C_8H_{15}N_3O_2$ Cyclopentanone, 2-methoxy-3-methyl-, semicarbazone, 2484^9.
$C_8H_{15}N_3O_3$ Acetoacetic acid, α-ethyl-, Me ester, semicarbazone, 1990^6.
—, α - methyl-, Et ester, semicarbazone, 1990^6.
$C_8H_{15}N_3O_4$ Alanine, *N* - (*N* - glycylalanyl)-, 3299^1.
Carbamic acid, [β-(carbamylmethylcarbamyl)isopropyl]-, Me ester, 44^5.
$C_8H_{15}N_5O_5$ Protoctin, 3703^3.
C_8H_{16} Cyclohexane, dimethyl-, 171^{4,5}, 2935^7.
—, ethyl-, 171^4.
Cyclopentane, isopropyl-, 171^3.
—, propyl-, 171^3.
1-Octene, 3444^1.
$C_8H_{16}BrN_3O$ 2 - Heptanone, 1 - bromo , semicarbazone, 1783^4.
$C_8H_{16}Br_2$ Octane, 1,2-dibromo-, 3444^1.
$C_8H_{16}Cu_2N_4$, 3401^1.
$C_8H_{16}NO_3P$ Propanephosphonic acid, γ - cyano-, di-Et ester, 2079^1.
$C_8H_{16}N_2$ Butyraldehyde, azine, 3282^6.
Isobutyraldehyde, azine, 899^9, 2309^6, 3282^6.
$C_8H_{16}N_2O_3$ Carbamic acid, ethoxyiminomethyl-, butyl ester, 3164^5.
Glycine, *N*-leucyl-, 3298^7.
Isobutyric acid, α - (α - aminoisobutyrylamino)-, 1629^1.
Leucine, *N*-glycyl-, 3298^7.

$C_9H_4Cl_2O$ Indone, 2,3-dichloro-, 3002[1].
$C_9H_4Cl_6O$ 2,4 - Xyloyl chloride, $\alpha^2,\alpha^2,\alpha^4,\alpha^4,\alpha$?-pentachloro-, 184[6].
$C_9H_4Cl_6O_2$ 2,4-Xylic acid, α-hexachloro-, 184[7].
$C_9H_5BrClNO_2$ 2,3 - Quinolinediol, 6 - bromo-5-chloro-, 2681[4].
C_9H_5BrOS Thiochromone, 3 (and 6)-bromo-, 198[6].
$C_9H_5BrO_2$ Chromone, 3-bromo-, 198[9].
$C_9H_5BrO_2S$ Thiochromone, 2 - bromo - 3 - hydroxy-, 198[4].
$C_9H_5Br_2NO_2$ 2,3-Quinolinedione, 6,8-dibromo-1,4-dihydro-, 2681[4].
Salicylonitrile, 3,5-dibromo-, acetate, 403[9].
$C_9H_5Br_2N_3O_2$ Imidazole, 4,5-dibromo-2-(nitrophenyl)-, 2326[9].
$C_9H_5Br_3OS$ 4-Thiochromanone, 3,3,6-tribromo-, 197[4].
C_9H_5ClOS Thiochromone, 6-chloro-, 202[7].
$C_9H_5Cl_2NO_2$ Anthranil, acetyl-3,5-dichloro-, 908[6].
$C_9H_5Cl_2N_3O$ 1,2,3 - Triazole - 4 - carboxylyl chloride, 5 - chloro - 1 - phenyl-, 416[9].
$C_9H_5Cl_3O_2$ Phthalide, 2 - chloro - 4 - (dichloromethyl)-, 184[4].
$C_9H_5Cl_5O$ 2,4 Xyloyl chloride, $\alpha^2,\alpha^2,\alpha^4,\alpha^4$-tetrachloro-, 184[5].
$C_9H_5Cl_6NO$ 2,4-Xylamide, α-hexachloro-, 184[7].
$C_9H_5N_3O$ Propiolyl azide, phenyl-, 2157[4].
$C_9H_6BrClOS$ 4 - Thiochromanone, 3 - bromo-6-chloro-, 202[6].
C_9H_6BrN Cinnamonitrile, α-bromo-, 760[3].
$C_9H_6BrNO_2$ 2,3 - Quinolinedione, 6 - bromo-1,4-dihydro-, and isomer(?), 2681[3].
$C_9H_6BrN_3O_2$ Imidazole, 4 (or 5) - bromo - 2-(p-nitrophenyl)-, 2327[1].
$C_9H_6BrN_3O_3$ 2(1) - Benzofuranone, 4 - bromo-5-methoxy-1-triazo-, 3004[4].
$C_9H_6Br_2N_2$ Imidazole, 4,5 - dibromo - 2 - phenyl-, *and - HCl*, 2326[9].
$C_9H_6Br_2OS$ 4 - Thiochromanone, 3,3 (and 3,6)-dibromo-, 197[4].
Thiochromone, dibromide, 198[7]

$C_9H_6Br_2O_2$ 4 - Chromanone, 2,3 - dibromo-, 197^8.
Styrene, α,2 - dibromo - 4,5 - methylenedioxy-(?), 3292^5.
$C_9H_6ClNO_2$ 2,3 - Quinolinedione, 6 - chloro-1,4-dihydro-, 2681^3.
$C_9H_6ClN_3O_2$ 1,2,3-Triazole-4-carboxylic acid, 5-chloro-1-phenyl-, 416^9.
$C_9H_6Cl_4O_2$ 2,4 - Xylic acid, $\alpha^2,\alpha^2,\alpha^4,\alpha^4$ - tetrachloro-, 184^4.
$C_9H_6INO_4S$ See *Yatren*.
$C_9H_6N_4$ Imidazobenzotriazine, *and -HCl*, 395^4.
C_9H_6OS Thiochromone, 198^6.
$C_9H_6O_2$ (See also *Coumarin*.)
Propiolic acid, phenyl-, *Ag salt*, 409^5.
$C_9H_6O_3$ Chromone, 7-hydroxy-, $605^{7,9}$.
Phthalide, 4-formyl-, 184^4.
$C_9H_6O_3S$ Thiochromone, *S*-dioxide, 199^2.
$C_9H_6O_4$ Benzoic acid, 2,4-diformyl-, 184^5.
4 - Isobenzofurancarboxylic acid, 1,2 - dihydro-1-keto-, 184^4.
$C_9H_6O_5$ Phthalonic acid, 1613^9.
Terephthalic acid, 2-formyl-, 184^4.
$C_9H_6O_6$ Trimellitic acid, *Ca salt*, 184^8.
$C_9H_7AgN_4O_3$ 1,2,4 - Triazol - 5 - ol, 1 - methyl-3 - (*p* - nitrophenyl)-, Ag deriv., 914^9.
$C_9H_7BiO_4$ Caffeic acid, complex Bi compd, *Na salt*, 796^4.
C_9H_7Br Benzene, (γ - bromopropargyl)-, 1783^2.
$C_9H_7BrN_2$ Imidazole, 4 (or 5) - bromo - 2 - phenyl-, *and -HCl*, 2327^1.
Pyrazole, 4 - bromo - 3 (or 5) - phenyl-, *-HBr*, 760^7.
$C_9H_7BrN_2OS$ Benzothiazole, 1-acetamido 5 bromo-, 2858^4.
Benzothiazoline, 2-acetyl-5-bromo-1-imino-, 2858^4.
$C_9H_7BrN_4O_3$ 1,2,3,5-Tetrazole, 4-(5-bromo-2-hydroxyanisoyl)-, 3004^5.
C_9H_7BrO Anisole, *p*-(bromoethinyl)-, 1783^2
Cresol, (bromoethinyl), 1783^2.
C_9H_7BrOS 4 - Thiochromanone, bromo-, 197^4, 202^6.
$C_9H_7BrO_2$ Cinnamic acid, α-bromo-, 1612^8.
Phthalide, 4-bromomethyl-, 184^2.
$C_9H_7BrO_3S$ 4 - Thiochromanone, 3-bromo-, *S*-dioxide, 199^1.
$C_9H_7Br_2I$ Benzene, (β,γ - dibromo - γ - iodoallyl)-, 1783^7.
$C_9H_7Br_2NO$ Benzisoxazole, 4,6-dibromo-3,5-dimethyl-, 403^9.
Xylonitrile, 3,5-dibromohydroxy-, $403^{8,9}$.
$C_9H_7Br_2O$ 2,4 - Xyloyl bromide, α^2,α^4 - dibromo-, 184^2.
$C_9H_7ClN_2O_6$ Benzoic acid, 3,5-dinitro-, β-chloroethyl ester, 361^4.
$C_9H_7ClN_4O$ 1,2,3 - Triazole - 4 - carboxamide, 5-chloro-1-phenyl-, 416^9.
C_9H_7ClOS 4 - Thiochromanone, 6 - chloro-, 202^3.
$C_9H_7ClO_2$ Cinnamic acid, *p*-chloro-, P 1631^4.
Phthalide, 4-chloromethyl-, 184^2.
$C_9H_7ClO_3$ Acetophenone, 5-chloro-α-formyl-2-hydroxy-, 1238^1.
Benzaldehyde, 2 - chloro - 3 - hydroxy-, acetate, 1065^3.
$C_9H_7ClO_4$ Salicylic acid, 3-acetyl-5-chloro-, 1238^8.
$C_9H_7Cl_2NO_2$ Lutidinedicarboxylyl chloride, *and PtCl₄ compd.*, 1226^3.
$C_9H_7Cl_2NO_3$ Anthranilic acid, *N*-acetyl-3,5-dichloro-, 908^4.
$C_9H_7Cl_2N_3O_2$ 1,2,3 - Benzotriazole, 1 - carboxyoxy - 5,6 - dichloro-, Et ester, 750^7.
$C_9H_7Cl_3N_2O_3$ *m* - Acetotoluide, α,2,4 - trichloro-6-nitro-, 2834^8.
C_9H_7I Benzene, (γ - iodopropargyl)-, 1783^3.
C_9H_7IO Cresol, iodoethinyl-, 1783^3.
$C_9H_7I_3O$ Cresol, triiodovinyl-, 1783^7.
$C_9H_7KN_4O_3$ 1,2,4 - Triazol - 5 - ol, 1 - methyl-3 - (*p* - nitrophenyl)-, K deriv., 914^9.
C_9H_7N (See also *Isoquinoline; Quinoline.*)
Cinnamonitrile, 760^3; *-HCl*, 3291^1.
C_9H_7NO 1,2 - Benzopyran, 2 - imino-, *-HCl*, 3291^7.
Carbostyril, 418^3.
o - Coumaronitrile, *and di-HCl*, 3290^9.
Indoxyl, P 423^8.
Isoxazole, 3(and 5) - phenyl-, $760^{8,9}$.
Propiolaldehyde, β - phenyl-, oxime, 759^6.
C_9H_7NOS Acetophenone, *o*-thiocyano-, 2995^2.
2-Quinolinol, 3-mercapto-, 1627^3.
$C_9H_7NOS_2$ Rhodanine, 3-phenyl-, 600^5.
$C_9H_7NO_2$ Anisoyl cyanide, 2324^2.
Isatin, methyl, 758^5, 3455^8.
3,4-Isoquinolinediol, 2681^3.
Pseudoisatin, 4(and 6)-methyl-, 193^1.
$C_9H_7NO_3$ Isatoic anhydride, *N*-methyl-, 207^3.
$C_9H_7NO_4$ Atropic acid, *p*-nitro, 1414^1.
Cinnamic acid, nitro-, 182^4, P 1631^4.
6-Phenomorpholinecarboxylic acid, 3-keto-, 1068^9.
$C_9H_7NO_5$ Acetic acid, *o*-nitrobenzoyl-, 1079^3.
Terephthalic acid, 2-formyl-, oxime, 184^4.
$C_9H_7NO_5S$ Methanesulfonic acid, phthalimido-, *and Ba salt*, 1805^5.
$C_9H_7NO_6$ 2 - Picoline - 3,4,6 - tricarboxylic acid, *tri-Tl salt*, 49^7.
$C_9H_7N_2NaO_3$ Cinnamaldehyde, *m* - nitro-, oxime, Na salt, 3450^4.
$C_9H_7N_3O_2$ 1,2,3 - Benzotriazin - 4(3) - one, 3-acetyl-, 382^1.
$C_9H_7N_3O_3$ Glyoxylanilide, α - cyano-, *N* - oxide, oxime, 2822^3.
$C_9H_7N_4NaO_3$ 1,2,4 - Triazol - 5 - ol, 1 - methyl-3 - (*p* - nitrophenyl)-, Na deriv., 914^9.
C_9H_8 See *Indene*.
$C_9H_8AgNO_3S$ Benzoic acid, 4 - acetamido - 2-mercapto, silver deriv., *Na salt*, P 800^7.
$C_9H_8AuNO_3S$ Benzoic acid, 4 - acetamido - 2-mercapto-, gold deriv., *Na salt*, P 800^7.
C_9H_8BrNO Cinnamaldehyde, α - bromo-, oxime, 759^6.
$C_9H_8BrNO_2$ Benzaldehyde, *o*-bromo-, oxime, Ac deriv., 179^7.
$C_9H_8BrNO_3$ Benzoic acid, 2-acetamido-3-bromo-, 3288^9.
Hippuric acid, bromo-, 2354^1.
$C_9H_8BrNO_4$ Benzoic acid, 3 - bromo - 2 - nitro-, Et ester, 3289^1.
$C_9H_8BrNO_5$ Benzyl alcohol, 3 (and 5) - bromo-2 - hydroxy - 5 (and 3) - nitro-, acetates, 1610^8.
$C_9H_8BrN_3O_7$ Urea, β - (4 - bromo - 2,6 - dinitrophenyl) - α - ethyl - α - nitro-, 590^2.
$C_9H_8Br_2N_2OS$ Benzothiazoline, 2-acetyl-1-imino-, dibromide, *and -HBr*, $2858^{1,3}$.
$C_9H_8Br_2N_6O$ 3,4,5-Hemimellitenol, 2,6-dibromo-α^4,α^4-ditriazo-, 403^9.
Isopseudocumenol, 4,6 - dibromo - α^2,α^1-ditriazo-, 403^9.
$C_9H_8Br_2O$ 2,4 - Xyloyl bromide, α^2 - bromo-, 183^9.
$C_9H_8Br_2O_2$ 2,4-Xylic acid, α^2,α^4 - 184^2.

$C_9H_8Br_2O_3S$ 2-Propanone, 1 - bromo - 3 - (*p*-bromophenylsulfonyl)-, 1625[9].
$C_9H_8Br_4N_2OS$ Benzothiazole, 1 - acetamido-, tetrabromide, 2857[9].
$C_9H_8Br_6N_2OS$ Benzothiazole, 1-acetamido-, hexabromide, 2858[4].
$C_9H_8ClFe_2O_{11}$, 1769[1].
$C_9H_8ClNO_2$ Glyoxylyl chloride, *p*-tolyl-, oxime, 360[4].
$C_9H_8ClNO_3$ Ether, allyl 4-chloro-2-nitrophenyl, 3694[6].
Hippuric acid, chloro-, 2354[2].
$C_9H_8ClNO_4$ Benzoyl chloride, 4-ethoxy-3-nitro-, 394[6].
$C_9H_8ClN_3O_2$ 2(1) - Benzofuranone, 4 - chloro , semicarbazone, 1237[9].
$C_9H_8ClN_5O_7$ Urea, *β*-(chlorodinitrophenyl)-*α*-ethyl *α*-nitro-, 590[2,3].
$C_9H_8Cl_2N_2O_3$ *m* - Acetotoluide, 2,4 - dichloro-6-nitro-, 2834[2].
$C_9H_8INO_3$ Hippuric acid, iodo-, 2354[2].
C_9H_8NNaO Cinnamaldehyde, oxime, Na salt, 3450[6].
$C_9H_8N_2O$ Propiolic acid, phenyl-, hydrazide, *and* - *HCl*, 2157[3].
$C_9H_8N_2OS$ Benzothiazole, 1 - acetamido-, 2857[9].
Benzothiazoline, 2-acetyl-1-imino-, 2858[1].
$C_9H_8N_2O_2$ 2 - Benzimidazolol, acetate, 381[9].
2-Indazoleacetic acid, 1622[6].
1-Isoindazoleacetic acid, 1622[6].
1 - Phthalazinol, 4 - methoxy-, 185[4].
1(2) - Phthalazone, 4 - methoxy-, 382[1].
$C_9H_8N_2O_3$ Cinnamaldehyde, *m*-nitro-, oxime, 3450[6].
$C_9H_8N_2O_3S$ 1 - Thionaphthenecarboxamide, 2-amino-(?), *S*-dioxide, 1069[4].
—, 1,2-dihydro-2-imino-(?), *S*-dioxide, 1069[4].
$C_9H_8N_2O_4$ Benzaldehyde, nitro-, oxime, Ac deriv., 179[5].
Picolinic acid, 5-cyano-4,6-dimethoxy-, 915[2].
$C_9H_8N_2O_5$ Ether, allyl 2,4-dinitrophenyl, 2319[7], 3694[6].
$C_9H_8N_2O_6$ Acetophenone, 2-hydroxy-5-methyl-6, ?-dinitro-, 1237[8].
$C_9H_8N_4O_2$ 1,2,3 - Benzotriaz - 4(3) - one, 3 acetamido-, 206[7].
1,2,3,5 - Tetrazole, 1 - methyl - 4 - salicylyl-, 3004[7].
$C_9H_8N_4O_3$ 1,2,4 - Triazol - 5 - ol, 1 - methyl - 3-(*p*-nitrophenyl) , 914[9].
$C_9H_8N_4O_6$ 5,5′ - Spirobi[hydantoin], diacetyl-, 2826[4].
$C_9H_8N_4O_8$ Hydroxylamine, *β* - (2,4,6 - trinitro - *m* - tolyl)-, acetate, 2667[1].
$C_9H_8N_6O_9$ Urea, *α* - ethyl - *α* - nitro - *β* - (2,4,6-trinitrophenyl)-, 590[1].
C_9H_8O (See also *Cinnamaldehyde*.)
Benzyl alcohol, *α*-ethinyl , 3444[4].

$C_9H_9NO_4$ Acetophenone, 2-hydroxy 5-methyl-3-nitro-, 1237^{5}.
Anisic acid, α-carbamyl-, 1068^{8}.
1,3-Dioxolane, 2 - (*o* - nitrophenyl)-, 749^{4}.
1,3 Dioxolan-2-ol, 2-(*o*-nitrosophenyl)-, 749^{5}.
Glycolamide, *p* - hydroxybenzoate, 1068^{8}.
Salicyluric acid, 231^{9}.
$C_9H_9NO_5$ Benzaldehyde, dimethoxynitro-, 178^{8,9}.
Benzoic acid, 4-ethoxynitro-, 394^{6}, 2833^{8}.
4 - Homopyrocatechol, 6-nitro-, 2-acetate(?), 3449^{7}.
$C_9H_9NO_6$ Gallic acid, carbamylmethyl ester, 1987^{1,3}.
C_9H_9NS Isothiocyanic acid, xylyl ester, 2313^{9}, 2314^{1}.
$C_9H_9N_3$ Imidazole, (aminophenyl)-, *and salts*, 395^{3,4,5,6}.
$C_9H_9N_3O$ 5 - Pyrazolone, 3 - methyl - 1 - (4-pyridyl)-, 1807^{6}.
4(3) - Quinazolone, 3 - amino - 2 - methyl-, 206^{7}.
$C_9H_9N_3O_2$ Imidazole, 4,5 - dihydro - 2 - (*m*-nitrophenyl)-, *and salts*, 2326^{9}.
$C_9H_9N_3O_3S$ Acetyl azide, benzylsulfonyl-, 1409^{6}.
$C_9H_9N_3O_6$ Hydroxylamine, β - (4,6 - dinitro-*o*-tolyl)-, Ac deriv., 2666^{9}.
$C_9H_9N_3O_7$ Tyrosine, 3,5-dinitro-, 1068^{4}.
$C_9H_9N_3O_8$ Homoveratrole, 3,5,6 - trinitro-, 908^{1}.
$C_9H_9N_3O_9$ Benzene, 1,3,5 - trimethoxy - 2,4,6-trinitro-, 2317^{2}.
$C_9H_9N_5O$ 1,2,3,5 - Tetrazole, 4 - acetamido-1-phenyl-, 764^{1}.
$C_9H_9N_5O_7$ Urea, α,β - dimethyl - α - picryl-, 374^{1}.
—, β (2,4 - dinitrophenyl) - α - ethyl - α-nitro-, 589^{9}.
—, β - (2,6 - dinitro - *p* - tolyl) - α - methyl-α-nitro-, 590^{4}.
C_9H_{10} Styrene, methyl-, 1794^{6,7}.
$C_9H_{10}AsCl$ Arsinoline, 1-chloro-1,2,3,4-tetrahydro-, 2839^{5}.
$C_9H_{10}AsNO_8$ Benzenearsonic acid, 4 - carboxyoxy - 3 - nitro-, Et ester, 1984^{8}.
$C_9H_{10}BrNO$ *o*-Acetotoluide, 6-bromo-, 3288^{9}.
Benzaldehyde, 3 - bromo - 4 - dimethylamino-, 1081^{8}.
$C_9H_{10}BrNO_2$ Carbanilic acid, bromo-, ethyl ester, 3164^{5}.
$C_9H_{10}BrNO_3$ Phenetole, 4 - (bromomethyl)-2(and 3)-nitro-, 2833^{7}.
2 - Pyrrolecarboxylic acid, 4 - bromo - 5 - formyl - 3 - methyl-, Et ester, 2160^{3}.
Tyrosine, bromo-, 3366^{4}.
$C_9H_{10}BrNO_4$ Homoveratrole, 5-bromo-3-nitro-, 3449^{8}.
$C_9H_{10}Br_2$ Benzene, (β,γ - dibromopropyl)-, 2485^{2}.
Cumene, β,β′-dibromo-, 385^{6}.
Toluene, *m* - (α,β dibromoethyl)-, 1794^{6}.
$C_9H_{10}Br_2O_3$ Benzene, dibromotrimethoxy, 1609^{6,7}.
$C_9H_{10}Br_4N_2S$ Benzothiazole, 1 - amino 3,5 dimethyl-, tetrabromide, 2858^{5}.
Benzothiazoline, 2 - ethyl - 1 - imino, tetrabromide, 2857^{9}.
$C_9H_{10}ClNO$ Benzoyl chloride, *p*-dimethylamino-, 371^{3}.
$C_9H_{10}ClNO_5$ 1,2 - Dimethylbenzoxazolium perchlorate, 1080^{1}
$C_9H_{10}ClNO_6S$ *o* - Toluenesulfonyl chloride, 4,5-dimethoxy-6-nitro-, 3449^{4}.
$C_9H_{10}FeNO_6$, 1769^{6}.
$C_9H_{10}INO$ 1,2 - Dimethylbenzoxazolium iodide, 1079^{9}.
Propionanilide, α-iodo-, 2978^{2,5}.
$C_9H_{10}INO_2$ Carbanilic acid, iodo-, ethyl ester, 3164^{6}.
$C_9H_{10}NNaO_3$ Veratraldehyde, oxime, Na salt, 3450^{4}.
$C_9H_{10}N_2O_2$ Acetaldehyde, benzoyl-, dioxime, 761^{1}.
1,3,4,2 - Oxdiazin - 2 - one, tetrahydro - 4-phenyl-, 2485^{5}.
3 - Pyrrolecarboxylic acid, 5 - cyano - 4-methyl-, ethyl ester, 3455^{6}.
$C_9H_{10}N_2O_3$ Anisamide, α-carbamyl-, 1068^{8}.
Benzaldehyde, 4 - dimethylamino - 3 - nitro-, 1081^{8}.
Glyoxylohydroxamic acid, *p* - tolyl-, oxime, 746^{6}.
Oxamic acid, *N* - 2 - pyridyl-, Et ester, 2860^{1}.
$C_9H_{10}N_2O_4$ *o* Acetaniside, 6 - nitro-, 2840^{2}.
Benzoic acid, 5 - amino - 2 - nitro-, Et ester, 2672^{4}.
Dipicolinic acid, 4 - dimethylamino-, 1238^{9}.
$C_9H_{10}N_2O_6$ Homoveratrole, 3,5 - dinitro-, 908^{1}, 3449^{4}.
Phenetole, 2 - methoxy - 4,5 - dinitro-, 1608^{1}.
1 - Propanol, 3 - (2,4 - dinitrophenoxy)-, 740^{1}.
$C_9H_{10}N_2S$ Benzothiazole, 1 - amino - 3,5 - dimethyl-, 2858^{6}.

Benzothiazoline, 2 - ethyl - 1 - imino-, 2857[9].

$C_9H_{10}N_2Se$ Aniline, selenocyanodimethyl-, 3288[4].

$C_9H_{10}N_4O$ Isoindazole, 7 - carbamido - 5-methyl-, 2497[9].

$C_9H_{10}N_4O_3$ Biuret, 1 - methyl - 1 - nitroso - 5 - phenyl-, 901[4].
 3 - Pyrrolecarboxylic acid, 4 - methyl - 2- triazoformyl-, ethyl ester, 3455[7].

$C_9H_{10}N_4O_3S$ Glycyl azide, *N* - tolylsulfonyl-, 3298[5].

$C_9H_{10}N_6$ Acetonitrile, *N*, *N′* - methylenebis-[iminobis-, 2980[8].

$C_9H_{10}N_6S$ 1,3,4 - Triazole - 2 - mercaptan, 5- (β-phenylthiocarbamylhydrazino)-, 2162[3].

$C_9H_{10}O$ (See also *Cinnamic alcohol.*)
 Chavicol, 2666[1].
 Hydrocinnamaldehyde, 1396[8].
 Phenol, *p*-propenyl-, 2666[1].
 2 Propanone, 1-phenyl-, 1602[1, 5]

$C_9H_{10}OS$ Acetophenone, 2-mercapto 5-methyl-, 202[8].
 Benzoic acid, thiol-, Et ester, 3694[1]
 —, thiono-, Et ester, 3694[1].

$C_9H_{10}OS_2$ Benzylxanthic acid, Me ester, 1395[9]

$C_9H_{10}O_2$ Acetophenone, methoxy-, 1228[9], 2156[4].
 Benzoic acid, Et ester, 1396[4], 1937[3]
 Hydrocinnamic acid, 3496[1], *Tl salt*, 2818[4]
 Δ[1] - 3 - Pentenone, 1 - (2 - furyl) , 3005[7].
 Phenol, *o* allyloxy-, 1798[1].
 2-Propanone, 1 - hydroxy - 1 - phenyl-, 906[5], 1593[5].
 Propiophenone, α-hydroxy-, 1593[4].
 Pyrocatechol, allyl-, 1798[1, 2].
 α Toluic acid, Me ester, 2456[1]
 2,4 Xylic acid, 183[9].

$C_9H_{10}O_2S$ *m* - Toluic acid, methylmercapto , 199[1], 202[9].

$C_9H_{10}O_3$ Acetophenone, *p* - hydroxy - α - methoxy-, 3297[2].
 Anisic acid, methyl ester, 3712[8]
 Benzaldehyde, 4 - ethoxy - 3 - hydroxy-, 2843[8].
 Mandelic acid, Me ester, 378[1].
 Veratraldehyde, 181[1], 1065[8].
 2,4 - Xylic acid, α[2] (and α[4]) - hydroxy-, 184[1]

$C_9H_{10}O_4$ Acetophenone, 2,4 - dihydroxy - 6- methoxy-, 375[5, 6].
 2,4 - Xylic acid, α[2],α[4] - dihydroxy-, 184[2].

$C_9H_{10}O_4S$ Benzoic acid, *o* - (methylsulfonyl)-, Me ester, 2995[4].

$C_9H_{10}O_5$ Acetic acid, (2,3 - dihydroxyphenoxy) , Me ester, 1987[1].
 Addn. compd., m. 56°, of *p* - cresol and oxalic acid, 47[2].
 Δ[1, 4] - 1,5 - Pentadienedicarboxylic acid, 3- keto-, di-Me ester, 180[8]

$C_9H_{10}S$ Cinnamic mercaptan, 2991[3, 4].
 Thiochroman, 203[9].

$C_9H_{13}N_3O_4$ Hydrazine, (4,5 - dimethoxy - 3 - nitro-*o*-tolyl)-, 3449[8].

$C_9H_{13}N_3O_5$ 4 - Imidazolecarboxamide, 1 - acetyl - 4 - ethoxytetrahydro - 2,5 - diketo-3-methyl-, 3691[7].

$C_9H_{13}O_2P$ Mesitylenephosphinous acid, 3617[1].

C_9H_{14} Cyclohexane, propargyl-, 3286[9].
Tricyclo[2,2,1,0[2,6]]heptane, 7,7 - dimethyl-, (apocyclene), 3164[9].

$C_9H_{14}AsNO_5$ 3 - Pyrrolecarboxylic acid, 4-arsono - 2,5 - dimethyl-, Et ester, 387[9].

$C_9H_{14}Br_2O$ Cyclohexanone, 2,3 - dibromo-3,5,5 - trimethyl-, 1784[4].

$C_9H_{14}Br_3NO_2$ Ecgonidine, perbromide, 1240[5].

$C_9H_{14}ClN$ Trimethylphenylammonium chloride, 1600[9].

$C_9H_{14}ClN_3O_4$ Glycine, *N* - [*N* - (*N* - chloroacetylglycyl)alanyl]-, 2660[3].

$C_9H_{14}Cl_2O_2Te$ 1,2 - Telluropyran - 3,5(4,6)-dione, 4 - *sec* - butyl-, 1,1 - dichloride, 413[7].
—, 4 - isobutyl-, 1,1 - dichloride, 413[5].
—, 4 - isopropyl - 2 - methyl , 1,1 - dichloride, 413[4].
—, 2 - methyl - 4 - propyl-, 1,1 - dichloride, 413[3].

$C_9H_{14}HgN_2O_5$ Mercuriacetoveronal, 2719[5].

$C_9H_{14}N_2$ Indazole, 4,5,6,7 - tetrahydrodimethyl-, 389[4,7].
1 - Piperidineacetonitrile, *α* -vinyl-, 1053[5].

$C_9H_{14}N_2O$ 3 - Pyrrolealdehyde, 5 - ethyl - 2,4-dimethyl-, oxime, 1236[1].

$C_9H_{14}N_2O_2$ 2,5 - Piperazinedione, 3 - isobutyl-6-methylene-, 2682[4].
Pyrazolecarboxylic acid, 1 - ethylmethyl-, Et ester, 2494[2].
—, 1,3,5 - trimethyl-, Et ester, 2856[9].
2 - Pyrrolecarboxylic acid, 4 - amino - 3,5-dimethyl-, Et ester, *and* -*HCl*, 1236[9].

$C_9H_{14}N_2O_2S$ Hydantoin, ? - acetyl - 5 - isobutyl-2-thio-, 3298[9].

$C_9H_{14}N_2O_3$ Barbituric acid, 5-ethyl-5-isopropyl-, 458[7], 1852[2].
1 - Pentin - 3 - ol, 3,4 - dimethyl , allophanate, 2481[6].
Δ[2] - 1 - Pyrazolinecarboxylic acid, 4 - ethyl-5 - keto - 3 - methyl-, Et ester, 1990[4].
—, 5 - keto - 3,4 - dimethyl-, Pr ester, 1990[4].

$C_9H_{14}N_2O_3S$ Barbituric acid, 5 - (ethoxymethyl)-5-ethyl-2-thio-, 582[1].

$C_9H_{14}N_2O_4$ Barbituric acid, 5 - (ethoxymethyl)-5-ethyl-, 581[9].
—, 5-*β*-hydroxyethyl-5-propyl-, 367[9].

$C_9H_{14}N_2O_5$ 4 - Imidazolecarboxylic acid, 4-ethoxytetrahydro - 2,5 - diketo - 3 - methyl-, Et ester, 3691[4].

$C_9H_{14}N_4O_2$ Guanidine, *α* - (2 - hydroxy - 3 - methyl - Δ[2] - cyclopentenylideneamino) acetate, -*HNO_3*, 2484[9].

$C_9H_{14}N_4O_3$ (See also *Carnosine*.)
Caffeine, methohydroxide, 3190[2].

$C_9H_{14}N_4O_4$ 5 - Pyrimidinecarbamic acid, 6-amino - 1,2,3,4 - tetrahydro - 2,4 - diketo-, Et ester, 901[6].

$C_9H_{14}N_4O_5$ Uric acid, 4,5 - dihydro - 4,5 - dimethoxydimethyl-, 1387[6].
—, 4 (or 5) - ethoxy - 3 - ethyl - 4,5 - dihydro - 5 (or 4) - hydroxy-, 901[8].

$C_9H_{14}O$ Δ[1,α] - Cyclohexaneacetaldehyde, 3-methyl-, 3443[9].
Cyclohexanol, 1 - ethinyl - 3 - methyl-, 3443[9].
Isophorone, 1784[3].
Phorone, 860[3].

$C_9H_{14}O_2$ Cyclohexanone, 2 - (hydroxymethylene)-3,5-dimethyl-, 389[1].
Δ[1] - Cyclohexeneacetic acid, 3-methyl-, 903[7].
Cyclopenteneacetic acid, ethyl ester, 3161[1].

$C_9H_{14}O_2Te$ 1,2 - Telluropyran - 3,5(4,6) - dione, 4-butyl-, 2315[7].
—, 4-*sec*-butyl , 413[7], 2315[7].
—, 4-isobutyl-, 413[5], 2315[7].
—, 4-isopropyl-2-methyl-, 413[4].
—, 2-methyl-4-propyl-, 413[3].

$C_9H_{14}O_3$ Cyclohexaneacetic acid, 3 - keto - 1-methyl-, *and Ag salt*, 172[8].
Δ[1] - Cyclohexenecarboxylic acid, 6 - (*α*-hydroxyethyl)-, 2490[1].

$C_9H_{14}O_4$ Apofenchocamphoric acid, 2490[7].
Citraconic acid, di-Et ester, 1056[3], 2823[8], 3446[4].
1,1 - Cyclopropanedicarboxylic acid, di Et ester, 1056[2].
Itaconic acid, di-Et ester, 1056[3], 2823[8], 3446[4].
Mesaconic acid, di-Et ester, 1056[3].
Δ[2] - 1,4 - Pentenediol, diacetate, 2979[9].
α - Pentenic acid, *α* - ethoxy - *γ* - keto-, Et ester, 3006[2,7].

$C_9H_{14}O_5$ Azelaic acid, *α*-keto-(?), 2831[2].
Glutaric acid, *β*,*β* - diethyl - *α* - keto-, 3155[1].
—, *β* - keto-, di-Et ester, 50[6], 757[9].

$C_9H_{14}O_6$ Acetin, 900[4].
Adipic acid, *β* - carboxymethyl - *β* - methyl-, 172[8]
2,3,4 - Hexanetriol, triformate, 2146[9].
Malic acid, di Et ester, formate, 1056[7].
1,2,4 - Pentanetricarboxylic acid, 4-methyl-, 2490[8].
Propanetricarboxylic acid, tri-Me ester, 1502[3].

$C_9H_{15}Br$ Cyclohexane, *β* - bromoallyl-, 3286[9].

$C_9H_{15}BrN_2O_4$ Asparagine, N^{α} - (*α* - bromoisovaleryl)-, 2310[4].

$C_9H_{15}Cl$ *α* - Fenchocamphoryl chloride, 2846[8].

$C_9H_{15}NO$ Δ[1,α] - Cyclohexaneacetaldehyde, 3-methyl-, oxime, 3443[9].
Ketone, methyl tetrahydro - 1,4 - dimethyl-3-pyridyl, *derivs.*, 1809[4,5].
Trimethylphenylammonium hydroxide, 3747[4].

$C_9H_{15}NO_2$ Nicotinic acid, tetrahydro - 1,4-dimethyl-, Me ester, *and* -*HBr*, 1810[5].

$C_9H_{15}NO_3$ See *Ecgonine*.

$C_9H_{15}NO_5$ Aspartic acid, *N* - formyl-, di-Et ester, 1056[9].

$C_9H_{15}NO_4S$ Succinic acid, (diethylcarbamylmercapto)-, 373[2].
—, (dimethylcarbamylmercapto)-, Et ester, 373[1].

$C_9H_{15}N_3O_3$ Cyclopentanecarboxylic acid, 3-keto-, Et ester, semicarbazone, 2823[8].

$C_9H_{15}N_3O_4$ 4 - Imidazolecarboxamide, 4 - ethoxy-*N* - ethyltetrahydro - 2,5 - diketo - 3-methyl-, 3691[7].
Malonamic acid, *N* - (diaminomethylene)-(ethoxymethylene)-, Et ester, 206[9].

$C_9H_{15}N_3S$ Δ^2 - Cyclohexenone, 3,5 - dimethyl-, thiosemicarbazone, 3161^{2}.
C_9H_{16} Apocamphane, 2846^{7}.
β-Apofenchane, 2846^{7}.
Cyclohexene, 2,3,3 - trimethyl-, 744^{8}.
Cyclooctene, 1-methyl-, 2151^{1}.
Santenane, 2846^{8}.
$C_9H_{16}BrN_3O$ Acetophenone, α - bromohexahydro-, semicarbazone, 1783^{7}.
$C_9H_{16}Br_2O$ Cyclohexanecarbinol, α-(α, β-dibromoethyl)-, 2666^{3}.
$C_9H_{16}MoN_2O_8$ + $1.5H_2O$ Ethylenediamine monogallatomolybdate, 3406^{1}.
$C_9H_{16}N_2$ Fenchocamphorone, hydrazone, 2846^{7}.
1 - Piperidineacetonitrile, α,α - dimethyl, 1053^{6}
Santenone, hydrazone, 2846^{8}.
$C_9H_{16}N_2O$ Ketone, methyl tetrahydro - 1,4 dimethyl - 3 - pyridyl, oxime, 1809^{5}.
Pyrazole, 5 - ethoxy - 3 - methyl - 4 - propyl-, 2855^{7}.
$C_9H_{16}N_2O_2$ Hydantoin, dipropyl-, 2540^{9}.
Piperidone, tetramethylnitroso-, 325^{3}, 3375^{6}.
$C_9H_{16}N_2O_5$ Butyric acid, β - (α - carbethoxyaminoacetamido)-, *and NH_4 salt*, 44^{6}.
Glycine, N - (β - carbomethoxyaminobutyryl)-, Me ester, 44^{5}.

$C_{10}H_6Ba_2N_8O_4$ + $3H_2O$ Xanthopterin, Ba deriv., 902[4].
$C_{10}H_6BrNO_2$ Naphthalene, 1 - bromo - 2 - nitro-, 1074[6].
$C_{10}H_6BrNO_4$ 1,2 - Indandione, 4 - bromo - 6,7-methylenedioxy-, 2-oxime, 3292[6].
$C_{10}H_6Br_2N_2$ Cumidonitrile, α,α' - dibromo-, 379[9].
$C_{10}H_6Br_2N_2O_2$ Quinaldine, α,α - dibromo - 8-nitro-, 2862[2].
$C_{10}H_6Br_2N_2O_3$ Barbituric acid, 5,5 - dibromo-1 - phenyl-, 2825[9].
$C_{10}H_6Br_4O_2$ Cumidyl bromide, α,α' - dibromo-, 379[9], 380[1].
$C_{10}H_6Br_4O_4$ β - Cumidic acid, α,α,α',α' - tetrabromo-, 380[1].
$C_{10}H_6ClNO$ Cinchoninyl chloride, *and -HCl*, 3294[6].
$C_{10}H_6ClNO_2$ Naphthalene, 1 - chloro - 2 - nitro-, 1074[6].
$C_{10}H_6Cl_2O_2$ Chromone, 3,6-dichloro-2-methyl-, 1237[8].
$C_{10}H_6Cl_2O_2S$ Thiochromone, 2,2-dichloro-3 hydroxy-6-methyl-, 198[5], 1396[9], 1397[4].
$C_{10}H_6Cl_6O_2$ 2,4 - Xylic acid, α - hexachloro-, Me ester, 184[7].
$C_{10}H_6INO_2$ Naphthalene, 1-iodo-2-nitro-, 1074[6].
$C_{10}H_6N_2O_2$ Pyrocoll, 1337[5].
$C_{10}H_6N_2O_3$ Quinaldaldehyde, 8-nitro-, 2862[2].
$C_{10}H_6N_2O_4$ Naphthalene, dinitro-, 1074[7], 2325[4].
$C_{10}H_6N_2O_{10}S_2$ Naphthalenedisulfonic acid, dinitro-, 3452[6].
$C_{10}H_6N_2S_2$ Quinrhodine, 1626[8].
$C_{10}H_6N_4O_3$ βα - Isonaphthotriazole, 3 - hydroxy-5-nitro-, 750[9].
$C_{10}H_6O_2$ See *Naphthoquinone*.
$C_{10}H_6O_3$ Juglone, 2325[6].
$C_{10}H_6O_3S_2$ 2 - Thiophenecarboxylic anhydride, 2857[4].
$C_{10}H_6O_4$ Furil, 327[1].
Isophthalic acid, 4,6 - bis(hydroxymethyl)-, di-γ-lactone, 380[2].
Naphthazarin, 1077[4].

Terephthalic acid, 2,5 - bis(hydroxymethyl)-, di-γ-lactone, 380[1].
$C_{10}H_6O_5$ Homophthalic anhydride, 3,4 - methylenedioxy-, 3292[6].
$C_{10}H_6O_5S$ 1 - Naphthalenesulfonic acid, 3,4-dihydro - 3,4 - diketo-, 1623[3].
$C_{10}H_6O_6$ Isophthalic acid, 4,6 - diformyl-, 380[3].
Terephthalic acid, 2,5 - diformyl-, 380[3].
$C_{10}H_6O_8$ Benzenetetracarboxylic acid, 3071[2].
$C_{10}H_7Br$ Naphthalene, 1-bromo-, 134[6], 190[7], 1751[9].
$C_{10}H_7BrN_2O_3$ Barbituric acid, 5 - bromo - 1-phenyl-, *and* N_2H_4 *salt*, 2825[9].
$C_{10}H_7BrOS$ Thiochromone, 3 - bromo - 6-methyl-, 198[3,6], 202[7].
$C_{10}H_7BrO_2S$ Thiochromone, 2-bromo-3-hydroxy-6-methyl-, 198[4].
$C_{10}H_7BrO_3$ 1 - Indanone, 4 - bromo - 6,7 - methylenedioxy-, 3292[5].
Pyruvic acid, bromobenzal-, 3164[6].
$C_{10}H_7BrO_3S$ Thiochromone, 3 - broma - 6-methyl-, *S*-dioxide, 198[2].
$C_{10}H_7BrO_4$ Cinnamic acid, 2 - bromo - 4,5-methylenedioxy-, 3292[4].
$C_{10}H_7BrO_6$ Homophthalic acid, 6 - bromo - 3,4-methylenedioxy-, 3292[6].
$C_{10}H_7Br_2N$ Quinaldine, α,α-dibromo-, 2862[1].
$C_{10}H_7Br_2NO_2$ 2,3 - Quinolinedione, 6,8 dibromo-1,4 - dihydro - 1 - methyl-, 2681[6].
$C_{10}H_7Br_2NO_3S_2$ 1,4,2 - Benzothiazin - 3(4) - one, 2,2 - dibromo - 7 - [(carboxymethyl)-mercapto]-, 1993[3].
$C_{10}H_7Br_3OS$ Thiochromone, 3 - bromo - 6 - methyl-, dibromide, 198[7].
$C_{10}H_7Cl$ Naphthalene, chloro-, P 1631[4], 2576[1].
$C_{10}H_7ClHg$ Naphthalene, 1 - (chloromercuri)-, 1767[7,8].
$C_{10}H_7ClN_4O_3$ 1,2,3,5 - Tetrazole, 4 - (5 - chlorosalicylyl)-, acetate-, 3004[7].
$C_{10}H_7ClO_2S$ Thiochromone, 2-chloro-3-hydroxy-6-methyl-, 198[4].
$C_{10}H_7ClO_2$ 3-Benzofuranol, 4-chloro-, acetate, 1237[9].
$C_{10}H_7CuNO_4$ Furoin, oxime, Cu deriv., 1055[6].
$C_{10}H_7IS$ Thiophene, ? - iodo-2-phenyl-, 1079[2].
$C_{10}H_7NO$ Cinchoninaldehyde, P 2167[8].
Cinnamyl cyanide, 2324[3].
Propiolonitrile, cresyl-, 1783[9].
Quinaldaldehyde, 2862[2].
$C_{10}H_7NO_2$ Benzoic acid, *o*-(β-cyanovinyl)-, 2331[4].
Cinnamic acid, *o*-cyano-, 2331[3,4].
Isobenzofuranacetonitrile, 1,2-dihydroketo-, 184[2], 2331[4].
Naphthalene, nitro-, 1074[6], 1232[6], P 1631[4], P 1813[8], 2325[4], 3292[8].
2-Naphthol, 1-nitroso-, 190[8], 1365[2].
$C_{10}H_7NO_2S$ Thiophene, ?-nitro-2(and 3)-phenyl-, 1078[9], 1079[1].
$C_{10}H_7NO_3$ *m*-Coumaric acid, α-cyano-, 3291[9].
Quinaldic acid, *N*-oxide, 1083[4].
—, 1,4-dihydro-4-keto-, 1083[4].
$C_{10}H_7NO_4$ Cinchoninic acid, 2,6-dihydroxy-, 2329[1].
Piperonylic acid, 6-(cyanomethyl)-, 2331[4].
5-Quinolinecarboxylic acid, 2,6(or 3,6)-dihydroxy-, 1083[4].
$C_{10}H_7NO_5S$ 2-Naphthol-6-sulfonic acid, 1-nitroso-, *Na salt*, 3452[8].
$C_{10}H_7N_3O_4$ 1,2,5 - Triazole-3,4-dicarboxylic acid, 1-phenyl-, *and Na salt*, 1410[2].
$C_{10}H_7N_5O$ 1,2,3-Benzotriazole, 1-[4(or 5)-imidazolylformyl]-, 395[1].
$C_{10}H_7OTl$ 1-Naphthol, Tl deriv., 49[7].
$C_{10}H_8$ See *Naphthalene*.
$C_{10}H_8AsN_5O_4$ 1,2,3 - Benzotriazole-5-arsonic acid, 1-[4(or 5) - imidazolylformyl]-, 395[2].
$C_{10}H_8BrN$ Quinaldine, α-bromo-, 2862[2].
$C_{10}H_8BrNO_2$ Hydrocinnamonitrile, 2-bromo-4,5-methylenedioxy-, 2679[9].
$C_{10}H_8BrN_3O$ 1-Pyrazolecarboxamide, 4-bromo-3-phenyl-, 760[7].
$C_{10}H_8Br_2ClNO_2$ Butyryl chloride, β,γ-dibromo-α-keto-γ-phenyl-, oxime, 360[4].
$C_{10}H_8Br_2OS$ 4 - Thiochromanone, 3,3-dibromo-6-methyl-, 197[4], 202[6].
Thiochromone, 6-methyl-, dibromide, 198[6].
$C_{10}H_8Br_2O_2S$ 4 - Thiochromanone, 3,3-dibromo-6-methyl-, *S*-oxide, 199[1].
$C_{10}H_8Br_2O_3$ Cinnamic acid, dibromomethoxy-, 3164[8].
$C_{10}H_8Br_2O_3S$ 4-Thiochromanone, dibromo-6-methyl-, *S*-dioxide, 198[1,2].
$C_{10}H_8Br_2O_4$ Cumidic acid, α,α′-dibromo-, 379[9], 380[1].
$C_{10}H_8Br_6N_2S_2$ *m*-α-Benzobisthiazole, 2,6-dimethyl-, hexabromide, 1806[6].
$C_{10}H_8ClNO_2$ β-Butenyl chloride, α-keto-γ-phenyl-, oxime, 360[4].
2,3 - Quinolinedione, 6-chloro-1,4-dihydro-1-methyl-, 2681[6].
$C_{10}H_8ClNO_3$ Pyruvyl chloride, oxime, Bz deriv., 360[2].
$C_{10}H_8ClN_3O$ 1,2,3 - Triazole-4-carboxylyl chloride, 5-methyl-1-phenyl-, 416[7].
$C_{10}H_8Cl_2O_2$ Malonyl chloride, benzyl-, 1226[3].
$C_{10}H_8Cl_2O_4$ Hydroquinol, 2,3(and 2,5)-dichloro-, diacetate, 1064[9].
$C_{10}H_8Cl_4O_2$ 2,4-Xylic acid, α[2],α[2],α[4],α[4]-tetrachloro-, Me ester, 184[4].
$C_{10}H_8N_2$ Benzenediacetonitrile, 1794[3].
3-Indoleacetonitrile, 759[1].
$C_{10}H_8N_2O$ 1(2) - Quinolinenitrile, 2-hydroxy- (?), 2680[3].
$C_{10}H_8N_2OS_2$ Rhodanine, 5-(anilinomethylene)-, 600[4].
$C_{10}H_8N_2O_2$ Isophthalic acid, 4,6 bis(aminomethyl)-, di γ-lactam, 380[2].
Quinaldine, 5-nitro-, 2862[3].
Terephthalic acid, 2,5-bis(aminomethyl)-, di-γ-lactam, 380[2].
$C_{10}H_8N_2O_2S_2$ 3,7(4,6) - Benzobithiazinedione, 1993[4].
$C_{10}H_8N_2O_3$ Barbituric acid, 1-phenyl-, 2825[9].
1(2) - Phthalazone, 4-hydroxy-, acetate, 381[9].
$C_{10}H_8N_2O_5S_2$ 1,4,2 - Benzothiazin 3(4)-one, 7-[(carboxymethyl)mercapto] - 6 - nitro-, 1993[3].
$C_{10}H_8N_2O_6$ Terephthalic acid, 2,5-diformyl-, dioxime, 380[4].
$C_{10}H_8N_2O_{12}S_2$ Acetic acid, (4,6-dinitro-*m*-phenylenedisulfonyl)bis-, 1993[6].
$C_{10}H_8N_2S_2$ Benzene, (α,β-dithiocyanoethyl)-, 1604[1].
$C_{10}H_8N_4$ 1,2,3-Triazole-4-nitrile, 5-methyl-1-1-phenyl-, 416[9].
$C_{10}H_8N_4O_3$ 4(or 5) - Imidazolecarboxanilide, 2′(and 4′)-nitro-, *and salts*, 394[9], 395[1].
$C_{10}H_8N_4O_8$ Cytosine, picrate, 206[3].
$C_{10}H_8O$ See *Naphthol*.
$C_{10}H_8OS$ 1-Naphthol, 2-mercapto-, 1234[3].
Thiochromone, 6-methyl-, 202[7].
$C_{10}H_8O_2$ 1,2-Naphthalenediol, 383[6], 3656[4].
$C_{10}H_8O_2S$ Thiochromone, 6-methoxy-, 202[7].
1-Thionaphthenealdehyde, 2-hydroxy - 4-methyl-, 202[9].

$C_{10}H_8O_3S$ (See also *Naphthalenesulfonic acid*).
Thiochromone, 6-methyl-, *S*-dioxide, 198[1].
$C_{10}H_8O_4$ Chromone, 3-hydroxy-6(and 8)-methoxy-, 606[2].
Cinnamic acid, *o*-carboxy-, 2331[4].
Esculetin, 4-methyl-, 184[8].
2-Furancarbinol, pyromucate, 1235[3].
Furoin, 327[1].
4 - Isobenzofuranacetic acid, 1,2-dihydro-1-keto-, 184[3].
$C_{10}H_8O_4S$ Naphtholsulfonic acid, P 1813[5]; *Na salt*, 3644[8].
1(and 2) - Naphthylsulfuric acid, *K salt*, 1796[4].
$C_{10}H_8O_5S$ 1 - Thionaphthenecarobxylic acid, 1,2-dihydro-2-keto-(?), *S*-dioxide, Me ester, 2995[5].
—, 2-hydroxy-(?), *S*-dioxide, Me ester, 2995[5].
$C_{10}H_8O_6$ Homophthalic acid, 3,4-methylenedioxy-, 3292[4].
$C_{10}H_8O_6S_2$ Naphthalenedisulfonic acid, *SO_3 addn. compd.*, 2153[9].
$C_{10}H_8O_7S_2$ Naphtholdisulfonic acid, 3644[8].
$C_{10}H_8S$ 2-Naphthyl mercaptan, 2976[6].
$C_{10}H_9AsN_4O_6$ Arsanilic acid, *N*-4(or 5)-imidazolylformyl-3-nitro-, *and salts*, 395[3].
$C_{10}H_9BiO_7$ Glyceric acid, *β*-(o-carboxyphenyl)-, bismuth deriv., *Na salt*, 796[4]
$C_{10}H_9Br$ 1-Butine, 1-bromo-4-phenyl-, 1783[2].
m-Xylene, 4-(bromoethinyl)-, 1783[1].
$C_{10}H_9BrCl_2O_4$ Phenol, 3-bromo-4,5-dichloro-2,6-dimethoxy-, acetate, 1225[7].
$C_{10}H_9BrN_2$ Δ^2-Pyrazoline, 4-bromo-1-methyl-5-phenyl-(?), 759[9].
$C_{10}H_9BrN_4$ Imidazole, (*p*-bromophenylazo)-methyl-, *and -HCl*, 193[9].
$C_{10}H_9BrO$ 1(2)-Naphthalenone, 2-bromo-3,4-dihydro-, 383[3].
$C_{10}H_9BrOS$ 4-Thiochromanone, 3-bromo - 6-methyl-, 197[4], 202[6].
$C_{10}H_9BrO_2S$ 4-Thiochromanone, 3-bromo-6-methoxy-, 202[6].
—, 3-bromo-6-methyl-, *S*-oxide, 199[1].
$C_{10}H_9BrO_3$ Cinnamic acid, bromomethoxy-, 3164[7].
$C_{10}H_9BrO_3S$ 4-Thiochromanone, 3-bromo-6-methyl-, *S*-dioxide, 198[2].
$C_{10}H_9BrO_4$ Hydrocinnamic acid, 2-bromo-4,5-methylenedioxy-, 3292[5].
$C_{10}H_9BrO_4S_2$ Acetic acid, (4-bromo-*o*-phenylenedithio)bis-, 1797[8].
$C_{10}H_9Br_2ClO_4$ Phenol, 4,5-dibromo-3-chloro-2,6-dimethoxy-, acetate, 3694[9].
$C_{10}H_9Br_3O_4$ Phenol, 3,4,5-tribromo-2,6-dimethoxy-, acetate, 2320[4].
$C_{10}H_9ClN_2$ Imidazole, 5-chloro-2-methyl - 1 - phenyl-, 1624[2].
Pyrazole, 4-chloro - 3(or 5) - methyl-5(or 3)-phenyl-, *and -HCl*, 2856[4].
$C_{10}H_9ClN_4O_2$ 1,2,3,5-Tetrazole, 4-(5-chloro-2-methoxybenzoyl)-1-methyl-(?), 3004[7].
$C_{10}H_9ClO_3$ Acetophenone, 5-chloro-2-hydroxy-, acetate, 1237[9].
Mandelyl chloride, acetate, 184[8].
$C_{10}H_9ClO_4$ Benzoyl chloride, 2-(carbomethoxyoxy)-3-methoxy-, 1065[9].
$C_{10}H_9Cl_2HgNO_3$ Acetanilide, 2-(acetoxymercuri)-4,6-dichloro-, 2317[8].
$C_{10}H_9Cl_2NO_2$ Collidinedicarboxylyl chloride, *and $POCl_3$ compd.*, 1226[3,4].
$C_{10}H_9Cl_2N_3O_3$ 1,2,3 - Benzotriazole, 1-(carboxymethoxy) - 5,6 - dichloro-, Et ester, 750[7].
$C_{10}H_9Cl_3O_4$ Phenol, 3,4,5-trichloro-2,6-dimethoxy-, acetate, 2320[4].
$C_{10}H_9Cl_4O_2Sb$ Stibine, (acetylphenacyl)dichloro-, dichloride, 403[1].

$C_{10}H_9N_3O_9$ Creosol, 3,5,6-trinitro-, acetate, 908[1].
$C_{10}H_9N_5O_2$ 1,2,3 - Triazole - 4,5 - dicarboxamide, 1-phenyl-, 417[1].
$C_{10}H_9NaO_2 + 2H_2O$ Δ^3-2-Butenone, 4-hydroxy-, Na deriv., 741[1].
$C_{10}H_9O_2Tl$ 1,3-Butanedione, 1-phenyl-, Tl deriv., 49[7].
$C_{10}H_{10}$ Butadiene, phenyl-, 2092[3].
1-Butine, 4-phenyl-, 587[8].
Naphthalene, dihydro-, 382[9].
Toluene, propargyl-, 587[8].
m-Xylene, 4-ethinyl-, 1783[1].
$C_{10}H_{10}AsN_3O_4$ Arsanilic acid, N-4(or 5) imidazolylformyl-, and salts, 395[2].
$C_{10}H_{10}BrNO_3$ Hydrocinnamamide, 2-bromo-4,5-methylenedioxy-, 2679[9].
$C_{10}H_{10}BrN_3O$ Cinnamaldehyde, α-bromo, semicarbazone, 759[6].
$C_{10}H_{10}Br_2OS$ 4-Thiochromanone, 6-methyl-, dibromide, 202[4].
$C_{10}H_{10}Br_2O_2$ 2,4-Xylic acid, α^2,α^4-dibromo, Me ester, 184[2].
$C_{10}H_{10}Br_2O_3S$ 2-Propanone, 3 (o-anisylsulfonyl)-1,1-dibromo-, 1625[9].
$C_{10}H_{10}ClHg_2NO_4$ Aniline, 2,4(and 4,5)-bis-(acetoxymercuri)-6(and 2)-chloro-, 589[4, 6].
$C_{10}H_{10}ClNO_3$ Acetanilide, 5-chloro - 2 - hydroxy-, acetate, 194[1].
$C_{10}H_{10}ClNO_4$ p-Toluic acid, α-chloro-3-nitro-, Et ester, 378[9].
$C_{10}H_{10}ClN_3O$ Indazole, 7 - (α-chloroacetamido)-5-methyl-, 2498[1].
$C_{10}H_{10}Cl_3NO_3$ Acetamide, α-trichloro-N-vanillyl-, 404[9].
$C_{10}H_{10}CoMoN_2O_4 + 2H_2O$ Cobalt pyridine molybdate, 1185[1].
$C_{10}H_{10}HgI_3N$ Quinoline, complex salt with MeI and HgI_2, 3695[8].
$C_{10}H_{10}IN$ 1 - Methylquinolinium iodide, 1081[9].
$C_{10}H_{10}N_2$ Imidazole, 1-methyl-2-phenyl, *and salts*, 395[6].
1,8-Naphthylenediamine, 1074[9].
Propiolaldehyde, β-phenyl-, methylhydrazone, 759[9].
Pyrazole, methylphenyl-, 759[9], 2855[8].
$C_{10}H_{10}N_2O$ Imidazole, 5-methoxy-2-phenyl, 1623[8].
3-Indoleacetamide, 759[3].
Isoindazole, 1-acetyl-3-methyl-, 1622[7].
Pyrazolone, methylphenyl-, 2857[6].
Quinazolone, dimethyl-, 207[2, 3].
$C_{10}H_{10}N_2O_2$ Hydantoin, 5-benzyl-, 2010[9].
2-Indazoleacetic acid, α-methyl-, 1622[6].
2-Indazolepropionic acid (?), 1622[6, 7].
Isatin, 4,6-dimethyl-, oxime, 2681[5].
1-Isoindazoleacetic acid, α-methyl-, *and Ag salt*, 1622[7].
1-Isoindazolepropionic acid (?), 1622[6, 7].
Phthalazine, 1,4-dimethoxy-, 185[5].
4(3) - Quinazolone, methoxy-2-methyl-, 207[4, 5].
$C_{10}H_{10}N_2O_2S$ 2 - Benzisothiazolecarbamic acid, Et ester, 763[6].
2 - Oxazolidone, 3-phenylthiocarbamyl-, 2161[1].
$C_{10}H_{10}N_2O_3$ 1(2) - Naphthalenone, 3,4-dihydro 2-nitro, oxime, 383[1].
$C_{10}H_{10}N_2O_4$ o-Quinone, 3,5-diacetamido, 2842[4]
p Tolualdehyde, 3-nitro-, oxime, Ac deriv, 179[8].
$C_{10}H_{10}N_2O_4S$ 3,5-Pyrazoledione, 4 benzylsulfonyl, 1409[5].
$C_{10}H_{10}N_2O_5$ Acetanilide, 2-hydroxynitro-, acetate, 2318[3], 2840[3].
Benzoic acid, o-(β nitroformylethyl)-, 383[3].
$C_{10}H_{10}N_2O_6$ Benzoic acid, 4-acetamido-3-methoxy 2-nitro-, 3458[3].
$C_{10}H_{10}N_2O_7$ Creosol, dinitro-, acetate, 907[9], 908[1], 3449[6].
Isocresol, 4,6-dinitro-, acetate, 3449[5].
$C_{10}H_{10}N_2O_8$ Glycerol, 3,5-dinitrobenzoate, 740[7]
$C_{10}H_{10}N_2O_9S_3$ 2,4,5 - Naphthalenetrisulfonic acid, 1,8-diamino, 1074[7].
$C_{10}H_{10}N_4O$ 4(or 5) - Imidazolecarboxanilide, 2'(and 4') amino, *and salts*, 395[1].
1,2,3 - Triazole 4 - aldehyde, 5-methyl-1-phenyl, oxime, 416[8]
1,2,3 - Triazole - 4 - carboxamide, 5-methyl 1-phenyl, 416[7].
$C_{10}H_{10}N_4O_2$ 1,2,3 - Benzotriaz-4(3)-one, 3 propionylamino-, 207[1].
$C_{10}H_{10}N_4O_3$ Pyrazolecarboxylic anhydride, d methyl-, 2857[1, 2].
$C_{10}H_{10}N_4O_4S$ 1,2,3 Triazole 4 - carboxamide, 1-benzylsulfonyl-5 hydroxy-, 1409[4].
—, 5-hydroxy-p-tolylsulfonyl-, 1409[1].
$C_{10}H_{10}N_4O_5$ 1-Naphthol, 2,4-dinitro-, N_2H_4 *salt*, 750[9].
$C_{10}H_{10}N_4O_6$ Hydroxylamine, β,β' (4,6-dinitro m phenylene)bis, diacetate, 2667[4].
$C_{10}H_{10}N_4S_2$ 1,3,4 - Thiodiazole, 2-methyl-5-β phenylthiocarbamido-, 2161[9].
$C_{10}H_{10}N_6O_7$ Imidazole, 2-amino-4(and 5)-methyl, picrate, 193[9].
$C_{10}H_{10}N_8O_4$ Xanthopterin, 902[9].
$C_{10}H_{10}O$ Benzaldehyde, p-allyl-, 2666[2].
—, p-propenyl, 2666[2].
Δ^3-2-Butenone, 4-phenyl-, 180[8], 1593[9]
1(2) - Naphthalenone, 3,4-dihydro-, 200[8].
$C_{10}H_{10}OS$ 4-Thiochromanone, methyl-, 202[4], 204[2]; *salts*, 201[8, 7].
$C_{10}H_{10}O_2$ Acrylophenone, β-hydroxy p-methyl-, 1590[8].
1,3-Butanedione, 1-phenyl, 3164[1].
Cinnamic acid, Me ester, 1612[8], 2907[3], 3712[9].
Crotonophenone, β-hydroxy-, 3006[1].
Isosafrole, 402[2], 748[9], 2674[7].
1(2) - Naphthalenone, 3,4-dihydro-2-hydroxy, 383[4].
Safrole, 402[2], 2671[1], 2674[7].
$C_{10}H_{10}O_2S$ 4 - Thiochromanone, 6-methoxy-, 202[2].
—, 6-methyl-, S-oxide, 198[9], 202[8].

$C_{10}H_{10}O_3$ Acrylophenone, β-hydroxy-*p*-methoxy-, 1590[8].
1,3-Butanedione, 1-salicyl-, 1236[9].
Butyric acid, α-keto-γ-phenyl-, 56[6].
4-Chromanone, 6(and 8)-methoxy-, 606[1,2].
$C_{10}H_{10}O_3S$ 4 - Thiochromanone, 6-methyl-, *S*-dioxide, 198[2].
$C_{10}H_{10}O_4$ Acetophenone, α,4-dihydroxy-, α-acetate, 3457[6].
Benzofuranone, ethyldihydroxy-, 3163[8].
Hydrocinnamic acid, *o*-carboxy-, 383[1].
Resorcinol, 2,4-diacetyl-, 1237[6].
Succinic acid, phenyl-, 1657[2].
$C_{10}H_{10}O_4S$ *m*-Toluic acid, 6-[(carboxymethyl)-mercapto]-, 1397[4].
$C_{10}H_{10}O_5$ (See also *Opianic acid.*)
Anisic acid, 2-hydroxy-, acetyl deriv., P 2563[9].
Benzoic acid, *p*-carbethoxyoxy-, 394[7].
Propionic acid, β-(β-resorcylyl)-, 2996[1].
$C_{10}H_{10}O_6$ Acetophenone, carboxyoxydihydroxy-, Me ester, 375[7].
Benzoic acid, 2-(carbomethoxyoxy) - 3-methoxy-, 1065[8].
Terephthalic acid, 1798[2].
$C_{10}H_{10}O_8$ Pyran-3,5-dicarboxylic acid, 3,4-dihydro-2,4-diketo - 6 - methoxy-(?), di-Me ester, 2860[9].
—, 2-hydroxy-4-keto-6-methoxy-(?), di-Me ester, 2860[9].
$C_{10}H_{10}S$ 1,2-Benzothiopyran, 4-methyl-, 203[8], 204[1].
$C_{10}H_{11}AsCl_2N_2O_6$ Benzenearsonic acid, 3,4-bis-(α - chloroacetamido)-, 1605[9].
$C_{10}H_{11}AsN_4O_4$ Arsanilic acid, 3-amino-*N*-4(or 5)-imidazolylformyl, *and salts*, 395[3].
$C_{10}H_{11}Br$ Benzene, (γ-bromo-Δ³ butenyl)-, 1054[2], 3286[8].
$C_{10}H_{11}BrO$ Acetophenone, α-bromo-2,4-dimethyl-, 1783[6].
Estragole, β-bromo, 899[5].
$C_{10}H_{11}BrO_2$ 2,4-Xylic acid, α¹(and α³)-bromo-, Me ester, 183[9], 184[1].
$C_{10}H_{11}BrO_4$ Anisic acid, 5 bromo 2-hydroxy-, Et ester, 3004[4].
$C_{10}H_{11}BrO_4S$ 2-Propanone, 1-[*o*(and *p*)-anisylsulfonyl]-3-bromo-, 1625[7,8].
$C_{10}H_{11}Br_3O$ Dicyclopentadiene, dihydroketo, tribromide, 384[6].
$C_{10}H_{11}Cl$ Naphthalene, chlorotetrahydro-, 2935[6].
Styrene, α-chloro-2,4-dimethyl-, 1783[1].
$C_{10}H_{11}ClN_2O_2$ Tetrahydro - 2,5 - diketo-1-pyrrylmethylpyridinium chloride, 365[7].
$C_{10}H_{11}ClN_4O_3$ 2-Propanone, 1-chloro-, 4-(*m*-nitrophenyl)semicarbazone, 175[8].
$C_{10}H_{11}ClO_2$ Acetophenone, 2-chloro-5-methoxy-3-methyl-, 1238[2].
Benzoic acid, γ-chloropropyl ester, 3687[7].
Butyrophenone, 5-chloro-2-hydroxy-, 1237[7].
Phenol, *p*-chloro-, butyrate, 1237[7].
p-Toluyl chloride, α-ethoxy-, 378[9].
$C_{10}H_{11}ClO_3$ Hydrocinnamic acid, α-chloro-β-methoxy-, 2997[8].
$C_{10}H_{11}ClO_3S$ 2-Propanone, 1-chloro-3-*p*-tolylsulfonyl-, 1625[7].
$C_{10}H_{11}Cl_2NO_3$ Acetamide, α,α-dichloro-*N*-vanillyl-, 404[9].
$C_{10}H_{11}Cl_3OTe$ α - Ethylphenacyltellurium trichloride, 414[1].
$C_{10}H_{11}IN_2O$ 2-Acetyl-1-methylindazolium iodide, 1621[9].
1 - Acetyl - 2 - methylisoindazolium iodide, 1621[9].
$C_{10}H_{11}IO$ Acetophenone, α-iodo-2,4-dimethyl-, 1783[6].
$C_{10}H_{11}IO_3S$ 2-Propanone, 1-iodo-3-*p*-tolylsulfonyl-, 1625[7].
$C_{10}H_{11}N$ Aniline, *N*-methyl-*N*-propargyl-, *and -HCl*, 390[1].
Indole, 1-ethyl-, 1625[6].
Quinaldine, 1,2-dihydro-, 2330[7].
$C_{10}H_{11}NO$ Benzoic acid, *o*-(γ-aminopropyl)-, lactam, 392[1].
2-Butanone, 4-imino-3-phenyl-, 1216[7].
Δ³-2-Butenone, 4-amino-4-phenyl-, 1611[6].
4(1) - Quinolone, 2,3-dihydro-5(6, 7 and 8)-methyl-, 205[5,6,7].
α-Toluic acid, *o*-(β-aminoethyl)-, lactam, 392[1].
Tolunitrile, α-ethoxy-, 391[6,7].
$C_{10}H_{11}NOS$ 4 - Thiochromanone, 3-amino-6-methyl-, 202[8].
$C_{10}H_{11}NO_2$ Acetoacetanilide, 368[6].
Benzoic acid, *p*-amino, allyl ester, 2322[7].
Crotonamide, α-hydroxy-γ-phenyl-, 362[7].
Δ² - Cyclohexene-Δ¹,α - acetic acid, α-cyano-3-methyl-, *and salts*, 2832[3].
Diacetanilide, 745[5].
3,4-Dihydro - 6,7 - dihydroxy - 2 - methylisoquinolinium chloride, phenol betaine, 3011[2].
3 - Phenomorpholone, 5,7-dimethyl-, 2498[3].
4(1) - Quinolone, 2,3-dihydro-6-methoxy-, 205[3].
$C_{10}H_{11}NO_3$ β-Alanine, *N*-benzoyl-, 2502[4].
4-Chromanone, 6(and 8)-methoxy-, oxime, 606[1,2].
Tyrosine, *N*-methylene-, *Na salt*, 3283[4].
$C_{10}H_{11}NO_3S$ Saccharin, 1-propyl-, 2327[7].
$C_{10}H_{11}NO_4$ Anisic acid, α-carbamyl-, Me ester, 1068[8].
Carbonilic acid, carboxy-, monoethyl ester, 3164[3].
Isatoic acid, Et ester, 2997[8].
$C_{10}H_{11}NO_5$ Benzaldehyde, 2-ethoxy-3-methoxy-6-nitro-, 179[2].
Creosol, 6-nitro, acetate, 908[1].
Isocreosol, 3-nitro-, acetate (?), 3449[7].
2,4 - Pyrroledicarboxylic acid, 5-formyl-3-methyl-, mono-Et ester, 2160[4].
p-Toluic acid, α-hydroxy-3-nitro-, Et ester, 379[1].
$C_{10}H_{11}NO_6$ Benzoic acid, 2-ethoxy-3-methoxy-6-nitro-, 179[3].
Carbonic acid, Et 3-nitro-*p*-anisyl ester, 1608[7].
$C_{10}H_{11}NO_{10}Th$ Pyridine pentaformatothoriate, 1569[6].
$C_{10}H_{11}NS$ Isothiocyanic acid, 2-mesityl ester, 2314[1].
—, *s*-pseudocumyl ester, 2314[1].
$C_{10}H_{11}NS_2$ Carbamic acid, dithio-, γ-phenylallyl ester, 2991[4].
$C_{10}H_{11}N_3$ 1,2,3-Triazole, 4,5-dimethyl-1-phenyl-, 416[9].
$C_{10}H_{11}N_3O$ Hydrocinnamyl azide, α-methyl-, 592[8].
Indazole, 7-acetamido-5-methyl-, 2496[9].
Isoindazole, 7-acetamido-5-methyl-, 2497[1].
$C_{10}H_{11}N_3OS$ Oxazolidine, 2-imino-3-phenylthiocarbamyl-, 2161[1].
Δ² - Oxazoline, 2-(β-phenylthiocarbamido)-, 2161[1].
$C_{10}H_{11}N_3O_2$ Acetaldehyde, benzoyl-, semicarbazone, 760[5].
Pyruvaldehyde, phenyl-, semicarbazone, 760[3].

1,2,4 - Triazol-5-ol, 3-p-anisyl-1-methyl-, 914[8].
$C_{10}H_{11}N_3O_3$ Piperonal, 2-methylsemicarbazone, 914[8].
$C_{10}H_{11}N_3O_4$ o-Quinone, 3,5-diacetamido-, 1-oxime, 2842[4].
$C_{10}H_{11}N_3O_6$ p-Toluic acid, 3-ethylamino-2,6-dinitro-, 173[9].
$C_{10}H_{11}N_3S$ 1,4,3 - Isothiodiazine, 2-methylamino-5-phenyl-, 415[9], 416[5].
1,3,4,6 - Thiodiazine, 2,3-dihydro-2-imino-3-methyl-5-phenyl-, 415[9].
$C_{10}H_{11}N_5O_2$ 1,2,3,5 - Tetrazole-4-carbamic acid, 1-phenyl-, Et ester, 763[9].
$C_{10}H_{11}N_5O_4S$ 1,2,3 - Triazole - 4 - carboxamide, 1-amino - N - benzylsulfonyl-5-hydroxy-, 1409[4].
—, 1-amino - 5 - hydroxy- N-p-tolylsulfonyl-, 1409[1].
$C_{10}H_{11}N_5O_7$ Urea, β-(dinitrotolyl)-α-ethyl-α-nitro-, 590[2].
$C_{10}H_{12}$ (See also *Tetralin.*)
Dicyclopentadiene, 2148[5].
$C_{10}H_{12}AsClHgN_2O_6$ Benzenearsonic acid, 3,5-diacetamido-2-(chloromercuri) - 4 - hydroxy-, 1607[5].
$C_{10}H_{12}AsIN_2O_6$ Benzenearsonic acid, 3,5-diacetamido-4-hydroxy-2-iodo-, 1607[5].
$C_{10}H_{12}AsNO_6$ m-Arsanilic acid, N-acetyl-4-hydroxy-, acetate, 394[9].
$C_{10}H_{12}AsNO_8$ Benzenearsonic acid, 4-carboxyoxy - 3 - nitro-, isopropyl and Pr esters, 1984[8].
$C_{10}H_{12}BrN$ Aniline, N-β-bromoallyl-N-methyl-, 390[1].
$C_{10}H_{12}BrNO_3$ Acetamide, α-bromo-N-vanillyl-, 404[9].
Acetanilide, 4 - bromo - 2,5 - dimethoxy-, 179[9].
Ether, α-bromo-2-nitro - p - tolyl propyl (?), 2833[8].
$C_{10}H_{12}BrNO_4$ 2-Pyrrolecarboxylic acid, 4-bromo-5-(hydroxymethyl) - 3 - methyl-, Et ester, formate, 2160[2].
$C_{10}H_{12}BrN_3O$ 2-Propanone, 1-bromo-3-phenyl-, semicarbazone, 1783[7].
$C_{10}H_{12}BrN_3O_2$ Acetophenone, α-bromohydroxymethyl-, semicarbazone, 1783[6].
—, α-bromo-p-methoxy-, semicarbazone, 1783[6].
$C_{10}H_{12}Br_2$ Benzene, (β,β'-dibromo-*tert*-butyl)-, 385[4].
Toluene, α-bromo-o-(γ-bromopropyl)-, 905[6].
$C_{10}H_{12}Br_2O$ Dicyclopentadiene, dihydroketo-, dibromide, 384[6].
$C_{10}H_{12}Br_2O_2$ Duroquinone, dibromide, 1984[2].
$C_{10}H_{12}ClNO_2$ Acetaniside, chloro-6-methyl-, 207[5], 2842[2,3].
2,4 - Acetoxylide, α-chloro-6-hydroxy-, 2498[2].
3,4 - Dihydro - 6,7 - dihydroxy-2-methylisoquinolinium chloride, 3011[2].
$C_{10}H_{12}ClNO_3$ Acetamide, α-chloro-N-vanillyl-, 404[9].
3-Pyrrolecarboxylic acid, 5-chloroacetyl-4-methyl-, ethyl ester, 3455[5].
$C_{10}H_{12}INO_3$ Acetamide, α-iodo-N-vanillyl-, 404[9].
$C_{10}H_{12}IN_3O_2$ Acetophenone, hydroxy - α - iodomethyl-, semicarbazone, 1783[6].
$C_{10}H_{12}NO_7P$ 1,3-Propanediol, 2-(hydroxymethyl)-2-nitro-, phenyl cyclophosphate, 2308[2].

$C_{11}H_7NO_3S$ 1-Naphthalenesulfonic acid, 4-cyano-, *Na salt*, 1216[2].
$C_{11}H_7NO_4$ Naphthoic acid, 3,4-dihydro-3,4-diketo-, oxime, 1233[6].
—, 3-hydroxy-4-nitroso-, 1233[6].
—, 6(and 7)-nitro-, 1075[2].
$C_{11}H_7NS_2$ Benzothiazole, 1-(2-thienyl)-, 600[8].

$C_{11}H_7N_3O$ 5-Pyrimidinenitrile, 1,4 dihydro-4-keto-2-phenyl-, 206^4.
$C_{11}H_7N_3O_2$ 2-Naphthoyl azide, 3-hydroxy-, 1616^5.
$C_{11}H_8BrNO$ Naphthaldehyde, bromo-, oxime, $1216^{4,5}$.
$C_{11}H_8BrNO_2$ 2 - Naphthamide, 4 - bromo - 3 - hydroxy-, 910^4.
$C_{11}H_8BrN_3$ Pyridine, 4-(*p*-bromophenylazo)-, 1808^4.
$C_{11}H_8Br_2O$ Ether, 2,4-dibromo-1-naphthyl methyl, 1803^8.
$C_{11}H_8Br_2O_4$ Benzofuran, 2,3-dibromo-6-methoxy-1-methyl-4, 5-methylenedioxy , 3450^2.
Pyruvic acid, bromo(bromoanisal)-, 3164^8.
$C_{11}H_8Br_3NO_3$ 3-Indolinepropionic acid, 4,6,7-tribromo-2-keto-, 1989^b.
$C_{11}H_8Br_4N_2S$ Naphthothiazole, 2 amino-, tetrabromide, 2858^6.
$C_{11}H_8ClNO$ 4(1)-Pyridone, 1-(*p*-chlorophenyl)-, 585^2.
$C_{11}H_8ClNO_2$ 2 - Naphthamide, 4-chloro - 3 - hydroxy-, 1616^1.
$C_{11}H_8ClN_3$ Pyridine, 4-(*p*-chlorophenylazo)-, 1807^8.
$C_{11}H_8ClN_3O$ Phenol, chloro(4 pyridylazo)-, 1808^4
$C_{11}H_8Cl_2N_2O_8$ Malonic acid, (3,5-dichloro-2,4-dinitrophenyl) , di-Me ester, 1222^8.
$C_{11}H_8Cl_2O_2$ Chromone, 6-chloro-2-(chloromethyl)-3-methyl-, 1237^7.
$C_{11}H_8INO_3$ 3-Tricycloindolepropionic acid, 2,3-dihydro-6 iodo-2-keto-, 1989^7.
$C_{11}H_8N_2$ 3,9-Pyridindole, 415^6.
$C_{11}H_8N_2O_3$ 4(1)-Pyridone, 1-[*m*(and *p*) nitrophenyl]-, *and salts*, $586^{4,5}$
5-Pyrimidinecarboxylic acid, 1,4-dihydro-4-keto-2-phenyl , 206^4.
$C_{11}H_8N_2O_4$ Naphthalene, 1-methyl 2,4-dinitro-, 2325^2, 3001^8.
$C_{11}H_8N_2O_5$ Acetic acid, *α* cyano-*m*-nitrobenzoyl , methyl ester, 1926^8
$C_{11}H_8N_2S$ Naphthothiazole, 2-amino-, $2858^{5,6}$.
Naphthylamine, thiocyano , 1603^8.
$C_{11}H_8N_2S_2$ Quinrhodine, 3 methyl-, 1627^4
$C_{11}H_8N_4O_7$ Pyridine, picrate, 2501^2.
$C_{11}H_8O_2$ 1-Naphthaldehyde, 2 hydroxy-, 3165^9.
2-Naphthoic acid, 1074^9.
$C_{11}H_8O_3$ Naphthoic acid, hydroxy-, 1233^3, P 3171^6.
$C_{11}H_8O_4$ Chromone, 7-hydroxy-, acetate, 605^9.
2-Indanglyoxylic acid, 1-keto-, 1077^8.
$C_{11}H_9BrClN_3O$ 1-Imidazoleacetamide, bromo-5 chloro-2-phenyl , 1624^1.
$C_{11}H_9BrIN$ 3 Bromo-1-phenylpyridinium iodide, 741^9.
$C_{11}H_9BrN_4O_4$ 1,2,3,5-Tetrazole, 4-(5 bromo-2 hydroxyanisoyl)-, acetate, 3004^6.
$C_{11}H_9BrOS$ Thiochromone, 3-bromo-2,6 dimethyl-, 202^7.
$C_{11}H_9BrO_3$ Pyruvic acid, bromobenzal , methyl ester, 3164^8.
$C_{11}H_9BrO_4$ Benzofuran, 3-bromo-6 methoxy-1-methyl-4,5 methylenedioxy-, 3450^2.
Cinnamic acid, 2-bromo-4,5 methylenedioxy Me ester, 3292^8.
Pyruvic acid, anisalbromo , 3164^7.
$C_{11}H_9BrO_5S$ $\Delta^{3,\alpha}$-Benzisothioxoleacetic acid, ?-bromo-(?), *S* dioxide, Et ester, 1069^2.
1-Thionaphthenecarboxylic acid, ?-bromo-1,2-dihydro 2-keto-(?), *S*-dioxide, Et ester, 1069^2.
$C_{11}H_9Br_2NO_3$ Xylonitrile, dibromohydroxy-, acetate, $403^{8,9}$.
$C_{11}H_9Br_2NO_3$ 3-Indolinepropionic acid, 4,6-dibromo-2-keto , 1989^b.
$C_{11}H_9Br_2NO_4$ Glutaric acid, *α*-(4,6-dibromo-2,3-iminophenyl)-, 1989^6.
$C_{11}H_9Br_2N_3$ Pyridine, 4-[*β*-(2,4-dibromophenyl)-hydrazino]-, *and -HBr*, 1808^5.
$C_{11}H_9Br_3ClN$ 4-Chloro-1-phenylpyridinium tribromide, 586^8.
$C_{11}H_9Br_3N_2O_2$ 1-[*m*(*o* and *p*)-nitrophenyl]pyridinium tribromide, $586^{1,2,8}$.
$C_{11}H_9ClN_2O$ 1-Pyrazolecarboxylyl chloride, 3(or 5)-methyl-5(or 3)-phenyl-, 2856^3.
$C_{11}H_9ClN_2O_2$ 1-[*m*(*o* and *p*)-nitrophenyl]pyridinium chloride, *HgCl₂ compd.*, $586^{1,2,3}$.
$C_{11}H_9ClN_2O_6$ 1-(*p*-Nitrophenyl)pyridinium perchlorate, 586^2.
$C_{11}H_9ClN_2O_8$ Malonic acid, [3(and 5)-chloro-2,4-dinitrophenyl]-, di-Me ester, 1222^9.
$C_{11}H_9ClO_2$ Chromone, 3-chloro-2,6-dimethyl-, 1237^8.
---, 6-chloro 2-ethyl-, 1238^1.
Coumarin, 6-chloro 3,4 dimethyl , 1237^9.
$C_{11}H_9ClO_3$ *o*-Coumaryl chloride, acetate, 3291^5
$C_{11}H_9Cl_2N$ 4-Chloro-1-phenylpyridinium chloride, *and HgCl₂ compd.*, 586^8.
$C_{11}H_9Cl_2NO_4$ 4-Chloro-1-phenylpyridinium perchlorate, 586^8.
$C_{11}H_9Cl_2N_3$ Pyridine, 4 [*β*-(2,4-dichlorophenyl)-hydrazino]-, *and - HCl*, 1807^8, 1808^3.
$C_{11}H_9IN_2O$ 2-Furaldehyde, (*m*-iodophenyl)hydrazone, 1791^9.
$C_{11}H_9I_2N$ 3-Iodo-1-phenylpyridinium iodide, 742^1.
$C_{11}H_9I_2NO_3$ 3-Indolinepropionic acid, 4,6-diiodo-2 keto , 1989^7
$C_{11}H_9I_2NO_4$ Glutaric acid, *α*-(2,3 imino-4,6-diiodophenyl) , 1989^7.
$C_{11}H_9N$ Propiolonitrile, phenethyl-, 1783^8.
---, (2,4 xylyl)-, 1783^9.
$C_{11}H_9NO$ 4(1) Pyridone, 1 phenyl , *and salts*, 585^1, 586^4, 2163^1
$C_{11}H_9NO_2$ *o* Coumaronitrile, acetate, 3291^5.
3 Indolealdehyde, 1 acetyl , 758^7
1-Naphthamide, 3-hydroxy-, 1233^4.
Naphthoic acid, amino , 1075^1.
4(1)-Pyridone, 1 (*p* hydroxyphenyl) , 586^5.
$C_{11}H_9NO_3$ Acetic acid, benzoylcyano , methyl ester, 1926^8.
3-Furancarboxamide, 2,3-dihydro 2 keto-5 phenyl-, 404^8.
1 Naphthoic acid, 4 amino-3-hydroxy-, *and salts*, 1233^5
5(4) - Oxazolone, 4 (*p* - hydroxybenzal)-2-methyl-, 2683^4.
3 Tricycloindolepropionic acid, 2,3-dihydro-2 keto , 1989^8.
$C_{11}H_9NO_4$ 3-Quinaldinecarboxylic acid, 4-hydroxy , *N*-oxide, 1079^8.
$C_{11}H_9N_3$ Pyridine, 4-phenylazo , 1807^7.
$C_{11}H_9N_3O_5$ 1 (*m* nitrophenyl)pyridinium nitrate, 584^9.
$C_{11}H_{10}$ $\Delta^{1,3}$ Cyclopentadiene, 5-phenyl (?), 1392^8.
Naphthalene, methyl , 1178^9.
$C_{11}H_{10}BrN$ Naphthalenemethylamine, 5-bromo-, *and salts*, 1216^8.
$C_{11}H_{10}BrNO_2$ Cinnamaldehyde, *α*-bromo-, oxime, Ac deriv., 760^3.
$C_{11}H_{10}BrN_3$ Pyridine, 4-[*β*-(*p* bromophenyl)hydrazino]-, *and - HBr*, 1808^4.
$C_{11}H_{10}BrN_5O_7$ Pyrazole, 4-bromodimethyl-, picrate, 2494^8.
$C_{11}H_{10}Br_2N_2O_4$ Diacetamide, *N*-(2,6-dibromo-3-nitro *p* tolyl)-, 1223^1.

$C_{11}H_{10}Br_2OS$ 4-Thiochromanone, 3,3-dibromo-2,6-dimethyl-, 202[6].

$C_{11}H_{10}Br_2O_3$ Butyric acid, dibromoketophenyl-, methyl ester, 3164[6].

Cinnamic acid, dibromomethoxy-, methyl ester, 3164[8].

$C_{11}H_{10}Br_2O_4$ Butyric acid, anisyldibromoketo-, 3164[7].

$C_{11}H_{10}Br_3N$ 1-Phenylpyridinium tribromide, 586[1].

$C_{11}H_{10}Br_3NO_2$ Cinnamic acid, 3-amino-2,4,6-tribromo-(?), Et ester, 594[3].

$C_{11}H_{10}Br_5NO_2$ Hydrocinnamic acid, 3-amino-α,β,2,4,6-pentabromo (?), Et ester, 594[3].

$C_{11}H_{10}ClNO_2Sn$, 717[7].

$C_{11}H_{10}ClNO_3$ β-Butenyl chloride, γ-p-anisyl-α-keto-, oxime, 360[8].

$C_{11}H_{10}ClN_3$ Pyridine, 4-[β-(p-chlorophenyl)hydrazino]-, *and - HCl*, 1807[8], 1808[2].

2-Pyrrolealdehyde, 5-ethyl-3-methyl-4-propionyl-, 1236[4].
2-Pyrrolecarboxylic acid, 3,5-dimethyl-4-vinyl-, Et ester, 1621[1].
o-Tolualdehyde, 3,6-dihydro-5-isopropyl-6-keto-, oxime, 2846[8].
α-Toluic acid, *o*-(aminomethyl), Et ester, -*HCl*, 392[1].
$C_{11}H_{15}NO_2S$ Thiomorpholine, 4-benzyl-, 1-dioxide, *and* -*HCl*, 40[1].
$C_{11}H_{15}NO_3$ Alanine, β-*p*-anisyl-, Me ester, *and* -*HCl*, 417[5].
Carbanilic acid, *o*-hydroxy-, Bu and isobutyl esters, 2319[9].
3-Indolepropionic acid, 2,3,4,5,6,7-hexahydro-2-keto-, 1980[5].
Lactophenine, 2301[2]
2-Pyrrolecarboxylic acid, 4-ethyl-5-formyl-3-methyl-, Et ester, 2160[7].
—, ethylmethylpropionyl-, 1236[3], 3403[6]
Spiro[cyclohexane-1,4′-cyclopentene]-3′,5′-dione, 2′-methoxy-, 3′-oxime, 3286[7]
$C_{11}H_{15}NO_4$ Anisole, 2-butoxy-4(and 5)-nitro-, 1608[2].
Phenetole, 4-(ethoxymethyl)-2(and 3)-nitro-, 2833[9].
2,3-Pyrroledicarboxylic acid, 4-methyl-, diethyl ester, 3455[2].
$C_{11}H_{15}NO_4S$ 2-Propanone, 1-(*o*-phenetylsulfonyl)-, oxime, 419[2].
$C_{11}H_{15}NO_5$ Benzyl alcohol, 2,3-diethoxy-5-nitro-, 1792[9].
Veratric acid, 6-(β-amino-α-hydroxyethyl)-, 2330[9], 2331[1].
$C_{11}H_{15}NS$ Thiomorpholine, 4-benzyl-, *and* -*HCl*, 40[1].
Valeranilide, thio-, 364[1].
$C_{11}H_{15}N_3O$ 2-Butanone, 3-phenyl-, semicarbazone, 2996[7].
Dicyclopentadiene, dihydroketo-, semicarbazone, 384[6].
Isobutyrophenone, semicarbazone, 2996[7].
$C_{11}H_{15}N_3O_2$ Acetophenone, 2-hydroxy-3,5(and 4,5)-dimethyl-, semicarbazone, 2154[4,8].
2-Butanone, 1-hydroxy-1-phenyl-, semicarbazone, 906[6].
Δ^1-3-Pentenone, 1-(2-furyl)-2-methyl-, semicarbazone, 3005[2].
o-Tolualdehyde, 5-ethyl-4-hydroxy-, semicarbazone, 2154[5].
$C_{11}H_{15}N_3O_3$ Acetophenone, 3,4-dimethoxy-, semicarbazone, 2321[8].
$C_{11}H_{15}N_3O_3S$ Sulfanilic acid, *N*-acetyl-, isopropylidenehydrazide, 1409[6].
$C_{11}H_{15}N_3S$ Acetone, thio-4-*p*-tolylsemicarbazone, 2161[9].
$C_{11}H_{16}$ Benzene, pentamethyl-, 1984[1].
$C_{11}H_{16}AgN_3O_2$ 2-Fenchanenitrile, 2-nitrosohydroxamino-, Ag deriv., 596[4].
$C_{11}H_{16}AsI$ Arsinoline, 1,2,3,4-tetrahydro-1-methyl-, methiodide, 2839[5].
$C_{11}H_{16}AsNO_4$ Arsanilic acid, *N*-valeryl-, 1605[9].
$C_{11}H_{16}AsNO_5$ Carbanilic acid, *p*-arsono-, Bu ester, 1605[9].
$C_{11}H_{16}BrNO_2$ 2-Pyrrolecarboxylic acid, 5-(bromomethyl)-4-ethyl-3-methyl-, Et ester, 2160[6].
$C_{11}H_{16}Cl_2O$ Camphane-2-*exo*-carboxylyl chloride, 2-*endo*-chloro-, 2847[4].
$C_{11}H_{16}KN_3O_2$ 2-Camphanenitrile, 2-nitrosohydroxamino-, K deriv., 596[1].
$C_{11}H_{16}N_2O$ 2(1)-Pyridone, 1-methyl-3-(tetrahydro-1-methyl-2-pyrryl)-, 2982[8].
$C_{11}H_{16}N_2O_2$ (See also *Pilocarpine.*)
Benzoic acid, *p*-amino-, β-dimethylaminoethyl ester, -*HCl*, 1852[8].
Carbazic acid, β-phenyl-, Bu ester, 2485[6].
2-Indazolecarboxylic acid, 4,5,6,7-tetrahydro-4,6-dimethyl-, Me ester, 389[8].
Isopilocarpine, 2108[5].
2-Pyrrolealdehyde, 5-ethyl-3-methyl-4-propionyl-, oxime, 1236[4].
$C_{11}H_{16}N_2O_3$ Barbituric acid, 5-allyl-5-butyl-, 458[8].
—, 5-allyl-5-*sec*-butyl-, 458[8].
—, 5-allyl-5-isobutyl-, 458[8].
2-Pyrrolecarboxylic acid, 4-ethyl-5-formyl-3-methyl-, Et ester, oxime, 2160[7].
$C_{11}H_{16}N_2O_4$ Butyrophenone, β-hydroxamino-β,2-dihydroxy-5-methyl-, oxime, 1412[5].
$C_{11}H_{16}N_2O_5$ Glutaconic acid, (carbamidomethylene)-, diethyl ester, 3169[2].
$C_{11}H_{16}N_2O_5S$ Uracil xyloside, ethylthio-, 1812[7].
$C_{11}H_{16}N_2S$ Pseudourea, α-ethyl-β,γ-dimethyl-α-phenylthio-, 374[2].
$C_{11}H_{16}N_4O_4S_2$ Hydrouracil, 5,5′-methylenebis[6-hydroxy-6-methyl-2-thio-, 2682[1].
$C_{11}H_{16}N_4S$ Camphorquinone, cyclic thiocarbohydrazone, 1810[8].
$C_{11}H_{16}N_6O_7$ Guanidine, α-ethyl-β,γ-dimethyl-, picrate, 3284[7].
$C_{11}H_{16}O$ Anisole, *p*-butyl-, 739[7].
Benzyl alcohol, α,α-diethyl-, 1798[8].
2,3,4-Hemimellitenol, 6-ethyl-, 2154[8].
Phenethyl alcohol, *p*-isopropyl-, 1793[6], 2488[7].
Phenetole, *p*-isopropyl-, 1793[4].
Pseudocumenol, 6-ethyl-, 2154[7].
$C_{11}H_{16}OS$ Ether, β-(benzylmercapto)ethyl ethyl, 737[4].
$C_{11}H_{16}O_2$ Anisole, 2-butoxy-, 1608[2].
2-Butanol, 4-*o*(and *p*)-anisyl-, 739[5,6].
Δ^1-Cyclohexenecarboxylic acid, 6-(α-hydroxybutyl)-, lactone, 2490[4].
Isomeric acids from 2-hydroxy-2-camphanenitrile, 596[2,3].
Phenol, 2-ethoxy-5-propyl-, 402[3].
Resorcinol, 4-amyl-, 2320[3].
—, 4-isoamyl-, 2320[3].
$C_{11}H_{16}O_2S$ *p*-Toluenesulfinic acid, Bu ester, 307[3], 3694[1].
$C_{11}H_{16}O_3$ Benzyl alcohol, 2,3-diethoxy-, 1792[9].
Carbinol, phenylethenyltris-, 1396[7].
5-Epicamphorcarboxylic acid, 2674[9].
1,2-Propanediol, 1-*p*-anisyl-2-methyl-, 2850[6].
Pyromucic acid, hexyl ester, 1620[8]; α-methylamyl ester, 1620[8].
$C_{11}H_{16}O_4$ 2-Benzofurancarboxylic acid, octahydro-1-keto-, Et ester, 1989[4].
2-Benzofuranpropionic acid, octahydro-1-keto-, 1989[4].

$C_{11}H_{16}O_5$ Cyclopentanedicarboxylic acid, keto-, di-Et ester, 2823[8].
Glutaric acid, α-(2-ketocyclohexyl)-, 1989[4].
$C_{11}H_{16}O_6$ Δ^2-1,1,5-Pentenetricarboxylic acid, tri-Me ester, 1592[8].
$C_{11}H_{17}As$ Arsine, dimethyl(γ-phenylpropyl)-, 2839[5].
$C_{11}H_{17}AsI_4$ Benzyltrimethylarsonium iodide, CHI_3 addn. compd., 2815[8].
$C_{11}H_{17}ClN_4O_3$ Me ester of tetrapeptide from 3,6-dihydro-3-methylene-2,5-pyrazinediol, -*HCl*, 381[7].
$C_{11}H_{17}ClO$ Isocamphanecarboxylyl chloride, 2847[3].
$C_{11}H_{17}ClO_4$ Succinic acid, α-(α-chloroethylidene)-β-methyl-, di-Et ester, 2824[4].
$C_{11}H_{17}N$ Benzylamine, *N*, *N*-diethyl, 2835[3], 3688[6].
Pyridine, 3,5-diisopropyl-, 2499[4].
$C_{11}H_{17}NO$ 2-Camphanenitrile, 2-hydroxy-, 596[2].
2-Fenchanenitrile, 2-hydroxy-, 596[1].
Menthone, 2-cyano-, P 2167[8].
Phenethylamine, (ethoxymethyl)-, *and -HCl*, 391[6,8].
$C_{11}H_{17}NO_2$ Camphonanic acid, 3-cyano-, Me ester, 2999[3].
Cyclopentanecarboxylic acid, 3-cyano-1,2,2-trimethyl-, Me ester, 2158[1].
2-Pyrrolecarboxylic acid, 4-ethyl-3,5-dimethyl-, Et ester, 1621[2].
3-Pyrrolepropionic acid, 5-ethyl-2,4-dimethyl, 1236[1].
Toluidine, *N*, *N*-dimethyl-, acetate, 588[7].
$C_{11}H_{17}N_3O$ 6-Camphenone, semicarbazone, 1800[4].
Teresantalaldehyde, semicarbazone, 1227[4].
2,4-Xylenol, 6-ethyl-, semicarbazone, 2154[5].
$C_{11}H_{17}N_3O_2$ 2-Fenchanenitrile, 2-nitrosohydroxamino-, 596[4].
$C_{11}H_{17}N_5O_3$ Acetoacetic acid, (5-isopropyl-3-*s*-triazolylazo)-, Et ester, 3294[2].
—, (5-propyl-3-*s*-triazolylazo)-, Et ester, 3294[2].
$C_{11}H_{18}AsI$ Benzylethyldimethylarsonium iodide, 2839[6].
$C_{11}H_{18}Br_2O$ Ketone, bromomethyl 1,2,2,3-tetramethylcyclopentyl, 1399[2].
$C_{11}H_{18}ClNO$ Camphane-2-*exo*-carboxamide, 2 *endo*-chloro-, 2847[4].
$C_{11}H_{18}ClN_3O$ Epicamphor, 5-chloro-, semicarbazone, 2675[1].
$C_{11}H_{18}N_2$ Indazole, 2-ethyl-4,5,6,7-tetrahydro-4,6-dimethyl-, 389[7].
Isoindazole, 1-ethyl-4,5,6,7-tetrahydro-4,6-dimethyl-, 389[7].
$C_{11}H_{18}N_2O$ Camphenilone, acetylhydrazone, 2846[8].
Fenchocamphorone, acetylhydrazone, 2846[7].
Santenone, acetylhydrazone, 2846[9].
$C_{11}H_{18}N_2O_2$ Compd., m. 87°, from Et 4-amino-3,5-dimethyl-2-pyrrolecarboxylate and Me_2SO_4, 1235[9].
$C_{11}H_{18}N_2O_3$ (See also *Amytal*.)
Barbituric acid, 5-butyl-5-isopropyl-, 458[7].
Cyclohexanecarbinol, α-vinyl-, allophanate, 2666[2].
1-Octin-3-ol, 3-methyl-, allophanate, 2481[6].
$C_{11}H_{18}N_2O_4$ Barbituric acid, 5-(butoxymethyl)-5-ethyl-, 581[9].
—, 5-ethyl-5-(isobutoxymethyl)-, 581[9].

$C_{11}H_{23}N_3$ Base, b[11] 140°, m. 32–4°, from *N*, *N'*-dibromospiro[piperidine - 1,1' - piperazine-4',1''-piperidine] and NH_3, 2862[8].
$C_{11}H_{23}N_3O$ 4-Octanone, 2,6-dimethyl-, semicarbazone, 407[5].
$C_{11}H_{23}N_3O_2$ 3-Decanone, 4-hydroxy-, semicarbazone, 1786[7].
$C_{11}H_{24}BrNO_2$ α - Carboxyamyltrimethylammonium bromide, Et ester, 3688[8].
$C_{11}H_{24}INO_3$ [α - (Hydroxymethyl)isoamyl]trimethylammonium iodide, acetate, 1271[7].
$C_{11}H_{24}N_2S$ Urea, diamylthio-, 2835[3].
—, diisoamylthio-, 2835[3].
$C_{11}H_{24}N_6NiS_2$ Triaminotripropylaminenickelous thiocyanate, 1589[6].
$C_{11}H_{24}O_2$ 3,4-Decanediol, 3-methyl-, 1786[6].
1,11-Hendecanediol, 1789[1].
Heptanone, di-Et acetal, 2937[8].
$C_{11}H_{24}S_4$ Propane, 1,2,2,3-tetrakis(ethylmercapto)-, 737[2].
$C_{11}H_{26}INO_3$ (γ,γ-Diethoxy-α-methylpropyl)trimethylammonium iodide, 1788[6].
$C_{12}Fe_5N_{12}$ (See also *Ferrous ferricyanide.*)
Turnbull's blue, 1186[8].
$C_{12}H_3Cl_{18}Fe_2O_5$ + $7H_2O$, 1769[4].
$C_{12}H_4Cl_2N_6O_8$ Azobenzene, 5,5'-dichloro-2,4-2',4'-tetranitro-, 750[5].
$C_{12}H_4Cl_4O_3$ Quinone, 2-chloro-6-(2,4,6-trichlorophenoxy)-, 2318[9].
$C_{12}H_4CoN_6O_{14}$, 2296[3].
$C_{12}H_4N_6O_{12}$ Biphenyl, *s*-hexanitro-, 1395[3].
$C_{12}H_5Br_2ClN_2O_2$ 3-Isophenoxazone, 4-amino-2,10-dibromo-8-chloro-, 194[2].
$C_{12}H_5Br_3N_2O_2$ Carbazole, 1,3,6-tribromo-8-nitro-, 1079[8].
3-Isophenoxazone, 4-amino-2,8,10-tribromo-, 194[3].
$C_{12}H_5Br_3N_2O_5$ Ether, 2,4-dinitrophenyl 2,4,6-tribromophenyl, 3694[6].
$C_{12}H_5I_3N_2O_2$ 3-Isophenoxazone, 4-amino-2,8,10-triiodo-, 194[3].
$C_{12}H_5N_3O_{10}$ 2,7-Naphthalenedicarboxylic acid, trinitro-, *and salts*, 1619[6,7].
$C_{12}H_5N_5O_{11}$ Ether, 2,4-dinitrophenyl 2,4,5-trinitrophenyl, 2667[7].

$C_{12}H_5N_7O_{12}$ Diphenylamine, hexanitro-, 2834[6], 3571[1].

$C_{12}H_6As_2I_2N_2O_6$ p-Arsenophenol, 3,3'-diiodo-5,5'-dinitro-, 3289[5].

$C_{12}H_6BrN_3O_7$ Ether, 4-bromo-2-nitrophenyl 2,4-dinitrophenyl, 3694[8].

$C_{12}H_6Br_2Cl_2O_4S_4$ Benzenesulfonyl chloride, 2,2'-dithiobis[5-bromo-, 1797[6].

$C_{12}H_6Br_2N_2O$ Carbazole, 3,6-dibromo-9-nitroso-, 1079[5].

$C_{12}H_6Br_2N_2O_2$ Carbazole, 3,6-dibromo-1-nitro-, 1079[6].

$C_{12}H_6Br_3N$ Carbazole, 1,3,6-tribromo-, 1079[3].

$C_{12}H_6ClN_3O_7$ Ether, 4-chloro-2-nitrophenyl 2,4-dinitrophenyl, 3694[8].

$C_{12}H_6Cl_2N_2O_4$ Biphenyl, 4,4'-dichlorodinitro-, 3292[1,4].

$C_{12}H_6Cl_2N_2O_5$ Ether, 3,5-dichloro-2,4-dinitrophenyl phenyl, 1222[8].

$C_{12}H_6Cl_2O_2$ 2,7-Naphthalenedicarboxylyl chloride, 1619[2].

$C_{12}H_6Cl_4N_2O$ Azoxybenzene, tetrachloro-, 2152[5], 3694[8].

$C_{12}H_6Cl_4O_2$ Hydroquinol, 2-chloro-6-(2,4,6-trichlorophenoxy)-, 2318[9].

$C_{12}H_6N_2$ 2,7-Naphthalenedinitrile, 1618[9].

$C_{12}H_6N_2OS_2$ 1-Naphthol, 2,4(?)-dithiocyano-, 1603[9].

$C_{12}H_6N_2O_4S$ Dibenzothiophene, 2,7-dinitro-, 2155[4].

$C_{12}H_6N_2O_8$ 2,7-Naphthalenedicarboxylic acid, dinitro-, *and di-NH_4 salt*, 1619[5].

$C_{12}H_6O_2$ Acenaphthenequinone, 2491[7], 2852[1].

$C_{12}H_6O_3$ 1,2-β-Naphthofurandione, 597[8].

$C_{12}H_6O_{12}$, Mellitic acid, 3071[3]

$C_{12}H_7AsCl_2O$ Phenoxarsine, dichloro-, 176[2].

$C_{12}H_7Br$ Naphthalene, 1-(bromoethinyl)-, 1783[2].

$C_{12}H_7BrClNO_3$ Ether, 4-bromo-2-nitrophenyl p-chlorophenyl, 3694[9].

—, p-bromophenyl 4-chloro-2-nitrophenyl, 3694[8].

$C_{12}H_7BrN_2O_2$ 3-Isophenoxazone, 4-amino-8-bromo-, 194[2].

$C_{12}H_7Br_2NO_3$ Ether, 4-bromo-2-nitrophenyl p-bromophenyl, 3694[9].

$C_{12}H_7Br_3N_2$ Carbazole, 1-amino-3,6,8-tribromo-, 1079[8].

$C_{12}H_7ClN_2O_5$ Ether, p-chlorophenyl 2,4-dinitrophenyl, 3694[7].

$C_{12}H_7Cl_2NO_3$ Ether, 4-chloro-2-nitrophenyl p-chlorophenyl, 3694[9].

$C_{12}H_7Co_2N_4O_{11}$, 2296[4].

$C_{12}H_7I$ Naphthalene, 1-iodoethinyl-, 1783[4].

$C_{12}H_7IN_4O$ Compd. from 2,3-diaminophenazine and HIO_3, 1239[4].

$C_{12}H_7I_2N$ Carbazole, diiodo-, 1805[2].

$C_{12}H_7NO_2S$ 2-α-Naphthisothiazolecarboxylic acid, 763[7].

$C_{12}H_7NO_3$ 1,3,2-β-Naphthoxazine-2,4(3)-dione, 1616[4].

$C_{12}H_7N_3O_2$ 4,10-Phenantholine, 6-nitro-, 2325[8]

$C_{12}H_7N_3O_3$ 2-Phenazinol, nitro-, 603[4,7].

$C_{12}H_7N_3O_5$ Ketone, 2,4-dinitrophenyl 2-pyridyl, 204[5].

$C_{12}H_7N_3O_7$ Ether, 2,4-dinitrophenyl nitrophenyl, 3694[8].

Furan, 2-(2,4,6-trinitrostyryl)-, 3001[9].

$C_{12}H_7N_3S_2$ 1-Naphthylamine, 2,4(?)-dithiocyano-, 1603[7].

$C_{12}H_7N_5$ 1,3-Triazolophenazine(?), 1805[7].

$C_{12}H_7NaO_6S_2$ Sultone from diazo compd. of 4-amino-3-acenaphthenesulfonic acid, 411[3].

$C_{12}H_8AsClO_3$ 3(and 4)-Chloro-6-hydroxyphenoxarsonium oxide, 176[2].

$C_{12}H_8AsClS$ Phenothiarsine, 10-chloro-, 2839[3].

$C_{12}H_8AsCl_3$ Arsine, bis(p-chlorophenyl)chloro-, 393[5].

$C_{12}H_8AsCl_3O$ Arsine, dichloro[(chlorophenoxy)-phenyl]-, 176[1,2].

$C_{12}H_8AsIO$ Phenoxarsine, 6-iodo-, 2839[4].

$C_{12}H_8BrKO_3$ 2-Naphthoic acid, 4-bromo-3-hydroxy-, Me ester, K deriv., 910[9].

$C_{12}H_8BrNO_3$ Ether, p-bromophenyl o(and p)-nitrophenyl, 3694[8].

$C_{12}H_8BrNaO_3$ 2-Naphthoic acid, 4-bromo-3-hydroxy-, Me ester, Na deriv., 910[9].

$C_{12}H_8BrO_3Rb$ 2-Naphthoic acid, 4-bromo-3-hydroxy-, Me ester, Rb deriv., 910[9].

$C_{12}H_8Br_2$ Biphenyl, 3,5-dibromo-, 1800[9].

$C_{12}H_8Br_2Hg$ Benzene, 1,1'-mercuribis[4-bromo-, 177[3].

$C_{12}H_8Br_2N_2$ Carbazole, 1-amino-3,6-dibromo-, 1079[6].

$C_{12}H_8Br_2OTe$ Phenoxtellurine, dibromide, 1064[1].

$C_{12}H_8Br_2O_6S_4$ Benzenesulfonic acid, 2,2'-dithiobis[5-bromo-, *di-K salt*, 1797[6].

$C_{12}H_8Br_3N$ Xenylamine, 2,4',6-tribromo-, 1800[9].

$C_{12}H_8ClIN_2O_4$ Bis(m-nitrophenyl)iodonium chloride, 585[5].

$C_{12}H_8ClIN_2O_8$ Bis(m-nitrophenyl)iodonium perchlorate, 585[6].

$C_{12}H_8ClNO_3$ Ether, chloronitrophenyl phenyl, 176[2], 3694[8].

—, chlorophenyl nitrophenyl, 175[9], 3694[8].

$C_{12}H_8ClN_3O_2Se$ 4-Nitro-1-phenylselenolium chloride, 2498[8].

$C_{12}H_8ClN_3O_3Se$ 1-(p-Hydroxyphenyl)-4-nitropiaselenolium chloride, 2498[7].

$C_{12}H_8ClN_3O_4$ Xenylamine, 4'-chloro-2,3'-nitro-, 3292[2].

$C_{12}H_8Cl_2$ Biphenyl, 3,4-dichloro-, 1800[8].

$C_{12}H_8Cl_2Hg$ Benzene, 1,1'-mercuribis[4-chloro-, 177[3].

$C_{12}H_8Cl_2Hg_2N_2$ Aniline, dimercuribis[6-chloro-, 589[5,6].

$C_{12}H_8Cl_2N_2Se$ 4-Chloro-1-phenylselenolium chloride, 2498[8].

$C_{12}H_8Cl_2OTe$ Phenoxtellurine, dichloride, 1063[9].

$C_{12}H_8Cl_3N$ Xenylamine, 2,4',6,-trichloro-, 1800[9].

$C_{12}H_8Cl_4HgN_2$ Aniline, 2,2'-mercuribis[4,6-dichloro-, 2317[8].

$C_{12}H_8CoN_2O_6$, 2296[1].

$C_{12}H_8HgN_2O_4$ Benzene, 1,1'-mercuribis[2-nitro-, 177[2], 2837[9].

$C_{12}H_8IN_3O_7$ Bis(m-nitrophenyl)iodonium nitrate, 585[5].

$C_{12}H_8I_2N_2O_4$ Bis(m-nitrophenyl)iodonium iodide, 585[6].

$C_{12}H_8I_2OTe$ Phenoxtellurine, diiodide, 1064[1].

$C_{12}H_8K_2MoO_6 + 2H_2O$ Potassium dipyrocatecholatomolybdate, 3405[8].

$C_{12}H_8N_2OS$ 2-α-Naphthisothiazolecarboxamide, 763[8].

$C_{12}H_8N_2O_2$ Naphthalic acid, cyclic hydrazide, 1075[3].

2,8-Phenazinediol, 603[6].

$C_{12}H_8N_2O_3$ Ketone, p-nitrophenyl 2(and 4)-pyridyl, 204[2,4].

$C_{12}H_8N_2O_3S$ Diazo compd. from 3-amino-1-acenaphthenesulfonic acid, 411[4].

$C_{12}H_8N_2O_3SSe$ 1-Phenyl-4-sulfopiaselenolium hydroxide, cyclic ester, 2498[7].

$C_{12}H_8N_2O_4$ 2-Pyridol, p-nitrobenzoate, 1413[1].

$C_{12}H_8N_2O_4SSe$ 1-(p-Hydroxyphenyl)-4-sulfopiaselenolium hydroxide, cyclic ester, 2498[7].

$C_{12}H_8N_2O_5$ Ether, 2,4-dinitrophenyl phenyl, 2319[7], 3694[7].
$C_{12}H_8N_2O_6$ 1-Naphthaleneacetic acid, 2,4-dinitro-, 2325[3].
$C_{12}H_8N_2O_7Te$ Phenoxtellurine, dinitrate, 1064[1].
$C_{12}H_8N_4O_5$ Azoxybenzene, *p,p'*-dinitro-, 174[9].
$C_{12}H_8N_4O_{10}Pb$ Bis(*m*-nitrophenyl)lead dinitrate, 585[6].
$C_{12}H_8O$ 7-Acenaphthenone, 3010[7].
$C_{12}H_8OTe$ Phenoxtellurine, 1063[9].
$C_{12}H_8O_3S_2$ Thianthrenesulfonic acid, *and Na salt*, P 3061[7].
$C_{12}H_8O_4$ 2,7-Naphthalenedicarboxylic acid, *and salts*, 1618[9], 1619[1,2].
2-Naphthaleneglyoxylic acid, 1-hydroxy-, *and Ba salt*, 593[9].
$C_{12}H_8S$ Dibenzothiophene, *and -HNO_3*, 2155[2].
$C_{12}H_9AgO_3$ 2-Naphthoic acid, 3-hydroxy-, Me ester, Ag deriv., 910[9].
$C_{12}H_9AsBrNO_4$ Arsinic acid, (*o*-bromophenyl)-(*o*-nitrophenyl)-, 1606[4].
$C_{12}H_9AsClN$ Phenarsazine, 1-chloro-1,6-dihydro-, *and $AsCl_3$ addn. compd.*, 1606[3,8].
$C_{12}H_9AsCl_2S$ Arsine, dichloro(*o*-phenylmercaptophenyl)-, 2839[3].
$C_{12}H_9BIO_4$, 717[7].
$C_{12}H_9BrO$ Ether, *p*-bromophenyl phenyl, 3694[7].
$C_{12}H_9BrO_3$ 2-Naphthoic acid, 4-bromo-3-hydroxy-, Me ester, 910[9].
α,γ-Pentadienaldehyde, *γ*-bromo-*δ*-hydroxy-, benzoate, 741[9].
$C_{12}H_9Br_2N$ Xenylamine, 2,6-dibromo-, 1800[9].
$C_{12}H_9Cl$ Acenaphthene, 2-chloro-, 411[1].
$C_{12}H_9ClHgN_2O_4S$ Benzenesulfonic acid, (3-chloromercuri-4-hydroxyphenylazo)-, *Na salt*, 1605[6].
$C_{12}H_9ClHgS$ Sulfide, *p*-chloromercuriphenyl phenyl, 1605[7].
$C_{12}H_9ClN_2Se$ 1-Phenylpiaselenolium chloride, 2498[6].
$C_{12}H_9ClO$ 2-Acetonaphthone, *α*-chloro-, 411[1].
$C_{12}H_9ClO_2$ 2-Naphthoyl chloride, 3(and 6)-methoxy-, 1616[9], 1617[1].
$C_{12}H_9ClO_3$ Chromone, 3-acetyl-6-chloro-2-methyl-, 1237[9].
2-Naphthoic acid, 4-chloro-3-hydroxy-, Me ester, 1616[4].
$C_{12}H_9Cl_3OTe$ *p*-Phenoxyphenyltellurium trichloride, 1063[8].
$C_{12}H_9CuNO_3$ Ketone, 2-furyl *α*-hydroxybenzyl, oxime, Cu deriv., 1055[7].
$C_{12}H_9IO_3$ *α,γ*-Pentadienaldehyde, *δ*-hydroxy-*γ*-iodo-, benzoate, 742[1].
$C_{12}H_9I_4N_2$ Compd. from *N*-phenyl-*o*-phenylenediamine and HIO_3, 1239[4].
$C_{12}H_9KO_3$ 2-Naphthoic acid, 3-hydroxy-, Me ester, K deriv., 910[9].
$C_{12}H_9MoO_8Tl$ Thallium dipyrogallolmolybdate, 557[2].
$C_{12}H_9N$ Carbazole, P 768[9], P 3697[7].
$C_{12}H_9NO$ Biphenyl, *p*-nitroso-, 587[3].
2-Naphthonitrile, 3-methoxy-, 910[8].
$C_{12}H_9NO_2$ 2-Pyridol, benzoate, 1413[1].
$C_{12}H_9NO_3$ Ether, *p*-nitrophenyl phenyl, 3694[7].
$C_{12}H_9NO_4$ Phenol, 2-nitro-4-phenoxy-, 1608[9].
$C_{12}H_9NO_4S_2$ *o*-Benzenedisulfonimide, *N*-phenyl-, 3289[9].
$C_{12}H_9NO_6S$ 3-Acenaphthenesulfonic acid, 4-nitro-, *Na salt*, 411[2].
$C_{12}H_9NS$ Dibenzothiophene, amino-, 2155[2].
$C_{12}H_9N_3O$ 2-Phenazinol, amino-, *and salts*, 603[6,7].
5-Pyrimidinenitrile, 1,4-dihydro-4-keto-2-*p*-tolyl-, 206[5].
$C_{12}H_9N_3O_2$ 5-Pyrimidinenitrile, 2-*p*-anisyl-1,4-dihydro-4-keto-, 206[5].
$C_{12}H_9N_3O_4$ Dipicolinic acid, 4-(4-pyridylamino)-, 1238[7].
Pyridine, 2-(2,4-dinitrobenzal)-1,2-dihydro-, 204[5].

Cinnamic acid, 2-ethoxy-3-methoxy-, 1793[1].
Isoapiol, 3449[9].
Lactic acid, β-phenyl-, Me ester, acetate, 751[2].
Malonic acid, (γ-phenylpropyl)-, 405[1].
Mandelic acid, Et ester, acetate, 378[2].
Phthalic acid, diethyl ester, 262[9], 1396[4], 1493[6], 3533[4], 3779[3]; mono-Bu ester, *Zn salt*, P 2504[7].
Resorcinol, dipropionate, 1624[5].
—, dipropionyl-, 1624[6,7].
$C_{12}H_{14}O_5$ Ethylene oxide, α-(2,3-dimethoxy-3,4-methylenedioxyphenyl)-β-methyl-, 3450[1]
—, (5,6-dimethoxypiperonyl)-, 3450[1].
Glyoxylic acid, (4-methoxy-6-methyl-*m*-phenetyl)-, 765[3].
Propionic acid, β-(2,4-dimethoxybenzoyl)-, 2996[1].
Propiophenone, 2,3-dimethoxy-4,5-methylenedioxy-, 3450[1].
$C_{12}H_{14}O_6$ Phthalic acid, 3,5-dimethoxy-, di Me ester, 1613[2].
$C_{12}H_{14}O_6S$ Acetic acid, *o*-sulfobenzoyl-, Et Me ester, 1069[3]
$C_{12}H_{14}S$ 1,2-Benzothiopyran, 4-ethyl-6-methyl-, 203[9], 204[1]
—, 4,6,8-trimethyl-, 203[9], 204[1].
$C_{12}H_{15}BrO_2$ Phenethyl alcohol, β-(bromomethyl)-β-methyl-, acetate, 385[5].
$C_{12}H_{15}BrO_3$ Piperonyl alcohol, α-(α-bromoethyl)-5,6-dimethoxy-, 3450[1]
$C_{12}H_{15}Br_2NO_2$ Δ²-Cyclohexene-Δ¹,α-acetic acid, α-cyano-3-methyl-, dibromide, Me ester, 2832[4]
o-Toluic acid, α-cyano-3,4-dihydro-5-methyl-, Me ester, dibromide, 2832[4].
$C_{12}H_{15}ClN_2O_2$ 2-Pentanone, 1-(*p*-chloro-*N*-nitrosoanilino)-4-methyl-, 2837[8]
$C_{12}H_{15}IN_2$ Pyrazole, 1-benzyl-3 (and 5)-methyl-, methiodide, 3006[6]
$C_{12}H_{15}NO$ Benzamide, *N*-(cyclobutylmethyl)-, 390[6]
—, *N*-(β-cyclopropylethyl)-, 3012[4].
Benzonitrile, *o*-(γ-ethoxypropyl)-, 905[4].
$C_{12}H_{15}NO_2$ 1,3,4-Benzoxazin-4-one, 2,3-dihydro-2-isobutyl-, 2674[2].
Δ²-Cyclohexene-Δ¹,α-acetic acid, α-cyano-3-methyl-, Et-ester, 2832[3].
Cyclopentanecarboxylic acid, 1-anilino-, 171[9].
1-Piperidinol, benzoate, 372[3].
Salicylamide, *N*-isoamylidene-, 2673[9].
o-Toluic acid, α-cyano-3,4-dihydro-α,5-dimethyl-, Me ester, 2832[4].
$C_{12}H_{15}NO_3$ (See also *Hydrocotarnine*.)
β-Alanine, *N*-benzoyl-, Et ester, 2502[4].
Salicylamide, *N*-isovaleryl-, 2674[1].
$C_{12}H_{15}NO_4$ Benzoic acid, *p*-nitro-, Am ester, 2322[9].
Carbanilic acid, carboxy-, diethyl ester, 3164[3].
Meconin, 2-(methylaminomethyl)-, *salts*, 2331[2,3].
3-Pyrroleacrylic acid, 5-carbethoxy-2,4-dimethyl-, 1621[1].
Valeric acid, α-benzamido-δ-hydroxy-, 2148[3].

$C_{12}H_{15}NO_5$ Caprophenone, 2,4 - dihydroxy-5-nitro-, 2995[8].
Propionic acid, β - (2,4 - dimethoxybenzoyl)-, oxime, 2996[1].
2,4 - Pyrroledicarboxylic acid, 5 - formyl-3-methyl-, di-Et ester, 2159[9], 2160[3].
p-Toluic acid, α - hydroxy - 3 - nitro-, Bu ester, 379[1].
$C_{12}H_{15}NS$ Isothiocyanic acid, pentamethylphenyl ester, 2314[1].
$C_{12}H_{15}N_3$ Crotononitrile, trimer, 1785[5], 3448[8].
$C_{12}H_{15}N_3O$ 1 - Indanone, 2 - ethyl-, semicarbazone, 1620[1].
$C_{12}H_{15}N_3OS$ Δ^2 - Cyclohexenone, 5 - furyl - 3-methyl-, thiosemicarbazone, 3161[8].
4 - Thiochromanone, 2,6 - dimethyl-, semicarbazone, 202[4].
$C_{12}H_{15}N_3O_2$ Cinnamaldehyde, α - ethoxy-, semicarbazone, 759[7].
Δ^2 - Cyclohexenone, 5 - furyl - 3 - methyl-, semicarbazone, 3161[2].
Cyclopentanecarboxamide, 1 - *N* - nitrosoanilino, 171[9].
Mesityl oxide, *p* - nitrophenylhydrazone, 761[7].
Δ^2 - Pyrazoline, 3,5,5 - trimethyl - 1 - (*p*-nitrophenyl)-, 761[7].
$C_{12}H_{15}N_3O_3$ Anthranilic acid, *N* - acetyl-, β-propionylhydrazide, 207[1].
—, *N* - propionyl-, β - acetylhydrazide, 206[9].
v - Benzenetriamine, *N*, *N'*, *N''* - triacetyl-, 2497[7].
Glutaramide, α - benzamido-, 1994[4].
$C_{12}H_{15}N_3O_3S$ Pyridine, 2,6 - diamino-, *p* - toluenesulfonate, 3009[5].
$C_{12}H_{15}N_3O_4$ Piperidine, dinitrotolyl-, 3448[4].
$C_{12}H_{15}N_3O_6$ 2,4,6 - *s* - Triazinetricarboxylic acid, tri-Et ester, 207[9].
$C_{12}H_{15}N_5$ Benzaldehyde, 5 - propyl - 3 - *s* - triazolylhydrazone, 3293[9].
$C_{12}H_{16}$ Acenaphthene, hexahydro-, 1405[1].
$C_{12}H_{16}BrNO_4$ 2,4 - Pyrroledicarboxylic acid, 5-(bromomethyl) - 3 - methyl-, di-Et ester, 2159[9], 2160[3].
$C_{12}H_{16}Br_2N_2O_4$ Rhamnose, (2,4 - dibromophenyl)hydrazone, 1794[4].
$C_{12}H_{16}Br_2N_2O_5$ Galactose, (2,4 - dibromophenyl)-hydrazone, 1794[3].
$C_{12}H_{16}Br_2O_7$ *d*-Glucose, triacetyldibromo-, 376[1].
$C_{12}H_{16}ClNO$ 2 - Pentanone, 4 - (*p* - chloroanilino)-4-methyl-, 2837[4].
$C_{12}H_{16}Cl_3IrN_2O$ Iridoaquodipicolinotrichloride, 2295[9], 3659[7].
$C_{12}H_{16}INOS$ (2 - Furylmethyl)dimethyl - 2-thienylmethylammonium iodide, 390[7].
$C_{12}H_{16}MoN_2O_6 + 2H_2O$ Ammonium dipyrocatecholatomolybdate, 3405[6].
$C_{12}H_{16}N_2$ α - Pentenaldehyde, α - methyl-, phenylhydrazone, 761[8].
Pyrrole, 2,2' - ethylenebis[4 - methyl-, 2159[6].
$C_{12}H_{16}N_2O$ Cyclohexanone, 2 - hydroxy-, phenylhydrazone, 2665[2].
Cyclopentanecarboxamide, 1 - anilino-, 171[8].
Cyclopentanone, 2 - hydroxy - 3 - methyl-, phenylhydrazone, 2485[1].
$C_{12}H_{16}N_2O_2$ Isovaleranilide, α - keto - β - methyl-, oxime, 360[3].
Piperidine, *m* - nitrobenzyl-, · *HI*, 3288[7].
$C_{12}H_{16}N_2O_3$ Glycine, *N* - (β - aminobutyryl)-*N*-phenyl-, 44[4].
Ornithine, *N*-benzoyl-, 2147[7], 2148[1].
$C_{12}H_{16}N_2O_5$ 2,4 - Pyrroledicarboxylic acid, 5-formyl - 3 - methyl-, di-Et ester, oxime, 2159[9].
$C_{12}H_{16}N_2O_5S$ Alanine, *N* - (*N* - tolylsulfonylglycyl)-, 3298[5].
Glycine, *N* - (*N* - tolylsulfonylalanyl)-, 3298[5].
$C_{12}H_{16}N_2O_6W + H_2O$ Ammonium dipyrocatecholatotungstate, 3405[8].
$C_{12}H_{16}N_2O_{13}$ *d*-Glucose, triacetyl-1,6-dinitrate, 742[9].
$C_{12}H_{16}N_4O_2S_2$ Compd. from 5 - (hydroxymethyl)-6 - methyl - 2 - (methylmercapto) - 4(1)-pyrimidone, 2682[1].
$C_{12}H_{16}N_4O_3$ Piperidine, (5 - nitro - *o* - anisylazo)-, 2840[6].
$C_{12}H_{16}N_4O_5S$ 1,2,3 - Triazole - 4 - carboxylic acid, 1 - benzylsulfonyl - 5 - hydroxy-, Et ester, NH_4 deriv., 1409[3].
—, 5 - hydroxy - 1 - *p* - tolylsulfonyl-, Et ester, NH_4 deriv., 1408[8].
$C_{12}H_{16}N_4O_6$ Theophylline, riboside, 1812[4]; xyloside, 1812[6].
$C_{12}H_{16}N_4O_9$ Glycine, Bu and isobutyl esters, picrate, 1055[2].
$C_{12}H_{16}N_4O_{18}$ Diamylose, tetranitrate, 381[1].
$C_{12}H_{16}N_6O_3$ Histidine, histidyl-, 2880[3].
Histidine anhydride, 2880[3].
$C_{12}H_{16}O$ Cyclohexanol, 2 - phenyl-, 1599[4].
2 - Hexenol, 2 - phenyl-, 1602[5].
Δ^4-2 Pentenol, 2-benzyl-, 1602[4].
$C_{12}H_{16}OS$ 4 - Thiochromanol, 4-ethyl-6-methyl, 203[6].
—, 4,6,8 - trimethyl-, 203[6].
$C_{12}H_{16}O_2$ Cumic acid, Et ester, 1793[5].
Cumic alcohol, acetate, 2488[2].
7 - *p* - Cymenecarboxylic acid, Me ester, 2488[4].
2 - Hexanone, 1 - hydroxy - 1 - phenyl-, 906[6].
Hydrocinnamic acid, β-propyl-, 1657[2].
2 - Pentanone, 1 - hydroxy - 4 - methyl-1-phenyl-, 906[6].
Phenetole, 2 - methoxy - 4 - propenyl, 402[4].
$C_{12}H_{16}O_3$ 2 - Butanone, 4 - (3,4 - dimethoxyphenyl)-, 739[7].
Caprophenone, 2,4 - dihydroxy-, 2320[5], 2995[7].
Durylaldehyde, 3,6 - dimethoxy-, 2320[8].
Isocaprophenone, 2,4 - dihydroxy-, 2320[3].
Ketone, 4 - methoxy - 6 - methyl - *m* - phenetyl methyl, 765[2].
$C_{12}H_{16}O_4$ Anisic acid, 5 - ethoxy - 2 - methyl, Me ester, 765[3].
Phlorocaprophenone, 1225[8].
1 - Propanol, 2,3 - dimethoxy-, benzoate, 376[7].
Propiophenone, 3,4,5 - trimethoxy-, 1610[4].
Quinone, 2,5 - dihydroxy - 3,6 - diisopropyl-, 2842[6].
$C_{12}H_{16}O_6$ 2 - Benzofuranpropionic acid, 2 - carboxyoctahydro - 1 - keto-, 1989[4].
$C_{12}H_{16}O_8$ 1,2,2,3 - Cyclobutanetetracarboxylic acid, tetra-Me ester, 48[9].
Glucosan, triacetate, 743[2].
Glucose anhydride, triacetate, 2829[7].
$C_{12}H_{16}O_{13}$ Digalacturonic acid, 3158[4].
$C_{12}H_{17}AsN_2O_7$ Carbamic acid, *N*, *N'* - (*p* - arsono - *o* - phenylene)bis-, di-Et ester, 1605[9].
$C_{12}H_{17}BrIN$ Benzyl - β - bromoallyldimethylammonium iodide, 390[2].

$C_{12}H_{17}BrN_2O_4$ Rhamnose, *p* - bromophenylhydrazone, 2987^{2}.

$C_{12}H_{17}BrN_2O_5$ Talose, *p* - bromophenylhydrazone, 904^{9}.

$C_{12}H_{17}BrO_2$ Dicyclopentadieneglycol, dihydro-, bromohydrin, acetate, 384^{6}.

$C_{12}H_{17}IN_2O_4$ Rhamnose, (iodophenyl)hydrazone, 1794^{9}, 1795^{1}.

$C_{12}H_{17}IN_2O_5$ Fructose, (iodophenyl)hydrazone, 1794^{9}, 1795^{1}.
Galactose, (iodophenyl)hydrazone, 1794^{9}, 1795^{1}.
d-Glucose, (iodophenyl)hydrazone, 1794^{9}.

$C_{12}H_{17}N$ Aniline, *N* - (cyclobutylmethyl) - *N*-methyl-, *and chloroplatinate*, 390^{5}.
Benzylamine, *N* - (cyclopropylmethyl)-*N*-methyl-, 390^{3}.
—, *N*, *N* - dimethyl - α - propenyl-, 1053^{5}.
Piperidine, 1-benzyl-, 1603^{5}.
Quinoline, 1,2,3,4 - tetrahydro - 2 - propyl-, 1626^{6}.

$C_{12}H_{17}NO$ Acetanilide, *p*-*sec*-butyl-, 1983^{9}
Butyramide, *N* - *p* - methylbenzyl-, 371^{2}.
α - Toluamide, *N*, *N* - diethyl-, 2997^{6}.

$C_{12}H_{17}NOS$ Acetanilide, *m* - (butylmercapto)-, 1063^{1}.
p-Valeraniside, thio-, 364^{1}.

$C_{12}H_{17}NO_2$ Benzoic acid, diethylaminomethyl ester, 2727^{3}.
—, *p*-amino-, Am ester, 2322^{7}.
Butyranilide, *p*-ethoxy-, 1218^{5}.
2 - Hexanone, 1 - hydroxy - 1 - phenyl-, oxime, 906^{6}.
2 - Pentanone, 1 - hydroxy - 4 methyl - 1-phenyl-, oxime, 906^{6}.

$C_{12}H_{17}NO_3$ Alanine, β - *p* - anisyl - *N* - methyl-, Me ester, 417^{6}.
Caprophenone, 2,4 - dihydroxy-, oxime, 2995^{8}.
Durylaldehyde, 3,6 - dimethoxy-, oxime, 2320^{8}.
Ketone, 4 - methoxy - 6 - methyl - *m* - phenetyl methyl, oxime, 765^{2}.
p - Toluic acid, 3 - amino - α - hydroxy-, Bu ester, 379^{1}.

$C_{12}H_{17}NO_3S$ Acetanilide, *m* - (butylsulfonyl)-, 1063^{1}.

$C_{12}H_{17}NO_4$ Spiro[Δ^{2} - bicyclopentene - 5,1′-cyclohexane], 1,3 - dimethoxy - 4 - nitro-, 3286^{6}.

$C_{12}H_{17}NO_5$ 2,4 - Pyrroledicarboxylic acid, 5-(hydroxymethyl) - 3 - methyl-, di-Et ester, 2160^{5}.
Veratric acid, 6 - (α - hydroxy - β - methylaminoethyl)-, 2331^{2,3}.

$C_{12}H_{17}NS$ *p*-Valerotoluide, thio-, 364^{1}.

$C_{12}H_{17}N_3O$ 3 - Pentanone, 1 - phenyl, semicarbazone, 2997^{5}.
Piperidine, (*o* - anisylazo)-, 2840^{5}.

$C_{12}H_{17}N_3O_2$ Acetophenone, 3 - ethyl - 2 - hydroxy - 5 - methyl-, semicarbazone, 2154^{6}.
—, hydroxytrimethyl-, semicarbazone, 2154^{7,8}.
—, methoxydimethyl-, semicarbazone, 2154^{4,5}.
2 - Butanone, 3 - *p* - anisyl-, semicarbazone, 2850^{7}.
—, 1 - hydroxy - 3 - methyl - 1 - phenyl-, semicarbazone, 906^{6}.
Isobutyrophenone, *p* - methoxy-, semicarbazone, 2850^{6}.
2 - Pentanone, 1 - hydroxy - 1 - phenyl-, semicarbazone, 906^{6}.
o - Tolualdehyde, 3,6 - dihydro - 5 - isopropyl - 6 - keto-, semicarbazone, 2846^{3}.

$C_{12}H_{17}N_3O_4$ *m* - Toluidine, *N* - isoamyl - 4,6-dinitro-, 173^{7}.

$C_{12}H_{17}N_3O_4S$ 2 - Propanone, 1 - (*p* - phenetylsulfonyl)-, semicarbazone, 419^{3}.

$C_{12}H_{17}O_2$ Caprokol, 2726^{8}.

$C_{12}H_{18}$ Benzene, hexamethyl-, 1984^{2}.
Cumene, *p*-propyl-, 2488^{9}.

$C_{12}H_{18}AsI$ Arsinoline, 1,2,3,4 - tetrahydro-1-methyl-, ethiodide, 2839^{6}.

$C_{12}H_{18}Be_4O_{13}$ Beryllium acetate (basic), 3597^{9}.

$C_{12}H_{18}BrN$ Homotetrahydroisoquinoline, methobromide, 905^{7}.

$C_{12}H_{18}BrNO_2$ (Carboxymethyl)trimethylammonium bromide, benzyl ester, 3688^{8}.

$C_{12}H_{18}ClN_3O$ Δ^{3} - *s* - Spirohendecen - 2 - one, 4-chloro-, semicarbazone, 1060^{6}.

$C_{12}H_{18}Cl_6N_4Pt$ 4 - Amino - 1 - methylpyridinium chloroplatinate, 1238^{4}.

$C_{12}H_{18}CuN_2O_2$ + H_2O, 2466^{1}.

$C_{12}H_{18}Hg$ 1 - Butine, 1,1′ - mercuribis[3,3,3′,3′-tetramethyl-, 1054^{1}.

$C_{12}H_{18}IN$ *sym* - Homotetrahydroisoquinoline, compd. with CH_3I, 1413^{8}.
1 - Indanyltrimethylammonium iodide, 755^{8}.

$C_{12}H_{18}MoN_2O_8$ Ammonium dipyrogallolmolybdate, 3405^{7}.

$C_{12}H_{18}N_2NiO_2$ 2466^{2}.

$C_{12}H_{18}N_2O$ Aniline, *N* - α,α - dimethyl - β-nitrosobutyl-, 1050^{6}.
2(1) - Pyridone, 1 - ethyl - 3 - (tetrahydro-1-methyl-2-pyrryl)-, 2863^{1}.

$C_{12}H_{18}N_2O_2$ Ethanol, diethylamino-, nicotinate, -*HCl*, 3168^{8}.
2 - Indazolecarboxylic acid, 4,5,6,7 - tetrahydro - 4,6 - dimethyl-, Et ester, 389^{7}.
Nitrosamine, m. 44–8°, of base from condensation product of PhNHOH and acetone, 2837^{8}.

$C_{12}H_{18}N_2O_3$ Barbituric acid, 5 - allyl - 5 - isoamyl-, 458^{8}.

$C_{12}H_{18}N_2O_4$ Barbituric acid, 5 - butyl - 5 - β-vinyloxyethyl-, 367^{9}.

$C_{12}H_{18}N_2O_8$ Arabinose, ureide, triacetate, 1596^{8}.

$C_{12}H_{18}N_2S$ Urea, (pentamethylphenyl)thio-, 2314^{1}.

$C_{12}H_{18}N_4O_4S_2$ 2,5 - Piperazinedione, 3,3′ - dithiodimethylenebis[6 - methyl-, 1787^{9}.

$C_{12}H_{18}N_4O_{11}$ Triethylamine, β,β′β″ - trihydroxy-*N* - oxide, picrate, 361^{2}.

$C_{12}H_{18}OS$ Ether, γ - (benzylmercapto)propyl ethyl, 737^{2}.

$C_{12}H_{18}O_2$ Acetophenone, di-Et acetal, 764^{4}.
Benzyl alcohol, *o* - (γ - ethoxypropyl)-, 905^{5}.
1,3 - Cyclohexanedione, 5 - cyclohexyl-, 3287^{7}.
Resorcinol, dipropyl-, 3163^{7}.
—, hexyl-, 451^{9}, 2320^{9}, 2369^{6,7}, 2371^{2}, 2995^{9}, 3780^{4}.
—, 4-isohexyl-, 2320^{9}.

$C_{12}H_{18}O_3$ Benzene, 1,2,3 - trimethoxy - 5-propyl-, 1610^{8}.
Benzyl alcohol, 2,5 - dimethoxy - 3,4,6-trimethyl-, acetate, 2320^{8}.
2 - Butanol, 4 - (3,4 - dimethoxyphenyl)-, 739^{1}.
Camphor, hydroxy-, acetate, 2157^{9}.
Compd., b. 167–8°, from acrolein, 1594^{2}.
Phloroglucinol, 2 - hexyl-, 1225^{8}.
—, triethyl-, 3163^{7}.
Pyromucic acid, heptyl ester, 1620^{8}.

$C_{12}H_{18}O_3S$ Ether, γ - (benzylsulfonyl)propyl ethyl, 737[2].

$C_{12}H_{18}O_4$ 2 - Bicyclo[2.2.2]octanecarboxylic acid, 3,5 - diketo - 1 - methyl-, Et ester, 172[7].

Cyclopentenemalonic acid, diethyl ester, 3160[9].

2,7-Octanedione, 3-acetyl-6-α-hydroxyethylidene , 1055[9].

—, 3,6 - bis(α - hydroxyethylidene-, 1056[1].

—, 3,6-diacetyl-, 1055[9].

$C_{12}H_{18}O_5$ Cyclohexaneacetic acid, 4 - carboxy - 3 - keto - 1 - methyl-, mono-Et ester, 172[7].

4 - Pyranbutyric acid, tetrahydro - 2,6-diketo - 4 - methyl-, Et ester, 172[8].

$C_{12}H_{18}O_6$ Mannonic acid, diacetone-, lactone, 2984[4].

Δ[8] - 1,1,5 - Pentenetricarboxylic acid, 2-methyl-, tri-Me ester, 1592[3].

Succinic acid, diacetyl-, di-Et ester, 1788[8].

$C_{12}H_{18}O_7$ Acid, from the oxidation of β-diacetone-fructose, *K salt*, 1388[5].

Galacturonic acid, diacetone-, *and K salt*, 1389[3].

$C_{12}H_{18}O_7S$ Triacetate of thiosugar from yeast, 583[4].

$C_{12}H_{18}O_8$ Compd., m. 206–7°, from glyoxal sulfate and Me_2CO, 2821[6].

$C_{12}H_{19}As$ Arsine, dimethyl(δ - phenylbutyl)-, 2839[6].

$C_{12}H_{19}ClO_5$ *d* - Glucose, 3 - chlorodiacetone-, 1060[4].

$C_{12}H_{19}IN_2$ 1 - Ethyl - 3 - (tetrahydro - 1 - methyl-2 - pyrryl)pyridinium iodide, *-HI*, 2863[1].

$C_{12}H_{19}IN_2S$ Pseudourea, α - ethyl - β,γ - dimethyl - α - phenylthio-, methiodide, 374[4].

$C_{12}H_{19}N$ Benzylamine, α - ethyl - *N*, *N*,α - trimethyl-, 1053[3].

1 - Hendecine - 1 - nitrile, 1783[8].

Pyridine, 3,5 - diisopropyl - 2 - methyl-, 2499[4].

$C_{12}H_{19}NO$ Base, b_{16} 160–3°, from condensation product of PhNHOH and acetone, *and chloroplatinate*, 2837[7,8].

Benzylamine, *o* - (γ - ethoxypropyl)-, *and -HCl*, 905[4].

Camphidone, 4 - ethylidene-, 2999[3].

Propylamine, γ - methoxy - *N*, *N* - dimethyl-γ-phenyl-, *-HCl*, 1604[9].

$C_{12}H_{19}NO_2$ Aniline, *N*, *N* - diethyl-, acetate, 588[7].

$C_{12}H_{19}NO_2S$ 2 - Thiophenecarboxylic acid, α-(dimethylaminomethyl) - *sec* - butyl ester, *and salts*, 2854[7].

$C_{12}H_{19}NO_3S$ Cyclohexanesulfonic acid, aniline salt, 3163[1].

$C_{12}H_{20}BrFe_3O_{14}$ + $5H_2O$, 2127[8].

$C_{12}H_{20}Br_2O_4$ Suberic acid, α,ζ - dibromo-, di Et ester, 2830[9].

$C_{12}H_{20}ClFe_3O_{14}$ + $4H_2O$, 2127[8].

$C_{12}H_{20}Cl_3Fe_3NaO_{22}$ + $4H_2O$, 1769[5].

$C_{12}H_{20}MoN_2O_{10}$ + nH_2O, 3656[7].

$C_{12}H_{20}N_2$ Cyclohexanenitrile, 1-piperidyl-, 2831[9].

α-Matrinidine, 2854[2].

Pyridine, 1,2 - dihydro - 1,2 - dimethyl-3 (or 5) - (tetrahydro - 1 - methyl - 2-pyrryl)-, 2863[2].

$C_{12}H_{20}N_2O$ Isofenchone, acetylhydrazone, 2846[7].

$C_{12}H_{20}N_2O_2$ Phenoxazine, dodecahydro - 6-nitroso-, 2831[9].

$C_{12}H_{20}N_2O_4$ Propionic acid, α,α′ - [(cyanomethyl)imino]bis-, di-Et ester, *and -HCl*, 3283[5].

$C_{12}H_{20}N_2O_5$ Barbituric acid, 5,5 - bis(propoxymethyl)-, 581[9].

—, 5,5-dibutyl-, 458[7].

$C_{12}H_{20}N_2O_{10}W$ + nH_2O, 3656[7].

$C_{12}H_{20}N_4O_3S$ Thiasine, 1814[4].

$C_{12}H_{20}N_4O_4$ 4 - Imidazolecarboxamide, 4 - ethoxy-*N* - ethyltetrahydro - 2 - keto - 3 - methyl-5-methylimino-, Ac deriv., 3691[8].

$C_{12}H_{20}N_4O_6$ Tetrapeptide from dialanylcystine dianhydride, *-HCl*, 1788[1].

$C_{12}H_{20}O$ Compd., b_3 101–4°, from iso-BuMeCO and mesityl oxide, 3157[5].

Compd., b_{11} 119–21°, from MeBuCO and mesityl oxide, 3157[5].

$C_{12}H_{20}O_2$ Δ^2 - 1 - Propenone, 3 - hydroxy - 1-(1,2,2,3-tetramethylcyclopentyl)-, 1399[4].

$C_{12}H_{20}O_3$ Cyclohexaneacetic acid, 1-acetyl-, Et ester, 3693[4].

Menthone, - (hydroxymethyl)-, formate, 2846[2].

$C_{12}H_{20}O_4$ 1,1 - Cyclohexanedicarboxylic acid, di-Et ester, 1056[2].

$C_{12}H_{20}O_6$ Fructose, diacetone-, 1388[2].

Galactose, diacetone-, 1389[1], 1597[2].

d-Glucose, diacetone-, 2314[4], 2987[9].

Mannose, diacetone-, 2663[5], 2827[6], 2984[4].

Propionin, 2483[8].

$C_{12}H_{20}O_7$ Mannonic acid, diacetone-, *K salt*, 2984[4].

$C_{12}H_{20}O_{10}$ (See also *Inulin.*)

Cellobiose anhydride, 381[2].

Diglucosan, 2829[5].

Dihexosan, 1598[3].

$C_{12}H_{20}O_{12}$ 1,1,3,3 - Propenetetracarboxylic acid, 2 - (dicarboxymethyl)-, hexa-Me ester, 2861[2].

$C_{12}H_{21}BrO$ 1 - Propanone, 3 bromo - 1 - (1,2,2,3-tetramethylcyclopentyl)-, 1399[7].

$C_{12}H_{21}FO_{10}$ Gentiobiosyl fluoride, 1221[8].

$C_{12}H_{21}NO$ Camphoceanonitrile, 3 - (α - hydroxypropyl)-, 2999[4].

1 - Hendecine - 1 - carboxamide, 1783[8].

Phenoxazine, dodecahydro-, *-HCl*, 2831[8].

$C_{12}H_{21}NO_2$ Fuchsisenecionine, 2046[4].

Nipecotic acid, 1 - butyl - 4 - keto-, Et ester, *-HCl*, 3010[2].

—, 1 - isobutyl - 4 - keto-, Et ester, *-HCl*, 3010[2].

$C_{12}H_{21}NO_4$ Silvasenecine, 2046[4].

$C_{12}H_{21}NO_5$ Glucosyl - 3 - amine, diacetone-, 2662[5].

$C_{12}H_{21}NO_6$ Triethylamine, β,β′,β″ - trihydroxy-, triacetate, *chloroplatinate*, 361[2].

$C_{12}H_{21}N_3O$ Semicarbazone, m. 170°, of condensation product of Et_2CO and mesityl oxide, 3157[5].

Semicarbazone, m. 172°, of condensation product of MePrCO and mesityl oxide, 3157[6].

2 - *s* - Spirohendecanone, semicarbazone, 1060[8].

$C_{12}H_{21}N_3O_2$ Cyclohexanone, 2 - (methoxymethylene) - 3,5 - dimethyl-, 2 - methylsemicarbazone, 389[8].

Cyclopentaneglyoxal, 1,2,2,3 - tetramethyl-, semicarbazone, 1399[3].

Menthone, 2 - (hydroxymethylene)-, semicarbazone, 2846[1].

$C_{12}H_{21}N_3O_3$ Cyclohexaneacetic acid, 1-acetonyl-, semicarbazone, 1060[7].

—, 3 - keto - 1 - methyl-, Et ester, semicarbazone, 172[8].
$C_{12}H_{21}N_3S$ Δ[2] - Cyclohexenone, 5 - isobutyl - 3-methyl-, thiosemicarbazone, 3161[8].
$C_{12}H_{22}$ Bicyclohexyl, 744[6].
Cyclohexane, (3 - methylcyclopentyl), 1393[1].
Hydrocarbon, b_{18} 83–8°, from PrMgBr and 1,3 - dibromopropene, 3155[5].
Naphthalene, decahydrodimethyl-, 2935[7].
$C_{12}H_{22}Cl_2N_4O_6$ Tetrapeptide, *and -HCl*, 2682[8].
$C_{12}H_{22}Cl_2O_2Te$ Bis(β - keto - γ,γ - dimethylbutyl)tellurium dichloride, 413[9].
Bis(β - ketohexyl)tellurium dichloride, 413[9].
Bis(β - ketoisohexyl)tellurium dichloride, 413[9].
$C_{12}H_{22}CoN_2O_4$, 716[5].
$C_{12}H_{22}N_2O$ Cyclohexanecarboxamide, 1-piperidyl-, 2831[9].
$C_{12}H_{22}N_2O_2$ 2(1) - Pyrazinone, 3,4 - dihydro-5 - hydroxy - 3,6 - diisobutyl-, 1629[2].
$C_{12}H_{22}N_4O_4$ 2,7 - Octanedione, 3,6 - diacetyl-, tetraoxime, 1056[1].
$C_{12}H_{22}O$ Cyclododecanone, 1792[6], 2151[6].
Cyclohexyl ether, 744[5].
$C_{12}H_{22}O_2$ Cyclohexanecaproic acid, 3160[4].
Cyclopentanecarbinol, 1,2,2,3 - tetramethyl-, acetate, 1399[2].
2,4-Dodecanedione, 738[9].
Dodecenoic acid, 2420[4].
3,5-Heptanedione, 4-β-methylbutyl-, 413[7].

$C_{13}H_{13}AsBrNO_2$ Arsinic acid, (o - bromophenyl)-(o - methylaminophenyl)-, 1606[1].
$C_{13}H_{13}AsClN_3O_4$ Benzenearsonic acid, 3 - amino-4 - (3 - amino - 4 - chlorobenzamido)-, 394[7].
$C_{13}H_{13}AsN_2O_3S$ Toluenesulfonanilide, amino-arsinoso-, 2838[6], 3746[9].
$C_{13}H_{13}AsN_2O_5$ Arsanilic acid, N - (3 - amino-4 - hydroxybenzoyl)-, *and Na salt*, 394[8].
$C_{13}H_{13}AsN_2O_6$ Arsanilic acid, N - (3 - amino - 4-hydroxybenzoyl)hydroxy-, *and salts*, 2318[6,7].
$C_{13}H_{13}AsN_2O_7$ Arsanilic acid, N - (3 - amino-benzoyl)hydroxy-, *and salts*, 2318[4,8].
$C_{13}H_{13}AsN_2O_7S$ Arsanilic acid, N-(3-nitro-p-tolylsulfonyl)-, 2838[6].
$C_{13}H_{13}BrN_2O$ Harmaline, bromo-, 1994[1].
$C_{13}H_{13}BrN_2O_2$ 3 - Pyrazolecarboxylic acid, 1-benzyl - 4 - bromo - 5 - methyl-, Me ester, 3006[6].
2 - Pyrrolecarboxylic acid, 5 - (anilinomethyl)-4-bromo-3-methyl-, 2160[4].
$C_{13}H_{13}BrN_2O_4$ Valeric acid, α, β, γ - triketo-, Et ester, m - bromophenylhydrazone, 2483[8].
$C_{13}H_{13}BrPb$ Plumbane, bromomethyldiphenyl-, 2669[1].
$C_{13}H_{13}ClN_2O_2$ 1 - Imidazoleacetic acid, 5 - chloro-2-phenyl-, Et ester, 1624[1].
$C_{13}H_{13}ClN_2O_4$ Glyoxime, chloro - p - tolyl-, diacetate, 1084[9].
Valeric acid, α, β, γ - triketo-, Et ester, m-chlorophenylhydrazone, 2483[8].
$C_{13}H_{13}Cl_2N_3$ Lutidine, 4 - [β - (2,4 - dichlorophenyl)hydrazino]-, *-HCl*, 1808[6].
$C_{13}H_{13}Cl_3O_4$ p - Toluic acid, 5 - methoxy - 2-(β - trichloro - α - hydroxyethyl)-, acetate, 40[9].
$C_{13}H_{13}IN_2O_2$ 1 - Methyl - 2(and 4) - p - nitrobenzylpyridinium iodide, 204[3,6].
$C_{13}H_{13}IN_4O_2$ 2 - Formyl - 1 - methylpyridinium iodide, p - nitrophenylhydrazone, 1627[8].
$C_{13}H_{13}N$ Benzylamine, N - phenyl-, 174[7], 2155[7].
Xenylamine, N - methyl-, *and -HCl*, 2848[2].
$C_{13}H_{13}NOS$ Aniline, tolylsulfinyl-, 3448[6].
p - Toluenesulfinanilide, 397[8].
$C_{13}H_{13}NO_2$ Carbazolecarboxylic acid, 5,6,7,8 tetrahydro-, 2326[7].
Phthalimide, N - Δ² - isopentenyl-, 1057[8].
Propionamide, α 1(and 2) - naphthoxy-, 1617[8,9], 1618[1].
4(1) - Pyridone, 1 p - phenetyl-, *and perchlorate*, 586[5,6].
$C_{13}H_{13}NO_2S$ Aniline, m - (benzylsulfonyl)-, *-HCl*, 1063[1].
p-Phenetidine, N-2-thenoyl-, 2854[8]
$C_{13}H_{13}NO_3$ Chromone, 3 - acetyl - 2,6 - dimethyl-, oxime, 1237[2], 1410[6].
Δ²-Cyclopentenone, 2 - hydroxy - 3 - methyl-, carbanilate, 2484[9].
Naphthalenecarbamic acid, β - hydroxyethyl ester, 361[4].
Propionic acid, α - (4 - amino - 1 - naphthoxy)-, 1617[8].
$C_{13}H_{13}NO_4$ 2 - Indanglyoxylic acid, 1 - keto-, Et ester, oxime, 1078[1].
$C_{13}H_{13}NS$ Aniline, m - (benzylmercapto)-, *-HCl*, 1063[1].
—, N - methyl - p - phenylmercapto-, 371[7]
$C_{13}H_{13}N_2O_2P$ Benzodiazphospholium, p-tolyloxy-P-oxodihydro-, 914[1].
$C_{13}H_{13}N_2O_3$ See *Procaine*.
$C_{13}H_{13}N_3$ Guanidine, α, γ - diphenyl-, *perchlorate*, 2163[1].
$C_{13}H_{13}N_3O_2$ 1,4′ - Spiro[Δ² - cyclohexene - piperidine], 3′,5′ - dicyano - 2′,6′ - diketo-3 - methyl-, 2832[4].
$C_{13}H_{13}N_3O_2S$ Sulfanilic acid, benzalhydrazide, 1409[8].
$C_{13}H_{13}N_3O_6$ Valeric acid, α, β, γ - triketo, Et ester, nitrophenylhydrazone, 2483[8].
$C_{13}H_{13}N_4NaO_6S$ 1,2,3 - Triazole - 4 - carboxylic acid, 1 - (p - acetamidophenylsulfonyl)-5 - hydroxy-, Et ester, Na deriv., 1409[7].
$C_{13}H_{13}N_5$ Formamide, phenylazo-, phenylhydrazone, *and -HCl*, 1224[1].
$C_{13}H_{13}N_5O_7$ Pyridine, 4 - dimethylamino-, picrate, 1238[7].
$C_{13}H_{14}AsN_2O_3S$ p - Toluenesulfonanilide, 3,2′-diamino-4′-arsinoso-, 2838[7].
$C_{13}H_{14}AsN_3O_4$ Benzenearsonic acid, 3-amino-4-(3-aminobenzamido)-, 394[1].
$C_{13}H_{14}AsN_3O_5$ Benzenearsonic acid, 5 - amino-4 - (3 - aminobenzamido) - 2 - hydroxy-, *and salts*, 2318[8].
$C_{13}H_{14}As_2N_2O_5S$ Methanesulfonic acid, 5 - [(3-amino - 4 - hydroxyphenyl)arseno] - 2 - hydroxyanilino-, 264[8].
$C_{13}H_{14}As_2N_2O_9$ m - Arsanilic acid, N, N′ - carbonylbis[4-hydroxy-, P 970[6].

$C_{13}H_{14}BrN$ Methylphenyldipropargylammonium bromide, 390[1].
$C_{13}H_{14}BrNO$ 1 - *p* - Phenetylpyridinium bromide, 586[3].
$C_{13}H_{14}BrN_3$ 2 - Pyrrolealdehyde, 4 - bromo - 3,5-dimethyl-, phenylhydrazone, 2160[1].
$C_{13}H_{14}Br_2O_4$ Butyric acid, anisyldibromoketo, ethyl ester, 3164[7].
$C_{13}H_{14}ClNO$ 1 - *p* - Phenetylpyridinium chloride, *HgCl₂ compd.*, 586[3].
$C_{13}H_{14}ClNO_3$ Isovaleryl chloride, α - keto - β methyl-, oxime, Bz deriv., 360[3].
$C_{13}H_{14}ClNO_4$ Cyclohexanol, 2 - chloro-, *p*-nitrobenzoate, 2831[7].
$C_{13}H_{14}ClNO_5$ 1 - *p* - Phenetylpyridinium perchlorate, 586[3].
$C_{13}H_{14}ClN_3$ 2,6 - Lutidine, 4 - [β - (*p* - chlorophenyl)hydrazino]-, *and -HCl*, 1808[5].
$C_{13}H_{14}Cl_2O_2Te$ 1,2 - Telluropyran - 3,5(4,6) dione, 4 - benzyl - 2 - methyl-, 1,1 - dichloride, 413[5].
$C_{13}H_{14}Fe_3NO_{17}$ + $2H_2O$, 1186[6].
$C_{13}H_{14}INO_2$ Propionic acid, α - iodo-, 1 - naphthylamine salt, 2978[2].
$C_{13}H_{14}N_2O$ Harmaline, 1994[1].
Urea, α,α - dimethyl - β - 1 - naphthyl-, 2319[5].
-, α - ethyl β - 1 - naphthyl-, 2319[5]
$C_{13}H_{14}N_2O_2$ Pyrazolecarboxylic acid, dimethyl phenyl-, Me ester, 2493[8].
- -, methylphenyl-, Et ester, 2856[4,5].
$C_{13}H_{14}N_2O_3$ Barbituric acid, 5 - benzyl - 5 - ethyl-, 458[7].
Chromone, 3 - acetyl - 2,6 - dimethyl, dioxime, 1237[2], 1410[5].
Hydantoin, 5 - anisal - 1,3 - dimethyl, 366[9].
$C_{13}H_{14}N_2O_4$ Valeric acid, α,β,γ triketo-, Et ester, phenylhydrazone, 2483[5].
$C_{13}H_{14}N_2O_5$ 3 - Hydantoinacetic acid, 5 - *p*-hydroxybenzyl - α - methyl-, 366[7].
Pyruvic acid, (methylphenylcarbamyl)nitroso, Et ester, 2823[2].
Succinanilic acid, diketomethyl-, ethyl ester, oxime, 3403[7].
$C_{13}H_{14}N_2O_8$ 1,3 - Dioxolane - 4 - carbinol, 2,2-dimethyl-, 3,5 - dinitrobenzoate, 740[2].
$C_{13}H_{14}N_2S$ Urea, α - ethyl - β - 1 - naphthylthio-, 2835[3].
$C_{13}H_{14}N_4O$ Antipyrine, cyanomethylamino-, 2857[6].
Carbohydrazide, α,δ - diphenyl-, 1770[7].
$C_{13}H_{14}N_4O_6$ Hydroxylamine, β - (4,6 - dinitro-*m* anisyl)-, PhNH₂ compd., 2667[4].
$C_{13}H_{14}N_4O_6S$ Malonamic acid, *N* - (*p* - acetamidophenylsulfonyl) - α diazo-, Et ester, 1409[7].
1,2,3 - Triazole - 4 - carboxylic acid, 1-(*p* - acetamidophenylsulfonyl) - 5 - hydroxy-, Et ester, 1401[7].
$C_{13}H_{14}N_4O_7$ Pyrrole, 2 - ethyl - 4 - methyl-, picrate, 1236[5].
$C_{13}H_{14}N_4S$ Semicarbazide, 1 - (*o* - aminophenyl)-4 - phenylthio-, 745[6].
$C_{13}H_{14}O$ Acetophenone, cyclopentenyl-, 3447[7].
$C_{13}H_{14}OS$ 1,4 - α - Naphthothiopyrone, 2,3,7,-8,9,10-hexahydro-, 202[3], 204[2].

$C_{14}H_8O_5S$ 2-Anthraquinonesulfonic acid, P 1995[9].
$C_{14}H_8O_6$ 2,7-Naphthalenediglyoxylic acid(?), 1619[4].
$C_{14}H_8O_8$ 1,4,5,8-Naphthalenetetracarboxylic acid, P 2167[6].
$C_{14}H_9BrN_2OS$ Benzothiazole, 1-benzamido-5-bromo-, 2858[2].
$C_{14}H_9BrN_2O_4$ Anthracene, 9-bromo-9,10-dihydro-9,10-dinitro-, 192[6].
$C_{14}H_9BrO$ 9-Phenanthrol, 10-bromo-, 412[5].
$C_{14}H_9Br_2ClN_2O$ Carbazole, 3,6-dibromo-1-α-chloroacetamido-, 1079[7].
$C_{14}H_9Br_2NO$ Carbazole, 9-acetyl-3,6-dibromo-, 1079[5].
$C_{14}H_9Br_3N_2O$ Carbazole, 1-acetamido-3,6,8-tribromo-, 1079[8].
$C_{14}H_9Cl$ Anthracene, chloro-, P 1631[4].
$C_{14}H_9ClN_2O_4$ Stilbene, α-chlorodinitro-, 1801[5].
$C_{14}H_9ClO$ Anthrone, 10-chloro-, 1078[4].
$C_{14}H_9ClO_2$ Anthrone, 1(and 4)-chloro-10-hydroxy-, 1078[4].
$C_{14}H_9ClO_3$ Benzaldehyde, 2-chloro-3-hydroxy-, benzoate, 1065[3].
$C_{14}H_9Cl_9O_5$ Compd., m. 211–12°, from 2,4-cresotic acid, Cl_3CCHO and H_2SO_4, 40[9].
$C_{14}H_9I_2NO$ Carbazole, 9-acetyl-3,6(?)-diiodo-, 1805[2].
$C_{14}H_9NO_2$ 5-Acridinecarboxylic acid, 1239[1].
Anthracene, nitro-, P 1631[4].
Anthraquinone, 1(and 2)-amino-, P 424[8], P 425[1,2].
Phthalimide, *N*-phenyl-, 186[6].
$C_{14}H_9NO_2S$ Benzothiazole, 1-(3,4-methylenedioxyphenyl)-, 386[7].
$C_{14}H_9NO_3$ Cinchomeronic anhydride, 2-methyl-6-phenyl-, 3296[7].
2-Xanthenecarboxamide, 9-keto-, 392[3].
$C_{14}H_9NO_5$ Salicylaldehyde, *p*-nitrobenzoate, 399[6].
$C_{14}H_9N_3$ 3-Indazolenitrile, 2-phenyl-, 1805[9].
$C_{14}H_9N_3O$ 3-Indazolenitrile, 2-phenyl-, 1-oxide, 1805[8].
$C_{14}H_9N_3O_2$ 1,2,3-Benzotriazin-4(3)-one, 3-benzoyl-, 382[1].
$C_{14}H_9N_3O_3$ Isoindazole, 1-benzoyl-4-nitro-, 1622[9].
$C_{14}H_9N_3O_4$ 2-Phenazinol, nitro-, acetate, 603[4,7].
$C_{14}H_9N_3O_6$ Benzil, 2,4-dinitro-, monoxime, 2324[4].
Stilbene, 2,4,6-trinitro-, 3000[3].
$C_{14}H_9N_3O_8$ Dipicolinic acid, 4,4'-iminobis-, 1238[7].
$C_{14}H_9N_3O_9$ Guaiacol, 4,5,6-trinitro-, benzoate, 1395[1].
$C_{14}H_9N_3O_{10}$ 2,7-Naphthalenedicarboxylic acid, trinitro-, di-Me ester, 1619[7].
$C_{14}H_9N_3S_2$ Diphenylamine, *p,p'*-dithiocyano-, 1603[9], P 2167[4].
$C_{14}H_9N_5O_4$ 1,2,3-Benzotriaz-4(3)-one, 3-*m*-nitrobenzamido-, 206[9].
$C_{14}H_9N_5S_2$ Benzothiazole, 1,?'-azobis[1'-amino-, *and* ·*HCl*, 2858[2].
$C_{14}H_{10}$ (See also *Anthracene; Phenanthrene.*)
Hydrocarbon, m. 124°, from cholesterol, 1241[9].
$C_{14}H_{10}Br_2N_2O$ Benzoic acid, *m*-bromo-, *m*-bromobenzalhydrazide, 2672[3].
Carbazole, 1-acetamido-3,6-dibromo-, 1079[7].
$C_{14}H_{10}Br_2N_2O_4$ Bibenzyl, α,α'-dibromo-3,4'-dinitro-, 2850[9].
$C_{14}H_{10}Br_4N_2OS$ Benzothiazole, 1-benzamido-, tetrabromide, 2858[2].
$C_{14}H_{10}ClN_3O_3$ Benzaldehyde, 2-chloro-5-nitro-, benzoylhydrazone, 1622[9].
$C_{14}H_{10}ClN_3O_4Se$ 1-(*p*-Hydroxyphenyl)-4-nitropiaselenolium chloride, acetate, 2498[7].

$C_{14}H_{10}Cl_2N_2O_3$ *m* - Benzotoluide, 2,4 - dichloro-6-nitro-, 2834[2].
$C_{14}H_{10}Cl_2N_2O_4$ Bibenzyl, α,α′ - dichloro - 3,4′-dinitro-, 1801[6].
$C_{14}H_{10}Cl_2O_2$ 9,10 - Anthradiol, 1,4 - dichloro - 9,10-dihydro-, 3166[4].
$C_{14}H_{10}Cl_2O_{10}S_4$ Toluenesulfonic acid, 5 - (chlorosulfonyl) - 2 - hydroxy-, sulfonylide (bimol.), 1395[7].
$C_{14}H_{10}Cl_3NO$ Acetanilide, 2,6 - dichloro - 4 - (*p* - chlorophenyl)-, 1800[9].
$C_{14}H_{10}CoO_4$ Salicylaldehyde, Co deriv., 399[3].
$C_{14}H_{10}CuO_4$ Salicylaldehyde, Cu deriv., 399[4].
$C_{14}H_{10}FeO_4$ Salicylaldehyde, Fe deriv., 399[5].
$C_{14}H_{10}FeO_6$ Salicylic acid, Fe deriv., 399[4].
$C_{14}H_{10}HgN_2O_3$ Benzoic acid, *o*(and *p*) - (3-hydroxymercuri - 2,5 - cresylazo)-, 2′,3′-anhydride, 1605[6].
$C_{14}H_{10}HgO_4$ Benzoic acid, *p,p*′ - mercuribis-, *and di-Na salt*, 1063[3].
$C_{14}H_{10}HgO_4S_2$ Benzoic acid, *o,o*′ - mercuridithiobis-, *and salts*, 183[6,7].
$C_{14}H_{10}MgO_4$ Salicylaldehyde, Mg deriv., 399[3].
$C_{14}H_{10}N_2O$ 7 - Imidazobenzisoquinolinone, 9,10-dihydro-, 1075[4].
$C_{14}H_{10}N_2OS$ 2 - Benzisothiazolecarboxanilide, 763[8].
$C_{14}H_{10}N_2O_2$ Anthraquinone, diamino-, P 425[1,2], P 2417[5].
2 - Benzimidazolol, benzoate, 381[9].
Cinchomeronimide, 2 - methyl - 6 - phenyl-, 3296[7].
Diphenic acid, cyclic hydrazide, 2672[5].
3 - Indazolecarboxylic acid, 2 - phenyl, 1806[3].
$C_{14}H_{10}N_2O_3$ Anthraquinone, 2 - hydrazino-3-hydroxy-, 757[8].
$C_{14}H_{10}N_2O_4$ Benzaldehyde, nitro-, oxime, Bz deriv., 179[3].
Stilbene, dinitro-, 1801[2], 2844[9], 3001[9].
$C_{14}H_{10}N_2O_5$ Acetophenone, nitro(nitrophenyl), 1801[1].
$C_{14}H_{10}N_2O_6S_2$ Acetic acid, [*m* - (2,4 - dinitrophenylmercapto)phenylmercapto], 3163[3]
$C_{14}H_{10}N_2O_8$ 2,7 - Naphthalenedicarboxylic acid, dinitro-, di-Me ester, 1619[6]
$C_{14}H_{10}N_4O$ 3(2) - *s* - Tetrazinone, 2,6 - diphenyl, 1084[8].
$C_{14}H_{10}N_4O_2$ 1,2,3 - Benzotriaz - 4(3) - one, 3-benzamido-, 206[7].
2,2′ - Bi - [1,4 - pyrrolopyridine] - 3,3′-diol, *and di-HCl*, 396[9].
Diphenic acid, 3,5,3′,5′ - tetraamino-, dilactam, *and sulfate*, 1620[5].
$C_{14}H_{10}N_4O_3$ 4(3) - Quinazolone, 3 - amino - 2-(*m*-nitrophenyl)-, 206[8].
$C_{14}H_{10}N_4O_6$ Diphenamide, 3,5′ - dinitro-, 1801[1]
$C_{14}H_{10}N_4O_8S$ Sulfide, bis(2,6 - dinitro - *m* - tolyl), 1062[8].
$C_{14}H_{10}N_4O_8S_2$ Disulfide, bis(4,6 - dinitro - *m* - tolyl), 1062[4].
$C_{14}H_{10}N_4O_{10}$ 4,4′ - Bi - *m* - cresol, 2,6,2′,6′-tetranitro-, 187[4].
$C_{14}H_{10}N_4S_4$ 5,5′ - Bibenzimidazole - 2,2′(3,3′)-dione, 2,2′ - dithio-, 914[7].
$C_{14}H_{10}N_{10}$ 1,2,3,5 - Tetrazole, 4,4′ - azobis[1-phenyl-, 764[1].
$C_{14}H_{10}O$ Phenanthrol, 134[6].
$C_{14}H_{10}O_2$ Benzil, 190[1], 327[1], 2491[6], 3164[1], 3292[9].
1,4 - α - Naphthopyrone, 2 - methyl-, 1237[1].
9,10 - Phenanthrenediol, 1403[6].
Phthalide, phenyl-, 751[4].
$C_{14}H_{10}O_2S_2$ Benzoyl disulfide, 2161[6].
$C_{14}H_{10}O_3$ Benzoic anhydride, 181[4].
$C_{14}H_{10}O_4$ See *Benzoyl peroxide*.
$C_{14}H_{10}O_4Zn$ Salicylaldehyde, Zn deriv., 399[4].
$C_{14}H_{10}O_5$ Benzoic acid, oxybis-, *and salts*, 392[2,3].
Gentianin, 645[2].
Salicylosalicylic acid, P 2564[2].
$C_{14}H_{10}O_6$ Benzoic acid, 2,3,4 - trihydroxy-, 4 - benzoate, 2489[1].
Gallic acid, monobenzoate, 1987[1].
$C_{14}H_{10}O_6S_2$ Salicylic acid, 5,5′ - dithiobis-, 182[8].
$C_{14}H_{10}O_7$ β - Resorcylic acid, 4 - β - resorcylate, 2488[9].
$C_{14}H_{10}O_7U$ Uranium salicylate (basic), 3139[7].
$C_{14}H_{10}O_9$ Digallic acid, 1967[4].
$C_{14}H_{11}BrN_4O$ 3(2) - *s* - Tetrazinone, 4 - (*p*-bromophenyl) - 1,4 - dihydro - 6 - phenyl-, 1084[8].
$C_{14}H_{11}Br_2NO$ Acetanilide, 2 - bromo - 4 - (*p* - bromophenyl)-, 1800[9].
—, 2,6 - dibromo - 4 - phenyl-, 1800[9].
$C_{14}H_{11}Br_3N_2O$ Acetophenone, dibromo - *p*-hydroxy-, *p* - bromophenylhydrazone, 598[7].
$C_{14}H_{11}ClN_2O$ Benzaldehyde, *o* - chloro-, benzoylhydrazone, 1622[9].
$C_{14}H_{11}ClN_2O_3$ Acetamide, *N* - (5 - chloro - 2 - nitrophenyl) - *N* phenyl, 2834[6].
$C_{14}H_{11}ClO_2$ Acetophenone, 5 - chloro - 2 - hydroxy - α - phenyl-, 1237[7].
m-Cresol, chloro-, benzoate, 2842[1,2].
$C_{14}H_{11}ClO_4$ 2 - Naphthoyl chloride, 3 - carboxyoxy-, Et ester, 1616[4].
$C_{14}H_{11}Cl_2N_3O_3$ Benzaldehyde, 2,4(and 2,6)-dichloro - 3 - methoxy-, *p* - nitrophenylhydrazone, 1065[6].
$C_{14}H_{11}Cl_2N_3O_5$ Hydroxylamine, β,β - bis(2-chloro - 5 - nitrobenzyl)-, 1230[4].
$C_{14}H_{11}Cl_3OTe$ α - Phenylphenacyltellurium trichloride, 414[1].
$C_{14}H_{11}CuNO_2$ Benzoin, oxime, Cu deriv., 1055[6].
$C_{14}H_{11}IO_2$ *p*-Cresol, 3-iodo-, benzoate, 401[1].
$C_{14}H_{11}I_2N$ Carbazole, 9 - ethyl - 3,6 - diiodo, 1805[2].
$C_{14}H_{11}N$ Acridine, 5 - methyl-, 1239[1].
6,7 - Benzoquinoline, 2 - methyl-, *and -HCl*, 1628[1].
$C_{14}H_{11}NO$ Indole, 2 - (*p* - hydroxyphenyl)-, 598[6].
Phthalimidine, 2-phenyl-, 1803[2].
Tolunitrile, α - phenoxy-, 391[6,7].
$C_{14}H_{11}NOS$ 2(1) - Benzisothiazolone, 1 - *o* - tolyl-, 2327[7].
Dibenzothiophene, acetamido-, 2155[3].
$C_{14}H_{11}NO_2$ Benzil, monoxime, 752[8].
9 - Fluorenecarbamic acid, 188[9].
Phthalimidine, 2 - (*p* - hydroxyphenyl)-, 1803[2].
$C_{14}H_{11}NO_2S$ Benzothiazole, 1 - (4 hydroxy - *m* - anisyl), 386[7].
2 - α - Naphthisothiazolecarboxylic acid, Et ester, *and AgNO₃ compd.*, 763[7].
$C_{14}H_{11}NO_3$ Benzohydroxamic acid, benzoate, 2161[6].
4 - Pyridinepyruvic acid, β - phenyl-, 187[9].
$C_{14}H_{11}NO_4$ Benzophenone, 2 - methoxy - 5 nitro-, 1230[1].
$C_{14}H_{11}NO_5$ Anthranilic acid, *N* - 2,3,4 - trihydroxybenzal-, 1987[1].
$C_{14}H_{11}N_2NaO_4S_2$ Benzisosulfonazole, 2 - *o* sulfamylbenzal-, sodium deriv., 2450[9].
$C_{14}H_{11}N_3O$ 3 - Indazolecarboxamide, 2 - phenyl-, 1806[3].

1(2)-Phthalazone, 2-(p-aminophenyl)-, 1803[2].
4(3)-Quinazolone, 3-amino-2-phenyl-, 206[7].
Triazolol, diphenyl-, 914[9].

$C_{14}H_{11}N_3OS$ 1,2,4-Benzotriazine-3-mercaptan, 1,2-dihydro-, benzoate, 745[7].

$C_{14}H_{11}N_3O_2$ 2-Phenazinol, acetamido-, 603[6,7].
—, 8-amino-, acetate, 603[5].
α-Tolunitrile, α-anilino-o-nitro-, 1805[7].

$C_{14}H_{11}N_3O_3$ 4-Phenanthridinecarboxylic acid, 2,7-diamino-9,10-dihydro-9-keto-, ·H_2SO_4, 1620[6].

$C_{14}H_{11}N_3O_4$ Dipicolinic acid, 4-(benzalhydrazino)-, 1807[3].
2-Phenazinol, 5,10-dihydronitro-, acetate, 603[4,7].

$C_{14}H_{11}N_3O_5$ Acetamide, N,N-bis(p-nitrophenyl)-, 2834[6].

$C_{14}H_{11}N_3O_6$ Hydroxylamine, β-(4,6-dinitro-o-tolyl)-, Bz deriv., 2666[9].

$C_{14}H_{11}N_3O_7$ Hydroxylamine, β-(4,6-dinitro-m-anisyl)-, benzoate, 2667[4].
—, β-(2,4-dinitro-5-phenoxyphenyl)-, acetate, 2667[6].

$C_{14}H_{11}N_5$ 1,2,3,5-Tetrazole, 4-benzalamino-1-phenyl-, 704[1].

$C_{14}H_{11}N_5O_6$ Acetophenone, 2,4,6-trinitro-, phenylhydrazone, 376[1].

$C_{14}H_{11}N_7O_8$ 1,2,4-Oxdiazole, 3(or 5)-amino-5(or 3)-anilino-, picrate, 2161[7].

$C_{14}H_{11}NaO_4$ Salicylaldehyde, Na deriv., salicylaldehyde addn. compd., 741[3].

$C_{14}H_{12}$ Ethylene, as-diphenyl-, 2671[6], 3292[7], 3451[6].
Stilbene, 1953[2], 2834[9], 2997[2,3].

$C_{14}H_{12}AsCl_2NO$ Arsine, dichloro(p-N-phenylacetamidophenyl), 1606[6].

$C_{14}H_{12}AsN_3O_8$ Arsanilic acid, 3-nitro-N-(3-nitro-p-toluyl)-, 391[2].

$C_{14}H_{12}BrClN_2O$ Benzaldehyde, chloromethoxy-, p-bromophenylhydrazone, 1065[5].

$C_{14}H_{12}BrN_3O_4$ Salicylaldehyde, 3-bromo-5-methoxy-, p-nitrophenylhydrazone, 178[9].

$C_{14}H_{12}Br_4N_2O_2$ o-Cresol, α,α'-hydrazobis[4,6-dibromo-, 1810[7].

$C_{14}H_{12}ClNO$ Acetanilide, chlorophenyl-, 1800[8], 2848[2,3].

$C_{14}H_{12}ClNO_2$ o-Benzaniside, 5'-chloro-, 3694[6].

$C_{14}H_{12}ClN_3O_3$ Benzaldehyde, chloromethoxy-, p-nitrophenylhydrazone, 1065[5].

$C_{14}H_{12}Cl_2N_2O_2$ $\Delta^{4,4'}$-Bi-p-benzenimine, N,N'-dichloro-2,2'-dimethoxy-, 1552[4].

$C_{14}H_{12}Cl_2O_2S_2$ Anisole, 2,2'-dithiobis[4-chloro-, 398[7].

$C_{14}H_{12}Cl_2O_4S_2$ Disulfoxide, bis(5-chloro-o-anisyl), 398[7].

$C_{14}H_{12}HgN_2O_4$ Toluene, 4,4'-mercuribis[2-nitro-, 1794[1].

$C_{14}H_{12}HgO_2S$ Sulfide, p-acetoxymercuriphenyl phenyl, 1805[7].

$C_{14}H_{12}Hg_2N_2O_4S_2 + 2H_2O$ Benzoic acid, o,o'-mercuridithiobis-, mercuri-amine salt, 183[4].

$C_{14}H_{12}NNaO_5$ o-Cresol, 6-nitro-, Na deriv., salicylaldehyde addn. compd., 741[4].

$C_{14}H_{12}N_2$ Benzaldehyde, azine, 2309[8].
Indazole, 3-p-tolyl-, 2496[1].
m,p'-Tolandiamine, 2850[9].

$C_{14}H_{12}N_2O$ Indazole, 3-p-anisyl-, 2496[1].
Indazolol, p-tolyl-, 2496[1,4].
Phthalimidine, 2-(p-aminophenyl)-, 1803[2].

$C_{14}H_{12}N_2OS$ Methylene violet, 1240[2].

$C_{14}H_{12}N_2O_2$ Benzaldehyde, p-(p-anisylazo)-, 2836[5].
Glyoxime, diphenyl-, 42[1], 752[6].
Glyoxylanilide, phenyl-, oxime, 360[4], 1804[8].
Indazolol, p-anisyl-, 2496[1,6].

$C_{14}H_{12}N_2O_2S$ Indazole, tolylsulfonyl-, 762[7], 763[1].
o-Toluenesulfonamide, N-(o-cyanophenyl)-, 762[9].

$C_{14}H_{12}N_2O_2S_2$ m,m'-Bitolyl, 6,6'-bis(nitrosomercapto)-, 2975[9].

$C_{14}H_{12}N_2O_3$ Acetamide, N-(p-nitrophenyl)-N-phenyl-, 2834[6].
Benzamide, oxybis-, 392[2,4].
Cinchomeron-4-amic acid, 2-methyl-6-phenyl-, 3296[7].
Diphenic acid, monohydrazide, 2672[5].
4-Pyridinepyruvic acid, β-phenyl-, oxime, ·*HCl*, 187[9].

$C_{14}H_{12}N_2O_4$ Benzanilide, 2-methoxy-5-nitro-, 1230[1].
Benzophenone, 2-methoxy-5-nitro-, 1230[1].
p,p'-Bitolyl, dinitro-, 1614[8].
Mandelic acid, m-(hydroxyphenylazo)-, 2992[9].

$C_{14}H_{12}N_2O_4S_2$ Benzisosulfonazole, 2-o-sulfamylbenzal-, 3450[6].
Disulfide, bis(2-nitro-p-tolyl), 2327[5].

$C_{14}H_{12}N_2O_5$ Ethanol, 1-(m-nitrophenyl)-2-(p-nitrophenyl)-, 1801[4].

$C_{14}H_{12}N_2O_6$ Ether, nitroanisyl nitrobenzyl, 1608[5,6].
1-Naphthaleneacetic acid, 2,4-dinitro-, Et ester, 2325[3].

$C_{14}H_{12}N_2O_6S_2$ Anisole, 3,3'-dithiobis[nitro-, 1796[5,6].

$C_{14}H_{12}N_2S$ Benzothiazole, 1-(p-aminophenyl)-4-methyl-, 2327[5].

$C_{14}H_{12}N_4$ s-Tetrazine, 2,3-dihydro-2,6-diphenyl-, 1084[8].

$C_{14}H_{12}N_4O$ 3(2)-s-Tetrazinone, 1,4-dihydro-4,6-diphenyl-, 1084[7].

$C_{14}H_{12}N_4O_4$ 2,6-Lutidine-3-carboxylic acid, 4-(nitrophenylazo)-(?), 1808[6].

$C_{14}H_{12}N_4O_5$ Acetanilide, 5-anilino-2,4-dinitro-, 590[8].

$C_{14}H_{12}N_4O_6$ Salicylaldehyde, 5-methoxy-3-nitro-, p-nitrophenylhydrazone, 178[8].

$C_{14}H_{12}N_4S$ 1,3,4-Thiodiazole, 2,5-dianilino-, 2162[2].

$C_{14}H_{12}N_6S_2$ 1,2,4-Benzotriazine, 3,3'-thiobis[1,2-dihydro-, 745[7].

$C_{14}H_{12}N_{10}$ 1,2,3,5-Tetrazole, 4,4'-hydrazobis[1-phenyl-, 763[8].

$C_{14}H_{12}O$ Acetaldehyde, diphenyl-, 2844[6], 3000[2].
Desoxybenzoin, 2158[8], 2844[7].
Ethylene oxide, α,β-diphenyl-, 2850[4].

Acetic acid, diphenyl-, 187[7].
Anthraquinone, 1,2,3,4-tetrahydro-, 1404[8].
Benzoic acid, benzyl ester, 178[7].
9,10-Phenanthrenediol, 9,10-dihydro-, 1404[7].
Phenanthrenequinone, 1,2,3,4-tetrahydro-, 1404[4].
Xanthydrol, 9-methyl-, *perchlorate*, 2328[4].

$C_{14}H_{12}O_3$ 2-Acetonaphthone, 3-hydroxy-, acetate, 1616[9].
Acetophenone, 2,4-dihydroxy-α-phenyl-, 2320[8].
Benzilic acid, 187[9], 375[1], 2491[7], 3712[8]; *Ag salt*, 409[5].

Benzoic acid, *o*-(*p*-toloxy)-, *Ag salt*, 392[2].
Benzophenone, 3,4 - dihydroxy - 2′ - methyl-, 402[3].
1,3 - Butanedione, 1 - (hydroxynaphthyl)-, 1237[1,2].
Salicylic acid, benzyl ester, 1030[2].
o - Toluic acid, *α* - hydroxy - *α* - phenyl-, 1226[6].

$C_{14}H_{12}O_3Se$ Selenophene, 3 - *o* - carboxybenzoyl-2,5-dimethyl-, 592[3].

$C_{14}H_{12}O_4$ 2 - Acetonaphthone, 1,8 - dihydroxy-, 8-acetate, 1053[1].
Cotoin, 1030[6].
2,7 - Naphthalenedicarboxylic acid, di-Me ester, 1619[1].
2 - Naphthaleneglyoxylic acid, 1 - hydroxy-, Et ester, 593[9].

$C_{14}H_{12}O_4S$ Salicylaldehyde, *p* - toluenesulfonate, 2816[2].

$C_{14}H_{12}O_4S_4$ 2,6 - Thianthrenediol, 3,7 - dimethoxy-, 9,10-disulfide, 2681[8].

$C_{14}H_{12}O_5$ Chromone, 3 - acetyl - 6 - hydroxy 2-methyl-, acetate, 1237[6].
2 - Naphthoic acid, 3 - carbethoxyoxy-, 1616[4].

$C_{14}H_{12}O_{12}S_4$ *m* - Benzenedisulfonic acid, 4 - hydroxy - 5 - methyl-, sulfonylide (bimol.), *and Ba salt*, 1395[7].

$C_{14}H_{12}S_2$ 1,3 - Benzodisulfole, 2 - methyl - 2 - phenyl-, 3290[2].

$C_{14}H_{13}AsClN$ Phenarsazine, 1 - chloro - 1,6-dihydro - 3,9 - dimethyl-, 1607[1].

$C_{14}H_{13}AsClNO_2$ Phenarsazine, 1 - chloro - 1,6-dihydro-, AcOH addn. compd., 1606[8].

$C_{14}H_{13}AsN_2O_6$ Arsanilic acid, *N* - (3 - nitro - *p*-toluyl)-, 394[1].
Phthalamic acid, *N* - (2 - amino - 4 - arsonophenyl)-, 1606[2].

$C_{14}H_{13}AsN_2O_7$ Arsanilic acid, *N* - 3 - nitroanisoyl-, 394[2].

$C_{14}H_{13}AsN_2O_8$ *m* - Arsanilic acid, 4 - hydroxy-*N* - (3 - nitroanisoyl)-, *and Na salt*, 2318[6].

$C_{14}H_{13}BrO$ 9 - Anthrol, bromo - 1,2,3,4 - tetrahydro-, 1404[1].
Ether, *p* - (bromomethyl)benzyl phenyl, 391[6].

$C_{14}H_{13}Cl$ Bibenzyl, *α*-chloro-, 577[3,4].

$C_{14}H_{13}ClN_4O_7$ Benzylamine, (chloromethyl)-, picrate, 391[7,8,9].

$C_{14}H_{13}ClO_3S$ *p* - Toluenesulfonic acid, 4 (and 6) - chloro - *m* - tolyl esters, 2842[1,2].

$C_{14}H_{13}IN_2$ 1,4 - Imidazopyridine, 2 - phenyl, methiodide, 3009[9].

$C_{14}H_{13}MoNO_3$, 3656[9].

$C_{14}H_{13}N$ Benzylamine, *N* - benzal-, *HgCl₂ addn. compd.*, 1610[8].
Carbazole, 3,6 - dimethyl-, 2831[4].

$C_{14}H_{13}NO$ Acetamide, diphenyl-, 590[7], 2097[4].
Benzophenone, *p* - methyl-, oxime, 1615[1].
Desoxybenzoin, oxime, 2158[8]

$C_{14}H_{13}NOS$ Benzoic acid, *p*-methylaminothiono-, Ph ester, 371[6].

$C_{14}H_{13}NO_2$ Acetanilide, *p* - (*p* - hydroxyphenyl)-, 1073[3].
9 - Anthrol, 1,2,3,4 - tetrahydronitroso-, 1404[2].
Benzanilide, *o*′ - (hydroxymethyl)-, 1073[8].
Benzophenone, *p* - methoxy-, oxime, 1615[1].
p, *p*′ - Bitolyl, nitro-, 1614[8].

$C_{14}H_{13}NO_3$ Acetanilide, *N* - (8 - hydroxy - 1-naphthyl)-, acetate, 1073[9].

$C_{14}H_{13}NO_4$ Carbanilic acid, carboxymethyl, ethyl ester, *Na salt*, 3164[8].

Ether, anisyl nitrobenzyl, 1608[6,8].
Ether, benzyl 4(and 5) - nitro - *o* - anisyl, 1608[8].
2 - Naphthamide, 3 - carboxyoxy-, Et ester, 1616[4].

$C_{14}H_{13}NO_5$ Propionic acid, *α* - (nitronaphthoxy)-, Me ester, 1617[8].

$C_{14}H_{13}NO_5S$ Benzoic acid, 4 - hydroxy - 3 - *p*-tolylsulfonamido-, 2839[1].

$C_{14}H_{13}NO_6S$ *p* - Toluenesulfonic acid, 3 - (2,3,4-trihydroxybenzalamino)-, 1987[1].

$C_{14}H_{13}N_3O$ Benzaldehyde, 4 - phenylsemicarbazone, 914[9].
2,1,3 - Benzotriazole, 5 - methyl - 2 - *p*-tolyl-, 2-oxide, 2836[2].

$C_{14}H_{13}N_3O_2$ Aniline, *N* - (*α* - anilinoethylidene)-*p*-nitro-, 1799[4].
Anthranilic acid, *β* - benzoylhydrazide, 206[7].
2,6 - Lutidine - 3 - carboxylic acid, 4 - phenyl azo-,-*HNO₃*, 1808[6].

$C_{14}H_{13}N_3O_4$-Toluidine, benzyldinitro-, 3448[4].
o - Vanillin, *p* - nitrophenylhydrazone, 1065[9].
Xenylamine, *N*, *N* - dimethyl - 2,4′ - dinitro-, 586[9].

$C_{14}H_{13}N_3O_5$ 3,4 - Pyrazoledicarboxylic acid, 1-(*p* - acetamidophenyl) - 5 - methyl-, *and di- K salt*, 598[9].

$C_{14}H_{13}N_3O_6$ *m* - Cresol, 5 - anilino - 4 - methoxy-2,6-dinitro, 1394[7].

$C_{14}H_{13}N_5O_9$ *s* - Collidine, 3 - nitro, picrate, 2329[1].

$C_{14}H_{14}$ *o*, *p*′-Bitolyl, 1958[2].

$C_{14}H_{14}AlK_2NO_{12}$ Aluminum dipotassium phenethylamine oxalate, 766[8].

$C_{14}H_{14}AsIO$ 6,6 - Dimethylphenoxarsonium iodide, 2839[4].

$C_{14}H_{14}AsNO_2$ Phenazarsinic acid, 3,9 - dimethyl, *and salt*, 1607[1].

$C_{14}H_{14}AsNO_4$ Arsanilic acid, *N* - acetyl *N*-phenyl, 1606[8].
--, *N* - *α* - toluyl-, 1605[8].

$C_{14}H_{14}As_2N_2Na_2O_8S_2$ See *Sulfarsphenamine*.

$C_{14}H_{14}BeO_6S_2$ + 4H₂O Beryllium *p* toluenesulfonate, 3141[6].

$C_{14}H_{14}BrNO_2$ 1 - Propanol, 2 - bromo-, 1 - naphthalenecarbamate, 1232[9].

$C_{14}H_{14}BrNO_2S$ Benzenesulfonamide, *p* - bromo-*N*-methylbenzyl, 371[9], 372[1].
--, *p*-bromo-*N* phenethyl-, 372[1].

$C_{14}H_{14}Br_2O_2Te$ Di - *p* - anisyltellurium dibromide, 2670[1].

$C_{14}H_{14}Br_4O_4$ *β* - Cumidic acid, *α*,*α*,*α*′,*α*′ - tetrabromo, di-Et ester, 350[1].

$C_{14}H_{14}ClHg_3NO_7$ Acetanilide, 2,4,6 - tris(acetoxymercuri) - 3 - chloro, 2838[2].

$C_{14}H_{14}ClNO_2$ 1 - Propanol, 3 - chloro-, 1 - naphthalenecarbamate, 1232[9].

$C_{14}H_{14}ClN_3O_2$ 2,6 - Lutidine - 3 - carboxylic acid, 4 - [*β* - (*p* - chlorophenyl)hydrazino], *HCl*, 1808[7].

$C_{14}H_{14}Cl_2O_2Te$ Di - *p* - anisyltellurium dichloride, 2670[1]

$C_{14}H_{14}Hg$ Mercury dibenzyl, 177[3].
Mercury di-*p*-tolyl, 176[9], 177[2].

$C_{14}H_{14}N_2$ Acetamidine, *N*, *N*′ - diphenyl-, 1799[4].
m, *p*′-Stilbenediamine, 2850[9].

$C_{14}H_{14}N_2O$ Acetophenone, *p* - amino - *α* - (*m*-acetamidophenyl)-, 2851[1].
Toluene, azoxybis-, 174[6].

$C_{14}H_{14}N_2O_2$ Acetone, oxime, 1 - naphthalene carbamyl deriv., 2310[6].

o - Cresol, 6 - *m* - tolylazoxy-, 174^{9}.
Ketone, 2 - *p* - anisyl - 4 - methyl - 5 - pyrimidyl methyl, 206^{6}.
Xenylamine, *N*, *N* - dimethyl - 4′ - nitro-, 586^{9}.

$C_{14}H_{14}N_2O_3$ Anisole, azoxybis-, 174^{9}, 329^{1}, 1024^{3}.
Naphthalamic acid, *N* - (*β* - aminoethyl)-, *and Pb salt*, 1075^{4}.

$C_{14}H_{14}N_2O_3S$ Indazole, *o* - toluenesulfonate, 763^{1}.
Toluenesulfonamide, *N* - (*o* - formylphenyl)-, oxime, 762^{8,9}.

$C_{14}H_{14}N_2O_4$ Barbituric acid, 5 - ethyl - 5 - phenacyl-, 3691^{3}.
3 - Hydantoinacetic acid, 5 - benzal - 1-methyl-, Me ester, 367^{1}.
5 - Pyrimidinecarboxylic acid, 2 - *p* - anisyl-1,4 - dihydro - 4 - keto-, Et ester, 206^{6}.

$C_{14}H_{14}N_2O_4S$ Toluenesulfonic acid, aminobenzamido-, 3448^{3}.

$C_{14}H_{14}N_2O_5$ 3 - Hydantoinacetic acid, 5 - anisal-, Me ester, 367^{1}.
—, 5 anisal - *α* - methyl-, *and K salt*, 366^{6}.

$C_{14}H_{16}O_5$ 2-Indancarboxylic acid, 1-keto-5,6-dimethoxy-, Et ester, 2326[1].
Malonic acid, *p*-hydroxybenzal-, di-Et ester, 1079[2].

$C_{14}H_{16}O_6$ 1 - Isobenzofuranacetic acid, 1,2-dihydro-2-keto-4,5-dimethoxy-, Et ester, 2331[2].

$C_{14}H_{16}O_8$ Glucuronic acid, monobenzoate, Me ester, 3689[8].

$C_{14}H_{17}AsN_2O_5S$ Arsanilic acid, *N*-(3-amino-*p*-tolylsulfonyl)-*N*-methyl-, *and salts*, 2838[7].

$C_{14}H_{17}BrO$ Anthrol, bromooctahydro-, 1404[9], 1405[2].
9-Phenanthrol, bromo-1,2,3,4,5,6,7,8-octahydro-, 1404[4].

$C_{14}H_{17}BrO_7$ 1,2 - Propanediol, 1-(2-bromo-5,6-dimethoxy - 3,4 - methylenedioxyphenyl)-, monoacetate, 3450[8].

$C_{14}H_{17}N$ Carbazole, 1,2,3,4 - tetrahydrodimethyl-, 913[1], 2831[4].
1-Naphthylamine, *N*, *N*-diethyl-, 384[9].
o-Toluquinaldine, 5-isopropyl-, *and chloroaurate*, 1238[9].

$C_{14}H_{17}NO$ Acetophenone, cyclohexenyl-, oxime, 3447[4].
Cyclohexanone, 2 - (anilinomethylene)-4-methyl-, 389[4].

$C_{14}H_{17}NO_2$ Anthraquinone, 2-amino-1,2,3,4,5,-6,7,8-octahydro-, 1405[4].
9 - Anthrol, 1,2,3,4,5,6,7,8 - octahydronitroso-, 1404[3].
Carbazole, 1,2,3,4-tetrahydro - 6,7 - dimethoxy-, 1604[6].

$C_{14}H_{17}NO_3$ Cyclopentanecarboxylic acid, 1-(*N*-acetylanilino)-, 172[1].
α-Pentenic acid, γ-keto-α-(*N*-methylanilino)-, Et ester, 2823[1].

$C_{14}H_{17}NO_4S$ Tolylsulfuric acid, *p*-toluidine salt, 1796[2].

$C_{14}H_{17}NO_5$ Glutamic acid, *N*-benzoyl-, di-Me ester, 1994[3].
4-Pyranol, tetrahydro - 2,6 - dimethyl-, *p*-nitrobenzoate, 1624[2].

$C_{14}H_{17}NO_6$ Carbamic acid, [(dimethoxy-2-phthalidyl)methyl] , Et ester, 2331[1,2].

$C_{14}H_{17}N_3O$ Acetophenone, cyclopentenyl-, semicarbazone, 3447[7].

$C_{14}H_{17}N_3OS$ 1,4 - α - Naphthothiopyrone, 2,3,-7,8,9,10 - hexahydro-, semicarbazone, 202[2].

$C_{14}H_{17}N_3O_4$ 4-Piperidinebutyric acid, 3,5-dicyano-2,6-diketo 4-methyl-, Et ester, 172[8].

$C_{14}H_{17}N_3S$ Δ[2] - Cyclohexenone, 3 methyl-5-phenyl-, thiosemicarbazone, 3161[8].
2(3)-Thiazolone, 3-ethyl-4-phenyl-, isopropylidenehydrazone, 416[7].

$C_{14}H_{17}N_5O_4$ Uric acid, 5-anilino 4,5-dihydro-4-hydroxy-1,3,9-trimethyl-, 2826[7].

$C_{14}H_{17}NaO_6S$ Malonic acid, benzylsulfonyl-, di-Et ester, Na deriv., 1409[3].

$C_{14}H_{18}$ Anthracene, octahydro-, 2455[6].

$C_{14}H_{18}Br_2O_4$ Veratrole, 4 bromo-3-(β-bromo-α-ethoxypropyl) - 5,6 - methylenedioxy)-, 3450[7].

$C_{14}H_{18}Cl_2N_2O_2S$ Sulfone, bis(β-chloroethyl), dipyridine addn. compd., *chloroplatinate*, 40[8].

$C_{14}H_{18}Cl_2N_2S$ Sulfide, bis(β-chloroethyl), dipyridine addn. compd., *chloroplatinate*, 40[8].

$C_{14}H_{18}HgI_3N$ Quinoline, complex salt with $C_5H_{11}I$ and HgI_2, 3695[8].

$C_{14}H_{18}IN$ 2-Isobutyl-1-methylquinolinium iodide, 1082[9].

$C_{14}H_{18}INO$ Benzyl(2 - furylmethyl)dimethylammonium iodide, 390[7].

$C_{14}H_{18}INS$ Benzyldimethyl - 2 - thienylmethylammonium iodide, 390[8].

$C_{14}H_{18}N_2O$ 1-Indanone, 2-(1-piperidyl)-, oxime, 383[2].
Lepidine, 2-dimethylaminoethoxy-, P 1304[6].

Quinaldine, 4-dimethylaminoethoxy-, P 1304[6].
$C_{14}H_{18}N_2O_2$ Butyric acid, β-[(α - cyanobenzyl)-amino]-, Et ester, *and* -*HCl*, 3283[4].
Cyclohexanone, 2-hydroxy-, phenylhydrazone, acetate, 2665[6].
$C_{14}H_{18}N_2O_4$ 1 - Piperidinepropionic acid, α-(p-nitrophenyl)-, 1414[1].
Proline, 1-tyrosyl-, 3169[6,7].
$C_{14}H_{18}N_2O_5$ Glycine, *N*-(β - carbomethoxy-aminobutyryl)-*N*-phenyl-, *and* NH_4 *salt*, 44[4].
1 - Piperidinepropionic acid, α-hydroxy-α-(o-nitrophenyl)-, 1414[3].
$C_{14}H_{18}N_4O_2$ 4,4′-Bi-m-cresol, 2,6,2′,6′-tetra-amino-, *8-HCl*, $SnCl_4$ *salt*, 187[5].
$C_{14}H_{18}N_4O_3$ 4 - Pyrazolecarboxylic anhydride, 1,3,5,1′,3′,5′-hexamethyl-, 2857[1].
$C_{14}H_{18}N_4O_4P_2$ Tetrazdiphosphinium, *P*,*P*′-di-p-tolyloxy - *P*,*P*′ - dioxotetrahydro , 914[1].
$C_{14}H_{18}N_4O_9$ Caffeine citrate, 1030[2].
$C_{14}H_{18}O$ Anthrol, octahydro-, 1403[7], 1404[3].
9-Phenanthrol, 1,2,3,4,5,6,7,8 - octahydro-, 1404[4].
$C_{14}H_{18}O_2$ 9,10-Anthradiol, 1,2,3,4,5,6,7,8-octahydro-, 1404[3,7].
3 - Dibenzofuranol, 1,2,3,4,4₁,9₁ hexahydro-6,9₁-dimethyl-(?), 400[6].
Veratrole, 3,6-diallyl-, 1798[2].
$C_{14}H_{18}O_4$ Butyric acid, resorcinol di-ester, 3163[7].
Caprophenone, 2,4-dihydroxy , monoacetate, 2995[6].
Durohydroquinol, diacetate, 1984[3].
2-Pentanol, 4-methyl-, H phthalate, 577[4].
1,3 - Propanediol, 2-methyl-2-phenyl-, diacetate, 385[4].
Resorcinol, dibutyryl-, 3163[7].
$C_{14}H_{18}O_6$ Acetophenone, α-hydroxy-3,4-dimethoxy-, α-methoxypropionate, 2827[7,8].
$C_{14}H_{18}O_6S$ Malonic acid, benzylsulfonyl , di-Et ester, 1409[4].
$C_{14}H_{18}O_7$ Acetophenone, p-hydroxy-, tetra-Ac glucoside, 593[1].
$C_{14}H_{18}O_{18}S_4$ + $2H_2O$ Copper sulfate (basic), 3401[8].
$C_{14}H_{19}BrO_9$ Mannose, bromotetraacetyl , 1790[2].
$C_{14}H_{19}ClO_9$ Glucose, acetochloro , 2828[1].
$C_{14}H_{19}N$ Acridine, 1,2,3,4,4₁,5,10,10₁-octahydro-2(or 4)-methyl-, 1628[8].
Δ[2] - Cyclohexenylamine, 2-benzyl *N*-methyl-, -*HBr*, 2665[8].
Piperidine, 1-α-vinylbenzyl-, *and chloroplatinate*, 1053[4].
Quinoline, 1,2-dihydro 2-isobutyl 1-methyl , 1081[8].
$C_{14}H_{19}NO$ 9-Anthrol, 10-amino-1,2,3,4,5,6,-7,8-octahydro-, 1404[8].
9-Phenanthrol, 10-amino - 1,2,3,4,5,6,7,8-octahydro-, 1404[8].
$C_{14}H_{19}NO_2$ 9,10-Anthradiol, 2-amino-1,2,3,4,-5,6,7,8-octahydro , -*HCl*, 1405[4].
4 - Pyrancarboxanilide, tetrahydro-2,6-dimethyl-, 1624[3].
$C_{14}H_{19}NO_4$ Cinchomeronic acid, 6-*tert*-butyl-2-methyl-, mono-Et ester, 3206[9].
$C_{14}H_{19}NO_5$ Carbanilic acid, o-carbethoxyoxy , Bu ester, 2319[9].
—, o-carboisopropoxyoxy-, Pr ester, 2320[1].
—, o-carbopropoxyoxy-, isopropyl ester, 2320[1].
$C_{14}H_{19}NO_6$ 1,2,3 - Cyclobutanetricarboxylic acid, 2-cyano-, tri-Et ester, 49[7].
Δ[4] - 1,3 - Cyclohexenedicarboxylic acid, 2-formyl - 6 - keto - 4 - methyl-, di-Et ester, aldoxime, 45[9].
Malonic acid, [(5 - carbethoxy-2-ethyl-4-methyl-3-pyrryl)methyl]-, 1236[8].
2,4 - Pyrroledicarboxylic acid, 5-(hydroxymethyl)-3-methyl-, di-Et ester, acetate, 2159[9], 2160[5].
$C_{14}H_{19}NO_{12}$ *d*-Glucose, tetraacetyl-, 6-nitrate, 742[8].
$C_{14}H_{19}N_3O$ Pentenophenone, ethyl-, semicarbazone, 3447[8].
$C_{14}H_{19}N_3O_2$ 2,5 - Pyrrolopyrazin-7-ol, octahydro-2-phenylcarbamyl-, 55[6].
$C_{14}H_{19}N_3O_3$ Cyclohexanone, 2-ethoxy-, p-nitrophenylhydrazone, 2665[7].
$C_{14}H_{20}As_2N_6$ Arsenobenzene, 3,5,3′,5′-tetra-amino - 4,4′ - bis(methylamino)-, *tetra-HCl*, 2993[4].
$C_{14}H_{20}BrN_3O$ Pyramidone, methobromide, 2857[6].
$C_{14}H_{20}Br_{10}N_2$ Nicotine, di-HBr, $C_2H_2Br_4$ addn. compd., 1086[4].
$C_{14}H_{20}Cl_2N_4Pt$, 2961[2].
$C_{14}H_{20}MoN_6O_8$ Diguanidine dipyrogallol molybdate, 557[1].
$C_{14}H_{20}N_2O_2$ Durene, diacetamido-, 1984[3].
1-Piperidinepropionic acid, α-(p-amino phenyl) , *di-HCl*, 1414[1].
$C_{14}H_{20}N_2O_5S$ Alanine, *N* - (*N*-tolylsulfonyl-glycyl)-, Et ester, 3298[5].
$C_{14}H_{20}N_4O_3$ Lysine, $N^ε$-benzoyl - $N^α$ - guanyl-, 3690[7].
$C_{14}H_{20}O$ Δ[5]-2-Heptenol, 2-benzyl-, 1602[3].
—, 6-methyl-2-phenyl-, 3687[1].
$C_{14}H_{20}O_2$ Butyric acid, p-isopropylbenzyl ester, 2488[2].
Caprylophenone, α hydroxy-, 1786[7].
Cumic acid, Bu and isobutyl esters, 1793[6].
7-p-Cymenecarboxylic acid, Pr and isopropyl esters, 2488[4].
Isobutyric acid, p-isopropylbenzyl ester, 2488[2].
9,10 - Phenanthrenediol, 1,2,3,4,5,6,7,8,-9,10-decahydro-, 1404[6].
$C_{14}H_{20}O_3$ Caprylophenone, 2,4-dihydroxy-, 2320[2].
$C_{14}H_{20}O_4$ 2-Butanol, 4-(3,4-dimethoxyphenyl)-, acetate, 739[7].
Dicyclopentadieneglycol, dihydro-, diacetate, 384[6].
$C_{14}H_{20}O_4S$ 4-Pyranol, tetrahydro-2,6-dimethyl-, p-toluenesulfonate, 1624[3].
$C_{14}H_{20}O_5S$ [1,5(?)] - Glucoside, 4-methyl-α-benzylthio-, 171[1].
$C_{14}H_{20}O_7$ 3,5-Heptanedicarboxylic acid, 4-formyl-2,6-diketo , di Et ester, 45[6].
$C_{14}H_{20}O_8$ 1,1,4,4 - Cyclohexanetetrol, tetra-acetate, 1064[9]
$C_{14}H_{20}O_{10}$ *d* Glucose, tetraacetyl-, 742[8], 1789[8].
$C_{14}H_{21}AsN_2O_7$ Carbamic acid, *N*,*N*′ (p-arsono-o phenylene)bis-, di-Pr ester, 1605[8].
$C_{14}H_{21}N$ Carbazole, 1,2,3,4,5,6,7,8 - octahydro-3,9-dimethyl-, 913[1].
Cyclohexylamine, 2 benzyl - *N* - methyl-, 2666[1].
Kairoline, 2-isobutyl-, 1082[3].
$C_{14}H_{21}NO_2$ 1-Butanol, 2-ethyl-2-methyl-, carbanilate, 2481[4].
Ethylamine, β-[3(and 6)-allyl-o anisyloxy]-*N*,*N*-dimethyl-, P 2392[8].
Pyrrole, diethyldipropionyl-, 3403[7].
$C_{14}H_{21}NO_3S_2$ Propionic acid, α-[(dithiocarboxy)oxy]-, *S*-Et ester, α-methylbenzylamine salt, 3281[1,2].

$C_{14}H_{21}NO_4$ Cinchomeronic acid, *N*-methyl-γ-dihydrodimethyl-, di-Et ester, 3296[6].

$C_{14}H_{21}NO_6$ Aniline, *p-sec*-butyl-, acid tartrate, 1983[8].

$C_{14}H_{21}N_4O_{11}P$ + $4H_2O$ Imidazole-phosphorus compd., 1243[9].

$C_{14}H_{21}N_5O_7S$ Pseudourea, α,β-diethyl-α,γ-dimethylthio-, methopicrate, 374[4].

$C_{14}H_{22}Cu_4N_{14}O$, 3401[2].

$C_{14}H_{22}Hg$ 1-Heptine, 1,1′-mercuribis-, 1054[1].

$C_{14}H_{22}IN$ 1,2,3,4-Tetrahydro-2-isobutyl-1-methylquinolinium iodide, 1082[2].

$C_{14}H_{22}N_2O$ Acetamidine, *N*, *N*-diethyl-*N′*-*p*-phenetyl-, 1218[8].

Base, m. 96–7°, from dicyclopentadiene, 384[7].

2(1)-Pyridone, 1-butyl-3-(tetrahydro-1-methyl-2-pyrryl)-, 2863[1].

$C_{14}H_{22}N_2O_2$ (See also *Tutocaine.*)

Benzoic acid, amino-, diethylaminopropyl ester, P 3061[8]; *-HCl*, 1852[8].

$C_{14}H_{22}N_2O_3S$ Lactic acid, dimethylthionocarbamate, α-methylbenzylamine salt, 3281[4].

$C_{14}H_{22}N_4O_4S$ Arginine, *N*-$^{\alpha}$methyl-N^{α}-*p*-tolylsulfonyl-, 3690[9].

Lysine, N^{ϵ}-guanyl-N^{α}-*p*-tolylsulfonyl-, 3690[9].

$C_{14}H_{22}N_4O_7$ Butylamine, *N*, *N*, α, α-tetramethyl-, picrate, 3280[4].

$C_{14}H_{22}N_6O_7$ Ethylpentamethylguanidinium picrate, 374[9].

$C_{14}H_{22}O_2$ Benzene, 1-hexyl-2,4-dimethoxy-, 2995[9].

Cumaldehyde, di-Et acetal, 1793[4].

Resorcinol, dibutyl-, 3163[7].

—, 4-octyl-, 2320[3].

$C_{14}H_{22}O_3$ Camphor, 3-(hydroxymethyl), propionate, 1227[9].

$C_{14}H_{22}O_4$ Succinic acid, monobornyl ester, 2998[4].

—, monoisobornyl ester, 2998[4].

$C_{14}H_{22}O_5$ Cyclohexaneacetic acid, 4-carboxy-3-keto-1-methyl-, di-Et ester, 172[6].

$C_{14}H_{22}O_7$ Galactose, acetyldiacetone-, 1389[3].

$C_{14}H_{22}O_8$ Bimalonic acid, tetra-Et ester, 3689[9].

$C_{14}H_{23}IN_2$ 1-Butyl-3-(tetrahydro-1-methyl-2-pyrryl)pyridinium iodide, *-HI*, 2863[1].

$C_{14}H_{23}N$ Aniline, *N*-butyl-*N*-isobutyl-, 2991[1].

$C_{14}H_{23}NO$ Triethylamine, β-(α-methoxybenzyl)-, *and -HCl*, 1604[9].

$C_{14}H_{23}NO_2$ 2-Propanol, 1,1′-phenyliminobis-[2-methyl-, *and chloroplatinate*, 2834[4].

$C_{14}H_{23}N_3O_3$ 5-Epicamphorcarboxylic acid, Et ester, semicarbazone, 2674[9].

$C_{14}H_{23}N_3O_7$ 1,1,2-Butanetricarboxylic acid, 3-keto-, tri-Et ester, semicarbazone, 3690[2].

$C_{14}H_{24}AsI$ Ethyldimethyl(δ-phenylbutyl)arsonium iodide, 2839[6].

$C_{14}H_{24}N_2$ Pyridine, 1,2-dihydro-1-methyl-2-propyl-3(or 5)-(tetrahydro-1-methyl-2-pyrryl)-, 2863[2].

$C_{14}H_{24}O_3$ Ketone, hydroxymethyl 1,2,2,3-tetramethylcyclopentyl, propionate, 1399[6].

1-Propanone, 3-hydroxy-1-(1,2,2,3-tetramethylcyclopentyl)-, acetate, 1399[7].

$C_{14}H_{24}O_4$ Malonic acid, cyclohexylmethyl-, diethyl ester, 3160[2].

$C_{14}H_{24}O_5$ Malonic acid, propyl(β-vinyloxyethyl)-, di-Et ester, 367[7].

$C_{14}H_{24}O_7$ Succinic acid, diethoxyacetyl-, di-Et ester, 388[9].

$C_{14}H_{24}O_8S$ Fructose, α-diacetone-3-ethanesulfonyl-, 2663[3].

d-Glucose, diacetoneethanesulfonyl-, 2662[8].

$C_{14}H_{25}N$ Carbazole, dodecahydro-3,9-dimethyl-, 913[3].

$C_{14}H_{25}NO$ α-Nonenic acid, piperidide, 2845[1].

Phenol base, m. 158–9°, from *o*-phenoxymethylbenzylamine, 391[9].

$C_{14}H_{25}NO_5$ Galactosyl-6-dimethylamine, diacetone, 1597[6].

$C_{14}H_{25}N_3O$ 2-Heptanone, 3-Δ^1-cyclohexenyl-(?), semicarbazone, 3287[5].

$C_{14}H_{25}N_3O_3$ 2,5-Piperazinedione, 3-isobutyl-4-leucyl-, 55[4].

$C_{14}H_{25}N_4NiO_4$, 2466[2].

$C_{14}H_{26}O$ Cyclotetradecanone, 1792[5].

$C_{14}H_{26}O_2$ 4,4′-Bipyran, octahydro-2,6,2′,6′-tetramethyl-, 1624[3].

Cyclohexanecaprylic acid, 3160[5].

Cyclopentanecarbinol, 1,2,2,3-tetramethyl-, butyrate, 1399[8].

Δ^8-5-Decenol, 5,9-dimethyl-, acetate, 3687[1].

2,4-Tetradecanedione, 738[9].

Tetradecenic acid, 2420[4], 2482[3].

$C_{14}H_{26}O_3$ Acetic acid, ethoxy-, menthyl ester, 43[8].

Lauric acid, λ-formyl-, Me ester, 1590[7].

Myristic acid, γ-keto-, 3445[3].

$C_{14}H_{26}O_4$ Adipic acid, di-Bu ester, 3689[7].

Brassylic acid, mono-Me ester, 1590[5].

1,10-Decanedicarboxylic acid, di-Me ester, 1789[2].

1,12-Dodecanedicarboxylic acid, 1789[3].

Succinic acid, di-Am ester, 3689[8].

$C_{14}H_{26}O_5$ Malonic acid, (butoxymethyl)ethyl, di-Et ester, 581[9].

—, ethyl(isobutoxymethyl), di-Et ester, 581[9].

$C_{14}H_{26}O_5S$ 4-Pyranol, tetrahydro-2,6-dimethyl-, sulfite, 1624[4].

$C_{14}H_{27}CuNO_2$ 7-Tetradecanone, 8-hydroxy, oxime, Cu deriv., 1055[6].

$C_{14}H_{27}NO$ Pelargonic acid, piperidide, 2845[1].

$C_{14}H_{27}NO_3$ Myristic acid, γ-keto-, oxime, 3445[3].

$C_{14}H_{27}NO_4$ Propionic acid, β,β′-(butylimino)-bis-, di-Et ester, 3010[2].

—, β,β′-(*sec*-butylimino)bis-, di-Et ester, 3010[2].

—, β,β′-isobutyliminobis-, di-Et ester, 3010[2].

$C_{14}H_{27}N_3O$ Cyclotridecanone, semicarbazone, 1792[5]

$C_{14}H_{27}O_5P$ 4-Pyranol, tetrahydro-2,6-dimethyl-, phosphite, 1624[3].

$C_{14}H_{28}BrNO$ [β-Keto-β-(1,2,2,3-tetramethylcyclopentyl)ethyl]trimethylammonium bromide, 1399[4].

$C_{14}H_{28}Br_2$ Tetradecane, 1,14-dibromo-, 1789[2].

$C_{14}H_{28}Br_2N_4$ Spiro[piperidine-1,1′-piperazine-4′,1″-piperidine], *N*, *N′*-dibromo-, 2862[3].

$C_{14}H_{28}CuN_4O_4$, 2466[1].

$C_{14}H_{28}INO_2$ Cyclohexaneacetic acid, α-dimethylamino-3-methyl-, Et ester, methiodide, 903[9].

$C_{14}H_{28}N_2$ 4-Heptanone, azine, 899[9], 2309[8].

$C_{14}H_{28}N_2O_2S$ Piperidine, β,β′-sulfonylbis-[1-ethyl-, 40[3].

$C_{14}H_{28}N_2S$ Piperidine, β,β′-thiobis[-1-ethyl-, 40[3].

$C_{14}H_{28}N_4O_4Pd$, 2466[2].

$C_{14}H_{28}O_2$ (See also *Myristic acid.*)

Caprylic acid, α-ethyl-, Bu ester, 863[1].

7-Tetradecanone, 8-hydroxy-, 1055[7].

$C_{14}H_{28}O_3$ Tridecoic acid, hydroxy-, Me 1590[9], 1598[9].

$C_{14}H_{29}NO_4$ β-Alanine, *N*(γ,γ-diethoxy-α-methylpropyl)-*N*-methyl-, Et ester, 1788[6].
$C_{14}H_{30}Hg$ Mercury diheptyl, 3688[6].
$C_{14}H_{30}N_2O_3$ See *Eledonine*.
$C_{14}H_{30}O$ Heptyl ether, 361[8].
$C_{14}H_{30}O_2$ 5,6-Dodecanediol, 5-ethyl-, 1786[7].
 4,5-Hendecanediol, 4-propyl-, 1786[5].
 1,14-Tetradecanediol, 1789[1].
$C_{14}H_{30}O_2S_2$ 2-Butanone, bis(γ-ethoxypropyl) mercaptole, 737[3].
$C_{14}H_{31}NO_4$ Butyraldehyde, β-(formylmethylamino)-, bisdiethyl acetal, 1788[4].
$C_{14}H_{32}N_2O_8$ 2-Pentanol, 1-hydroxamino-4-methyl-, oxalate, 1052[3].
$C_{14}H_{32}N_4$ Piperazine, 1,4-bis(ε-aminoamyl)-, *and salts*, 2862[4,7].
 Piperidine, 1-{β-[(ε-aminoamyl)(β-aminoethyl)amino]ethyl}-, 2862[4].
$C_{14}H_{33}NO$ Tributylethylammonium hydroxide, 3747[5].
$C_{14}H_{36}Cl_6N_6Pt$ Hexamethylguanidinium chloroplatinate, 374[9].
$C_{15}H_6Cl_2O_3$ 2-Anthraquinonecarboxylyl chloride, 1-chloro-, 1628[7].
$C_{15}H_6N_2O_8$ 2-Anthraquinonecarboxylic acid, 1,8-dinitro-, 2853[5].
$C_{15}H_7AlO_7 + 2H_2O$ Morin, Al deriv., 406[1].
$C_{15}H_7BrN_2O_6$ Anthraquinone, 2-(bromomethyl)-1,8-dinitro-, 2853[5].
$C_{15}H_7BrO_4$ 2-Anthraquinonecarboxylic acid, 3-bromo-, 385[8].
$C_{15}H_7Br_3O_7$ Compd. from santalin and Br, isomers, 1405[9].
$C_{15}H_7Br_5$ Anthracene, 1,2,3,10-tetrabromo-9-(bromomethyl)-, 3003[4].
$C_{15}H_7Cl_2N$ 9-Anthronitrile, 1,5-dichloro-, 751[6].
$C_{15}H_7Cl_3O_4$ 1-Xanthenecarboxylic acid, 2,3,4-trichloro-9-keto-5-methyl-, *and Na salt*, 1231[8].
$C_{15}H_7Cl_4NO_2$ Phthalimide, tetrachloro-*N*-*p*-tolyl-, 186[5].
$C_{15}H_7FeO_7$ Morin, Fe deriv., 405[9].
 Quercetin, Fe deriv., 405[9].
$C_{15}H_8Br_2OS$ Thioflavone, 3,6-dibromo-, 198[6].
$C_{15}H_8Cl_4O_4$ Benzoic acid, 2,3,4,5-tetrachloro-6(2-hydroxy-*m*-toluyl)-, *and salts*, 1231[7,8].
 Phthalide, 3,4,5,6-tetrachloro-2-(2,3-cresyl)-2-hydroxy-, 1231[8].
$C_{15}H_8N_2O_6$ Anthraquinone, 2-methyldinitro-, 2853[4,5].
$C_{15}H_8N_2O_7$ Anthraquinone, 1-hydroxy-3-methyl-2,4-dinitro-, 1402[6].
$C_{15}H_8O_2$ Compds., m. 164° and 172°, from 2-methylanthraquinone, 2678[6].
$C_{15}H_8O_4S$ *o*-Toluic acid, α-(*o*-carboxyphenylmercapto)-α,α-dihydroxy-, dilactone, 182[7].
$C_{15}H_9BrN_2O_5S$ Cinnamonitrile, α-(*p*-bromophenylsulfonyl)-3-hydroxy-4-nitro-, 402[7].
$C_{15}H_9BrOS$ Thioflavone, 3-bromo-, 198[6].
$C_{15}H_9BrO_2$ Phthalide, brombenzal-, 1407[7].
$C_{15}H_9Br_2N_5O_7$ Imidazole, 4,5-dibromo-2-phenyl-, picrate, 2326[6].
$C_{15}H_9Br_3OS$ Thioflavanone, 3,3,6-tribromo-, 198[6].
$C_{15}H_9Br_5O_6$ Quinone, 2,6-dibromo-3-methoxy-5-(3,4,5-tribromo-2,6-dimethoxyphenoxy)-, 2320[6].
$C_{15}H_9ClN_2O_5S$ Cinnamonitrile, α-(*p*-chlorophenylsulfonyl)-3(and 5)-hydroxy-4(and 2)-nitro-, 402[7,8].
$C_{15}H_9ClO_2$ Coumarin, 6-chloro-4-phenyl-, 1238[2].
 Flavone, 6-chloro-, 1238[1].
$C_{15}H_9Cl_5O_6$ Quinone, 2,6-dichloro-3-methoxy-5-(3,4,5-trichloro-2,6-dimethoxyphenoxy)-, 2320[6].
$C_{15}H_9Cl_6NO$ 2,4-Xylanilide, α-hexachloro-, 184[7].
$C_{15}H_9NO_4$ Anthraquinone, 2-methyl-1-nitro-, P 1415[1].
$C_{15}H_9NO_5$ Anthraquinone, hydroxymethylnitro-, 1402[6].
$C_{15}H_9NS$ Thiocyanic acid, 9-anthryl ester, 747[8].
$C_{15}H_9N_3O$ 5-Pyrimidinenitrile, 1,4-dihydro-4-keto-2-(2-naphthyl)-, 206[5].
$C_{15}H_9N_3O_8$ Stilbene, 3′,4′-methylenedioxy-2,4,6-trinitro-, 3000[4], 3001[9].
$C_{15}H_9N_7O_7$ Imidazobenzotriazine, picrate, 395[6].
$C_{15}H_{10}BrNO_3S$ Carbostyril, 3-(*p*-bromophenylsulfonyl)-, 1626[8].
$C_{15}H_{10}BrN_5O_7$ Imidazole, 4(or 5)-bromo-2-phenyl-, picrate, 2327[1].
$C_{15}H_{10}Br_2$ Anthracene, 9-bromo-10-(bromomethyl)-, 3003[3,7].
$C_{15}H_{10}Br_2OS$ Thioflavanone, 3,3-dibromo-, 198[4].
 Thioflavone, dibromide, 198[7].
$C_{15}H_{10}Br_6$ Anthracene, 1,2,3,4,9-pentabromo-10-(bromomethyl)-1,2,3,4-tetrahydro-, 3003[4,7].
$C_{15}H_{10}ClNO_3$ Glyoxylyl chloride, phenyl-, oxime, Bz deriv., 360[4].
$C_{15}H_{10}ClN_3O$ 2-Naphthol, 1-(6-chloro-3-pyridylazo)-, 794[4].
 1,2,3-Triazole-4-carboxylyl chloride, 1,5-diphenyl-, 416[9].
$C_{15}H_{10}N_2O_3$ 6-Phthalazinecarboxylic acid, 1,2-dihydro-1-keto-2-phenyl-, 184[6].
 1(2)-Phthalazone, 4-hydroxy-, benzoate, 381[9].
 Phthalic anhydride, 4-formyl-, phenylhydrazone, 184[7].
 5-Pyrimidinecarboxylic acid, 1,4-dihydro-4-keto-2-(2-naphthyl)-, 206[5].
 2,4(1,3)-Quinazolinedione, mono-Bz deriv., 382[1].
 2(1)-Quinoxalone, 3-hydroxy-, benzoate, 382[1].
$C_{15}H_{10}N_2O_4$ Phthalimide, nitro-*N*-*p*-tolyl-, 186[4].
$C_{15}H_{10}N_2O_5S$ Cinnamonitrile, 3-hydroxy-4-nitro-α-(phenylsulfonyl)-, 402[7].
$C_{15}H_{10}N_2O_6$ Cinnamic acid, nitro(nitrophenyl)-, 1801[4], 2844[8,9].
$C_{15}H_{10}N_4O_6$ Indole, 2-methyl-1-picryl-, 598[5].
$C_{15}H_{10}O$ Anthrone, 10-methylene-, 2677[6].
$C_{15}H_{10}O_2$ Anthraquinone, methyl-, 192[8], 2852[7].
 Benzoic acid, *o*-phenylethinyl-(?), 1804[4].
 Phthalide, 2-benzal-, 1407[7], 1804[1].
$C_{15}H_{10}O_3$ Anthraquinone, hydroxymethyl-, 1887[9].
$C_{15}H_{10}O_3S$ Thioflavone, *S*-dioxide, 199[3].
$C_{15}H_{10}O_4$ Xanthenecarboxylic acid, 9-keto-, Me ester, 392[3,4].
$C_{15}H_{10}O_5$ Coumarin, 5,7-dihydroxy-4-(*p*-hydroxyphenyl)-, 594[9].
 Purpurin, 3-methyl-, 1402[6].
$C_{15}H_{10}O_6$ Datiscetin, 195[6].
$C_{15}H_{10}O_7$ Compd. from santalin and H_2O_2, m. 123°, 1405[9].
$C_{15}H_{10}S_2$ Thioflavone, 4-thio, 200[6].
$C_{15}H_{11}Br$ Anthracene, 9-bromo-10-methyl-, 3003[2].

$C_{15}H_{11}BrCl_2O_4$ Phenol, 3-bromo-4,5-dichloro-2,6-dimethoxy-, benzoate, 1225[7].
$C_{15}H_{11}BrN_2O_2S$ Quinoline, 2-amino-3-(*p*-bromophenylsulfonyl)-, 1626[7].
$C_{15}H_{11}BrO$ 9-Anthracenecarbinol, 10-bromo-, 3003[7].
$C_{15}H_{11}BrOS$ Thioflavanone, 3-bromo-, 198[4].

$C_{15}H_{14}Br_4N_2S$ Benzothiazole, 5-methyl-1-*p*-toluino-, tetrabromide, 195[1].
$C_{15}H_{14}Br_6N_2S$ Benzothiazole, methyl-1-toluino-, hexabromide, *and -HBr*, 195[1,2], 2857[7].
$C_{15}H_{14}ClNO$ Benzamide, *N*-*m*-(chloromethyl)-benzyl-, 391[3].
Propene, 1,3-diphenyl-, nitrosochloride, 1401[3].
$C_{15}H_{14}ClNO_2$ *o*-Benzophenetide, 5'-chloro-, 3694[6].
$C_{15}H_{14}HgNO_2$ Aniline, *N*-benzal-, HgOAc addn. compd., 1610[7].
$C_{15}H_{14}IN$ Carbazole, 3-iodo-9-isopropyl-, 1805[3].
$C_{15}H_{14}N_2$ Acridine, 5-(*β*-aminoethyl)-, *and di-HCl*, 2501[7].
$C_{15}H_{14}N_2O$ 2-Furan - *α*,*γ* - pentadienaldehyde, phenylhydrazone, 1235[7].
$C_{15}H_{14}N_2O_2$ Glyoxylanilide, (*p*-tolyl)-, oxime, 1804[9].
1-Indanamine, *N*-[*m*(*o* and *p*)-nitrophenyl]-, 756[1].
Toluic acid, formyl-(?), phenylhydrazone, 181[3].
$C_{15}H_{14}N_2O_3$ Benzaldehyde, *o*-methoxy-, carbanilate, 179[5].
Glyoxylanilide, (*p*-anisyl)-, oxime, 1804[9].
Propene, 1,3-diphenyl-, pseudonitrosite, 1401[3].
$C_{15}H_{14}N_2O_4$ Barbituric acid, 5-allyl-5-phenacyl-, 3691[3].
o-Benzophenetide, 5-nitro-, 3694[6].
$C_{15}H_{14}N_2O_8$ 2,4 - Pyrroledicarboxylic acid, 5,5' - methylenebis[3-methyl-, 2863[6].
$C_{15}H_{14}N_2S$ Benzothiazole, 4-methyl-1-*m*-toluino-, 2857[8].
$C_{15}H_{14}N_4$ *s*-Tetrazine, 2,3-dihydro-2-phenyl-6-*p*-tolyl-, 1085[1].
$C_{15}H_{14}N_4O$ 1,4 - Imidazopyridin-2(3)-one, 3-(*p* - dimethylaminophenylimino)- (?), 2858[9].
3(2) - *s* - Tetrazinone, 1,4 dihydro-4-phenyl-6-*p*-tolyl-, 1084[9].
$C_{15}H_{14}N_4O_2$ Condensation product, m. 126–7°, of 5-methyl-1-phenyl-1,2,3 - triazole-4-aldehyde and Et cyanoacetate, 416[8].
$C_{15}H_{14}N_4O_2S$ Salicylaldehyde, thiocarbohydrazone, 1811[1].
$C_{15}H_{14}N_4O_3$ Acetophenone, 4-(*m*-nitrophenyl)-semicarbazone, 175[6].
$C_{15}H_{14}N_4O_4$ Anthranilic acid, *N*-acetyl-, *β*-(*m* - nitrophenyl)hydrazide, 206[9].
Propiophenone, 2,4 - dinitrophenylhydrazone, 364[3].
$C_{15}H_{14}N_4O_6$ Benzaldehyde, 3,6-dimethoxy-2-nitro-, *p* - nitrophenylhydrazone, 178[9].
$C_{15}H_{14}N_4O_9S$ *p*-Toluenesulfono - *p* - phenetide, trinitro-, *and NH₃ addn. compd.*, 400[1,2].
$C_{15}H_{14}N_4S$ Benzaldehyde, thiocarbohydrazone, 1810[9].
$C_{15}H_{14}N_6O_5$ 2-Propanone, 1-hydroxy-, *p* - nitrophenylosazone, 2659[8].
$C_{15}H_{14}O$ Anisole, (*α* - methylenebenzyl)-, 2674[6].
—, *p*-styryl-, 2324[7].
Benzophenone, *o*,*p*-dimethyl-, 385[7].
Fluorene, ethyl 9-fluoryl, 2675[7].
Δ^2-1-Propenol, 1,3 - diphenyl-, 906[7].
Propionaldehyde, *α*,*β*-diphenyl-(?), 1401[3].
Propiophenone, phenyl-, 906[7], 2324[9], 2997[5].

$C_{16}H_{11}N_3O_6$ 3-Isoquinolinecarboxylic acid, 1,2-dihydro-1-keto-2-(*p*-nitroanilino)-, 1803[3].
$C_{16}H_{11}N_3O_6S$ *p*-Nitrobenzenediazonium 2-naphthol-1-sulfonate, 1802[8].
$C_{16}H_{11}N_5O_2$ 4,5 - αβ - Naphthotriazoledione, 7 - amino - 2 - (*p*-aminophenyl)-, 2859[9].
$C_{16}H_{11}N_5O_3S$ Benzenesulfonyl azide, *p*-(2-hydroxy-1 naphthylazo)-, 1409[9].
$C_{16}H_{11}N_5O_7$ 3 - Indoleacetonitrile, picrate, 759[1].
$C_{16}H_{12}$ Naphthalene, 1-phenyl-, 1401[4].
$C_{16}H_{12}AsNO_5$ Cinchophen, 6-arsono-, 397[2].
$C_{16}H_{12}BrClO_3$ Propionic acid, bromo(chlorobenzoyl)phenyl-, 3168[6].
$C_{16}H_{12}BrN$ Lepidine, 6-bromo 2-phenyl-, 418[9].
$C_{16}H_{12}BrNO_2S$ Quinaldine, 3-(*p*-bromophenylsulfonyl), 1626[4].
$C_{16}H_{12}Br_2$ Anthracene, 9,10-bis(bromomethyl)-, 3003[8].
$C_{16}H_{12}Br_2OS$ Thioflavanone, 3,3-dibromo 6-methyl, 197[7], 198[4].
Thioflavone, 6 methyl-, dibromide, 197[7].
$C_{16}H_{12}Br_2O_3S$ Thioflavanone, dibromo-6-methyl-, *S*-dioxide, 199[1, 8].
$C_{16}H_{12}Br_2O_4$ Propionic acid, α,β-dibromo-β-*p*-phenoxybenzoyl-, 593[4].
$C_{16}H_{12}Br_4OS$ Thioflavanone, 3,3-dibromo-6 methyl, tetrabromide, 198[7].
$C_{16}H_{12}ClN$ Lepidine, 6(and 8)-chloro-2-phenyl, 418[3, 9]
$C_{16}H_{12}ClNO$ Propionitrile, chlorobenzoylphenyl, 3168[4].
$C_{16}H_{12}ClNO_2S$ Quinaldine, 3-(*p*-chlorophenyl sulfonyl), 1626[5].
$C_{16}H_{12}ClN_5O_7$ Imidazole. 5-chloro-2-methyl 1-phenyl-, picrate, 1624[2].
$C_{16}H_{12}Cl_2O_2$ Anthrone, dichloroethoxy-, 755[4], 2492[8].
$C_{16}H_{12}IN$ Lepidine, 6-iodo-2-phenyl-, 418[9].
$C_{16}H_{12}KNO$ Quinolinol, 4-methyl-2-phenyl, K deriv., 418[6, 7].
$C_{16}H_{12}NNaO$ Quinolinol, 4-methyl-2-phenyl-, Na deriv., 418[6, 7].
$C_{16}H_{12}N_2$ α,α'-Bi-*o*-tolunitrile, 1230[9].
Quinoline, 4 methyleneamino - 2 - phenyl-, 3011[1].
$C_{16}H_{12}N_2O$ Cinchoninaldehyde, 2-phenyl-, oxime, 2857[4].
2-Naphthol, 1,4 - dihydro-1 imino-4-phenylimino-, 2159[6].
Propiolic acid, phenyl-, benzalhydrazide, 2157[2].
Quinoline, 4 formamido-2-phenyl-, 3010[9].
$C_{16}H_{12}N_2OS_2$ Rhodanine, 5-(anilinomethylene)-3-phenyl-, 600[6].
$C_{16}H_{12}N_2O_2$ Cinchophen, 6-amino-, 397[1].
s-Maleimide, anilino-*N*-phenyl-, 1789[4].
2 Naphthol, 1 - (*p*-hydroxyphenylazo)-, 1393[7].
4 - Pyrazolecarboxylic acid, diphenyl-, 2495[4, 8].
5 - Pyrimidinecarboxylic acid, 4-methyl-2-(2-naphthyl)-, 206[9].
$C_{16}H_{12}N_2O_4$ Isatide, 3455[9].
Melilotonitrile, *p*-nitrobenzoate, 3291[6].

Naphthalic acid, cyclic diacetylhydrazide, 1075[3].
2,8-Phenazinediol, diacetate, 603[6].
$C_{16}H_{12}N_2O_5S$ Cinnamonitrile, 3(and 5)-hydroxy-4(and 2)-nitro-α-p-tolylsulfonyl-, 402[7].
$C_{16}H_{12}N_2O_6S$ Cinnamonitrile, α-(o-anisylsulfonyl)-3-hydroxy-4-nitro-, 402[7].
$C_{16}H_{12}N_2S_2$ p-Tolunitrile, α,α'-dithiobis-, 905[3].
$C_{16}H_{12}N_4O_4$ 4(3) - Quinazolone, 3-acetamido-2-(m-nitrophenyl)-, 206[8].
$C_{16}H_{12}N_4O_6$ Indole, 2,3-dimethyl-1-picryl, 598[5].
$C_{16}H_{12}N_4O_8$ Guaiacol, trinitro-, quinoline salt, 1395[1], 3449[9].
Quinoline, 3 methoxypicrate, 1394[9]
$C_{16}H_{12}N_4O_9$ 3-Indoleacetic acid, picrate, 759[2].
$C_{16}H_{12}N_6O_8$ 1 - Pyrazolecarboxamide, 3 phenyl, picrate, 760[6].
$C_{16}H_{12}N_6O_9$ Imidazole, 1 methyl 2-(p-nitrophenyl)-, picrate, 395[4]
$C_{16}H_{12}OS$ 4-Thiochromanone, 3-benzal, 198[5].
$C_{16}H_{12}O_2$ Acrylophenone, β-hydroxy-, benzoate, 3006[1].
Anthraquinone, 1,3(and 1,4) dimethyl-, 2852[7].
$C_{16}H_{12}O_3$ Coumarin, 6-hydroxy-4-methyl-3 phenyl-, 595[8].
Flavone, 4'-methoxy-, 2162[8].
Isoflavone, 7 hydroxy-2-methyl-, 196[6].
Isoflavone, 7 methoxy, 196[8].
1,4 - α - Naphthopyrone, 3 acetyl-2 methyl-, 1237[2].
Umbelliferone, 4 benzyl, 196[7]
, 4 methyl 3-phenyl-, 595[6].
$C_{16}H_{12}O_3S$ Naphthalenesulfonic acid, phenyl (?), Na salt, 1401[6].
Thioflavone, 6 methyl, S dioxide, 199[2].
$C_{16}H_{12}O_4$ Acrylic acid, β p phenoxybenzoyl, 593[8].
1,10 - Anthracenedione, 9 ethoxy 4-hydroxy, 2853[8].
Coumarin, 7,8 dihydroxy-4 methyl 3 phenyl, 595[7]
9 - Fluorenecarboxylic acid, 9-hydroxy, acetate, 2675[8]
Isoflavone, dihydroxymethyl, 196[7], 197[2].
2 Xanthenecarboxylic acid, 9-keto-, Et ester, 392[3].
$C_{16}H_{12}O_5$ Anthraquinone, 1 hydroxy-2,7-dimethoxy-, 411[7]
1,7 - Benzodi - 1,4 - pyran 4,10-dione, 9 acetyl-2,8-dimethyl-, 1237[6].
$C_{16}H_{12}O_{12}S_4Se$ Selenophene, 2,4 diphenyl, tetrasulfo deriv., 592[5].
$C_{16}H_{12}Se$ Selenophene, 2,4-diphenyl, 592[4].
$C_{16}H_{13}Br$ Anthracene, 9 bromo 10-ethyl-, 3003[7].
$C_{16}H_{13}BrN_2$ Pyrazole, 4-bromo 5 methyl-1,3-diphenyl, 2495[1].
$C_{16}H_{13}BrN_2O_3S$ Quinoline, 2-amino 3-(p bromophenylsulfonyl)-8 methoxy-, 402[9].
$C_{16}H_{13}BrOS$ Thioflavanone, 3-bromo 6-methyl-, 198[4].
$C_{16}H_{13}BrO_3S$ Thioflavanone, 3 bromo-6-methyl-, S-dioxide, 198[2].
$C_{16}H_{13}BrO_5$ Propiophenone, β (2 bromo-4,5-methylenedioxyphenyl) - 2,4 - dihydroxy-, 2679[9].
$C_{16}H_{13}Br_2N_3O_7$ Hydroxylamine, β,β bis(2 bromo - 5 - nitrophenacyl), dioxime, 1230[3].
$C_{16}H_{13}Br_5$ Anthracene, 1,2,3,4,9 - pentabromo 10-ethyl-1,2,3,4-tetrahydro-, 3003[7].
$C_{16}H_{13}ClN_2O_3S$ Quinoline, 2-amino-3-(p-chlorophenylsulfonyl)-6-methoxy-, 402[8,9].
$C_{16}H_{13}ClO_3$ Propionic acid, (chlorobenzoyl)-phenyl-, 3168[6].
$C_{16}H_{13}ClO_4$ 7-Hydroxy - 2 - (p-hydroxyphenyl)-3-methoxybenzopyrylium chloride; and $FeCl_3$ compd., 3297[6].
Propionic acid, (chlorobenzoyl)hydroxy - phenyl-, 3168[3].
$C_{16}H_{13}ClO_5 + 0.25H_2O$ 2 - (3,4 - Dihydroxyphenyl) - 3,7 - dihydroxy - 5 - methylbenzopyrylium chloride, 3456[9].
$C_{16}H_{13}ClO_6$ 2 - (2,4 - Dihydroxyphenyl)-5,7-dihydroxy - 3 - methoxybenzopyrylium chloride, 3457[2].
5 - (or 7) - Hydroxy - 7(or 5) - methoxy-2-(3,4,5 - trihydroxyphenyl)benzopyrylium chloride, 3457[4].
Peonidin chloride, 3457[5].
$C_{16}H_{13}ClO_7 + 2H_2O$ 5,7-Dihydroxy-3-methoxy-2-(3,4,5 - trihydroxyphenyl)benzopyrylium chloride, 3457[4].
$C_{16}H_{13}Cl_3O_2$ Phenethyl alcohol, α-(trichloromethyl), benzoate, 1218[1].
$C_{16}H_{13}N$ Lepidine, 2-phenyl-, 1991[7].
Naphthalene, 1-phenyl-, amino deriv., and -HCl, 1401[5].
$C_{16}H_{13}NO$ 2-Naphthol, 1-anilino, 190[9].
Oxindole, benzalmethyl-, 3456[2].
p Propiolotoluide, 2157[4].
Quinolinol, 4 methyl 2-phenyl-, 418[6]; and salts, 418[6,7].
$C_{16}H_{13}NOS$ 6 Quinolinol, 5-(p-tolylmercapto)-, 3289[7].
2(1) Quinolone, 3-(benzylmercapto)-, 1627[4].
$C_{16}H_{13}NO_2$ Compd. from 2-(β bromoethyl)-3-hydroxy 3 - phenylphthalimidine, m. 148[9], 1408[3].
Formanilide, p-(β-benzoylvinyl)-, and salts, 2156[3].
$C_{16}H_{13}NO_2S$ Quinaldine, 3-(phenylsulfonyl)-, 1626[1].
$C_{16}H_{13}NO_3$ Benzoic acid, m-cinnamylamino-, 398[1].
2 - Furancarbinol, 1-naphthalenecarbamate, 1232[9].
$C_{16}H_{13}NO_3S$ Carbostyril, 3-p-tolylsulfonyl-, 1626[8].
$C_{16}H_{13}NO_4S$ 2 - Naphthol- ? - sulfonic acid, 1-anilino, 191[3], 2308[3].
$C_{16}H_{13}NO_6$ Benzoin, 4'-nitro-, acetate, 327[1].
$C_{16}H_{13}N_3$ Pyrrole, 1(and 2)-phenylphenylazo-, 1078[6,7].
s Triazine, 2-methyl-4,6-diphenyl-, 207[9].
$C_{16}H_{13}N_3O$ Cinchophen, hydrazide, and -HCl, 3010[8].
$C_{16}H_{13}N_3O_2$ Coumarin. 3-phenyl-, semicarbazone, 3291[7].
1(2) - Phthalazone, 2-(p-acetamidophenyl)-, 1803[2].
Pyrazole, 3(or 5)-methyl-1-(p-nitrophenyl)-5(or 3)-phenyl-, 2856[8].
Pyrimidinedione, dihydroiminodiphenyl-, 3164[4].
4(3) - Quinazolone, 3-acetamido-2-phenyl-, 206[7].
- , 3-benzamido-2-methyl-, 206[8].
$C_{16}H_{13}N_3O_3$ 2-Phenazinol, acetamido-, acetate, 603[6,7,8].
$C_{16}H_{13}N_3O_5$ 1 - Phthalazineacetic acid, 2,4-dihydro - 4 - hydroxy - 2 - (p-nitrophenyl)-, and salts, 1803[1].
$C_{16}H_{13}N_3O_6$ Pyruvic acid, (o-carboxyphenyl)-, (p-nitrophenyl)hydrazide, 1803[3].
Quinonimine, N - (2-acetamido-4-nitrophenyl)-2-hydroxy-, acetate, 603[8].

$C_{16}H_{13}N_3O_7S$ 1 - Phthalazineacetic acid, 2,4-dihydro - 2 - (*p*-nitrophenyl)-4-sulfo-, *Na salt*, 1802^{9}.
$C_{16}H_{13}N_3O_8$ Dipiperonylamine, 6,6′-dinitro-, 2326^{1}.
$C_{16}H_{13}N_5O_7$ Imidazole, 1-methyl-2-phenyl-, picrate, 395^{7}.
Pyrazole, 3(or 5)-methyl-5(or 3)-phenyl-, 2855^{8}.
$C_{16}H_{13}N_5O_9$ 2-Indazolepropionic acid (?), picrate, 1622^{7}.
1 - Isoindazolepropionic acid (?), picrate, 1622^{7}.
$C_{16}H_{13}N_7O_8$ 4(or 5)-Imidazolecarboxanilide, 2′-amino-, picrate, 395^{1}.
$C_{16}H_{14}$ Anthracene, dimethyl-, 2853^{3}, 3003^{5}.
Naphthalene, 1,2-dihydro-4-phenyl-, 1401^{6}.
$C_{16}H_{14}As_2I_2N_2O_4$ Acetanilide, 5,5′ - arsenobis[2-hydroxy-3-iodo-, 1607^{4}, 3289^{2}.
$C_{16}H_{14}BrIN_2O_2S$ 2 - Amino-3-(*p*-bromophenyl sulfonyl) - 1 - methylquinolinium iodide, 1626^{8}.
$C_{16}H_{14}BrNO_3$ Phthalimidine, 2-(*β*-bromoethyl)-3-hydroxy-3-phenyl-, 1408^{2}.
$C_{16}H_{14}BrN_3S$ 2(3) - Thiazolone, 4-phenyl-3-*o*-tolyl-, hydrazone, Br deriv., 416^{4}.
$C_{16}H_{14}Br_2O$ Benzophenone, 3,5-dibromo-2′,4′,-6′-trimethyl-, 1736^{7}.
$C_{16}H_{14}Br_2O_6$ Diphenoquinone, 2,2′-dibromo-3,5,3′,5′-tetramethoxy-, 1225^{4}.
$C_{16}H_{14}ClNO_4$ Propionic acid, (chlorobenzoyl) hydroxyphenyl-, oxime, *and salts*, 3168^{3}.
$C_{16}H_{14}Cl_2O_6$ Diphenoquinone, 2,2′-dichloro-3,5,3′,5′-tetramethoxy-, 3695^{1}.
$C_{16}H_{14}FeO_6$ *o*-Vanillin, Fe deriv., 399^{5}.
$C_{16}H_{14}NO_2$ Methyl, di-*p*-anisylcyano-, 1402^{5}.
$C_{16}H_{14}N_2$ 1,4-Naphthylenediamine, 5-phenyl-, 1401^{6}.
Pyrazole, methyldiphenyl-, 2494^{7}.
—, 1-phenyl-5-*p*-tolyl-, 1590^{8}.
Quinoline, 4-(aminomethyl) - 2 - phenyl-, *and salts*, 204^{9}, 205^{1}.
$C_{16}H_{14}N_2O$ Benzamide, *N*-*o*-(cyanomethyl)-benzyl-, 392^{1}.
Indazole, 2 acetyl-3-*p*-tolyl-, 2496^{6}.
Pyrazole, 5-*p*-anisyl 1-phenyl-, 1590^{9}.
$C_{16}H_{14}N_2OS$ 1 - Thionaphthenealdehyde, 2-hydroxy - 4 - methyl-, phenylhydrazone, 203^{1}.
$C_{16}H_{14}N_2O_2$ *β*-Butenanilide, *α*-keto-*γ*-phenyl-, oxime, 360^{4}.
Hydrocinnamaldehyde, *α*,*β* - diketo *p*-methyl-, *α*-phenylhydrazone, 1590^{8}.
Indazole, 2-acetyl-3-*p*-anisyl-, 2496^{7}.
3-Indazolol, 2-*p*-tolyl-, acetate, 2496^{6}.
Phthalimidine, 2-(*p* - acetamidophenyl)-, 1803^{2}.
$C_{16}H_{14}N_2O_2S$ Dibenzothiophene, 2,7-di-acetamido-, 2155^{4}.
Quinoline, 2-amino-3-*p*-tolylsulfonyl, 1626^{7}.
$C_{16}H_{14}N_2O_3$ Hydrocinnamaldehyde, *α*,*β*-diketo-*p*-methoxy-, *α*-phenylhydrazone, 1590^{9}.
2 - Imidazolecarboxylic acid, 2,3,4,5-tetra-hydro-4-keto-2,5-diphenyl-, 2152^{9}.
3-Indazolol, 2-*p*-anisyl-, acetate, 2496^{7}.
$C_{16}H_{14}N_2O_3S$ Dibenzothiophenene, 2,7-di-acetamido-, *S*-dioxide, 2155^{4}.
Quinoline, 2-amino-8-methoxy-3-(phenylsul-fonyl)-, 402^{9}.
$C_{16}H_{14}N_2O_7$ 1-Naphthaleneacetic acid, *α*-acetyl-2,4-dinitro-, Et ester, 2325^{3}.
1-Propanol, 3-(2,4-dinitrophenoxy)-, benzo-ate, 740^{1}.

$C_{16}H_{20}O_4$ Cyclohexaneacetic acid, α hydroxy-, Me ester, benzoate, 378[5]
Cyclohexanecarbinol, α-methyl, acid phthalate, 3287[1]
$C_{16}H_{20}O_5$ Caprophenone, 2,4-dihydroxy-, diacetate, 2995[8]
Taxic acid, 767[5].
$C_{16}H_{20}O_8$ 1,2 Propanediol, 1-(2,3-dimethoxy-4,5 methylenedioxyphenyl), diacetate, 3450[1]
$C_{16}H_{21}NO_2$ Cyclopentanecarboxamide, 3-benzoyl-1,2,2 trimethyl, 2158[3].
$C_{16}H_{21}NO_3$ (See also *Homatropine*.)
Camphoranilic acid, 1800[7]
Ketone, 4 - hydroxy-1,4-dimethyl 3-piperidyl methyl, benzoate, *HCl*, 1809[4, 5].
$C_{16}H_{21}NO_3S$ Trimethylphenylammonium p-toluenesulfonate, 1795[4].
$C_{16}H_{21}NO_4$ Nipecotic acid, 4 hydroxy-1,4-dimethyl, Me ester, benzoate, *and derivs*, 1810[4, 5]
$C_{16}H_{21}NO_6$ Glutamic acid, N-benzoyl-, di-Et ester, 1991[4]
$C_{16}H_{21}N_3O$ Butyrophenone, cyclopentenyl-, semicarbazone, 3447[7].
Propiophenone, cyclohexenyl-, semicarbazone, 3447[5].
$C_{16}H_{22}$ Naphthalene, decahydrophenyl-, 1402[2].
$C_{16}H_{22}Br_6N_2$ 2,4 Lutidine, -HBr, $C_2H_2Br_4$ ....
$C_{16}H_{22}N_2O_4$ Nipecotic acid, 4-hydroxy-1-methyl-, Et ester, p-aminobenzoate, *di-HCl*, 3010[8]
$C_{16}H_{22}N_2O_6$ Glycine, N-(β-carbomethoxy-aminobutyryl)-N-phenyl-, Et ester, 44[4].
$C_{16}H_{22}N_4O_5S$ 1,2,3-Triazole - 4 - carboxylic acid, 5 hydroxy-1-p-tolylsulfonyl-, Me ester, piperidine deriv., 1408[8].
$C_{16}H_{22}O_4$ Resorcinol, 4-hexyl-, diacetate, 2995[9].
$C_{16}H_{22}O_5S$ Cyclohexaneacetic acid, α-hydroxy, Me ester, p-toluenesulfonate, 378[5].

$C_{16}H_{22}O_8S$ Glucose, 3(and 6)-*p*-toluenesulfonylmonoacetone-, and isomer, 2984[9], 2985[6].
$C_{16}H_{22}O_{11}$ *d*-Glucose, pentaacetate, 2987[4].
$C_{16}H_{23}NO$ Cyclooctanemethylamine, *N*-benzoyl-, 2151[1].
$C_{16}H_{23}NO_2$ 1-Butanol, 3-(1-piperidyl)-, benzoate, -*HCl*, 1788[7].
$C_{16}H_{23}NO_3$ Di-Ac deriv., m. 104–6°, of base from condensation product of PhNHOH and acetone, 2837[8].
$C_{16}H_{23}NO_4S$ 4 - Piperidinecarboxylic acid, 4-hydroxy - 2,2,6,6-tetramethyl-, Me ester, 2-thiophenecarboxylate, *and salts*, 2854[7].
$C_{16}H_{23}NO_5$ Carbanilic acid, *o*-carboisobutoxyoxy-, Bu ester, 2320[1].
—, *o*-carbobutoxyoxy-, isobutyl ester, 2320[1].
$C_{16}H_{23}NO_6$ Pyroxonine, 765[4].
$C_{16}H_{24}AsNO_5$ Benzenearsonic acid, 3-valeryl-4-valerylamino-, 1605[9].
$C_{16}H_{24}BrNO$ 1 - [*β*-Keto-*β*-(1,2,2,3-tetramethylcyclopentyl)ethyl]pyridinium bromide, 1399[4].
$C_{16}H_{24}Br_4Fe_4O_{16}$ + $3H_2O$, 2127[8].
$C_{16}H_{24}ClNO_2$ Apothesine, 240[7].
$C_{16}H_{24}N_2O$ Benzamide, *N*-*δ*-1-piperidylbutyl, 417[7].
Cyclopentanemethylamine, 1,2,2,3 - tetramethyl - *N* - nitroso-*N*-phenyl, 1399[1].
$C_{16}H_{24}N_2O_4S$ Leucine, *N*-(*N*-tolylsulfonylalanyl)-, 3298[6]
$C_{16}H_{24}N_2S_2$ Valeramide, *N*, *N'*-*p*-phenylenebis[thio-, 364[1].
$C_{16}H_{24}N_4O_8$ 3-Hexanone, 1-diethylamino-, picrate, 1217[3].
$C_{16}H_{24}N_4O_9$ Leucine, Bu and isobutyl esters, picrates, 1055[3].
$C_{16}H_{24}O$ Δ^2-2-Decenol, 2-phenyl-, 1602[3].
$C_{16}H_{24}O_2$ 7 - *p* - Cymenecarboxylic acid, isoamyl ester, 2488[6].
$C_{16}H_{24}O_3$ Anisic acid, *α*-methylheptyl ester, 3451[2].
Benzoic acid, methoxy-, *α*-methylheptyl ester, 3451[1,2].
Capriphenone, 2,4-dihydroxy-, 2320[2].
$C_{16}H_{24}O_8$ 1,2,2,3 - Cyclobutanetetracarboxylic acid, tetra-Et ester, 48[9].
$C_{16}H_{24}O_{10}$ Mannoside, tetraacetylethyl-, 1790[4].
$C_{16}H_{25}AsN_2O_7$ Carbamic acid, *N*, *N'*-(*p*-arsono-*o*-phenylene)bis-, di-Bu ester, 1605[9].
$C_{16}H_{25}N$ Cyclopentanemethylamine, 1,2,2,3-tetramethyl-*N*-phenyl-, -*HCl*, 1399[1].
Piperidine, 1 - (*α*-ethyl-*α*-methylphenethyl)-, *and chloroplatinate*, 1053[3].
$C_{16}H_{25}NO_2$ Pelargonamide, *N*-*p*-hydroxybenzyl-, 404[9].
Triethylamine, *β*-(6-allyl-*o*-anisyloxy), P 2392[7].
$C_{16}H_{25}NO_3$ Alanine, *N*-(camphorylidenemethyl)-, Et ester, 1593[2].
Butyraldehyde, *β* - (*N* - methylbenzamido)-, di-Et acetal, 1788[5].
Pelargonamide, *N* - 3,4 - dihydroxybenzyl-, 404[9].
p-Toluic acid, *α*-ethoxy-, *β*-diethylaminoethyl ester, *and* -*HCl*, 378[9].
$C_{16}H_{25}NO_4$ Dinicotinic acid, 4-ethyl-1,4-dihydro - 1,2,6 - trimethyl-, di-Et ester, 3296[5].
$C_{16}H_{26}IN$ (2 - Benzylcyclohexyl)trimethylammonium iodide, 2665[7,8].
$C_{16}H_{26}N_2O_2$ Benzoic acid, *p*-amino-, *γ*-diisopropylaminopropyl ester, -*HCl*, 1852[8].
$C_{16}H_{26}N_2O_6$ Gluconic acid, tetramethyl-, phenylhydrazide, 1060[3,4].
$C_{16}H_{26}N_4O_7$ Butylamine, *N*, *N*-diethyl-*α*,*α*-dimethyl-, picrate, 3280[4].
$C_{16}H_{26}N_6O_7$ *α*,*α*,*β* - Triethyl - *β*,*γ*,*γ* - trimethylguanidinium picrate, 374[9].
$C_{16}H_{26}O_2$ Caryophyllene, formate, 187[2].
Resorcinol, 4-decyl-, 2320[3].
$C_{16}H_{26}O_3$ Camphor, 3-(hydroxymethyl)-, valerate, 1228[1].
$C_{16}H_{27}ClN_2O_2$ See *Alypine.*
$C_{16}H_{27}N$ Aniline, *N*-amyl-*N*-isoamyl-, 2991[2].
$C_{16}H_{27}NO$ Propylamine, *γ*-isoamoxy-*N*, *N*-dimethyl-*γ*-phenyl-, *and* -*HCl*, 1604[9].
Triethylamine, *β*-(*α* - propoxybenzyl)-, -*HCl*, 1604[9].
Tripropylamine, *γ*-methoxy-*γ*-phenyl-, 1604[9].
$C_{16}H_{27}N_3O$ Semicarbazone, m. 234°, of ketone from caryophyllene, 1073[3].
Semicarbazone of ketone from cedrene, 1073[3].
$C_{16}H_{28}Cl_6N_2PtS_2$ Trimethyl - 2 - thienylmethylammonium chloroplatinate, 390[6].
$C_{16}H_{28}O_2$ Hydnocarpic acid, 172[2].
$C_{16}H_{28}O_3$ 1-Propanone, 3-hydroxy-1-(1,2,2,3-tetramethylcyclopentyl)-, butyrate, 1399[7].
$C_{16}H_{28}O_4$ Malonic acid, cyclohexylpropyl-, diethyl ester, 3160[2].
$C_{16}H_{28}O_5$ Thapsic acid, 7-keto-, 1791[8].
$C_{16}H_{28}O_6$ Pimelic acid, *β*-carboxymethyl-*β*-methyl-, tri-Et ester, 172[6].
$C_{16}H_{29}Br$ Hendecane, bromocyclopentenyl-, 3160[5].
$C_{16}H_{29}IN_2$ 2 - Diisoamylamino - 1 - methylpyridinium iodide, 3009[2].
$C_{16}H_{29}NO$ *ι*-Undecylenic acid, piperidide, 2845[1].
$C_{16}H_{30}Cl_2N_{12}Pt_2$ + nH_2O, 2626[3]
$C_{16}H_{30}O$ Cyclohexadecanone, 1792[5], 2151[6]
Hydnocarpyl alcohol, 3160[5].
$C_{16}H_{30}O_2$ Cyclohexanecapric acid, 3160[5].
2,4-Hexadecanedione, 738[9].
Hydnocarpic acid, dihydro-, 1598[8].
Δ^2-Hypogeic acid, 2819[9].
Palmitoleic acid, 3280[9].
$C_{16}H_{30}O_3$ Cyclohexanecapric acid, hydroxy-, 3160[5].
Cyclohexanepelargonic acid, hydroxy-, methyl ester, 3160[5].
Hydnocarpic acid, dihydro-*ι*-hydroxy-, 1599[1].
Myristic acid, *β*-keto-, Et ester, 2660[7].
$C_{16}H_{30}O_4$ 1,10-Decanedicarboxylic acid, di-Et ester, 1789[2].
Dibasic acid, m. 53–8°, from muscone, *and Ag salt*, 2834[3].
1,12-Dodecanedicarboxylic acid, di-Me ester, 1789[3].
1,12-Dodecanediol, diacetate, 1789[4].
Thapsic acid, 1789[3].
$C_{16}H_{31}NO$ Hydnocarpamide, dihydro-, 1599[1].
Undecylic acid, piperidide, 2845[1].
$C_{16}H_{31}N_3O$ Cyclopentadecanone, semicarbazone, 1792[6].
$C_{16}H_{32}$ Hexadecene, 3685[1].
$C_{16}H_{32}Br_2$ Hexadecane, 1,16-dibromo-, 1789[2].
$C_{16}H_{32}N_2S$ Piperidine, *γ*,*γ'*-thiobis[1-propyl-, 362[9].
$C_{16}H_{32}O$ Muscol, 2834[3].
$C_{16}H_{32}O_2$ See *Palmitic acid.*
$C_{16}H_{32}O_3$ Jalapinolic acid, 366[1].
$C_{16}H_{34}$ Hexadecane, 3685[1].
$C_{16}H_{34}O$ (See also *Cetyl alcohol.*)
Ether, bis(*α*-methylheptyl), 361[9].
$C_{16}H_{34}O_2$ 5,6-Dodecanediol, 5-butyl-, 1786[8].
1,16-Hexadecanediol, 1789[1].

Tetradecane, 1,14-dimethoxy-, 1789[4].
$C_{16}H_{36}IN$ Tetrabutylammonium iodide, 3688[6].
$C_{16}H_{36}NOS$ Ethylamine, β,β′-sulfinylbis[N, N-dipropyl-, *di-HCl*, 40[3].
$C_{16}H_{36}N_2O_2S$ Ethylamine, β,β′-sulfonylbis[N, N-dipropyl-, *and di-HCl*, 40[3].
$C_{16}H_{36}N_2S$ Ethylamine, β,β′-thiobis[N, N-dipropyl-, *and di-HCl*, 40[2].
$C_{16}H_{36}Pb$ Plumbane, butyltriisobutyl-, 1589[9].
—, tetrabutyl-, 1589[8].
$C_{16}H_{37}NO$ Tetrabutylammonium hydroxide, 3747[4].
$C_{17}H_9Cl_3O_5$ 1-Xanthenecarboxylic acid, 2,3,4-trichloro-9,9-dihydroxy-5-methyl-, lactone, acetate, 1231[8].
$C_{17}H_{10}Br_3NO_2$ 1-Naphthalenecarbamic acid, 2,4,6-tribromophenyl ester, 2319[4].
$C_{17}H_{10}N_6S$ Triazolindole, 2,2′-thiocarbonylbis-, 1810[9].
$C_{17}H_{10}O$ Benzanthrone, P 316[7], 1402[7], P 3171[5].
$C_{17}H_{10}O_3$ 7-*meso* Benzanthrenone, 5,6(or 8,9)-dihydroxy-, 411[6].
1,2′-Spirobiindan-3,1′,3′ trione, 185[8].
$C_{17}H_{11}BrO_2$ 1,2-Pyrone, 3-bromo-4,6-diphenyl-, 1069[8].
$C_{17}H_{11}Br_3Se$ Compd., m. 139.8°, from tribromo-2,4-diphenylselenophene and MeI, 592[5].
$C_{17}H_{11}ClN_2O_6S$ Cinnamonitrile, α-(p-chlorophenylsulfonyl)-5-hydroxy-2-nitro-, acetate, 402[8].
$C_{17}H_{11}ClN_4O_7$ 4-Chloro-1-phenylpyridinium picrate, 586[6].
$C_{17}H_{11}ClOS$ 1,4-Thiopyrone, 3-chloro-2,6-diphenyl-, *and -HCl*, 199[9], 200[7].
$C_{17}H_{11}ClO_3S$ 1,4-Thiopyrone, 3-chloro-2,6-diphenyl-, S-dioxide, 200[2].
$C_{17}H_{11}ClS_2$ 1,4-Thiopyrone, 3-chloro-2,6-diphenyl-4-thio-, 200[5].
$C_{17}H_{11}HgNSe$ Selenophene, 2-(cyanomercuri)-3,5-diphenyl-, 592[5].
$C_{17}H_{11}KO_2$ Ketone, 3-hydroxy-2-naphthyl phenyl, K deriv., 910[9].
$C_{17}H_{11}NO_2$ 3,7-*peri*-Naphthoquinoline-2(3),7-dione, 4-methyl-, 398[2].
$C_{17}H_{11}NO_3$ 3,7-*peri*-Naphthoquinoline-2(3),7-dione, 4-methoxy-, 398[2].
Picolinic acid, [1(and 2)-naphthoyl]-, *and -HCl*, 764[7].
$C_{17}H_{11}N_3OS$ Benzothiazole, 1-(hydroxynaphthylazo)-, 2858[2].
$C_{17}H_{11}N_5O_9$ 1-(p-Nitrophenyl)pyridinium picrate, 586[2].
$C_{17}H_{11}N_5O_{10}$ 4(1)-Pyridone, 1-[m(and p)-nitrophenyl]-, picrate, 586[4,5].
$C_{17}H_{12}BrNO_2$ 1-Naphthalenecarbamic acid, bromophenyl ester, 2319[4].
$C_{17}H_{12}Br_2OS$ 1,4-Thiopyrone, 2,6-diphenyl-, dibromide, 199[9].
$C_{17}H_{12}Br_2O_2$ 1,4-Pyrone, 2,6-diphenyl-, dibromide, 200[4].
$C_{17}H_{12}ClNO_2$ 1-Naphthalenecarbamic acid, chlorophenyl ester, 2319[4].
$C_{17}H_{12}ClNO_2S$ 1,4-Thiopyrone, 3-chloro-2,6-diphenyl-, S-dioxide, oxime, 200[3].
$C_{17}H_{12}N_2O_2$ $\Delta^{2,3'}$-Bi[indole]-2′,3-dione, methyl-, 3456[2].
Isoindigotin, methyl-, 3456[9].
4-Pyrazolecarboxylic acid, 5-methyl-1-phenyl-3-salicyl-, lactone, 599[7].
$C_{17}H_{12}N_2O_3$ 1-Naphthoic acid, 3-hydroxy-4-phenylazo-, *and Na salt*, 1233[9].
$C_{17}H_{12}N_2O_4$ 1-Naphthalenecarbamic acid, nitrophenyl ester, 2319[4].
$C_{17}H_{12}N_2O_4S$ 2-Thiophenecarboxylic acid, 4-(2-hydroxy-1-naphthylazo)-, acetate, 2854[9].
$C_{17}H_{12}N_2O_5S$ Isoindigotinsulfonic acid, methyl-, *and salts*, 3456[1].
$C_{17}H_{12}N_2S_2$ Quinrhodine, 3-benzyl-, 1627[5].
Thiazoloquinoline, 2-(benzylmercapto)-, 1627[1].
$C_{17}H_{12}N_4O_8$ 4(1)-Pyridone, 1-phenyl-, picrate, 586[4].
$C_{17}H_{12}N_6O_2S$ Isatin, 3,3′-thiocarbohydrazone, 1810[8].
$C_{17}H_{12}OS$ 1,2-Pyrone, 4,6-diphenyl-2-thio-, 1069[7].
1,4-Thiopyrone, 2,6-diphenyl-, *and -HCl*, 199[5], 200[1].
$C_{17}H_{12}O_2$ Benzoic acid, 2-naphthyl ester, 2720[3].
Ketone, 3-hydroxy-2-naphthyl phenyl, 910[9].
1,2-Pyrone, 4,6-diphenyl-, 1069[1,7].
$C_{17}H_{12}O_3$ 1,2,4-Cyclopentanetrione, 3,5-diphenyl-, 207[8].
2,7-Naphthalenediol, benzoate, 911[1].
$C_{17}H_{12}O_3S$ Thiochromone, 3-hydroxy-6-methyl-, benzoate, 199[4].
1,4-Thiopyrone, 2,6-diphenyl-, S-dioxide, 199[5].
$C_{17}H_{12}O_4$ Chromone, 3,7-dihydroxy-2-styryl-, 196[2].
$C_{17}H_{12}O_5$ Chromone, 3,5,7-trihydroxy-2-styryl-, 196[3].
Furoin, benzoate, 1615[6].
$C_{17}H_{12}S_2$ 1,4-Thiopyrone, 2,6-diphenyl-4-thio-, 200[5].
$C_{17}H_{13}BO_7$ Xanthone, 1-hydroxy-, boroacetate, 1052[9].
$C_{17}H_{13}BrN_2$ 2-Naphthaldehyde, 5-bromo-, phenylhydrazone, 1216[5].
$C_{17}H_{13}BrOS$ Thiochromone, 3-(α-bromobenzyl)-6-methyl-, 203[6].
$C_{17}H_{13}BrO_2$ 9-Anthracenecarbinol, 10-bromo-, acetate, 3003[7].
$C_{17}H_{13}Br_3$ Anthracene, 2,3,9-tribromo-10-isopropyl-, 3003[8].
$C_{17}H_{13}Br_4NO_3$ Valerophenone, α,β,γ,δ-tetrabromo-m-nitro-δ-phenyl-, 749[7].
$C_{17}H_{13}ClO$ 3-Pentadienone, 1(or 2)-chloro-1,5-diphenyl-, 2996[9].
$C_{17}H_{13}N$ Paraberine, 1083[7].
$C_{17}H_{13}NO$ 1,2-β-Indenoindole, 5-acetyl-5,10-dihydro-, 1620[1].
2(1)-Naphthalenone, 1-p-tolylimino-, 191[3].
$C_{17}H_{13}NOS$ 1,4-Thiopyrone, 2,6-diphenyl-, oxime, 200[7].
$C_{17}H_{13}NOS_2$ 4(5)-Thiazolone, 5-benzal-2-(benzylmercapto)-, 600[6].
$C_{17}H_{13}NO_2$ Benzamide, N-(8-hydroxy-1-naphthyl)-, 1073[6].
Cinchophen, 6-methyl-, *and salts*, P 424[6].
1-Naphthalenecarbamic acid, Ph ester, 2319[4].
2(1)-Naphthalenone, 1-(o-anisylimino)-, 191[1].
1-Naphthanilide, 3-hydroxy-, 1233[4].
Quinolinecarboxylic acid, 4-methyl-2-phenyl-, 418[9].
$C_{17}H_{13}NO_3$ Cincophen, 3-methoxy-, 205[1].
2-Indanglyoxylanilide, 1-keto-, 1077[7].
$\Delta^{2,4}$-1-Pentadienone, 1-(m-nitrophenyl)-5-phenyl-, 749[7,9], 750[1].
$C_{17}H_{13}NO_3S$ 1,4-Thiopyrone, 2,6-diphenyl-, S-dioxide, oxime, 200[3].
$C_{17}H_{13}NO_5$ Δ^2-5,5-Isoxazolinedicarboxylic acid, 3,4-diphenyl-, 2327[4].
$C_{17}H_{13}NO_6$ Δ^2-5,5-Isoxazolinedicarboxylic acid, 2327[2].

$C_{17}H_{13}N_3O_2$ 4(1)-Pyridone, 1-[p-(p-hydroxyphenyl)phenylazo]-, 585[2], 586[5].
$C_{17}H_{13}N_3O_4$ Naphthylamine, dinitrotolyl-, 3448[4].
4-Pyrazolecarboxylic acid, 5-methyl-3-(nitrophenyl)-1-phenyl-, 599[7].
$C_{17}H_{13}N_3O_5$ 3-Isoindazolecarboxylic acid, 1-(o-nitrobenzoyl)-, Et ester, 2496[8].
$C_{17}H_{13}N_3O_6$ Phthalide, 4-formyl-2-hydroxy-(?), p-nitrophenylhydrazone, acetate, 184[5].
$C_{17}H_{13}N_5O_7$ 3-Indolepropionitrile, picrate, 759[2]
$C_{17}H_{14}AlNO_4$ + H_2O, 717[7]
$C_{17}H_{14}BrNO$ 4(1)-Quinolone, 3-(α-bromobenzal)-2,3-dihydro-6-methyl-, 205[7]
$C_{17}H_{14}Br_2Cl_2O$ 3-Pentanone, 1,2-dibromo-4,5-dichloro-1,5-diphenyl-, 2996[9]
$C_{17}H_{14}Br_2OS$ 4-Thiochromanone, 3-bromo-3-(α-bromobenzyl)-6-methyl-, 203[6]
$C_{17}H_{14}Br_2O_3S$ 1,4-Thiopyrone, 3,5-dibromotetrahydro-2,6-diphenyl-, S-dioxide, 200[9]
$C_{17}H_{14}ClNO_3$ Oxazinol, (chlorophenyl)methoxyphenyl-, 3168[6].
$C_{17}H_{14}Cl_2O$ Δ^1-3-Pentenone, 4,5-dichloro-1,5-diphenyl-, 2996[8].
$C_{17}H_{14}Cl_2O_2$ 1,5-Pentanedione, 1,5-bis(p-chlorophenyl)-, 1229[9]
$C_{17}H_{14}N_2O$ Ketone, methyl 4-methyl-2-(2-naphthyl)-5-pyrimidyl, 206[5]
Pyrazole, 1-benzoyl-3(or 5)-methyl-5(or 3)-phenyl-, 2856[9]
Quinazolone, methyl-2-styryl-, 207[1,?]
Quinoline, 4-acetamido-2-phenyl-, 3011[3]
$C_{17}H_{14}N_2OS_2$ Rhodanine, 5-(anilinomethylene)-3-p-tolyl-, 600[7]
4(5)-Thiazolone, 5-(anilinomethylene)-2-(benzylmercapto)-, 600[7].
$C_{17}H_{14}N_2O_2$ Leucoisoindigotin, methyl-, 3455[9]
1-Naphthalenecarbamic acid, o-aminophenyl-, 2319[?].
Propiolic acid, phenyl-, anisalhydrazide, 2157[3].
4-Pyrazolecarboxylic acid, 5-methyl-1,3-diphenyl-, 599[7]
$C_{17}H_{14}N_2O_2S_2$ Rhodanine, 5-(p-anisylaminomethylene)-3-phenyl-, 600[8]
$C_{17}H_{14}N_2O_3$ Isatin, methyl-, 3455[9]
4-Pyrazolecarboxylic acid, 5-methyl-1-phenyl-3-salicyl-, 599[7]
5-Pyrimidinecarboxylic acid, 1,4-dihydro-4-keto-2-(2-naphthyl)-, Et ester, 206[6].
$C_{17}H_{14}N_2O_4$ Isatide, 5-methyl-, 3455[9]
$C_{17}H_{14}N_2O_5S$ Cinnamonitrile, 3-methoxy-2(and 4)-nitro-α-p-tolylsulfonyl-, 402[8,9].
*$C_{17}H_{14}N_2O_6S$ Cinnamonitrile, α-(o-anisylsulfonyl)-3-methoxy-2-nitro-, 402[9].
—, 3-hydroxy-4-nitro-α-(p-phenetylsulfonyl)-, 402[7]
$C_{17}H_{14}N_4O_3$ Indazole, 2-acetyl-5-methyl-7-(p-aminobenzalamino)-(?), 2497[6].
$C_{17}H_{14}N_4O_2S$ Piperonal, thiocarbohydrazone, 1811[?]
$C_{17}H_{14}N_4O_8$ 1-Methylquinolinium 3-methoxypicrate, 1394[9].
1-Methylquinolinium 4,5,6-trinitroguaiacolate, 1395[1].
$C_{17}H_{14}N_4O_8S$ Thiazole, 5-ethoxy-2-phenyl-, picrate, 2679[8].
$C_{17}H_{14}N_4O_9$ 3-Indolepropionic acid, picrate, 795[2].
$C_{17}H_{14}N_4O_6S$ 1,2,3-Triazole-4-carboxamide, 5-hydroxy-1-m-nitrobenzalamino-N-p-tolylsulfonyl-, 1409[7].
$C_{17}H_{14}N_6O_2S$ Pseudoisatin, thiocarbohydrazone, dioxime, 1810[9].
$C_{17}H_{14}O$ 1-*meso*-Benzanthren-7-ol, 2,3-dihydro-, 1403[8].
Ether, benzyl naphthyl, 391[6], 3695[4].
3-Pentadienone, 1,5-diphenyl-, 403[2], 2096[7]; *and salts*, 180[4], 2162[9].
$C_{17}H_{14}OS$ 1-Naphthol, 1-(p-tolylmercapto)-, 3289[7].
1,4-Thiopyrone, 2,3-dihydro-2,6-diphenyl-, 199[9]
$C_{17}H_{14}O_2$ 9-Anthrol, 10-methyl-, acetate, 2677[7].
Flavone, 3,6-dimethyl-, 1237
Isoflavone, 2,6-dimethyl-, 1237[8].
2-Naphthol, 7-benzyloxy-, 911[1].
$C_{17}H_{14}O_3$ Coumarin, methoxy-4-methyl-3-phenyl-, 595[6,7].
Isoflavone, 7-methoxy-2-methyl-, 196[?]
$C_{17}H_{14}O_3S$ 4-Thiochromanone, 3-benzal-6-methyl-, S-dioxide, 198[2].
$C_{17}H_{14}O_4$ Acrylic acid, β-p-phenoxybenzoyl-, Me ester, 593[3].
Anthrone, 4-hydroxy-3-methoxy-, acetate, 411[6]
4-Chromanone, 3-anisal-7-hydroxy-, 605[5]
Chromone, 3-benzyldihydroxy-2-methyl-, 197[1,?]
—, 3,7-dihydroxy-2-phenethyl-, 196[8]
Flavone, 5,7-dimethoxy-, 1996[9]
1-Isobenzofurancarboxylic acid, 1,2-dihydro-2-keto-1-phenyl-, Et ester, 1226[6]
$C_{17}H_{14}O_5$ Benzophenone, 2,3,4-trihydroxy-, 3,4-diacetate, 1052[9]
Chrysin, dimethoxy-, 195[9], 196[5].
$C_{17}H_{15}Br$ Anthracene, 9-bromo-10-isopropyl-, 3003[7]
$C_{17}H_{15}BrINO_2S$ 3-(p-Bromophenylsulfonyl)-1-methylquinaldinium iodide, 1626[?]
$C_{17}H_{15}BrN_2$ $\Delta^{1,3}$-Pentadienylamine, p-bromo-N-phenyl-ε-phenylimino-, *HBr*, 741[9]
$C_{17}H_{15}Br_5$ Anthracene, 1,2,3,4,9-pentabromo-1,2,3,4-tetrahydro-10-isopropyl-, 3003[8].
$C_{17}H_{15}ClN_2$ Pyrazole, 5-(o-chlorophenyl)-3-methyl-1-o-tolyl-(?), 762[3]

$C_{18}H_{12}CuN_2O_2$ 8-Quinolinol, Cu deriv., 399[?].
$C_{18}H_{12}FeN_2O_2$ 8-Quinolinol, Fe deriv., 399[?].
$C_{18}H_{12}K_2O_6Sn$ Potassium tripyrocatecholatostannate, 3404[?].
$C_{18}H_{12}K_3MnO_6$ + $3H_2O$, 717[6]
$C_{18}H_{12}MgN_2O_2$ 8-Quinolinol, Mg deriv., 399[?].
$C_{18}H_{12}MgO_6Sn$ Magnesium tripyrocatecholatostannate, 3404[?]
$C_{18}H_{12}N_2O$ Benzamide, N-(5-cyano-1-naphthyl)-, 1216[7].
$C_{18}H_{12}N_2O_2Zn$ 8-Quinolinol, Zn deriv., 399[?].
$C_{18}H_{12}N_2O_4$ Naphthalene, 2,4-dinitro-1-styryl-, 3001[8]
$C_{18}H_{12}N_2O_4S_2$ Benzene, m-bis(4-nitrophenylmercapto)-, 3163[?]
$C_{18}H_{12}N_2O_6$ Benzene, 1,5-dinitro-2,4-diphenoxy-, 2067[5].
$C_{18}H_{12}N_4O_6$ Triphenylamine, trinitro-, 2834[7].
$C_{18}H_{12}N_6$ Benzobitriazole, dihydrodiphenyl-, 2327[9], 2328[1].
$C_{18}H_{12}N_6O_4$ 3,3'-Bi[1,2,5-triazole]-4,4'-dicarboxylic acid, 1,1'-diphenyl-, *and Ba salt*, 2328[1].
$C_{18}H_{12}N_6O_6$ Diphenylamine, trinitrophenylazo-, 3239[1].
$C_{18}H_{12}N_6O_9S$ Benzenesulfonic acid, p-(p-2,4,6-trinitroanilinophenylazo)-, *Na salt*, 3239[1].
$C_{18}H_{12}N_6O_{11}$ Pyridine, 2(and 4)-(2,4-dinitrobenzyl)-, picrate, 204[4,6].
$C_{18}H_{12}O$ Compd., m. 115.5-6.5°, from C_6H_6, $AlCl_3$, and α-phenyl-1-naphthaleneacetyl chloride, 410[4].
$C_{18}H_{12}O_2$ Glyoxal, naphthylphenyl-, 1401[8].
2,2'-Spirobiindan-1,3-dione, 185[8].
Truxenediol, 3002[3,4].
$C_{18}H_{12}O_2S$ Diindeno[3,2,2',3']thiophene-10,11-diol, 10,11-dihydro-, 3002[4].
$C_{18}H_{12}O_2S_2$ $\Delta^{3,3'}$-Bi[thiochroman]-4,4'-dione, 203[3].
$C_{18}H_{12}O_3$ 7-*meso*-Benzanthrenone, hydroxymethoxy-, 411[6,7].
Fulgide, 6,7-diphenyl-, 1796[9].
2,3-β-Indenopyran-3,9(1,2)-dione, 1-phenyl-, 912[1].
$C_{18}H_{12}O_3S$ 2,6-p-Thioxanedione, 3,5-dibenzal-, 1796[9].
$C_{18}H_{12}O_4$ Naphthoic acid, 3-hydroxy-, benzoate, 910[3], 1233[4].
Quinone, 2,5-dihydroxy-3,6-diphenyl-, 1225[9]
$C_{18}H_{12}O_6$ Quinizarin, diacetate, 2853[8]
$C_{18}H_{12}O_6SnZn$ Zinc tripyrocatecholatostannate, 3404[2].
$C_{18}H_{12}O_7$ Tartaric anhydride, dibenzoate, 1789[4].
$C_{18}H_{13}BrO$ Ketone, α-bromobenzyl naphthyl, 1401[9], 1402[1]
$C_{18}H_{13}Br_3O_4$ Bischromone, hydrotribromide, 197[6].
$C_{18}H_{13}Cl$ Naphthalene, (α-chlorostyryl)-, 1401[9], 1402[1]
$C_{18}H_{13}ClO$ 1-Naphthaleneacetyl chloride, α-phenyl-, 110[4].
$C_{18}H_{13}Cl_3N_2O_4S_2$ m-Benzenedisulfonanilide, 4,?,6-trichloro-, 2841[8].
$C_{18}H_{13}NO$ 3,4-Benzacridine, 10-methoxy-, 598[1].
$C_{18}H_{13}NO_2$ Ketone, 2-hydroxy-1-naphthyl phenyliminomethyl, 3166[1].
4-Quinolineacrylic acid, 2-phenyl-, P 2167[9]; *and salts*, 1413[?].
Tetrophan, 1469[?]
$C_{18}H_{13}NO_3$ Picolinic acid, [1(and 2)-naphthoyl]-, Me ester, 764[7]
$C_{18}H_{13}NO_4$ 3,4-Pyrroledicarboxylic acid, 2,5-diphenyl-, 386[8]
$C_{18}H_{13}N_3$ Acenaphthotriazole, 4,5-dihydro-8-phenyl-, 1081[3]
$C_{18}H_{13}N_3O_2$ Azobenzene, p-(p-nitrophenyl)-, 587[2]
$C_{18}H_{13}N_3O_3$ 9,10-α-Benzophenazinediol, 5-acetamido-, 603[2]
$C_{18}H_{13}N_4NaO_5S$ Azo compd. from 3-amino-1-acenaphthenesulfonic acid and p-nitrophenyldiazonium chloride, 411[4].
$C_{18}H_{13}N_5O_4$ Diphenylamine, 2,4-dinitro-4'-phenylazo-, 1084[1], 3351[5].
$C_{18}H_{13}N_5O_9$ Pyridine, 2(and 4)-p-nitrobenzyl-, picrate, 204[3,6].
$C_{18}H_{14}$ Hydrocarbon, m. 203°, from cholesterol, 1241[9]
Terphenyl, 406[2]
$C_{18}H_{14}BNO_6$ Anthraquinone, 1-amino-, boroacetate, 1052[?].
$C_{18}H_{14}BrNO_2S$ Quinaldine, 3-(p-bromophenylsulfonyl)-α-ethylidene-, 1626[6]
$C_{18}H_{14}BrN_3$ 3-Acenaphthenamine, 2-(p-bromophenylazo)-, 1081[5]
$C_{18}H_{14}Br_2$ Dibromide, m. 217°, of hydrocarbon from cholesterol, 1241[9].
$C_{18}H_{14}CdN_6O_{20}$ + $3H_2O$, 720[2].
$C_{18}H_{14}ClFe_2N_6O_?$ + $8H_2O$, 1769[5].
$C_{18}H_{14}ClNO_2$ 1-Naphthalenecarbamic acid, 4-chloro-m-tolyl ester, 2319[4].
$C_{18}H_{14}ClN_3$ 3-Acenaphthenamine, 2-(p-chlorophenylazo)-, 1081[5].
$C_{18}H_{14}Cl_2$ Naphthalene, 1-(α,α-dichlorophenethyl)-, 1401[9]
$C_{18}H_{14}Cl_2N_2O_4S_2$ m-Benzenedisulfonanilide, 4,6-dichloro-, 2841[7].
$C_{18}H_{14}Cl_3NO$ 4-Quinolineethanol, 2-phenyl-α-(trichloromethyl)-, 1413[3].

$C_{18}H_{14}Hg$ Benzene, γ,γ'-mercuribis[propargyl-, 1054[3].
Toluene, β,β'-mercuribis[p-ethinyl-, 1054[3].
$C_{18}H_{14}HgO_2$ Anisole, β,β'-mercuribis[p-ethinyl-, 1054[3].
Benzene, γ,γ'-mercuribis[propargyloxy-, 1054[3].
$C_{18}H_{14}KNO_2$ Truxillimide, K deriv., 1391[9], 1392[7].
$C_{18}H_{14}K_2MoO_8 + H_2O$, 3405[8].
$C_{18}H_{14}NNaO_2$ Truxillimide, Na deriv., 1391[9], 1392[7].
$C_{18}H_{14}N_2O_2$ Benzaldehyde, oxime, 1-naphthalenecarbamyl deriv., 2319[8].
Indigotin, 7,7'-dimethyl-, *FeCl₃ compds.*, 414[5].
Isoindigotin, dimethyl-, 758[5], 3456[1].
2(1)-Naphthalenone, 1-(p-acetamidophenylimino)-, 191[1].
Phthalimide, N-[γ-(p-cyanophenyl)propyl]-, 392[1].
Triphenylamine, p-nitro-, 2834[8].
$C_{18}H_{14}N_2O_3$ Naphthalamic acid, N-(o-aminophenyl)-, *and Ag salt*, 1075[5].
Phthalamic acid, N-(1-amino-2-naphthyl)-, *and Ag salt*, 1075[7].
Quinazolone, methyl-2-(3,4-methylenedioxystyryl)-, 207[3,4].
$C_{18}H_{14}N_2O_4$ Mandelic acid, m-(2-hydroxy-1-naphthylazo)-, 2992[9].
4-Pyrazolecarboxylic acid, 5-methyl-3-(3,4-methylenedioxyphenyl)-1-phenyl-, 599[8].
$C_{18}H_{14}N_2O_6S$ Isoindigotinsulfonic acid, 7,7'-dimethyl-, *and salts*, 3456[1].
$C_{18}H_{14}N_2O_7S$ Cinnamonitrile, α-(o-anisylsulfonyl)-3(and 5)-hydroxy-4(and 2)-nitro-, acetate, 402[7,8].
$C_{18}H_{14}N_4$ Isopyrrole, 2,2'-(di-2-pyrrylacetylene)-bis-, *and di-HCl*, 1406[6,7].
$C_{18}H_{14}N_4O$ 4-Quinolinepropionyl azide, 2-phenyl-, 1413[6].
$C_{18}H_{14}N_4O_2$ Acenaphthenamine, (p-nitrophenylazo)-, 411[2], 1081[5].
$C_{18}H_{14}N_4O_4$ 5,5'-Bihydantoin, 3,3'-diphenyl-(?), 2313[1].
$C_{18}H_{14}N_4O_7$ 7-Acenaphthenamine, picrate, 410[9].
1-Benzylpyridinium picrate, 3008[9].
$C_{18}H_{14}O$ Ketone, benzyl naphthyl, 1401[8].
$C_{18}H_{14}O_2$ Ketone, α-hydroxybenzyl naphthyl, 1401[9], 1402[1].
2,2'-Spirobi[1,2-benzopyran], 3-methyl-, 3008[2].
1,2'-Spirobiindan-1',3'-dione, 3-methyl-, 185[8].
$C_{18}H_{14}O_3$ Cinnamic anhydride, 1612[7].
1-Naphthaleneglycolic acid, α-phenyl-, 410[6].
$C_{18}H_{14}O_4$ Chromone, 7-hydroxy-3-methoxy-2-styryl-, 196[1].
Coumarin, 6-hydroxy-4-methyl-3-phenyl-, acetate, 595[8].
2-Indanpropionic acid, 1,3-diketo-β-phenyl-, 911[9].
Isoflavone, 7-hydroxy-2-methyl-, acetate, 196[8].
Succinic acid, dibenzal-, 1796[9].
Umbelliferone, 4-methyl-3-phenyl-, acetate, 595[8].
$C_{18}H_{14}O_4S$ Cinnamic acid, α,α'-thiobis-, 1796[8].
$C_{18}H_{14}O_5$ Chromone, 5,7-dihydroxy-3-methoxy-2-styryl-, 196[3].
$C_{18}H_{14}O_6U + H_2O$ Uranium cinnamate (basic), 3139[7].
$C_{18}H_{14}O_6$ Anthraquinone, 1-hydroxy-2,7-dimethoxy-, acetate, 411[1].
$C_{18}H_{14}O_8$ Benzoic acid, 2,3,4-trihydroxy-, 4-benzoate, diacetate, 2489[2].
Tartaric acid, dibenzoate, *salts*, 1789[8].
$C_{18}H_{15}As_2Cl$ Biarsine, chlorotriphenyl-, 2994[1].
$C_{18}H_{15}As_3$ Triarsine, cyclic triphenyl-, 2994[6].
$C_{18}H_{15}BCs$ Borine, triphenyl-, Cs deriv., 2668[7].
$C_{18}H_{15}BK$ Borine, triphenyl-, K deriv., 2668[7].
$C_{18}H_{15}BLi$ Borine, triphenyl-, Li deriv., 2668[7].
$C_{18}H_{15}BNa$ Borine, triphenyl-, Na deriv., 2668[6].
$C_{18}H_{15}BO_3$ Phenyl borate, 1605[1].
$C_{18}H_{15}BRb$ Borine, triphenyl-, Rb deriv., 2668[7].
$C_{18}H_{15}BiN_2O_4$ Bismuthine, triphenyl-, dinitrate, 1984[6].
$C_{18}H_{15}BiN_2O_6$ Bismuthine, triphenyl-, dinitrate, 584[7].
$C_{18}H_{15}BrN_4O_3$ 3(2)-s-Tetrazinone, 1,2-diacetyl-4-(p-bromophenyl)-1,4-dihydro-6-phenyl-, 1084[8].
$C_{18}H_{15}BrO_5$ 1,4-Benzopyrone, 3-(6-bromopiperonyl)-7-methoxy-2-methyl-, 2679[8].
$C_{18}H_{15}ClO_6$ 2-(o-Hydroxystyryl)-3-methylbenzopyrylium perchlorate, 3008[2].
$C_{18}H_{15}ClSi$ Silicane, chlorotriphenyl-, 189[7].
$C_{18}H_{15}Cl_4FeO_3$ 7,8(and 8,9)-Dimethoxy-2,3-indeno-3,2-γ-benzopyrylium ferrichloride, 2326[4,5].
$C_{18}H_{15}N$ Quinoline, 2-phenyl-4-propenyl-, *and salts*, 2680[9], 2681[2].
Triphenylamine, 1223[1], 2834[7].
$C_{18}H_{15}NO$ Ketone, benzyl naphthyl, oxime, 1401[8].
Naphthalene, 1-phenyl-, acetamido deriv., 1401[6].
$C_{18}H_{15}NOS_2$ Rhodanine, 5-benzal-3-(2,5-xylyl)-, 1080[8].
$C_{18}H_{15}NO_2$ 1-Naphthalenecarbamic acid, benzyl ester, 1232[8]; tolyl ester, 2319[8].
4-Quinolinepropionic acid, 2-phenyl-, *and salts*, 1413[4,5].
Truxillimide, 1319[7], 1392[4].
$C_{18}H_{15}NO_3$ 1-Naphthalenecarbamic acid, anisyl ester, 2319[8].
4-Quinolinepropionic acid, 6-hydroxy-2-phenyl-, *and salts*, 1413[9].
$C_{18}H_{15}NO_4$ Benzoic acid, m-N-cinnamylacetamido-, 398[1].
$\Delta^{1,4}$-1-Pentadienone, 5-p-anisyl-1-(m-nitrophenyl)-, 749[8].
$C_{18}H_{15}NO_8W + H_2O$ Aniline dipyrocatecholatotungstate, 3405[8].
$C_{18}H_{15}N_3$ 3-Acenaphthenamine, 2-phenylazo-, 1081[1].
Xenylamine, 4'-phenylazo-, 585[6].
$C_{18}H_{15}N_3O_2$ α,β-Naphthotriazole, 4,5-dimethoxy-2-phenyl-, 2850[7].
$C_{18}H_{15}N_3O_4$ 3,4-Pyrazoledicarboxylic acid, 1-[p-(p-aminophenyl)phenyl]-5-methyl-, 599[1].
$C_{18}H_{15}N_3O_5$ 1-Phthalazineacetic acid, 2,4-dihydro-4-hydroxy-2-(p-nitrophenyl)-, acetate, 1803[1].
$C_{18}H_{15}N_3O_7S$ Phenol, 2,4-dinitro-, p-toluenesulfonate, C_5H_5N addn. compd., 2816[3].
$C_{18}H_{15}N_5O_2$ o-Phenylenediamine, 4-nitro-N1-(p-phenylazophenyl)-, 1084[8].
$C_{18}H_{15}N_5O_4$ Benzene, m-dinitro-, addn. compd. with p-phenylazoaniline, 1062[7].
$C_{18}H_{15}NaSn$ Stannane, triphenyl-, Na deriv., 1607[9].
$C_{18}H_{15}OP$ Phosphine oxide, triphenyl-, 415[8].
$C_{18}H_{15}O_3P$ Phenyl phosphite, 1605[8].
$C_{18}H_{15}Si$ Silicyl, triphenyl-, 189[8].
$C_{18}H_{16}As_2$ Biarsine, triphenyl-, 2994[1].

$C_{18}H_{16}B_2O_{12}$ Naphthazarin, diboroacetate, 1077[4].

$C_{18}H_{16}BrN_3O_{11}$ Isoapiol, 6-bromo-, picrate, 3450[2].

$C_{18}H_{16}Br_2O_4$ Propionic acid, α,β-dibromo-β-p-phenoxybenzoyl-, Et ester, 593[4].

$C_{18}H_{16}ClN_5$ Phenosafranine, amino-, 1084[6].

$C_{18}H_{16}Cl_2N_2O_2$ Indene, bisnitrosochloride, 383[2].

$C_{18}H_{16}Cl_2N_4NiO_4$ Glyoxime, chloro-p-tolyl-, Ni deriv., 1084[9].

$C_{18}H_{16}Cl_2O_2$ 1,6-Hexanedione, 1,6-bis(p-chlorophenyl)-, 1229[4].

$C_{18}H_{16}NO_3P$ Anilinodiphenoxyphosphonium oxide, 914[7].

$C_{18}H_{16}N_2O$ Urea, α-benzyl-β-1-naphthyl-, 2319[6].

$C_{18}H_{16}N_2O_2$ Acetanilide, m,p'-acetylenebis-, 2850[9].

Leucoisoindigotin, dimethyl-, 3456[2].

Δ[2]-Oxazoline, 4-benzoyl-5-ethylimino-2-phenyl-, 1623[5].

4-Pyrazolecarboxylic acid, 5-methyl-1,3-diphenyl-, Me ester, 2495[7].

—, 5-methyl-3-phenyl-1-p-tolyl-, 599[8].

5-Pyrimidinecarboxylic acid, 4-methyl-2-(2-naphthyl)-, Et ester, 206[9].

Quinazolone, 2-(p-methoxystyryl)-1(and 3)-methyl-, 207[2, 3].

4-Quinolinol, 2-phenyl-, ethylcarbamate, *and* -*HCl*, 3010[9].

$C_{18}H_{16}N_2O_2S$ Benzothiazole, acetoacetamidophenylmethyl-, 3822[3].

$C_{18}H_{16}N_2O_2S_2$ Bioxindole, dimercaptodimethyl-, 3455[1].

$C_{18}H_{16}N_2O_3$ 4-Pyrazolecarboxylic acid, 3-p-anisyl-5-methyl-1-phenyl-, 599[8].

$C_{18}H_{16}N_2O_4$ 1-Anthracenebicarbamic acid, di-Me ester, 410[7].

Isatide, 5,5'-dimethyl-, 3455[8].

9-Phenanthrenebicarbamic acid, di-Me ester, 410[7].

3-Pyrrolecarboxylic acid, 5-formyl-4-methyl-, ethyl ester, azlactone, 3455[3].

$C_{18}H_{16}N_2O_6$ Succinic acid, α,β-dibenzamido-, 48[8].

$C_{18}H_{16}N_2O_6S_2$ m-Benzenedisulfonanilide, 4,6-dihydroxy-, 2841[7].

$C_{18}H_{16}N_2O_8$ m,m'-Bibenzoic acid, 2,2'-dinitro-, di-Et ester, 3289[1].

4,4'-Bi-1,3-dioxolane, 2,2'-bis(o-nitrophenyl)-, 749[4].

4,4'-Bi-1,3-dioxolan-2-ol, 2'-(o-nitrophenyl)-2-(o-nitrosophenyl)-, 749[4].

Diphenic acid, 3,5'-dinitro-, di-Et ester, 1801[7].

$C_{18}H_{16}N_2S_2$ Aniline, p,p'-(m-phenylenedithio)bis-, *and SnCl₄ salt*, 3163[4].

$C_{18}H_{16}N_4$ Pyrrole, 2,2',2'',2'''-acetylenetetrakis-, 2683[8].

$C_{18}H_{16}N_4O_2S$ 1,3,4-Thiodiazole, 2,5-bis(N-acetylanilino)-, 2162[7].

$C_{18}H_{16}N_4O_3$ 3(2)-s-Tetrazinone, 1,2-diacetyl-1,4-dihydro-4,6-diphenyl-, 1084[7].

$C_{18}H_{16}N_4O_4$ 1,4-Piperazinedicarboxanilide, 2,5-diketo-, 915[4].

$C_{18}H_{16}N_4O_8$ Isoquinoline, 1,2,3,4-tetrahydro-2-methyl-6,7-methylenedioxy-1-(2,4,6-trinitrobenzyl)-, 3437[6].

$C_{18}H_{16}N_4O_8S$ Thiazole, 5-ethoxy-4-methyl-2-phenyl-, picrate, 2671[8].

$C_{18}H_{16}N_4O_9$ 1,3,4-Oxazine, 6-ethoxy-2-phenyl-, picrate, 2502[8].

$C_{18}H_{16}N_{10}S_2$ 1,3,4-Triazole, 2,2'-dithiobis[5-(benzalhydrazino)-, 2162[8].

$C_{18}H_{16}O_2$ Flavone, 3-ethyl-6-methyl-, 1237[7].

α,γ-Pentadienic acid, β,δ-diphenyl-, Me ester, 1592[4].

$C_{18}H_{16}O_2S$ Thiochromone, 3-α-methoxybenzyl-6-methyl-, 203[8].

$C_{18}H_{16}O_3$ Chromone, 3-benzyl-7-hydroxy-2,5-dimethyl-, 197[2].

1-Indanone, 2-(2,3-dimethoxybenzal)-, 2326[5].

—, 2-veratral-, 2326[4].

$C_{18}H_{16}O_4$ Acrylic acid, β-p-phenoxybenzoyl-, Et ester, 593[3].

Chromone, 7-hydroxy-3-methoxy-2-phenethyl-, 196[3].

Coumarin, 7,8-dimethoxy-4-methyl-3-phenyl-, 595[7].

Mandelic acid, Me ester, cinnamate, 378[7].

9,10-Phenanthrenediol, 9,10-dihydro-, diacetate, 1405[2].

Truxillic acid, 1066[9], 1391[1], 1392[2].

Truxinic acid, 1066[9], 2664[3].

$C_{18}H_{16}O_5$ Coumarin, 4-p-anisyl-5,7-dimethoxy-, 595[1].

Flavone, trimethoxy-, 1990[9].

$C_{18}H_{16}O_6$ Flavone, 5-hydroxy-3,7,2'-trimethoxy-, 195[9].

$C_{18}H_{16}O_6S_2$ 2,6-Thianthrenediol, 3,7-dimethoxy-, 9,10-disulfide, diacetate, 2681[5].

$C_{18}H_{16}S$ Thiophene, 2,4-dimethyl-3,5-diphenyl-, 592[4].

$C_{18}H_{16}Sn$ Stannane, triphenyl-, 1607[7].

$C_{18}H_{17}BO_7$ 1-Naphthol, 2,4-diacetyl-, boroacetate, 1052[9].

$C_{18}H_{17}BO_8$ 2-Acetonaphthone, 1,8-dihydroxy-, 1-boroacetate, 8-acetate, 1053[1].

$C_{18}H_{17}BrO_3$ 7,8-Dimethoxy-2-methyl-4-phenylbenzopyrylium bromide, 2499[1].

$C_{18}H_{17}ClN_6$ Triaminoaminophenylphenazonium chloride, 3239[3].

$C_{18}H_{17}ClO_3$ 7-Methoxy-2,3-dimethyl-4-phenylbenzopyrylium chloride, *and FeCl₃ compd.*, 3454[8].

$C_{18}H_{17}ClO_4$ 2-(3,4-Dimethoxyphenyl)-3-methoxybenzopyrylium chloride, *and FeCl₃ deriv.*, 3456[8].

$C_{18}H_{17}ClO_6$ 7-Methoxy-2,3-dimethyl-4-phenylbenzopyrylium perchlorate, 3454[8].

$C_{18}H_{17}ClO_7$ 6,7(and 7,8)-Dimethoxy-2-methyl-4-phenylbenzopyrylium perchlorate, 2499[1].

$C_{18}H_{17}Cl_2NO$ Anthrone, dichloro-10-diethylamino-, 755[4], 2492[9].

$C_{18}H_{17}Cl_4FeO_2$ 7-Methoxy-2,3-dimethyl-4-phenylbenzopyrylium chloride, FeCl₃ compd., 3454[8].

$C_{18}H_{17}Cl_4FeO_4$ 2-(3,4-Dimethoxyphenyl)-methoxybenzopyrylium chloride, FeCl₃ compd., 3456[8], 3457[1].

$C_{18}H_{17}IN_4O_2$ 1-Ethyl-2-formylquinolinium iodide, p-nitrophenylhydrazone, 1627[8].

2-Formyl-1,6-dimethylquinolinium iodide, p-nitrophenylhydrazone, 1627[7].

$C_{18}H_{17}N$ Lepidine, 6-ethyl-2-phenyl-, 418[9].

Quinoline, 4,5,8-trimethyl-2-phenyl-, 418[9].

$C_{18}H_{17}NO$ Lepidine, ethoxy-2-phenyl-, *and salts*, 418[6, 7, 8].

$C_{18}H_{17}NOS$ 2(1)-Quinolone, 3-(benzylmercapto)-1-ethyl-, 1627[4].

$C_{18}H_{17}NO_2$ 1,3-Propanediol, 2-(2-phenyl-4-quinolyl)-, 1991[8]; *and salts*, 2680[9], 2681[1].

$C_{18}H_{17}NO_3$ Acetanilide, p-(β-anisoylvinyl)-, 758[2]; *salts*, 2156[8].

Isopyrrole, 5-ethyl-3-methyl-2-phthalidene-4-propionyl (?), 1236[4].

2,3-Pyrrolisoquinoline-5,10-dione, 3-ethyl-1-methyl-2-propionyl-(?), 1236[4].
Truxillamidic acid, 1391[2], 1392[2,6]

$C_{18}H_{17}NO_3S$ Quinaldine, 3-[o(and p)-phenetylsulfonyl]-, *and salts*, 419[3,4].

$C_{18}H_{17}NO_4$ Hippuric acid, α-benzoyl-, Et ester, 1623[7].
4-Isopyrrolepropionic acid, 5-ethyl-3-methyl-2-phthalidene-(?), 1236[6].
Meconin, 2-(benzalaminomethyl)-, 2331[1,3].
2,3-Pyrrolisoquinoline-2-propionic acid, 3-ethyl - 5,10 - dihydro - 5,10 - diketo-1-methyl-(?), 1236[6].

$C_{18}H_{17}NO_6$ 7,8-Dimethoxy-2-methyl-4-phenylbenzopyrylium nitrate, 2499[1].
1,2-Propanedione, 1-(3,4-dimethoxyphenyl)-3-(3,4-methylenedioxyphenyl)-, 2-oxime, 1083[8].

$C_{18}H_{17}N_3O$ 4-Quinolinepropionic acid, 2-phenyl-, hydrazide, *and* ·*HCl*, 1413[5].

$C_{18}H_{17}N_3OS$ 1,4,3-Isothiodiazine, 5-phenyl-2-p-tolylamino-, Ac deriv., 416[4]
2(3)-Thiazolone, 3-methyl-4-phenyl-, anisalhydrazone, *and HBr*, 416[6]

$C_{18}H_{17}N_3O_2$ Ketone, 2-hydroxy-8-methoxy-3-quinolyl methyl, phenylhydrazone, 402[8]

$C_{18}H_{17}N_3O_4$ Acrylic acid, β-p-phenoxybenzoyl-, Me ester, semicarbazone, 593[4].

$C_{18}H_{17}N_3O_5$ 1-Phthalazineacetic acid, 2,4-dihydro-4-hydroxy-2-(p-nitrophenyl)-, Et ester, 1803[1].

$C_{18}H_{17}N_3S$ 2(3)-Thiazolone, 3,4-diphenyl-, isopropylidenehydrazone, *and HBr*, 416[7]

$C_{18}H_{17}N_5O_7$ Pyrazole, 1-ethyl-3(and 5)-methyl-5(and 3)-phenyl-, picrates, 2856[6,7].

$C_{18}H_{17}N_5O_9$ 2-Indazoleacetic acid, α-methyl-, Et ester, picrate, 1622[6]
3-Indolecarbinol, 1-acetyl-α-(aminomethyl)-, picrate, 758[9]

$C_{18}H_{18}$ Anthracene, tetramethyl-, 3003[6].
Retene, 1320[8].

$C_{18}H_{18}IN_3O_7$ Pyrazole, 1-benzyl-3(and 5)-methyl-, methiodide, picrate, 3008[4]

$C_{18}H_{18}N_2$ Lepidine, 6-dimethylamino-2-phenyl-, 118[9]

$C_{18}H_{18}N_2O$ Quinoline, 4-(β-aminoethyl)-6-methoxy-2-phenyl-, 3010[7], *and derivs.*, 1413[3,5].

$C_{18}H_{18}N_2O_2$ Acetanilide, m,p'-vinylenebis-, 2850[9].
Carbamic acid, (β-5-acridylethyl)-, Et ester, ·*HCl*, 2501[7].
3-Pyrrolealdehyde, 5-ethyl-2,4-dimethyl-, az lactone, 1236[1]

$C_{18}H_{18}N_2O_2S$ Quinoline, 2-dimethylamino-3-p-tolylsulfonyl-, 1626[8].

$C_{18}H_{18}N_2O_3$ Acetamide, α-benzamido-α-benzoyl-N-ethyl-, 1623[8].
Acetanilide, (acetamidophenacyl)-, 2851[1]
2-Pyrazinecarboxylic acid, 2,3,4,5-tetrahydro-4-keto-2,5-diphenyl-, Et ester, 2152[9].

$C_{18}H_{18}N_2O_4$ Antipyrine salicylate, 1030[2]
Butyric acid, α,γ-dibenzamido-, 2982[9]
Malanilide, acetate, 1056[8].
Propionic acid, α,β-dibenzamido-, Me ester, 2983[2]

$C_{18}H_{18}N_2O_4S$ Quinoline, 2-amino-8-methoxy-3-(p-phenetylsulfonyl)-, 402[9]

$C_{18}H_{18}N_2O_5$ Hydratropic acid, β-(N-methyl-α-phenylacetamido)-p-nitro-, 1414[2].

$C_{18}H_{18}N_2O_6$ 3,8-Dipyrrolopyrazinedicarboxylic acid, 4,9-diketo-2,7-dimethyl-, diethyl ester, 3155[5].

$C_{18}H_{18}N_4O_2$ Pyrrole, 2,2',2'',2'''-dihydroxyacetylenetetrakis-, 2683[1].

$C_{18}H_{18}N_4O_6$ Succinic acid, α,β-bis(β-phenylcarbamido)-, 2313[2].

$C_{18}H_{18}N_4O_7$ 3,4-Pyrazoledicarboxylic acid, 1-(α-carbethoxyacetonylazophenyl)-5-methyl-, 598[9].

$C_{18}H_{18}N_4S_2$ m-Phenylenediamine, 4,4'-(m-phenylenedithio)bis-, 3163[3]

$C_{18}H_{18}N_6O_4$ 1,2-Cyclopentanedione, 3-methyl-, bis(p - nitrophenylhydrazone), 2484[8], 2485[1].

$C_{18}H_{18}O$ Ether, bis(γ-phenylallyl), 1985[8]

$C_{18}H_{18}O_2$ 1,6-Hexanedione, 1,6-diphenyl-, 1229[8]

$C_{18}H_{18}O_2S_2$ Acetophenone, o,o' - dithiobis[5-methyl-, 202[8].

$C_{18}H_{18}O_3$ Hydrocinnamic anhydride, 196[2].
Phenol, 2-ethoxy-5-propenyl-, benzoate, 402[1]

$C_{18}H_{18}O_4$ 9,10-Anthradiol, 1,2,3,4-tetrahydro-, diacetate, 1405[3]
α,2'-Bi-p-cresol, diacetate, 401[2]
2-Butanol, 4-(3,4-methylenedioxyphenyl)-, benzoate, 739[8]
Mandelic acid, Me ester, hydrocinnamate, 378[4]
Phenolglutarein, 4-methyl-, 2676[7]
Phenolsuccinein, 3,3-dimethyl-, 2670[8]
Propionic acid, β-p-phenoxybenzoyl-, Et ester, 593[1]

$C_{18}H_{18}O_5$ Benzoic acid, oxybis-, di-Et ester, 392[1]
Phloroglucinol, 2-phenethyl-, diacetate, 1225[8]
2,4-Xylic acid, α[1],α[1']-oxybis-, 184[1]

$C_{18}H_{18}O_6$ Tartaric acid, dibenzyl ester, 47[9]

$C_{18}H_{19}ClO_3$ Chalcone, 4,4'-dimethoxy-, CH_3Cl addn. compd., *HCl, and $HgCl_2$ compd.*, 103[4].

$C_{18}H_{19}CuNO_3$ Benzoin, p'-isopropyl-p-methoxy-, oxime, Cu deriv., 1055[7]

$C_{18}H_{19}Hg_5NO_{11}$ Acetanilide, ar-pentakis(acetoxymercuri)-, 3162[1]

$C_{18}H_{19}IN_2O_4S$ 2-Amino-1-ethyl-3-p-tolylsulfonylquinolinium iodide, 1626[8].

$C_{18}H_{19}N$ Diindanylamine, 755[8]

$C_{18}H_{19}NO_2$ (See also *Apocodeine*.)
Cyclobutanecarboxylic acid, 3-amino-2,4-diphenyl-, Me ester, 1392[1]

$C_{18}H_{19}NO_3$ Phenol, 5-allyl-2-ethoxy-, carbanilate, 402[3]
—, 2-ethoxy-5-propenyl-, carbanilate, 402[4].

$C_{18}H_{19}NO_4$ Codeinone, hydroxy-, 765[8]

$C_{18}H_{19}NO_4S$ 4(1)-Quinolone, 6-ethoxy-2,3-dihydro-1-p-tolylsulfonyl-, 205[9]

$C_{18}H_{19}NO_5$ Propiophenone, α-amino-3,4-dimethoxy-β-(3,4-methylenedioxyphenyl)-, *and HCl*, 1083[8].
—, 3,4-dimethoxy-β-(3,4-methylenedioxyphenyl)-, oxime, 1083[8].

$C_{18}H_{19}N_3OS$ 1,4-Thiopyrone, tetrahydro-2,6-diphenyl-, semicarbazone, 200[1].

$C_{18}H_{19}N_3O_4$ 1-Phthalazineacetic acid, 2-(p-aminophenyl)-1,2,3,4-tetrahydro-4-hydroxy-, acetyl deriv., 1803[1].

$C_{18}H_{19}N_3O_5$ Propionic acid, α-(β-carbamylhydrazino)-β-p-phenoxybenzoyl-, Me ester, 593[6]

$C_{18}H_{19}N_3O_6S$ Compd. from the reaction of H_2SO_4 in the presence of Cu on the diazo sulfate from nitroaminohomoveratrole, m. 142°, 3449[8].

$C_{18}H_{20}Br_2N_4O_3$ Rhamnose, *p*-bromophenylosazone, 2987[2].

$C_{18}H_{20}ClNO_2$ 7 - Benzyloxy - 3,4 - dihydro-6-methoxy-2-methylisoquinolinium chloride, 3011[1].

$C_{18}H_{20}Cl_2N_2$ 9,10-Anthradiamine, 1,5-dichloro-9,10-dihydro *N*, *N*, *N′*, *N′*-tetramethyl-, 754[2].

$C_{18}H_{20}I_2N_4O_3$ Rhamnose, (iodophenyl)osazone, 1794[9], 1795[1].

$C_{18}H_{20}I_2N_4O_4$ Fructose, (iodophenyl)osazone, 1794[9], 1795[1].
 Galactose, (iodophenyl)osazone, 1794[9], 1795[1].
 d-Glucose, (iodophenyl)osazone, 1794[9], 1795[1].

$C_{18}H_{20}MnN_2O_6$ + $5H_2O$, 717[6].

$C_{18}H_{24}Cl_6IrN_3$ α-Picolinium iridohexachloride, 3659[6].

$C_{18}H_{24}Cl_6N_2Pt$ Hydroxylamine, β-(α-ethylbenzyl)-, chloroplatinate, 900[1].

$C_{18}H_{24}CoI_3N_6$, 2627[4].

$C_{18}H_{24}CoN_9O_9$, 2627[4].

$C_{18}H_{24}FeN_3O_9$ Hydrogen tri(nitrosopropionylacetone) ferrite, 3403[1].

$C_{18}H_{24}INO$ Compd., m. 181–3°, from *o*-phenoxymethylbenzylamine, 391[9].

$C_{18}H_{24}N_2O$ Quinoline, 7-allyl-8-diethylaminoethoxy-, P 2392[7].

$C_{18}H_{24}N_2O_4$ 3-Pyrrolecarboxylic acid, 2,2′-ethylenebis[4-methyl-, di-Et ester, 2159[6].

$C_{18}H_{24}N_2O_6$ Nipecotic acid, 4-hydroxy-1-isopropyl-, Et ester, *p*-nitrobenzoate, *-HCl*, 3010[5].

—, 4-hydroxy-1-propyl-, Et ester, *p*-nitrobenzoate, *-HCl*, 3010[6].

$C_{18}H_{24}N_4O_6$ Galacturonic acid, phenylhydrazone, phenylhydrazine salt, 1389[4].

$C_{18}H_{24}N_4S_2$ Carbamic acid, diethyldithio-, diphenylguanidine salt, 3098[4].

$C_{18}H_{24}N_6O_{24}$ β-Triamylose, hexanitrate, 380[9].

$C_{18}H_{24}O_2$ Carvomenthol, acid phthalate, 1015[3].

$C_{18}H_{24}O_3$ Ketone, hydroxymethyl 1,2,2,3-tetramethylcyclopentyl, benzoate, 1399[3].

Menthone, 2-(hydroxymethyl)-, benzoate, 2846[3].

Thebaine deriv., and isomer, 765[9].

$C_{18}H_{24}O_4$ Carvomenthol, acid phthalate, *and Ag salt*, 1397[8,9], 1398[1].

Cyclohexaneacetic acid, α-hydroxy-, Me ester, hydrocinnamate, 378[5].

9,10-Phenanthrenediol, 1,2,3,4,5,6,7,8,9,10-decahydro-, diacetate, 1405[2].

$C_{18}H_{25}BrN_2O_2$ Glyoxylic acid, bromo-, menthyl ester, phenylhydrazone, 415[4].

$C_{18}H_{25}NO_4$ Cyclohexanecarboxylic acid, 2-(*p*-dimethylaminophenyl)-4-hydroxy-6-keto-4-methyl-, Et ester, 173[3].

Nipecotic acid, 4-hydroxy-1-isopropyl-, Et ester, benzoate, *-HBr*, 3010[9].

—, 4-hydroxy-1-propyl-, Et ester, benzoate, *-HCl*, 3010[5].

$C_{18}H_{25}NO_5$ 5-Desoxymorphinic acid, dihydro-, Me ester, *and salts*, 2165[3,4].

Mannose, diacetone, anilide, 2663[7].

$C_{18}H_{25}NO_7$ Aniline salt of acid from the oxidation of β-diacetonefructose, 1388[7].

$C_{18}H_{26}$ Naphthalene, decahydro-*m*-xylyl-, 1402[3].

Retene, octahydro-, 1320[8].

$C_{18}H_{26}BeO_4$ Cyclohexanone, acetylmethyl-, Be deriv., 413[8].

$C_{18}H_{26}CoN_{11}O_{16}$ + H_2O and $3H_2O$, 716[4]

$C_{18}H_{26}CrN_{11}O_{16}$ + H_2O and $3H_2O$, 716[8].

$C_{18}H_{26}Fe_4O_{22}$ + $2H_2O$, 2127[8].

$C_{18}H_{26}Hg$ Cyclohexane, γ,γ′-mercuribis[propargyl-, 1054[3].

$C_{18}H_{26}N_2OS$ Urea, α [β-keto-β-(1,2,2,3-tetramethylcyclopentyl)ethyl-β-phenylthio-, 1399[4].

$C_{18}H_{26}N_2O_4$ Nipecotic acid, 4-hydroxy-1-isopropyl, Et ester, *p*-aminobenzoate, *di-HCl*, 3010[5].

—, 4-hydroxy-1-propyl-, Et ester, *p*-aminobenzoate, *di-HCl*, 3010[6].

$C_{18}H_{26}N_2O_6$ Glycine, *N*, *N*′-(2,5-dihydro-2,5-diketo-*p*-phenylene)bis-, di-Bu and di-isobutyl esters, 1055[2].

$C_{18}H_{26}N_4$ 3-Pyrrolealdehyde, 5-ethyl-2,4-dimethyl-, azine, 2236[1].

$C_{18}H_{26}O_2$ Cyclopentanecarbinol, 1,2,2,3-tetramethyl-, α-toluate, 1399[2].

1,6-Hexanedione, 1,3,4,6-tetraphenyl-, 1593[9].

Naphthalene, (dimethoxyphenyl)decahydro-, 1402[3].

$C_{18}H_{26}O_3$ 1,2-Ethanediol, 1-(1,2,2,3-tetramethylcyclopentyl)-, monobenzoate, 1399[8].

$C_{18}H_{26}O_4$ Caproic acid, resorcinol di-ester, 3163[7].

Compd., m. 91°, from lupulone, 415[6].

Resorcinol, dicaproyl-, 3163[7].

$C_{18}H_{26}O_8$ $\Delta^{1,\alpha}$-Cyclopentanemalonic acid, 2,3-(or 2,4)-dicarboxy-(?), tetra-Et ester, 2823[9].

Cyclopentenemalonic acid, 2,3(or 2,4)-dicarboxy-(?), tetra-Et ester, 2823[9].

$C_{18}H_{27}As$ Arsine, dicylcohexylphenyl-, 2839[6].

$C_{18}H_{27}CoN_6O_3$, 2627[5].

$C_{18}H_{27}NO_2$ Undecylenamide, *N*-*p*-hydroxybenzyl-, 404[9].

$C_{18}H_{27}NO_3$ Undecylenamide, *N*-3,4-dihydroxybenzyl-, 404[9].

$C_{18}H_{27}NO_4$ Dinicotinic acid, 1,2-dihydro-4-isobutyl-1,6-dimethyl-2-methylene-, di-Et ester, 3296[1].

$C_{18}H_{27}NO_5$ Compd. from dihydroöxocodeine, -*HCl*, 2165[5].
$C_{18}H_{27}NO_6$ Malonic acid, [(5-carbethoxy-2-ethyl-4-methyl-3-pyrryl)methyl], di-Et ester, 1236[4].
$C_{18}H_{28}$ Hydrocarbon from reduction of isophorone, m. 112°, 1784[5].
$C_{18}H_{28}INO_4$ Dinicotinic acid, 4-isobutyl-2,6-dimethyl-, di-Et ester, methiodide, 3296[2].
$C_{18}H_{28}O_2$ Cumic acid, isooctyl ester, 1793[6].
$C_{18}H_{28}O_3$ Camphor, 3-(hydroxymethyl)-, cyclohexanecarboxylate, 1228[1].
Laurophenone, dihydroxy-, 2320[2], 3163[7].
$C_{18}H_{28}O_{10}$ 1,1,2,3,3-Propanepentacarboxylic acid, penta-Et ester, 3689[9].
$C_{18}H_{29}NO_3S$ Benzoic acid, methylsulfinyl-, menthylamine salt, 3448[8].
$C_{18}H_{29}NO_4$ Dinicotinic acid, 1,4-dihydro-4-isobutyl-1,2,6-trimethyl-, di-Et ester, 3296[1].
$C_{18}H_{29}NO_5$ Acetamide, *N*, *N*-bis(2-hydroxycyclohexyl)-, diacetate, 2831[8].
$C_{18}H_{29}N_3O_7$ Cyclopentanecarboxylic acid, d carboxypropylketo, triethyl ester, semicarbazone, 3446[5].
$C_{18}H_{30}CuO_4$ 2,4-Hexanedione, 3-propyl Cu deriv., 413[3].
2,4-Pentanedione, 3-isobutyl deriv., 413[5].
$C_{18}H_{30}N_2O_2$ Benzoic acid, *p*-amino-, γ-dibutylaminopropyl ester, 1886[1]; γ-di-*sec*-butylaminopropyl and γ-diisobutylaminopropyl esters, -*HCl*, 1852[8].
$C_{18}H_{30}N_4O_4S_2$ 2,5-Piperazinedione, 3,3'-dithiodimethylenebis[6-isobutyl-, 2682[5].
$C_{18}H_{30}N_4O_7$ Butylamine, *N*, *N*, α, α-tetraethyl, picrate, 3280[4]
$C_{18}H_{30}O_2$ See also *Eleostearic acid*
3,3'-Bi[cyclohexane] 1,1'-dione, 3,3',5,5,5',5'-hexamethyl, 1784[5].
Linolenic acid, 706[9].
Resorcinol, dihexyl, 3163[7].
—, dodecyl-, 2320[2], 3163[7].
$C_{18}H_{30}O_{15}$ Triglucosan, 743[3]
Trihexosan, 1598[1]
$C_{18}H_{31}NO_4$ Dinicotinic acid, 1,4,?,? tetrahydro-4-isobutyl-1,2,6-trimethyl-, di-Et ester, 3296[4].
$C_{18}H_{32}Br_2I_2O_2$ Stearic acid, dibromodiiodo-, *and Ca salt*, 1592[1].
$C_{18}H_{32}ClFe_3O_{14}$ + $2H_2O$, 2127[8].
$C_{18}H_{32}O_2$ (See also *Eleostearic acid; Linoleic acid; Stearolic acid.*)
Chaulmoogric acid, 172[2], 2315[2], 3160[6].
λ-Octadecinoic acid, 1591[7].
$C_{18}H_{32}O_4$ Malonic acid, cyclohexylamyl, di ethyl ester, 3160[2].
Palmitic acid, ν,o-diformyl-, *and NH₄ salt*, 172[4].
$C_{18}H_{32}O_6$ Isovalerin, tri-, 2658[5].
$C_{18}H_{32}O_{10}$ Di(trimethylglucosan), 743[5].
$C_{18}H_{32}O_{16}$ Raffinose, 171[1], 306[1], 835[7].
$C_{18}H_{33}As$ Arsine, tricyclohexyl-, 2839[9].
$C_{18}H_{33}Br$ Tridecane, bromocyclopentenyl-, 3160[5].
$C_{18}H_{33}BrO_2$ Chaulmoogric acid, bromodihydro-, 172[8].
$C_{18}H_{33}N_3O$ Civetone, semicarbazone, 1791[6].
$C_{18}H_{34}Br_2O_2$ Stearic acid, λ,μ-dibromo-, 1591[7].
$C_{18}H_{34}Cl_2N_{12}Pt_2$ + xH_2O, 2626[2].
$C_{18}H_{34}I_2O_4$ Stearic acid, dihydroxydiiodo-, *and Ca salt*, 1592[2].
$C_{18}H_{34}O$ Cyclooctadecanone, 1792[4], 2151[6].
$C_{18}H_{34}O_2$ (See also *Elaidic acid; Oleic acid.*)
Chaulmoogric acid, dihydro-, 1598[8].
Cyclohexanelauric acid, 3160[5].
Cyclohexanol, 4,4'-*sec*-butylidenebis-, P 3697[3].
Isoöleic acid, 1591[2].
2,4-Octadecanedione, 738[9].
Octadecenoic acid, 1591[3,4,6].
Stearolactone, 1785[3].
$C_{18}H_{34}O_3$ Chaulmoogric acid, dihydro-μ-hydroxy-, 1598[9].
Cyclohexaneundecylic acid, θ-hydroxy-, Me ester, 1599[2].
Ricinoleic acid, 833[8], 2659[1]; *Na salt*, 444[4]
Stearic acid, θ keto-, 3445[2].
$C_{18}H_{34}O_4$ Chaulmoogric acid, dihydrodihydroxy-, 2315[3,4].
1,16-Hexadecanedicarboxylic acid, 172[3], 1789[3].
Thapsic acid, di-Me ester, 1789[3].
$C_{18}H_{35}IO_3$ Stearic acid, hydroxyiodo-, *and Ca salt*, 1592[2].
$C_{18}H_{35}N$ Chaulmoogrylamine, *and -HCl*, 3160[7].
$C_{18}H_{35}NO$ Chaulmoogramide, dihydro-, 1599[1].
$C_{18}H_{35}NO_3$ Stearic acid, θ-keto-, oxime, 3445[2].
$C_{18}H_{35}N_3O$ Cycloheptadecanone, semicarbazone, 1791[9], 1792[5].
$C_{18}H_{36}Mo_6N_{12}Ni_2O_{26}$ + $16H_2O$, 1185[4]
$C_{18}H_{36}N_2O_4$ Isobutyric acid, *N*, *N'*-decamethylenebis[α-amino-, *and Cu salt*, 371[5].
$C_{18}H_{36}O_2$ (See also *Stearic acid.*)
Palmitic acid, Et ester, 2818[9].
$C_{18}H_{36}O_3$ Stearic acid, hydroxy-, 303[6], 622[7], 1591[2,4].
$C_{18}H_{36}O_4$ Stearic acid, dihydroxy-, 41[8], 3280[7].
$C_{18}H_{38}O_2$ Hexadecane, 1,16-dimethoxy-, 1789[4].
$C_{18}H_{40}N_2O_8$ 2-Octanol, 1-hydroxamino-, oxalate, 1052[3].
$C_{18}H_{49}CoN_6O_8S_2$, 3138[3].
$C_{18}H_{49}CoN_6O_8Se_2$, 3138[7].
$C_{18}H_{50}I_2N_6NiO_2$ + $2H_2O$ Triaminotripropylaminenickelous hydroxyiodide, *KI*, 1589[7].
$C_{18}H_{51}CoN_6O_{12}S_3$, 3138[3,6]
$C_{18}H_{51}CoN_6O_{12}Se_3$, 3138[6]
$C_{18}H_{54}Br_4N_{12}Ni_2$ Tristriaminotriethylaminebisnickelous tetrabromide, 1589[4].
$C_{18}H_{54}I_4N_{12}Ni_2$ Tristriaminotriethylaminebisnickelous tetraiodide, 1589[3].
$C_{18}H_{66}N_6O_6$, 919[1].
$C_{18}H_{72}Cl_4Co_3N_{18}O_4S$ + $5H_2O$, 1961[9].
$C_{19}H_8N_2O_{10}$ Dinitro deriv. from oxidation of atromentin, 406[4].
$C_{19}H_9NO_6$ Naphthalic anhydride, 6-benzoyl-7-nitro-, 1076[4].
$C_{19}H_9NaO_4$ 1,3-Indandione, 2-(1,3-diketo-2-indanylmethylene)-, Na deriv., 911[8]
$C_{19}H_{10}Br_2O_6S$ Sulfonegallein, dibromo-, 2491[1].
$C_{19}H_{10}N_2O_5$ Naphthalimide, 6-benzoyl-7-nitro-, 1076[4].
$C_{19}H_{10}O_3$ Acenaphthenequinone, 3-benzoyl-, 1076[2].
$C_{19}H_{10}O_4$ 1,3-Indandione, 2-(1,3-diketo-2-indanylmethylene)-, 911[8].
Spiro[indan-2,1'-cyclopropane-2',2''-indan]-1,3,1'',3''-tetrone, 185[8].
$C_{19}H_{11}Cl_2NO$ 5(10)-Acridone, chloro(chlorophenyl)-, 1992[3].
$C_{19}H_{11}Cl_3N$ 1,5,10-Trichloro-9-anthrylpyridinium chloride, 755[5].
$C_{19}H_{11}Cl_4NO_2$ Anthranilic acid, *N*, *N*-bis(2,5-dichlorophenyl)-, 1992[4].
$C_{19}H_{11}Cl_4NO_3$ Quinone, 3-chloro-2-(*N*-methylanilino)-5-(2,4,6-trichlorophenoxy)-, 2318[9].

$C_{19}H_{11}I_2NO$ Carbazole, 9-benzoyl-3,6(?)-diiodo-, 1805[2].
$C_{19}H_{11}NO_4$ Naphthalic anhydride, 6-benzoyl-, oxime, 1075[9].
$C_{19}H_{11}N_5O_2$ Imidazophenazine, 2-(*m*-nitrophenyl)-, 1805[6].
$C_{19}H_{12}BrCl_2N$ 1,4-Dichloro-9-anthrylpyridinium bromide, 3166[1]
$C_{19}H_{12}Br_2N_2O$ Carbazole, 1 benzamido-3,6-dibromo-, 1079[7].
$C_{19}H_{12}Br_2O_9S$ Pyrogallolsulfonephthalein, dibromo-, 2491[5].
$C_{19}H_{12}ClNO$ 5(10)-Acridone, 2(and 3) chloro 10-phenyl-, 1992[1,2].
$C_{19}H_{12}Cl_2O_5$ Muconic acid, *α*,*δ* bis(*p*-chlorophenyl)-*β*,*γ*-dihydroxy-, monolactone, Me ester, 2849[6].
$C_{19}H_{12}Cl_3N$ 1-(1,5-Dichloro-9-anthryl)pyridinium chloride, 754[5]
$C_{19}H_{12}Cl_4O_6$ Phthalide, 3,4,5,6-tetrachloro-2-(2,3-cresyl)-2-hydroxy-, diacetate, 1231[8].
$C_{19}H_{12}INO$ Carbazole, 9-benzoyl-3-iodo-, 1805[2].
$C_{19}H_{12}N_2O_5S$ Cinnamonitrile, 3 hydroxy-*α*-(2-naphthylsulfonyl)-4-nitro-, 402[7]
$C_{19}H_{12}N_2O_6$ Naphthalene, 1-(3,4-methylenedioxystyryl) 2,4-dinitro-, 3001[9].
$C_{19}H_{12}N_4$ Imidazophenazine, 2 phenyl, 1805[6]
$C_{19}H_{12}OS$ 5,6-Benzoflavone, 1-thio-, *and HgBr₂ addn compd*, 365[6,7]
$C_{19}H_{12}O_2$ 5,6-Benzoflavone, 2159[1]
$C_{19}H_{12}O_3$ Naphthalic anhydride, 6 benzyl, 1076[1].
$C_{19}H_{12}O_4$ 7 *meso*-Benzanthrenone, 5,6 or 8,9)-dihydroxy, monoacetate, 111[6]
$C_{19}H_{12}O_8S$ Sulfonegallein, *and salts*, 2491[5,6].
$C_{19}H_{13}Cl_2NO_2$ Anthranilic acid. N, N-bis(chlorophenyl)-, 1992[1]
$C_{19}H_{13}Cl_2N_3O_2$ Benzophenone, 4,5-dichloro-2-nitrophenylhydrazone, 750[8].
$C_{19}H_{13}I_2NO_2S$ Carbazole, 3,6-diiodo 9-*p* tolylsulfonyl-, 1805[3]
$C_{19}H_{13}NO_3$ 3,4-Benzacridine-12-carboxylic acid, 10 methoxy-, 598[1]
Ketone, 4-nitro-3 acenaphthenyl phenyl, 1076[2].
Picolinic acid, 4-acenaphthoyl, 764[8].

$C_{19}H_{15}NO_4$ Berberrubine, 3294[7]
Protoberberine, 2,3,9,10 bismethylenedioxy dihydro, 3298[1]
$C_{19}H_{15}NO_4S$ 1 Acenaphthenesulfonic acid, 3 benzamido, *Na salt*, 411[4]
$C_{19}H_{15}NO_5$ Ketone, 3,4 dimethoxyphenyl 6,7 methylenedioxy 3 isoquinolyl, *and sulfate*, 1058[9]
$C_{19}H_{15}NO_6$ 1,3(2,4) Isoquinolinedione, 7,8 methylenedioxy 2 piperonylmethyl, 3297[6]
$C_{19}H_{15}N_3$ Acenaphthotriazole, 4,5-dihydro 8 tolyl, 1081[4].
$C_{19}H_{15}N_3O_3$ Phenol, *p* {*p*-(4 keto-1-pyridyl) phenylazo}, acetate, 580[5]
$C_{19}H_{15}N_3S$ 1,4,3-Isothiodiazine, 2 naphthylamino 5 phenyl, *and HBr*, 416[5]
2-3(Thiazolone, 3 (1 naphthyl)-4 phenyl, hydrazone, *and HBr*, 416[5].
$C_{19}H_{15}N_5O_2$ Benzaldehyde, *m* nitro *α*-phenylazo-, phenylhydrazone, 2902[8]
$C_{19}H_{16}$ Acenaphthene, 3-benzyl, 1075[7]
Methane, triphenyl, 180[6], 403[2], 1948[7]
$C_{19}H_{16}AgN_2$ Pseudoindole, 2 methyl 3-(2 methyl 3 indylmethylene), Ag deriv, 414[6].
$C_{19}H_{16}AsNO$ Phenarsazine, 1 benzyloxy-1,6 dihydro-, 1606[9]
$C_{19}H_{16}BrNO_3S_2$ Rhodanine, 5-(5-bromovanillal) 3-(2,5 xylyl), 1086[9]
$C_{19}H_{16}ClN_5O_9$ 1-Imidazoleacetic acid, 5-chloro-2 phenyl-, Et ester, picrate, 1624[1].
$C_{19}H_{16}Cl_3NO_2$ 4 Quinolineëthanol, 6-methoxy-2 phenyl-*α* (trichloromethyl)-, 1413[3].
$C_{19}H_{16}CuN_2$ Pseudoindole, 2-methyl-3-(2-methyl 3-indylmethylene)-, Cu deriv., 414[6].
$C_{19}H_{16}NOSbSe$ Stibine, triphenyl-, hydroxyselenocyanate(?), 3289[6].

-...oloquinazo..., ...,10-tetramethyl-, 2160[8].
Quinoline, 4-(diacetylamino)-2-phenyl-, 3011[1].
Urea, α-acetyl-β-1-naphthyl-α-phenyl-, 2319[5].
$C_{19}H_{16}N_2O_4$ Propionanilide, α-(nitronaphthoxy)-, 1617[8], 1618[1,2].
Pyrazoledicarboxylic acid, diphenyl-, di-Me ester, 2495[8]
Quinazolone, methoxymethyl-2-(3,4-methylenedioxystyryl)-, 207[5]
$C_{19}H_{16}N_2O_5$ Ketone, 3,4-dimethoxyphenyl 6,7-methylenedioxy-3-isoquinolyl, oxime, 1084[1].
$C_{19}H_{16}N_4O$ 1,4-Imidazopyridin-2(3)-one, 3,3-dianilino-, 2858[9]
$C_{19}H_{16}N_4O_2$ 4-Quinolinepropionyl azide, 6-methoxy-2-phenyl-, 1413[5].
$C_{19}H_{16}N_4O_4$ 5-m-Tolylenediamine, 2,4-dinitro-N,N'-diphenyl-, 1222[9]
$C_{19}H_{16}N_4O_5$ m-Phenylenediamine, 5-methoxy-2,4-dinitro-N,N'-diphenyl-, 1609[8].
$C_{19}H_{16}N_4O_6$ Phenol, 3,5-dianilino-4-methoxy-2,6-dinitro-, 1394[6]
$C_{19}H_{16}N_4O_7S$ Aniline, N-methyl-p-phenylmercapto-, picrate, 371[7]
$C_{19}H_{16}N_4O_7$ 1-p-Phenetylpyridinium picrate, 586[3]
$C_{19}H_{16}O$ 3-Acenaphthenecarbinol, α-phenyl-, 1075[8]
Carbinol, triphenyl-, 17[1], 584[7], 1798[8], 3452[1]
2-Propanone, 1-(1-naphthyl)-1-phenyl-, 410[7]
$C_{19}H_{16}OS$ Sulfoxide, diphenylmethyl phenyl, 2669[8].
$C_{19}H_{16}O_2S$ Sulfone, diphenylmethyl phenyl, 2669[8]
$C_{19}H_{16}O_3S$ Thiochromone, 3-α-hydroxybenzyl-n-methyl-, acetate, 263[6]
$C_{19}H_{16}O_5$ 1,9-Anthradiol, 2-methoxy-, diacetate, 411[4].
4-Chromanone, 3-anisal-7-hydroxy-, acetate, 606[1]
$C_{19}H_{16}O_6$ Chromone, 5,7-dihydroxy-3-methoxy-2-(p-methoxystyryl)-, 196[9]
$C_{19}H_{16}O_8S$ Pyrogallolsulfonephthalin, *and Zn salt*, 2491[4].
$C_{19}H_{16}S$ Sulfide, benzohydryl phenyl, 375[2], 2669[8].
$C_{19}H_{17}Br_3$ Anthracene, 2,3,9-tribromo-10-isoamyl-, 3003[8]
$C_{19}H_{17}ClO_5$ Propionic acid (chlorobenzoyl)-hydroxyphenyl-, methyl ester, acetate, 3168[9]
$C_{19}H_{17}Cl_2N$ Anthrone, 1,5-dichloro-10-(1-piperidyl)-, 755[4,9]
$C_{19}H_{17}Cl_2NO$ Anthrone, 4,5-dichloro-10-(1-piperidyl)-, 2492[9]
$C_{19}H_{17}Cl_4FeO_4$ 2,3,6-Trimethoxy-2,3-indeno-3,2-γ-benzopyrylium ferrichloride, 2320[5]
$C_{19}H_{17}Cl_4FeO_5$ 2,3-[7-Methoxychromeno(4,3)]-6,7-dimethoxybenzopyrylium ferrichloride, 2320[5].
$C_{19}H_{17}HgI_3N_2$ Quinoline, complex salt with MeI and HgI_2, 3695[4].
$C_{19}H_{17}N$ 5,6-Benzoquinoline, 1,2,3,4-tetrahydro-3-phenyl-, 2331[9].
-- ...(p-cinnamyl-...)-, *salts*, 2156[9].
Benzyl alcohol, α-methyl-, 1-naphthalenecarbamate, 1232[9].
1-Naphthalenecarbamic acid, xylyl esters, 2319[6].
Neocinchophen, *salts*, P 424[7].
Phenethyl alcohol, 1-naphthalenecarbamate, 1232[9]
Propionanilide, α-1-naphthoxy-, 1617[6,9].
Quinaldine, α-anisal-4-methoxy-, *and -HCl*, 1626[2].
--, 4-methoxy-α-(o-methoxybenzal)-, *and -HCl*, 1626[3].
--, α-veratral-, 1626[4].
4-Quinolinepropionic acid, 2-phenyl-, Me ester, 1413[5].
1(1)-Quinolone, 2-(methoxystyryl)-1-methyl-, 1626[2,3].
Xylenol, 1-naphthalenecarbamate, 1232[9]
$C_{19}H_{17}NO_2S$ p-Toluenesulfonanilide, p-phenyl-, 2818[2]
$C_{19}H_{17}NO_3$ Benzyl alcohol, o-methoxy-, 1-naphthalenecarbamate, 1232[9].
$C_{19}H_{17}NO_4S$ Quinoline, 3-(o-anisylsulfonyl)-2-propenyl-, 419[2]
$C_{19}H_{17}NO_3S_2$ Rhodanine, 5-vanillal-3-(2,5-xylyl)-, 1080[1]
$C_{19}H_{17}NO_4$ 1,2-Benzopyran-3-carboxanilide, 6,8-dihydro-2,6-diketo-5,7,8-trimethyl-, 2320[8]
Isoquinoline, 6,7-methylenedioxy-3-veratryl-, 1084[1]
Protoberberine, 2,3,9,10-bismethylenedioxy-tetrahydro-, *and -HCl*, 3297[9].
$C_{19}H_{17}NO_5$ 3-Isoquinolinecarbinol, α-(3,4-dimethoxyphenyl)-6,7-methylenedioxy-, 1084[1]
Δ^2-5,5-Isoxazolinedicarboxylic acid, 3,4-diphenyl-, di-Me ester, 2327[3]
$C_{19}H_{17}NO_6$ Δ^2-5,5-Isoxazolinedicarboxylic acid, 3,4-diphenyl-, N-oxide, di-Me ester, 2327[2]
$C_{19}H_{17}NO_7$ Homophthal-1-amic acid, 3,4-methylenedioxy-N-piperonylmethyl-, 3297[9].
$C_{19}H_{17}N_3$ 3-Acenaphthenamine, 2-m(o and p)-tolylazo-, 1081[1]
Compds., m. 176° and 238°, from $ClCH_2CO_2H$ and KCN, 2996[1].
Guanidine, α,β,γ-triphenyl-, 1081[5], 1223[3]
α,β-Naphthotriazole, 2-ψ-pseudocumyl-, 1080[8]
$C_{19}H_{17}N_3O_4$ 4-Pyrazolecarboxylic acid, 5-methyl-3-(nitrophenyl)-1-phenyl-, Et ester, 599[7].
$C_{19}H_{17}NaO_3$ Crotonic acid, α-(α-hydroxy-γ-phenylpropoxy)-γ-phenyl-, lactone, Na deriv., 1232[8].
Isocrotonic acid, α-(α-hydroxy-γ-phenylpropoxy)-γ-phenyl-, lactone, Na deriv., 1232[8]
$C_{19}H_{18}BrNO_6$ Malonic acid, bromo(β-nitro-α,β-diphenylethyl)-, di-Me ester, 2327[2].
$C_{19}H_{18}Br_2O_6$ Piperonyl alcohol, 2-bromo-α-(α-bromoethyl)-5,6-dimethoxy-, benzoate, 3450[2].
$C_{19}H_{18}ClNO_5$ Propionic acid (chlorobenzoyl)-hydroxyphenyl-, methyl ester, oxime, acetate, 3168[9].

$C_{19}H_{18}Cl_2O_2$ 1,7-Heptanedione, 1,7-bis(*p*-chlorophenyl)-, 1229^6.

$C_{19}H_{18}INO_4$ Iodide from berberine sulfate, 1086^2.

$C_{19}H_{18}N_2O$ *p*-Cresol, α,α-bis(*p*-aminophenyl)-, 2836^6.

$C_{19}H_{18}N_2O_2$ 6,12-Indoloquinazolinedione, 11,11$_1$-dihydro-2,4,8,10-tetramethyl-, 2160^7.
 4-Pyrazolecarboxylic acid, 5-methyl-1,3-diphenyl-, Et ester, 599^7.

$C_{19}H_{18}N_2O_3$ 2-Indanglyoxylic acid, 1-keto-, Et ester, phenylhydrazone, 1077^9.
 4(3)-Quinazolone, 2-(3,4-dimethoxystyryl)-3-methyl-, 207^3.

$C_{19}H_{18}N_4O_3$ 3(2)-*s*-Tetrazinone, 1,2-diacetyl-1,4-dihydro-4-phenyl-6-*p*-tolyl-, 1084^9.

$C_{19}H_{18}N_4O_4$ 1,4-Piperazinedicarboxanilide, 2,5-diketo-3-methyl-, 915^8.

$C_{19}H_{18}N_4O_7S$ 2-Thiophenemethylamine, *N*-benzyl-*N*-methyl-, picrate, 390^8.

$C_{19}H_{18}N_4S$ Cinnamaldehyde, thiocarbohydrazone, 1811^1.

$C_{19}H_{18}O_2$ Flavone, 3-isopropyl-6-methyl-, 1237^7.
 Flavone, 6-methyl-3-propyl-, 1237^7.

$C_{19}H_{18}O_2S$ Thiochromone, 3-α-ethoxybenzyl 6-methyl-, 203^6.

$C_{19}H_{18}O_3$ 1,2-Benzopyran, 2-(*o*-hydroxystyryl) 2-methoxy-3-methyl-, 3008^3.
 Chromone, 3-benzyl-7-methoxy-2,5-dimethyl-, 197^2.
 Crotonic acid, α-(α-hydroxy-γ-phenylpropoxy)-γ-phenyl-, lactone, 1232^5.
 Ethylene oxide-α-carboxylic acid, β-hydroxy-α,β-diphenethyl-, lactone, 1798^6, 2157^1.
 Isocrotonic acid, α-(α-hydroxy-γ-phenylpropoxy)-γ-phenyl-, lactone, 1232^5.
 Pentadienone, di-anisyl-, 403^6; *and salts*, 180^7.

$C_{19}H_{18}O_4$ 1-Indanone, 5,6-dimethoxy-2-(*m*-methoxybenzal)-, 2326^4.
 Malic anhydride, α-benzyl-β-phenethyl-, 2673^6.
 Mandelic acid, Et ester, cinnamate, 378^7
 β-Truxinic acid, mono-Me ester, 2664^8.

$C_{19}H_{18}O_5$ $\Delta^{1,4}$-Pentadienone, 1,5-bis(hydroxyanisyl)-, 2833^{4,6}.

$C_{19}H_{18}O_6$ 2(1)-Benzofuranone, 3,5-dimethoxy-1-veratral-, 2326^4.
 Flavone, 3,5,7,4′-tetramethoxy-, 1991^1.
 1-Phenanthrenecarboxylic acid, 3,4,6,7-tetramethoxy-, 1406^3.

$C_{19}H_{18}O_7$ 2,3-Chromandione, 4-(3,4-dimethoxyphenyl)-5,7-dimethoxy-, 2489^4.
 Coumarin, 4-(3,4-dimethoxyphenyl)-3-hydroxy-5,7-dimethoxy-, 2489^4.
 Santalin, diacetyl-, 1405^3.

$C_{19}H_{18}Pb$ Plumbane, methyltriphenyl-, 2668^9.

$C_{19}H_{19}Br_5$ Anthracene, 1,2,3,4,9-pentabromo-1,2,3,4-tetrahydro-10-isoamyl-, 3003^8.

$C_{19}H_{19}ClO_3$ 4-*p*-Anisyl-7-methoxy-2,3-dimethylbenzopyrylium chloride, *and $FeCl_3$ compd.*, 3454^9, 3455^1.

$C_{19}H_{19}ClO_5$ 3-(3,4-Dimethoxyphenyl)-5,7-dimethoxybenzopyrylium chloride, 3007^6.
 2-(3,4-Dimethoxyphenyl)-7-hydroxy-3-methoxy-5-methylbenzopyrylium chloride, *and $FeCl_3$ compd.*, 3456^9.

$C_{19}H_{22}N_{10}O_{17}$ Propionic acid, α(or β)-amino-β(or α)-(α,β-diaminopropionylamino)-, Me ester, dipicrate, 2983[4].
$C_{19}H_{22}O_2$ Xanthydrol, 9-hexyl-, *perchlorate*, 392[7].
$C_{19}H_{22}O_3S_2$ Benzophenone, 4,4′-diethoxy-3,3′-dimethylthio-, 2977[1]; *and HgBr₂ and HgCl₂ addn. compds.*, 3651[1,2].
$C_{19}H_{22}O_4$ Chalcone, 4,4′-dimethoxy-, dimethyl acetal, 403[4].
Chroman, 7-methoxy-3-veratryl-, 2326[1].
$C_{19}H_{22}O_5$ Acetophenone, 2,4-dimethoxy-6-veratryloxy-(?), 3007[6].
Chroman, 3-(3,4-dimethoxyphenyl)-5,7-dimethoxy-, 405[5], 3007[4,8].
$C_{19}H_{22}O_6$ Acetophenone, α-(3,4-dimethoxyphenyl)-2,4,6-trimethoxy-, 405[4], 3007[5].
—, 2,4-dimethoxy-6-veratryloxy-, 405[6].
2-Benzofuranol, 1-(3,4-dimethoxyphenyl)-1,2-dihydro-3,5-dimethoxy-2-methyl-, 405[8], 3007[5].
1,2-Benzopyran-3-carboxylic acid, 6-hydroxy-2-keto-5,7,8-trimethyl-, Bu ester, acetate, 2320[7].
Catechol, tetramethyl-, 3006[7].
$C_{19}H_{23}NO_3$ Morphimethine, methyl-, 1795[5,6].
Morphine, ethyl-, 924[2], 1493[9], 1687[7], 1795[5].
Phthalimide, *N*-[β-keto-β-(1,2,2,3-tetramethylcyclopentyl)ethyl]-, 1399[3].
Spiro[cyclopentane-1,2′-1,4-oxazine-5′(6′),1′′-cyclopentane], 3′,4′-dihydro-3′,6′-diketo-4′-*p*-tolyl-, 2831[3].
Valeramide, δ-phenyl-*N*-vanillyl-, 404[8].
$C_{19}H_{23}N_3O$ 3-Pentanone, 2-benzyl-1-phenyl-, semicarbazone, 2997[6].
$C_{19}H_{23}N_3O_3$ Isoquinoline, 1-(2,4-diaminobenzyl)-1,2,3,4-tetrahydro-8-methoxy-2-methyl-6,7-methylenedioxy-, 3457[9].
Niquine, *N*-nitroso-, 1994[1].
$C_{19}H_{23}N_3O_8$ Oxime of compd. from "Hanssen's acid," *-HCl*, 399[1].
$C_{19}H_{23}N_9O_{13}$ Hexamethylguanidinium picrate, *s*-trinitrobenzene addn. compd., 374[9].
$C_{19}H_{23}N_9O_{14}$ Hexamethylguanidinium picrate, picrate, 374[9].
$C_{19}H_{24}Br_2N_2O_2$ Niquine, dibromo, *and -HBr*, 1994[1].
$C_{19}H_{24}ClNO_3$ + $2H_2O$. See *Dionine*.
$C_{19}H_{24}N_2O$ Urea, *s*-bis(α-methylphenethyl)-, 592[7].
$C_{19}H_{24}N_2O_2$ Niquine, 1993[9].
Propene, 1,3-diphenyl, nitrodiethylamine deriv., m. 93°, 1401[3].
Propionamidine, *N*, *N*′-di-*p*-phenetyl-, 1218[6]
$C_{19}H_{24}N_2O_2S$ Benzenesulfonamide, *N*-(1,3-dihydro-2-isoindyl)amyl-, 418[2].
—, *N*-*o*-1-piperidylmethylbenzyl-, 418[2].
$C_{19}H_{24}N_2O_3$ 2-Benzofuranpropionic acid, 1,2,3,4,5,6 hexahydro-1-keto-, Et ester, phenylhydrazone, 1989[4].
$C_{19}H_{24}N_2O_4$ Camphoceanonitrile, 3-(α-hydroxypropyl), *o*-nitrobenzoate, 2999[5].
$C_{19}H_{24}N_2O_5$ Talose, benzylphenylhydrazone, 904[9].
$C_{19}H_{24}N_2S$ Carbanilide, hexamethylthio-, 2314[1].
$C_{19}H_{24}N_4O_4$ Galactose, 6-Me ether, osazone, 1597[3].
β(?)-*d*-[1,5(?)]-Glucose, 4-methyl-, osazone, 170[9].
$C_{19}H_{24}N_4O_6$ 3-Pyrrolecarboxylic acid, 2,2′-methylenebis[5-formyl-4-methyl-, di-Et ester, dioxime, 2159[8].
$C_{19}H_{24}N_6O_{11}S$ *p*-Toluenesulfono-*p*-phenetide, 3,2′,3′,6′ tetranitro-, Et_2NH addn. compd., 400[3].
$C_{19}H_{24}O_3$ Camphor, 3-(hydroxymethyl), α-toluate, 1228[1].
Δ^2-1-Propenone, 3-hydroxy-1-(1,2,2,3-tetramethylcyclopentyl)-, benzoate, 1399[8].
$C_{19}H_{24}O_4$ 9,10-Anthradiol, 1,2,3,4,5,6,7,8-octahydro-2-methyl-, diacetate, 1405[4].
Propiophenone, β-*p*-anisyl-*p*-methoxy-, dimethyl acetal, 403[3].

$C_{19}H_{24}O_5$ Taxinol, 767[5].
$C_{19}H_{24}O_{11}S$ Glucose, 2,5,6-triacetyl-3-toluenesulfonyl-, 2663[2].
$C_{19}H_{24}Pb$ Plumbane, cyclohexylmethyldiphenyl-, 2669[1].
$C_{19}H_{25}NO$ Camphidone, 3-benzyl-4-ethylidene-, 2999[4].
Triethylamine, *β*-(1-allyl-2-naphthoxy)-, P 2392[7].
$C_{19}H_{25}NO_2$ 2-Octanol, 1-naphthalenecarbamate, 1233[1].
$C_{19}H_{25}NO_3$ Morphine, ethyldihydro-, 2165[1].
$C_{19}H_{25}NO_4$ Phthalamic acid, *N*-[*β*-keto *β*-(1,2,2,3 - tetramethylcyclopentyl)ethyl]-, 1399[3].
$C_{19}H_{25}NO_5$ Ozomorphine, ethyldihydro-, *and* -*HI*, 2165[1,5].
$C_{19}H_{25}NO_6$ Glucosyl-3-amine, diacetone-, Bz deriv., 2662[9].
$C_{19}H_{25}N_5O_9S$ *p* - Toluenesulfono - *p* - phenetide, 3,2′,3′-trinitro-, Et_2NH addn. compd., 400[7]
$C_{19}H_{26}$ Methane, cyclohexylcyclohexylidenephenyl-, 2328[5]
$C_{19}H_{26}INO_5$ Ozocodeine, dihydro-, methiodide, 2165[4].
$C_{19}H_{26}N_2O_3$ Julocrotine, 2332[3]
$C_{19}H_{26}N_2O_6$ 1,1,2-Butanetricarboxylic acid, 3 keto-, tri-Et ester, phenylhydrazone, 3690[2].
Nipecotic acid, 1-butyl-4-hydroxy-, Et ester, *p*-nitrobenzoate, -*HCl*, 3010[5]
—, 4-hydroxy-1-isobutyl-, Et ester, *p* nitrobenzoate, -*HCl*, 3010[6]
$C_{19}H_{26}N_4O_9$ 1,1′-Spirobipiperidine-4 carboxylic acid, *N*-hydroxy-, picrate, Et ester, 385[6]
$C_{19}H_{26}O_2$ Cyclopentanecarbinol, 1,2,2,3 tetramethyl-, cinnamate, 1399[2].
$C_{19}H_{26}O_3$ Benzoic acid, *o* acetyl-, menthyl ester, 1800[2].
Ketone, hydroxymethyl 1,2,2,3-tetramethylcyclopentyl, *α*-toluate, 1399[8]
$C_{19}H_{26}O_8S$ Fructose, *α*-diacetone-3-toluenesulfonyl-, 2663[2]
$C_{19}H_{26}O_{10}$ 3,4,4,5-Heptanetetracarboxylic acid, 2,6-diketo-, tetra-Et ester, 3690[1]
1,1,2,3-Pentanetetracarboxylic acid, 2 acetyl-4-keto-, tetra-Et ester, 3690[1]
$C_{19}H_{27}$ Methyl, tris(*tert*-butylethinyl)-, 190[3]
$C_{19}H_{27}BrN_2O_2$ Glyoxylic acid, bromo-, menthyl ester, *p* tolylhydrazone, 415[4].
$C_{19}H_{27}Cl$ Methane, (1-chlorocyclohexyl)cyclohexylphenyl-, 2328[6].
Methane, chlorodicyclohexylphenyl-, 190[1]
Methane, tris(*tert*-butylethinyl)chloro-, 190[2]
$C_{19}H_{27}NO$ Δ[2]-1-Propenone, 1-(1,2,2,3-tetramethylcyclopentyl)-3-(*p*-toluino)-, 1399[8].
$C_{19}H_{27}NO_2S$ 1-Propanone, 3-hydroxy 1-(1,2,2,3 tetramethylcyclopentyl)-, thionocarbanilate, 1399[8]
$C_{19}H_{27}NO_4$ Nipecotic acid, 1-butyl-4-hydroxy-, Et ester, benzoate, *salts*, 3010[2].
—, 1-*sec*-butyl-4-hydroxy-, Et ester, benzoate, -*HBr*, 3010[9].
—, 4-hydroxy-1-isobutyl-, Et ester, benzoate, -*HCl*, 3010[3].
$C_{19}H_{27}NO_5$ 5-Desoxymorphinic acid, dihydro-, Et ester, 2165[7].
$C_{19}H_{27}NO_6S$ Alanine, phenyl-, camphorsulfonate, 2324[9], 2325[1].
$C_{19}H_{28}BrNO_2$ 1,1′-Spirobi[piperidine]-4-carboxylic acid, *N*-bromo-4′-phenyl-, ethyl ester, 690[1].
$C_{19}H_{28}INO_5$ 5-Desoxymorphinic acid, dihydro-, Me ester, methiodide, 2165[6].

$C_{20}H_{14}N_4O$ Imidazophenazine, 2-p-anisyl-, 1805[6]
1(2) - Quinolinenitrile, 2,2′ - oxybis - (?), 2680[3].
$C_{20}H_{14}N_4O_2$ Hydrazine, s - dicinchoninyl-, 2672[6].
$C_{20}H_{14}N_4O_7$ 6,7 - Benzoquinoline, 2 - methyl-, picrate, 1628[1].
$C_{20}H_{14}OS$ 2 Naphthol, 1-(2-naphthylmercapto)-, 3280[7]
2(1) - Thionaphthenone, 1,1 - diphenyl-, 375[2].
$C_{20}H_{14}O_2$ 1,2 - α - Naphthopyrone, 4 - methyl-3-phenyl-, 595[7].

9-Phenanthrol, 10-phenoxy-, 412[8].
Phthalide, diphenyl-, 751[1], 2490[9].
$C_{20}H_{14}O_2S_2$ 3,3′-Bithiochromone, 6,6′-dimethyl-, 203[4].
o-Phenylenedimercaptan, dibenzoate, 1797[7].
$C_{20}H_{14}O_3$ Benzophenone, p-hydroxy-, benzoate, 2158[7].
$C_{20}H_{14}O_4$ (See also *Isophenolphthalein; Phenolphthalein.*)
7-*meso*-Benzanthrenone, hydroxymethoxy-, acetate, 411[6,7].
1,1′-Bi[naphthalene]-3,4,3′,4′-tetrol, 383[4].
Muconic acid, β,γ-dihydroxy-α,δ-di-p-tolyl-, dilactone, 2849[8].
$C_{20}H_{14}O_4S_2$ 3,3′-Bithiochromone, 6,6′-dimethoxy-, 203[5].
$C_{20}H_{14}O_5$ 1,1,2-Ethanetriol, 1,2-bis(2,4-dihydroxyphenyl)-2-phenyl-, anhydride, 2324[3].
$C_{20}H_{14}O_6$ Acetophenone, α-2-furyl-α-hydroxy-3,4-methylenedioxy-, benzoate, 1615[9].
Ketone, 2-furyl-α-hydroxypiperonyl, benzoate, 1615[9].
$C_{20}H_{14}O_7$ Atromentin, 406[1].
$C_{20}H_{15}BrO_7$ Compd., m. 192–3°, from the diacetate of 1-bromo-1-(α-bromo-o-methoxybenzyl)-3,5-dihydroxy-2(1)-benzofuranone, 195[5].
$C_{20}H_{15}Br_2N$ 10-Bromo-9-anthrylmethylpyridinium bromide, 3003[7].
$C_{20}H_{15}Br_2N_3O_2$ Benzoic acid, p-nitrobenzalhydrazide, 2,4-dibromophenylhydrazone, 1085[3].
$C_{20}H_{15}ClO$ o-Toluyl chloride, α,α-diphenyl-, 591[6].
$C_{20}H_{15}ClOS$ Acetyl chloride, diphenylphenylmercapto-, 375[2].
$C_{20}H_{15}ClO_5$ Xanthydrol, 9-p-chlorobenzyl-, *perchlorate*, 392[5].
$C_{20}H_{15}CuNO_2$ Benzoin, α-phenyl-, oxime, Cu deriv., 1055[7].
$C_{20}H_{15}IN_2$ Dye, m. above 330°, from 2,2′-methylenebisquinoline and CH_2I_2, 2330[3].
$C_{20}H_{15}N$ Acetonitrile, triphenyl-, 134[4], 584[8].
Benzoquinoline, methylphenyl-, *and salts*, 418[8].
Di-2-naphthylamine, 134[4].
$C_{20}H_{15}NO$ Benzoquinolinol, methylphenyl-, 419[1].
Isocyanic acid, α,α-diphenyl-p-tolyl ester, 591[6].
$C_{20}H_{15}NO_2$ Dibenzamide, N-phenyl-, 745[4].
$C_{20}H_{15}NO_3$ Picolinic acid, 4-acenaphthoyl, Me ester, 764[2].
$C_{20}H_{15}N_3O$ 2(1)-Quinoxalone, 3-(α-4-pyridylbenzyl)-, 188[1].
$C_{20}H_{15}N_3O_4$ 4,5-α,β-Naphthotriazolediol, 2-phenyl-, diacetate, 2859[6].
Salicylaldehyde, p-nitrobenzoate, phenylhydrazone, 399[5].
—, o-nitrophenylhydrazone, benzoate, 745[9].
$C_{20}H_{15}N_5$ 2,3-α-Quinoxalophenazine, 6-aminodimethyl-, 2842[6].
$C_{20}H_{15}N_5O$ Benzoyl-C-iminodiphenyltetrazolium betaine, *and salts*, 1224[4].
$C_{20}H_{15}N_5O_7$ Indazole, 3-p-tolyl-, picrate, 2496[6].
$C_{20}H_{15}N_5O_8$ Indazole, 3-p-anisyl-, picrate, 2496[7].
$C_{20}H_{16}BNO_8$ Phenanthrenequinone, 4-acetamido-1-hydroxy-, boroacetate, 1052[9].
$C_{20}H_{16}Br_2N_4$ Benzoic acid, benzalhydrazide, 2,4-dibromophenylhydrazone, 1085[3].
$C_{20}H_{16}Br_2O_2S_2$ 3,3′-Bi[thiochroman]-4,4′-dione, 3,3′-dibromo-6,6′-dimethyl-, 203[4].
$C_{20}H_{16}Br_2O_7$ 2(1)-Benzofuranone, 1-bromo-1-(α-bromo-o-methoxybenzyl)-3,5-dihydroxy-, diacetate, 195[4].
$C_{20}H_{16}N_2$ 2,2′-Biquinoline, dimethyl-, *and -HCl*, 205[4].
$C_{20}H_{16}N_2O_2$ Cinnamaldehyde, oxime, 1-naphthalenecarbamate, 179[6].
Ketiponitrile, α,δ-di-p-tolyl-, 2849[4].
$C_{20}H_{16}N_2O_6S_2$ Maleanilic acid, o,o′-dithiobis-, 600[2].
$C_{20}H_{16}N_4O_2$ Condensation product, m. 165–6°, from 1,5-diphenyl-1,2,3-triazole-4-aldehyde and Et cyanoacetate, 416[9].
$C_{20}H_{16}N_4O_3$ Benzophenone, 4-(m-nitrophenyl)semicarbazone, 175[6].
$C_{20}H_{16}N_4O_4$ Anthranilic acid, N-benzoyl-, β-(m-nitrophenyl)hydrazide, 206[9].
$C_{20}H_{16}N_4O_6$ 1,2,3,6-Dioxdiazine, 4,5-dibenzoyl-, dioxime, di-Ac deriv., 746[2].
$C_{20}H_{16}N_6O_3$ 1,2,3-Triazole-4-carboxylic anhydride, 5-methyl-1-phenyl-, 416[9].
$C_{20}H_{16}O$ Acetaldehyde, triphenyl-, 1988[6].
Acetophenone, α,α diphenyl-, 2999[9].
Benzophenone, p-(p-tolyl)-, 1988[3].
$C_{20}H_{16}O_2$ Acetic acid, triphenyl-, *Ag salt*, 409[2].
Acrylonaphthone, methoxy-β-phenyl-, 1616[8,9].
Benzoin, α-phenyl-, 47[1].
Δ²-Cyclopentenone, 4,5-dibenzal-2-hydroxy-3-methyl-, 2484[3].
Toluic acid, α,α-diphenyl-, *and hydroxyammonium salt*, 591[6,7].
$C_{20}H_{16}O_2S$ Acetic acid, diphenylphenylmercapto-, *and salts*, 375[1].
$C_{20}H_{16}O_2S_2$ $\Delta^{3,3'}$-Bi[thiochroman]-4,4′-dione, 6,6′-dimethyl-, 203[3].
$C_{20}H_{16}O_4S_2$ $\Delta^{3,3'}$-Bi[thiochroman]-4,4′-dione, 6,6′-dimethoxy-, 203[4].
$C_{20}H_{16}O_6$ Coumarin, 7,8-dihydroxy-4-methyl-3-phenyl-, diacetate, 595[7].
Isoflavone, dihydroxymethyl-, diacetate, 196[7], 197[2].
$C_{20}H_{16}O_7$ 2(1)-Benzofuranone, 3,5-dihydroxy-1-o-methoxybenzal-, diacetate, 195[4].
$C_{20}H_{16}O_8S$ Pyrogallolsulfonephthalein, mono-Me ether, 2491[4].
$C_{20}H_{16}O_{10}$ Compd., m. 217–8°, from quinone, 3695[2].
β-Resorcylic acid, 4-β-resorcylate, triacetate, 2488[9].
$C_{20}H_{17}AsN_2O_5$ Benzenearsonic acid, 3,4-dibenzamido-, 1605[9].
$C_{20}H_{17}Br_2NOS_2$ Rhodanine, 5-(α,β-dibromo-β-phenylpropylidene)-3-(2,5-xylyl)-, 1080[4].
$C_{20}H_{17}ClN_4O_4$ m-Phenylenediamine, 5-chloro-2,4-dinitro-N,N′-di-p-tolyl-, 1222[7].
$C_{20}H_{17}Mo_2NO_{22}$ Pyridine monogallatodimolybdate, 3406[1].
$C_{20}H_{17}NO$ Dimethylene-1,3-oxaimine, 2,3,3-triphenyl-, 421[3].
Toluamide, α,α-diphenyl-, 591[6,7].
$C_{20}H_{17}NOS_2$ Rhodanine, 5-cinnamal-3-(2,5-xylyl)-, 1080[4].
$C_{20}H_{17}NO_2$ 5,6-Benzocinchoninic acid, 1,2,3,4-tetrahydro-3-phenyl-, 2231[5].
Cinnamic alcohol, 1-naphthalenecarbamate, 1232[9].
Toluhydroxamic acid, α,α-diphenyl-, 591[6,7].

$C_{20}H_{17}NO_3$ 4 - Quinolineacrylic acid, 6 - methoxy - 2 - phenyl-, Me ester, 1413^{4}.
$C_{20}H_{17}NO_4$ (See also *Berberine.*)
Muconamic acid, β,γ - dihydroxy - α, δ - di-*p*-tolyl-, lactone, 2849^{6}.
$C_{20}H_{17}NO_5$ Oxyberberine, 1085^{9}.
$C_{20}H_{17}N_3$ Benzaldehyde, *o* - benzalaminophenylhydrazone, 745^{7}.
$C_{20}H_{17}N_3O_3$ Compd., decomps. 167°, from $ClCH_2CO_2H$ and KCN, *and salts*, 2996^{4}.
$C_{20}H_{17}N_3O_5$ 3,4 - Pyrazoledicarboxylic acid, 1-[*p* - (*p* - acetamidophenyl)phenyl] - 5 - methyl-, *and K salts*, 599^{2}.
$C_{20}H_{17}N_5$ Compd., m. 222–3°, from benzoyl-*C* - iminodiphenyltetrazolium betaine, 1224^{8}.
$C_{20}H_{17}N_5S$ Phenazine, 2 - amino - 3 - (thio - β *o* tolylcarbamido)-, 1805^{7}.
$C_{20}H_{18}$ Butadiine, di(2,4 - xylyl)-, 1783^{4}.
$C_{20}H_{18}Br_6N_2$ Isoquinoline, -HBr, $C_2H_2Br_4$ addn. compd., 1086^{5}.
Quinoline, -HBr, $C_2H_2Br_4$ addn. compd., 1086^{5}.
$C_{20}H_{18}Cl_2N_2O_4$ Biacetoacetanilide, dichloro-, 3822^{4}.
$C_{20}H_{18}Cl_2O_4Sn$ Stannane, bis(acetylphenacyl)-dichloro-, 403^{1}.
$C_{20}H_{18}Cl_2O_4Zr$ Bis(α - acetylphenacyl)zirconium dichloride, 403^{1}.
$C_{20}H_{18}Cl_6O_4$ Diisoeugenol, hexachloro-, 748^{2}.
$C_{20}H_{18}CuO_4$ Acrylophenone, β - hydroxy - *p* - methyl-, Cu deriv., 1590^{8}.
$C_{20}H_{18}CuO_6$ Acrylophenone, β - hydroxy - *p* - methoxy-, Cu deriv., 1590^{8}.
$C_{20}H_{18}Hg$ 1 - Butine, 1,1' - mercuribis[4 - phenyl-, 1054^{2}.
$C_{20}H_{18}N_2$ Acetamidine, *N*, *N*, *N'* - triphenyl-, 1709^{4}.
Benzylamine, *N* - phenyl - α - (*o* - tolylimino)-, 1799^{5}.
$C_{20}H_{18}N_2O_2$ Carbanilide, *p* - methyl - *p'* - phenoxy-, 1603^{4}.
1,4 - Naphthylenediamine, *N*, *N'* - diacetyl-5-phenyl-, 1401^{6}.
$C_{20}H_{18}N_2O_4$ 6,12(5_1,11_1) - Diindolouretedione, 5_1,11_1 - dihydroxy - 2,4,8,10 - tetramethyl-, 2160^{7}.
β - Isatoid, tetramethyl-, 2160^{7}.
4 - Pyrazolecarboxylic acid, 5 - methyl - 3 - (3,4 - methylenedioxyphenyl) - 1 - phenyl-, Et ester, 599^{8}.
$C_{20}H_{18}N_2O_6$ Indigotin, 4,7,4',7' - tetramethoxy-, 178^{9}.
$C_{20}H_{18}N_4$ Buzylene, 3 - benzal - 2 - benzyl - 1-phenyl-, 2992^{8}.
$C_{20}H_{18}N_4O$ Anisaldehyde, α - phenylazo-, phenylhydrazone, 2992^{5}.
$C_{20}H_{18}N_4O_7$ Acridine, 1,2,3,4 - tetrahydro - 2 - (or 4) - methyl-, picrate, 1628^{6}.
Benzoquinoline, tetrahydromethyl-, 1627^{9}, 1628^{1}.
$C_{20}H_{18}N_4O_7S$ 2 - Thiophenemethylamine, *N*-allyl - *N* - phenyl-, picrate, 390^{8}.
$C_{20}H_{18}N_4O_8$ Benzylamine, phenoxymethyl-, picrate, 391^{6,7}.
$C_{20}H_{18}O$ Benzohydrol, *p* - (*p* - tolyl)-, 1988^{2}.
Cyclohexanone, dibenzal-, 1792^{7}.
$C_{20}H_{18}O_2$ Terephthalyl alcohol, α,α' - diphenyl-, 3451^{8}.
$C_{20}H_{18}O_2Sn$ Acetic acid, (triphenylstannyl)-, 1607^{8}.
$C_{20}H_{18}O_3$ Benzyl alcohol, *o* - (*p*,*p'* - dihydroxybenzohydryl)-, 1251^{6}.
$C_{20}H_{18}O_4$ Chromone, 3 - benzyl - 7 - hydroxy-2,5 - dimethyl-, acetate, 197^{2}.
3 - Furancarboxylic acid, 3 - benzyl - 2,3-dihydro - 2 - keto - 5 - phenyl-, Et ester, 404^{7}.
$C_{20}H_{18}O_5$ Cinnamic anhydride, *p*,*p'* - dimethoxy-, 196^{4}.
$C_{20}H_{18}O_6$ 1,9(or 1,10) - Anthradiol, 2,7 - dimethoxy-, diacetate, 411^{7}.
Chromone, 5 - hydroxy - 3,7 - dimethoxy-2 -(*p*- methoxystyryl)-, 196^{4}.
$C_{20}H_{18}O_7$ Chromone, 2 - (3,4 - dimethoxystyryl)-5,7 - dihydroxy - 3 - methoxy-, 196^{4}.
$C_{20}H_{18}O_8$ Tartaric acid, dibenzoate, di-Me ester, 1789^{5}.
$C_{20}H_{18}O_9$ Alizarin, glucoside, 2679^{3}.
Chrysazin, glucoside, 2679^{4}.
$C_{20}H_{18}O_{10}$ Purpurin, glucoside, 2679^{4}.
$C_{20}H_{19}BrPb$ Plumbane, bromodiphenyl - 2,5-xylyl-, 2669^{1}.
$C_{20}H_{19}Cl_4FeO_6$ 2,3,7,8(and 2,3,8,9) - Tetramethoxy - 2,3 - indeno - 3,2 - γ - benzopyrylium ferrichloride, 2326^{4,5}.
$C_{20}H_{19}HgI_2N_2$ Quinoline, complex salt with EtI and HgI_2, 3695^{9}.
$C_{20}H_{19}N$ Compd., m. 88°, from piperidine and BzH, 2849^{3}.
Dibenzylamine, *N*-phenyl-, 2155^{9}.
$C_{20}H_{19}NO$ Benzohydrol, α - (α - aminobenzyl)-, 588^{8}.
$C_{20}H_{19}NO_2$ Benzyl alcohol, α - ethyl-, 1 - naphthalenecarbamate, 1232^{9}.
Cinchophen, 6 - methyl-, Pr ester, *salts*, P 424^{7}.
Truxillimide, *N* - ethyl-, 1391^{9}, 1392^{7}.
$C_{20}H_{19}NO_2S$ *p* - Toluenesulfonanilide, *N* - methyl-*p*-phenyl-, 2848^{7}.
$C_{20}H_{19}NO_3$ Acetanilide, *m*(and *p*) - (β - *p* - methoxycinnamylvinyl)-, *salts*, 2156^{9}, 2157^{1}.
4 - Quinolinepropionic acid, 6 - methoxy - 2 - phenyl-, Me ester, 1413^{5}.
$C_{20}H_{19}NO_4$ Anhydrodihydroprotopine A, 3297^{9}.
Columbamine, 3294^{9}.
Jatrorrhizine, 603^{9}
Palmatrubine, 3294^{7}.
Paraberine, 7,12 - dihydro - 2,3(or 9,10)-dimethoxy - 9,10(or 2,3) - methylenedioxy-, *and salts*, 1084^{3}
Truxillacetamidic acid, 1392^{5}.
$C_{20}H_{19}NO_5$ Anydrodihydroprotopine oxide, *and -HCl*, 3298^{1}.
Protopine, 3297^{8}.
$C_{20}H_{19}NO_6$ 1,3(2,4) - Isoquinolinedione, 6,7-(and 7,8) - methylenedioxy - 2 - (veratrylmethyl)-, 3297^{7}.
$C_{20}H_{19}NO_7$ Homophthal - 1 - amic acid, 3,4-methylenedioxy - *N* - piperonylmethyl-, Me ester, 3297^{9}.
$C_{20}H_{19}N_3$ Aniline, *N*, *N* - dimethyl - *p* - (*p*-phenylphenylazo)-, *and -HCl*, 585^{4}.
$C_{20}H_{19}N_5$ Indanine - 3 - azodimethylaniline, 2836^{7}.
Quinonediimine, *N* - [*p* - (*p* - dimethylaminophenylazo)phenyl]-, 2836^{7}.
$C_{20}H_{19}N_5O_6$ Guanidine, β - (γ - methyl - Δ^3-butenyl) - α,γ - bis(*m* - nitrobenzoyl)-, 1057^{9}.
$C_{20}H_{19}N_5S_2$ Semicarbazide, 4 - phenyl - 1 - [*o*-(β-phenylthiocarbamido)phenyl]-, 745^{7}.
$C_{20}H_{20}As_2I_2N_4O_6$ *p* - Arsenophenol, 3,5,3',5'-tetraacetamido -2,2'- diiodo-, 1607^{8}.
$C_{20}H_{20}BrNO_3$ Norcodeine, bromo - *N* - propargyl , 3012^{6}.

$C_{20}H_{20}ClNO_4$ Isodihydroprotopine - β - chloride, 3297[9].

$C_{20}H_{20}Cl_2N_2O_2$ Naphthalene, 1,2 - dihydro-, bisnitrosochloride, 383[2].

$C_{20}H_{20}CoMoN_4O_4$ Cobalt pyridine molybdate, 1185[1].

$C_{20}H_{20}HgI_4N_2$ Quinoline, complex salt with MeI and HgI_2, 3695[9].

$C_{20}H_{20}INO_2$ α - Anisal - 4 - methoxy - 1 - methylquinaldinium iodide, 1626[2].

$C_{20}H_{20}INO_6$ 3,4 - Dihydro - 2 - methyl - 6,7-methylenedioxy - 1 - veratroylisoquinolinium iodide, 206[1].

$C_{20}H_{20}N_2$ Phenylenediamine, dimethyldiphenyl-, 3161[5].

$C_{20}H_{20}N_2O_2$ Carbamic acid, [β - (2 - phenyl - 4-quinolyl)ethyl]-, Et ester, 1413[5].

6,12 - Indoloquinazolinedione, 11,11₁ - dihydro - 2,4,8,10,11 - pentamethyl-, 2160[7].

4 - Pyrazolecarboxylic acid, 5 - methyl - 3 - phenyl - 1 - p - tolyl-, Et ester, 599[5].

$C_{20}H_{20}N_2O_2S$ Thiochromone, 3 - (N - acetyl-p dimethylaminoanilino) - 6 - methyl-, 203[3].

$C_{20}H_{20}N_2O_3$ 4 - Pyrazolecarboxylic acid, 3 - p-anisyl - 5 - methyl - 1 - phenyl-, Et ester, 599[5].

$C_{20}H_{20}N_2O_4$ 1 - Anthracenebicarbamic acid, di-Et ester, 410[7].

9 - Phenanthrenebicarbamic acid, di-Et ester, 410[7].

Truxillamidic acid, N-ethylnitroso-, 1392[6].

$C_{20}H_{20}N_2O_4S_2$ Cystine, N, N′-dibenzal, 1815[3]

$C_{20}H_{20}N_2O_6S_2$ Cystine, N, N′ - disalicylal, *l* 3 *salt*, 1815[3].

Oxanilic acid, o,o′ - dithiobis-, di Et ester, 600[1].

Succinanilic acid, o,o′ dithiobis, 600[1].

$C_{20}H_{20}N_4O_4$ Acetoacetanilide, p,p′ - azobis, P 1910[7].

$C_{20}H_{20}N_4O_5$ Acetoacetanilide, p,p′ - azoxybis, P 1910[7].

$C_{20}H_{20}N_4O_6$ Naphthalene, 1,2 - dihydro, pseudo nitrosite, 383[1].

$C_{20}H_{20}N_4O_7$ Carbazole, 1,2,3,4 - tetrahydro 3,6 dimethyl, picrate, 2831[4]

$C_{20}H_{20}O_4$ Phenanthrene, 3,4,6,7 tetramethoxy 1-vinyl, 1406[2].

β - Truxinic acid, mono Et ester, 2664[9].

$C_{20}H_{20}O_4SSe$ Anthraquinone, 1 (butylsulfonyl) 5 (ethylselenyl)-, 1051[4].

$C_{20}H_{20}O_5$ 1 - Indanone, 5,6 - dimethoxy - 2 - (2,3 - dimethoxybenzal), 2320[4]

$C_{20}H_{20}O_6$ Phloroglucinol, 2 - phenethyl, triacetate, 1225[9]

$C_{20}H_{20}O_7$ 1,4 - Benzopyran, 4 - (3,4 dimethoxy phenyl) - 5,7 - dimethoxy - 2,3 - methylenedioxy, 2489[6].

Coumarin, 4 - (3,4 - dimethoxyphenyl)-3,5,7-trimethoxy-, 2489[6].

Flavone, pentamethoxy-, 1991[1]

$C_{20}H_{20}S$ Thiophene, 2,4 - diethyl - 3,5 - diphenyl-(?), 502[4].

$C_{20}H_{21}Br_2NO_3$ Norcodeine, N - β,γ dibromoallyl-, 3012[6].

$C_{20}H_{21}ClO_6$ 5,7 - Dimethoxy - 2 - (3,4,5 - trimethoxyphenyl)benzopyrylium chloride, *and FeCl₃ compd.*, 3457[8].

$C_{20}H_{21}ClO_{10}$ 5,7 - Dimethoxy - 2 - (3,4,5 - trimethoxyphenyl)benzopyrylium perchlorate, 3457[1].

$C_{20}H_{21}Cl_4FeO_6$ 5,7 - Dimethoxy - 2 - (3,4,5 trimethoxyphenyl)benzopyrylium chloride, $FeCl_3$ compd., 3457[8].

$C_{20}H_{21}NO$ Lepidine, 6 - isobutoxy - 2 - phenyl-, 418[7].

$C_{20}H_{21}NO_2$ Camphorimide, N - 2 - naphthyl-, 1800[7].

$C_{20}H_{21}NO_3$ Norcodeine, N-propargyl-, 3012[6].

Truxillamidic acid, Et ester, 1391[9], 1392[6].

—, N-ethyl-, 1392[6].

β-Truxinamic acid, Et ester, 2664[9].

—, N-ethyl-, 2664[9].

$C_{20}H_{21}NO_4$ (See also *Papaverine*.)

Dicentrine, 1085[6], *and - HCl*, 206[1,2].

Paraberine, 7,12,12₁,13 - tetrahydro - 2,3-dimethoxy - 9,10 - methylenedioxy, *and - HCl*, 1084[3].

$C_{20}H_{21}NO_7$ Homophthal - 1 - amic acid, 3,4-methylenedioxy - N - veratrylmethyl-, 3297[7].

$C_{20}H_{21}N_3O_2$ 4(1) - Quinazolone, 2 - (p - dimethylaminostyryl) - 7 - methoxy - 1 - methyl-, 207[5]

$C_{20}H_{21}N_3O_3$ Hydantoin, 5 - (δ - benzamidobutyl)-3-phenyl, 2148[1].

$C_{20}H_{21}N_3O_6$ Cinnamic acid, nitro(nitrophenyl)-, piperidine salt, 1801[1].

$C_{20}H_{21}N_3O_8$ Isoquinoline, 1,2,3,4 - tetrahydro-8 - methoxy - 1 - (3 - methoxy - 2,4 - di nitrobenzyl) 2 - methyl 6,7 - methylenedioxy-, 3457[9]

$C_{20}H_{22}AsClN_2O_3$ Quinine, arsinosochloro-, 1629[6]

$C_{20}H_{22}Ba_2N_2O_{14}$ + $6H_2O$, 720[3]

$C_{20}H_{22}Ca_2N_2O_{14}$ + $4H_2O$, 720[3]

$C_{20}H_{22}ClNO_2$ 4 - (p - Dimethylaminophenyl)-7 - methoxy 2,3 dimethylbenzopyrylium chloride, 3455[1].

$C_{20}H_{22}ClNO_6$ 4 - (p - Dimethylaminophenyl) 7 methoxy - 2,3 dimethylbenzopyrylium perchlorate, 3455[1].

$C_{20}H_{22}INO_4$ 3,4 - Dihydro - 2 - methyl 6,7 methylenedioxy 1 - veratrylisoquinolinium iodide, 206[1]

$C_{20}H_{22}N_2O$ 9 Anthrol, 1,2,3,4,5,6,7,8 octahydro 10 phenylazo, 1404[3]

$C_{20}H_{22}N_2O_2$ Piperazine, 1,4 - dibenzoyl - 2,5 dimethyl, 2082[3,4].

$C_{20}H_{22}N_2O_4$ Butyric acid, α,γ dibenzamido, Et ester, 2983[1]

Lysuric acid, 2147[9], 2084[7]

Malanilide, N, N′ dimethyl, acetate, 1036[8]

Ornithuric acid, Me ester, 2083[7]

$C_{20}H_{22}N_2O_6$ Isoquinoline, 1,2,3,4 tetrahydro 2 - methyl - 6,7 methylenedioxy - 1 (6 - nitroveratryl)-, *and - HI*, 206[1]

$C_{20}H_{22}N_2O_6Sn$ + $2H_2O$ Ethylenediamine tri pyrocatecholatostannate, 3404[9].

$C_{20}H_{22}N_2O_{14}$ Phenolglucotetraacetate, dinitro, 2487[3].

$C_{20}H_{22}N_2O_{14}Pb_2$, 720[3].

$C_{20}H_{22}N_2O_{14}Sr_2$ + $6H_2O$, 720[3].

$C_{20}H_{22}N_4O_7$ Quinoline, 1,2 - dihydro - 2 - isobutyl 1 - methyl-, picrate, 1082[1].

$C_{20}H_{22}N_4O_8$ Biscarbamic acid, N, N″ - p - biphenylenebis-, tetra-Me ester, 410[6].

$C_{20}H_{22}O$ Acetaldehyde, cyclohexyldiphenyl, 1988[9].

Acetophenone, α - cyclohexyl - α - phenyl-, 1988[9].

Ketone, benzohydryl cyclohexyl, 1988[9].

$C_{20}H_{22}O_3$ Acetoacetic acid, α,α - dibenzyl-, Et ester, 2323[1].

$C_{20}H_{22}O_4$ Phenolglutarein, 4 - ethyl - 4 - methyl-, 2070[7].

Phenolsuccinein, 3,3-diethyl-, 2676[7].

$C_{20}H_{22}O_4S_2$ 1 - Propanol, 3,3' - dithiobis-, dibenzoate, 737[3].

$C_{20}H_{22}O_5$ *p* - Toluic acid, *α* - hydroxy-, *α* - ethoxy-*p*-toluate, Et ester, 378[9].

$C_{20}H_{22}O_6$ Succinic acid, *α*,*β* - dimethoxy-, dibenzyl ester, 47[8].

$C_{20}H_{22}O_7$ Chalcone, 2 - hydroxy - 4,6,3',4',5'-pentamethoxy-, 3457[3].

$C_{20}H_{23}As_2Cl_7N_2O_2$ Compd. from dehydroquinine and $AsCl_3$, 1629[6].

$C_{20}H_{23}BrO_6$ Epicatechol, bromopentamethyl-, 382[8].

$C_{20}H_{23}CuNO_2$ Cuminoin, oxime,. Cu deriv., 1055[6].

$C_{20}H_{23}NO$ Acetaldehyde, cyclohexyldiphenyl, oxime, 1989[1].

Benzanilide, 2' - benzyl - *ar'* - hexahydro, 2665[7,8].

$C_{20}H_{23}NO_2$ Ethylamine, *β* - (6,7 - dimethoxy-1 - phenanthryl) - *N*, *N* - dimethyl-, *and* - *HCl*, 3458[4].

$C_{20}H_{23}NO_3$ Camphoramic acid, *N* - 2 - naphthyl-, 1800[7].

$C_{20}H_{23}NO_4$ Columbamine, tetrahydro, 3294[9]

Corypalmine, 915[9]

Isoquinoline, 1,2,3,4 tetrahydro 2 - methyl 6,7 - methylenedioxy - 1 - veratryl-, *and salts*, 206[1].

Jatrorrhizine, tetrahydro-, 604[1], 1085[9].

Neopine, acetyl, 2332.

Palmatrubine, tetrahydro, 3295[2].

$C_{20}H_{23}NO_6$ Butyric acid, *α* (*α* - carbamyl - *α* hydroxy - *γ* phenylpropoxy) - *α* - hydroxy *γ* phenyl, 1232[6], 1798[5], 2673[5].

$C_{20}H_{23}N_3O_4$ Lysine, *N*[ε] benzoyl - *N*[α] - phenylcarbamyl, 2148[5]

$C_{20}H_{23}N_3O_6$ Isoquinoline, 1 (4 - amino - 3 - methoxy 2 nitrobenzyl) - 1,2,3,4-tetrahydro 8 - methoxy 2 - methyl 6,7-methylenedioxy, 3458[2].

$C_{20}H_{23}N_3O_7$ Isoquinoline, 1,2,3,4 - tetrahydro 6,7 dimethoxy 1 (3 - methoxy - 2,4-dinitrobenzyl) 2 - methyl, 3458[1].

$C_{20}H_{24}$ Binaphthyl, decahydro, 1102[5].

Tetracyclopentadiene, 2148[6]

$C_{20}H_{24}Br_2N_4$ Spiro[isoindole - 2,1' - piperazine-4',2'' - isoindole], *N*, *N'* dibromo-1,3,1'',3'' tetrahydro-, 2862[5].

$C_{20}H_{24}Br_2N_2O_2$ 2 Quinuclidinecarbinol, 5 bromo - 5 (*α* bromoethyl) - *α* - (6-methoxy 4-quinolyl), 1993[9].

$C_{20}H_{24}MoN_2O_5$ + nH_2O, 3656[7]

$C_{20}H_{24}N_2$ Isoquinoline, 2,2' ethylenebis[1,2,3,4 tetrahydro, *and salts*, 2862[5,6]

Δ^2 - Pyrazoline, 3 - *tert* butyl 5 - phenyl 1 *o* (and *p*)-tolyl-, 762[5].

$C_{20}H_{24}N_2O$ Benzamide, *N* - (1,3 dihydro 2 isoindyl)amyl, 418[2].

-, *N*-*o*-1 piperidylmethylbenzyl, 118[7].

$C_{20}H_{24}N_2O_2$ (See also *Quinidine*; *Quinine*.)

1 - Propanone, 3 - (3 - ethylidene - 4 - piperidyl) - 1 - (6 - methoxy - 4 quinolyl), 1993[8].

Quinuclidine, 5 - ethylidene - 2 [(6 hydroxy - 4 - quinolyl) methoxymethyl] -, 1993[9].

2 - Quinuclidinecarbinol, 5 - ethylidene *α* - (6 - methoxy - 4 - quinolyl), and - *HCl*, 1993[7,8].

$C_{20}H_{24}N_2O_3$ Nitrone, *α* - [*β* - (*N* - hydroxyanilino)isobutyl] *α* methyl *N* phenyl (?), acetate, 2837[4].

2 - Pentanone, 4 - (*N* hydroxyanilino) 4-methyl-, cyclic *N* - phenyloxime(?), acetate, 2837[4].

2 - Quinuclidinecarbinol, 5 - ethylidene - *α*-(6 - methoxy - 4 - quinolyl)-, oxide, 1993[8].

$C_{20}H_{24}N_2O_4$ Acetophenone, 3,4 - dimethoxy-, azine, 2321[8].

Carbanilic acid, *N*, *N'* - ethylenebis-, di-Et ester, 3164[5].

Isoquinoline, 1 - (6 - aminoveratryl) - 1,2,3,4-tetrahydro - 2 - methyl - 6,9 - methylenedioxy-, *and di-HCl*, 206[2].

$C_{20}H_{24}N_2O_4S$ 1 - Propanol, 3,3' thiobis-, dicarbanilate, 362[8].

$C_{20}H_{24}N_2O_5S$ Lysine, *N*[ε] - benzoyl - *N*[α] - *p*-tolylsulfonyl, 3690[5].

Ornithine, *N*[δ] - benzoyl - *N*[α] - methyl-*N*[α]-*p*-tolylsulfonyl-, 3690[9].

$C_{20}H_{24}N_2O_6$ 3 - Pyrrolecarboxylic acid, 2,2'-ethylenebis[5 - formyl - 4 - methyl, di-Et ester, 2159[6].

$C_{20}H_{24}N_2O_7$ Benzoic acid, 3,4,5 - trimethoxy-, 3,4,5-trimethoxybenzalhydrazide, 2672[3].

$C_{20}H_{24}N_2O_8$ Hydrazine, *s* - bis(3,4,5 - trimethoxybenzoyl)-, 2672[4].

$C_{20}H_{24}N_4O_4$ Compd, m 151°, from Et 2,4-dimethyl - 3 - pyrrolecarboxylate, pyridine, and BrCN, 1621[4].

$C_{20}H_{24}N_4O_4$ Hydrazinedicarboxylic dianilide, acetoneglyceryl-, 2816[1]

$C_{20}H_{24}N_6O_6$ 2 - Pyrrolecarboxylic acid, *N*, *N'*-acetylenediaminobis[3 - carbamyl 4 - methyl-, diethyl ester, 3455[6].

$C_{20}H_{24}O$ 2 Octanone, 1,1-diphenyl-, 1786[6].

$C_{20}H_{24}O_2$ Cumic acid, *p* - isopropylbenzyl ester, 1793[5].

p - Dioxane, 2,2,5,5 - tetramethyl 3,6-diphenyl-, 2850[5]

Hydrobenzein, *α* cyclohexyl-, 1988[9].

$C_{20}H_{24}O_3$ Camphor, 3 - (hydroxymethyl)-, cinnamate, 1228[1].

$C_{20}H_{24}O_6$ Erysimupicron, 2690[9], 2691[1].

Stilbene, 2,4,6,3',4' - pentamethoxy - *α*-methyl, 405[5], 3007[8]

o Veratric acid, 6 - [*β* - (4 - isopropyl-3 - keto - Δ^1 - cyclohexenyl)vinyl]-, *and Ca salt*, 3457[8].

$C_{20}H_{24}O_6$ Chroman, 4 (3,4 - dimethoxyphenyl)-3,5,7 - trimethoxy-, 2489[7]

Epicatechol, pentamethyl, 382[4]

Pseudocatechol, pentamethyl-, 3007[3]

$C_{20}H_{24}O_7$ 1,2,3 - Cyclobutanetricarboxylic acid, 2 benzoyl-, tri Et ester, 49[2]

$C_{20}H_{25}AsCl_4N_2O_2$ Compd. from quinine and $AsCl_3$, 1629[6].

$C_{20}H_{25}ClN_2O_4S$ Acetic acid, chlorosulfo-, hydroxyhydrindamine salt, 3445[4].

$C_{20}H_{25}IN_2O_2$ Apoquinine, methiodide, 1993[9].

$C_{20}H_{25}NO$ Isobutyramide, *N*, *N* - diethyl - *β*,*β'*-diphenyl, 2997[6], 3451[9]

$C_{20}H_{25}NO_2$ Cuminoin, oxime, 1055[7].

$C_{20}H_{25}NO_4$ Dinicotinic acid, 1,4 - dihydro 1,2,6 - trimethyl - 4 - phenyl-, di-Et ester, 3296[3].

$C_{20}H_{25}NO_6$ Ozocodeine, dihydro, acetate, 2165[5].

$C_{20}H_{25}N_3O_2$ Base, m. 201 2°, from dicyclopentadiene, 384[7].

Valeramidine, *N'* - *p* - phenetyl - *N* - phenylcarbamyl, 1218[6].

$C_{20}H_{25}N_3O_5$ Isoquinoline, 1 - (4 - amino - 3-methoxy - 2 - nitrobenzyl) - 1,2,3,4-tetrahydro - 6,7 dimethoxy - 2 - methyl-, 3458[2].

$C_{20}H_{25}N_3O_7$ Succinic acid, *α* - (*p* - acetamido-

phenylazo) - α, β - diacetyl-, di-Et ester, 598^{8}.
$C_{20}H_{25}N_5O_7$ Pyrrole, 2-ethyl-3-methyl-, picrate, 3455^{5}.
$C_{20}H_{26}AsBr$ Benzylcyclohexylmethylphenylarsonium bromide, 2839^{6}.
$C_{20}H_{26}N_2O_2$ (See also *Hydroquinine.*)

$C_{21}H_{12}Cl_2N_2$ *αγ* - Dibenzophenazine, 10,12-dichloro-11-methyl-, 2834[1].
$C_{21}H_{12}N_4$ 6,7 - Phenanthrazinoindazole, 1623[3].
$C_{21}H_{12}N_6O_9$ Isocyanuric acid, tris(*m*-nitrophenyl) ester, 1804[8].
$C_{21}H_{12}O_2$ 5,12 - *m* - *β* - Benzodiindenedione, 7-methyl-, 911[4].
$C_{21}H_{12}O_6$ Anthrapurpurin, 2 - benzoate, 3453[3].
$C_{21}H_{13}BrO$ Ketone, 10 - bromo - 9 - anthryl phenyl, 2852[5].
$C_{21}H_{13}Br_3$ Anthracene, 9 - benzyl - 2,3,10 - tribromo-, 3452[9].
$C_{21}H_{13}ClO$ Ketone, 10 - chloro - 9 - anthryl phenyl, 2852[4].
$C_{21}H_{13}ClO_2$ Chromone, 6 - chloro - 2,3 - diphenyl-, 1237[8].
Coumarin, 6 - chloro - 3,4 - diphenyl-, 1238[2].
$C_{21}H_{13}NO$ 14(7) - *γγ* - Dibenzacridone, 2677[2].
$C_{21}H_{13}N_7O_{14}$ Propane, 2 - (*m* - nitrophenyl)-1,3-dipicryl-, 3000[4].
$C_{21}H_{14}Br_2O$ Anthrone, 10 - bromo - 10 - (*α*-bromobenzyl)-, 3453[2].
$C_{21}H_{14}Br_2O_4S$ Sulfonefluoran, dibromo - 3,6-dimethyl-, 3001[5].
$C_{21}H_{14}Br_4N_2S$ *β* - Naphthothiazole, 2 - (1 - naphthylamino)-, tetrabromide, 195[2].
$C_{21}H_{14}Br_4O_5S$ *m* - Cresolsulfonephthalein, tetrabromo-, *and* NH_4 *salt*, 3001[4].
$C_{21}H_{14}Br_6N_2S$ Naphthothiazole, naphthylamino-, hexabromide, 195[4].
$C_{21}H_{14}ClNO_2$ Chromone, 6 - chloro - 2,3 - diphenyl-, oxime, 1237[9].
$C_{21}H_{14}Cl_2O$ Ketone, 9,10 - dichloro - 9,10 - dihydro 9-anthryl phenyl, 2852[5].
$C_{21}H_{14}N_2O_3$ 2(3) - Benzimidazolone, 1,3 - dibenzoyl-, 381[9].
$C_{21}H_{14}N_2O_4$ 1 - Naphthalenecarbamic acid, 1-nitro - 2 - naphthyl ester, 2319[6].
$C_{21}H_{14}N_2O_5$ Ketone, 9,10 - dihydro - 9,10 - dinitro - 9 - anthryl phenyl, 2852[6].
$C_{21}H_{14}N_2S$ Naphthothiazole, naphthylamino-, 195[4].
$C_{21}H_{14}N_4O_2S$ 1,2 - Naphthoquinone, thiocarbohydrazone, 1810[8].
$C_{21}H_{14}N_4O_4$ 4(3) - Quinazolone, 3 - benzamido-2 - (*m* - nitrophenyl)-, 206[9].
—, 3 - *m* - nitrobenzamido - 2 - phenyl-, 206[9].
$C_{21}H_{14}N_6O_5$ 6 - Phthalazinealdehyde, 1,2 - dihydro - 1 - keto - 2 - (*p* - nitrophenyl)-, *p* - nitrophenylhydrazone, 184[5].
$C_{21}H_{14}N_6O_{12}$ Propane, 2-phenyl-1,3-dipicryl-, 3000[3].
$C_{21}H_{14}O$ Anthrone, 10-benzal-, 3452[8].
Indone, 2,3-diphenyl-, 1407[9].
Ketone, 9 - anthryl phenyl, 2852[4].
$C_{21}H_{14}O_2$ Compd. from 10 - bromo - 10 - (*α*-bromobenzyl)anthrone, m. 133–4°, 3453[2].
$C_{21}H_{14}O_2S$ Carbonic acid, thiono-, di - 2 - naphthyl ester, 914[6].
$C_{21}H_{14}O_3$ $\Delta^{2,2'}$ - Biindan - 1,3,1' - trione, 2'-propylidene-, 911[5].
Chromone, 7 - hydroxy - 2,3 - diphenyl-, 196[7].
Umbelliferone, 3,4 - diphenyl-, 595[3].
$C_{21}H_{14}O_4$ Chromone, 7,8 - dihydroxy 2,3 diphenyl-, 197[2].
Coumarin, dihydroxy - 3,4 - diphenyl-, 595[4].
Spiro[indan - 2,1' - cyclopentane - 2',2''-indan] - 1,3,1'',3'' - tetrone, 185[9].
$C_{21}H_{14}O_6$ 7 - *meso* - Benzanthrenone, 5,6(or 8,9) - dihydroxy - , diacetate, 411[6].
$C_{21}H_{14}O_7$ Gallic acid, dibenzoate, 1987[1].
$C_{21}H_{15}BiCl_2O_6$ Bismuthine, tris[carboxyphenyl]-, dichlorides, 1063[5], 1984[7].
$C_{21}H_{15}Br$ Anthracene, 9 - benzyl - 10 - bromo-, 3452[9].
—, 9-(bromomethyl)-10-phenyl-, 3003[6].
$C_{21}H_{15}Br_3N_2S$ Naphthothiazole, naphthylamino-, tribromide, 195[3,4].
$C_{21}H_{15}Br_5$ Anthracene, 9 - benzyl - 1,2,3,4,10-pentabromo-1,2,3,4-tetrahydro-, 3452[9].
$C_{21}H_{15}Br_7N_2S$ *β* - Naphthothiazole, 2 - (1 - naphthylamino)-, heptabromide, 195[3].
$C_{21}H_{15}Cl$ Anthracene, 9 - benzyl - 10 - chloro-, 3453[1].
Propine, 3 - chloro - 1,3,3 - triphenyl-, 3004[1].
$C_{21}H_{15}ClO$ 9 - Styrylxanthylium chloride, 1806[9].
$C_{21}H_{15}ClO_4 + H_2O$ 3,6 - Dihydroxy - 9 - (*p*-hydroxystyryl)xanthylium chloride, 1807[1].
$C_{21}H_{15}ClO_5$ Diphenylbenzopyrylium perchlorate, 3167[5]
$C_{21}H_{15}Cl_2N$ *o* - Toluidine, 1,5 - dichloro - 9 - anthryl-, 754[5].
$C_{21}H_{15}Cl_3N_2O_2$ Phthalanilide, 4 - (trichloromethyl)-, 184[7].
$C_{21}H_{15}NO$ Benzoxazole, 1 - (*α* - phenylstyryl), 2849[2].
$C_{21}H_{15}NO_2$ Anthracene, 9 - benzyl - 10 - nitro-, 3453[1].
1 - Naphthalenecarbamic acid, naphthyl esters, 2319[5].
$C_{21}H_{15}NO_3$ 1,10 - Anthracenedione, 4 - hydroxy-9-*p*-toluino-, 2853[7].
$C_{21}H_{15}NO_6$ Benzoin, 4'-nitro-, benzoate, 327[1].
Protoberberine, 2,3,9,10 - bismethylenedioxyoxy-, acetate, 3297[9].
$C_{21}H_{15}N_3$ *s*-Triazine, 2,4,6-triphenyl-, 207[9]
$C_{21}H_{15}N_3O_2$ 4(3) - Quinazolone, 3 - benzamido-2-phenyl-, 206[9].
$C_{21}H_{15}N_3O_7$ Benzotoluide, *N* - hydroxydinitro-, benzoate, 2667[1,2].
Picrate, m. 155°, of hydrocarbon from cholesterol, 1241[9].
$C_{21}H_{15}N_5O_7$ Anthranilic acid, *N* - (*m* - nitrobenzoyl), *β* - *m* - nitrobenzoylhydrazide, 206[8].
$C_{21}H_{15}N_9O_{14}$ Imidazole, 4 - (aminophenyl) dipicrate, 395[5,6].
$C_{21}H_{16}$ Anthracene, 9 benzyl-, 3452[8].
—, 9-methyl-10-phenyl-, 3003[6].
$C_{21}H_{16}Cl_2O_4$ Muconic acid, *α*, *δ* - bis(*p* - chlorophenyl) - *β* - ethoxy - *γ* - hydroxy-, lactone, Me ester, 2849[6].
—, *α*, *δ* - bis(*p* - chlorophenyl) - *β* - hydroxy-*γ* - methoxy-, lactone, Et ester, 2849[6].
$C_{21}H_{16}N_2$ Benzimidazole, 2 - (*α* - phenylstyryl)-, 2849[3].
$C_{21}H_{16}N_2O$ Coumarin, 3 - phenyl-, phenylhydrazone, 3291[4].
$C_{21}H_{16}N_2O_2$ 3 - Indazolol, 2 - *p* - tolyl-, benzoate, 2496[6].
Phthalide, 2 - anilino - 4 - (phenyliminomethyl)-, 184[6].
$C_{21}H_{16}N_2O_3$ 3 - Indazolol, 2 - *p* - anisyl-, benzoate, 2496[7].
$C_{21}H_{16}N_4$ 1,2,3 - Triazole - 4 - aldehyde, 1,5-diphenyl - 4 - (phenyliminomethyl)-, 416[9].
$C_{21}H_{16}N_4O$ 6 - Phthalazinealdehyde, 1,2 - di-

hydro - 1 - keto - 2 - phenyl-, phenylhydrazone, 184[5].
1,2,3 - Triazole - 4 - carboxanilide, 1,5-diphenyl-, 416[9].
$C_{21}H_{16}N_4OS$ Δ^2 - 1,2,4 - Triazoline - 3 - mercaptan, 1 - benzoyl - 4 - phenyl - 5 - phenylimino-, 2162[2].
$C_{21}H_{16}N_4O_4$ Anthranilic acid, *N* - *m* - nitrobenzoyl-, *β* - benzoylhydrazide, 206[9].
$C_{21}H_{16}N_4O_8$ 5 - Acridineëthanol, picrate, 1239[2].
$C_{21}H_{16}N_6O_8$ Isoindazole, 7 - benzamido - 5-methyl-, picrate, 2497[6].
$C_{21}H_{16}O_3$ Compd., m. 150°, from 2,2,4,5-tetraphenyl - 3(2) - furanone, 391[1].
$C_{21}H_{16}O_4S$ Sulfonefluoran, 3,6 - dimethyl-, 3001[3]
$C_{21}H_{16}O_5$ 2,3 - *β* - Indenopyran - 2 - carboxylic acid, 1,2,3,9 - tetrahydro - 3,9 - diketo-1-phenyl-, Et ester, 911[9]
$C_{21}H_{16}O_6$ 1,1,2 - Ethanetriol, 2 - *p* - anisyl-1,2 - bis(2,4 - dihydroxyphenyl)-, anhydride, 2324[3].
Muconic acid, *β,γ* - dihydroxy - *α,δ* - diphenyl-, *γ* - lactone, Me ester, acetate, 2849[7]
$C_{21}H_{16}O_7$ Coumarin, 5,7 - dihydroxy - 4 - (*p*-hydroxyphenyl)-, triacetate, 595[1]
$C_{21}H_{16}O_8S$ Sulfonegallein, di-Me ether, 2491[5]
$C_{21}H_{16}S_2$ Disulfide, 9 - anthryl benzyl, 747[5]
$C_{21}H_{17}BO_6$ Ketone, 1 - hydroxy - 2 - naphthyl phenyl, boroacetate, 1052[9]
$C_{21}H_{17}CuNO_2$ Benzoin, *α* - benzyl-, oxime, Cu deriv., 1055[7]
$C_{21}H_{17}IN_2$ Dye, m. above 330°, from 2,2'-methylenebisquinoline, $(CH_2Br)_2$ and KI, 2330[9].
$C_{21}H_{17}N$ Benzalimine, *α* - (9,10 - dihydro - 9 - anthryl)-, 3293[7]
$C_{21}H_{17}NO$ Ketone, 9,10 - dihydro - 9 - anthryl phenyl, oxime, 3293[1]
$C_{21}H_{17}NO_3$ Acetanilide, *p* - (*p* - hydroxyphenyl)-, benzoate, 1073[6]
9 - Anthrol, 9 - benzyl - 9,10 - dihydro-10-nitro-, 3453[7]
Benzanilide, *o'* - (hydroxymethyl)-, benzoate, 1073[5]
—, *p'* - (*p* - hydroxyphenyl)-, acetate, 1073[4]
$C_{21}H_{17}N_3O_2$ Δ^2 - Pyrazoline, 1 - (*p* - nitrophenyl)-3,5 - diphenyl-, 762[6]
$C_{21}H_{17}N_3O_3$ Anthranilic acid, *N* - benzoyl-, *β*-benzoylhydrazide, 206[8].
Benzoic acid, *p* - benzamido-, benzoylhydrazide, 1066[6].
$C_{21}H_{17}N_3S$ 1,4,3 - Isothiodiazine, 2 - (1 - naphthylamino) - 5 - phenyl-, Ac deriv., 416[4].
$C_{21}H_{17}N_5$ Imidazophenazine, 2 - (*p* - dimethylaminophenyl)-, 1805[7].
$C_{21}H_{17}N_5O_7$ Acridine, 5 - (*β* - aminoethyl)-, picrate, 2501[7]
$C_{21}H_{18}AsN_3O_7$ Arsanilic acid, *N* - 3 - (*m* - nitrobenzamido) - *p* - anisoyl-, 394[5]
$C_{21}H_{18}BiCl_2N_3O_6$ Bismuthine, tris(nitrotolyl)-, dichloride, 1063[8], 1984[7].
$C_{21}H_{18}BiN_3O_6$ Bismuthine, tris(nitro-*p*-tolyl)-, 1063[8], 1984[7].
$C_{21}H_{18}BiN_5O_{12}$ Bismuthine, tris(nitro - *p*-tolyl)-, dinitrate, 1063[8], 1984[7].
$C_{21}H_{18}N_2O_3$ Benzaldehyde, *o* - methoxy-, oxime, diphenylcarbamate, 179[8].
Benzanilide, *o'* - hydroxy - *N* - methyl-, carbanilate, 1090[1].
$C_{21}H_{18}N_2O_4$ 1 - Isobenzofurancarboxylic acid, 1 - anilino - 1,2 - dihydro - 2 - keto-(?), $PhNH_2$ deriv., 1614[1].
$C_{21}H_{18}N_4O$ Pyrazole, 1,1' - carbonylbis[3(and 5) - methyl - 5(and 3) - phenyl-, 2856[7].
$C_{21}H_{18}N_4O_6$ Benzophenone, 2,4 - dimethoxy-, 2,4 - dinitrophenylhydrazone, 2848[8].
$C_{21}H_{18}N_4O_8S$ Benzoic acid, *p* - dimethylaminothiol-, Ph ester, picrate, 371[4].
$C_{21}H_{18}N_4O_9$ Benzoic acid, *p* - dimethylamino-, Ph ester, picrate, 371[4].
$C_{21}H_{18}N_4S$ 1,3,4 - Triazole, 2 - anilino - 5 - (benzylmercapto) - 1 - phenyl-, 2162[2].
$C_{21}H_{18}O$ 9 - Anthrol, 10 - benzyl - 9,10 - dihydro-, 3452[8].
Propiophenone, *α,β*-diphenyl-, 2325[1].
$C_{21}H_{18}O_2$ 1 - Acrylonaphthone, 2 - ethoxy - *β* - phenyl-, 1617[5]
9 - Anthrol, 1,2,3,4 - tetrahydro-, benzoate, 1404[1]
Hydrocinnamic acid, *β,β* diphenyl-, 2010[8].
Xanthydrol, 9 - phenethyl-, *perchlorate*, 2328[5].
$C_{21}H_{18}O_2S$ Acetic acid, diphenyl - *p* - tolylmercapto-, 375[6]
$C_{21}H_{18}O_3$ Lactic acid, *α,β,β* - triphenyl-, 594[3], 2844[9]
$C_{21}H_{18}O_4$ 1,3 - Indandione, 2 - *α* - (diacetylmethyl)benzyl-, 912[1]
$C_{21}H_{18}O_4S$ 9 - Xanthene - *α* - benzenesulfonic acid, 3,6 - dimethyl-, *Zn salt*, 3001[4]
$C_{21}H_{18}O_5$ Muconic acid, *β,γ* - dihydroxy - *α,δ* - di - *p* - tolyl-, monolactone, Me ester, 2849[6]
$C_{21}H_{18}O_5S$ *m* - Cresolsulfonephthalein, *and salts*, 3001[2,3]
$C_{21}H_{18}O_6$ Chromone, 3 - benzyldihydroxy - 2 - methyl-, diacetate, 197[1,2]
Malonic acid, (*α* - 1,3 - diketo - 2 - indanyl-benzyl)-, mono Et ester, 911[9]
$C_{21}H_{18}O_7$ Chrysin, 3,2' - dimethoxy-, diacetate, 195[9]
$C_{21}H_{19}AuCl_4N_2O_2$ 1 - [*β* - (1,3 - Dihydro - 1 - hydroxy - 3 - keto - 1 - phenyl - 2 - isoindyl)ethyl]pyridinium chloroaurate, 1408[2]
$C_{21}H_{19}BrN_2O_2$ 1 - [*β* - (1,3 - Dihydro - 1 - hydroxy - 3 - keto - 1 - phenyl - 2 - isoindyl)ethyl]pyridinium bromide, 1408[2]
$C_{21}H_{19}NO$ Benzamide, *N,N* - di - *p* - tolyl-, 181[9]
Benzimidic acid, *N* - *p* - tolyl-, *p* - tolyl ester, 181[8]
$C_{21}H_{19}NO_2$ Benzamide, *N* - *p* - phenoxymethylbenzyl-, 891[8]
$C_{21}H_{19}NO_3$ Eugenol, 1 - naphthalenecarbamate, 2319[8].
Isoeugenol, 1 - naphthalenecarbamate, 2319[8]
$C_{21}H_{19}NO_4$ Isobutyric acid, *β,β'* - dibenzoyl-*α* - cyano-, Et ester, 404[8]
$C_{21}H_{19}NS_2$ Thiobenzaldine, 1220[1]
$C_{21}H_{19}N_3$ Acenaphthotriazole, 4,5 - dihydro-8 - (pseudocumyl)-, 1081[4]
$C_{21}H_{19}N_3O_2$ Lutidinedicarboxanilide, 1226[8].
$C_{21}H_{19}N_3O_4$ Toluidine, dibenzyldinitro-, 3448[8].
$C_{21}H_{19}N_5O$ Benzaldehyde, *m*(and *p*) - [*p* - (*p* - dimethylaminophenylazo)phenylazo]-, 2836[8].
$C_{21}H_{19}N_5O_7$ Trimethyl[*p* - (*p* - nitrophenyl)-phenyl]ammonium picrate, 586[8]
$C_{21}H_{19}N_5O_9S$ *p* - Toluenesulfono - *p* - phenetide, 3' - anilino - 3,2',6' - trinitro-, 400[8].
$C_{21}H_{20}AsN_3O_6$ Arsanilic acid, *N* - [3 - (*m* - aminobenzamido) - *p* - anisoyl]-, *and salts*, 394[5]

$C_{21}H_{20}ClNO_6$ Propionic acid, (chlorobenzoyl)-hydroxyphenyl-, methyl ester, oxime, di acetate, 3168[6]

$C_{21}H_{20}Cl_2N_2O_4$ Acetoacetanilide 1,4′ - methyl enebis[2-chloro , P 1910[6].

$C_{21}H_{20}N_2$ Acetamidine, N,N - diphenyl - N' (p - tolyl)-, 1799[4].

Benzidine, N' - benzal - N,N - dimethyl , 587[1].

$C_{21}H_{20}N_2O_3S$ Acetophenone, α - (p - anisylsulfonyl) , phenylhydrazone, 419[9].

$C_{21}H_{20}N_2O_5$ Acetoacetanilide, p,p' - carbonylbis , P 1910[7].

$C_{21}H_{20}N_4O_4$ 5 - m - Tolylenediamine, 4,6 dinitro N,N' di - p - tolyl , 1223[1]

$C_{21}H_{20}N_4O_7$ Trimethyl(p - phenylphenyl)ammonium picrate, 586[8].

$C_{21}H_{20}N_4O_5S$ p - Toluenesulfono p phenetide, 2′ amino 3,4′ dinitro , 100[8]

$C_{21}H_{20}O$ Propanol, triphenyl , 1798[6], 2850[1,2]

$C_{21}H_{20}O_2$ 2,2′ Spirobibenzosuberan - 1,1′-dione, 911[2].

$C_{21}H_{20}O_3S$ Sulfide, p,p' dimethoxybenzohydryl phenyl, 375[3]

$C_{21}H_{20}O_5$ Chromone, 2 (3,4 - dimethoxystyryl) 5 hydroxy 3,7 dimethoxy , 196[1]

$C_{21}H_{20}O_6$ Coumarin, 4 (3,4 dimethoxyphenyl) 3 hydroxy 5,7 dimethoxy , acetate, 2489[1]

$C_{21}H_{20}O_9$ Chrysophanic acid, glucoside, 2679[1]

$C_{21}H_{20}O_9S_3$ Glycerol, tribenzenesulfonate, 740[1]

$C_{21}H_{20}O_{10}$ Emodin, glucoside, 2679

$C_{21}H_{20}O_{12}$ · $3H_2O$ Quercetin, glucoside, 2519[1]

$C_{21}H_{21}BiBr_2$ Bismuthine, tritolyl , dibromide, 1063[6], 1984[6]

$C_{21}H_{21}BiCl_2$ Bismuthine tritolyl , dichloride, 1063[6], 1984[5]

$C_{21}H_{21}BiN_2O_6$ Bismuthine, t p tolyl , di nitrate, 1984[6]

$C_{21}H_{21}BiO_3$ Bismuthine, tri anisyl , 1063

$C_{21}H_{21}HgI_3N_2$ Quinoline, complex salt with PrI and HgI_2, 4695[8]

$C_{21}H_{21}N$ Dibenzylamine, N - tolyl , 2155[9], 2156[1].

Tribenzylamine, 1223[2]

$C_{21}H_{21}NO_2$ Carvacrol, 1 naphthalenecarbamate, 2319[8].

Cinchophen, 6 methyl , Bu ester, salts, P 424[7].

Thymol, 1 - naphthalenecarbamate, 2319[8]

$C_{21}H_{21}NO_4$ Palmatine, 1085[8]

$C_{21}H_{21}NO_5$ (See also *Hydrastine*)

Δ^2 5,5 - Isoxazolinedicarboxylic acid, 3,4 diphenyl , N - oxide, di Et ester, 2327

$C_{21}H_{21}N_3$ 3 - Acenaphthenamine, 2 (ψ - pseudo cumylazo , 1081[4]

$C_{21}H_{21}N_3O_7$ Chamazulene, picrate, 1227[1]

Eucazulene, picrate, 1227[2]

Guaiazulene, picrate, 1227[6]

$C_{21}H_{21}N_3O_8$ Chamazulene, styphnate, 1227

Eucazulene, styphnate, 1227[1].

Guaiazulene, styphnate, 1227[2]

$C_{21}H_{21}N_5O_7$ Indazole, 2 benzyl 4,5,6,7 - tetrahydro - 5 - methyl , picrate, 389[8]

$C_{21}H_{21}O_4P$ p - Tolyl phosphate, 1605[2]

$C_{21}H_{22}BrNO_6$ Malonic acid, bromo β - nitro α,β - diphenylethyl) , di Et ester, 2327[2]

$C_{21}H_{22}Br_2O_{10}$ Phlorhizin, dibromo , 422[9], 1277[1].

$C_{21}H_{22}INO_2$ α - Anisal - 1 - ethyl 1,4 - dihydro - 4 - keto - 1 - methylquinaldinium iodide, 1026[3].

α - Anisal - 1 - ethyl - 4 - methoxyquinaldinium iodide, 1026[2].

$C_{21}H_{22}N_2O_2$ See *Strychnine.*

$C_{21}H_{22}N_2O_2S$ Thiochromone, 3 - (p - dimethylamino - N - propionylanilino) - 6 - methyl-203[7].

$C_{21}H_{22}N_2O_3$ Carbamic acid, [β - (6 - methoxy - 2-phenyl - 4 - quinolyl)ethyl]-, Et ester, 1413[6].

2 - Pyrazinecarboxylic acid, 1,2,3,6 - tetrahydro - 6 - keto - 3,3 - dimethyl - 2,5-diphenyl-(?), Et ester, 2152[9].

Strychnine, N-oxide, 1114[8]

$C_{21}H_{22}N_2O_4$ 1 - Isoquinolineacetonitrile, 1,2,3,4-tetrahydro 5,6 - dimethoxy - 2 - methyl-α - (3,4 - methylenedioxyphenyl)-, 2330[8].

$C_{21}H_{22}N_2O_6$ Carbanilic acid, malonylbis-, diethyl ester, 3164[5].

$C_{21}H_{22}N_4O_4$ Carbanilide, p,p bis(acetoacetamido)-, P 1910[7].

$C_{21}H_{22}N_4O_8$ 2,7 - Fluorenedibicarbamic acid, tetra Me ester, 410[6].

$C_{21}H_{22}N_4O_9$ 3,4 - Pyrazoledicarboxylic acid, 1-(α,γ - dicarbethoxyacetonylazophenyl)-5 methyl-, 599[1].

$C_{21}H_{22}O_3$ Anthrol, octahydro-, benzoate, 1404[2], 1405[3]

β Truxinic acid, monoisopropyl ester, 2664[8]

$C_{21}H_{22}O_9$ Chalcone, 4′ - hydroxy-, glucoside, 593[2]

$C_{21}H_{22}O_8$ Flavone, 3,5,7,3′,4′,5′ - hexamethoxy-, 1991[1]

$C_{21}H_{22}O_{12}$ Quercitrin, 1991[1]

$C_{21}H_{23}IN_2$ α - (p - Dimethylaminobenzal) - 1-ethylquinaldinium iodide, 419[6]

$C_{21}H_{23}NO$ Lepidine, 6 - isoamoxy - 2 - phenyl-, 418[7].

$C_{21}H_{23}NO_3$ 3 - Dibenzofuranol, 1,2,3,4,4a,9b-hexahydro - 6,9b - dimethyl (?), carbanilate, 100[7].

$C_{21}H_{23}NO_4$ See *Meconidin*

$C_{22}H_{30}O_5$ Dianhydrobigitaligenin, 2724[6].
$C_{22}H_{30}O_6$ Compd., m. 80-3°, from tetrahydrojatrorrhizine Et ether methiodide, 604[4].
$C_{22}H_{30}O_7$ Propane, 1 - (3,4 - dimethoxyphenyl)-2,3 - dimethoxy - 1 - (2,4,6 - trimethoxyphenyl)-, 2489[7].
$C_{22}H_{30}O_{14}$ Acid from digitoic acid, m. 113°, 1414[6].
$C_{22}H_{31}NO_3$ Diphenethylamine, bis(ethoxymethyl)-, *and -HCl*, 391[7,8].
$C_{22}H_{31}NO_{13}$ Acid from digitoic acid, decomps. 242°, 1414[3].
$C_{22}H_{32}$, 299[6].
$C_{22}H_{32}HgO_5$ Hydrocinnamic acid, α - (acetoxymercuri) - β - methoxy-, menthyl ester, 1986[7].
$C_{22}H_{32}MoN_2O_8$ + $2H_2O$ Piperidine dipyrogallolmolybdate, 3405[7].
$C_{22}H_{32}N_2O_8W$ + H_2O Piperidine dipyrogallol tungstate, 3405[9].
$C_{22}H_{32}O_6$ Pyro - anthropo - choloidanic acid, 918[7].
$C_{22}H_{33}BrN_2O_4S_2$ Pseudourea, α - ethyl - β,γ-dimethyl - α - phenylthio-, metho - α-bromocamphorsulfonate, 374[4].
$C_{22}H_{33}N$ Apoconessine, *and acid sulfate*, 3458[5].
$C_{22}H_{34}Br_4N_4$ Nicotine, di HBr, $C_2H_2Br_4$ addn. compd., 1086[5].
$C_{22}H_{34}CuO_8$ γ - Pentenic acid, α,α - diethyl - δ-hydroxy - β - keto , Et ester, Cu deriv., 1590[7].
$C_{22}H_{34}O_2$, 834[2].
$C_{22}H_{34}O_5$ Bigitaligenin, 2724[5].
$C_{22}H_{36}O_2$, 833[8], 834[2].
$C_{22}H_{36}O_4$ Camphor, 3 - methoxy , dimer(?), 2157[5].
$C_{22}H_{36}O_5$ Bigitaligenin, dehydro , 2724[6].
$C_{22}H_{37}NO$ Palmitanilide, 309[8].
$C_{22}H_{37}NO_2$ Abietic acid, $EtNH_2$ salt, 2166[1].
$C_{22}H_{38}CuO_4$ Δ^3 - 2 - Hendecenone, 4 - hydroxy , Cu deriv., 738[9].
$C_{22}H_{38}N_2O_2S$ Compd., m. 105-6°, from thionocarbamic acid and H_2O_2, 373[5].
$C_{22}H_{38}O_2$ Menthone, 2,2′ ethylenebis-, 2846[2].
$C_{22}H_{38}O_5$ Bigitaligenin, tetrahydro , 2724[6].
$C_{22}H_{39}CoN_2O_4S$, 716[6].
$C_{22}H_{40}O_2$ Behenolic acid, 2310[7], 2601[5].
$C_{22}H_{40}O_4$ 1,3,3a - Cyclopentadioxole - 4 - tridecoic acid, 4,5,6,6₁ - tetrahydro - 2,2 dimethyl-, Me ester, 2315[3,4].
$C_{22}H_{42}BrIO_2$ Behenic acid, bromoiodo-, *and Ca salt*, 1592[3].
$C_{22}H_{42}O_2$ (See also *Erucic acid*.)
Brassidic acid, 2310[8]. *Tl salt*, 2818[2].
2,4 - Docosanedione, 739[1].
$C_{22}H_{42}O_3$ Behenic acid, ι - keto-, 3445[5].
$C_{22}H_{42}O_4$ 1,16 - Hexadecanedicarboxylic acid, di Et ester, 1789[4].
$C_{22}H_{43}IO_3$ Behenic acid, hydroxyiodo , *and Ca salt*, 1592[3].
$C_{22}H_{43}N$ Chaulmoogrylamine, N, N - diethyl , *and -HCl*, 3160[2].
$C_{22}H_{44}O$ Ketone, eicosyl methyl, 738[9].
$C_{22}H_{44}O_2$ Behenic acid, 738[7], *Na salt*, 1160[9], 3617[9].
Stearic acid, Bu ester, 2818[9].
$C_{23}H_{17}NO_4$ 1,2 - Pyran - 2 ol, 2 (and 4) - (m-nitrophenyl) - 4,6 (and 2,6) - diphenyl , *and perchlorate*, 417[3,4].
$C_{23}H_{16}Br_4O_4$ 1,2 - Ethanediol, 1,2 - bis(2 - hydroxy - p - anisyl) - 1 - methoxy - 2 - phenyl , anhydride, tetra - Br deriv., 2324[4].
$C_{23}H_{16}ClNO_3$ 2 (and 4) - (m - Nitrophenyl)-4,6 (and 2,6) - diphenylpyrylium chloride, *FeCl₃ compd.*, 417[1,3].
$C_{23}H_{16}N_2O$ 2 - Cyclopentaquinoxalin - 2 - one, 1,3 - dihydro - 1,3 - diphenyl-, 207[9].
$C_{23}H_{16}N_2O_2$ Pyridine, 2 (and 4) - (m - nitrophenyl) - 4,6 (and 2,6) - diphenyl-, *and perchlorate*, 417[2,3].
$C_{23}H_{16}N_2O_2S$ 2 - Cyclopentaquinoxaline - 1

sulfonic acid, 1,3 - dihydro - 2 - keto-1,3-diphenyl-, 207[7].

$C_{23}H_{16}N_4O_4$ 1 - Naphthanilide, 3 - hydroxy - 4-(*p* - nitrophenylazo)-, 1233[4].

$C_{23}H_{16}N_6O_{14}$ 1 - (*p* - Aminophenyl)pyridinium picrate, picrate, 586[2].

$C_{23}H_{16}O_3$ Acetate of compd. from 10-bromo-10-(*α* - bromobenzyl)anthrone, m. 140–1°, 3453[2].

$C_{23}H_{16}O_4$ Chromone, 7 - hydroxy - 2,3 - diphenyl-, acetate, 196[9].

Malonic acid, di-2-naphthyl ester, 1233[7].

Umbelliferone, 3,4 - diphenyl-, acetate, 595[2].

—, 4 - methyl - 3 - phenyl-, benzoate, 595[6].

$C_{23}H_{17}BrN_2O_3S$ 4 - Thiazolidone, 5 - (5 - bromovanillal) - 3 - phenyl - 2 - phenylimino , 1980[8].

$C_{23}H_{17}ClN_2O_3S$ 4 - Thiazolidone, 5 - (5 - chlorovanillal) - 3 - phenyl - 2 - phenylimino , 1980[8].

$C_{23}H_{17}ClO_6$ 2 - [*m* (and *p*) - Hydroxyphenyl]-4,6 - diphenylpyrylium perchlorate, 417[4].

$C_{23}H_{17}N$ Quinoline, 2 - phenyl - 4 - styryl , *and salts*, 2680[9], 2681[2].

$C_{23}H_{17}NO_3$ Benzil, *α* - oxime, cinnamyl deriv., 1230[6].

2,7 - Naphthalenediol, diphenylcarbamate, 911[1].

$C_{23}H_{17}N_3O$ Cinchophen, benzalhydrazide, 3010[8].

$C_{23}H_{17}N_3O_5S$ 4 - Thiazolidone, 5 - (5 - nitrovanillal) - 3 - phenyl - 2 - phenylimino , 1980[8].

$C_{23}H_{18}BrNO_4S_2$ Quinaldine, 3 - (*p* - bromophenylsulfonyl) - *α* - *p* - tolylsulfonyl-, 1626[1].

$C_{23}H_{18}BrNO_5S_2$ Quinaldine, *α* - (*o* - anisylsulfonyl) - 3 - (*p* - bromophenylsulfonyl)-, 1626[1].

$C_{23}H_{18}ClNO_2$ 4 - (*p* - Aminophenyl) - 2 - (*p*-hydroxyphenyl) - 6 - phenylpyrylium chloride, *and* · *HCl*, 758[4].

$C_{23}H_{18}ClNO_3$ 4 - (*p* - Aminophenyl) - 2,6 - bis (*p* - hydroxyphenyl)pyrylium chloride, *HCl*, 758[4]

$C_{23}H_{18}ClNO_5$ 4 - (Aminophenyl) - 2,6 - diphenylpyrylium perchlorate, 758[4]; *perchlorate*, 417[3].

$C_{23}H_{18}ClNO_7$ 4 - (*p* - Aminophenyl) - 2,6 - bis (*p* - hydroxyphenyl)pyrylium perchlorate, 758[4].

$C_{23}H_{18}NNaO_2$ 1,2,6 - Oxazin - 5 - ol, 6 - methoxy-3,4,6 - triphenyl , Na deriv., 1239[8].

$C_{23}H_{18}N_2$ Pyridine, 2 (and 4) - (*m* - aminophenyl) - 4,6 (and 2,6) - diphenyl , *and perchlorate*, 417[2, 3].

$C_{23}H_{18}N_2O_2$ *α*,*γ* - Dibenzophenazine, 11 - ethoxy-12-methoxy-, 1608[1].

Urea, *α* - 1 - naphthyl - *β* - (*p* - phenoxyphenyl)-, 1603[4].

$C_{23}H_{18}N_2O_3S$ 4 - Thiazolidone, 3 - phenyl - 2-phenylimino - 5 - vanillal-, 1980[8].

$C_{23}H_{18}N_4O_7$ Quinoline, dimethyl - 2 - phenyl , picrate, 418[3, 4].

$C_{23}H_{18}N_4O_8$ Lepidine, methoxy - 2 - phenyl-picrate, 418[2, 3, 4].

$C_{23}H_{18}OS$ Sulfoxide, diphenylmethyl 1 - naphthyl, 2669[8].

$C_{23}H_{18}OS_2$ Thiochromone, 6 - methyl - 3 - *α*-phenylmercaptobenzyl-, 203[7].

$C_{23}H_{18}O_2$ 9 - Anthrol, 10 - benzyl-, acetate, 3453[2].

Ketone, 9,10 - dihydro - 9 - anthryl phenyl, acetate, 3293[1].

$C_{23}H_{18}O_8$ Chromone, 3,5,7 - trihydroxy - 2 - styryl-, triacetate, 196[3].

$C_{23}H_{18}S$ Sulfide, diphenylmethyl - 1 - naphthyl, 2669[8].

$C_{23}H_{19}BrO_3$ 5,7 - Dimethoxy - 2,4 - diphenylbenzopyrylium bromide, 2499[2].

$C_{23}H_{19}ClO_5$ 9 - (4 - Hydroxy - 3 - methoxystyryl)-xanthylium chloride, HCO_2H addn. compd., 1807[1].

$C_{23}H_{19}ClO_7$ 5,7 (and 7,8) - Dimethoxy - 2,4-diphenylbenzopyrylium perchlorate, 2499[2].

$C_{23}H_{19}NOS_2$ 8 - Quinolinol, 5,7 - bis(*p* - tolylmercapto)-, 3289[7].

$C_{23}H_{19}NO_2$ 1,2 - Pyran - 2 - ol, 4 - (*m* - aminophenyl) - 2,6 - diphenyl-, *and* -*HBr*, 417[3].

$C_{23}H_{19}NO_3$ Benzanilide, *p* - (*β* - anisoylvinyl)-, perchlorate, 2156[8].

1,2,6 - Oxazin - 5 - ol, 6 - methoxy - 3,4,6-triphenyl , 1239[8].

$C_{23}H_{19}NO_3S$ Quinoline, 3 - [*o* (and *p*) - phenetylsulfonyl] - 2 - phenyl , *and salts*, 420[1].

$C_{23}H_{19}NO_6$ 5,7 - Dimethoxy - 2,4 - diphenylbenzopyrylium nitrate, 2499[2].

$C_{23}H_{19}N_3OS$ 2(3) - Thiazolone, 3,4 - diphenyl-, anisalhydrazone, 416[3].

$C_{23}H_{19}N_3O_4$ Compd., m. 226°, from *p* - aminobenzoic acid and Ac_2O, 1066[5].

$C_{23}H_{19}N_5OS$ 1,3,4 - Triazole, 2 - (benzalhydrazino) - 1 - benzoyl - 5 - (benzylmercapto)-, 2162[3].

$C_{23}H_{19}N_5S$ 1,3,4 - Triazole, 1,2 - bis(benzalamino) - 5 (benzylmercapto)-, 2162[3].

$C_{23}H_{20}ClNO_3$ + H_2O 9 - (*p* - Dimethylaminostyryl)-3,6 - dihydroxyxanthylium chloride, 1807[2].

$C_{23}H_{20}INO_2S$ 3 - (Anisylsulfonyl) - 1 - methyl-2 - phenylquinolinium iodide, 419[9], 420[1].

$C_{23}H_{20}N_2O$ Benzoic acid, *β* - (*β* - benzalisopropylidene) - *α* - phenylhydrazide, 2494[7].

$C_{23}H_{20}N_2O_2$ *o* - Toluic acid, *α* - (1 - keto - 2-indanyl)-, phenylhydrazide, 1620[2].

$C_{23}H_{20}N_4OS$ Δ^2 - 1,2,4 Triazoline, 1 - acetyl-3 - (benzylmercapto) - 4 - phenyl - 5-phenylimino , 2162[3].

$C_{23}H_{21}NO_4$ Benzanilide, 6 - hydroxy - 2,3,4-trimethyl-, benzoate, 2154[8].

$C_{23}H_{21}N_3O_3$ Triazinedione, ethyldihydrotriphenyl-, 3168[9]

$C_{23}H_{21}N_3O_3$ Benzamide, *N* - *o* - (1,3 - dihydro-2 - isoindylmethyl)benzyl - *p* - nitro-, 418[1].

Isatic acid, *N* - benzoyl , Et ester, phenylhydrazone, 2997[5].

$C_{23}H_{21}N_5O_7$ Δ^3 - 2 - Butenone, 4 - phenyl-, *p*-tolylhydrazone, picrate, 761[9].

$C_{23}H_{22}N_2O$ Isoindoline, 2 - *o* - (salicylalaminomethyl)benzyl , 418[1].

$C_{23}H_{22}N_2S$ 1,4 - Thiopyrone, tetrahydro - 2,6-diphenyl , phenylhydrazone, 200[1].

$C_{23}H_{22}N_4S$ 1,3,4 - Triazole, 2 - (benzylmercapto)-5-*p* toluino-1-*p* tolyl-, 2162[1].

$C_{23}H_{22}O$ 2 - Butanone, 3 - benzyl - 1,4 - diphenyl , 589[1].

$C_{23}H_{22}O_4$ Acetophenone, *α* - asaryl - *α* - phenyl , 2849[9].

$C_{23}H_{22}O_4$ Muconic acid, *β* - ethoxy - *γ* - hydroxy-*α*, *δ* - di - *p* - tolyl-, lactone, Me ester, 2849[6].

—, *β* - hydroxy - *γ* - methoxy - *α*, *δ* - di - *p*-tolyl-, lactone, Et ester, 2849[5].

$C_{23}H_{22}O_5S$ *m* - Cresolsulfonephthalein, di-Me ether, 3001[1].

$C_{23}H_{22}O_6$ Malonic acid, (α - 1,3 - diketo - 2-indanylbenzyl)-, di-Et ester, 911[9].

$C_{23}H_{23}N$ Indanamine, *N* - benzyl - *N* - tolyl-, 2156[1,2].

$C_{23}H_{23}NO$ Isobutyrotoluide, *β,β'* - diphenyl , 3451[9].

$C_{23}H_{23}NO_4$ Δ[3] - Cyclohexenecarboxylic acid, 6-(*p* - dimethylaminophenyl) - 4 - (*o* - hydroxystyryl) - 2 - keto-, 173[2]

$C_{23}H_{24}N_2$ 3,6 - Fluorenediamine, *N*, *N*, *N'*, *N'*-tetramethyl-9-phenyl-, 2837[1].

$C_{23}H_{24}N_2O_4S_2$ 2 - Propanone, 1 - (*o* - anisylsulfonyl) - 3 - *p* - tolylsulfonyl-, phenylhydrazone, 1625[7].

$C_{23}H_{24}N_2O_6$ Ecgonine, *p* - nitrobenzyl ester, benzoate, P 2228[4].

$C_{23}H_{24}N_4O_2$ Urea, benzalbis[tolyl-, 3169[1].

$C_{23}H_{24}O_3$ Ethane, 1 - asaryl - 1,1 (and 1,2)-diphenyl)-, 2849[8].

Methane, asarylphenyl - *o* - tolyl-, 2849[8].

$C_{23}H_{24}O_7$ Δ[2,4] - 1 - Pentadienone, 1 - (*p* - hydroxyphenyl) - 5 - phenyl , glucoside, 593[3].

$C_{23}H_{24}O_9$ Compd. from tetraacetylsantalin, carbonizes without m. 270–80°, 1405[8].

$C_{23}H_{24}O_{12}$ Glucodaphnetin, tetraacetyl-, 1070[3].

$C_{23}H_{25}ClO_9$ 4' - *β* - Glucosidoxy - 7 - hydroxy-3 - methoxy 5 - methylflavylium chloride, 3297[5]

$C_{23}H_{25}NO_3$ Δ[2] - Cyclohexenone, 3 - (*p* - dimethylaminostyryl) - 5 - hydroxyanisyl , 173[2,4].

ε - Truxillpiperididic acid, 1391[6]

$C_{23}H_{25}NO_4$ (See also *Lanthopine.*)

Ecgonine, benzyl ester, benzoate, *and -HCl and -HNO*$_3$, P 2228[4].

Pseudoecgonine, benzyl ester, benzoate, P 2228[4].

$C_{23}H_{25}NO_5$ Ecgonine, benzyl ester, salicylate, P 2228[4].

—, *o* - hydroxybenzyl ester, benzoate, P 2228[4].

$C_{23}H_{26}N_2$ *p* - Benzenimine, 4 (4,4' diamino 3,5,3',5' - tetramethylbenzohydrylidene)-, *-HCl*, 3000[8].

$C_{23}H_{26}N_2O$ Semicarbazide, 1,2 - bis(α - methylbenzyl) - 4 - phenyl , 1604[4]

$C_{23}H_{26}N_4O_4$ Isatic acid, *N* - carboxy , Et ester, phenylhydrazone, PhNHNH$_2$ salt, 2997[8].

$C_{23}H_{26}AsBr$ Benzylmesitylmethylphenylarsonium bromide, 393[4]

$C_{23}H_{26}N_2O_4$ (See also *Brucine.*)

o - Acetoacetotoluide, 4,4' - methylenebis , P 1910[8].

$C_{23}H_{26}N_2O_6$ Carbamic acid, malonylbis[benzyl , diethyl ester, 3164[3].

$C_{23}H_{26}N_4O_7$ Compd. from the hydrazone of Et brucinonate, m. 236°, 1811[8].

$C_{23}H_{26}N_4O_{12}$ 5 - Desoxymorphinic acid, dihydro , picrate, 2165[8].

$C_{23}H_{26}O_4$ Dilactone, m. 253-4°, from dianhydrostrophanthidin, 601[1].

Phenolglutarein, 4 - cyclohexyl , 2670[8].

$C_{23}H_{26}O_9S$ Glucose, benzoyl - *p* - toluenesulfonylmonoacetone , 2985[3,4].

$C_{23}H_{27}NO_8$ + 3H$_2$O See *Narceine.*

$C_{23}H_{27}N_3$ Compd., m. 187°, from 2 picoline and *p,p'* - bis(dimethylamino)benzohydrol, 1627[7]

$C_{23}H_{27}N_3O_4$ Isoquinoline, 1 - (2,4 - diacetamidobenzyl) - 1,2,3,4 - tetrahydro 8 - methoxy 2 - methyl - 6,7 - methylenedioxy-, 3457[9].

$C_{23}H_{28}N_4$ α - Tolunitrile, *N*, *N'* - heptamethylenebis[α - amino-, *and di-HCl*, 371[1].

$C_{23}H_{28}N_6O_4$ Compd. from the hydrazone of Et brucinonate, foams 220–30°, 1811[8].

$C_{23}H_{28}O_4$ Malonic acid, bis(γ - phenylpropyl) , mono-Et ester, 911[3].

$C_{23}H_{28}O_4S_2$ Acetone, bis(γ - hydroxypropyl)-mercaptole, dibenzoate, 737[4].

$C_{23}H_{28}O_8$ Lactone acid, m. 268°, from dianhydrostrophanthidin, 601[1].

$C_{23}H_{28}O_8$ Keto-dilactone, m. 285°, from pseudostrophanthidin, 600[9].

$C_{23}H_{28}O_{10}S_2$ Glucose, 3,6 (and 5,6) - di - *p*-toluenesulfonylmonoacetone-, 2984[9].

$C_{23}H_{28}O_{12}$ Acetophenone, *p* - tetraacetyl - *β*-glucosidoxy - ω - methoxy-, 3297[3].

$C_{23}H_{29}IN_2O_4$ 10 - Acetamido - 5,6,6$_1$,7 - tetrahydro - 1,2,11 - trimethoxy - 6,6 - dimethyl - 6,4 *peri* - naphthoquinolinium iodide, 3458[3].

$C_{23}H_{33}NO_4S$ Acridine, 1,2,3,4,4$_1$,5,10,10$_1$ - octahydro , camphorsulfonate, 1628[6]

$C_{23}H_{34}N_4O_{12}$ Dinicotinic acid, 1,4,?,? - tetrahydro - 4 - isobutyl 1,2,6 - trimethyl , di Et ester, styphnate, 3296[4].

$C_{23}H_{34}O_6$ Dianhydrostrophanthidin, hexahydro-, 208[4]

$C_{23}H_{34}O_7$ Lactone acid from dihydrostrophanthidin, 600[8].

$C_{23}H_{34}O_{11}$ Cyclopentanetricarboxylic acid, dicarboxypropylketo , pentaethyl ester, 3440[4,5].

$C_{23}H_{35}N_3O_2$ Civetone, *p* nitrophenylhydrazone, 1791[1].

$C_{23}H_{36}$ Hydrocarbon, m 117°, 916[4]

$C_{23}H_{38}IN$ Apoconessine, methiodide, 3458[3].

$C_{23}H_{36}O_5$ Desoxyoctahydrodianhydrostrophanthidin, 208[4].

Pyroisolithobilianic acid, 2166[8].

$C_{23}H_{36}O_6$ Dianhydrostrophanthidin, octahydro-, 208[4].

$C_{23}H_{34}O_6$ Acid, m. 233°, from 13 - hydroxylithobilianic acid, 2166[9].
$C_{23}H_{36}O_6$ Acid, 918[6].
$C_{23}H_{37}NO_2$ Muscol, carbanilate, 2834[3].
$C_{23}H_{38}O$ 10,13 - Tricosadiin - 12 - one, 1783[9].
$C_{23}H_{38}O_3$ Desoxypyrolithobilianic acid, 2167[1].
$C_{23}H_{41}NO_2$ Di(campholacyl)methylamine, 1399[4].
$C_{23}H_{44}O_2$ Erucic acid, Me ester, 1590[2].
2,4 - Tricosanedione, 739[1].
$C_{23}H_{44}O_4$ 1,17 - Heptadecanedicarboxylic acid, di-Et ester, 1789[3].
$C_{23}H_{46}O$ Ketone, heneicosyl methyl, 738[3].
$C_{23}H_{46}O_2$ Stearic acid, Am and isoamyl esters, 2818[9].
$C_{23}H_{48}O$ 12 - Tricosanol, 2819[2].
$C_{24}H_{10}N_8O_{19}$ Benzene, 1,3,5 - tris(dinitrophenoxy) - 2,4 - dinitro-, 2668[1].
$C_{24}H_{10}O_8$ 2,9 - ββ - Dibenzanthracenedicarboxylic acid, 5,7,12,14 - tetrahydro-5,7,12,14 - tetraketo-, 385[9].
$C_{24}H_{12}Cl_4O_7$ Fluoran, 12,13,14,15 - tetrachloro-3,4 - dihydroxy, diacetate, 3001[7]
$C_{24}H_{12}Cl_6O_2S_3$ Resorcinol, 2,4,6 - tris(2,5 - dichlorophenylmercapto), 3289[7].
$C_{24}H_{12}Cl_6O_3S_3$ Phloroglucinol, 2,4,6 - tris(2,5 dichlorophenylmercapto), 3289[7].
$C_{24}H_{12}N_4O$ o - Naphthoylene - 2,3 - phenazinoiminazole, 1805[6]
$C_{24}H_{12}N_6$ Diquinoxalophenazine, 2837[1].
$C_{24}H_{12}O_2$ $\Delta^{7,7'(8,8')}$ - Bi[acenaphthene] - 8,8'-dione, 1234[7]
$C_{24}H_{13}N_5$ Triazolacenaphthoquinoxaline, 5-phenyl, 1081[4].
$C_{24}H_{14}$ Butadiine, di 1 naphthyl, 1783[4].
$C_{24}H_{14}BrNO_4S$ Quinophthalone, 3' - (p - bromophenylsulfonyl), 1626[6]
$C_{24}H_{14}Cl_4O_6$ Isophenolphthalein, tetrachloro, diacetate, 596[6]
$C_{24}H_{14}O$ $\Delta^{7,7'(8,8')}$ - Bi[acenaphthene] - 8 - one, 1234[7].
$C_{24}H_{14}O_{10}$ Terephthalic acid, 2,5 - bis(p - carboxybenzoyl), *and Ba salt*, 385[9].
$C_{24}H_{15}Cl_3N_2O_3$ Quinone, 2,5 - dianilino - 3-(2,4,6 - trichlorophenoxy), 2319[1]
$C_{24}H_{15}Cl_3O_2S_3$ Resorcinol, 2,4,6 - tris(p - chlorophenylmercapto)-, 3289[7]
$C_{24}H_{15}Cl_3O_3S_3$ Phloroglucinol, 2,4,6 tris(p-chlorophenylmercapto), 3289[8].
$C_{24}H_{15}NO_3$ 3,4 - Furandicarboximide, N,2,5-triphenyl, 386[4]
$C_{24}H_{15}N_3$ αηα' - Tribenzophenazine, 11 amino, - H_2SO_4, 602[3]
$C_{24}H_{15}N_3O_9$ Benzene, 1,3,5 - trinitro - 2,4,6-triphenoxy-, 2317[2].
$C_{24}H_{15}N_3O$ 4,5 - Acenaphthotriazoledione, 8-phenyl, phenylhydrazone, 1081[4].
$C_{24}H_{16}$ $\Delta^{1,1'}$ - Biacenaphthene, 1234[6].
$C_{24}H_{16}Br_2CdO_6$ 2 - Naphthoic acid, 4 - bromo-3 - hydroxy-, Me ester, Cd deriv., 910[6]
$C_{24}H_{16}Br_4Cr$ Tetrakis(p - bromophenyl)chromium bromide, 2668[4].
$C_{24}H_{16}N_2$ Quinoxaline, naphthylphenyl, 1401[8].
$C_{24}H_{16}N_2O_2$ Phthalimide, N - (2 - phenyl - 4-quinolylmethyl), 204[9].
$C_{24}H_{16}N_2O_7$ Benzene, 2,4 - dinitro - 1,3,5 - triphenoxy-, 1222[8]
$C_{24}H_{16}N_4O_4S_4$ Compd. from diazotized thianthrenediamine and resorcinol, 2681[4].
$C_{24}H_{16}N_4O_8Sn$ Stannane, tetrakis(p - nitrophenyl)-, 585[7].
$C_{24}H_{16}N_4O_9$ 4 - Quinolineacrylic acid, 2 - phenyl-, picrate, 1413[4].
$C_{24}H_{16}O_4$ 2,7 - Naphthalenedicarboxylic acid, di-Ph ester, 1619[6].
$C_{24}H_{16}O_6S$ Dehydro - 2,4 - hydroxynaphthoic acid sulfide, di-Me ester, 1233[9].
$C_{24}H_{17}BrN_2O$ 2 - Cyclopentaquinoxalin - 2-one, 8 - bromo - 1,2 - dihydro - 6 - methyl-1,3-diphenyl-, 207[7].
$C_{24}H_{17}ClN_2O$ 2 - Cyclopentaquinoxalin - 2 - one, 6 - chloro - 1,3 - dihydro - 7 - methyl-1,3-diphenyl-, 207[7].
$C_{24}H_{17}Cl_4NO_8$ Triacetate of compd. from 2-anilino - 3 - chloro - 5 - (2,4,6 - trichlorophenoxy)quinone, 2318[9].
$C_{24}H_{17}NO_3$ Benzamide, N - (8 - hydroxy - 1-naphthyl)-, benzoate, 1073[6].
$C_{24}H_{17}NO_6$ Tartrimide, N - phenyl-, dibenzoate, 1789[6].
$C_{24}H_{17}N_3$ 5,6 - Benzoquinoxaline, 6 - amino-2,3-diphenyl-, *and salts*, 602[9].
$C_{24}H_{17}N_3O_3$ Phenol, p - [p - (4 - keto - 1 - pyridyl) - phenylazo]-, benzoate, 586[5].
$C_{24}H_{17}N_3O_8$ Ketone, benzyl naphthyl, picrate, 1401[8].
$C_{24}H_{18}$ Benzene, 1,3,5 - triphenyl-, 207[9].
$C_{24}H_{18}As_2N_2O$ Phenarsazine, 1,1' - oxybis[1,6-dihydro-, 3058[1].
$C_{24}H_{18}BiN_6O_{18}$ Bismuthine, tris(4 - carboxy-2 - nitrophenyl)-, dinitrate, tri-Me ester, 1063[6]
$C_{24}H_{18}Br_2Cl_2N_2$ 1,1' - (1,4 - Dichloro - 9, 10-dihydro 9,10 anthrylene)bispyridinium dibromide, 3166[4].
$C_{24}H_{18}CaO_8Sn$ + $4H_2O$, 3404[2].
$C_{24}H_{18}CdO_6$ 2 - Naphthoic acid, 3 - hydroxy-, Me ester, Cd deriv, 910[9].
$C_{24}H_{18}ClNO_4$ Oxazinol, (chlorophenyl)methoxyphenyl-, benzoate, 3168[6].
$C_{24}H_{18}ClN_3O_5$ 12 - (p - Acetamidophenyl) - 12-α - benzophenazonium perchlorate, 602[2].
$C_{24}H_{18}Cl_2O_2Te$ Bis(p - phenoxyphenyl)tellurium dichloride, 1063[8].
$C_{24}H_{18}Cl_4N_2$ 1,1' - (1,5 - Dichloro - 9,10 - dihydro - 9,10 - anthrylene)bispyridinium dichloride, 754[5].
$C_{24}H_{18}Cl_4O_2$ Phthalide, 3,4,5,6 - tetrachloro-2 - (2,3 - xylyl) - 2 - (3,4 - xylyl), 1231[3].
$C_{24}H_{18}CuO_6$ 2 - Naphthoic acid, 3 - hydroxy-, Me ester, Cu deriv., 910[9].
$C_{24}H_{18}MgO_4$ Ketone, methyl 1 - hydroxy - 2-naphthyl, Mg deriv., 399[3].
$C_{24}H_{18}N_2$ Azobenzene, p,p' - diphenyl-, 2848[2].
$C_{24}H_{18}N_2O$ Azoxybenzene, p,p' - diphenyl-, 2848[2].
1,2 - Cyclopentaquinoxalin - 2 - one, 1,3-dihydro - 6 - methyl - 1,3 - diphenyl-, 207[7].
$C_{24}H_{18}N_2OS$ 4 - Thiazolidone, 5 - cinnamal - 3-phenyl - 2 - phenylimino-, 1980[7].
$C_{24}H_{18}N_2O_2$ Benzamide, N,N' - 1,4 - naphthylenebis-, 410[6].
Benzophenone, oxime, 1 - naphthalenecarbamyl deriv., 2319[5].
1 - Naphthaleneacetanilide, 2 - hydroxy-α-phenylimino-, 597[9].
2,7 - Naphthalenedicarboxanilide, 1619[3].
$C_{24}H_{18}N_2O_9$ Isobutyrophenone, β,β' - bis(4,5-methylenedioxy - 2 - nitrophenyl)-, 2326[1].
$C_{24}H_{18}N_3NaO_3S$ Compd. from 3 - amino - 1-acenaphthenesulfonic acid, 411[4].
$C_{24}H_{18}N_4O_2$ Dibenzophenazine, diacetamido, 603[1,2].
$C_{24}H_{18}N_4O_7$ Quinoline, 2 - phenyl - 4 - propenyl-, picrate, 2681[2].
$C_{24}H_{18}N_4O_8$ 3,4 - Pyrazoledicarboxylic acid, 1,1'-p - biphenylenebis[5 - methyl-, *and K salts*, 599[3].

$C_{24}H_{18}N_4O_9$ 4 - Quinolinepropionic acid, 2-phenyl-, picrate, 1413[5].
$C_{24}H_{18}N_4O_{10}$ 4 - Quinolinepropionic acid, 6-hydroxy - 2 - phenyl-, picrate, 1413[5].
$C_{24}H_{18}N_6O$ Phenol, *p* - [*p* - (*p* - phenylazophenylazo)phenylazo]-, 2836[8].
$C_{24}H_{18}N_6O_2$ Azoxybenzene, *o,o'* - bis(phenylazoxy)-, 2836[1].
$C_{24}H_{18}N_6O_6S_4$ Thianthrene, 2,6 bis(*p* - sulfophenyltriazeno)-, 2681[8].
$C_{24}H_{18}O_2$ 1 - *meso* - Benzanthren - 7 - ol, 2,3-dihydro-, benzoate, 1404[5].
Isoflavone, 6 - methyl - 2 - styryl-, 1237[8].
2,2' - Spirobi[4,2 - benzopyran], 3 - benzyl-, 3008[4].
Xanthydrol, 9 - (1 - naphthylmethyl)-, 2328[6].
$C_{24}H_{18}O_2Te_2$ Ditelluride, bis(*p* - phenoxyphenyl), 1063[8].
$C_{24}H_{18}O_3$ Indone, 3 - (α - hydroxybenzyl) - 2-phenyl-, acetate, 1804[3].
Isoflavone, 7 - methoxy - 2 - styryl-, 196[8].
$C_{24}H_{18}O_4$ Flavone, 3 - benzyl - 7 - hydroxy-, acetate, 197[1].
$C_{24}H_{18}O_5$ Compd. from 3 - (α - hydroxybenzyl)-2-phenylindone acetate, m. 144–5°, 1804[4].
Umbelliferone, 4 - *p* - anisyl - 3 - phenyl, acetate, 595[4].
$C_{24}H_{18}O_6S$ Iso - 2,4 - hydroxynaphthoic acid sulfide, di-Me ester, 1233[9].
1 - Naphthoic acid, 4,4' - thiobis[3 - hydroxy-, di-Me ester, 1233[9].
$C_{24}H_{18}O_7$ Propionic acid, β - (β - resorcylyl)-, dibenzoate, 2996[1].
$C_{24}H_{19}ClN_4O$ 5 - Acetamido - 12 - (*m* - aminophenyl) - 12 - α - benzophenazonium chloride, 602[4].
12 - (*m* - Acetamidophenyl) - 5 - amino - 12-α - benzophenazonium chloride, 602[4].
$C_{24}H_{19}ClN_4O_5$ 5 - Acetamido 12 - (*m* - aminophenyl) - 12 - α - benzophenazonium perchlorate, 602[4].
12 - (*m* - Acetamidophenyl) - 5 - amino - 12-α - benzophenazonium perchlorate, 602[4].
$C_{24}H_{19}ClO_6$ 2 - *m* (and *p*) - Anisyl - 4,6 - diphenylpyrylium perchlorate, 417[4].
3 - Benzoyl - 2 - (*o* - hydroxystyryl)benzopyrylium perchlorate, 3008[4].
$C_{24}H_{19}Cl_2NO_3$ Dichloro deriv., m. 265°, 192[1].
$C_{24}H_{19}Hg_2NS_2$ Bis(phenylmercuri)amine, *p,p'*-bis(phenylmercapto)-, -*HCl*, 1605[7].
$C_{24}H_{19}NO$ Quinoline, 6 - methoxy - 2 - phenyl 4-styryl-, *and salts*, 2081[1,3].
$C_{24}H_{19}NO_2$ Acetophenone, α - (4 - methyl - 2 phenyl-6-quinolyloxy)-, 418[7].
Benzohydrol, 1 - naphthalenecarbamate, 1232[9].
Truxillimide, *N* - phenyl-, 1391[2].
$C_{24}H_{19}NO_3S$ Quinoline, 3 - (anisylsulfonyl)-2-styryl-, *and -HCl*, 419[2,3].
$C_{24}H_{19}N_3$ Triazene, 1,3 - bis(*p* - phenylphenyl)-, 587[4].
$C_{24}H_{19}N_5O_2$ Indigotin, 5 - *p* - (dimethylaminophenylazo)-, 2836[7].
$C_{24}H_{19}N_5O_6S_2$ Azo dye, m. 246–7°, from 4,6-dihydroxy - *m* - benzenedisulfonanilide, 2841[7].
$C_{24}H_{19}N_7$ Aniline, *p* - [*p* - (*p* - phenylazophenylazo)phenylazo]-, 2836[8].
$C_{24}H_{20}BrNO_3$ Bromo deriv., m. 251–3°, of the hydroxymonoacetyl compd., 192[1].
$C_{24}H_{20}ClN$ Addn. compd., m. 173–4°, of Ph_3CCl and C_5H_5N, 189[7].
1 - Methyl - 2,4,6 - triphenylpyridinium chloride, *and -HCl*, 1625[4].
$C_{24}H_{20}ClNO_2$ 4 - (*p* - Aminophenyl) - 2 - *p* - anisyl - 6 - phenylpyrylium chloride, -*HCl*, 758[4].
Monochloro deriv., m. 238°, 192[1].
$C_{24}H_{20}ClNO_3$ Propionic acid, (chlorobenzoyl)-hydroxyphenyl-, methyl ester, oxime, benzoate, 3168[5].
$C_{24}H_{20}Cl_6N_4OPt$ 5 - Acetamido - 12 - (*m* - aminophenyl) - 12 - α - benzophenazonium chloroplatinate, 602[4].
$C_{24}H_{20}HgN_6$ Triazene, 3,3' - mercuribis[1,3-diphenyl-, 591[2].
$C_{24}H_{20}MnNO_4$ 1 - Methyl - 2,4,6 - triphenylpyridinium permanganate, 1625[4].
$C_{24}H_{20}MoN_2O_{16}$ + H_2O Pyridine digallatomolybdate, 3405[9].
$C_{24}H_{21}N$ 4 - Pyridyl, 1,4 - dihydro - 1 - methyl-2,4,6 - triphenyl-, 1625[2].
$C_{24}H_{20}N_2$ Hydrazobenzene, *p,p'* - diphenyl-, 2848[2].
Ketone, benzyl naphthyl, phenylhydrazone, 1401[8].
$C_{24}H_{20}N_2O_2$ 2 - Acetonaphthone, 1 - hydroxy-, azine, 1617[4].
$C_{24}H_{20}N_2O_4$ Glycol, di - 1 - naphthalenecarbamate, 1232[9].
Truxillanilic acid, nitroso, 1392[8].
$C_{24}H_{20}N_2O_6S_2$ 1 - Naphthol - 4 - sulfonic acid, 2-acetyl, azine, 1617[4].
Succinic acid, α,β - bis(2 - naphthylsulfonamido), 2313[1].
$C_{24}H_{20}N_2O_{12}W$ + $3H_2O$ Pyridine digallatotungstate, 3405[9].
$C_{24}H_{20}N_4O_8$ Lepidine, ethoxy - 2 - phenyl, picrate, 418[6,7,8].
$C_{24}H_{20}N_4O_9$ 1,3 - Propanediol, 2 - (2 - phenyl 4-quinolyl)-, picrate, 2681[1].
$C_{24}H_{20}N_6O_{12}$ Propane, 2 - *p* - cumenyl - 1,3-dipicryl, 3000[4].
$C_{24}H_{20}O_2$ 1,2 - Ethanediol, 2 - (1 - naphthyl)-1,1-diphenyl-, 2851[9].
Naphthalene, 2,7 - bis(benzyloxy), 911[2].
$C_{24}H_{20}O_{14}U_2$ Uranium citrate, 3139[7].
$C_{24}H_{20}Si$ Silicane, tetraphenyl, 584[7].
$C_{24}H_{20}Sn$ Stannane, tetraphenyl, 584[7], 1607[8].
$C_{24}H_{21}BiCl_2O_6$ Bismuthine, tris(*p* - carboxyphenyl)-, dichloride, tri-Me ester, 1063[4].
$C_{24}H_{21}BrO_2$ 1 - Indanone, 3-(α - bromobenzyl)-2(or 3) - ethoxy - 2 - phenyl-, 1804[3].
$C_{24}H_{21}ClO_5$ Ethylmethyldiphenylbenzopyrylium perchlorate, 3167[8].
$C_{24}H_{21}N$ Quinaldine, α,α' - dibenzyl-, 419[8].
$C_{24}H_{21}NO$ Carbinol, triphenyl-, pyridine salt, -*HCl*, 189[8], 2490[8].
$C_{24}H_{21}NO_3$ Hydroxymonoacetyl compd., m. 196–8°, 191[8], 192[1].
$C_{24}H_{21}NO_3$ 1,2,6 - Oxazine, 5,6 - dimethoxy-3,4,6-triphenyl-, 1239[9].
Truxillanilic acid, *salts*, 1392[1].
$C_{24}H_{21}NO_4S_2$ Quinaldine, 3 - (anisylsulfonyl)-α-*p*-tolylsulfonyl-, 1625[2,3].
$C_{24}H_{21}NO_6S_2$ Quinaldine, α,3 - bis(*o* - anisylsulfonyl)-, 1625[9].
$C_{24}H_{21}N_3O_3$ Benzidine, *N* - (acetylisopropylidene) - *N'* - *p* - nitrobenzal-, 1614[8].
$C_{24}H_{21}N_3O_7$ Benzamide, *N* - [*o* - (β - hydroxyethyl)phenethyl] - *p* - nitro-, *p* - nitrobenzoate, 1413[8].
$C_{24}H_{21}N_3O_9S_3$ 1,3,5 - Benzenetrisulfonanilide, 2,4-dihydroxy-, 2841[7].
$C_{24}H_{21}N_3S_2$ 1 - Naphthoic acid, dithio-, diphenylguanidine salt, 3099[9].

$C_{24}H_{21}N_5O_9$ Carbamic acid, (β - 5 - acridylethyl)-, Et ester, picrate, 2501[7].

$C_{24}H_{22}As_2N_4O_4S_2$ Metanilanilide, 4′,4‴ - arsenobis-, 2838[8].

$C_{24}H_{22}ClN_2$ 4,4′ - Bipyridinium, 1,1′ - dibenzyl-, subchloride, 2163[9].

$C_{24}H_{22}Cl_2O_2$ Anthracene, 1,5 - dichloro - 9,10-diethoxy - 9,10 - dihydro - 9 - phenyl-, 2678[6].

$C_{24}H_{22}INO_3S$ 1 - Methyl - 3 - [o (and p) - phenetylsulfonyl] - 2 - phenylquinolinium iodide, 420[1,2].

$C_{24}H_{22}N_2$ Compd. from 3,4 - dihydro - 4 - methyl-3 - methylene - 5,6 - benzoquinoline and p - dimethylaminobenzaldehyde, 419[5].

$C_{24}H_{22}N_2O_2$ 1,3 - Butanedione, 1 - phenyl-, 3 - methylphenylhydrazone, Bz deriv. (?), 2856[8].

Δ[3] - 2 - Butenone, 4 - hydroxy - 4 - phenyl, methylphenylhydrazone, Bz deriv. (?), 2856[8].

Truxillamide, N - phenyl, 1391[4]

$C_{24}H_{22}N_4O_9$ 6 - Benzyloxy - 3,4 - dihydro - 7-methoxy - 2 - methylisoquinolinium picrate, 3011[3].

$C_{24}H_{22}N_4O_{11}$ Propiophenone, α - amino - 3,4-dimethoxy - β - (3,4 - methylenedioxyphenyl)-, picrate, 1083[8].

$C_{24}H_{22}O$ Δ[1] - 3 - Pentenone, 4 - benzyl - 1,5-diphenyl-, 419[5].

$C_{24}H_{22}O_2$ Benzopyran, methoxydimethyldiphenyl-, 3167[9].

Compds. from α - tolualdehyde, m 109°, 133° and 165°, 1400[9]

Compd. from α - tolualdehyde, m. 135°, 1401[1].

Valeric acid, β - benzyl - δ - hydroxy - α,γ-diphenyl-, δ-lactone, 1401[2].

m-Xylene, 4,6 - di - p - toluyl-, 386[1].

$C_{24}H_{22}O_4$ 1,1′ - Binaphthyl, 3,4,3′,4′ - tetramethoxy, 383[7].

m - Xylene, 4,6 - dianisoyl, 386[2].

$C_{24}H_{22}O_{11}$ Compd from quinone, 3695[4].

$C_{24}H_{23}N_3O_2$ Triazinedione, dihydrotriphenylpropyl-, 3169[1].

Urazole, 1,2 - bis(α - methylbenzyl) - 4-phenyl-, 1604[4].

$C_{24}H_{24}BaN_6O_{10}S_2$ 1,2,3 - Triazole - 4 - carboxylic acid, 1 - benzylsulfonyl - 5 - hydroxy, Et ester, Ba deriv., 1409[3].

$C_{24}H_{24}INO_2$ 6,7 - Bis(benzyloxy) - 3,4 - dihydro-2 - methylisoquinolinium iodide, 3011[2].

$C_{24}H_{24}N_2O_3$ Cyclohexanone, 2,6 - bis(p - acetamidobenzal), perchlorate, 2157[1].

$C_{24}H_{24}O_2$ Camphene, dibenzoyl, 4788[8].

$C_{24}H_{25}ClN_4O_{11}$ Ozocodeine, chlorodihydro-, picrate, 2165[4].

$C_{24}H_{25}NO_3$ Morphine, benzyl-, 2563[2]; - HCl, 969[2].

$C_{24}H_{25}NO_{12}$ 1 - Naphtholglucotetraacetate, 4-nitro-, 2487[2].

$C_{24}H_{25}N_3O_5$ 3,4 - Pyrazoledicarboxylic acid, 1-[p - (p - acetamidophenyl)phenyl] - 5-methyl-, di-Et ester, 599[2].

$C_{24}H_{26}CoN_4O_6S$ Butyric acid, β - sulfo-, Co deriv., pyridine salt, 1979[4].

$C_{24}H_{26}CuO_4$ 2,4 - Hexanedione, 6 - phenyl-, Cu deriv., 413[4].

$C_{24}H_{26}N_2O_2$ α - Toluamidine, N,N′ - di - p-phenetyl-, 1218[4].

$C_{24}H_{26}N_2O_5S_2$ 2 - Propanone, 1 - (o - phenetylsulfonyl) - 3 - p - tolylsulfonyl-, phenylhydrazone, 1625[8].

$C_{24}H_{26}N_4NiO_6S$ Butyric acid, β - sulfo-, Ni deriv., pyridine salt, 1979[4].

$C_{24}H_{26}N_4O_{12}$ Ozocodeine, dihydro-, picrate, 2165[4].

$C_{24}H_{26}O_2$ Propane, 2 - asaryl - 1,2 - diphenyl-, 2849[9].

$C_{24}H_{26}O_9S_3$ Glycerol, tri - p - toluenesulfonate, 740[2].

$C_{24}H_{27}ClN_4O_{11}$ 5 - Desoxymorphinic acid, chlorodihydro-, Me ester, picrate, 2165[9].

$C_{24}H_{27}NO_3$ ε - Truxillpiperididic acid, Me ester, 1391[6].

$C_{24}H_{27}NO_4$ Ecgonine, α - methylbenzyl ester, benzoate, P 2228[4]; phenethyl ester, benzoate, and - HCl and - H NO3, P 2228[4].

Pseudoecgonine, phenethyl ester, benzoate, P 2228[4].

$C_{24}H_{27}NO_5$ Ecgonine, benzyl ester, 2,3 - cresotate, P 2228[4].

$C_{24}H_{28}Cl_2N_2$ Piperidine, 1,1′ - (dichloro - 9,10-dihydro - 9,10 - anthrylene)bis-, 754[3], 3166[4].

$C_{24}H_{28}Cl_3IrN_4$, 2295[9].

$C_{24}H_{28}Cl_4O_4$ Diisoeugenol, tetrachlorodiethyl-, 748[3].

$C_{24}H_{28}Co_2N_6O_{18}$, 2296[4].

$C_{24}H_{28}HgI_4N_2$ Quinoline, complex salt with C_3H_7I and HgI_2, 3695[9].

$C_{24}H_{28}IN$ Tribenzylpropylammonium iodide, 2815[8].

$C_{24}H_{28}N_4O_{12}$ 5 - Desoxymorphinic acid, dihydro, Me ester, picrate, 2165[6].

$C_{24}H_{28}N_6O_5$ Acid, from β - diacetonefructose, phenylosazone, phenylhydrazine salt, 1389[1].

Galacturonic acid, phenylosazone, phenylhydrazine salt, 1389[5].

$C_{24}H_{28}N_{14}O_{10}$ Guanidine, α,α′ - ethylenebis, dipicrolonate, 3690[5].

$C_{24}H_{29}IN_2O_4$ Brucine, methiodide, 1795[8].

$C_{24}H_{29}NO_8$ Codeine, dihydrodihydroxy-, tri-Ac deriv., 2332[3].

$C_{24}H_{29}N_7O_7 + 3H_2O$ Brucinonic acid, hydrazide, semicarbazone, 1811[7].

$C_{24}H_{30}Hg_2N_6NaO_9$, 2719[6].

$C_{24}H_{30}N_2O_8$ Bicarbamic acid, N,N″ - p - biphenylenebis, tetra-Et ester, 410[6].

$C_{24}H_{30}O_4$ Compd. from hydrogenation of acenaphthenequinone, m. 206°, 1405[2].

$C_{24}H_{30}O_4S_2$ 2 - Butanone, bis(γ - hydroxypropyl)mercaptole, dibenzoate, 737[4].

$C_{24}H_{30}O_8$ Addn. compd., m. 147°, of 5,6,7,8-tetrahydro - 2 - naphthol and di-Me oxalate, 47[2].

$C_{24}H_{30}O_9$ 1,2 - Propanediol, 3 - (3,4 - dimethoxyphenyl) - 3 - (2,4,6 - trimethoxyphenyl)-, diacetate, 2489[8].

$C_{24}H_{31}Cl_{12}Ir_3K_9N_4$, 2295[9], 3659[7].

$C_{24}H_{31}NO_3$ Norcodeine, N - (cyclohexylmethyl), and - HCl, 3012[7].

$C_{24}H_{31}N_3O_3$ Cyclohexanecarboxylic acid, 2 - (p-dimethylaminophenyl) - 4 - hydroxy-6 - keto - 4 - methyl-, Et ester, phenylhydrazone, 173[3].

$C_{24}H_{32}Mo_{12}O_{64} + 9H_2O$ Citromolybdic acid, 3406[1].

$C_{24}H_{32}N_4O_9$ Isomaltose, osazone, 2829[5].

$C_{24}H_{32}N_8O_{36}$ α - Tetraamylose, octanitrate, 380[9].

$C_{24}H_{32}O_3$ Dianhydrogitoxigenin, 209[1].

$C_{24}H_{32}O_4$ Dianhydrobigitaligenin, acetyl-, 2724[6].

$C_{24}H_{32}O_5S_2$ d - Glucose dibenzyl mercaptal, mono-2 - butanone compd., 170[7].

$C_{24}H_{32}O_{16}$ Cellobiose anhydride, hexa-Ac deriv., 381[4].

$C_{24}H_{34}N_2O_2$ See *Eucupine*.

$C_{24}H_{34}O_5$ Dehydrocholic acid, 3039[7].

$C_{24}H_{34}O_8$ Bilianic acid, 401[3].
Isobilianic acid, 401[3].

$C_{24}H_{35}NO_9$ Stadenic acid, 13-ketonitro-, 2166[6].

$C_{24}H_{35}NO_{10}$ Dimethyl ester of acid from digitoic acid, m. 194–5°, 1414[3].

$C_{24}H_{36}O$ Cycloheptadecanone, benzal-, 1791[9].

$C_{24}H_{36}O_4$ Dehydrohyodesoxycholic acid, 2166[5].

$C_{24}H_{36}O_5$ Gitoxigenin, 208[9].

$C_{24}H_{36}O_6$ Bigitaligenin, acetyl deriv., 2724[5].
Lactonedicarboxylic acid, m. 226–7°, from 13-ketostadenic acid, and isomer, m 270°, 2166[7].
Lithobilienic acid, 2166[9].

$C_{24}H_{36}O_7$ Desoxybilianic acid, 400[3], 401[3].
Isodesoxybilianic acid, 401[3].
Stadenic acid, 13-keto-, 2166[6].

$C_{24}H_{36}O_9$ Ester of acid from oxydigitogenic acid, m. 142°, 1414[4].

$C_{24}H_{36}O_{10}$ Anthropo-choloidamic acid, 918[6].
Choloidanic acid, 400[3].

$C_{24}H_{36}O_{18}$ Cyclohexane, 1,2,3,4,5,6-hexacarboxyoxy-, hexa-Et ester, 2831[5].

$C_{24}H_{37}NO_{11}$ Trimethyl ester of acid from oxydigitogenic acid, m. 171°, 1414[4].

$C_{24}H_{38}O_5$ Pyroisolithobilianic acid, Me ester, 2166[8].

$C_{24}H_{38}O_6$ Allolithobilianic acid, 2166[9]
Isolithobilianic acid, 2166[7].

$C_{24}H_{38}O_7$ Lithobilianic acid, 12-hydroxy-, 2166[8].

$C_{24}H_{38}O_{13}S$ Glucose, diacetone-, sulfite, 1060[6]
Glucosesulfonic acid, diacetone-, diacetone glucose ester, 1060[6]

$C_{24}H_{40}Cl_4Fe_4O_{16}$, 2127[8]

$C_{24}H_{40}N_2$ Conessine, 3458[1]

$C_{24}H_{40}N_4O_4$ Compd., m. 228°, from 13-keto stadenic acid, 2166[7]

$C_{24}H_{40}O_2$ Allocholanic acid, 2167
Cholanic acid, 2167[1]. *Ag salt*, 409[1].
Desoxypyrolithobilianic acid, Me ester, 2167[1].

$C_{24}H_{40}O_3$ Isolithocholic acid, 916[4].

$C_{24}H_{40}O_4$ Allocholanic acid, 3,13-dihydroxy-, 2166[8].
Cheno-desoxycholic acid, 54[8,9].
Desoxycholic acid, 54[8,9], 401[5].
Hyodesoxycholic acid, 2166[5]

$C_{24}H_{40}O_5$ (See also *Cholic acid*.)
Acid from tobacco resins, 967[4]

$C_{24}H_{40}O_{20}$ Tetraglucosan, 743[3], 1598[7]

$C_{24}H_{41}NO$ Stearanilide, 309[8].

$C_{24}H_{42}CuO_4$ Δ[3]-2-Dodecenone, 4-hydroxy-, Cu deriv., 738[9].
3,5-Heptanedione, 4-β-methylbutyl-, Cu deriv., 413[7].

$C_{24}H_{42}O_4$ 1,1′-Bimenthol, diacetate, 1614[4]

$C_{24}H_{47}O_{20}S$ Sulfone, 1,1-dicellosyl, 379[8]

$C_{24}H_{48}O_2$ Lignoceric acid, 1590[8], 3582[9].
Palmitic acid, octyl ester, 2818[9].

$C_{24}H_{57}Cl_{18}Ir_2N_{11}$, 2295[8], 3659[7].

$C_{24}H_{64}Cl_6Co_2N_{20}O_{24}$ + $6H_2O$, 1962[1].

$C_{24}H_{64}Cl_{12}Co_2N_{20}O_{12}S_3$ + $10H_2O$, 1961[9]

$C_{24}H_{64}Co_2I_6N_{20}$, 1961[8].

$C_{24}H_{64}Co_2N_{20}O_{18}S_3$ + $8H_2O$, 1961[9].

$C_{24}H_{64}Co_2N_{20}O_{24}S_{18}$ + $18H_2O$, 1962[1].

$C_{24}H_{64}Co_2N_{26}O_{24}$ + $4H_2O$, 1962[1].

$C_{25}H_{13}Cl_3N_4O_7$ 1,5,10-Trichloro-9-anthrylpyridinium picrate, 755[5].

$C_{25}H_{14}N_2O_{12}$ Triacetate of dinitro deriv. from oxidation of atromentin, 400[3].

$C_{25}H_{14}O_3$ Δ[2,2′]-Biindan-1,3,1′-trione, 2′-benzal-, 911[7].

$C_{25}H_{16}Cl_2N$ 5-Acridyl, 1(and 3)-chloro-10-(chlorophenyl)-5,10-dihydro-5-phenyl-, 1992[3,4].

$C_{25}H_{16}Cl_3N$ Acridan, 1,5(and 3,5)-dichloro-10-(chlorophenyl)-5-phenyl-, 1992[3,4].

$C_{25}H_{18}O$ Indone, 2-phenyl-3-o-tolyl-, 1407[6].

$C_{25}H_{16}O_4$ Δ[2,2′]-Biindan-1,3,1′-trione, 2′-α-hydroxybenzyl-, 911[7].

$C_{25}H_{17}Br_3O$ Ether, 2,4,6-tribromophenyl triphenylmethyl, 1233[1]

$C_{25}H_{17}ClIN$ Acridan, 5-(p-chlorophenyl)-5-iodo-10-phenyl-, 1991[9]

$C_{25}H_{17}ClN$ 5-Acridyl, 3-chloro-5,10-dihydro-5,10-diphenyl-, 1992[2].
—, 5-(chlorophenyl)-5,10-dihydro-10-phenyl-, 1991[6], 1992[1]

$C_{25}H_{17}Cl_2N$ Acridan, chloro(chlorophenyl)phenyl-, 1991[9], 1992[1,3,4]
—, 2,5(and 3,5)-dichloro-5,10-diphenyl-, 1992[7].

$C_{25}H_{17}Cl_2NO$ 5-Acridanol, 1(and 3)-chloro-10-(chlorophenyl)-5-phenyl-, 1992[3]

$C_{25}H_{18}Br_4O_7S$ m-Cresolsulfonephthalein, tetrabromo-, diacetate, 3001[4]

$C_{25}H_{18}ClN$ Acridan, 2-chloro-5,10-diphenyl-, 1992[5].

$C_{25}H_{18}ClNO$ 5-Acridanol, 2(and 3)-chloro-5,10-diphenyl-, 1992[7]
—, 5-(chlorophenyl)-10-phenyl-, 1991[8,9], 1992[1].

$C_{25}H_{18}N_2O$ 3(5)-Acridone, amino-5,5-diphenyl-, 1801[7], 1802[2]

$C_{25}H_{18}N_4O_4$ Acridan, 1-amino-3,7-dinitro-5,5-diphenyl-, 1802[6].

$C_{25}H_{18}N_4O_{10}$ 4-Quinolineacrylic acid, 6-methoxy-2-phenyl-, picrate, 1413[8]

$C_{25}H_{18}O_6$ Chromone, 7,8-dihydroxy-2,3-diphenyl-, diacetate, 197[3]
Coumarin, dihydroxy-3,4-diphenyl-, diacetate, 595[4].

$C_{25}H_{19}NO_3$ Benzoin, 1-naphthalenecarbamate, 1232[9].

$C_{25}H_{19}NO_8S$ Sulfongallein, aniline salt, 2491[4].

$C_{25}H_{19}N_3$ Neuslamine, α-N-benzyl-4′-phenylazo-, 587[2].

$C_{25}H_{19}N_3O$ 3(5)-Acridone, diamino-5,5-diphenyl-, 1801[6], 1802[3].

$C_{25}H_{19}N_3O_4$ Acridan, 1,9-diamino-3,7-dinitro-5,5-diphenyl-, 1802[4].

$C_{25}H_{20}ClNO_2$ 4-(p-Acetamidophenyl)-2,6-diphenylpyrylium chloride, *ZnCl₂ compd.*, 758[6]

$C_{25}H_{20}N_2O_2S$ Carbanilide, p,p′-diphenoxythio-, 1603[8]

$C_{25}H_{20}N_2O_4$ 1,2,6-Isoxdiazine, 2-benzoyl-5-(2,5-cresyl)-3-methyl-, benzoate, 1412[8].

$C_{25}H_{20}N_4O$ 3(5)-Acridone, 1,7,9-triamino-5,5-diphenyl-, 1801[8].

$C_{25}H_{20}N_4O_8$ Quinoline, 6-methoxy-2-phenyl-4-propenyl-, picrate, 2681[7].

$C_{25}H_{20}N_4O_9$ Quinaldine, 4-methoxy-α-(o-methoxybenzal)-, picrate, 1626[3].

$C_{25}H_{20}N_4O_{11}$ Isoquinoline, 6,7-methylenedioxy-3-veratryl-, picrate, 1084[1].

$C_{25}H_{22}N_4O_{12}$ 3-Isoquinolinecarbinol, α-(3,4-dimethoxyphenyl)-6,7-methylenedioxy-, picrate, 1084[1].

$C_{25}H_{20}O$ Acetophenone, p-methyl-α-1-naphthyl-α-phenyl-, 410[6].

$C_{25}H_{20}OS$ Sulfoxide, phenyl triphenylmethyl, 2060[8].
$C_{25}H_{20}O_3$ 1-Acrylonaphthone, β-(4-ethoxy-1-naphthyl)-2 hydroxy-, 2159[2].
4,1 - β - Naphthopyrone, 3 (4-ethoxy-1-naphthyl) 2,3 dihydro-, 2159[1].
$C_{25}H_{21}ClO_3$ 2 - (p - Hydroxystyryl)-7 methoxy-3 - methyl - 1 - phenylbenzopyrylium chloride, 3454[9].
$C_{25}H_{21}ClO_7$ 2 - (p - Hydroxystyryl)-7-methoxy-3-methyl - 4 phenylbenzopyrylium perchlorate, 3154[9]
$C_{25}H_{21}NO_5$ 1,4 - Pyran - 4 - ol, . 4-(p acetamidophenyl) - 2,6 - diphenyl , and perchlorate, 758[2].
$C_{25}H_{21}N_3$ Biphenyl, p, p'' - methylazimino-bis (?), 2848[4]
$C_{25}H_{22}BrNO_4$ 4 - (p Aminophenyl)-2,6 di-p-anisylpyrylium bromide, 758[4].
$C_{25}H_{22}ClNO_3$ 4 (p - Aminophenyl)-2,6 di p anisylpyrylium chloride, - HCl, 758[3]
$C_{25}H_{22}N_2O_4$ 1,3 - Propanediol, di 1-naphthalenecarbamate, 1232[9]
$C_{25}H_{22}N_4$ Aniline, p, p' (p phenylazobenzal)-bis , 2836[7]
$C_{25}H_{22}N_4O$ Phenol, p [-(p, p'-diaminobenzohydryl)phenylazo] , 2836[7]
$C_{25}H_{22}N_4O_4$ 1,4 - Piperazinedicarboxanilide, 3 benzyl 2,5 diketo , 915[8]
$C_{25}H_{22}N_4O_8$ Quinoline, 1 methoxy 2 (methoxyphenethyl) , picrate, 1626[9]
$C_{25}H_{22}N_4O_8$ 1,3 Propanediol, 2 (6-methoxy-2 phenyl 4 quinolyl) picrate, 2681[1]
$C_{25}H_{22}N_4O_{12}$ Ketone, 3,4 dimethoxyphenyl 1,2,3,4 - tetrahydro - 6,7 - methylenedioxy 3 isoquinolyl, picrate, 1083[9].
$C_{25}H_{22}N_4S$ Carbanilide, p, p' bis(p-aminophenylthio-, 752[2], 1393[2].
$C_{25}H_{22}N_6O$ + H_2O 3:5 Acridone, 1,7,9 triamino 5,5-bis(aminophenyl)-, 1801[9]
$C_{25}H_{22}O$ 1 - Naphthaleneëthanol, α-methyl α, β diphenyl , 110[8]
$C_{25}H_{22}O_3$ Methane, (2,4 dimethoxyphenyl)-1-naphthylphenyl , 2849[8]
$C_{25}H_{22}O_7S$ m Cresolsulfonephthalein, diacetate, 3001[9].
$C_{25}H_{23}ClO_5$ Methyldiphenylpropylbenzopyrylium perchlorate, 3167[9].
$C_{25}H_{23}NO_2$ Methoxy deriv., m 164-6°, of mono Ac compd , 191[6], 192[1].
$C_{25}H_{23}NO_3$ Truxillamlic acid, Me ester, 1392[1]. N-methyl , 2664[7], β-Truxinamlic acid, N-methyl , 2665[1].
$C_{25}H_{23}NO_4S$ 1 - Methyl 2,4,6 - triphenylpyridinium methosulfate, 1084[9]
$C_{25}H_{23}NO_4S_2$ Quinaldine, 3 [o(and p) phenetyl sulfonyl] - α - p - tolylsulfonyl , 1625[8, 9].
$C_{25}H_{23}NO_6$ Hydroxylamine, β, β-bis(β-hydroxyethyl)-, tribenzoate, 361[2]
$C_{25}H_{24}IN$ α, α - Dibenzyl-1-methylquinaldinium iodide, 419[8].
$C_{25}H_{24}N_2$ Compd. from 4 ethyl-3,4-dihydro-3-methylene- 5,6 - benzoquinoline and p-dimethylaminobenzaldehyde, 419[5]
$C_{25}H_{25}BrN_2O_4$ 3 - Chromanone, 4-(3,4-dimethoxyphenyl) - 5,7 - dimethoxy-, p bromo phenylhydrazone, 2489[4].
$C_{25}H_{25}Cl_2NO$ Benzamide, N, N bis[m-(chloromethyl)phenethyl]-, 391[8].
$C_{25}H_{25}FO_5$ d-Glucosyl fluoride, 6-triphenylmethyl-, 1221[7].
$C_{25}H_{25}IN_2$ 5,6 - Benzoquinoline, 3 (p-dimethylaminostyryl)-, ethiodide, 419[6].
$C_{25}H_{25}N_3O_2$ Triazinedione, ethyldihydrophenylditolyl-, 3169[1].
$C_{25}H_{25}N_3O_3$ Benzamide, p-nitro-N-o-(1,2,3,4-tetrahydro - 2 - isoquinolylmethyl)phenethyl-, 418[2].
$C_{25}H_{26}N_2O$ Isoquinoline, 2-o-(salicylalaminoethyl)benzyl-, 418[2].
$C_{25}H_{26}N_2O_2$ Carbamic acid, tri-p-tolylmethylimino-, Et ester, 408[8].
Dye, acetate, from N, N, N', N' - tetramethyl - 9 - phenyl - 3,6 - fluorenediamine, 2837[1].
3 - Isofluorene, 3-(acetoxydihydrodimethylimino) - 6 - (dimethylamino) - 9 - phenyl , 2837[2].
$C_{25}H_{26}N_2O_3$ Nitrone, α-[β-(N-hydroxyanilino)-isobutyl] - α - methyl-N-phenyl-(?), benzoate, 2837[4].
2 - Pentanone, 4-(N-hydroxyanilino)-4-methyl-, cyclic N-phenyloxime (?), benzoate, 2837[4].
$C_{25}H_{26}N_2O_3S$ Quinine, 2-thenoyl-, and chloroplatinate, 2854[8].
$C_{25}H_{27}NO_4$ Δ[3] - Cyclohexenecarboxylic acid, 6 - (p - dimethylaminophenyl)-4-(o-hydroxystyryl)-2-keto-, Et ester, 173[1].
$C_{25}H_{27}N_3O_3$ Holocaine, N-phenylcarbamyl-, 1218[5]
Nitrone, α [β - (N-hydroxyanilino)isobutyl]-α-methyl - N - phenyl-(?), PhNCS condensation product, 2837[7].
2-Pentanone, 4 - (N-hydroxyanilino)-4-methyl-, cyclic N-phenyloxime (?), PhNCS condensation product, 2837[7].
$C_{25}H_{28}N_2O_2$ Carbazic acid, β-tri-p-tolylmethyl-, Et ester, 408[8].
$C_{25}H_{28}O_3$ Thebaine deriv., 766[1].
$C_{25}H_{29}AsN_4O_5$ Hydrocupreine, 5'-p-arsonophenylazo , 1467[3]
$C_{25}H_{29}NO_3$ ε - Truxillpiperididic acid, Et ester, 1391[6].
$C_{25}H_{29}NO_5$ Ecgonine, benzyl ester, tropate, P 2228[4]
$C_{25}H_{30}$ Pentacyclopentadiene, 2148[6].
$C_{25}H_{30}ClN_3$ See Crystal violet.
$C_{25}H_{30}N_2O_7S$ + $3H_2O$ Butyric acid, β-sulfo-, acid strychnine salt, 2482[4].
$C_{25}H_{30}N_4O_8$ 2,7 - Fluorenedibicarbamic acid, tetra-Et ester, 410[6].
$C_{25}H_{30}N_4O_{12}$ 5-Desoxymorphinic acid, dihydro-, Et ester, picrate, 2165[7].
$C_{25}H_{30}N_{14}O_{10}$ Guanidine, α-methyl-α, α'-ethylenebis , dipicrolonate, 3159[1].
Vitiatine, dipicrolonate, 3159[1].
$C_{25}H_{30}O_{11}S_2$ Glucose, 3-acetyl-5,6 di-p-toluenesulfonylmonoacetone-, 2985[5].
$C_{25}H_{31}Cl_{14}N_{12}O_6Sn_4$, 156[8].
$C_{25}H_{32}O_4$ Malonic acid, bis(γ-phenylpropyl)-, di-Et ester, 911[1].
$C_{25}H_{33}NO_3$ Norcodeine, N-(cycloheptylmethyl)-, 3012[7].
$C_{25}H_{33}NO_{10}$ Oxonitine, 765[4]
$C_{25}H_{35}NO_{16}$ Glucoarabononitrile, heptaacetyl-, 2988[5].
$C_{25}H_{34}N_2O_4$ α-Toluic acid, N, N'-heptamethylenebis[α - amino , di-Me ester, 371[2].
$C_{25}H_{34}O_{17}$ d-Gluco-d arabinose, heptaacetyl-, 2988[4].
$C_{25}H_{38}O_4$ Dehydrohyodesoxycholic acid, Me ester, 2166[5].
$C_{25}H_{38}O_5$ Dianhydrostrophanthidin, octahydro-, acetate, 208[6].

$C_{25}H_{40}AsI$ Benzyltricyclohexylarsonium iodide, 2839[6].
$C_{25}H_{40}Br_2IN$ Quinoline, complex salt with $C_{16}H_{33}I.Br_2$, 3695[9].
$C_{25}H_{40}HgI_3N$ Quinoline, complex salt with $C_{16}H_{33}I$ and HgI_2, 3695[8].
$C_{25}H_{40}IN$ Quinoline, complex salt with $C_{16}H_{33}I$, 3695[7].
$C_{25}H_{40}I_3N$ Quinoline, complex salt with $C_{16}H_{33}I.I_2$, 3695[8]
$C_{25}H_{40}O_2$ Pyrostadenic acid, Et ester, 2166[8].
$C_{25}H_{40}O_5$ Dimethyl ester, m. 99°, of acid from 13-hydroxylithobilianic acid, 2167[1].
$(C_{25}H_{42})_x$ Hydropolycyclo-rubber, 3589[3].
$C_{25}H_{42}O_3$ Isolithocholic acid, Me ester, 916[4]
$C_{25}H_{42}O_4$ Allocholanic acid, 3,13-dihydroxy-, Me ester, 2166[4].
$C_{25}H_{52}$ Tachardiacerin, 2390[7].
$C_{25}H_{52}O$ Tachardiacerol, 2390[6]
$C_{25}H_{80}Cu_3N_{21}O_6$, 3401[2].
$C_{26}H_{14}Br_2S_4$ Spiro[1,3-benzodisulfole-2,9'-(10')-phenanthrene-10',2''-1,3-benzodisulfole] 5(or 6),5''(or 6'') dibromo-, 1797[9].
$C_{26}H_{14}N_4O$ o-Diphenoylene 2,3 phenazino iminazole, 1805[6].
$C_{26}H_{16}$ $\Delta^{9,9'}$-Bifluorene, 2455[4].
$C_{26}H_{16}Cl_4OS_2$ Acetophenone, α,α bis(2,5-dichlorophenylmercapto)-α-phenyl-, 3289[6].
$C_{26}H_{16}N_8O_9$ Stilbene, α (2,4 dinitrophenylazo)-α' (2,4 dinitrophenylazoxy) (?), 2849[3].
$C_{26}H_{16}O_4$ Spiro[indan-2,2'(3')-naphthalene-3',2''-indan]-1,3,1'',3''-tetrone, 1',4'-dihydro-, 185[8].
$C_{26}H_{17}ClN_4O_4$ m-Phenylenediamine, 5-chloro-N,N'-di-2-naphthyl 2,4-dinitro-, 1222[7].
$C_{26}H_{17}Cl_2N$ 9-Anthramine, 1,5 dichloro N,10 diphenyl-, 2678[9].
$C_{26}H_{18}$ Anthracene, 9,10 diphenyl-, 3003[6]
$C_{26}H_{18}As_2N_2O_{10}Sb_2$ p-Arsenophenol, 3,3' bis(2,3,4-trihydroxybenzalamino)-di antimonyl deriv., 1987[4].
$C_{26}H_{18}BrNO_4S_2$ Quinaldine, 3-(p bromophenylsulfonyl)-α-(2 naphthylsulfonyl)-, 1626[1].
$C_{26}H_{18}Br_2N_2O_2$ o,m' Bianiline, 5,6'-dibromo-N,N'-disalicylal-, 1614[8]
$C_{26}H_{18}Br_4$ Anthracene, 1,2,3,4 tetrabromo-1,2,3,4-tetrahydro 9,10-diphenyl-, 3003[8].
$C_{26}H_{18}Br_4O_2$ Benzopinacol, 4,4',4'',4'''-tetrabromo-, 1736[7].
$C_{26}H_{18}Cl_2N_2$ 9,10-Anthradiamine, 1,5 dichloro-N,N'-diphenyl-, 755[4].
$C_{26}H_{18}Cl_4O_4$ Phthalide, 3,4,5,6-tetrachloro 2-(2,3-cresyl)-2-(4,3-cresyl)-, diacetate, 1231[8].
$C_{26}H_{18}CuO_4$ 1-Acrylonaphthone, β-hydroxy-, Cu deriv., 1590[8].
$C_{26}H_{18}MgO_6$ Xanthone, 1 hydroxy-, Mg deriv., 399[8].
$C_{26}H_{18}N_2O_2$ 1,10-Anthracenedione, 4,9-dianilino-, 2853[7]
$C_{26}H_{18}N_4$ αγ-Dibenzophenazine, 11 amino-12 anilino-, 590[8].
$C_{26}H_{18}N_4O_7$ Benzoquinoline, methylphenyl-, picrate, 418[8].
$C_{26}H_{18}OS_4$ 1,3-Benzodisulfole, 2,2'-oxybis[2-phenyl-, 3290[1]
$C_{26}H_{18}O_2$ 3,3'-Spirobi[4,3-β-naphthopyran], 2-methyl-, 3008[4].
$C_{26}H_{18}O_3$ 9(10)-Phenanthrone, 10,10-bis(p-hydroxyphenyl)-, 412[6].
—, 10,10-diphenoxy-, 412[3].
$C_{26}H_{18}O_4$ 1,9-Benzodi-1,4-pyran-4,6-dione, 3,7-dimethyl-2,8-diphenyl-, 1624[9].
$C_{26}H_{18}O_6$ Muconic acid, β,γ-dihydroxy-α,δ-diphenyl-, γ-lactone, Me ester, benzoate, 2849[7].
$C_{26}H_{19}BrN_2O$ Benzamide, p-bromo-N-triphenylmethylimino-, 408[6].
$C_{26}H_{19}ClN_2$ Quinoline red, 2329[4].
$C_{26}H_{19}ClN_4$ Flavinduline, 11,12-diamino-, chloride, 590[9].
$C_{26}H_{19}ClN_4O_4$ Flavinduline, 11,12 diamino-, perchlorate, 590[9].
$C_{26}H_{19}ClO_6$ 3-[(2-hydroxy-1-naphthyl)-vinyl]-2-methyl-β-naphthopyrylium perchlorate, 3008[4].
$C_{26}H_{19}NO_3$ Benzanilide, p' (p-hydroxyphenyl)-, benzoate, 1073[5]
$C_{26}H_{19}N_3O$ 5,6 Benzoquinoxaline, 6 acetamido 2,3 diphenyl-, 602[8].
$C_{26}H_{19}N_3O_3$ Benzidine, N-p nitrobenzal-N' salicylal-, 1614[9]
$C_{26}H_{19}N_5O_3$ Flavinduline, 11,12-diamino-, nitrate, 590[9]
$C_{26}H_{20}As_2Cl_4N_2$ Phenarsazine, 1-chloro 1,6 dihydro-, s tetrachloroethane addn. compd., 1608[8].
$C_{26}H_{20}As_2N_2O_8$ p Arsenophenol, 3,3'-bis(2,3,4 trihydroxybenzalamino)-, 1987[2]
$C_{26}H_{20}BrN$ 1-(10-Benzyl-9 anthryl)pyridinium bromide, 3452[9].
$C_{26}H_{20}Br_4N_6$ Hydrazine, s-dibenzoyl-, bis(2,4 dibromophenylhydrazone), 1085[4].
$C_{26}N_{20}Br_4N_4S_2$ Benzothiazole, 1-anilino-, tribromide, 195[1]
$C_{26}H_{20}Br_8N_4S$ 1,2,4-Thiodiazole, tetrahydro 2,4 diphenyl-3,5-bis(phenylimino)-, octabromide, 1806[7].
$C_{26}H_{20}ClNO$ Acridan, 5-(p chlorophenyl)-5-methoxy 10 phenyl-, 1991[9]
$C_{26}H_{20}Cl_2N_2$ 9,10-Anthradiamine, dichloro 9,10 dihydro N,N'-diphenyl-, 754[5], 3166[8]
$C_{26}H_{20}CuN_2O_2$ o Cresol, α-(phenylimino)-, Cu deriv., 399[8].
$C_{26}H_{20}I_6N_4S$ 1,2,4 Thiodiazole, tetrahydro 2,4 diphenyl 3,5 bis(phenylimino)-, hexaiodide, 1806[7].
$C_{26}H_{20}N_2O$ Benzamide, N triphenylmethylimino-, 408[6].
$C_{26}H_{20}N_2O_2$ m,m'-Bianiline, N,N'-disalicylal-, 1614[8].
$C_{26}H_{20}N_2O_3$ Benzanilide, oxybis-, 392[3,4].
$C_{26}H_{20}N_8O_{12}$ Toluene, 2,4,6-trinitro-, addn. compd with Ph_2N_2, 1062[8].
$C_{26}H_{20}O_6$ Chrysin, 3-benzyl-, diacetate, 197[1].
Flavone, 3 benzyl-7,8-dihydroxy-, diacetate, 197[3]
$C_{26}H_{20}O_8$ 1,1,2-Ethanetriol, 1,2-bis(2,4-dihydroxyphenyl)-2-phenyl-, anhydride, triacetate, 2324[7].
$C_{26}H_{21}BrN_2O$ Benzoic acid, p-bromo-, triphenylmethylhydrazide, 408[6].
$C_{26}H_{21}Cl$ Methane, chlorodiphenyl(p-tolylphenyl)-, 1988[9].
$C_{26}H_{21}ClN_4$ 6,7-Diamino-1,2,3-triphenyl quinoxalinium chloride, 591[1]
$C_{26}H_{21}ClN_4O_4$ 6,7-Diamino-1,2,3-triphenylquinoxalinium perchlorate, 591[1].
$C_{26}H_{23}ClN_4O_6$ 5-Acetamido-12-(m-acetamidophenyl)-12-α-benzophenazonium perchlorate, 602[8].

$C_{26}H_{21}NO_3S$ Quinoline, 3-(anisylsulfonyl)-2-(γ-benzalpropenyl)-, 419[2,3].
$C_{26}H_{21}N_3O$ Xenylamine, N-anisal-4'-phenylazo-, 587[2].
$C_{26}H_{22}$ Methane, diphenyl(p-tolylphenyl)-, 1988[2].
$C_{26}H_{22}As_2N_4O_4$ Benzanilide, arsenobis[3-aminohydroxy-, 394[9], 2318[6].
$C_{26}H_{22}As_2N_4O_6$ Benzanilide, arsenobis[3-aminodihydroxy-, 2318[6,7].
$C_{26}H_{22}Br_2N_2$ 9,10-Anthrylenedimethylenebispyridinium bromide, 3004[1].
$C_{26}H_{22}ClNO_4$ Propionic acid, (chlorobenzoyl)hydroxyphenyl-, methyl ester, oxime, acetate benzoate, 3168[6].
$C_{26}H_{22}ClNO_7$ 4-(p-Acetamidophenyl)-2-p-anisyl-6-phenylpyrylium perchlorate, 758[4].
$C_{26}H_{22}Cl_2N_4O_2$ Di Meldola's blue, 2837[1].
$C_{26}H_{22}CuN_4S_2$ Formic acid, phenylazothiol phenylhydrazone, Cu deriv., 1223[9].
$C_{26}H_{22}N_2O$ Benzoic acid, triphenylmethylhydrazide, 408[3].
$C_{26}H_{22}N_4$ Phenazine, 2-(p-dimethylaminophenylazo)-5,7-dihydro-7-imino-5-phenyl-, 2836[5].
Safranine-2-azodimethylaniline, 2836[7].
$C_{26}H_{22}N_4PbS_2$ Formic acid, phenylazothiol, phenylhydrazone, Pb deriv., 1223[9].
$C_{26}H_{22}O$ Carbinol, diphenyl(p-tolylphenyl)-, 1988[2].
Compd., b₁₂ 275°, m. 58-9°, from 2-benzyl-1-(1-naphthyl)-3-phenyl-1,2-propanediol, 2852[1].
$C_{26}H_{22}O_2$ Benzopinacol, 2999[9], 3000[1].
$C_{26}H_{22}O_4$ Addn. compd., m. 106°, of di-Ph oxalate and PhOH, 47[2].
$C_{26}H_{23}ClO_3$ 7-Methoxy-2-(p-methoxystyryl)-3-methyl-4-phenylbenzopyrylium chloride, and $FeCl_3$ compd., 3454[9].
$C_{26}H_{23}ClO_4$ 4-p-Anisyl-2-(p-hydroxystyryl)-7-methoxy-3-methylbenzopyrylium chloride, and $FeCl_3$ compd., 3455[1].
2-(4-Hydroxy-3-methoxystyryl)-7-methoxy-3-methyl-4-phenylbenzopyrylium chloride, and $FeCl_3$ compd., 3454[9].
$C_{26}H_{23}NO$ Isobutyramide, N-1(and 2)-naphthyl-β,β'-diphenyl-, 3452[1].
$C_{26}H_{23}NO_3$ 3-Piperidinecarbinol, α-1,4-trimethyl-, benzoate, -HCl, 1809[6].
$C_{26}H_{23}NO_4$ Di Ac compd., m. 155-7°, 191[4], 192[1].
$C_{26}H_{23}NO_6$ Isoquinoline, 2-benzoyl-1,2,3,4-tetrahydro-6,7-methylenedioxy-3-veratroyl-, 1083[9].
$C_{26}H_{23}N_7$ Aniline, N,N-dimethyl-p-[p-(p-phenylazophenylazo)phenylazo]-, 2836[8].
$C_{26}H_{24}B_2N_2O_{14}$ Anthrarufin, 4,8-diacetamido-, diboroacetate, 1052[6].
$C_{26}H_{24}Cl_6N_8Pt$ Bis(4-amino-1,2-diphenyl-1,2,3,5-tetrazolium) chloroplatinate, 1224[1].
$C_{26}H_{24}Cr_2N_8O_7$ Bis(4-amino-1,2-diphenyl-1,2,3,5-tetrazolium) dichromate, and di-HCl, 1224[1].
$C_{26}H_{24}N_2O_2$ 2-Propionaphthone, 1-hydroxy, azine, 1617[9].
$C_{26}H_{24}N_2O_4$ Compd. from 3-acetyl-2,6-dimethylchromone dioxime, m. 184-4.5°, 1411[9].
Dianhydro-6-aminopiperonaldihydrohydroxycodeinone, 765[9].
$C_{26}H_{24}N_2O_8S_2$ 1-Naphthol-4-sulfonic acid, 2-propionyl-, azine, 1617[9].
$C_{26}H_{24}N_4$ 1,2-Cyclopentanedione, 3-methyl-, bis(2-naphthylhydrazone), 2484[6].
$C_{26}H_{24}N_4O_2$ Aniline salt, m. 173°, of compd. from $ClCH_2CO_2H$ and KCN, 2996[4].
$C_{26}H_{24}N_4O_{11}$ Dicentrine, picrate, 206[2].
Paraberine, 7,12,12₁,13-tetrahydro-2,3-dimethoxy-9,10-methylenedioxy-, picrate, 1084[3].
$C_{26}H_{24}O_2$ 1,2-Propanediol, 2-benzyl-1-(1-naphthyl)-3-phenyl-, 2851[9].
$C_{26}H_{25}NO_2$ Ethoxy deriv., m. 125-7°, of mono-Ac compd., 191[4], 192[1].
$C_{26}H_{25}N_5O_{11}$ Isoquinoline, 1,2,3,4-tetrahydro-2-methyl-6,7-methylenedioxy-1-(6-nitroveratryl)-, picrate, 206[2].
$C_{26}H_{26}As_2N_4O_4S_2$ Toluenesulfonanilide, arsenobis[amino-, 2838[7], 3746[9].
$C_{26}H_{26}CuO_8$ Benzoic acid, m-(β-acetyl-γ-hydroxy-Δ²-butenyl)-, Cu deriv., and Cu salt, 2843[3].
$C_{26}H_{26}FeN_4O_{10}$ Pyruvic acid, (methylphenylcarbamyl)nitroso-, Et ester, Fe salt, 2823[2].
$C_{26}H_{26}IN$ α,α-Dibenzyl-1-ethylquinaldinium iodide, 119[6].
$C_{26}H_{26}N_2O_6S_2$ Proline, 1-(N-phenylsulfonyltyrosyl)-, benzenesulfonate, 3169[9].
$C_{26}H_{26}N_4O_{11}$ Isoquinoline, 1,2,3,4-tetrahydro-2-methyl-6,7-methylenedioxy-1-veratryl-, picrate, 206[1].
$C_{26}H_{26}O_2$ Benzopyran, isopropylmethoxymethyldiphenyl-, 3167[9].
$C_{26}H_{26}O_6$ Xylene, diveratroyl-, 386[1,2].
$C_{26}H_{27}IN_2$ Carbocyanine, 1,1'-diethyl-6-methyl-, iodide, 419[7].
$C_{26}H_{28}N_2O_3$ Niquine, benzoate, and HCl, 1993[9].
$C_{26}H_{28}N_4O_{13}$ Ozocodeine, dihydro-, acetate, picrate, 2165[5].
$C_{26}H_{29}BrN_4O$ 1 Propanone, 3-(3-ethylidene-4-piperidyl)-1-(6-methoxy-4-quinolyl)-, p-bromophenylhydrazone, 1993[8].
$C_{26}H_{29}NO_4$ Δ³-Cyclohexenecarboxylic acid, 6-o-anisyl-4-(p-dimethylaminostyryl)-2-keto-, Et ester, 173[2].
—, 6-(p-dimethylaminophenyl)-2-keto-4-(o-methoxystyryl)-, Et ester, 173[2].
$C_{26}H_{29}NO_5$ Δ³-Cyclohexenecarboxylic acid, 6-(p-dimethylaminophenyl)-4-[2-hydroxy-3(and 5)-methoxystyryl]-2-keto-, Et ester, 173[3,4].
$C_{26}H_{29}N_3O_3$ Propionamidine, N,N'-di-p-phenetyl-N-phenylcarbamyl-, 1218[6].
$C_{26}H_{29}N_3O_7$ Succinic acid, α-[p-acetamidophenyl)phenylazo]-α,β-diacetyl-, di-Et ester, 599[2].
$C_{26}H_{30}CuO_4$ 2,4-Hexanedione, 3-benzyl-, Cu deriv., 413[1].
$C_{26}H_{30}N_2O_7$ Pyruvic acid, brucine salt, 3059[3].
$C_{26}H_{30}N_4O_8$ Dibenzylamine, m,m'-bis(ethoxymethyl)-, picrate, 391[8].
$C_{26}H_{31}AsN_4O_6$ Hydrocupreine, 8'-p-arsonophenylazo-5'-hydroxy-, 6'-methyl ether, 1467[2].
$C_{26}H_{31}N_3O_5$ + $3H_2O$ Brucinonic acid, Et ester, semicarbazone, 1811[1].
$C_{26}H_{32}HgI_4N_2$ Quinoline, complex salt with C_4HgI and HgI_2, 3695[9].
$C_{26}H_{33}N_3O_9$ o-Acetaniside, 4-[β-hydroxy-4,5-dimethoxy-2-(β-N-methylacetamidoethyl)phenethyl]-3-nitro-(?), acetate, 3458[2].
$C_{26}H_{35}ClO_{17}$ Celtrobiose, chloro-, heptaacetate, 2484[1].
Neolactose, α-chloro-, heptaacetate, 2484[1].

$C_{26}H_{36}O_2$ Truxilldiol, tetraethyl-, 1391[7].
$C_{26}H_{38}O_4$ Diketone, m. 228°, from crude digitogenin, 605[4].
Lupulone, 744[5].
$C_{26}H_{38}O_7$ Bigitaligenin, diacetyl deriv., 2724[5].
$C_{26}H_{38}O_8$ Acid from an acid from the prepn. of digitogenic acid, m. 273–4°, 1414[5].
$C_{26}H_{38}O_{17}Se$ Selenoxide, 6,6-di(methylglucosyl), hexaacetate, 379[8].
$C_{26}H_{38}O_{18}S$ Sulfone, 6,6-di(methylglucosyl), hexaacetate, 379[8].
$C_{26}H_{40}O_3$ Monoketone, m. 204–5°, from crude digitogenin, 605[4].
$C_{26}H_{40}O_6$ Dimethyl ester, m. 148°, of acid from 13-ketostadenic acid, 2166[7].
$C_{26}H_{42}O_{11}$ Cellobioside, β-benzylheptamethyl-, 380[6].
$C_{26}H_{43}NO_6$ Glycocholic acid, *Na salt*, 1452[5], 1741[9].
$C_{26}H_{44}Cu_2N_8O_8$, 2466[2]
$C_{26}H_{44}O_3$ Isolithocholic acid, Et ester, 916[4].
$C_{26}H_{45}NO_7S$ Taurocholic acid, *Na salt*, 1452[5].
$C_{26}H_{48}Br_2N_4NiO_8S_2$ Triaminotriethylamine-nickelous *d*-bromocamphorsulfonate, 1589[4].
$C_{26}H_{52}O_2$ Acid from montan wax, *Tl salt*, 2818[2]
Cerotic acid, *Tl salt*, 2818[2].
Hexacosanoic acid, 1590[9], 3582[9].
Stearic acid, octyl ester, 2818[9].
Tachardiaceric acid, 2390[7].
$C_{27}H_{12}Cl_4O_6$ Fluoran, 12,13,14,15-tetrachloro-3-hydroxy-, benzoate, 3001[4]
$C_{27}H_{12}Cl_4O_7$ Fluoran, 12,13,14,15-tetrachloro-3,4-dihydroxy-, monobenzoate, 3001[7]
$C_{27}H_{12}O_3$ Truxone, 911[8]
$C_{27}H_{15}BiI_3N_3O_{12}S$ 5-Quinolinesulfonic acid, 8-hydroxy-7-iodo-, bismuth deriv., *Na salt*, 796[4]
$C_{27}H_{17}ClO_2$ 9-Fluorenecarboxylic acid, 9-chloro-, 9-fluoryl ester, 2675[8]
$C_{27}H_{18}N_2O$ 9(10)-Cyclopentabenzoquinoxalinone, 8,10-diphenyl-, 207[7]
$C_{27}H_{18}N_2O_4S$ 5-Cyclopentabenzoquinoxalinesulfonic acid, 9,10-dihydro-9-keto-8,10-diphenyl-, 207[7]
$C_{27}H_{18}N_2O_5S$ 3-Cyclopentabenzoquinoxalinesulfonic acid, 9,10-dihydro-1-hydroxy-9-keto-8,10-diphenyl-, 207[7]
$C_{27}H_{18}O$ Ketone, phenyl 10-phenyl-9-anthryl, 3453[2].
$C_{27}H_{18}O_2$ 2(1)-Naphthalenone, 1,1'-benzenylbis-, 1803[5]
—, 1-(1,2-dihydro-2-keto-α-phenyl-1-naphthal)-, 2877[4].
$C_{27}H_{19}ClO$ Triphenylbenzopyrylium chloride, *FeCl₃ compd. and HCl compd.*, 3167[3,4]
$C_{27}H_{19}ClO_5$ Triphenylbenzopyrylium perchlorate, 3167[3]
$C_{27}H_{19}Cl_3O_2S_2$ Acetophenone, α-(5-chloro-anisylmercapto)-α-(2,5-dichlorophenyl)-α-phenyl-, 3289[6]
$C_{27}H_{19}NO_2$ 2(1)-Naphthalenone, 1-(1,2-dihydro-2-keto-α-phenyl-1-naphthal)-, oxime, 2877[4]
$C_{27}H_{20}N_2$ 2,7-Fluorenediamine, N,N'-dibenzal-, 410[7].
$C_{27}H_{20}N_2O$ Compd., m. 184°, from 1,1'-benzenylbis-2(1)-naphthalenone and $N_2H_4 \cdot H_2O$, 1803[6]
$C_{27}H_{20}N_2O_2$ 3(5)-Acridone, acetamido-5,5-diphenyl-, 1801[7]
2,7-Fluorenediamine, N,N'-dibenzoyl-, 410[7].
$C_{27}H_{20}N_4O_3$ Semicarbazide, 1,2-dibenzoyl-1-phenyl-4-phenylimino-, 1223[9].
$C_{27}H_{20}O$ Ketone, 9,10-dihydro-10-phenyl-9-anthryl phenyl, 3453[2].
Benzopyran, triphenyl-, 3167[2].
$C_{27}H_{20}O_2$ Benzopyranol, triphenyl-, 3167[3].
2-Naphthol, 1,1'-benzalbis-, 1803[5].
$C_{27}H_{20}O_6$ Muconic acid, β,γ-dihydroxy-α,δ-diphenyl-, γ-lactone, Me ester, α-toluate, 2849[7].
$C_{27}H_{20}O_{12}S$ Sulfonegallein, tetraacetate, 2491[4].
$C_{27}H_{21}NO_3$ Toluhydroxamic acid, α,α-diphenyl-, benzoate, *and salts*, 591[6,7].
$C_{27}H_{21}N_5O_9$ 1-[β-(1,3-Dihydro-1-hydroxy-3-keto-1-phenyl-2-isoindyl)ethyl]pyridinium picrate, 1408[2].
$C_{27}H_{22}ClNO$ Acridan, 5-(p-chlorophenyl)-5-ethoxy-10-phenyl-, 1991[9].
$C_{27}H_{22}N_2O$ p-Toluamide, N-triphenylmethylimino-, 408[6].
$C_{27}H_{22}N_2O_2$ 9-Fluorenecarbamic acid, 9-fluorylamine salt, 2670[1]
$C_{27}H_{22}N_4S$ Benzophenone, thiocarbohydrazone, 1811[1]
$C_{27}H_{22}O$ 2-Propanone, 1,1,3,3-tetraphenyl-, 3000[5]
$C_{27}H_{22}O_2$ Chromanol, triphenyl-, 3167[3].
$C_{27}H_{23}FO_8$ Glucosyl fluoride, 2,3,5-tribenzoyl-, 1221[6]
$C_{27}H_{24}As_2Cl_2N_2O$ Phenarsazine, 1-chloro-1,6-dihydro-, acetone addn. compd., 1606[6]
$C_{27}H_{24}As_2N_4O_{11}$ Carbanilide, m,m'-bis(5-arsono-2-hydroxyphenylcarbamyl)-, 970[5].
$C_{27}H_{24}ClNO_8$ 4-(p-Acetamidophenyl)-2,6-di-p-anisylpyrylium perchlorate, 758[6]
$C_{27}H_{24}N_2O$ p-Toluic acid, triphenylmethylhydrazide, 408[6].
$C_{27}H_{24}N_8O_{14}$ Ethylenediamine, N-benzyl-N'-phenyl-, dipicrate, 1624[7]
$C_{27}H_{24}O$ Ether, diphenyl(p-tolylphenyl)methyl methyl, 1988[4]
1,2-Propanediol, 1,1,3,3-tetraphenyl-, 3000[5].
$C_{27}H_{24}O_3S_3$ Phloroglucinol, 2,4,6-tris(p-tolylmercapto)-, 3289[6]
$C_{27}H_{24}O_6$ 1,2,3-Cyclohexanetriol, tribenzoate, 1061[3]
$C_{27}H_{25}ClO_4$ 4-p-Anisyl-7-methoxy-2-(p-methoxystyryl)-3-methylbenzopyrylium chloride, *and FeCl₃ compd.*, 3455[1].
$C_{27}H_{25}Cl_4FeO_4$ 4-p-Anisyl-7-methoxy-2-(p-methoxystyryl)-3-methylbenzopyrylium chloride, FeCl₃ compd., 3455[1].
$C_{27}H_{26}AsClN_2O_2$ Compd. from dehydroquinine and AsCl₃, 1630[6].
$C_{27}H_{26}ClNO_2$ 2-(p-Dimethylaminostyryl)-7-methoxy-3-methyl-4-phenylbenzopyrylium chloride, *and FeCl₃ compd.*, 3454[6].
$C_{27}H_{26}ClNO_6$ 2-(p-Dimethylaminostyryl)-7-methoxy-3-methyl-4-phenylbenzopyrylium perchlorate, *and perchlorate*, 3454[5].
$C_{27}H_{26}Cl_4FeNO_2$ 2-(p-Dimethylaminostyryl)-7-methoxy-3-methyl-4-phenylbenzopyrylium chloride, FeCl₃ compd., 3454[6].
$C_{27}H_{27}NO_2$ Dibenzamide, N-(2-benzylcyclohexyl)-, 2665[7].
$C_{27}H_{28}N_6$ Aniline, p,p'-[p-(p-dimethylaminophenylazo)benzal]bis-, 2836[1].
$C_{27}H_{28}AsCl_4N_2O_2$ Compd. from dehydroquinine and AsCl₃, 1629[9].

$C_{27}H_{24}N_4O_{10}$ Norcodeine, N-(cyclopropylmethyl)-, picrate, 3012[7].
$C_{27}H_{28}Na_2O_5S$ Thymolsulfonephthalein, di-Na deriv., 1615[4].
$C_{27}H_{28}O_4S_2$ Benzaldehyde, bis(γ-hydroxypropyl) mercaptal, dibenzoate, 737[4].
$C_{27}H_{29}NaO_5S$ Thymolsulfonephthalein, Na deriv., 1615[4].
$C_{27}H_{30}N_2O_5$ Quinine salicylate, 1030[2].
$C_{27}H_{30}N_4O_6$ Compd. from the hydrazide, phenylhydrazone of brucinonic acid, m. 260°, 1811[4].
$C_{27}H_{30}N_6O_2$ Compd., decomps. 167-9°, from methyl 2,4-dimethyl-3-pyrryl ketone, pyridine, and BrCN, 1621[3].
$C_{27}H_{30}O_5S$ Benzoic acid, o-sulfo-, dithymyl ester, 1615[2].
Thymolsulfonephthalein, 1615[2].
$C_{27}H_{30}O_{15}$ Apiin, 1991.
$C_{27}H_{30}O_{16}$ + $2H_2O$ Rutin, 1991.
$C_{27}H_{31}ClN_2O_9$ Malic acid, β-chloro-, brucine salt, 366[6].
$C_{27}H_{31}NO_4$ Benzoic acid, 2-o-anisyl-4-(p-dimethylaminostyryl)-2,3-dihydro-6-methoxy-, Et ester, 173[2].
$C_{27}H_{31}N_3O_3$ Butyramidine, N,N'-di-p-phenetyl-N'-phenylcarbamyl-, 1218[6].
$C_{27}H_{32}AsNO_3S$ Benzoic acid, p-(ethylmethylarsyl)-, As-sulfide, morphine salt, 363[9].
$C_{27}H_{32}N_2O_3$ Δ^3-Cyclohexenecarboxylic acid, 6-(p-dimethylaminophenyl)-4-(p-dimethylaminostyryl)-2-keto-, Et ester, 173[3].
$C_{27}H_{32}Br_4Cl_4N_4O_6Sn_2$, 156[8]
$C_{27}H_{33}NO_5S$ Thymolsulfonephthalein, NH_4 deriv., 1615[4]
$C_{27}H_{33}NO_6S$ Morphimethine, α-methyl-, Me p-toluenesulfonate addn. compd., 1797[6].
$C_{27}H_{34}BrN_3O_6$ 3-Pyrrolecarboxylic acid, 5,5'-(3-bromo-5-carboxy-4-methyl-2-pyrrylmethylene)bis[2,4-dimethyl-, tri-Et ester, 2160[5]
$C_{27}H_{34}N_2O_8S$ + $4H_2O$ Butyric acid, β-sulfo-, acid brucine salt, 2482[4]
$C_{27}H_{34}HgI_2N_2$ Quinoline, complex salt with PrI and HgI_2, 3695[8]
$C_{27}H_{36}O_4$ Compd., m. 208°, from α-scymnol, 401[9].
$C_{27}H_{38}O_4$ Methyl ester of acid from the prepn. of digitogenic acid, m. 201°, 1411
$C_{27}H_{40}N_4O_7$ See 1 a.ine
$C_{27}H_{40}N_4O_{10}$ Talose, ?,?'-methylenebis[α-methyl-α-phenylhydrazone], 904[9]
$C_{27}H_{41}NO_8$ Stadenic acid, 13-ketonitro-, tri-Me ester, 2166[8]
$C_{27}H_{42}Cl_2N_2O_2$ See 1 a.ine.
$C_{27}H_{42}O_6$ Lithobilienic acid, tri-Me ester, 2166[9].
$C_{27}H_{42}O_7$ Allolithobilianic acid, keto-, tri-Me ester, 2167[1].
Lithobilianic acid, keto-, tri-Me ester, 2167[1]
Stadenic acid, 13-keto-, tri-Me ester, 2166[8]
$C_{27}H_{43}IO_4$ Dicarboxylic acid from iodocholesterol, 3299[6].
$C_{27}H_{44}O_6$ Allolithobilianic acid, tri-Me ester, 2166[6].
Isolithobilianic acid, tri-Me ester, 2166[7].
$C_{27}H_{44}O_7$ Lithobilianic acid, 13-hydroxy-, tri-Me ester, 2166[8].
$C_{27}H_{44}O_8$ Acid, m. 120°, from chloromercuricholesterol, 3299[8].
$C_{27}H_{45}ClHgO$ Cholesterol, (chloromercuri)-, 3299[6].
$C_{27}H_{45}IO$ Cholesterol, iodo-, 3299[6].
$C_{27}H_{46}O$ (See also Cholesterol.)
Compd., m. 133-4°, from cholesterol, 1242[3].
Sterol, 3099[9], 3100[2,3].
$C_{27}H_{46}O_6$ Tetrahydroxymonocarboxylic acid, m. 172-3°, from chloromercuricholesterol, 3299[7].
$C_{27}H_{46}O_{23}$ Hexopentosan, 3310[6].
$C_{27}H_{48}O$ Coprosterol, 2167[1].
$C_{27}H_{48}O_6$ α-Scymnol, 401[8].
$C_{27}H_{48}O_9$ Caprylic acid, η-formyl-, trimer, 1590[2].
$C_{27}H_{50}O_6$ Palmitin, β-mono-, α,γ-dibutyryl-, 2818[7].
$C_{27}H_{54}O_2$ Acid, Tl salt, m. 146°, 2818[2].
Cerotic acid, 220[7]
$C_{27}H_{56}$ Heptacosane, 3444[6].
$C_{27}H_{56}O$ Ceryl alcohol, 3411[1].
14-Heptacosanol, 2819[2].
$C_{28}H_{12}N_2O_2$ Flavanthrene, P 1996[1]
$C_{28}H_{12}Cl_2N_2O_4$ 9,9'-Bianthryl, dichlorodinitro-, 1078[2].
$C_{28}H_{12}Cl_4O_2$ 10,10'-Bianthrone, 4,5,4',5'-tetrachloro-, 2492[1]
$C_{28}H_{14}N_2O_4$ Indanthrene, P 1813[9]
$C_{28}H_{16}Br_2O_2$ Peroxide, bis(10-bromo-9-phenanthryl), 112.
$C_{28}H_{16}Cl_2N_4$ Nicotinonitrile, 2,4-dichloro-6-nitrile, dimer, 915[2]
$C_{28}H_{16}N_2$ Phenanthrazine, 112[1]
$C_{28}H_{16}N_2O_2S_2$ Phthalimide, p,p'-dithiobis[N-phenyl-, 600[4]
$C_{28}H_{16}O_4$ $\Delta^{2,2'}$-Biindan-1,3,1'-trione, 2'-(1,3-diketo-2-indanylmethyl)-, 911[5]
$C_{28}H_{16}Br_2$ $\Delta^{9,9',10,10'}$-Bianthracene, dibromo-(?), 1078[2].
9,9'-Bianthryl, dibromo-9,10-dihydro-(?), 1078[2]
$C_{28}H_{16}ClN_5$ 2,13-Diphenyl-2-benzotriazolophenaz-13-onium chloride, 2859[9].
$C_{28}H_{16}Cl_2$ $\Delta^{9,9',10,10'}$-Bianthracene, dichloro-(?), 1078[2]
9,9'-Bianthryl, dichloro-9,10-dihydro-(?), 1078[2]
$C_{28}H_{16}Li_2O_8$ Quinizarin, di-Li deriv., salicylaldehyde addn. compd., 741[5]
$C_{28}H_{16}N_2O_2$ Indicotin, 1,1-diphenyl-, $FeCl_3$ compd., 414[5].
$C_{28}H_{16}N_6O_3$ 2,13-Diphenyl-2-benzotriazolophenaz-13-onium nitrate, 2859[9]
$C_{28}H_{18}O$ 9-Anthryl ether, 192[6].
$C_{28}H_{18}O_2$ Anthracene, 9,10-dibenzoyl-, 2852[6].
$C_{28}H_{18}O_4$ Naphtholphthalein, 2870[2]
$C_{28}H_{18}S_2$ 9-Anthryl disulfide, 192[5]
$C_{28}H_{18}S_4$ 9-Anthryl tetrasulfide, 192[5].
$C_{28}H_{19}NO_2$ $\Delta^{9,9',10,10'}$-Bianthracene, nitro-(?), 1078[2].
9,9'-Bianthryl, 9,10-dihydro-?-nitro-(?), 1078
$C_{28}H_{19}N_3$ Quinoline, 2,2',2''-methenyltris-, $HgCl_2$ compd., 2330[1].
Rosinduline, phenyl-, 1992[7]
$C_{28}H_{19}N_5O$ 2,13-Diphenyl-2-benzotriazolophenaz-13-onium hydroxide, 2860[1].
$C_{28}H_{20}$ $\Delta^{9,9',10,10'}$-Bianthracene (?), 1078[2].
9,9'-Bianthryl, 9,10-dihydro-(?), 1078[2].
$C_{28}H_{20}BrNO_2$ 1,4-Oxazin-5(6)-one, 4-bromo-3,4,6,6-tetraphenyl-, 1239[9]
$C_{28}H_{20}ClNO_2$ 1,4-Oxazin-5(6)-one, 4-chloro-3,4,6,6-tetraphenyl-, 1239[9].
$C_{28}H_{20}N_2$ Succinonitrile, tetraphenyl-, 1402[6].
$C_{28}H_{20}N_2O_4$ 1,4-Oxazin-5(6)-one, 4-nitro-3,4,6,6-tetraphenyl-, 1239[9].
$C_{28}H_{20}N_4O_2S$ 1,2,4-Triazol-3(2)-one, 1,2

dibenzoyl - 4 - phenyl - 5 - phenylimino-3-thio-, 2162[3].
$C_{28}H_{20}N_4O_6S_4$ Benzothiazolesulfonic acid, 1,1'-*p*,*p* - azodiphenylbis[4-methyl-, 2327[5].
$C_{28}H_{20}O$ 1 - Acetonaphthone, α-1-naphthyl-α-phenyl-, 410[5].
Benzopyran, benzaldiphenyl-, 3167[7].
Furan, tetraphenyl-, 327[1].
Ketone, 10-benzyl-9-anthryl phenyl, 3453[1].
$C_{28}H_{20}O_2$ Anthracene, 9,10-dibenzoyl-9,10-dihydro-, 3293[2].
3(2) - Furanone, 2,2,4,5-tetraphenyl-, 391[1].
$C_{28}H_{21}ClO$ Benzyldiphenylpyrylium chloride, *FeCl₃ compd.*, 3167[8].
$C_{28}H_{21}ClO_4$ Benzyldiphenylpyrylium perchlorate, 3167[8].
Methyltriphenylbenzopyrylium perchlorate, 3167[9].
$C_{28}H_{21}Cl_2N$ Aniline, *p*-(1,5-dichloro-10-phenyl-9-anthryl)-*N*,*N*-dimethyl , 2678[3].
$C_{28}H_{21}NO_2$ 5 - Isoxazolecarbinol, α,α-3,4-tetraphenyl-, 391[1].
1,2,6 - Oxazin-5-ol, 3,4,6,6-tetraphenyl-, 1239[9].
$C_{28}H_{22}Cl_2N_2$ 9,10 - Anthradiamine, 1,5-dichloro-*N*,*N'* - dimethyl - *N*,*N'* - diphenyl-, 755[4].
$C_{28}H_{22}N_2O_2$ 1,10 - Anthracenedione, 4,9-di *p* toluino-, 2853[7].
Anthraquinone, 1,4-di-*p*-toluino , 2853[6]
$C_{28}H_{22}N_4OS$ Δ[2] - 1,2,4 Triazoline, 1 benzoyl-3 - (benzylmercapto) - 4 - phenyl 5-phenylimino-, 2162[3].
$C_{28}H_{22}N_4O_2$ Diphenic acid, bis(benzalhydrazide), 2672[5].
$C_{28}H_{22}N_4O_4S_2$ Oxanilide, *o*,*o''*-dithiobis , 600[1].
$C_{28}H_{22}O$ Benzopyran, benzyldiphenyl , 3167[8].
Ketone, 10 benzyl 9,10 dihydro-9-anthryl phenyl, 3453[2].
$C_{28}H_{22}O_2$ Benzopyran, methoxytriphenyl , 3167[3].
Benzopyranol, methyltriphenyl-, 3167[9]
9,9'(10,10')-Bi 9 anthrol, 2853[1].
9,9'-Bixanthyl, 9,9'-dimethyl-, 2328[1]
Compd , m 226–7°, from 1,1' - benzenylbis-2(1)-naphthalenone, and MeMgI, 1803[6]
Fluorene, 9 - (di-*p*-anisylmethylene)-, 365[2].
$C_{28}H_{22}O_3$ 9(10)-Phenanthrone, 10,10 dicresyl-, 412[4].
$C_{28}H_{22}O_8$ 1,1' - Bi[naphthalene]-3,4,3',4'-tetrol, tetraacetate, 383[8].
$C_{28}H_{23}NO$ Compd. from 2 (β-bromoethyl) 3 - hydroxy - 3 - phenylphthalimidine and PhMgBr, m. 172°, 1408[3].
$C_{28}H_{23}NO_2$ Δ[2] - 5 - Isoxazolinecarbinol, 5-hydroxy α,α-3,4 tetraphenyl-, 390[9].
$C_{28}H_{24}Cl_2N_2$ 9,10 Anthradiamine, dichloro 9,10-dihydro - *N*,*N'* - dimethyl *N*,*N'*-diphenyl , 754[4], 3166[2].
$C_{28}H_{24}N_2O_6Sn$ + $2H_2O$ Pyridine tripyrocatecholatostannate, 3404[1].
$C_{28}H_{24}N_2O_9Sn$ + $2H_2O$ Pyridine tripyrogallolstannate, 3404[2].
$C_{28}H_{24}O_2$ 1-Propanol, 2,2,3-triphenyl-, benzoate, 2850[1].
$C_{28}H_{25}BrO_8$ Glucoside, methyl-, bromohydrin, tribenzoate, 376[1], 1221[4].
$C_{28}H_{25}N$ Diindanylamine, *N*-2-naphthyl-, 756[2].
$C_{28}H_{25}NO$ Acetophenone, *p* dimethylamino-α-triphenyl-, 408[7].
$C_{28}H_{25}NO_2$ 1-Propanol, 2,2,3-triphenyl-, carbanilate, 2850[1].
$C_{28}H_{24}N_2$ Compd., m. 190–2°, from the phenylhydrazone of 2-benzyl-1-indanone and $PhNHNH_2$, 191[4,9].
Monophthalyl deriv., m. 256–8°, 192[2].
$C_{28}H_{27}N_3O$ Benzamide, *p*-dimethylamino-*N*-triphenylmethylimino-, 408[7].
$C_{28}H_{27}N_3O_{15}$ 4' - β - Glucosidoxy-7-hydroxy-3-methoxyflavylium picrate, 3297[4].
$C_{28}H_{28}N_8O_{12}$ Toluene, 2,4,6-trinitro-, addn. compd. with *N*,*N*-dimethyl - *p* - phenylazoaniline, 1062[8].
$C_{28}H_{26}As_2N_4O_6$ Anisanilide, 3',3'''-arsenobis[3-amino-6'-hydroxy-, 2318[7].
$C_{28}H_{26}N_2O_{10}W$, 3405[9].
$C_{28}H_{26}N_2O_{10}S$ Norcodeine, *N*-(2-thienylmethyl)-, picrate, 3012[7].
$C_{28}H_{26}N_6$ Azobenzene, *m*,*m'*-bis(*p*-tolylazo)-, 2836[3].
$C_{28}H_{26}O$ Ethanol, 1,2-dibenzyl-1,2-diphenyl-, 2325[2]
Ether, diphenyl(*p* - tolylphenyl)methyl ethyl, 1988[3]
$C_{28}H_{26}O_2$ 10,10' - Bi - 9 - anthrol, 1,2,3,4,-1',2',3',4' octahydro , 1403[9].
$C_{28}H_{26}O_2S_3$ Orcinol, 2,4,6-tris(*p*-tolylmercapto)-, 3289[7].
$C_{28}H_{26}O_8$ Isorhamnoside, tribenzoyl α-methyl-, 1221[6].
$C_{28}H_{28}O_{13}$ Alizarin, glucoside, tetraacetate, 2679[3]
Chrysazin, glucoside, tetraacetate, 2679[4].
$C_{28}H_{28}O_{14}$ Purpurin, glucoside, tetraacetate, 2679[4].
$C_{28}H_{28}S$ Compd. from Me benzylxanthate, m. 184–5°, 1395[9].
$C_{28}H_{27}NO_3$ Dibenzylamine, *m*,*m'*-bis(phenoxymethyl)-, 391[7].
1,2 Ethanediol, 1 - *p* - (dimethylaminophenyl)-1,2,2-triphenyl-, 187[8].
$C_{28}H_{27}N_3O$ Benzoic acid, *p*-dimethylamino-, triphenylmethylhydrazide, 408[7].
$C_{28}H_{27}N_7OS$ Lauth's violet 2,7-bisazodimethylaniline, 2836[7]
$C_{28}H_{28}ClNO_3$ 4 - *p* - Anisyl - 2 - (*p*-dimethylaminostyryl) - 7 - methoxy - 3 - methylbenzopyrylium chloride, *and FeCl₃ compd.*, 3455[1].
$C_{28}H_{28}N_4$ Xenylamine, 4',4'''-azobis[*N*,*N*-dimethyl-, *and HCl*, 587[1].
$C_{28}H_{28}O_4Si$ *p* Tolyl orthosilicate, 1605[8].
$C_{28}H_{28}O_4$ Methane, asaryl(2,4-dimethoxyphenyl)-1-naphthyl-, 2849[9].
$C_{28}H_{28}Pb$ Plumbane, diphenyldi - 2,5 - xylyl-, 2669[1].
$C_{28}H_{29}N_3O_4$ Anthroxanic acid, quinine salt, 180[1].
$C_{28}H_{29}N_5O_2$ 9 - γ - Isobenzophenoxazine, 9-(diethyldihydrohydroxyimino) - 5 - (*p*-dimethylaminophenylazo)-, 2836[7].
Nile blue - 2 - azodimethylaniline, 2836[7].
$C_{28}H_{30}O$ Compd., m. 106°, from cyclohexenylacetophenone and EtONa, 3447[9].
$C_{28}H_{31}NO$ Benzanilide, 2'-benzyl-*ar'*-hexahydro-*N*-phenethyl-, 2665[9].
$C_{28}H_{31}NO_7S$ *N* - Methylpapaverinium *p*-toluenesulfonate, 1798[9].
$C_{28}H_{32}N_2$ Compd., m. 152°, from *p*-toluquinaldine and *p*,*p'*-bis(dimethylamino)benzohydrol, 1627[7].
$C_{28}H_{32}N_6O_{11}$ *o*-Acetanisidide, 3-amino-4-[(1,2,3,4-tetrahydro - 6,7 - dimethoxy - 2 - methyl-1 - isoquinolyl)methyl]-, picrate, 3450[9].
$C_{28}H_{32}O_2$ Compd., m. 201°, from cyclohexenylacetophenone and NaOEt, 3447[4].

$C_{28}H_{32}O_{11}$ + $4H_2O$ Acaciin, 2162[4].

$C_{28}H_{33}N_3O_3$ Valeramidine, *N*, *N'*-di-*p*-phenetyl *N*-phenylcarbamyl-, 1218[5].

$C_{28}H_{34}N_2O_2$ Truxillic acid, dipiperidide, 1391[6].

$C_{28}H_{34}O_2$ 10,10'-Bi-9-anthrol, 1,2,3,4,5,6,7,8,1',2',3',5',6',7',8' - hexadecahydro-, 1403[3].

$C_{28}H_{34}O_4$ β-Truxinic acid, monomenthyl ester, 2664[6].

$C_{28}H_{35}BrN_2O_6$ Isovaleric acid, α-bromo-, brucine salt, 2310[4].

$C_{28}H_{35}Fe_2N_4O_{14}S$ + H_2O, 2127[8].

$C_{28}H_{36}N_2O_6$ 2,4 - Pyrroledicarboxylic acid, 5 - [bis(4 - acetyl-3,5-dimethyl 2-pyrryl)-methyl]-3 methyl-, di-Et ester, 2160[4].

$C_{28}H_{36}HgI_4N_2$ Quinoline, complex salt with C_4H_9I and HgI_2, 3695[9]

$C_{28}H_{36}N_2O_6Sn$ + $2H_2O$ Piperidine tripyrocatecholatostannate, 3404[3].

$C_{28}H_{36}N_4O_7$ Apoconessine, picrate, 3458[5].

$C_{28}H_{37}NO_{18}$ Cellobiononitrile, octaacetyl-, 2988[3].

$C_{28}H_{38}N_8O_{14}S$ Piperidine, γ,γ'-thiobis[1-propyl-, dipicrate, 362[9].

$C_{28}H_{38}O_{19}$ Cellobiose, octaacetyl-, 380[1]
Isomaltose, octaacetate, 2829[1]
Neolactose, octaacetate, 2184[1,2]

$C_{28}H_{38}O_{20}S$ Sulfone, 1,1-digalactosyl, octaacetate, 379[6].
—, 1,1-diglucosyl, octaacetate, 379[6].

$C_{28}H_{39}NO_{19}$ Cellobiose, octaacetyl-, antioxime 2988[4]

$C_{28}H_{40}N_2O_4$ See *Cephaeline*.

$C_{28}H_{40}N_4O_4$ Piperazine, 1,4-bis(ε-benzamidoamyl)-, and di *HCl*, 2862[6]

$C_{28}H_{44}O_9$ + H_2O Dimethyl ester of acid from the prepn. of digitogenic acid, m. 125°, 1414[3]

$C_{28}H_{42}Fe_2N_7O_{29}S_2$ + $2H_2O$, 2127[8]

$C_{28}H_{42}N_2O_2$ Piperazine, 1,4-bis(3-camphorylidenemethyl)-2,5-dimethyl-, 2682

$C_{28}H_{42}O_4$ Cyclopentanecarbinol, 1,2,2,3-tetramethyl-, phthalate, 1398[4]

$C_{28}H_{43}NO_2$ Aniline, *N*, *N*-bis[β-keto-β-(1,2,2,3-tetramethylcyclopentyl)ethyl]-, 1399[1]

$C_{28}H_{44}O_6$ Hyodesoxycholic acid, diacetate, 2186[5].

$C_{28}H_{46}$ Compd. from shark liver oil, 6 *HCl*, 576[7].

$C_{28}H_{46}Br_2O_8S_4$ Ethylenebis[ethylmethylsulfonium *d*-bromo-π-sulfonate], 1217[5].

$C_{28}H_{50}CuO_4$ Δ[3] 2-Tetradecenone, 4-hydroxy-, Cu deriv., 738[9]

$C_{28}H_{48}O_8S_4$ Ethylenebis[ethylmethylsulfonium *d*-camphorsulfonate], 1217[5].

$C_{28}H_{54}O_6$ 1,2,4-Tetracosanedicarboxylic acid, 12,13-dihydroxy-, di Me ester, 1599[1].

$C_{28}H_{54}O_{11}$ Cellobiose, octaethyl-, 380[5].

$C_{29}H_{15}Cl_2NO_4$ 2-Anthraquinonecarboxamide, 1-chloro-*N*-(1-chloro-2-anthraquinonyl)-, 1628[2].

$C_{29}H_{16}ClNO_4$ 2-Anthraquinonecarboxamide, *N*-anthraquinonyl-1-chloro-, 1628[1]

$C_{29}H_{17}ClN_2O_4$ 2-Anthraquinonecarboxamide, 1-amino-*N*-(1-chloro-2-anthraquinonyl)-, 1628[1].

$C_{29}H_{18}N_2O_4$ 2-Anthraquinonecarboxamide, 1-amino-*N*-1(and 2)-anthraquinonyl-, 1628[1].

$C_{29}H_{18}N_6S$ Phenanthrotriazole, 2,2'-thiocarbonylbis-, 1810[9].

$C_{29}H_{18}N_4O_2S$ Phenanthrenequinone, 9,9'-thiocarbohydrazone, 1810[9].

$C_{29}H_{19}N_5O_{10}$ 1,2-Pyran-2-ol, 2(and 4)-(*m*-nitrophenyl)-4,6(and 2,6)-diphenyl-, picrate, 417[2,3].

$C_{29}H_{19}N_3O_4$ *s*-Triazine, 2,4-bis(4-hydroxynaphthyl)-6-(dihydroxyphenyl)-, P 510[8].

$C_{29}H_{19}N_5O_9$ Pyridine, 2(and 4)-(*m*-nitrophenyl)-4,6(and 2,6)-diphenyl-, picrate, 417[2,3].

$C_{29}H_{20}N_4O_7$ Quinoline, 2-phenyl-4-styryl-, picrate, 2681[2].

$C_{29}H_{20}N_4O_8$ 4-(Aminophenyl)-2,6-diphenylpyrylium picrate, 417[4], 758[2].

$C_{29}H_{20}O$ Cyclopentadienone, tetraphenyl-, 383[8], 1407[8].

$C_{29}H_{20}O_4$ Flavone, 3-benzyl-7-hydroxy-, benzoate, 197[1].
9-Fluorenecarboxylic acid, 9-hydroxy-, 9-fluoryl ester, acetate, 2675[7]

$C_{29}H_{21}N_3$ Methane, (1-methyl-2(1)-quinolylidene)di-2-quinolyl-, 2329[6].

$C_{29}H_{21}N_3O_4$ 1-Naphthylamine, *N*(α,α-diphenyl-*o*-tolyl)-2,4-dinitro-, 1801[9].

$C_{29}H_{21}N_5O_8$ 2,4-Bis(*p*-aminophenyl)-6-phenylpyrylium picrate, 758[4].

$C_{29}H_{22}$ 1,2,4-Pentatriene, 1,1,3,5-tetraphenyl-, 1592[5]

$C_{29}H_{22}BrNO_2$ Br deriv. of mono Bz deriv., m. 208-9°, 192[2].

$C_{29}H_{22}N_2O_4$ Orcinol, bis(1-naphthalenecarbamate), 2319[5].

$C_{29}H_{22}N_4O_9$ 1,2-Pyran-2-ol, 4-(*m*-aminophenyl)-2,6-diphenyl-, monopicrate, 417[4].

$C_{29}H_{22}O_2$ 2-Furanol, 5-benzal-2,5-dihydro-2,3,4-triphenyl-, 1407[7]

$C_{29}H_{22}O_7$ Santalin, dibenzoyl-, 1405[9]

$C_{29}H_{23}NO_2$ *o*-Isoxazin-5(6)-one, 2-methyl-3,4,6,6-tetraphenyl-, 1239[9]
Mono-Bz compd., m. 160-1°, 192[2]

$C_{29}H_{24}N_4$ 2,2'-Spirobiindan-1,1'-dione, bis phenylhydrazone, isomer, 1620[2]

$C_{29}H_{24}N_4O_2$ Carbazine, 1,7-diacetamido-5,5-diphenyl-, -*HCl*, 1802[5]

$C_{29}H_{24}O$ Δ[2,4]-Pentadien-1-ol, 1,1,3,5-tetraphenyl-, 1592[4].
Phthalan, 1-benzal-2,2-dibenzyl- (?), 1804[2].

$C_{29}H_{24}O_2$ Benzopyran, ethoxytriphenyl-, 3167[5]

$C_{29}H_{25}NO$ Compd. from 2-(γ-bromopropyl)-3-hydroxy-3-phenylphthalimidine and PhMgBr, m. 194°, 1408[3].

$C_{29}H_{25}N_3$ 1,2,4-Naphthalenetriamine, *N*1-(α,α-diphenyl-*o*-tolyl)-, 1802[1]

$C_{29}H_{26}N_2O$ Benzamide, *N*-tri-*p*-tolylmethylimino-, 408[7]

$C_{29}H_{26}N_4O_2S$ Carbamide, *p*,*p'*-bis(*p*-acetamidophenyl)thio-, 752

$C_{29}H_{26}O_4$ Acetophenone, α-asaryl-α,α-diphenyl-, 2849[9].

$C_{29}H_{27}BrN_2$ 5,6-Benzocarbocyanine, 1,1'-diethyl-, bromide, 419[7].

$C_{29}H_{28}Hg_2I_4N_2$ Quinoline, complex salt with MeI and HgI_2, 3695[9].

$C_{29}H_{28}N_2O_5$ Anthroxanic acid, strychnine salt, 1801[1].

$C_{29}H_{27}N_3O_{16}$ 4'-β-Glucosidoxy-7-hydroxy-3-methoxy-5-methylflavylium picrate, 3297[5].

$C_{29}H_{28}As_2N_4O_{11}$ Carbanilide, 5,5'-bis(*p*-arsonophenylcarbamyl)-2,2'-dimethoxy-, 394[4].

$C_{29}H_{28}N_2O$ Benzoic acid, tri-*p*-tolylmethylhydrazide, 408[7].

$C_{29}H_{30}O_{13}$ Chrysophanic acid, glucoside, tetraacetate, 2679[6].

$C_{29}H_{28}O_{14}$ Emodin, glucoside, tetraacetate, 2679^{5}.

$C_{29}H_{29}AsI_4$ Tetrabenzylarsonium iodide, CHI_3 addn. compd., 2815^{9}.

$C_{29}H_{30}N_4O_7$ Brucinonic acid, phenylhydrazone, 1811^{3}.

$C_{29}H_{31}NO_9S$ Hydrastine, Me *p*-toluenesulfonate addn. compd., 1795^{6}.

$C_{29}H_{32}N_2O_6$ Quinine acetylsalicylate, 1030^{2}.

$C_{29}H_{32}N_4O_{10}$ Norcodeine, *N*-(cyclopentylmethyl)-, picrate, 3012^{7}

$C_{29}H_{32}N_6O_6$ Brucinonic acid, hydrazide, phenylhydrazone, 1811^{4}.

$C_{29}H_{33}N_3O_8$ Serine, *N*-salicylal-, cinchonidine salt, 1815^{3}.

$C_{29}H_{34}IN_3$ Compd., m. 160°, from *p*-toluquinaldine MeI and *p*,*p*-bis(dimethylamino)benzohydrol, 1627^{7}

$C_{29}H_{34}N_{10}O_{18}$ 1,3-Propanediamine, 2-(2,4-dinitrophenyl)-*N*,*N*,*N'*,*N'*-tetraethyl-, picrate, 1414^{1}.

$C_{29}H_{34}O_5S$ Thymolsulfonephthalein, di Me ether, 1615^{4}

$C_{29}H_{36}N_2O_{11}$ Acid, from β-diacetonefructose, brucine salt, 1388^{9}.
Galacturonic acid, brucine salt, 1389^{4}.

$C_{29}H_{41}N_3O_7S_2$ Imidazole, 4-(o-aminophenyl)-, di-*d*-camphor 10 sulfonate, 395^{8}.

$C_{29}H_{45}IO_5$ Compd of an acid from the prepn of digitogenic acid, m 122° and 105°, 1414^{5}.

$C_{29}H_{46}O_6$ Hyodesoxycholic acid, Me ester, diacetate, 2166^{8}

$C_{29}H_{47}IO_2$ Cholesterol, iodo-, acetate, 3299^{6}.

$C_{29}H_{48}O_2$ Sterol, acetate, 3090^{9}, 3100^{3}

$C_{29}H_{53}Br_{15}I_4N_{16}Sn$, 156^{8}

$C_{29}H_{53}Br_{15}I_3N_{16}Tl$, 156^{9}

$C_{29}H_{54}O_2$ Acid, *H salt*, m. 116 7°, 2818^{2}

$C_{30}H_{17}FeO_{12}$ + $3H_2O$ Luteolin, Fe deriv., 407^{4}

$C_{30}H_{17}FeO_{14}$ + $3H_2O$ Morin, Fe deriv., 407^{5}

$C_{30}H_{18}Cl_6O_6S_3$ Phloroglucinol, 2,4,6-tris(2,5-dichlorophenylmercapto)-, triacetate, 3289^{7}.

$C_{30}H_{18}N_2S_2$ Diindenodithiin, 10,12-bis(phenylimino)-, 3002^{4}

$C_{30}H_{19}N_3O_4$ 4,5-α,β-Naphthotriazolediol, 2-phenyl-, dibenzoate, 2859^{7}.

$C_{30}H_{20}O_4$ 9-Fluorenecarboxylic acid, 9 hydroxy-, 9-carboxy-9 fluoryl ester, 2675^{4}.

$C_{30}H_{21}KN_2O_2$ Indigotin, 7,7'-dimethyl-1,1'-diphenyl-, K deriv., 414^{6}.

$C_{30}H_{21}NO_4$ 2,7-Naphthalenediol, benzoate, diphenylcarbamate 911^{1}

$C_{30}H_{22}As_2Cl_4N_2$ Phenarsazine, 10-chloro-5,10-dihydro-, *o*-dichlorobenzene addn. compd., 1606^{8}

$C_{30}H_{22}Br_2O$ Dibromide, m 171°, from 1,3,4,6-tetraphenyl-1,6-hexanedione, 1594^{1}.

$C_{30}H_{22}Cl_2O_4Sn$ Stannane, dichlorobis(dibenzoylmethyl)-, 403^{2}.

$C_{30}H_{22}Mn_4O_{13}$ + $10H_2O$, 717^{7}.

$C_{30}H_{22}N_2O$ Benzanilide, 3'-(4,6-diphenyl-2-pyridyl)-, 417^{3}.

$C_{30}H_{22}N_2O_8$ Quinoline, 6 methoxy-2-phenyl-4-styryl-, picrate, 2681^{1}.

$C_{30}H_{22}N_8O$ Phenol, *p*-{*p*-[*p*-(*p*-phenylazophenylazo)phenylazo]phenylazo}-, 2830^{8}.

$C_{30}H_{23}As_2Cl_3N_2$ Phenarsazine, 10-chloro-5,10-dihydro-, chlorobenzene addn. compd., 1606^{9}.

$C_{30}H_{23}Cl$ Methane, chloro-1-naphthylphenyl(*p*-tolylphenyl)-, 1988^{6}.

$C_{30}H_{23}NO_4$ 1,2,6-Oxazin-5-ol, 6-methoxy-3,4,6-triphenyl-, benzoate, 1239^{8}.

$C_{30}H_{23}N_3$ Methane, (1-ethyl-2(1)-quinolylidene)di-2-quinolyl-, 2330^{1}.

$C_{30}H_{23}N_3O$ α-Naphthofuran, 1,1-dianilino-1,2-dihydro-2-phenylimino-, 593^{6}.

$C_{30}H_{23}N_3O_2$ 2-Naphthol, 1-[α-(5-phenylazosalicylal)aminobenzyl]-, 2992^{8}.

$C_{30}H_{24}$ Anthracene, 9,10-dihydro-9,9'-ethylenebis-, 2677^{6}.
9,9'-Bianthryl, 9,10-dihydro-10,10'-dimethyl-, 2677^{7}.
Methane, 1-naphthylphenyl(*p*-tolylphenyl)-, 1988^{4}.

$C_{30}H_{24}IN_3$ Methane, (1-methyl-2(1)-quinolylidene)di-2-quinolyl-, methiodide, 2330^{2}.

$C_{30}H_{24}N_2O_4$ Biacetanilide, dibenzoyl-, 3822^{4}.

$C_{30}H_{24}N_2O_8$ 1,3-Propanediol, 2-methyl-1,3-diphenyl-, bis-*p*-nitrobenzoate, 364^{4}.

$C_{30}H_{24}N_4O_2S$ 1,3,4-Thiodiazole, 2,5-bis(*N*-*p*-tolylbenzamido)-, 2162^{2}

$C_{30}H_{24}N_4O_8$ Allantoic acid, dixanthyl-, 2182^{7}.

$C_{30}H_{24}O$ Carbinol, 1-naphthylphenyl(*p*-tolylphenyl)-, 1988^{4}
Ketone, phenyl 2,4,5-triphenyl-Δ¹-cyclopentenyl, 1594^{1}

$C_{30}H_{24}OPb$ Plumbane, (*p*-phenoxyphenyl)triphenyl-, 2669^{1}

$C_{30}H_{25}As_3$ Triarsine, pentaphenyl-, 2994^{3}.

$C_{30}H_{25}NO_2$ *o*-Isoxazin-5(6)-one, 2-ethyl-3,4,6,6-tetraphenyl-, 1239^{9}
Monobenzoylmethoxy compd., m. 163-4°, 192^{2}

$C_{30}H_{26}Cl_2N_2$ Aniline, *p*,*p*'-(1,5-dichloro-9,10-anthrylene)bis[*N*,*N*-dimethyl-, 755^{9}.

$C_{30}H_{26}N_2O_2S$ Quinoline, 2-dibenzylamino-4-*p*-tolylsulfonyl-, 1626^{8}

$C_{30}H_{26}N_2O_7$ Tartranilic acid, $PhNH_2$ salt, dibenzoate, 1789^{6}.

$C_{30}H_{26}O$ Ketone, phenyl 2,3,5-triphenylcyclopentyl, 1594^{1}.

$C_{30}H_{26}O_2$ 9,9'-Bixanthyl, 9,9'-diethyl-, 2328^{6}.
Fluorene, 9-(di-*p*-phenetylmethylene)-, 365^{2}.

$C_{30}H_{27}ClO_6Zr$ Tris(α-acetylphenacyl)zirconium chloride, 403^{1}.

$C_{30}H_{28}Br_4N_2S_2$ Benzothiazole, methyl-1-toluino-, tribromide, 1951^{7}

$C_{30}H_{28}Cd_2N_2O_{12}$ + $6H_2O$, 720^{3}.

$C_{30}H_{28}Cl_2N_2$ Aniline, *p*,*p*'-(dichloro-9,10-dihydro-9,10-anthrylene)bis[*N*,*N*-dimethyl-, 754^{8}, 3166^{4}

$C_{30}H_{29}N_3O$ *p*-Toluamide, *N*-tri-*p*-tolylmethylimino-, 408^{9}

$C_{30}H_{30}N_2O_4$ 2-Propionaphthone, 1-hydroxy-, azine, diacetate, 1847^{7}

$C_{30}H_{30}O$ Benzopinacolin, *p*,*p*',*p*'',*p*'''-tetramethyl-, 408^{9}.

$C_{30}H_{30}O_4S$ Ethylene sulfide, tetra-*p*-anisyl-, 364^{9}.

$C_{30}H_{30}CoN_6O_4$, 1962^{8}.

$C_{30}H_{31}N_3O$ *p*-Toluic acid, tri-*p*-tolylmethylhydrazide, 408^{8}.

$C_{30}H_{32}O_{10}S$ Glucose, 3,5(and 5,6)-dibenzoyl-6(and 3)-*p*-toluenesulfonylmonoacetone-, $2985^{3,4}$.

$C_{30}H_{31}ClO_{15}$ 4'-Tetraacetyl-β-glucosidoxy-7-hydroxy-3-methoxyflavylium chloride, 3297^{9}.

$C_{30}H_{32}N_6O_{18}W$, 3405^{9}.

$C_{30}H_{32}O_{11}S_2$ Glucose, 6-benzoyl-3,5-di-*p*-toluenesulfonylmonoacetone-, 2985^{1}.

$C_{30}H_{34}CuO_8$ Benzoic acid, (β-acetyl-γ-hydroxy-Δ¹-butenyl)-, Et ester, Cu deriv., $2842^{3,4}$.
—, *m*-[β-(α-hydroxyethylidene)-γ-ketohexyl]-, Cu deriv., and Cu salt, 2843^{9}.

$C_{30}H_{34}N_4O_{10}$ Norcodeine, *N*-(cyclohexylmethyl)-, picrate, 3012[7].

$C_{30}H_{35}N_3O_6$ Serine, *N*-salicylal-, quinine salt, 1815[3].

$C_{30}H_{36}AlN_3O_{12}$ + H_2O Phenethylamine, aluminum oxalate, 766[6].

$C_{30}H_{36}N_4O_3$ Tripropylamine, γ,γ′,γ″-tribenzamido , 1589[6].

$C_{30}H_{36}O_7$ Chrysarobin, 411[7].

$C_{30}H_{38}N_2O_2$ 1(2) - Naphthalenone, 3,4-dihydro - 2 - (1-piperidyl)-(?), dimer, 383[5].

$C_{30}H_{39}N_3O_8$ 2,4 - Pyrroledicarboxylic acid, 5 - [bis(carboxydimethylpyrryl)methyl]-3-methyl-, tetra Et ester, 2160[4,5].

$C_{30}H_{39}N_6O_9S_3$ + $4H_2O$, 2924[5].

$C_{30}H_{40}CoN_4$ Isopyrrole, 5 ethyl-2-(5-ethyl 3-methyl - 2 - pyrrylmethylene)-3-methyl-, Co deriv , 1236[6]

$C_{35}H_{25}N_3$ Methane, benzyltri-2-quinolyl-, *and salts*, 2330[1].
$C_{35}H_{26}$ Cyclopentadiene, 1,2,3,4,5-penta-phenyl-, 384[1].
$C_{35}H_{26}Cl_2N_3$ Compd., m. 245°, from 2,2',2''-methenyltrisquinoline and $PhCHCl_2$, 2330[2].
$C_{35}H_{26}O$ $\Delta^{2,4}$-Cyclopentadienol, pentaphenyl-, 383[9].
$C_{35}H_{26}O_7S$ *m* - Cresolsulfonephthalein, dibenzo-ate, 3001[3].
$C_{35}H_{27}Cl_2N_3$ Compd. from 2,2',2''-methenyl-trisquinoline and benzyl chloride, 2329[8].
$C_{35}H_{30}N_4O$ Urea, α,β - bis[β-(2-phenyl-4-quinolyl)ethyl]-, 1413[6].
$C_{35}H_{30}O_2$ 1,2 - Cyclopentanediol, 1,2,3,4,5-pentaphenyl-, 384[1].
$C_{35}H_{33}N_3O_8$ Succinic acid, α,β-dibenzamido-, morphine deriv., 48[6].
$C_{35}H_{34}N_{10}O_{10}$ Ethylenediamine, *N*-benzyl-*N'*-phenyl-, dipicrolonate, 1624[1].
$C_{35}H_{36}N_2O_6$ Truxillamidic acid, morphine salt, 1392[6].
$C_{35}H_{39}Hg_2I_8N_3$ Quinoline, complex salt with BuI and HgI_2, 3695[9].
$C_{35}H_{39}N_5O_5$ See *Ergotinine*.
$C_{35}H_{41}NO_3$ β-Truxinanilic acid, *N*-methyl-, menthyl ester, 2664[7], 2665[1].
$C_{35}H_{41}N_5O_6$ See *Ergotoxine*.
$C_{35}H_{42}N_2O_5$ Cyclohexanecarbinol, α-methyl-, acid phthalate, cinchonine salt, 3287[1].
$C_{35}H_{72}$ Pentatriacontane, 2819[3].
$C_{35}H_{72}O$ 18-Pentatriacontanol, 2819[2].
$C_{36}H_{14}Cl_4$ Decacyclene, tetrachloro-, 2851[5].
$C_{36}H_{15}Cl_3$ Decacyclene, trichloro-, 2851[5].
$C_{36}H_{16}O_6$ Violanthrone - *bz* - 2,2 - dicarboxylic acid, 3293[4].
$C_{36}H_{18}O$ Decacyclenol, 2851[6]
$C_{36}H_{18}O_2$ Decacyclenediol, 2851[6].
$C_{36}H_{18}O_3$ Decacyclenetriol, 2851[6].
$C_{36}H_{18}O_5S$ Decacyclenesulfonic acid, dihy-droxy-, 2851[5].
$C_{36}H_{18}O_7S_2$ Decacyclenedisulfonic acid, hy-droxy-, 2851[5].
$C_{36}H_{18}O_9S_3$ Decacyclenetrisulfonic acid, *and tri-Na salt*, 2851[4].
$C_{36}H_{19}ClO_4$ Isoviolanthrone, chlorodimethoxy-, 1076[9].
$C_{36}H_{20}O_2$ Isoviolanthrone, dimethyl , 1076[8,9].
$C_{36}H_{22}Cl_2O_2$ Perylene, 3,9-dichloro-4,10-di-toluyl-, 1076[7].
$C_{36}H_{22}Cl_2N_4$ Di - 2 - indenylamine, 3,3'-di chloro - *N* - phenyl-1,1'-bis(phenyl-imino)-, 3002[3].
$C_{36}H_{23}N_3S$ Diindenothiazine, 11,12-dihydro-11-phenyl - 10,12 - bis(phenylimino)-, 3002[4]
$C_{36}H_{24}N_8O_4$ 10-Nitro - 2 - phenyl-13-(*p* phenyl-azophenyl) - 2 - benzotriazolophenaz-13-onium acetate, 2860[1].
$C_{36}H_{24}O_4$ Perylene, 3,9-dianisoyl-, 1076[6].
$C_{36}H_{25}Mn_2Na_7O_{33}$ + $12H_2O$, 717[6].
$C_{36}H_{26}$ Fulvene, 1,2,3,4,6 - pentaphenyl-, 1407[8].
$C_{36}H_{26}N_2O_4$ 2,7-Naphthalenediol, bis(diphenyl-carbamate), 911[1].
$C_{36}H_{27}NO_3$ Di-Bz compd., m. 191–3°, 192[1].
$C_{36}H_{27}N_3O_5$ Semicarbazide, 1,1,2,4-tetra-benzoyl-4-*p*-tolyl-, 2161[9]
$C_{36}H_{28}N_3O_8Sn$ + $2H_2O$ Quinoline tripyrocate-cholatostannate, 3404[9].
$C_{36}H_{28}N_6$ Phenazine, 8-amino-2,7-dianilino-

3,5-dihydro - 5 - phenyl-3-phenylimino-, - *HCl*, 602[7].

$C_{36}H_{28}O$ $\Delta^{2,4}$ - Cyclopentadienol, 1-benzyl-2,3,4,5-tetraphenyl-, 1407[8].

$C_{36}H_{29}N_3O_6$ Glycerol, tri-1-naphthalenecarbamate, 1232[9].

$C_{36}H_{30}As_4$ Tetrarsine, hexaphenyl-, 2994[4].

$C_{36}H_{30}N_2O_{10}W$, 3405[9].

$C_{36}H_{30}O_{11}$ Xylindein, di-Me ether, 406[5].

$C_{36}H_{31}CuN_2O_6$ Ketone, 2-furyl-α-hydroxybenzyl, oxime, Cu deriv., 1055[8].

$C_{36}H_{32}N_2O_8$ Pyrazine, 2,5-bis(3,4-dimethoxyphenyl)-3,6-dipiperonyl-, 1083[9].

$C_{36}H_{33}N_3O_{20}$ 4′ - Tetraacetyl-β-glucosidoxy-7-hydroxy - 3 - methoxyflavylium picrate, 3297[3].

$C_{36}H_{34}Cl_6O_6Pt$ 5,7(6,7 and 7,8)-Dimethoxy 2-methyl - 4 - phenylbenzopyrylium chloroplatinate, 2499[1].

$C_{36}H_{38}O_2$ 9,9′-Bixanthyl, 9,9′ diisoamyl-, 392[6].

$C_{36}H_{39}N_5O_7$ Histidine, N-salicylal, brucine salt, 1815[3].

$C_{36}H_{42}N_4O_{13}$ Succinic acid, α,α′-p-biphenylenedisazobis[α,β - diacetyl-, tetra-Et ester, 599[2].

$C_{36}H_{46}Cl_3Fe_4N_6O_{16}$, 1180[6].

$C_{36}H_{54}O_3$ Benzene, s-tricampholyl-, 1399[8].

$C_{36}H_{56}I_6N_2O_8$ Dinicotinic acid, 4 isobutyl 2,6-dimethyl-, di-Et ester, methiodide, periodide, 3296[2].

$C_{36}H_{56}N_2O_8$ 4,4′ - Bidinicotinic acid, 1,4,1′,4′-tetrahydro - 4,4′ - diisobutyl 1,2,6,1′,-2′,6′-hexamethyl-, tetra-Et ester, 3296[4].

$C_{36}H_{56}N_{10}O_{32}Pt_2$ + $12H_2O$, 2961[3].

$C_{36}H_{60}O_{12}$ Inositol, hexaisovalerate, 2831[5].

$C_{36}H_{60}O_{30}$ Hexahexosan, 1598[1].

$C_{36}H_{64}O_{20}$ Tetra(trimethylglucosan), 743[4]

$C_{36}H_{66}AlN_3O_{12}$ + H_2O, 1-Menthylamine, aluminum oxalate, 766[8].

$C_{36}H_{66}CuO_4$ Δ^3 2 Octadecenone, 4 hydroxy, Cu deriv., 738[9].

$C_{36}H_{70}O_3$ Stearic anhydride, 2818[7]

$C_{36}H_{96}Co_2I_6N_{20}O_{18}$ + $3H_2O$, 1962[1]

$C_{37}H_{20}O_6$ $\Delta^{2,3'}$-Biindan - 1,3,1′-trione, 2′,2‴ methylenebis-, 911[6].

$C_{37}H_{23}N_3O_2$ s-Triazine, 6 anthryl 2,4 bis(4 hydroxynaphthyl)-, P 510[8]

$C_{37}H_{28}N_6O_3S$ Carbanilide, p,p′-bis[p-(p-hydroxyphenylazo)phenyl]thio, 1394[1].

$C_{37}H_{30}N_2$ Cyclopentadiene, 5 (p-dimethyl aminophenylimino) - 1,2,3,4 - tetraphenyl-, 383[8].

$C_{37}H_{35}N_3O_{20}$ 4′ - Tetraacetyl-β-glucosidoxy 7-hydroxy - 3 - methoxy - 5 - methylflavylium picrate, 3297[5].

$C_{37}H_{39}N_3O_9$ See *Xantholine*.

$C_{37}H_{40}Hg_2I_4N_4$ Quinoline, complex salt with $C_5H_{11}I$ and HgI_2, 3695[9]

$C_{37}H_{47}I_{11}N_2$ Benzyldiethylphenylammonium iodide, CHI_3 addn. compd, 2815[8]

$C_{37}H_{51}NO_{10}$ Taxine, 767[2].

$C_{37}H_{53}NO_4$ Amyrin, m nitrobenzoate, 1400[1].

$C_{38}H_{18}O_{12}S_2$ Spiro[1,3 - benzodioxan 2,1′ phthalan] - 4,2′ dione, 6,6″-phthalidenedithiobis, 182[9]

$C_{38}H_{22}O_2S$ Diacenaphthothiophenene, 3,11-dibenzoyl, 1076[2].

$C_{38}H_{26}N_4O_8$ Ethanol, 2 imino-1,1,2-tri-1-naphthyl-, picrate, 47[4].

$C_{38}H_{26}N_8O_{14}$ 9,10 - Anthrylenedimethylenebispyridinium picrate, 3004[1].

$C_{38}H_{26}O_8S$ Iso-2,4-hydroxynaphthoic acid sulfide, di-Me ester, dibenzoate, 1234[1].

1-Naphthoic acid, 4,4′-thiobis[3 hydroxy-, di-Me ester, dibenzoate, 1233[9].

$C_{38}H_{27}N_7O_3$ Acetonitrile, tris[p-(p-hydroxyphenylazo)phenyl]- (?), 585[9].

$C_{38}H_{30}$ o,o′ - Bitolyl, α,α,α′,α′-tetraphenyl-, 2675[4].

$C_{38}H_{30}N_2OSb_2Se_2$ Stibine, triphenyl-, selenocyanate oxide (?), 3288[4].

$C_{38}H_{30}O_2$ o,o′-Bi[benzyl alcohol], α,α,α′,α′-tetraphenyl-, 2675[2].

$C_{38}H_{33}N_{11}O_{10}$ Isoquinoline, 2-[o-(β-aminoethyl)benzyl] - 1,2,3,4 - tetrahydro-, dipicrolonate, 418[2].

$C_{38}H_{38}O_2$ 9,9′ - Bixanthyl, 9,9′dicyclohexyl-, 392[7].

$C_{38}H_{38}O_4$ Peroxide, bis(9 cyclohexyl 9 xanthyl)-, 392[8].

$C_{38}H_{42}O_2$ 9,9′ Bixanthyl, 9,9′ dihexyl, 392[7].

$C_{38}H_{44}O_7$ Gitoxigenin, di Bz deriv, 209[1].

$C_{38}H_{46}N_4O_4$ Bis(tetramethyldiaminodiphenyl carbinyl acetate), leuco base, 2836[9]

$C_{38}H_{48}FeN_4O_8$ 4 - Isopyrrolecarboxylic acid, 2-(4 carboxy 3,5-dimethyl-2 pyrryl methylene)-3,5 dimethyl, di Et ester, Fe salt, 2863[4]

$C_{38}H_{50}N_8O_{14}$ Dipicrate, m 258 9°, of base from conessine dimethosulfate, 3458[6]

$C_{38}H_{53}NO_2$ Cholesterol, 1 naphthalenecarbamate, 1232[9]

$C_{38}H_{62}$ Bibenzyl, α,α,α′,α′ tetracyclohexyl, 190[2]

$C_{38}H_{56}O_3$ Amyrin, anisate, 1399[9], 1400[1].

$C_{38}H_{66}O_{17}$ Picrocrocin, 797[5,8]

$C_{38}H_{70}CuO_4$ Δ^3 2 Nonadecenone, 4 hydroxy, Cu deriv, 739[1]

$C_{38}H_{74}O_4$ 1,32 Dotriacontanedicarboxylic acid, di Et ester, 17[4]

$C_{39}H_{30}O_2$ Acetic acid, triphenyl, triphenyl methyl ester, 109[7]

$C_{39}H_{32}N_2O$ Carbanilide, o,o′ and p,p′) di benzohydryl, 591[6,7]

$C_{39}H_{40}N_2O_3S$ Thymolsulfonephthalein, dianilino deriv, 1615[5]

$C_{39}H_{42}O_9$ Rottlerin, hexa Me ether, 182[6]

$C_{39}H_{46}N_2O_6$ Carvomenthol, acid phthalate, strychnine salt, 1397[4]

$C_{39}H_{48}N_2O_8$ Cyclohexanecarbinol, α methyl, acid phthalate, brucine salt, 3287[1]

$C_{39}H_{48}O_{14}$ Primary lignin, decomps 90°, 1598[4]

$C_{39}H_{74}O_6$ Palmitin, α,γ-di, β butyryl, 2818[7]

$C_{39}H_{77}O_8P$ Glycerophosphoric acid, distearate, 3011[2].

$C_{40}H_{20}O_4$ + H_2O 3,9-Perylenequinone, dimer, 1077[2].

$C_{40}H_{26}O_4$ Peroxide, bis(10 phenoxy 9-phenanthryl), 412[2].

$C_{40}H_{24}O_6$ 1,3 - Indandione, 2,2′ [2 (1,3-diketo 2 - indanylmethyl) - 3 - keto 2 indanylidenemethylene]bis, AcOH addn. compd, 911[8].

$C_{40}H_{28}Cl_2O_2$ 9,9′ - Bixanthyl, 9,9′ bis(p chlorobenzyl)-, 392[8]

$C_{40}H_{33}NO_6$ 2,6 - Phenanthrenediol, 3,5 dimethoxy 8 - [β - (N - methylbenzamido) ethyl], dibenzoate, 1406[1].

$C_{40}H_{34}O_{13}$ Xylindein, diacetyl, di-Me ether, 406[6].

$C_{40}H_{38}O_{13}$ Leucoxylindein, diacetyl-, di-Me ether, 406[6].

$C_{40}H_{50}O_{14}$ Compd., decomps. 110°, from primary lignin, 1598[9]

$C_{40}H_{60}O_{14}$ Digitalin, 2724[8].

$C_{40}H_{74}CuO_4$ Δ^3 - 2 - Eicosenone, 4-hydroxy-, Cu deriv., 739[1].

$C_{41}H_{34}O_8$ 1,1,2 - Ethanetriol, 1,2-bis(2,4-dihydroxyphenyl) - 2 - phenyl-, anhydride tribenzoate, 2324[2].
$C_{41}H_{36}N_2O$ Urea, s-bis(β-triphenylethyl), 134[6].
$C_{41}H_{38}O_7S$ Thymolsulfonephthalein, dibenzoate, 1615[4].
$C_{41}H_{41}FO_{17}$ Glucosyl fluoride, 6 (tetraacetyl-β-glucosido)-2,3,5-tribenzoyl-, 1221[8].
$C_{41}H_{44}Br_2O_{10}$ Rottlerin, hexa-Me ether, monoacetate, dibromide, 182[5].
$C_{41}H_{44}O_{10}$ Rottlerin, hexa-Me ether, monoacetate, 182[5].
$C_{41}H_{64}O_{10}$ Sterol glucoside acetate, 3100[1].
$C_{41}H_{84}NO_9P$ Glycerophosphoric acid, distearate, colamine salt, 3014[6].
$C_{42}H_{24}O_6$ Decacyclenetriol, triacetate, 2851[6].
$C_{42}H_{28}$ Rubrene, 3004[1]
$C_{42}H_{28}Br_6N_4S_2$ β Naphthothiazole, 2 (1-naphthylamino), tribromide, 195[4].
$C_{42}H_{30}K_2O_{12}$ Quinizarin, di-K deriv., salicylaldehyde addn compd, 741[5].
$C_{42}H_{30}Na_2O_{12}$ Quinizarin, di Na deriv., salicylaldehyde addn compd, 741[5].
$C_{42}H_{30}O_2$ 9,9′ - Bianthryl, 10,10′-dibenzoyl-9,9′,10,10′-tetrahydro, 3292[9].
$C_{42}H_{33}ClN_6$ Induline 6B, 602[6].
$C_{42}H_{34}Br_2$ Truxilldiol, tetraphenyl-, dibromide, 1391[8].
$C_{42}H_{34}Cl_2$ Truxilldiol, tetraphenyl, dichloride, 1391[8]
$C_{42}H_{34}N_2O_{10}S$ d Glucose, benzoylthioureide, tetrabenzoate, 1596[3].
$C_{42}H_{34}O$ Truxilldiol, tetraphenyl-, oxide, 1391[7].
$C_{42}H_{34}O_2$ 9,9′ - Bixanthyl, 9,9′-diphenethyl-, 2328[5].
$C_{42}H_{34}O_{18}$ Xylindein, tetraacetyl-, 406[5].
$C_{42}H_{36}O_2$ Truxilldiol, tetraphenyl, 1391[6,7].
$C_{42}H_{44}CuN_2O_{13}$ 5,5 - Isoxazolidinedicarboxylic acid, 2 hydroxy - 3,4 - diphenyl-, di-Et ester, Cu deriv., 2327[4].
$C_{42}H_{44}O_{20}$ Acaciin, heptaacetate, 2162[4]
$C_{42}H_{52}N_4O_7S$ Butyric acid, β sulfo, cinchonine salt, 2482[5]
$C_{42}H_{54}CdN_4O_4$ Isopyrrole, 5 ethyl 2 (5-ethyl 3 methyl 4 - propionyl 2 pyrrylmethylene) - 3 - methyl - 4 - propionyl, Cd deriv., 1236[4]
$C_{42}H_{54}CoN_4O_4$ Isopyrrole, 5 ethyl 2 (5-ethyl-3 methyl - 4 - propionyl 2 pyrrylmethylene) - 3 - methyl 4 propionyl, Co deriv., 1236[4].
$C_{42}H_{54}CuN_4O_4$ Isopyrrole, 5 ethyl 2-(5 ethyl 3 methyl - 4 - propionyl - 2 - pyrrylmethylene) 3 methyl - 4 - propionyl, Cu deriv., 1236[4].
$C_{42}H_{54}FeN_4O_4$ Isopyrrole, 5 ethyl 2 (5 ethyl-3-methyl - 4 - propionyl 2 pyrrylmethylene) - 3 - methyl 4 propionyl, Fe salt, 2863[4].
$C_{42}H_{54}N_4O_4Zn$ Isopyrrole, 5-ethyl-2 (5-ethyl 3 methyl 4 - propionyl 2 pyrrylmethylene) - 3 - methyl 4 propionyl, Zn deriv., 1236[4].
$C_{42}H_{58}N_4O_4$ Pyrrole, 2,2′,2″,2‴-acetylenetetrakis[5 - ethyl 3 - methyl-4-propionyl, 1236[4].
$C_{42}H_{66}N_{18}Ni_2O_{28}$ + $3H_2O$ Tristriaminotriethylaminebisnickelous tetrapicrate, 1589[1].
$C_{42}H_{72}O_{36}$ Heptaglucosan, 743[1].
$C_{42}H_{78}CuO_4$ Δ^3 - 2 - Heneicosenone, 4-hydroxy, Cu deriv., 739[1].
$C_{42}H_{82}O_4$ Compd., m. 70.5 1.3°, from α iodohydrin and K stearate, 2658[8].
$C_{42}H_{32}N_8O_{14}$ Methane, (1-methyl-2(1)-quinolylidene)di - 2 - quinolyl-, dimethopicrate, 2330[2].
$C_{43}H_{35}As_2N_5O_{13}$ Carbanilide, m,m′-bis[5-[(5-arsono - 2 - hydroxyphenyl)carbamyl]-o-tolylcarbamyl]-, P 970[6].
$C_{43}H_{67}N_4O_{10}P$ Glycerophosphoric acid, quinine salt, 1219[4].
$C_{43}H_{80}NO_9P$ Lecithin, 1649[3].
$C_{43}H_{88}NO_{10}P$, 1831[6].
$C_{44}H_{30}O_2$ Compd. from 3-benzal-2-phenyl-1-indanone, m. 263–5°, 1804[4].
$C_{44}H_{34}Cl_6O_4Pt$ 7 - Methoxy - 2,4 - diphenylbenzopyrylium chloroplatinate, 2499[2].
$C_{44}H_{38}O_2$ 9,9′ - Bixanthyl, 9,9′-bis(γ-phenylpropyl)-, 2328[8].
$C_{44}H_{56}N_4O_9S$ + $6H_2O$ Butyric acid, β-sulfo-, quinine salt, 2482[5].
$C_{44}H_{57}N_4O_{11}P$ Glucosephosphoric acid, cinchonidine salt, 1979[9].
$C_{44}H_{60}N_2O_4$ Betulinol, dicarbanilate, 1995[1].
$C_{44}H_{78}O_2$ Sterol ester, of acid from rubber resin, 3099[9].
$C_{44}H_{82}CuO_4$ Δ^3 - 2 - Docosenone, 4-hydroxy-, Cu deriv., 739[1].
$C_{44}H_{90}NO_9P$ Glycerophosphoric acid, distearate, choline salt, *and chloroplatinate*, 3014[4], 3015[1,3].
$C_{44}H_{32}N_6O_2S$ Carbanilide, p,p′-bis[p - (2-hydroxy - 1 - naphthylazo)phenyl]thio-, 1394[1].
$C_{44}H_{35}N_{13}O_{20}$ Toluene, 2,4,6-trinitro-, addn. compd. with azoxybenzene, 1062[5]
$C_{44}H_{36}O_3$ Decacyclene, tripropoxy, 2851[6]
$C_{45}H_{86}O_6$ Myristin, 3280[7], 3283[1].
$C_{46}H_{34}O_4$ 9,9′ - Bianthryl, 10,10′-dibenzoyl-9,9′,10,10′ tetrahydro, diacetate, 3292[9].
$C_{46}H_{37}FO_8$ d-Glucosyl fluoride, 6-triphenylmethyl-, tribenzoate, 1221[7].
$C_{46}H_{38}Cl_6O_6Pt$ 5,7(and 7,8)-Dimethoxy-2,4-diphenylbenzopyrylium chloroplatinate, 2499[2].
$C_{46}H_{35}O_2$ Bibenzopyran, tetramethyltetraphenyl-, 3168[1].
$C_{46}H_{42}Br_2$ Truxilldiol, tetra p-tolyl-, dibromide, 1391[9].
$C_{46}H_{42}Cl_2$ Truxilldiol, tetra p-tolyl-, dichloride, 1391[9]
$C_{46}H_{44}O_2$ Truxilldiol, tetratolyl-, 1391[8,9]
$C_{46}H_{44}O_6$ Truxilldiol, tetra-p-anisyl-, 1391[9].
$C_{46}H_{46}N_2O_7$ Narcophine, 1270[1]
$C_{46}H_{50}N_4$ Biphenyl, p,p′-bis[p,p′ bis(dimethylamino)benzohydryl]-, 2836[9].
Leucodimalachite green, 2836[9].
$C_{46}H_{52}N_4O_9S$ + $5H_2O$ Butyric acid, β-sulfo-, strychnine salt, 2482[4].
$C_{46}H_{68}O_{40}$ See *Pectic acid*
$C_{46}H_{86}CuO_4$ Δ^3 - 2 - Tricosenone, 4 hydroxy-, Cu deriv., 739[1].
$C_{47}H_{26}Br_2O_{12}S$ Sulfonegallein, dibromo-, tetrabenzoate, 2491[6].
$C_{47}H_{28}O_{12}S$ Sulfonegallein, tetrabenzoate, 2491[4].
$C_{47}H_{44}Br_2O_{16}$ Rottlerin, heptaacetate, dibromide, 182[5].
$C_{47}H_{46}O_{16}$ Rottlerin, heptaacetate, 182[5].
$C_{47}H_{51}AsI_4$ Tribenzylmethylarsonium iodide, CHI_3 addn. compd., 2815[9].
$C_{48}H_{24}O_4$ Isoviolanthrone, bz-2,2 - dibenzoyl-, 3293[4].
Violanthrone, bz-2,2-dibenzoyl, 3293[4].
$C_{48}H_{33}Br_2CrO$ Bis(p - bromophenylphenylphenylphenyl)chromium hydroxide, 2668[4].

$C_{48}H_{34}O_2$ 9,9'-Bixanthyl, 9,9'-bis(1-naphthylmethyl)-, 2328[5].
$C_{48}H_{36}Cl_6N_6O_2Pt$ 12-(p-Acetamidophenyl)-12-α-benzophenazonium chloroplatinate, 602[3].
$C_{48}H_{37}Fe_3N_3O_{14}S$, 1186[7].
$C_{48}H_{48}N_2O_{10}$ Quinine, bisalicylosalicylate, P 2564[2].
$C_{48}H_{47}AlKN_4O_{16}$ Aluminum potassium distrychnine oxalate, 766[6].
$C_{48}H_{80}O_{40}$ Graminin, 2184[3].
$C_{48}H_{91}Cd_2Cl_4NO_{17}P$, 1831[7].
$C_{48}H_{120}O_{18}N_{12}$, 918[1].
$C_{49}H_{32}Br_3CrOS_2$ Bis(p-bromophenylphenylphenylphenyl)chromium hydroxide, CS_2 addn. compd., 2668[5].
$C_{50}H_{32}Cl_4N_2O_2$ Peroxide, bis{1(and 3)-chloro-10-[o(and p)-chlorophenyl]-5,10-dihydro-5-phenyl-5-acridyl}-, 1922[3,4].
$C_{50}H_{34}Cl_2N_2O_2$ Peroxide, bis(3-chloro-5,10-dihydro-5,10-diphenyl-5-acridyl)-, 1992[3].
—, bis[5-(chlorophenyl)-5,10-dihydro-10-phenyl-5-acridyl]-, 1991[9].
$C_{50}H_{52}O_6$ Truxilldiol, tetra-o-phenetyl-, 1391[9].
$C_{50}H_{54}N_4O_4$ Dimalachite green, diacetate, 2836[9].
$C_{50}H_{56}N_8O_9$ 1-Propanone, 3-(3-ethylidene-4-piperidyl)-1-(6-methoxy-4-quinolyl)-, picrolonate, 1993[8].
$C_{50}H_{60}N_4O_{13}S + 8H_2O$ Butyric acid, β-sulfo-, brucine salt, 2482[4].
$C_{50}H_{60}HgI_4N_2$ Quinoline, complex salt with $C_{16}H_{21}I$ and HgI_2, 3695[9].
$C_{51}H_{57}N_6O_{13}P$ Uracylic acid, strychnine salt, 767[9].
$C_{51}H_{58}N_7O_{12}P$ Cytosylic acid, strychnine salt, 767[9].
$C_{51}H_{55}I_{11}N_2$ Tribenzylpropylammonium iodide, CHI_3 addn. compd., 2815[9].
$C_{51}H_{61}Hg_2I_7N_4$ Quinoline, complex salt with $C_5H_{11}I$ and HgI_2, 3695[9].
$C_{52}H_{44}Cl_6N_8Pt$ Flavinduline, 11,12-diamino-, chloroplatinate, 590[9].
$C_{52}H_{42}Cl_6N_8Pt$ 6,7-Diamino-1,2,3-triphenylquinoxalinium chloroplatinate, 591[1].
$C_{52}H_{46}O_2$ Peroxide, bis[diphenyl(p-tolylphenyl)methyl], 1988[4].
$C_{52}H_{57}N_8O_{12}P$ Inosinic acid, strychnine salt, 767[9].
$C_{52}H_{58}N_9O_{11}P$ Adenylic acid, strychnine salt, 767[9].
$C_{52}H_{58}N_9O_{12}P$ Guanylic acid, strychnine salt, 767[9].
$C_{52}H_{65}N_4O_{17}P$ Glucosephosphoric acid, brucine salt, 1979[9].
$C_{52}H_{70}O_{35}S$ Sulfone, 1,1-dicellosyl, tetradecaacetate, 379[7].
$C_{52}H_{76}O_{30}$ Digital, acetyl deriv., 2724[8].
$C_{53}H_{44}N_2O_{11}$ Arabinose, ureide, hexabenzoate, 1596[3].
$C_{53}H_{102}O_6$ Arachin, myristopalmito-, 303[8].
Palmitin, α,γ-di-, β-stearyl-, 2818[9].
$C_{54}H_{38}O_2$ Bibenzopyran, hexaphenyl-, 3167[4].
$C_{54}H_{38}O_4$ Peroxide, bis(triphenylbenzopyranyl), 3167[4].
$C_{54}H_{56}N_7O_{14}$ Diphenic acid, 3,5,5'-trinitro-, quinine salt, 1620[4].
$C_{54}H_{58}ZnO_{10}S_2$ Thymolsulfonephthalein, Zn deriv., 1615[4].
$C_{54}H_{144}Co_2N_{18}O_{18}S_6 + 4H_2O$, 3138[6].
$C_{55}H_{65}N_6O_{17}P$ Uracylic acid, brucine salt, 767[9].
$C_{55}H_{66}N_7O_{16}P$ Cytosylic acid, brucine salt, 767[9].
$C_{55}H_{106}O_6$ Stearin, di-, palmityl-, 2769[1], 2818[9].
$C_{56}H_{26}Br_2S_2$ p-*meso*-Benzodianthrene, 8,8'-dithiobis[16-bromo-, 192[4].
$C_{56}H_{36}CuN_4O_4$ Indigotin, 1,1-diphenyl-, Cu deriv., 414[4].
$C_{56}H_{42}O_2$ Bibenzopyran, dibenzyltetraphenyl-, 3167[7].
—, dimethylhexaphenyl-, 3168[1].
$C_{56}H_{44}O_4$ Truxilldiol, tetraphenyl-, dibenzoate, 1391[7].
$C_{56}H_{65}N_8O_{16}P$ Inosinic acid, brucine salt, 767[9].
$C_{56}H_{66}N_9O_{15}P$ Adenylic acid, brucine salt, 767[9].
$C_{56}H_{66}N_9O_{16}P$ Guanylic acid, brucine salt, 767[9].
$C_{57}H_{30}O_3$ Decacyclene, 3,9,15-tribenzoyl-, 1076[2].
$C_{57}H_{49}N_3O_{14}Zr_3$, 717[7].
$C_{57}H_{110}O_6$ Arachin, palmitostearo-, 303[8].
$C_{58}H_{110}Br_4N_{12}Ni_2O_{16}S_4$ Tristriaminotriethylaminebisnickelous tetra-d-α-bromocamphor-π-sulfonate, 1589[3].
$C_{58}H_{114}N_{12}Ni_2O_{16}S_4$ Tristriaminotriethylaminebisnickelous tetra-d-β-camphorsulfonate, 1589[3].
$C_{59}H_{114}O_6$ Arachin, distearo-, 303[8].
$C_{60}H_{46}O_2$ Peroxide, bis[1-naphthylphenyl(p-tolylphenyl)methyl], 1988[4].
$C_{60}H_{60}N_6O_{16} + 2.5H_2O$ Diphenic acid, 3,5'-dinitro-, dibrucine salt, 1801[2].
$C_{60}H_{80}O_{17}$ Compd. from primary lignin, 1598[9].
$C_{61}H_{78}O_{10}$ Sterol glucoside benzoate, 3100[2].
$C_{62}H_{42}O_2$ Bibenzopyran, dinaphthyltetraphenyl-, 3167[6].
$C_{62}H_{42}O_4$ Peroxide, bis(naphthyldiphenylbenzopyranyl)-, 3167[6].
$C_{63}H_{122}O_6$ Behenin, arachostearo-, 303[9].
—, palmitodi-, 303[9].
$C_{64}H_{58}Mn_4N_2O_{18}$, 717[7].
$C_{64}H_{58}N_2Ni_4O_{18}$, 717[7].
$C_{64}H_{66}O_2$ Stearic acid, cetyl ester, 2818[9].
$C_{65}H_{126}O_6$ Behenin, diaracho-, 303[9].
$C_{66}H_{71}Cl_2Fe_4N_{16}O_{43}$, 1186[9].
$C_{67}H_{130}O_6$ Behenin, arachodi-, 303[9].
$C_{68}H_{56}N_2O_{18}$ d-Glucose, ureide, octabenzoate, 1596[4].
$C_{69}H_{66}AlN_6O_{18} + 10H_2O$ Aluminum strychnine oxalate, 766[5].
$C_{72}H_{66}I_8N_6$ 4,4'-Bipyridinium, 1,1'-dibenzyl-, "two thirds" iodide, 2164[1].
$C_{75}H_{44}O_{16}$ Rottlerin, hexabenzoate, 182[6].
$C_{75}H_{147}Cl_{15}N_{44}Tl$, 156[9].
$C_{77}H_{58}O_{22}$ Acaciin, heptabenzoate, 2162[4].
$C_{82}H_{88}NO_{31}S_4$ Compd. from lignin, p-toluenesulfonyl chloride, and C_5H_5N, 2816[9].
$C_{90}H_{65}Br_6Cr$ Pentakis(p-bromophenylphenylphenyl)chromium bromide, 2668[5].
$C_{101}H_{185}N_5O_{20}PS$ Hypocerebric acid, 768[1].
$C_{102}H_{192}O_{12}$ Inositol, hexapalmitate, 2831[6].
$C_{104}H_{150}O_{80}$, 1342[9].
$C_{118}H_{89}Cl_6Fe_6N_4O_{56}$, 1186[7].

O_4SiTl_4 Thallium orthosilicate, 1962[9].
O_4SiZr See *Hagatalite; Oyamalite; Zircon.*
O_4SrU Strontium uranate, 3657[3].
O_4UZn Zinc uranate, 3657[3].
O_5P_2 See *Phosphorus oxides.*
O_5SSn_2, 1570[8].
O_5Ta_2 See *Tantalum oxides.*
O_5V_2 See *Vanadium oxides.*
O_5W_2 See *Tungsten oxides.*
O_6P_2Sn See *Tin metaphosphate.*
O_6SSn_3, 1570[8]
O_6SU Uranyl sulfate, 1018[6].
O_6S_2Sr + $4H_2O$ See *Strontium dithionate.*
O_6Se_2U Uranium selenite, 3139[4].
O_6SiZn_4 Zinc silicate, 2960[3].
$O_7P_2Sn_2$ See *Tin pyrophosphate.*
O_7SZr_2 + $5H_2O$ Zirconyl sulfate, 2962[8].
O_7SrV_2 See *Strontium vanadate.*
$O_8P_2Sn_3$ See *Tin phosphates.*
O_8Pr_4 + H_2O See *Praseodymium oxides.*
O_8S_2U See *Uranium sulfate.*
O_8S_2Zr + $4H_2O$ Zirconium sulfate, 319[3].
O_8U_3 See *Uranium oxides.*
$O_{11}Pr_6$ See *Praseodymium oxides.*
$O_{11}S_2V_2$ Vanadyl sulfate, 2626[5].
$O_{12}P_2PbU_2$ + $3H_2O$ See *Dewindtite.*
$O_{12}S_2Zr_3$ + $5H_2O$ Zirconyl sulfate, 2962[4].
$O_{12}S_3Sb_2$ See *Antimony sulfate*
$O_{12}S_3Sm_2$ Samarium sulfate, 2112[4]
$O_{12}S_3Tb_2$ Terbium sulfate, 2112[4]
$O_{12}S_3Tm_2$ Thulium sulfate, 2112[4].
$O_{12}S_3Yb_2$ Ytterbium sulfate, 2112[4].
$O_{12}U_3V_2$ Vanadium uranate, 3657[3].
$O_{13}Sr_2V_4$ + $2H_2O$ Strontium vanadate, 1185[6].
$O_{16}P_4Zr_3$ See *Zirconium phosphate*
$O_{16}S_4Tl_4$, 1767[8]
$O_{17}Pb_2U_5$ + $4H_2O$ See *Curite.*
$O_{17}V_6Zn_5$ Zinc vanadate, 1185[5].
$O_{18}S_5Tl_{10}$, 1767[8]
$O_{24}Pr_2S_5U_2$ + $15H_2O$ *Praseodymium uranyl sulfate*, 558[6].
$O_{27}S_7Zr_8$ Zirconyl sulfate, 2962[4].

P_2S_3 See *Phosphorus sulfides.*
PbS See *Galena; Lead sulfides.*
PbSe Clausthalite, 131[3].
PbTe Lead telluride, 882[1].
$Pb_2O_{11}V_4$ + $2H_2O$ Lead vanadate, 1185[6].
PdTe Palladium telluride, 882[1].
$PtTe_2$ Platinum telluride, 882[1].

SSn See *Tin sulfide.*
STl_2 See *Thallium sulfide.*
SZn See *Sphalerite; Wurtzite; Zinc sulfide.*
S_2W See *Tungsten sulfide.*
S_3Sb_2 See *Antimony sulfides; Stibnite.*
S_5Sb_2 See *Antimony sulfides.*
Sb_2O_3 See *Antimony oxides.*
Sb_2O_4, 1569[6].
Sb_2Te_3 Antimony telluride, 882[1]
Sb_2O_5, 1569[6].
SnTe Tin telluride, 882[1].

$TeTl_2$ Thallium telluride, 882[1].
TeZn See *Zinc telluride.*

ABBREVIATIONS USED IN CHEMICAL ABSTRACTS

[α] specific rotation ($[\alpha]^{20}_{D}$, for 20° and sodium light)
abs. absolute
Ac acetyl (AcH, acetaldehyde; AcOH, acetic acid)
a. c alternating current
addn. addition
addnl. additional
alc. alcohol
alk. alkaline (not alkali)
alky. alkalinity
Am amyl
amp. ampere(s)
amt. amount
anhyd. anhydrous
app. apparatus
approx. approximate, approximately
aq. aqueous
assoc. associate(s)
assocd. associated
assocn. association
at. atomic (not atom)
atm. atmosphere(s), atmospheric
at. wt. atomic weight
av. average (except as a verb)
b. (followed by a figure denoting temper- [illegible]ature) boils at, boiling at (similarly
[illegible]nal unit(s)
Bu butyl (normal)
Bz benzoyl (BzH, benzaldehyde; BzOH, benzoic acid)
cal. calorie(s)
calc. calculate
calcd. calculated
calcg. calculating
calcn. calculation
cc. cubic centimeter(s)
c. d. current density
chem. chemical (not chemistry)
cm. centimeter(s)
coeff. coefficient
com. commercial
compd. compound
compn. composition
conc. concentrate
concd. concentrated
concn. concentration
cond. conductivity
const. constant
contg. containing
cor. corrected
c. p. candle power
c. P. chemically pure
crit. critical
cryst. crystalline (not crystallize
crystd. crystallized
crystn. crystallization
cu. m. cubic meter
d. density (d_{13}, specific gravit referred to water at 4°; d^2_2 referred to water at the s perature)
d. c. direct current
decompn. decomposition
deriv. derivative
det. determine
detd. determined
detg. determining
detn. determination
dil. dilute
diln. dilution
dissoc. dissociate(s)
dissocd. dissociated
dissocn. dissociation
distd. distilled
[illegible] distilling
elec. electric, electrical
e. m. f. electromotive force
equil. equilibrium
equiv. equivalent
est. estimate
estd. estimated
estg. estimating
estn. estimation
Et ethyl (Et_2O, ethyl ether)
evap. evaporate
evapd. evaporated
evapg. evaporating
evapn. evaporation
examd. examined
examg. examining
examn. examination
expt. experiment
exptl. experimental
ext. extract
extd. extracted

extg. extracting
extn. extraction
f. p. freezing point
ft. foot, feet
g. gram(s)
h. p. horsepower
hr. hour
in. inch(es)
inorg. inorganic
insol. insoluble
kg. kilogram(s)
kw. kilowatt(s)
l liter(s)
lab. laboratory
lb. pound(s)
m. meter(s); also (followed by a figure denoting temperature) melts at, melting at
manuf. manufacture
math. mathematical
max. maximum
Me methyl (MeOH, methanol
mech. mechanical
mfg. manufacturing
mg. milligram
min. minimum (also minute(s))
mixt. mixture
mol. molecule, molecular
mol. wt. molecular weight
m. p. melting point
n index of refraction (20 to 90° and sodium light)
N normal
neg. negative
no. number
org. organic
p. d. potential difference
pharmacol. pharmacological
phys. physical
physiol. physiological
pos. positive
powd. powdered
p. p. m. parts per million
ppt. precipitate
pptd. precipitated
pptg. precipitating
pptn. precipitation
Pr propyl
prep. prepare
prepd. prepared
prepg. preparing
prepn. preparation
qual. qualitative
quant. quantitative
recrystd. recrystallized
resp. respectively
r. p. m. revolutions per minute
sapon. saponification
sapond. saponified
sapong. saponifying
sat saturate
satd. saturated
satg saturating
satn. saturation
sec. second(s)
sep. separate
sepd. separated
sepg. separating
sepn. separation
sol soluble
soln. solution
soly. solubility
sp specific Ale: Zinc sulfide.
sq. cm. square centimeter(s)
sym. symmetrical
temp. temperature
U. S. P. United States Pharmacopeia
v. volt(s)
vol. volume (not volatile)
w. watt(s)
w. p. c. watts per candle
wt. weight
